**EXPLOSION DAMAGE.** Twisted steel and rubble mark the former location of the garage and utility room at the Carl Minton home in the Buffalo community after an early morning explosion of a butane tank Tuesday. Members of the VFD reported the fine home to be a total loss with many of the standing walls buckled by the blast.

**WIDE ANGLE VIEW.** What once was a large picture window overlooking the hillside and valley at the Carl Minton home is now a gaping hole in the brick and steel house. None of the three occupants was injured in the Tuesday morning explosion of a butane tank.

## Tuesday Morning Explosion Demolishes Country Home

The explosion of a butane tank on a pickup truck nearly demolished the Carl Minton home in the buffalo community early Tuesday morning. Despite the force of the blast, none of the three occupants of the home were injured.

The pickup was parked inside the large garage at the home, and all the family was sleeping at the time of the explosion and awakened by falling debris.

The palatial brick, masonry and steel home is considered almost total loss by members of the Santa Anna Volunteer Fire Department who were summoned to the scene about 6:30 a.m. However there was very little fire and it was quickly extinguished.

Mr. and Mrs. Carl Minton and his mother, Mrs. Clara Minton, were uninjured in the explosion. Mr. Minton walked to the Billy Archer home about two miles away to summon help.

Although the walls of the three-bedroom, three bath home were left standing many of the walls were buckled by the blast. Every window in the large home was said to be broken in the explosion, and several of the large picture windows overlooking the hilltop site were blown out by their frames.

Built about ten years ago by the former Houston business

people, the house was considered one of the showplaces in the area. It is located west of the former Buffalo school site. Mrs. Carl Minton is the former Beulah Tisdale, a sister of Mrs. Joe Wise of Rockwood.

Some of the spectators at the scene thought most of the valuable antique furniture could be salvaged, and reported that delicate crystal in the cabinets in the dining room was undamaged by the impact.

## Infestations Of Screwworms Start Again

SAN ANGELO Screwworms continue to increase slowly but surely along a U. S. line roughly parallel to the Rio Grande.

Officials confirmed Tuesday, May 29, the 9 latest cases: two in Brewster County and one each in the counties of Brooks, Crane, Hidalgo, Jeff Davis, Jim Hogg, Medina and Zavala.

Dr. James Novy said Tuesday that, with the exception of Brewster and Medina, the other counties had reported their first 1973 screwworms. He is director of field operations at the Mission, Texas headquarters of the USDA Screwworm Eradication Program.

"We had expected this build-up," said Novy, "and we are air-dropping an enormous number of sterile screwworm flies on the Coahuila side of the river."

"Even so, such preventive measures are not enough. We urgently need for livestock producers to mail us samples of what may be screwworms. In case of confirmation, we can then quickly hot-spot (air-drop sterile flies at the very spot where the worms are found)."

Although dry weather is helping some, those areas much susceptible are FAR West Texas, Transpecos, Hill Country and Edwards Plateau. Cases confirmed in week ending May 26 were 5 in Medina, 2 in Hidalgo, and 1 each in Glasscock, Brewster and Starr counties.

County extension agents in the areas are working with producers to check the worms as much as possible, and are mailing samples to Screwworm Laboratory, Box 969, Mission, Texas 78572.

*In Our Opinion*

By W. T. HAYS

SOME PEOPLE MIGHT be surprised if they knew that it has been estimated on good authority that the Watergate hearings have already cost the tax payers of this country \$2 million.

Those of us who are tired of seeing it and hearing it on television are somewhat perturbed that the government would spend that much money on something that, on the surface at least, indicates it to be purely political.

The whole thing seems to be that some people want to "get the President" and from most sources it is indicated that they will fail.

Surely, we feel that those who were actually implicated in the Watergate affair, as foolish as it was, should be prosecuted, and the attorney general has appointed a good man to do just that. But all the time-consuming hearings in Congress, where not only the time of the law-makers is taken up, but an enormous staff of clerical workers, attorneys, and what have you, is being paid out of our pockets, is something else.

If the public felt that anything constructive was being accomplished, we might see spending some money on it, but to many of us, it is merely a fight between the Republican and Democratic parties, and since when should the taxpayers foot the bill for that?

What the whole country should do is write every congressman and senator in Washington protesting throwing our money down the drain and see if it wouldn't have some impact.

Not only is it a political fight, but it is giving a few in congress the chance to get on television and that don't hurt their chances in the next election. They couldn't afford to buy that much television time under any circumstances.

It has gotten to the point where corruption is so prevalent in Washington circles, as well as the state level that we look to the future with cynical eyes, and wonder where do we go from here. If we don't get more statesmen and less politicians representing us in Congress, our future is certainly questionable.

