Let's Be Thankful for Electric Service, am thankful for my electric range. It's so much easier to prepare Thanksgiving

Electric Service is something we've all come to accept without much thought. That's because it's so very, very good and dependable. We simply needn't worry about it at all. So it's fitting and proper that we pause at Thanksgiving time to give a moment's thought to the marvelous value -nay, bargain-we get in return for the few pennies a day that we pay for Electric Service. Light is only one of the many items of service included in the monthly statement. Refrigeration, Cookery, Radio, Sweeper, Coffee-maker, Washer, Iron-all these and more cost less today than our grandparents paid for light alone! To use

Dinner.

this Service, we need only turn a switch And behind the switch are a thousand men and women whose constant labor and research make Electric Service both dependable and economical. Jobs thus are created -a \$1,300,000 payroll in this West Texas area. Taxes are paid-almost a half million dollars annually for the support of local, county, state and federal governments. We can well be thankful for modern Electric Service.
