"He Profits Most Who Serves Best"

SMOKE

FROM THE MOUNTAIN

The well-known accusation that professors are absentminded can also be applied to one preacher here, but it turned out quite happily anyway. Rev. Dunham was leaving Brownfield last week-end where he had been for several days and for some reason parked his suitcase filled with his entire wardrobe on the sidewalk and went off and left it. When he got to Santa Anna he found he had only the clothes on his back and it looked like a recurrence of old man depression

membered to write in his weekly column from Brownfield this

in the band with the students, Bartlett, Marshall. while Pettit swung the baton.

They say hungry Lions roar louder than when fed and that may still be the case because Former Resident the Lions Club had "pot luck" last Tuesday when no one showed up to serve them dinner. Mr. Garrett dashed out and got some sandwiches and accessories so they didn't quite starve by any means but they organization take them under

However, J. T. Garrett has volunteered to do the cooking ladies can persuade him to according to reports has proved by an automobile while walking The station was opened for give up his job. He said he would cook one of the men's favorite dinners — roast beef, favorite dinners — roast beef, favorite dinners and that doesn't sound bala at that doesn't sound bala at and Brahma bull riding events.

Fancy A Nation With No Daily Newspapers

ONE OF AMERICA'S FAVORITE INDOOR SPORTS is criticizing the newspapers.

Writing letters to the editor seems to be the hobby of a good many citizens, and a lot of the letters are directed at the newspaper itself, or its writers.

Let a comma be misplaced, a word be misspelled, a statement be not quite accurate, and there always are plenty of persons eager to point out the error. Even the President takes a crack at the newspapers occasionally when For County Judge: their policies don't coincide with his.

But what if there were no newspapers? What would happen if a time suddenly came when citizens no longer could obtain their evening, morning, or weekly papers for For County Treasurer:

The good people of Portland, Ore., can answer that question. A typographers' strike closed down all three newspapers in the city and for five days Portland squirmed.

Business was adversely affected because stores couldn't

Sports events had to be canceled because they could not be announced. The same was true of club and society

People got married, and divorced and had babies, and no one knew about it except their close friends,

Dogs, pocketbooks, and jewels stayed lost because there

were no "lost and found" columns. Firms which wanted to hire workers were unable to do so because neither could advertise.

Absurd and exaggerated rumors were rife because there were no newspapers to publish accurate information, been authorized to announce tian Church, and worship with As only the high-spots of the news were broadcast, the that J. C. Morris will be candi- us at the Methodist Church, and populace knew few details of the Sino-Japanese war, the date for the office of Public bring the message of the hour.

congressional situation, and other events. No one knew what shows to go to because the theaters ject to the July primaries. couldn't advertise.

Newspaper readers in Portland complained vigorously because of discontinuance of comic strips. When last they for the past ten years, and has ility speak upon such subjects saw a paper, Wash Tubbs and Cap'n Easy were trying to rescue an heiress from an island. Readers wanted to know whether they got away.

Thousands of regular and part-time workers were affected by the forced shutdowns, both in the newspaper lie weigher before, but this is Methodist bodies are cordially plants and in allied industries such as paper mills, engraving the first time to ask for the invited to this special service. firms, ink wholesalers, and advertising agencies.

Before the Portland newspapers reopened, residents found out what a tremendous amount of service, both paidfor and gratuitous, newspapers really give.

If elected to the office, he states, he will perform his duties efficiently and courteously. for and gratuitous, newspapers really give.

Those who write letters to the editors may well pray friends throughout the precinct even as they place pen to paper, that the newspapers will will be deeply appreciated durcontinue to take criticism in their stride and keep on plug- ing the coming campaign. ging away at the sometimes-thankless task of going to press

BROWNWOOD COLLEGE

1001/2 Center Ave. Brownwood, Texas New Classes Start Every Monday.

The Buffalo Trail - Drivers

Editorial

The Buffalo Senior High School English Class with its teacher, Mrs. Michaels, is sponcargill." The program lasted soring a column in the local newspaper. As an appropriate title for their column, the members of the class chose "The Buffalo Trail - Makers." The earliest trail-makers were not the Indians or the early settlers, but the plunging buffalo. From one feeding ground to another the heavy, fleet-offoot buffalo covered scores of miles a day. A great many of the present day highways and railroads follow the same trails chosen by the thundering herds of burly buffalo. Since Buffalo is the name given to their school, the Seniors chose this title for their column.

New Equipment **Bought By School**

The latest and most modern picture show equipment, consisting of a sound-on-film picture show projector, has been purchased by Buffalo School from Herman A, DeVry Company, Incorporated of Dallas, Texas. Supt. Carl J. Shannon states

Professor Bedichek was no ordinary school teacher. Lessons in the essential subjects of the day were interspersed with many other teachings in his school. Consideration of one's fel-A mystery. But I shall present the low-man, the importance of character. facts as I know them and leave and the beauty of nature were his favorite topics.

> With Quantrell's Militia

Another subject which Professor Bedichek often discussed with his students was history, especially the period of the war between the States. To me, the most interestingly part of this history teaching was his recital of the time he spent in 'Quantrell's Militia'' during the Civil War days. Always he touched lightly upon his own part in the incidents of which he told us, and often he explained that many deeds were credited

daring group was innocent Quantrell believed that he could fight

history about Quantrell, the old school teacher would tell us.

Always I felt that the part Bedichek had played in the daring adventures of Quantrell's band were more important than he indicated, as he modestly effaced his share in the deeds of which he

Stories Vividly Recalled

Professor Bedichek's stories about Quantrell's men came back to me vividly one day, a few years after his death. when an elderly visitor dropped into the office of the newspaper which I was editing and publishing in a town many miles from Eddy. My visitor, an erect, sprightly man despite his years, introduced himself as Frank Dalton, a cousin of the James brothers, and a member of Quantrell's band during the Civil

Dalton wanted to write some articles telling of his experiences with Quantrell's men. When I told him of my former school teacher, my visitor asked me his name.

The name was unfamiliar to him, but he explained readily that names meant nothing, as most of the men who had served under Quantrell changed their names at the end of the war, adding that his real name actually was not Frank Dalton.

But when I described Professor Bedichek, Dalton began asking questions concerning certain manners of speech, the professor's size, and whether he wore glasses.

When I had answered his queries, my visitor suggested that he write me a

An Interesting Article

The article was interesting throughout, relating much that I had not known about Quantrell, but one of the final paragraphs was of greatest interest to me. The article closed in this fashion:

"What became of William Clarke Quantrell, (whose real name was Charles Hart), after the Civil War, has never before been truthfully told, as he, like most members of the band, changed his name again, moved to another locality and started life anew. We all took oaths not to tell who each one really was, but I believe that I break no oath when I say, however, that Quantrell, with his wife and one child, went to a little Central Texas town and founded a private school.

"Little did the friends he made there, or the hundreds of pupils attending his school, realize the fearless and once dreaded Quantrell and the kindly and beloved professor were one and the same.

As for Quantrell's life during the years of the war between the States and immediately preceding, Dalton's article tersely explained:

"In 1859 a young lawyer, Nathaniel Hart, came to Lawrence, Kansas, and started practicing his profession. Mart

to graduate from a military school, and

he wrote him to come to Lawrence, be-

lieving it would be a good place for him

cause.

Publicly Whipped

"Mart was placed in jail that night, and the next day he was tied to a tree in the center of the town's business street, where he was publicly whipped, and told to leave the country.

"He then went to Missouri, where, under the name of William Quantres. he organized 'Quantrell's Militia.'

Dalton's article went on to relate a number of adventures of Quantrell's men, telling of the burning of Lexington, Missouri, by Northern troops, and the retaliatory burning of Lawrence, Kansas, by Quantrell's men, the battle of Bower's Mill, and other events.

In the spring of 1864, Dalton's article explained, the militia decided to go further south, so after taking the families of the men to Westport, they crossed over into Kentucky, where William Quantrell was reported to have died from a fever brought on by wounds recerved in a battle. However, the men who had served under Quantrell found him still alive.

The article about Quantrell set me to thinking of incidents of which I knew or had heard concerning Professor Bedichek in Central Texas.

The school teacher was a tall, bigboned men, heavy, but without an ounce of surplus fat. Also he wore glasses. He was a good-natured, sympathetic had a brother, Charles, who was about and hindly man, yet when his wife was

butted down and injured by a ram that had been spoiled by playful students, he grabbed an ax and cut off the animal's head with a single blow.

Whipped Three at One Time

When Professor Bedichek first settled in Central Texas, so the story goes, he applied for a position in a public school. Asked if he thought he could handle the tough boys and young men who

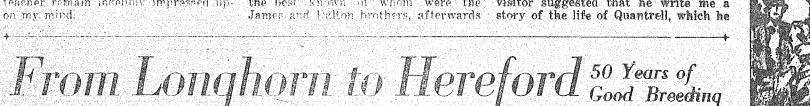

would be among his students, he replied: "If I cannot whip any three of them at one time, I'll resign." He not only got the job, but it is said that he did just what he had promised.