To top it all off, our image abroad, as bad as it was to begin with, hasn't been helped. The foreign politicians understand it, but the rank and file people of other countries do not. The only thing it has accomplished in that case is ridicule.

It looks pretty bad when the largest and strongest nation in the world begins to act like a bunch of kids disagreeing on the rules of the game. It is bad!

## SAHS Science Teacher, Student Attend Nuclear Science Meeting

Twenty-one outstanding students and teachers from the area served by West Texas Utilities Company attended the 13th Annual Nuclear Science Symposium at the University of Texas in Austin. The conference got underway Monday, June 4th and ended Thursday, June 7th.

Sponsored by WTU from this area were Mr. Floyd Marshall, science teacher at Santa Anna High School, and Susan Newman, a student at SAHS.

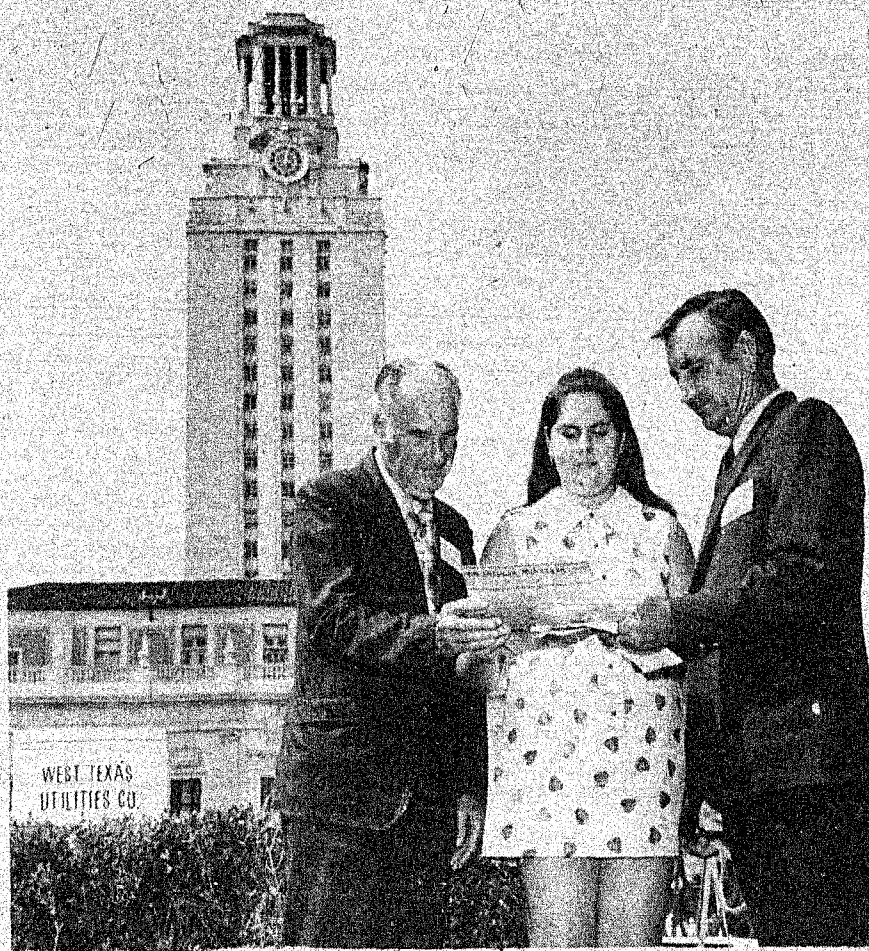

The Symposium was jointly sponsored by the Texas Atomic Energy Research Foundation and the University of Texas. West Texas Utilities is one of the sponsoring companies for TAERF.

The 500 selected high school science students and teachers

who attended the session were offered the rare opportunity of hearing lectures by some of the nation's outstanding nuclear scientists.

The Foundation was formed for the primary purpose of conducting the world's first and largest privately financed research effort in the field of nuclear energy. Currently, the Foundation and General Dynamics Corporation are jointly sponsoring a program in nuclear fusion research aimed at controlling thermonuclear reactions for the production of electric power. Fusion is the energy process of the sun and the stars.

The goal of the Foundation and WTU is not research alone, but to also assist in the advancement of

**ATTEND SYMPOSIUM.** Floyd Marshall, SAHS science teacher, and Susan Newman, a senior student, study the program schedule with Bill Tedder, West Texas Utilities Co. representative, at the 13th annual Nuclear Science Symposium held last week at the University of Texas at Austin. Marshall and Miss Newman were chosen to attend the week-long symposium and were sponsored by WTU.

the knowledge of nuclear science in Texas schools. Of special interest to the sponsors is bringing to students and teachers a realization of the privileges, responsibilities and opportunities which scientific discoveries in the new nuclear energy presents.

WTU paid all expenses for the 21 students and teachers attending from schools in the area served by the company.

