land of yesterday has gone, in Home Owner's Loan go far as concerns population.

Tax dodging is no worse than

Corporation Now

The local attorney, E. M. Critz, and the local appraiser, Howard principle of subsistence farming. A. Newsom, have received their Here in Texas vacant land is authority and instructions from

> The following is a brief resume of the provisions of the law and to the borrower:

The purpose of loans from this corporation is to take up and pay off, renew and extend existing liens against homesteads

Eighteen-year 4 per cent, taxfree bonds to the amount of mortgage and accrued interest will be given by the corporation to the mortgage holder in ex-We are in favor of and inno- change for the mortgage. The first mortgage and give the

home owner 16 years to pay it off, at 5 per cent interest. Unpaid taxes, paving and oth-In Operation er liens on the property will be

paid by the corporation. Money for necessary repairs will be advanced.

If absolutely necessary, the corporation will give the home

In special cases, where the holder of the mortgage demands a cash settlement, the corporation will lend up to 40 per cent of the appraised value of the property in cash-but on such loans, the interest rate will be raised to 6 per cent.

The maximum relief offered is \$14,000 or 80 per cent of the appraised value of the property, whichever is the smaller amount. The first step for the home owner to take is to obtain and fill out the application blank and reach an agreement with the holder of the mortgage on the settlement that the latter will accept. This application and agreement are to be delivered to the appraiser, Howard A. Newsom. After checking the application, the manager will notify the home owner to call upon the appraiser in his county to have the value of his property fixed. A fee of \$5 will be charged the home owner by the appraiser.

If the appraisal is satisfactory, the home owner then will be directed to visit the corporation's attorney in his county to have the title to his property examined. This will cost the home owner \$10, in addition to the charge of making an abstract of the title. The borrower will also have to furnish an abstract of title to date.

These steps having been taken, the attorney will take from the home owner a mortgage and deed of trust, in behalf of the corporation, and bonds will be transferred immediately to the nortgage holder.

Procedure is the same when advantage is sought to be taken of the provision of the Home Loan Act for repossession of property foreclosed within two years prior to enactment of the law last June 13. If the former mortgage holder will agree to deed the property back, funds will be advanced for the deal by

the corporation. Bonds of the corporation have been printed and within a few days will be available at the Dallas office. Shaw expects appraisal and title examinations, now pending to be completed and bonds transferred to mortgage holders within less than two weeks. More than 4,000 applications have been checked and filed ready for appraisal. Shaw estimated 60 per cent were eligible for loans. Last week the state organization of attorneys and appraisers was completed and instructions to them

were in the mails Monday. Most significant of the instructions apply to appraisals. per. This plan has been adopted: "First, take the cost of the

mprovements on the property, plus the value of the land itself in one bracket. Then take the present market value of the property in another bracket. Take the reasonable value of the property capitalized upon a rental basis, less reasonable depreciation, for the third bracket. In arriving at these figures
