Coleman County Farm Prospects Above Average

Following the fine rains farmers are doing their stuff. Some are planting some are cultivating and others are making preparations for grain harvest. The small grain, which is an item of agriculture in these parts, is spotted. The southern, portions of the territory suffering worse for moisture than the northern portion, will harvest but little grain. Northeast of town several farmers report b fair grain eron and the law

All things considered Colepects at present. This is cullected from news items published in other mediums and trust lien on the property and from general current events. We believe Coleman county farmers are making better by the Honorable Charles A. progress than most conside Boynton, Judge of said Court, toward recovery, due to the diversification being carried out by most tarmers.

Terraces Alone Do More Good on Farm and Ranch Than \$28,000,000 Marshall Ford Dam

ITHOUT expenditure of tax money and through the voluntary work of farmers, ranchmen, and county agents, over 50,000 linear miles of terraces — twice the distance around the world - were built in this West Texas region last year. They alone impounded 554,000 acre-feet of water, the same amount as that held by Marshall Ford Dam which will cost the taxpayers \$28,000,000.

* Terraces, along with a balanced program of contouring, strip-cropping, and earthen dams, stored moisture in the soil for crops, at the same time aiding flood control. Altogether they impounded over 1,000,000 acre-feet of water...all without tax expense.

Inasmuch as Marshall Ford and similar dams earned the reputation for being a "flood menace" during the same period, a lesson thereby is offered that the only effective curb on devastating floods must begin at the point where the rains fall.

Believing that industrial and agricultural development go hand-in-hand, this company has lent its efforts to promotion of soil and water conservation and the successful culmination of the 1938 soil and water utilization contest. Anything that benefits agriculture in the communities we serve also is beneficial to every other type of business and industry. It is our hope that the land may be passed on to the next generation in actually better condition than it is in this.

To The Citizens And Gas Patrons of Santa Anna

On May 4, 1939 the City Commission amended the gas rate ordinance of the City of Santa Anna so as to provide for \$1.00 minimum charge to domestic consumers regardless of how small an amount of gas might be used, and also provides for a charge of 50c per M. for the first 10 M. cu. ft. and 45c per M. for the next 10 M. cu. ft.

While the law requires that the utility shall be given notice of the intention of a City Commission to pass a rate ordinance the first notice we had of this ordinance was after its passage accompanied by a copy of the same. This forces us unwillingly to raise the rates to this minimum charge for our patrons.

The Coleman Gas & Oil Company regrets that it is prohibited from furnishing gas to the citizens of Santa Anna who have patronized it through these years at the same rate as to the citizens of Coleman. The gas furnished the citizens of Coleman comes in pipes through the City of Santa Anna; and for five years or more we have furnished gas to the citizens of Coleman at 35c and expect to do so through the years to come.

We regret that circumstances are such that we are prohibited from exercising our option of furnishing gas to the citizens of Santa Anna at the same price; but are prohibited from doing so by the above ordinance. We still look forward to the time when we will be permitted to make a uniform rate to these two cities.

Respectfully,

Coleman Gas &