When he founded his private school. naturally it meant the taking of many pupils from the public schools, resulting in a loss of revenue to them. So a "committee" called upon the educator and gave him twenty-four hours to close his school and get out of the coun-

Professor Bedichek is said to have answered: May Doys and girls come to my school because they want to, with the permission of their parents. I believe there is a field for both private and public schools, and I intend to stay right here as long as my students need and want me. Any time you want to come after me, I'll be ready." But the

'committee" never came after him. So, for many years afterward, during the last part of the nineteenth century and the first twelve years of the twentieth, he conducted his school, aided by his faithful wife, seeking to instill in his pupils ideals that would send them out into the world to live clean, healthy and respected lives. If his former pupils became successful financially he was pleased, but often he told us he was more interested in the finer things of life rather than money.

This was the man who once served in Quantrell's Militia, his past obscured, but who devoted many years of his life to serving mankind in a little Central Texas town by guiding young people along the right paths to learning and to successful living.

he thange has come mainly in methof handling and marketing as well tappy arance and grade of the ani-

Ally years ago many ranchers were he as to number of cattle that bore ir dirands between bi annual or an-Franculups, and paid little attention. Treed, but they did know that area blood predominated in most of is herds. Today old-timers who are ill active—and many are—not only show the exact size of their herds at may time and their breeding, but also how individual defects. They can tell within a small per cent of the number a calver that will die. They can figure

surprisingly close to what those calves will weigh when buyers come around in the fall. About the only thing they don't know is what the market will do.

Scientific breeding and care are two of the reasons why Texas produces more than a sixth of the nation's beef cattle and why Texas now is recognized for fine breeds as well as number of cattle raised.

Center of Mereford Industry

The Hereford cattle industry has made greater strides in West Texas than in other parts of the State. That section, especially around Marfa, is conceded to be the center of this development. At

the International Livestock Show in Chicago, last year, 18 carloads of the best 27 carloads of fat beef were West Texas cattle. They were selected from 27 cars of the world's finest

Nature has conduced to make West Texas an ideal cattle country. Grasses are low in moisture and high in food content, which value they retain to considerable length when dry. Parasites and diseases are minimum and most stock are unusually large-boned and well-conditioned. Add to this the cowman's interest in quality beef on the hoof and you have a combination hard

Just how interested ranchers are in good breeding has been proven by the fact that some counties boast of 10 per cent registered and 85 per cent pure-bred stock throughout. Counties that claim the highest averages in blooded Herefords—for Herefords dominate the yestora plains and areses—are Presidie. Jeff Davis, Brewster and Kimble: No doubt other counties have averages equally as high. While percentages of outstred entite are high, yet registra-use is newly left, due mady to the fact

Many ranchers have found a dependable and profitable market for calves and yearlings to be finished in the Corn Belt of the North, For this reason not

\$2.000 for a Single Bull

Some cowmen will not besitate to pay \$2,000 for a good bull in order to improve breeding of their herds. Buyers give encouragement to better breeding by paying higher prices for better bred stock. Feedow szy they can make more money out of purebred calves at \$10 a hundred than inferior calves which cost them little or nothing. Elooded calves finish out heavier on less feed and are in greater demand from packers.

The trend toward purebred stock has given rise to another profitable branch of the cattle industry—that of raising herd bulls—and it pays. John B. Stribling sold his whole crop of bulls in 1936 for an average of \$342 and got

that many cattle still go to the packer. ing, uniformity, etc., has brought about considerable changes in methods of handling livestock. A range is divided into pastures capable of feeding 500 For such a herd there is an average of 25 bulls. Most of the bulls are registered. A bull is considered 60 per cent of the value of the herd; a cow 40 per cent. When a herd reaches that point where cows are better than bulls, the herd is on a decline, according to cattlemen.

Cows usually come from the owner's herd. About half of the best heifer calves are saved through the year. Next year they are culled again as yearlings and 15 per cent of the best retained. That leaves a margin to cover death losses and allow culling of old or unsatisfactory cows. A cow is supposed to be at her best when from 4 to vears old.

Instead of the bi-annual roundups, most ranchers now brand and dehorn calves in small numbers, before they are a month old. This causes a miniof mum of wor

ry for the calves' mothers and eliminates any setback in weight which may follow dehorning at an older age.

Vaccines have reduced the death-rate among calves to about an average of two per cent and some ranches are equipped with "sick wards" where diseased or injured cattle are isolated and treated.

Grand Champion Steer,

The grand champion steer of the 1937 Southwestern Exposition and Fat Stock Show was a Hereford shown by Byron Eckert, of Mason county, a 4-H club boy. This steer was named champion of the Boys' Baby Beef Show before being picked as the outstanding steer among all breeds for the

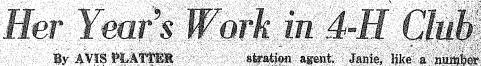

them. Luke Brite is reported to have show. Young Eckert sold his grand champion, weighing 951 pounds, for \$1.121/2 a pound to Leonard Brothers, of Fort Worth,

The Hereford exhibit at the Southwestern Exposition and Fat, Stock Show this year is expected to top all other breeds, both in number of animals shown and in amount of premiums offered. Cash prizes of \$5,000 have been posted for the Hereford division, Byron Gist, of Amarillo, was renamed superintendent of the Hereford department. He has served in that corneity for several years.

Producers of Highland Hereford cattle in West Texas are anticipating another good year in 1978. Rains have put ranges in excellent condition and a good deal of feed has been raised to help take care of the cattle during severe cold weather.

Dates for the annual Mighland Here-ford sales at Marfa have been set at October 6, 7 and 8 this year. This auc-tion sale attracts leading ranchmen from all parts of West Texas, New Mexico, Oklahoma, Colorado and Ari-zona. Feeders from the Corn Belt also

sold 10,000 bulls in 10 years.

There is another thing equally important as breeding in the modern beef herd-it is uniformity. By uniformity is meant sameness in appearance and weight of calves or cattle of any age.

The value of uniformity can be traced to market demand. The weight of a car of calves is easier to estimate when the animals are all about the same size. When a herd is kept uniform from year to year feeders can more nearly determine what calves will weigh and how they will feed out. And packers know what they will dress out. Both industries are willing to pay a better price for proven cattle.

Line-Breeding

In the interest of uniformity a good deal of line-breeding has been practiced. Line-breeding is done by alternating bulls with different groups of cows until all the offspring are half-brothers or thereabout. The danger of this practice, however, is that it could lead to interpreeding, and degeneration of

durally all this business of breed-

CURRENT (EDITORIAL) COMMENT

Displacing the Longhorn

SEWHERE in this issue of our Magazine Section is a story on the breeding of Texas cattle. It's a far cry from the longhorn to the present white-face Hereford, Texas and Oklahoma cattlemen pioneered developm int of the Hereford strain-over a long period of years—displacing the once alld, rangy longhorn that roamed and dominated the Southwestern plains. It required time, patience, money and work to do the job, but it was done and is a spectacular success. Southwestern cattle win blue ribbons and top the market throughout the United States. While much credit should go to our breeders for building up and maintaining high grade beef cattle, yet the Southwestern Exposition and Fat Stock Show, held annually at Fort Worth, has been a prime factor in this development. As time goes on Texas and Oklahoma will make even greater strides in the cattle and sheep industry. These two Sates have proved their leadership and ability to produce the best pure-bred sires in all the world.

Living Together

Most of our problems of today resolve themselves into the problem of learning to live together. This holds true for all groups—the family, the community, the State, the nations, the whole world.

In "Pilgrim's Progress" Christian describes Talkative "as a saint abroad and a devil at home; so unreasonable with his family and servants that they neither know how to do for or speak to him." Talkative's type had not disappeared at the time of Dickens, for in "Bleak House" he speaks of a man

brother, but who was unfortunately on bad terms with the whole of a large family." Surely love, patience, tolerance, charity, respect for others, begin

at home. We all owe a duty to the community in which we live. There may be people in it who, judged by civilized standards, have queer notions about religion, politics, and what not; some of these people are free in expressing their opinions in an offensive way. Huck Finn's recipe for getting along with such people was to have as little to do with them as possible. But it may be that some of their ideas are good. If we knew them better, we might esteem them more highly. Charles Lamb had such confidence in the essential goodness of human nature that he said it is impossible to hate anyone we know. The command to us is: not to like, but to love our enemies, which is quite a different thing.

Texas and Oklahoma

"The port of Galveston," says G. E. Blewett, secretary-treasurer of the Texas Grain Dealers' Association, "set a record for wheat exports the last half of 1937 that has never been equaled by any other American port in history.

With wheat exports, exclusive of flour, from the United States totaling 29,780,000 bushels during that period, Galveston handled 17,305,984 bushels, or nearly 60% of the total," he said.

At least three-fourths of this wheat came from Texas and Oklahoma. Doubtless much of the wheat was shipped abroad through other Southern ports.

The natural advantages of our Southern ports are so great that they are overcoming the lead of Eastern and North-"whose mission it was to be everyone's ern ports. The Panama Canal gives the

in exports to South America, and some of this wheat went to South America.

