Public Safety Dept. To Issue Texas Driver's Licenses

AUSTIN, March 22.—Police administrators of other states were notified today of an indefinite extension period for Texas driver's licenses after April 1, Ralph L. Buell, chief of the licensing bureau, announced.

The bureau head said a measure is pending before the legislature to provide for the re-issuance of driving permits which expire April 1, after three years of validity. The new licenses will be issued by the public safety department instead of by tax collectors who distributed them when the law went into effect in 1936.

Chief Buell said temporary licenses will be assigned to drivers who pass examinations for their first permits and will remain valid until the amended state license becomes effective. Chauffeurs' licenses, however, will not be affected by the extension period as they are issued annually.

Newspapers will be advised of plans to renew licenses of drivers at a future date, he said.

Ward School P.T.A. Elects Officers

At the regular meeting of the Ward School Parent Teacher Association, held at the school building at 3:30 Tuesday afternoon, the choral club, accompanied by Miss Wheeler, sang two selections. Billy Ross and Wilma Jo Spencer, who will represent Santa Anna in the Interscholastic League declamation contests in Coleman, gave their readings. Billy read "How is Your Balance" and Wilma Jo read "Home Town."

Since no other organization can weigh values more fairly, the P.T.A. should play its part in deciding which values and which ideals are most basic in our society. Mrs. Dick Teague brought out in her talk on "Projects and Purpose" the Parent Teacher Association in some communities actually guide and direct people of every walk in life to an intelligent interest in education and social welfare and gives to them a definite place in planning and carrying out plans for consummation improvements, was further emphasized in Mrs. Teague's talk.

Every child has three fundamental needs—need for love, need for achievement and need for understanding his world. Mrs. J. C. Morris discussed in her paper on "Teaching Children to Assume Responsibilities". When his needs are met the baby can respect the needs of others, she stated.

After Mrs. L. V. Stockard gave a report of the County Council P.T.A., a motion was made and carried that the Santa Anna unit sponsor the Parent Teacher School of Instruction Saturday, May 13. Each member of the different units of the county is asked to bring a covered dish for the luncheon. Mrs. Dick Teague, Mrs. Jess Howard and Mrs. Stockard will have charge of arrangements for the school of instruction, while Mrs. Neusem and Mrs. Price of Coleman and Mrs. Howard will arrange the program.

The association voted to sponsor the Easter sale of stamps for crippled children. With Mr. Byrne as general sales manager an effort will be made to sell fifty dollars worth of stamps. Need of welfare work in Santa Anna was discussed and will be acted on soon.

The following officers were elected to serve during the next year: Mrs. Charles Bruce, president; Mrs. Chap. Eads, vice-president; Mrs. James Simpson, secretary; and Mrs. W. B. Griffin, treasurer. All of the new officers, and Mrs. Dick Teague, Mrs. Jess Howard, Mrs. J. G. Williamson and Mrs. L. V. Stockard were elected delegates to the district P.T.A. Conference that meets in Ranger April 18 and 19.

Miss Wheeler's room won the banner for having the most mothers present, but because they had won it three times in

THE WINNER

There is probably no other satisfaction that equals the satisfaction derived from winning. It is a means whereby perseverant effort is rewarded.

However there are many factors that determine the winner that are not applauded: The one who has attained a more extensive knowledge or a greater skill has virtually won and is absolutely a winner in doing so he has done his best.

So remember this one thing if you are representing your school in any phase of activity at Coleman, you can be a winner if you do your best.

Milk Leads Farm Cash Income

The rising tide of farm cash from milk has added nearly \$440,000,000 to the dairy farmers' income since the low of 1933. Figures on the milk cans show total farm cash income for each year in millions of dollars.

Milk led all products as the largest single source of farm cash income in 1938 with a total of \$1,430,000,000. This was only 6.5 per cent less than the 1937 figure of \$1,530,000,000 according to the Milk Industry Foundation and was \$10,000,000 greater than the low of 1933.

"All farm cash income dropped 12.9 per cent, government reports show, from \$8,208,000,000 in 1937 to \$7,150,000,000 in 1938, excluding government payments," the statement said.

"These figures show the importance of milk as a mainstay of farm purchasing power. They are particularly impressive because milk production was estimated to be from 4 to 5 per cent greater during the year and sales of fluid milk were down approximately 4 1/2 per cent from 1937."

"Milk delivered to homes and stores in bottles, which brings farmers the highest price, probably would have suffered greater consumption declines but for determined efforts by milk distributors to push sales."

"Cash income from milk is also important as it is chiefly cash paid monthly to farmers," the Foundation points out, "and this is cash that is used in the current purchase of merchandise and supplies."

