'We're on guard day and night'

THIS MODERN LINERIDER—so like the old-🙏 time cowboy — has a mortal enemy too. The cowboy waged a continuous battle against the rustler. The lineman's big fight is against depreciation—and the ravages of wind and rain, beat and cold.

Just as the soil is worn away by erosion . . . just as a herd of cattle or sheep can be depleted by theft or disease, so does the electric line suffer from deprecia-

tion and the elements. The lineman is contantly at work on the lines en trusted to his guardianship. Repairing and replacing

old poles. Repairing and replacing old wires. Destruction by a sudden storm-or damage by a run-away car or truck-must be repaired in as short a time as possible. Day or night—the lineman is subject to call. The light of a flashlight may be his

only illumination while atop a 50-foot pole, working on high voltage lines. He is one of the hundreds of men and women, working "behind the scenes" who help make Electric Service efficient, dependable and economical here. On him we bestow a title of honor-"A Modern Linerider."
