"He Profits Most Who Serves Best"

VOLUME LXIII

SANTA ANNA, COLEMAN COUNTY, TEXAS, FRIDAY, NOVEMBER 5, 1948

NUMBER 45

Paper To Be Published Day Early Next Week

Due to the fact that Armistice Day, November 11, comes on our regular publication day, we are going to try to get the paper off the press a day early.

All correspondents and others who write news articles for the paper are requested to please take note and get your news items in a day early if possible.

All advertisers are requested to get your copy in as early as possible. We are working under a critical shortage of help and to get the paper out on Wednesday night, we must have all copy as soon as possible.

Another important thing to remember is that the Mountaineers will play the Bangs Dragons at 2 p. m. on Thursday afternoon, November 11. This will be the Mountaineers' last home game. Schools will be dismissed for the full day.

Open House At Butane Co. Saturday

Mr. P. I. Matson, of the Matson Butane and Appliance Co. of Brownwood announces this week his purchase of the Butane Co. here and that he will hold Open House at the stucco building on the Rockwood Highway, Saturday, November 6 from 10:00 a. m. until 6:00 p. m.

Refreshments of coffee and doughnuts will be served to all visitors.

He stated that he was mailing a number of personal invitations, but knew that he would miss a few of the citizens of Santa Anna and surrounding territory, but that all were extended a cordial invitation to visit the plant during the hour above mentioned. Prizes will be awarded at 5:00 p. m.

Baptist Centennial Celebration Nov. 7-11 In Houston, Texas

Ten thousand Texas Baptists are expected to converge upon the city of Houston, November 7-11 for their centennial celebration.

The annual convention of the Woman's Missionary Union will be held in the historic First Baptist Church of Houston, November 7-9. The Brotherhood convention will open on Monday, the 8th, with sessions in the city music hall. The closing sessions of these two pre-convention meetings on Tuesday evening will be the opening session of the Baptist General convention in the city auditorium.

The feature of the opening session will be a pageant depicting one hundred years of organized Baptist work in Texas. Dr. Wallace Bassett, for thirty years pastor of the Cliff Temple Baptist Church in Dallas, will deliver the president's message.

The annual sermon for the convention will be preached Wednesday noon by Dr. Forrest Freezer, pastor of the First Baptist Church, Waco.

Dr. W. R. White, president of the oldest school in Texas; Baylor University, will bring an address on Wednesday evening on the subject, "Looking Forward 100 Years in Texas." This address will follow the report of the Survey committee which will recommend to the convention a budget for the coming year of ten million dollars.

The convention, the largest religious gathering in Texas, will come to a close on Thursday evening with the address from the president of the Southern Baptist convention, Dr. Lee.

Democrats Win In National Election Dewey Concedes Election To Truman

Anti-Tank Co. Gets Equipment, Pay; Need Men Now

The Anti-Tank Co. 142nd Infantry, received two M-26 Medium tanks in October. This is one of the best tanks now used by the Army, and is superior to the famed Sherman Tank used during World War II. This tank is armed with one 90 M M gun, two 30 caliber machine guns, and one 50 caliber machine gun. It weighs approximately forty-three (43) tons and has a 500-horse power V-8 engine with a cruising speed of 35 to 45 miles per hour.

Beginning in the near future, the men of the Anti-Tank Company will begin training with these vehicles. At that time, they will learn how to maintain and drive the tanks and how to operate the guns.

The third payroll since the organization of the Company, arrived last week. To date, the unit has received \$3,237.00 in payrolls since April 6, 1948, and for a like period, had the unit been at full strength, the payroll would have been approximately \$10,000, or in a year's time, for a full strength Company, the payroll would be approximately \$16,000.00.

To date, the Company has two officers and twenty-eight enlisted men, and will eventually obtain a strength of five officers and seventy-eight enlisted men. There are still plenty vacancies for men from First Lieutenants to Privates, and if any one is interested, come around to the Armory Building, and see Sgt. Virgil Fulton or Capt. Jesse K. Earton.

505 Deathless Days In Abilene

Abilene, Nov. 2. According to records of the National Safety Council, Abilene's record of 505 deathless days in traffic gives the city a national standing of second place in the population bracket of 50,000 to 100,000. Surpassed only by Schenectady, N. Y., Abilene will have to hang up a record of 702 deathless days to become first in the nation. With this goal in mind, the Police Department and all civic organizations are doing their utmost to promote traffic safety through education, publicity, and better enforcement of traffic laws.