There is a great demand in foreign countries for our wheat, because it is the best on the market. This is especially true of hard wheats. Our dark hard Panhandle-Oklahoma wheat is unequaled in quality by that grown in any other part of the world. European nations have discovered this fact, and our farmers can usually sell all they can

Development of Industries

In common with every other patriotic Texan and Oklahoman, we should be happy to see our natural resources developed and factories built in every part of the two States. But we should do some of these things ourselves and not leave them altogether to outside parties.

It has always been the misfortune of our Southern people to prize independence so highly that they cannot co-operate with each other in business. Many years ago a Massachusetts cotton-mill employe told my brother that he and many other men of small means had combined their capital and built a cotton mill in which the owners and members of their families worked every day. iust as Southern farmers and sons work in their fields. Many factories of New England were established that way. There are signs that our Southern people are more ready than ever before to pool their interests and work together for the common good.

We read that the production of Texas-Oklahoma natural resources are far over one billion dollars. We confess that these figures do not unduly stir our pride, although we do know that work has been given to many of our fel-

Southern ports an additional advantage low citizens by reason of the develop-

ment of our natural resources. We ourselves have the capital for the orderly development of many new industries. If in doubt, read the annual statements of Texas-Oklahoma banks.

* * * Little Things

Benjamin Franklin and many wise men before him stressed the importance of little savings. "Take care of the pence and the pounds will take care of themselves" and "many a mickle makes a muckle" were two maxims frequentquoted.

In other relations of life, little things may make us or mar us; it will not do to ignore them. "For want of a nail, the shoe was lost; for want of a shoe, the horse was lost; for want of a horse, the kingdom was lost," is the moral of an old fairy tale.

In writing many of us pay slight attention to the comma; but it will not do to ignore it because it is little, or to put a comma in where not needed. Oscar Wilde once gave himself credit for a hard day's work because "this morning," he said, "I put a comma and this afternoon I took it out again.'

They have lately been having heated arguments in the French Senate, with a threat to overthrow the government. all over a single comma. It was argued that the insertion of one where it was not intended in the Wheat Bill might cost the French farmers \$15,000,000.

Several cases in this country have gone to the Supreme Court on account of a comma. Older people will recall that the insertion of a comma in the free list of one of our tariff bills caused our government to lose an immense sum before Congress could correct the error. A section of the but, as drawn. placed on the free list "all fruit trees." Somehow or other, a comma got between "fruit" and "trees," and everything from pumpkins to mulberries were imported without paying any duties, much to the disgust of citrus fruit growers in Florida and Californias

Sprinkling commas around promise cuously where not needed sometimes make ludicrous sentences. A classic example is: "For sale a piano, by a lady with carved legs.

Increase in Southern Cattle

The Agricultural Department has given out figures showing that the South has surpassed the nation as a whole in the increase of beef and dairy cattle. The number of all cattle, including dairy cattle, in the 13 Southern States increased from 18,616,500 in 1932 to 20,051,000 in 1937. The number in the whole country showed 66,-676,000, a gain of only 906,000. In every Southern State the increase was marked—Texas from 6,890,000 to 7,547,000; Oklahoma from 2,200,000 to 2,252,000.

The Southern States as a whole had an increase during the period of 279,000 dairy cattle, of which they now have who cannot read. 6,455,000. In the North Central States, long considered the great dairy section, every dime. We tried the dime plan there was a decrease of 205,000 head. probably due to the drouths of 1934 and

There are several reasons for the marked cattle increase in the South... Many farmers no longer plant all their land to cotton, but raise cover crops such as cow peas, clover, and lespedeza. which furnish good grazing and hay of the best quality, while at the same time improving the soil by collecting mitrogen from the air and preventing erosion; our cattlemen are terracing their ranches and ploughing deep, furrows above the terraces for retaining rainwater and preventing erosion, with the result that grass grows better and longer. Many cheese factories and creameries are already in operation and there is promise that more will be established, for his milk products near home. Due to our comparatively mild winters, the expense of shelter is not so great as in other sections, but we hope no dairyman will try to economize on good shelter. The cost of feed is less here than farther North, as the grazing season is

It is encouraging to have evidence of

these statistics of diversification. May the good work go on.

Why Go to College

Many parents have children in the secondary school and the college. At all times the advantages of a college education are of exceeding great interest to them. Why do so many parents sacrifice to send their sons and daughters to college? Why do so many young people wish to spend four of the best years of their life in these institutions? Doubtless because they believe a college education better fits them for life's work and, possibly, for easier work.

President Butler, of Columbia University; President Angell, of Yale; President Wrigton, of Lawrence, and Professor Foerster, of Iowa State Unversity, have of late written books in which they attempt to answer the question of why young people go to college and go in such large numbers. Their matured judgments seem to be at variance with the answers one might get from the students.

Prof. Foerster thinks that students do not go to college to be educated and that they do not receive education there; that they go for one of three purposes: To secure a diploma as a passport to economic success; to obtain vocational preparation, the vocation of matrimony being the one usually sought by women; or to take part/in student activities, which have all along been declining in cultural value as interest indebating, glee, and dramatic clubs has ielded to the engrossing interest in

President Butler says they enter the university (1) for "social purposes," (2) for "special vocational ends," and a very small fraction "to become liberally educated." The further says:

"Mach of the stellan English of both teachor and seeds would as great aftering the even the Vinegares between was a customed to simple began that the about the read has well that essentially the reading be serius, in the received emigratic The ability a jet form the simples, mathematical opera-phs is, to all amonts and norposes, confined to trackets to harmon's a Algebra' and comes, . . , such as informular, as the laws of Manic".

High school teachers have been complaining that papils coming from the elementary schools are unable to understand the content of the courses offered in the high school because they caunot read. Indging by Dr. Butley, they de not acquire this ability either in high School or college.

Dr. Butter complains also of the state of good manners in the university; that, notwith tanding the stress long placed on science, the public still reaches its conclusions without concern for the scientific method.

One of Dr. Butler's critics offers a remaiy: Let every namil in high school and coffere study social science, history, economics, seciology and government. It does not appear how courses in these inings would be of much value to pupils

In another book, President Wriston calls the modern curriculum the "educational jurgle," and compares it to a huge department store in which every and of ware is offered to the purchaser.

According to President Angell, if the college produces good citizens, "it is ratic as much by grace of a benign proridence as by virtue of any conscious purpose on the part of teachers to achieve such a result. He adds: "At the mass I times it could be alleged that we manded an optimistic conviction that four years of association with persens of moderate intelligence and decent limits will operate at least to encenrage respectable citizenship." When the writer was a student in college, this was expressed in a different way: "It is better to have come and loafed than not to have come at all.

It is a sad-commentary on modern giving the Southern farmer a market collegiate education that these university presidents are so pessimistic about the values students get in higher educational institutions. Doubtless they have not looked closely enough. In their institutions, as in all others, there is a saving remnant who have a serious purpose to acquire an education, and for such pupils a college education will always be worth while,

> Some of our friends, determined to get ahead, have adopted the rule of saving either every penny, every nickle, or and it didn't work. We are now trying the dollar plan and it hasn't worked, either.

Some one has asked the question: 'How did our grandparents get along without so many things?" The answer is simple. They got along without so many things because they didn't want so many things.

An optimist thinks the troubles of this world will be ironed out eventually and everybody live in peace and prosperity, including labor and capital. The optimist is thinking of heaven, not this world.

Four weeks ago I got out my old yellow slicker, brushed the dust off that had accumulated during bone dry years and slipped into it. Have been wearing it purty nigh every day since. Weather is a funny thing and doesn't give a whoop like taking a dose of castor oil, yet there's this difference: You can take the oil lying down but you'd better take high water standing up.

BRIEF TEXAS NEWS --- from Over the State

FINE DEPOSITS OF MARBLE

Discovery of large deposits of highgrade marble near Chico, (Wise county), Texas, has been reported to the Texas Institute of Natural Resources and Industrial Development.

WHY IMPORT GRAPHITE?

The Harlingen Star wants to know why the United States imports millions of dollars worth of graphite when there are graphite deposits in Llano, Burnet and Mason counties.

TEXAS' 10-YEAR GAIN IN OIL PRO-DUCTION

In 1927 Texas supplied but 24 per cent of the nation's crude oil production. In 1937 Texas supplied 44 per cent; California 18 per cent and Oklahoma 17 per cent

NEW CAUSEWAY WORK PRO-GRESSING

Work on Galveston's new \$2,500,000 cement causeway is about one-third completed. It is to be three miles long, extending from the mainland, at Vivginia Point, to the island proper.

HUNTERS BREAK DEER RECORD

Four days before the deer season closed, December 31st, hunters had placed in cold storage vaults at Kerrville 800 buck deer and 202 wild turkeys. The number of deer in storage exceeded last seasons by 33 per cent.

CATCHES TULARENNA

Valree Thomas, 1825 Leonard Street. Dallas, contracted tularenna, a rabbit disease, while skinning wild rabbits, Health authorities advise the use of gloves by any one skinning a rabbit.

SAUER KRAUT BY CARLOAD

A big cannery at Devine is turning out sauer kraut by the carload, shipping it to various points in the State. When cabbage prices get low around Devine the farmers convert the vegetable into sauer kraut.