Lecturers at the Symposium were chosen from top men in their field.

There are over 1,000 accredited senior high schools in the state of Texas. Santa Anna can be justly proud of its high school for having been chosen by the University of Texas as one of the 150 high schools in the state invited to send a student and teacher to the Symposium.

## Local People Will Attend Campmeeting

"The old fashioned campmeeting is still happening," states pastor Sam Miller of the Seventh-day Adventist Church.

The meeting scheduled for the Texas Conference will be held on the campus of Southwestern Union College at Keene, June 9 to 16. Most of the Santa Anna members plan to attend at least a part of the time, some all the time, and they will live in a tent or a dormitory room.

Services for some begin at 5:00 a. m., perhaps taking a brisk walk so the body as well as mind will be tuned for the program for the day. The pastor, as well as other pastors, is beginning his stay there early—helping to set up tents and see that everything is in readiness for the crowds that will be there.

Pastor Miller says, "It is a time of spiritual renewal for everyone who can take the time to attend these special meetings. "And," he adds "the meetings are open to people of all faiths. If you love Jesus or want to find Him, you'll feel at home at campmeeting."

## ASCS NEWS

The policy of collecting loan service fees was established many years ago. These fees are used to pay for costs incurred in disbursing loans to producers.

A study has been made concerning loan service fees as they relate to the cost of disbursing loans. The study revealed that over the past several years collections and expenditures have not been nearly equal in amount. Collection rates have not changed in several years, however, expenditures for salaries, travel, and other county office cost have steadily increased. To keep fees more nearly in line with actual cost of processing commodity loans, it has now become necessary to raise the loan service fees on commodity loans.

On farm storage loans the fee is \$10 per loan for loan quantities up to two thousand bushels of hundredweight, plus one half cent per bushel or one cent per cwt. for each bushel or cwt. over two thousand bushels or cwt, not to exceed twenty five dollars per loan disbursement.

On warehouse storage loans the fee is six dollars per loan with single receipt plus one dollar for each additional receipt.

Commodities stored on the farm should be placed in bins that are considered suitable for storage. It should be reasonably protected from rats, birds, mice and other contamination, and it should be sufficiently tight so the grain can be fumigated. The grain should be adequately protected from weather including floods. The structure should be so located that it would lessen the dangers of fire or theft.

Cotton loans documents prepared by the County Committee will be \$1.50 per loan plus twenty-five cents per bale.

Farmers are reminded that certification of cotton, feed grain and set-aside is necessary before a payment can be made. July 2 is the final date for certification.

Payment this year may be a little later than last year. The data processing machine at Kansas City is not furnishing correct data on farmers information submitted for payment.

## THE MAIL BOX

Barbara Kingsbery, Editor,  
Santa Anna News,  
Santa Anna, Texas

Dear Madam:

One of the best Christmas presents I ever received has been a sub to the SA News, given by my Sister, Mrs. Dick Baugh. Probably this was an effort on her part to make me quit needing her for her old copies.

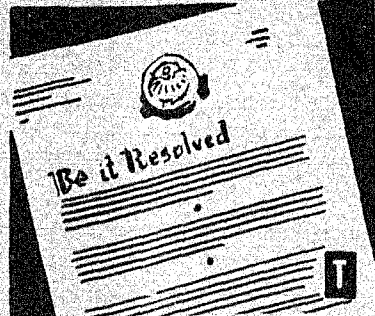

We surely do enjoy reading of the folks in Santa Anna, although I realize that many mentioned are probably grandsons or granddaughters of the people we knew when we lived there.

I graduated in 1932, and you can tell Wendell Sparkman and others that I know of the hard times existing then. After receiving the Salutatorian spot in class 1932, I went off to Howard Payne to try to get in school. The registrar advised me that the least that I could get by with for the first semester would be \$30.00. For eight weeks I tried to get the money, and so did my father, but we could not make the riffle: so I did not get to go there. My, haven't times changed?

Keep up the good news. For some reason I do not know, I always feel let down when there is not a weather report in the Whon news!

Yours,

## FATHER'S DAY LORE AND LEGEND

Although we tend to take Father's Day for granted, it was only a year ago that it was established permanently by congressional resolution. Since 1910, the occasion had to be designated every year, rather than observed automatically, like Mother's Day.

How it became part of the calendar is an interesting story of angry battles in Congress and protest all across the land. One of the most notable efforts was launched by Senator Margaret Chase Smith who, in 1957, sent a proposal to Congress which read, in part:

"... The Congress has been guilty now for forty years of the worst possible oversight, to say the least, perpetrated against the gallant fathers, young and old, of our land... Either we honor both our parents, mothers and fathers, or let us desist from honoring either one... But to single out just one of our two parents and omit the other is the most grievous insult imaginable."