Hereford Sale In Abilene On Friday

Abilene, Nov. 2. The West Texas Hereford Association will hold its ninth annual auction sale here Friday, November 5. The sale, which creates wide interest among Hereford breeders of West Texas, will take place in Sears Arena at Abilene's Fair Park. Breeders have consigned 18 bulls and 28 females to the sale, with the first animal scheduled to go under the hammer at 1:00 p. m.

Association members and visitors will be welcomed with a noon barbecue in the arena by the Agriculture and Livestock Committee of the Abilene Chamber of Commerce.

ATTEND CHURCH SUNDAY

The biggest and most unexpected upset in politics happened in Tuesday's General Election. President Truman, whose chances were considered very poor up to the time the returns began coming in, even the gamblers giving odds of 15-1 in favor of Governor Dewey, threw the biggest surprise that ever swept the political slate in the history of the world, by winning the election overwhelmingly for himself and both houses of Congress. The Senate and the House of Representatives were rescued from the Republicans and both now have majorities and several states, who were controlled by Republican Governors, are now back in the hands of the Democrats.

At this time, noon, Wednesday, President Truman apparently had over three hundred electoral votes, and a nice popular lead throughout the United States. However, Dewey carried New York, but by only a small majority, Pennsylvania and other large states, but not enough. It was the biggest one man victory ever recorded in political circles.

Lyndon Johnson also defeated his Republican opponent, who was backed by former Governor Coke Stevenson and several other democrats for the U. S. Senate, as Texas traditionally went out with a long lead for the Democrats.

Members Of The Campbell Family Meet In Santa Anna

Three daughters and one son of T. E. Campbell, who was one of the first editors of the Santa Anna News, were visitors here several days last week, and were pleasant visitors in the News Office.

They were Mrs. Isola Allison of Nocona, Texas; Mrs. Mollie Holman of Yuma, Arizona; Mrs. Effie Liveler of Canton, Miss; and Thavis Campbell of Dallas. They had been having a family reunion in the home of the latter with other Dallas relatives.

These four are the last of ten children; two brothers died suddenly in December of last year, J. W. Campbell on December 2, and Hail on December 17.

Most of the children had attended school in the old stone building; that was torn down last year. Meeting with old friends was a mutual pleasure, and they regretted not being able to see others. The family moved about 45 years ago from Santa Anna to Corsicana. One brother of the visitors, Tom Campbell, continued to live here for many years after the others moved.

The chief reason for their coming to Santa Anna was to visit the graves of their parents, Mr. and Mrs. T. E. Campbell and their grandmother, Mrs. Nanie Duty Whitmore in the Santa Anna Cemetery.

Mountaineers To See H. P. C. Game Sat.

Brownwood, Tex. Nov. 2. Coach Dow McBride and the Santa Anna Mountaineers are among the thirty-six teams invited to attend the Howard Payne-East Texas Baptist game here Saturday night as guests of the Howard Payne Athletic Department.

The game will be the first meeting of the two teams and promises to be a good game for the spectators.

The Jackets 19-7 win over the Hardin Indians last week puts them in a tie with McMurry in the race for the Texas Conference championship.

Mr. H. G. Mayo, who has been employed at Guthrie, Texas was here for the week-end, visiting with the home folks.

Mrs. Mae Roddy of Abilene and Mrs. Doc White of Coleman were visitors in the Raz-Bilbrey home over the week-end.

Mountaineers To Tangle With Early High For Second Place In The District

Sue Milligan In Finals In Contest

Six lucky area winners were selected in the annual "Make It With Wool Style Show," held in the Coleman High School auditorium Saturday afternoon at 2:00 p. m. and will enter the state contest in San Angelo on December 7.

They were Misses Sue Milligan, Rockwood; Minnie Lee Billingsley, Lawn; Jane West, Talpa; Mary Lee Dodson, Brady; and Doris Beeler and Avis June Barnett, both of Coleman.

Following are the winners in the brackets in which they won: Junior Division: Coats, Sue Milligan; Suits, Avis June Barnett; Dress, Minnie Mae Billingsley and Jane West.

Senior Division: Suits, Doris Beeler; Dress, Mary Lee Dodson.

Every girl who entered the contest received a virgin wool blanket and \$7.50 in cash, also wool dress lengths, sweaters and scarves donated by merchants.