REFORMED THIEF

Waco Tribune-Herald: "A reformed thict wrote I. P. Atkinson, of Temple, a letter, without signature, that contained two \$1 bills. The money, he explained was payment for a brace-andbit he stole from Atkinson 25 years ago. He asked forgiveness."

BRAZULIAN GOVERNMENT BUYS TEXAS HOGS

A Texas farmer, Henry C. Barlow, of Collin county, has sold and shipped I pure-bred Hampshire hogs to the government of Brazil. The shipment included 9 sows and 3 boars. Brazil will use the hogs to improve its native

BURIED WITH CONFEDERATE

Dr. C. C. Shell, age 94, pioneer physician and ex-Confederate soldier, of Stamford, was buried with a Confederate flag wrapped around his casket. He was the sole survivor of the Joe Sayers Confederate camp, founded at Stamford in 1907.

Dr. Shell, was known as Texas' oldest Odd Fellow. He joined the Odd Fellows at 21.

14-YEAR-OLD BOY KILLS BEAR

John Willis, age 14, while hunting with his father and brother near Smoky Easing in the Davis mountains, 65 miles north of Alpine, killed a 200pound black bear with a bullet from his rifle. The boy made a "running shot" through brush as the hear raced to escape. He also killed two 10 and 8. point buck deer.

BUSINESS DOUBLES AT THREE GULF PORTS

Business at sea ports in the San Antonio district, which includes Corpus Christi, Brownsville and Port Isabel, has doubled in the last six months as compared with the same period in 1936, said Harry P. Hornsby, collector of cus-

REPUBLIC OF TEXAS

\$100 BILL Rev. J. N. Hester, pastor of the Methodist Church, of Southland, (Garza county), is reported to be the owner of a \$100 bill issued by the Republic of Texas in 1848, It bears the signature of Mirabeau Lamar, President.

MEERSCHAUM PIPE MINERAL DISCOVERED

Sephiolite, the mineral from which meerschaum pipes are manufactured, has been found in good-sized deposits near Jyalde, the State Planning Board reports. This mineral is manufacture and the manufacture of the control of the contro

WANTED. SOOTHING WHISTLES

Police Chief R. L. Jones, of Dallas, has received complaints from citizens that the whistles of street traffic officers are jarring to the nerves. He is now investigating whistles to see if any can be found with soothing tones.

NO MORE AUTOMATICS

State Public Safety Department Director Col. H. H. Carmichael says that, State highway patrolmen have discarded all automatic firearms in favor of the 38 caliber super police revolver mounted on a .44 frame.

OUTPUT OF TEXAS MINES, 1937

Reports from mine operators and reccipts at smelters indicate that mines in Texas in 1937 produced; Gold, \$19,-250; silver, \$1,004.613; copper, \$33,275; lead, \$48,495, a total of \$1,105,633.

GALVESTON PORT EXPORTS AHEAD OF 1936

Exports from the port of Galveston during the calendar year 1937 were ahead of the year 1936, according to a statement compiled from statistics by E. S. Holliday, secretary of the Chamber of Commerce. Tonnage for 1937 was 1.395.830, an increase of 492.527over 1936.

TO BE FILMED IN TEXAS From Hollywood comes the

statement that "The Marching Herd" will be filmed at the old Burk ranch, near Cotulla,

SMOKED 6,000 CIGARS IN 1937

Port Neches Chronicle: "A, L. Brooks, president of the First National Bank, of Port Neches, smoked close to 6,000 cigars during 1937. He smokes. from 15 to 20 cigars a day. 'It's just a bad habit,' said Mr. Brooks, 'and I don't get any enjoyment ont of the

35 PECAN SHELLING PLANTS

Pecan shelling is a real industry at San Antonio, 35 plants operating at full cawacity during the pecan season. Most shelling is done by hand and shellers are paid by the pound A sers of the nuts are mainly bakeries, candy and ice cream factories in the heavy populated centers of the North and East.

PET CEMETERY

The pet cemetery near San Antonio now contains 300 graves of cats, dogs, birds, etc., said C. M. Kinsall, caretaker. Most pet owners furnish head and foot stones for the graves and some owners have their pets embalmed and buried in metal caskets.

SURGEONS REMOVE PIN FROM APPENDIX.

Waco News-Tribune: "For 20 years Miss Reba Foster, of Pecos, 27 years old, had suffered from chronic appendicitis. Surgeons removed her appendix and found, imbedded therein an ordinary theinch straight pin. Miss Foster recalled having swallowed the pin when she was 7 years old."

TOTAL INTERNAL REVENUE PAYMENTS

Total internal revenue paid by the people of Texas in 1937 amounted to \$102.092.625.33, of which \$54,458,-656.49 came from payroll taxes; \$42,-208,203,57 came from miscellaneous collections. Per capita collections in Texas amounted to \$16.15, or about \$67 per family. Texas was the thirteenth ranking State in total tax collections.

THE INDIANS' COMMISSARY

San Marcos Record: "The Comanche Indians of Texas used the buffalo in the following manner: Meat for food; the brains and liver for softening leather; horns and skull for ladles and drinking vessels; shoulder blades for hoes, picks and knives; tendors for bow strings; tail hair for ropes and belts; and hides for bridles, saddles, shields, moccasins, bags, shirts, beds, robes, etc.

HEART AILMENTS LEAD DEATH LIST

Dallas had a total of 3,455 deaths from all causes and 5,845 births in 1937. Heart diseases led the death list with 612, pneumonia 329, cancer 309, cerebal hemorrhage 275, kidney disease 209, tuberculosis 136 and influenza 115.

CRA TO MOVE 250 BODIES

Colorado River Authority will ask permission of relatives to move $\overline{250}$ bodies from three cemeteries in the future basin of Marshall Ford Lake, on the Colorado river, near Austin, for reburial in new cemeteries above the water line. Reburial ceremonies will be provided with relatives in charge.

U. OF T. PRODUCING WELLS

There are 594 producing oil wells on University of Texas lands with an output of approximately 500,000 barrels per month, said Bert R. Haigh. Professor of Geology at the State Mining School, El Paso. New wells are being brought in at the rate of one a week.

Total income to the university permanent fund from royalties, rentals, bonuses and sales of land in fee amounted, November 1, 1937, to \$27,-275,418, Haigh computed.

HOME OF MRS. SAM HOUSTON, INDEPENDENCE

Texas history's most colorful figure, without a question, was Gen. Sam Houston, military leader and first President of the Texas Republic. But little has been said about the woman whose matchless devotion undoubtedly played an important part in his greatness. Mrs. Sam Houston, the former Margaret Lea, was content to bask in the reflected glory of her illustrious husband. But in Independence, lexas, where she made her home after the general's death, she was idolized by her friends and neighbors not only as a devoted wife and mother but as a kindly and sympathetic leader among her wide circle of friends. It was her unselfishness that finally brought on her death. In 1867 when a yellow fever epidemic swept Central and South Texas she volunteered as a nurse and was a victim to the dread malady. The old home at Independence, where she died, is still in an excellent state of repair and is still occupied by relatives of -Copyrighted by Texas View Co.

GAS TAXES INCREASE \$3,000,000 herited \$5,000,000 as her share of the

Net gasoline tax collections in Texas last year showed a gain of \$3,154,146 over 1936. The figures were \$41,185,-854 for 1937 and \$38,031,708 for the preceding year.

71st WEDDING ANNIVERSARY

The oldest married couple in Texas, probably, are Andrew Jackson Jackson, age 92, a Confederate war veteran, and his wife who celebrated their 71st wedding anniversary in January. They live in Milam county.

CRIPPLED BOY CARVES VIOLINS

Nacodoches Sentinel: "Eddy Orsag, 19-year-old crippled boy of Buckholts, (Milani county), recently completed his third violin, carved from sections of a telephone pole and railroad cross-tie. A pocket knife and rasp were the only tools employed to make the instrument, which is said to have a sweet tone."

OWNS RARE COINS

L. W. Hoffecker, of El Paso, owns a rare coin collection numbering 9,000 different coins. Oldest in the collection is a gold piece, cast during the time of Alexander the Great, 370 years B. C., which bears a likeness of the emperor. Also in the collection is a widow's mite, mentioned by Christ in the New Testa-

MENTAL PATIENTS INCREASE

There were 13,106 patients on the books of hospitals for mental disease in Texas at the beginning of 1936, with an additional 3,581 patients admitted during the year, the Bureau of the Census reported.

ELEPHANT SKELETONS FOUND IN PANHANDLE

Dr. E. H. Sellards, geologist of the University of Texas, reports the finding of elephant skeleton remains in the Texas Panhandle. With the remains were also found three spear heads and a knife, indicating that the elephants were in the area contemporary with man.

TEN SHOTS, TEN DEER

The Dallas Times Herald is authority for the statement that Mrs. J. W. Pinkston, formerly of Dallas and now a resident of San Augustine, Texas, is a dead shot and wastes no ammunition while deer hunting, for she has killed ten deer in eight hunting seasons with ten bullets and has all of the ten horns and ten empty shells as proof of her extraordinary feat.

Mr. and Mrs. Pinkston are both big game hunters and do most of their hunting in Texas.

