BANKING fills another vital need of patrons by supplying them with protection for their valuables and papers. A safety deposit vault, which is open during banking hours, assures them of protection from fire and theft. Mortgages, bonds, contracts, insurance papers, etc., should never be left where loss or damage might occur. Cost of this protective service is very low in most banks. We appreciate the support this bank has received to the point that we supply this service to our patrons free of charge, another incentive for maintaining a checking or time deposit or savings account with this institution. Drop in and talk matters over with us. We may be able to help you solve that puzzling finanial problem that has been worrying you.