"The milk industry is a huge buyer and milk distributors and producers in many markets account for one of the largest single outlays for cars and trucks, fuel, oil, gas, tires, groceries and other supplies."

He will go to Abilene in May to compete with all Central West Texas winners.

Portuguese Will Be Taught at Texas U.

Austin, Texas — Portuguese will be added to the list of foreign languages taught at the University of Texas next fall, Dr. C. M. Montgomery, professor of Romance languages, announced recently.

The course has never before been a part of the University curriculum, but has been added because of the increasing interest in Spanish-American countries, in which millions of people speak Portuguese. Dr. Montgomery said.

It will serve as a minor language for Spanish students seeking to major in the new Latin-American group of studies.

A professor to teach the course which is elementary in classification, has not yet been chosen.

BOOSTS PROSPERITY

"We Drove 2,916,919 Miles In 1938 To Serve You"

Almost 120 Times Around the World — and Involved in Only 24 Accidents None Fatal — Few Serious

For its record of safe-and-sane driving in the course of duty, the West Texas Utilities Company and the drivers of its 184 cars and trucks were awarded the Safety Trophy seen above. George Harris, a typical driver for this company, flashes a smile that is characteristic of the men and women representing Your Electric Servant... men and women who serve you every day in the year.

DRIVING all those miles, nearly 120 times around the world, is part of our job... a duty we assume in the obligation to bring you good, dependable Electric Service at all hours of day or night. By driving them safely, avoiding accidents, we reduce highway hazards and lessen the danger of mishaps to both ourselves and the public.

Another fact highlighted by this achievement is that 184 cars and trucks are maintained by this company in serving you. The cost of their purchase and upkeep is proportionately divided among the towns and cities served. Business is created... a boost to this West Texas region.

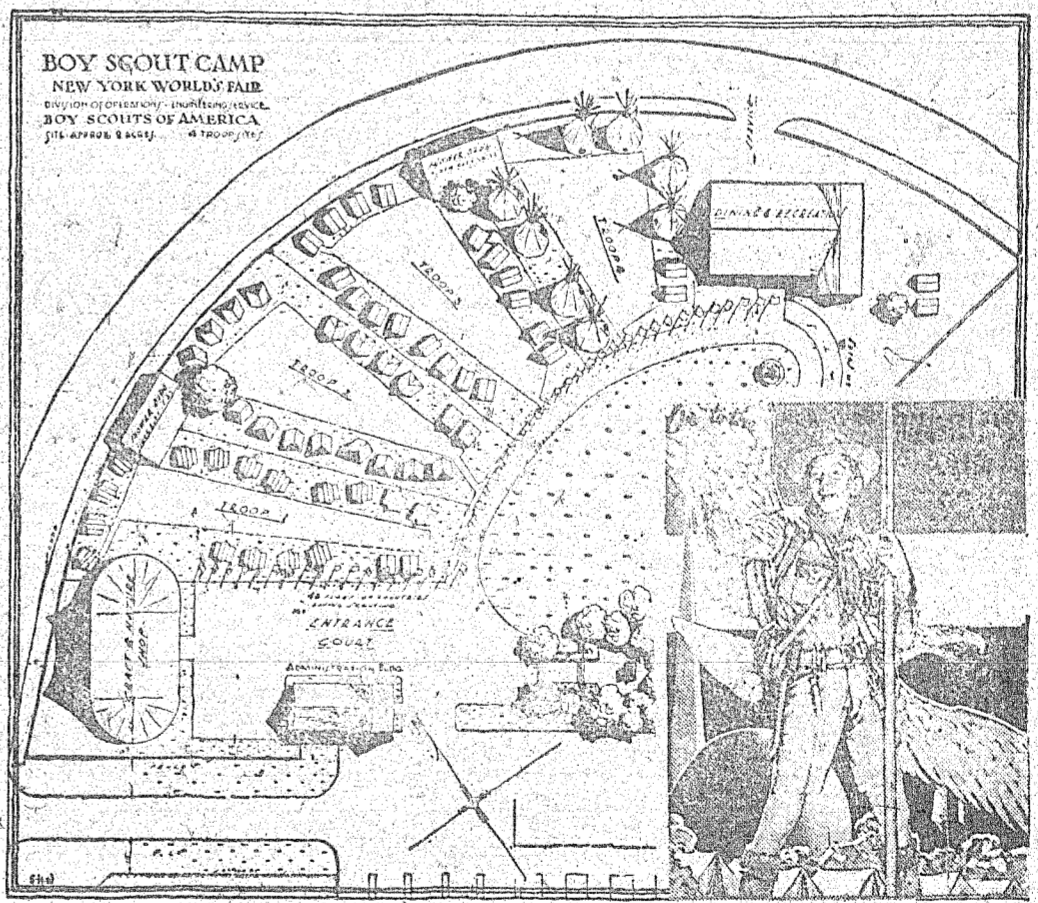

This motorized army of men construct and maintain transmission and distribution lines, answer your calls for service, and supervise the efficient operation of a \$45,000,000 investment. All their driving is motivated by the desire to render good service at low cost.