WOMAN MAYOR

Mrs. F. N. Sockwell, wife of the late Mayor F. N. Sockwell, of Greenville, has been elected to fill the unexpired term of her husband who was killed in an automobile accident near Belton, Bell county.

\$60,000 TO TEXAS UNEM-PLOYED

Approximately \$60,000 will be mailed to eligible unemployed men and women in Texas from the Unemployment Compensation Commission, Orville S. Carpenter, chairman director of the commission said. This money will go to some 9,000 persons in average amounts of \$8.

CITRUS PEEL, NEW LIVESTOCK FEED

For every ten tons of grapefruit that go through the Rio Grande Valley Citrus Exchange juice canning plants there is now one ton of a brand new product, dried peel, that is suitable as a livestock and dairy feed, says the Harlingen Star.

Grapefruit is 35 per cent juice and 65 per cent peel, but for years the juice was extracted and the peel, or hull, hauled away, and dumped.

TEXAS WOMAN INHERITS \$5,000,000

Mrs. Okle Byrns, a native Texan, but now a resident of San Francisco, Calif., has in-Humble Oil Company of Texas.

Mrs. Byrns is one of the eight heirs of the late J. W. Mills of Texas. Her husband's grandfather, Jake W. Strickland, was a Texas pioneer and a soldier under Gen, Sam Houston. As a reward for his services. President Houston of the Republic of Texas, gave him the land grant which later became part of the Humble Company's property. Strickland died without realizing the land's value, leaving it to his son Mills.

TAXES, 1875-1937

L. E. Merchant, of Birthright, (Hopkins county), has a tax receipt that was issued to his father in 1875 as payment on 69 acres of land in this county. The 1875 tax receipt is for \$6.10. The taxes paid on this same 59 acres in 1937 was \$15.12, but in 1875 there were no school taxes, no road taxes and no bond issues.

MAKES ROPE FROM DISCARDED TWINE

E. R. Bryant, age 76, of Grand Saline, (Van Zandt county), has rigged up a machine in his home for making rope out of pieces of hemp and sisal twine that he saves from around tied-up bundles. To date he has woven over 300 feet of strong rope, ranging in length from 30 to 50 feet, from bits of loose twine.

RANKS FIRST

Texas ranked first in crude oil refining in 1937 with 183 refineries, having a daily capacity of 1,313,955 barrels. California was second with 77 refin-

LARGEST GRIDIRON TROPHY

When Rice beat Colorado at the second annual Cotton Bowl football game in Dallas, New Year's day, it won what is believed to be the largest football trophy in the world. The metallic trophy weighs 125 pounds, is 4 feet 9 inches in height and valued at \$5,200.

1,182,866 PERSONS CROSS THE BORDER IN 1937

Officials of the United States Public Health Service announced that 1,182,-866 persons crossed the Texas-Mexican border at six stations during the past

TEXAS LEADS IN CANNED GRAPE-FRUIT

Approximately one-third (2,500,000 boxes) of all grapefruit produced in Texas was canned during the 1936-37 season, according to Valley estimates. Florida was second with 6,716,000

13 CHILDREN, ALL BOYS

Haskell Free Press: "Mr. and Mrs. J. W. Henshaw, of Haskell, have perhaps the largest family of boys in this section of West Texas. There are thirteen, ranging in age from 9 to 37. All of the children are living and were born in Haskell county."

HAS CLOCK FORMERLY OWNED BY JEFFERSON DAVIS

An ebony 8-day mantel clock that ticked away the hours in the home of Jefferson Davis, President of the Confederate States, at Beauvoir, Biloxi, Miss., is now owned by Mrs. W. B. Mc-Garvey, 3205 R1/2, Galveston. Although more than 60 years old, the clock still keeps accurate time.

PLANS DUDE RANCH

San Antonio Express: "Art Goebel. transcontinental flyer, has contracted for the purchase of 1,967 acres of ranch land in the northwestern part of Llano county from Mrs. Nora Hardin. Goebel plans to establish a dude ranch on the acreage. The consideration was \$17 per acre."

SANTA ANNA'S SWORD

Among the relics of General Sam Houston, recently placed in the Sam Houston Memorial Museum at Huntsville, is the sword of General Santa Anna, commander of the Mexican forces at the Battle of the Alamo and the Battle of San Jacinto. The sword is made of blue steel, inlaid with gold figures and a handle of mother-of-pearl.

OPEN MARKET FOR HELIUM

By authority of the Sheppard bills signed by Pres. Roosevelt September 1937, the Bureau of Mines is empowered to produce and sell helium, non-inflamable gas, to citizens and corporations of the United States and even to export it, with the reservation that any export quantities deemed of "military importance" must be specially licensed by the President.

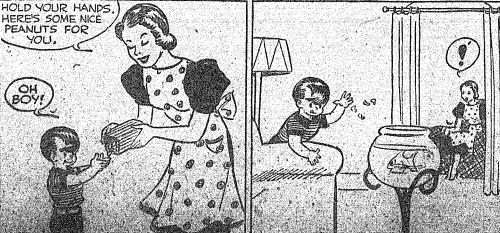

Heretofore the United States had refused to sell helium to foreign countries. Near Amarillo is the largest source of helium in the world. Here the government has a plant for its manufacture and gas rights to 50,000 acres.

WILL OF STEPHEN F. AUSTIN FOUND

The last will and testament of Stephen F. Austin, "Father of Texas," has been located in the Harris county deed records at Houston.

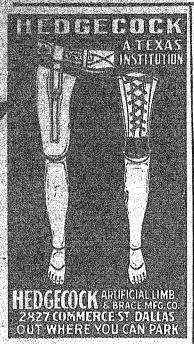

Austin died a poor man, the contents of the will revealed. Although he owned several thousand acres of land in various parts of South Texas. this land at the time of his death was valued at hardly more than 25c to 50c an acre. However, some of the land has tremendous value today, particularly the 555 acres in the will which is now in the very heart of Houston's business and residential district. He died 101 years ago near Columbia, (Brazoria county), Texas.

CHINA-JAP WAR

By HAROLD DENNY

The Russians are taking a fairly optimistic view of events in China despite Jas pan's unbroken string of victories in the field. This, notwithstanding their avowed conviction, supported by the opinions of neutral travelers recently arriving in Moscow from the Oric , that Japan intends even ally to attack the Soviet Union in Japan's ambition to master the Far

There are two reasons for this guarded optimism-one military, the other economic.

From the military standpoint it is evident that Japan cannot do much against the Soviet Union directly so long as her military forces and her resources are tied up in trying to conquer China. Thus Japan's new incursions into China relieve the pressure on the Siberian frontier and delay a possible Soviet-Japanese

But this security is considered here to be only temporary at best. It is widely felt that Japan intends to attack the Soviet Far East as soon as she can consolidate her conquests in China. But granted that Japan conquers China, the consolidation may take years.

Also it is pointed out that Japan is dependent on other countries for a large portion of the raw materials that are indispensable for making wariran, copper, lead, rubber, cotton and many other products almost as essential.

Soviet Russia, of course, is ound by ties of mutual selfinterest to China, who is fighting the nation that offers the most acute threat to Russia. Just how much aid the Soviet Union is giving to China cannot be learned. That she is furnishing some military equipment was confirmed recently in a Hankow dispatch prominently published in the Soviet press accusing the Japanese of trying to stir up feeling against Russia by giving exaggerated accounts of Soviet supplies.

Lay not up for yourselves treasures upon earth, where moth and rust deth corrupt, and where thieves break through and steal: but lay up for yourselves treasures in heaven, where ncither moth nor rust doth corrupt, and where thieves do not break through nor steal. for where your treasure is, there will your heart be also. Matt. 6: 19-21,

Teacher-"Bobby, will you give me examples of three words ending in ous and give the meaning of each one?" Bobby-"Yes'm. Gaseous means full of gas, punctilous means full of punk and pious means full of pie."

Ranks and Ranks

"So your husband is an army officer, Clara? What ronk?"

"Well, he's just a corporal now, but he's been indited twice for bravery an' next week he's goin' to de hospital for a major oration.'

Life of a Poet

Poet Smith-"A little more patience, Mrs. Johnson. The day will come when people, stopping at your door, will say: Tread softly. Here's lived the Poet

Landlady-"Is that so? Well, if you don't pay your rent to-day they'll be saying it with flowers."

Wait the Third Year

An old traveling salesman was relating his experience to a younger

"And don't forget, never try to sell an encyclopedia to a bride. Wait until the third year after marriage."

"Why wait until the third year?" "Because the first year she always thinks her husband knows everything. The second year she admits he knows something. The third year she is positive he knows nothing."

Back Seat Driving

"My wife drives from the back seat. Does your wife drive from the back

"No. She used to drive that way, but I broke her."

"How did you do it?"

"By stepping hard on the accelerator and drawning out her voice."

Fast Growth

"Pertaters is fine this morning, miss," said the market gardener, making his usual weekly call.

"Oh, are they?" retorted the custom-That reminds me. How is it that those you sold me last week were so much smaller at the bottom of the basket than at the top?"

"It's the heavy rains, miss. Pertaters is growin' so fast that by time I get a basket full dug the last ones is yet. twice as big as the fust ones.'

