When the pain is particularly sharp, this may indicate a tarsal tunnel syndrome in which the nerves and blood vessels are compressed by the swelling of the tendons, muscles, and soft tissues. #### What, Me Worry?

I tend to worry more than I should.

I don't worry much about little things, like being late or wrecking the car. My worries tend toward the catastrophic.

For instance, the other day I took my husband to the airport to see him off on a business trip. While we were waiting for him to board, I noticed a suspicious-looking woman pacing in the small terminal, glancing about rather furtively.

She looked to me a lot like someone who had planted a bomb in the luggage that was being loaded on the plane. I worried about that until much later in the evening when Jim called, safe at his destination.

Children, of course, are a major source of worry. When our oldest

daughter was about 9 months old, her pediatrician informed me that she had an unusually large head. I spent several hours at the library researching encephalitis. Then I conducted an inquisition into the head size of every living family member. Distant relatives from as far away as California were re-

> quired to send me their measurements. As it turned out, large heads run in the family.

Worrying is something else that runs in my family. My parents' worries have caused me a lot of grief over the years, especially during my young, impressionable years.

For example, my mother, who does worry about little things, used to worry a lot about ear infections, so she made me wear a swim cap. It was humiliating as well as ineffective. The first time I got up my nerve to jump off the high dive, water rushed into the cap with a force that punctured my eardrum.

That experience probably should have taught me something about worry, but it did not. I do not require my daughter to wear a bathing cap, but then she really has little need for one on dry land, where I'm pretty sure she won't drown.

I know it's hard having a worrywart like me for a parent, but there seems to be no escape. Just when I think I have every base covered, something new crops up.

Like yesterday, when my father called to warn me against letting our daughter's hair grow too long. It could, he cautioned, become caught in I wondered what sort of dangerous machinery a 9-year-old might en-

counter, but I had to admit he had a point. The notion has given me pause ever since. To top it all, I just read an article that said worry is unhealthy. People

who worry tend to become ill more often and have more accidents. Looks like another sleepless night.

Young men who will turn 26 in 1990 will be reaching an important milestone, according to the Selective Service System.

Doyle points out that men age 18 through 25 who have not yet registered can avoid the risk of prosecution and loss of benefits by registering promptly at any local post office. Failure to register is a felony punishment by a fine of up to \$250,000, up to five years in prison, or