Boy Scouts Building World's Fair Camp

Layout of the two-acre Boy Scout camp at the New York World's Fair, to be used by 3900 different Scouts and leaders from all sections of the United States during the Fair season.

Any qualified member of the Boy Scouts of America may apply for an opportunity to take part in a unique demonstration and service camp at the New York World's Fair, Dr. James E. West, Chief Scout Executive of the National Council, Boy Scouts of America, has announced. The plan for a Scout camp of approximately 150 different Scouts and leaders each week, on a two-acre site within the Fair grounds from April 30 to October 31, was approved by formal action of the managers of the World's Fair Corporation and the National Council, Boy Scouts of America.

The camp, to be located immediately adjacent to the Federal Building, will accommodate four Troops of 32 Scouts and four leaders. Each site will be equipped with tents of various colors and designs. There will be a large tent for the display of Scouting including woodcraft, handicraft and campcraft. There will be opportunity for Troops that

have produced outstanding articles of handicraft and campcraft to have them shown in this tent at the World's Fair and the exhibit will represent the finest craftsmanship so far developed by Scouts.

Near this tent there will be an open area for flag ceremonies, together with a rustic campfire amphitheater for dramatics and other spectacular demonstrations and a dining hall with full equipment.

Totopole at Gateway
The gateway is to be an imposing one with a 40 foot totopole. The headquarters building will serve as the administration center for the camp, and a stockade will surround the entire camp area. In line with the symphony of colors of the World's Fair the Scout camp will be most colorful with the flying flags of all Scout nations waving aloft, a symbol of world brotherhood and a friendly greeting to visitors from all over the world.

Contacts with Officials
Service projects will be an important part of a Scout's program during four or five hours each day. This will put Scouts in touch with the management of the enterprise, and they will have many occasions to meet the distinguished persons involved in the Fair.

There will be accommodations for only 3,900 of the 1,271,000 present registered Scout membership, most of whom, judging from requests already on hand, would like to avail themselves of this privilege. The opportunity will be open to Scouts in any part of the United States who meet the standards prescribed by the National Council, and preference will be given to applications in the order of their receipt.

All camp reservations must be made through local Scout Councils and not directly with the National Council.

Loan Library Saves \$7000 Each Year in Texas School Funds

Austin, Texas.—Texas taxpayers have reaped a \$75,000 benefit from the drama service of the University of Texas extension division, Frank L. Winship, dramatics director, declares.

During the last decade, Mr. Winship estimates, the division's drama loan library has saved Texas high school funds between \$7,000 and \$9,000 each year by lending their drama departments plays which otherwise would have to be purchased outright from publishers.

The extension library, largest of its kind in the world, chalked up the heaviest month in its history in January, mailing 4,461 plays to Texas drama groups.

The library counts a total of 7,000 different plays, Mr. Winship declared.

Guard Against Flu Says Dr. Cox

Austin, Texas.—The first week of March showed 1000 cases of influenza in Texas, Dr. Geo. W. Cox, State Health Officer, has issued the following statement on the disease.

"In its present form the symptoms may range from a common cold to high fever, back ache, and prostration. However, pneumonia as a complication represents a real hazard and it is well known pneumonia is an exceedingly dangerous disease. The remedy is to go to bed upon the first appearance of the cold and remain there until advised by a physician before one can safely get out of it.

Everyone should realize that in its lightest form influenza can very easily become a serious matter. Prevention is far better than cure and the careful observance of a few common sense rules will materially strengthen one's resistance to an attack of influenza. Some of these rules are:

- (1) So far as possible avoid contact with members of families with colds or influenza.
(2) Keep the feet dry.
(3) Wash the hands before meals.
(4) Avoid unnecessary fatigue.
(5) See that your alimentary system is regular in action.

Chemist Reveals A Naphthenic Acid Related to Camphor

Austin, Texas.—Test tubes of Kinney Hancock, research chemist and graduate student of the University of Texas, this week revealed what may be another story of petroleum's past when he announced the isolation of a naphthenic acid closely related to camphor.

Since camphor is of vegetable source, Hancock believes his identification of this acid—first made by an American scientist—may point to a theory that oil's origin was in plant life, not animal.