Brother Tom's Reply

Three weeks after Jessie reached boarding school she began signing her letters "Jessica." Brother Tom didn't like it. He replied:

"Dear Jessica: Dadica and Momica have gone to visit Aunt Lizzica. Uncle husbands down over me. I never get Samica is buying a new machine, but to call anywhere, but sometimes the doesn't know whether to get a Chevica company comes and takes me out. I am or a Fordica. The cowica had a calfica, not a bee, but I often buzz. I am the and I was going to call it Nellica, but bell of the town, and, while I do not changed it to Jimica because it was a bullica. Your loving brother, Tomica."

Lice and Mites

Many times each year we read the same old story about lice and mites, and many

times each year-we promptly forget all about

it! Let's give this problem some serious

laboratories, specializing in making diagnosis of poultry diseases, say that a large percent-

age of the birds coming to the laboratory

show no evidence of one specific disease but

are in a generally weakened condition. In

many instances, this weakness is due to lice

ing them to live in close contact with their

own droppings, and often restricting their needs for fresh air and food, we are placing

obstacles in their nath. Give them a chance,

Laying Flock Culling

Since feed costs represent approximately half of the total cost of producing eggs, it becomes obvious to everyone that the average laying flock must be culled continuously to

remove the birds that become physically unfit and are otherwise unable to lay enough eggs to pay for their feed. Too many poultrymen

labor under the delusion that the laying flock

may be culled once a year and then be neglected as far as further culling is concerned. This

is one of the biggest mistakes that flock owners make. Flock selection should be practiced every month in the year, by removing the

birds that become physically unfit and other-wise out of good laying condition. Birds that are inherently poor layers should be removed

from the flock as soon as they can be detected, and they can be detected by the simple expediency of examining the flock two or three times during the winter months to identify the birds with bright yellow beaks and shanks.

Storage Holdings of Poultry and Eggs

Storage holdings of Poultry and aggs.
Storage holdings of Poultry continue to show up very favorably in comparison with last year. On December 1, there were 108, 787,000 pounds in atorags, compared with 149, 000,091 pounds a year agu, and a five-year average of 104,076,000 pounds.

Storage holdings of shell and frozen ergs on December 1 amounted to 5,125,000 cases.

ONE OF THE MILLIONS PREFER CAMELS" SAYS RALPH WORLD'S CHAMPION IN POCKET BILLIARDS

"HEALTHY NERVES ARE A MUST WITH ME!"

FOURTEEN different times the news headlines have flashed: RALPH GREENLEAF WINS WORLD'S CHAMPIONSHIP. In a special interview during his recent championship play in Philadelphia, Ralph said: "I'd say.

the most important rule in this game is to have healthy nerves. And on that score, I think, Camels have a lot extra to offer. One of the main reasons why I've stuck to Camel cigarettes for twenty years is - they don't ruffle my nerves."

And America as a nation shows the same preference for finer tobaccos that Ralph Greenleaf does! Camels are the largest-selling cigarette in America

Fencing experts, too, appreciate Camel's finer tobaccos. As BELA DE TUSCAN, the famous instructor, says: "Fencing is very tiring, and I welcome the quick 'lift' I get with a Camel."

IAMES L. CLARK, famous scientist and explorer, says: "I always carry plenty of Camels with me into the wilderness. 'I'd walk a mile for a Camel!' Many's the time I've

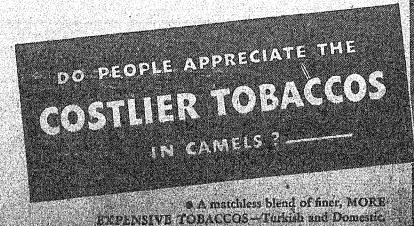

boats bounce around knocks the daylights out of my digestion! Camels help my digestion to keep on an even keel," says MULFORD SCULL, outboard motorboat racer.

'The way these light

HELEN HOWARD, top-flight spring-board diver, of Miami, Florida, says: "Camels don't irritate my throat -not even when I'm sitting around in a wet suit, a target for irritation.

HE IS COUNTED THE GREATEST POCKET-BILLIARD PLAYER OF ALL TIME. Here Greenleaf executes a difficult massé shot, requiring split-hair accuracy, faultless stroking, and healthy nerves. And the world's two famous masters of the cue - champion Ralph Greenleaf and the 18.1 balkline billiard champion, Willie Hoppe-are both Camel smokers.

TESTING TIME

"A time to plant, a time to grow and a time to test," is our motto this

If you are familiar with routine farm work, you know how first the farmer must plow, then har-row the soil to prepare a mellow bed for the tiny seeds. Many of you have seen the farmer handclean and select seed se as to remove weed seeds or trash. The best farmers make tests or seed to determine whether the life-germ is strong. This

We also know how seeds are planted. After a while, when they have grown into little plants, the farmer goes through the fields to remove weeds and even plants that are out of place. This is the second test.

After the harvest, only useful parts of plants are stored for feed or sold on the market Most stalks and stems are burned or chopped up, or turned un-der to fertilize the field This is the last test.

Our lives are much like seeds and plants of the cultivated field. We plow and plant "thought seeds" in the schools, in the home and with the company we keep. Often we do not realize how rapidly these thought seeds grow. Like it appears that wrong thoughts grow more rapidly than good

The tiny roots of a thought will sometimes grow deeply, and before we realize it our whole haracter is permeated ith these roots. Quite unexpectedly some day we come to a problem in life. meet this problem is a test of how we have plowed, planted and cultivated our minds.

During the past month many of you have taken mid-term tests in your school work. If you were honestly and efficiently propared to meet these tests, the results were satisfactory to all concerned. If you failed, don't blame anyone but yourself. Resolve that he next testing-time will find you amply prepared.

Sometimes we are tempted to cheat. If we do, we alone will be the losers. Cheating weakens the founda-tion of character and, if continued, the whole structure will fall. Should we not know the answer to a question (of any kind) let us frankly admit it. In this way we may learn the true answer. Always remember, it takes a courageous, broad-minded person to admit, a mistake, or lack of information, on a subject. May we lift our heads higher, and strive to be sincere, honest, courageous and

LETTERS FROM READERS

We all would like to know each other bet-"To know a person is to love them," is ter. "To know a person is to love them," is a true saying. From time to time we will publish letters received from our readers of the Boys' and Girls' Page so we may know and love them better. Write us—all of you—and give permission to publish your letters.

Address: Letter Dept., c/o Aunt Mary, Rt. 5, Box 179-B, Fort Worth, Texas.

Mrs. Columbia Stevens, Buffalo, Texas, has

Mrs. Columbia Stevens, Burland, Texas, has her daughter write: "As I am crippled and often lonely, I lie on my bed and think of the dear readers of your page who have been so kind to me. Many have written lovely letters and sent messages of cheer. It is impossible to write to all. Please thank them for me through this page. I was 81 years old January 9. Here is a poem I like so well:

"Wouldn't this old world be better, If folks we meet would say I know something good about you, And then treat us that way?

"Wouldn't life be lots more happy If the good that is in us all Were the only things about us That folks bothered to recall?

"Wouldn't it be nice to practice That fine way of thinking, too? You know something good about me, I know something good about you."

Mrs. L. F. Bones, Clarendon, Texas, sends a lovely poem which I am sorry we do not have space to print. She writes. "I certainnave space to print. She writes. "I certainly enjoy the page although I am unable to write very often. I am wishing this year soill bring peace, health and prosperity to all readers of this page.' Sorry I do not have the address you asked for, Mrs. Rones.

More letters at another time. Let us hear from 1000.

a valentine-ny bird!

they may be used for several years). Prizes to be awarded during the entertainment may be simple or expensive, depending on budget. For simple prizes we suggest: Home-made candy or cookies, or nickel and dime prizes such as: bolls, balls and other toys that will make laughter for the guests. Wrap prizes tastefully, and mark each one plainly.

Reception: Host and hostess greet guests at the door. Arrange for placing of wraps and introduce any guests not already acquainted. Either host or hostess may lead in directing games. Complete rules for games should be written out beforehand, and in the order in which they are to be played. Explain to the guests in detail just how the game is to be played before beginning

Entertainment: As soon as the majority of guesta arrive, games may be started.

Game No. 1: St. Valenine Told Mc.

Guests are seated in a circle. Leader stands in the middle. Addressing one player he says, "St. Valentine told me to tell you." Player then answers, "What did he tell you?" Leader answers, "He said for you to pound one fist." Player "He said for you to pound one fist." Player must pound his fist on his knee during the entire game. Leader then speaks to another player, using the first statement. They in turn ask, "What did he tell you?" Leader may tell this one to pound with both fists. He then addresses each player in turn with the same first extenser. They ask the same the same first statement. They ask the same question as the others and are given a command, such as: Stamping one foot, or two feet, blinking eyes, saying some foolish word Players must keep up their antics until leader says, "St. Valentine says stop." One person has previously been appointed "Cupid," and should any player fail to keep their command, they must pay a forfeit to be redeemed later during a game of "Forfeit."

Game No. 2: My Heart Says.

