AS GENERAL ELECTRIC SEES IT...

New products created 45,000 G-E jobs in the last nine years

And hundreds of new ideas are now being developed to keep employment high and help America live better

Tower of time cards shows jobs created by new G-E products. In a single pile, they'd reach 5 stories high.

One out of every five people working at General Electric owes his job to products G. E. didn't make before 1945.

Will coming years bring as much progress?

Actually, we believe there will be more. Many exciting possibilities are predictable as we learn how to make full use of atomic energy. Another important new development will be electronic machinery which will make work easier, production swifter—and create more jobs. New uses for gas turbines, promise improved air, rail and ship transportation, and better power plants for industry. Research will make home appliances even more helpful.

All these fields—and many others—are so promising that we expect to produce more in the next ten years than in

all the previous 75 years of our existence. As we see it, in a free economy, America's industrial progress is not only continuing, it's rapidly accelerating.

Tiny job maker. The G-E transistor, not much bigger than a pencil eraser, does the work of a full-sized vacuum tube. It makes possible a wide variety of new electronic devices which will make your life more pleasant in the future and give employment to thousands of people.

Growing in Love

Lesson for September 19, 1954

A great deal is said about "love" but not enough has been done about it. Jesus taught that Christians must love even their enemies. He and his great apostles Paul and John had much to say about love and forgiveness. Paul would hardly have given the warnings he gave against quarreling and strife if he had not thought that Christians need these warnings. Few words are used oftener in Christian sermons than "love"; few are more misunderstood. Few ideals are held up oftener by the church; few are violated more often by church members. Love is a clouded theme; some questions may help to clear it up.

Dr. Foreman

Christian Love

The first question is: What is the difference between Christian love and what usually goes by that name? It should be plain to any one who can read the Bible that when Paul and John and Jesus speak of "love" and urge it as a duty of all of us, they are not thinking of romantic love as between men and women. That is a good, important, happy and sweet kind of love. No life is fully complete without it; but Christian love is a wider thing. All kinds of love except Christian love have limits. You love your family, your country, your friends, people you know and like. Jesus asks us to love even our enemies. A circle of love that will take in enemies must be something extraordinary, and so it is. Ordinary love, then, has limits small or wide; Christian love knows no limits. Again, ordinary love is possessive, it wants the loved one for itself. Christian love is self-giving. Ordinary love is strictly human and can be found in those who do not know God.

Christian love is divine; it is not only like God's love but is found only in the lives of those who have been touched by God's Spirit. Ordinary love is given to the lovable; the divine kind of love, the Christian kind.

Loving and Liking

Another question is: How can we love those we do not like? And can we like everybody? A clue to the answer is found in what we know of the love of God. Jesus very clearly suggests that we are to be Godlike in our love; indeed our highest Christian growth comes right here, because when we are most truly filled with this kind of love we are most like God. But it is plain that God does not like every one he loves. We read that God loved us "while we were yet sinners." If we could say that God likes, murderers, adulterers, traitors, thieves, foul-mouthed and cruel men, we should have to say that God shows very poor taste. But we are nowhere told that God likes sinners, that is to say that he enjoys their company, enjoys what they do and say. Far from it. If he liked them he would never change them. It is written, "Whom the Lord loveth he chasteneth" but it is just as true to say, "Whom the Lord loveth he changeth." Love, in the Christian, God-like meaning, is concern for the true welfare of the loved one. A father may love his son (and God does love his sons), even when he thoroughly disapproves what the son is doing. So we are not expected to like everybody, regardless; that would be rather silly. But as Christians we are expected to have concern for the true welfare of every one.

Can Love Be Perfect?

A third question is: Can our love ever be perfect? Here Christians differ in their understanding of what Jesus and Paul and John taught, and of what is possible for us. All Christians agree that only one life expressing perfect love, from beginning to end, has ever been seen—the life of our Lord. Some Christians believe that it is possible, sometimes, to act from a motive of unadulterated, unalloyed, unreserved, unqualified Christian love. Other Christians believe that this is never possible for a human being, even a Spirit-blessed Christian. Two things are certain at this point. One is that even if the motive is sometimes absolutely pure, human knowledge is never perfect. Our concern may be completely unselfish, but not completely wise. The other certainty is that even if the motive is never absolutely pure, nevertheless perfection is always the high goal.