Hancock, who is also an instructor, has spent the last four years in University laboratories tracking down nine acids that reside in the more than 10,000 possible chemical combinations of Texas petroleum.

He will present a paper on his research before the petroleum division of the American Chemical Society's annual meeting at Baltimore, Maryland, in April.

WITH OUR WILDLIFE

BY JOHN R. WOOD State Game Warden

FUR AND FUR-BEARERS

The average citizen of Texas and the United States ordinarily does not fully realize the value of our fur-bearers, and the actual money value that they mean to us. This is an industry that is not considered very much when industries are being discussed in sections of the United States. For example, in 1937 it was estimated that trappers and fur farmers in the United States received a net return of 65 million dollars. This averaged about \$22 per square mile for the United States. A very big item to consider.

The principal fur-bearers of the United States are muskrat, beaver, mink, skunk, marten, badger, mink, weasel, opossum, coyotes, wolves, foxes, raccoons, bob cats, rabbits, bear, squirrels and raccoons. In the report on the fur situation it showed that 65 to 70 per cent of the total fur catch was east of the Mississippi river. Louisiana alone had an annual income of \$7,000,000, over twice as much in returns from fur as does the 1,000,000 square miles west of the Rocky Mountains. Louisiana has 48,000 square miles. Note the comparison of area. Too, it was noted that Louisiana had a yield of \$140 per square mile, compared to an average over the United States at \$22 per square mile. Muskrats constitute over 5 million of the 7 million dollar return from fur in this state alone. In early days the west was first in production, but now the returns are way low.

WHY REVERSAL OF YIELD? In the foregoing paragraph it is noted that the bulk of the fur yield shifted from the west of the Mississippi to the east in a short period of time. Why this reversal? The eastern states have been most conspicuous in regulating the economic development of its wildlife resources. Pennsylvania has increased its income from fur from the 1901 yield of \$200,000 to \$5,000,000 at the present time. In New York the returns have increased from \$300,000 in 1908 to over \$5,000,000 at the present time.

POISONING CAMPAIGNS IN WEST The Bureau of Biological Survey is spending annually about \$10,000,000 to poison predators and rodents. Four things have resulted in this respect: 1. Marked reduction in wolves, coyotes, bears, mountain lions, foxes, bob-cats, lynx, etc. 2. Marked reduction in other fur bearers, which take poison not intended for them. Badger, marten, skunks, weasels, etc., have been killed by the thousands. 3. Killings of carnivores

On The Increase Attendance at Sunday School was ahead of the previous Sunday, a good way ahead of Sunday a year ago. Evening services continue to increase. At the evening hour Rev. A. B. Lightfoot, one of our own preacher boys brought the message on "The Way of Salvation." It was a delight to all to have the opportunity to hear him after some months absence from our services.

Now The Men Are At It

The Brotherhood organization of the church is out on the job this week, planning to see every man who is the head of a family to invite each one to sign up for a three months Church Attendance covenant. This work is already increasing in interest, and if the men respond as well as have others next Sunday should be a banner day for church going. Committee chairmen, who are on the job this week are W. E. Ragsdale, M. C. Switzer, Fred Heffington, and Forrest Deal. Each one has a committee of four or five men working with him. Let everyone weigh the effects of this great movement and co-operate with these men.

Clinic Next Tuesday Here

A one day clinic on vacation Bible School work will be held with this church Tuesday at 9:45 and running thru to four in the afternoon. There will be an address on the importance of this type of work, demonstrations of the processional, worship service and salutes to the flags and Bible, as well as habit stories. Department conferences will be held for Beginner, Primary, Junior and Intermediate Departments, and a separate conference for pastors and principals. Each person is to bring enough lunch for the individual needs and the local church will furnish drinks, tables, and table equipment. This is for all of Coleman county and a good attendance is expected. Rev. W. H. Colson of Burkett is promoting the meeting as a part of his Association Sunday School work.

Royal Ambassadors Organize

Monday at 4:15 the boys below Scout age met at the church in an upper room and began work on a Royal Ambassador Chapter, the first of this work ever done here. Each boy present passed the "First Requirement" and was listed as a "Candidate." The next rank is "Page" and requirements for reaching it were set out. Some work on knot-tying was done, a stirring story of two days of scouting in the war zones of China was read. Each one mastered the required knock for entrance and a committee to nominate officers was appointed. Those present were Webb Golston, Donald Ray Howard, Oran Lewellen, Billy Ray Conlee, Roy Lee Teague, Kenneth Morelock, Hal Souder, Hal Hill and the Counselor, R. E. Dunham.