This is a quiet game. Group remains in circle. The leader says, "My heart says you are an adorable creature," to the first player. This player turns to the one on his right and says, "My heart says you are an adorable, beastly creature." This player turns to his right and says the same full sentence, adding an adjective beginning with "C." This goes on until all have had a chance to say the Anyone forgetting an adjective must story.

pay a forfeit.

Game No. 3: Find the Heart. Hide different colored hearts carefully. Guests are to search for hearts while music is played either on the piano, radio or victrola. At given intervals music is stopped, and guests must remain perfectly motivaless in whatever position they were caught when the music stopped until the music starts again. Score is kept on each player, and prizes are awarded to the ones getting the highest score. Each colored heart is given a value at the start of the game, such as: Red counts 10, yellow counts 5, etc.

Many other games may be played according to the wishes of the host or hostess. Reireshments: Serve hot cocoa or chocolate, heart-shaped cakes or cookies and candy

if desired. The cost of this party should not exceed three dollars for twenty guests, if properly managed.

LITTLE MISS WAIT-A-MINUTE

Original Story No. 2 During the past few months I have had so many requests to repeat the story of little Miss-Wait-a-Minute I am sending you a re-

vised edition.

Miss-Wait-a-Minute I am sending you a revised edition.

Melissa Marvin was a lovely child with long golden curls and the bluest of blue eyes. Being an only child she was idolized by both her parents and a fond grammother.

This lovely child lived on a farm near a small town. She had many friends and all of the nice pets and playthings a child could want. Her mother and father had been very careful with her training from birth. She was now nine years of age and very lovely, except for one habit that was unite annoying to those who lived around her. Whenever she was asked to do something the would always say, "Allright I will, bir pleass wait-a-minute." Like most habits this way of always saying "walt-a-moute" became harder and harder for break. Maliesa would key it without each hinches and salaer stied to break her of this annoying habit quite earnestly, but without success.

The train stops at instance, if you collect rocks and your station only a few minutes, would like to secure them from cattle skeletons were shipped where you are the cattle skeletons were shipped to the cattle skeletons. Perhaps someone would like to save postcards from your town and by seeing your name they market as one of the most would write you, and you could versatile and useful raw mamake the exchange.

My Son's Hobby Over two years ago my young son began the collection of differ-ent types and kinds of feathers. tired mother finally crept quietly Soon he had chicken feathers of into bed she forgot to set the many breeds, then he went out for he had chicken feathers of chemicals. different bird feathers. These It was fifteen minutes after six were mounted on the pages of a phosphate and lime, make ex-velock before any member of the large scrap-book, carefully labeled cellent fertilizer. From bones a fascinating hobby.

BOWLS OF SPORT

"Bowls" has been the big word in sport the last few seasons. From Pasadena, her mother with the suitcase. Just as Melissa's father was about to start away she cried, "Wait-a-minute father, I forgot my doll."

"Stop dear—we—," but her mother's words were useless Melissa was out of the car and running into the house. It took her the mother's whore where the mother's whore where the mother's whore where the mother's whore where the mother with the suitcase. Just Calif., to Miami, Florida, football has been taking its last bow. But the most interest about the big, circular Rose Bowl at Pasadena.

That's whore New Years A new tool for salartific as

That's where New Year's her favorite doll, and then she ran back to the car.

Mr. Marvin drove carefully and as fast as was safe with their old car. Melissa was almost crying as they came in sight of the street leading to the station. The hands of her tiny watch said two minutes of seven. Just then a huge truck stopped in front of them. Mr. Marvin blew his horn vigorously but of no avail. The driver only shouted, "Just a minute, Buddy."

Mr. Marvin drove carefully and ago. But even before then, things were doing at Pasadena the first day of every year. A business depression for the fundation of the Armour Institute of Technology at Chicago. The maximum far exercised at the cago. The maximum far exercised any pressure previously to take their minds off their troubles. As a festive note, they decked their carriages with roses.

Search which gives pressures by to 1,500,000 pounds a square inch has been developed at the new research foundation of the Armour Institute of Technology at Chicago. The maximum far exercised any pressure previously attained.

Today a new-born child in the tier of Lastern Great Plains States also have a great-exercise of the Rose Bowl in 1889 to take their minds off their troubles. As a festive note, wide fields of investigation into pressure phenomena, agreed to live at the interior of them.

LIFE SPAN WIDENED

We live longer than we did, but how much longer we may expect to live in the future cannot be deduced from the tables that statisticians have compiled. Such is the general conclusion reached by Harold F. Dorn, statistician of the United States Public Health Service. The census of 1930 showed that there are in this country 3,964 persons who are 100 or more vears old. Dr. Dorn thinks this is an overstate-

The greatest expectation of life for both men and women

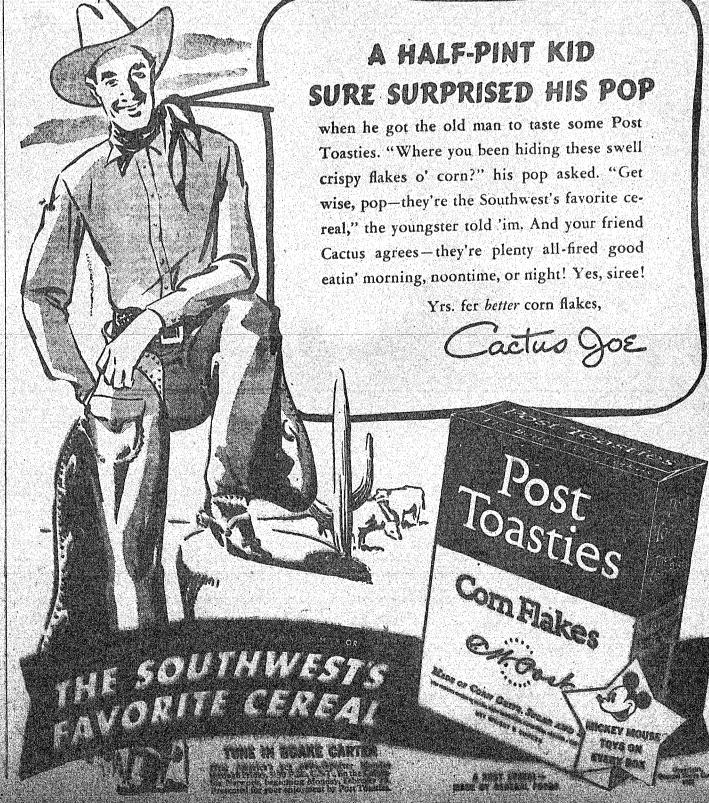

The parents had a mean expectation of life at birth of 49.24 years in 1900, whereas the expectation of today's baby is 61.26 years.

DECLARES DROUTHS OVER UNTIL 1975

This country probably will not experience another serious drouth until 1975, according to Dr. C. C. Abbot, Japanese women who swim secretary of the Smithsonian Institute. Dr. Abbot bases his estimates on his study of variations in solar radiation. which he discussed before the House Appropriations Committee in testimony made

In studying the fluctuations of the radiation of the sun, until they are among the finwhich, he said, occurred over est swimmers in the world. long periods of months and years, he has found that there goggles to protect their eyes, were no less than twelve regularrying cork tubs to hold the lar periods in the variation pearl oysters they tear from over a long time and that rocks. BUSY WOMEN'S WORKBASKET

Darling New Bibs for Baby

His Majesty, the baby, will be delighted, and greet these adorable new bibs with squeals of glee. There are three, featuring pairs of kittens, puppies and roosters. All of these small creatures wear expressions of expectation. They are stamped on unbleached muslin with floss for working included, and sell for only 25c for the set, as number, C8371M. A NUMO hot iron transfer, usable several times, for these bibs, is C8371T, price 10c.

Address your letter to Southwest Magazine, Needlecraft Dept., Box 166, Kansas City, Mo.

OUT OF THE PAST

Many women of today find a fascinating hobby in discovering unusual fads and fashions of the past. Recently, while looking over some old forgotten material, I came upon an interesting early nineteenth century fashion. It was a piece of jewelry made from human

During this particular period of the world's history, civilization it seems, was steeped in tradition and sentiment. Many quaint customs and superstitions have come down to us from that time. One of these was to wear locks of a sweetheart's hair in a locket or watch-back. Those inclined to deeper sentiment kept locks of hair from beloved sisters, wives, mothers, brothers, fathers or dear friends who had died. This custom was con-

sidered a dignified and almost essential part

of mourning. Human hair was even used extensively in the formation of other pieces of jewelry, including clasps for bracelets, rings, necklaces and brooches. The hair was either braided or woven into intricate designs. The fad grew so popular for a time that merchants display-ed large quantities of these ornaments, and some strands of hair were dyed brilliant

Women were not alone in their preference for these quaint adornments. Men also de-lighted in wearing cuff links, stickpins and watch chains decorated with human hair.

Today these relics of a past age have increased in value because of their scarcity and demand by curio collectors.

HOME FASHIONS

Since this is an age of "specialists," there is hardly a more important specialist than the 'homemaker." Keeping this in mind, we are always alert for new ideas to help make the task of homemaking easier and more pleasant. Outlined briefly herewith are some newsy bits of "gossip" about things that should make your home more attractive.

