punce D b STARTED IT !

Forty years ago an oil gusher roared in a on a low hill south of Beaumont to open a new industrial era for Texas.

That discovery at Spindletop started our modern Texas petroleum industry and made Texas the nation's leading oil state.

In the forty years since Spindletop blew in, nearly 200,000 webs have been drilled throughout Texas. Over 530 separate fields are now producing in all parts of the State. Today Texas supplies over one-third of the Nation's oil and has over half of its petroleum reserves.

Our industry, by refining almost all of this oil in Texas, has created our largestmanufacturing enterprise. By furnishing cheap fuel it has laid the foundation for many other Texas industries.

From a handful of Texans forty years ago, this industry has grown until now, directly or indirectly, it supports almost one million of our people. Its expenditures reach into every section of the State and benefit every Texan.

The discovery of America's first gusher oil field at Spindletop has turned out to be one of the most important events imthe history of our state. Today all of Texas salutes Spindletop!

Gen eral Pinky Francis, one of the best story tellers in the Capitol City, makes this comment when someone relates an especially ancient joke, "Columbus told that one to the Indians." If you do go to Mexico and if you go by automobile (as this columnist suggests) when you arrive in Mexico City, put the car in a garage and leave it there. The many one way streets and the swift current of traffic are likely to prove bewildering and, though you probably won't have a collision, you will not enjoy driving in the business district. Taxicabs are innumerableand the fare is very low. All you have to do is look as though you want a cab and one will pull up to the curb But if not, then when you spot a car approach-ing with a sign, "Libre," signal to the driver. Most of the taxis are new cars and some are of the higher price makes, too. For a short trip, six or eight blocks, the charge is only one peso (about 20 cents) and three persons pay no more than one. Longer trips are in proportion. How a man can drive a fine car buy gasoline and make enough at such a rate to pay for the auto and his own living expenses, — well, you figure it out.