Each Wednesday This Happens

Beginning at 6:30 p. m. the Training Union has a sandwich lunch for Group Captains, Presidents, Vice Presidents, leaders, counselors and general officers. Programs for the following week are planned, posters planned and enlistment work set

has permitted great increase in rodents, which in turn have been poisoned. The carnivores left are hard put to find sufficient natural resources to eat recent natural food. 4. Wastage suited. Fur bearers have been killed when fur not prime. Skins worth 50 cents in September are worth \$5 in December when prime. Government spending millions of dollars to destroy millions of dollars of potential fur values. In Texas the fur resources was reduced from 1,407,884 pieces to 91,2276 pieces from 1932 to 1935. 1937 showed an increase to 1,049,129 pieces. This report was very encouraging to the fur trappers and dealers over Texas.

Reports of animals destroyed by the government showed the following in 1934-1935: Coyotes killed 14,992; wolves 1,191; bob cats 1,771; ocelots 7; mountain lions 39 and bears 1. Enough furs could be produced in the United States to meet our annual market demands valued at \$190,000,000, if the policy of conservation and management of our fur-bearers were in operation in all the states. Here is a dollar and cents cash value of \$125,000,000 annually not being reaped because of the bad practices now in operation.

Your Present INCOME

WILL BUY A BETTER HOME THIS WAY

Like a good many people, you've probably found out that to buy or build a new-home today, you'd have to sacrifice a good many of the features you want, to get the cost down within your budget.

But you'll find that by buying a newly-reconditioned H. O. L. C. Home you will get a great deal "more house" for your money—a larger floor plan—more room—better construction—in a built-up neighborhood with established values.

The reason, of course, is that the first owner of a house always has to take the biggest price cut when he sells, the same as with automobiles and there is no builder's profit included in what you pay. Besides that, in buying an H. O. L. C. Home you have no loan expense or closing charge, and you get better terms: low 5% interest and 15 years to pay.

That's why an H. O. L. C. Reconditioned Home gives you more for your money.

Call us up and make an appointment to see some of the H. O. L. C. Homes on our list, and let us show you just how much you can get for the money you plan to put in a home.

Ten members were present in the class last Sunday morning to enter into the lesson discussion on "Incentives to Christian Living" which was ably led by Mrs. Chap Eads.

We were very happy to have Mrs. Lawrence J. Smith visit with us again. Visitors and new members are always most welcome.

There was an encouraging increase in the attendance last Sunday. Dillard Freeman of Fort Worth sang a beautiful solo, and there were other visitors. We were glad to have Mrs. D. C. Neal and Mrs. J. W. Kirkpatrick back with us after their absences on account of illness.

Next Sunday is our anniversary day and we are hopeful of a large attendance. The Bangs quartet have been invited and it is hoped they can be present.

Brother Lawrence Bridges of Dalhart will be in the midst of a revival meeting and will preach both morning and night. The meeting will continue until Easter. Brother Bridges comes highly recommended as a gospel preacher and singer. The church members are urged to attend all the services and the public is cordially invited.

H. D. Club Discusses 'The Art of Living'

Repetition, variety, contrast and rhythm are the elements of beauty that nature, religion and art have taught from the beginning of time, Mrs. John Lowe said in a talk on "The Art of Living," when she and Mrs. W. E. Vanderford were co-hostesses to the Santa Anna Home Demonstration Club Friday, March 17, at the home of Mrs. Lowe.

Mrs. Vanderford demonstrated the importance of preparedness in serving a meal when unexpected guests arrive. The southern housewife has a wide reputation for this cordial hospitality; with the latch string always out and a table set for one more. The emergency shelf saves a fuss or flurry in preparing a meal upon short notice, she stressed in her talk.

At the business meeting, the club decided to serve luncheon to the Lions the second, third and fourth Tuesdays in April. Food committees appointed were as follows: second Tuesday, Mrs. R. F. Watson and Mrs. S. K. Morelock; third Tuesday, Mrs. J. K. Harrison and Mrs. John Williams; and fourth Tuesday, Mrs. W. B. Griffin and Miss Ellen Richards. The club will also sponsor a pie supper soon. Mrs. J. K. Harrison was appointed chairman of the Ball Jar Canning Contest in which the club is competing. Miss Richards gave a report on the Laido program and Mrs. Morelock led the recreation.

Light refreshments were served the 11 members and one visitor, Gene Trick. Plate favors were shamrocks centered with a "Hurry-up Meal" recipe. The next meeting will be March 31 with Mrs. J. K. Harrison as hostess. Miss Christene Trowbridge will demonstrate an open-minded kitchen.