A window garden in the breakfast room or kitchen will add a cheery touch to your home. Three or four shelves just wide enough to hold flower pots or bowls of ivy may be built in below the window or in a convenient corner.

Maps for wall decorations have grown in popularity. To help protect and preserve the map material, an application of neutral varnish is suggested. The addition of a small amount of turpentine will increase the transparency of the varnish.

When you plan repainting jobs this coming spring here are a few good pointers worth remembering: First, select good paint-it pays. Then choose soft color combinations which will be restful for those who remain at home all day. Color, psychologists say, has a distinct bearing on our nervous system. A color chart showing nerve reactions may be obtained at your library.

Regular house paint should not be used for painting floors. House paint is made to withstand outside destructive weather, but not constant friction. A good floor enamel, which contains a fair per cent of varnish, should be used. This forms a tough projective film. are consider Cement floors, pool and other cement surfaces may be painted in a variety of colors the change.

with the aid of a recently perfected cement primer. After the paint has become perfectly dry, it is claimed to be absolutely water-By such treatment unsightly cement surfaces may be transformed into attractive looking floors.

To remove scratches caused by striking matches on painted woodwork, first rub the places with a cut lemon and then with a damp rag and a little whiting. The stains will disappear altogether or will be greatly reduced. Now rinse and polish the places with a soft

rag.
Where electric conduits come into the house from the outside, waterproof materials should be used as conduits are usually placed underground. If moisture is allowed to reach the wires, a short circuit will result, which is usually followed by much inconvenience as well as expense and extra labor

Drains of all kinds must be kept free of foreign matter to function properly. By being more careful with the materials poured into drains, many dollars will be saved each

If your rugs loose their stiffness when cleaned and do not lie flat on the floor, this may be remedied by the application of a thin coat of white shellac to the back of the

Our final tip, if you expect to change the exterior color plan of your home, is to make this test first: Take a picture of your house; then tint the photograph with the colors you are considering. By so doing you will get a good idea of how the house will look after

BIRTHDAY PARTY FOR THE KITCHEN

At least once a year give your good old faithful kitchen a birthday party. It is lots of fun, and makes this part of the home more livable.

First of all, make ready for the party by giving the room a thorough going over. Remove everything from the walls and shelves; then clean both carefully. Put back in place only the useful things. Discard broken dishes, bent ware and useless bric-a-brac.

One special object of the birthday party is to supply and replenish the kitchenware. I know a thrifty housewife who prepares for this party by keeping a "birthday box" in which she drops a few pennies each time she is tempted to be extravagant, or as penalties for many other personal faults.

Here is a list of articles that should be in every well-regulated household. C

Various sized mixing bowls. Coffee perculator or drip-o-lator, Various sized frying pans. Cake pans and pie pans. Egg poacher. Custard cups. Good knives and measuring spoons. Double boiler. Thermometer. Spatula and egg beater. Metal and glass measuring cups. Good roasters in two sizes.

FESTIVE RECIPES FOR FEBRUARY

The story of George Washington and the cherry tree is as familiar to every American as his famous crossing of the Delaware. As February is the birth month of this great man, we celebrate the event with many lovely parties. National Cherry Week also comes during this month-February 15-22.

With these two occasions in mind, we give you some delicious cherry recipes that can be prepared for simple meals or party fare. These recipes were prepared by the General Foods Corporation, and have been thoroughly tested in our own kitchen.

Maraschino Cherry Cake -(2-eggs)

2 cups sifted cake flour teaspoons double-acting baking powder 4 teaspoon salt 1/3 cup butter or other shortening 1 cup sugar

2 eggs, well beaten 2/3 cup milk

Mayonnaise-making set.

1/2 teaspoon vanilla cup finely broken walnut meats 16 maraschino cherries, cut in eighths.

Sift flour once, measure, add baking pow-der and salt, and sift together three times. Cream butter thoroughly, add sugar gradually, and cream together. Add eggs and beat well. Add flour, alternately with milk, a small amount at a time, beating after each addition until smooth. Add flavoring. Turn into greased pan, 8x8x2 inches. Sprinkle nuts and cherries over top. Bake in moderate oven (3500 F.) 1 hour, or until done. Note: The nuts and cherries stay on top of cake, if finely

Cherry Rolls 2 cups pitted and dramed red cherries fresh (Continued top next column)

or canned. %≈eup cherry juice

1 cup sugar 2 cups sifted cake flour 2 tenapoons double-acting baking

powder % teaspoon salt 4 tablespoons butter or other

shortening 2/3 cup milk

2 tablespoons melted butter. Mix cherries, juice, and sugar, and let stand about 10 minutes; drain. Sift flour once, measure, add baking powder and salt, and sift again. Cut in shortening. Add milk all at once and stir carefully until all flour is dampened. Then stir vigorously until mixture forms a soft dough and follows spoot around bowl. Turn out immedi ately on floured board and knead 30 seconds; roll 1/4 inch thick. Cover with cherries. Roll as for jelly roll. Mosten edge and press against roll. Cut in 1%-inch slices. Place in greased pan, cut-side down; brush with butter and pour minutes, basting at 10 minute inervals with remaining juice. Serve hot with whipped cream, if desir-

KILL "COLD BUGS" AT THE STARTI

Medical authorities agree that colds are infections. Germs are the primary cause of "catching cold" and of sore throat. Common colds can lead to serious ill ness to ear and sinus infections and even pneumonia. About 50 per cent of all disability diseases start with the symptoms of a cold. Try first to avoid the infection that causes colds—but if you fail, treat them at the first symptoms. and if a cold is severe, if there is

fever, consult your doctor. At first sign of "raw" throat, sneezing, or red, watering eyes, use Zonite for gargling and for nasal spray, etc. Just do this:
For sore throat, gargle with 1 teaspoon Zonite in ½ glass warm water. For nose cold, use same dillution. Spinff up nostrils or use with atomizer. Repeat treatment at 2 or 3-hour intervals.

BETTER THAN A GOLD MINE

Like to have something worth more than its weight in gold? Then, get a chin-chilla. That is, if you can persuade Reginald E. Chap-1/2 cup cherry juice over slices. man to sell you one of the lit-Bake in hot oven (4250 F.) 30 the animals. He owns most of the chinchillas in the world and each one, weighing about 20 ounces, is worth approximately \$1,600—\$900 more than 20 ounces of gold.

It's one of the most bizarre stories in business history. that of Mr. Chapman and his chinchillas. It began when his father, a mining engineer high in the Chilean Andes, noticed the scarcity of chinchillas. Unceasingly hunted for their fur, the little rabbitlike animals were dying out.

Mr. Chapman, senior, decid-Sift flour once, measure, add ed to save chinchillas from aking powder, salt, and sugar, extinction, conquered many obstacles to bring 11 of the butter. Combine egg, milk, and furry creatures to his native vanilla; add to flour mixture, stir-United States to start a farm. ring until all flour is dampened; United States to start a farm, then beat vigorously 1 minute. That was in 1923, the year Melt 4 tablespoons butter in 8x8x2 Reginald E. Chapman entered. the picture as his father's assistant.

Since his father's death in 1934. Reginald Chapman has been master of the chira chillas. Today more than 1,000 of the rodents scamper in and out of their pens at the Chinchilla Sales Corporation, 807 East Manchester, Inglewood, California.

Though his father's original purpose was to raise chin-chillas which would adorn Madame as a luxurious fur is cup pitted, canned red cher- coat, Mr. Chapman isn't in the ries, drained and cut in half. fur business. Chinchillas are coat, Mr. Chapman isn't in the not yet numerous enough to supply many coats.

Mr. Chapman sells his chinchillas to people who desire to start their own chinchilla farms. And so far, animals from his company have stocked every "chin farm" in the United States and Canada.

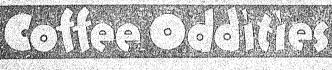

Apparently, chinchilla raising is a profitable business.
About \$2 worth of food can keep one animal alive an entire year. And Mr. Chap-Dissolve gelatin in hot fruit man sells his chins in pairs,

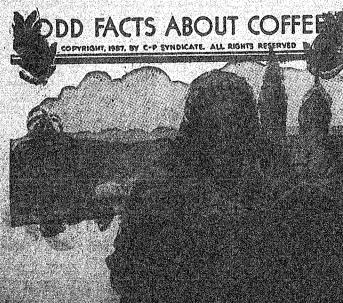

ing and prospecting. He never lost that liking, even today does a little prospecting once in a while. But he doesn't have much time for a hobby.

That's not surprising. The chin farm sprawls over two acres, is valued at over \$1,-000.000. He has to protect that investment. In addition e must supervise capable assistants as they care for the little animals.

It is estimated that there are only about 25 genuine chinchilla garments in the world today and each is valued at about \$80,000.

But I say unto you, That mitted adultery with her already in his heart. Matt. 5:28.

Sheik Omar, exiled in Arabia, faced starvation through accidental destruction of his supplies. Having nothing to eat, he took the berries of the coffee tree and ate them. He also boiled them in a vessel and drank of the decoction. He did not keep his secret long, for a good doctor-priest, to whom he had given some of this decoction, began to sing the praises of the magical drink and brought Omar back instrument to Mocha, where they erected a monastery for him as an expression of their distillate.