The girls modeled the garments which they had made. Each entry was judged in the basis of quality and selection of material, workmanship, pattern design, and general style attractiveness.

The area winners who enter the state contest in San Angelo on December 7, will compete with 54 entries from Ft. Worth, San Antonio, Del Rio, Ft. Stockton, Marfa, El Paso, San Angelo and Uvalde. There are nine areas, including Coleman.

Mrs. George Garrett was announcer for the show.

Mrs. J. W. Vance and Mrs. Raymond McElrath declared the Wool contest and show which was sponsored by the Woman's Auxiliary of the Breeder-Feeder and Texas Sheep and Goat Raisers Association, to be the biggest of its kind ever staged in Texas, and was definitely a success.

Winners of the state contest will enter the National Contest in San Antonio in February. Winners of this show will be awarded a year's scholarship to the Tarphagen School of design, New York, and thousands of dollars in savings bonds. There will also be a number of other valuable prizes.

Mrs. A. O. Price of Overton, who was here for 10 or 12 days with her sister-in-law, Mrs. Lovell Richardson, and Mr. Richardson, during his illness, has returned home. Mr. Price and their daughter-in-law, Mrs. H. D. Price and Danny came on Friday and they returned home on Monday.

Mr. and Mrs. A. P. Petree and Kay and Jane of Abilene were week-end visitors with her parents, Rev. and Mrs. E. H. Wylie. Norval Wylie and Nancy of Lamesa visited with them Saturday night.

J. B. Howington visited last week in Dallas with his son, Mr. and Mrs. Reuben Howington.

The Santa Anna Mountaineers will journey over to Early High Friday night, November 5, to tangle with the Longhorns for what will most likely be the second place in District 11-B.

The Longhorns were defeated by the powerful Rising Star Wildcats last week by a score of 31-13. This gave the Wildcats the undisputed lead in this district. The Wildcats have only two more games to play. They are with Cross Plains and May. Both of them being considered the underdogs, but the game with Cross Plains is always more or less a toss-up until the game is over.

Early High was undefeated and unscored on this season until they met the Wildcats, who brought an abrupt halt to their winning streak. This loss for Early High put the Longhorns in second place in the district standing, with the Mountaineers tied on the number of games lost. The Mountaineers have played one less district game than the Longhorns.

In comparing the Mountaineers with the Longhorns, on paper, the Longhorns may have a little bit the best record. The Mountaineers lost to Rising Star by a score of 13-0, with the Longhorns losing by a score of 31-13, the Longhorns won over the May Tigers by a score of 32-0, while the Mountaineers won over May by a score of 44-0; the Longhorns won over Baird by a score of 13-0, and the Mountaineers won by a score of 7-6 over the Baird Bears; and the Longhorns won over Cross Plains by a score of 26-0, while the Mountaineers won over the same team by a score of 20-6.

This may give the Longhorns a slight edge over the local eleven on paper, but according to Coach McBride, "Paper figures don't tell the tale the game will tell."

The Mountaineers took a bruising defeat at the hands of the Coleman Bluecats last week. The local eleven put up a good fight and the Bluecats knew they had been in a game, but the final score was 48-0 for the Bluecats.

According to the Coach, all the Mountaineers are in excellent condition for the game with Early High. The Mountaineers will have two more games after this week, one on November 11, when they will meet the Bangs Dragons on the local field in the afternoon and on November 19 they will travel over to Morgan for the final game of the season.

The Mountaineer-Longhorn game will be played at 7:30 p. m. at the Longhorn field. The field is located at the Early High School, on the Comanche Highway out of Brownwood. The prices of admission will be the same as all district games: 60 cents for adults and 30 cents for students.

This is expected to be a real football game and a large number from here are going to the game. Let's all go and give the Mountaineers our full support.

Patronize our advertisers.

H. D. Club Conducts Special Meeting

Miss Jo Garland conducted a special Demonstration on Rug Making, Thursday, October 28, in the home of Mrs. John Perry. The demonstration, which was very instructive, included hooked and braided rugs.

In addition to the most interesting study, Mrs. Walter Stacy gave interesting highlights of the recent state meeting of Home Demonstration Clubs held in Temple. Mrs. Stacy belongs to the Trickham Club, but graciously consented to go when our delegate, Mrs. Perry, could not.

The convention theme was "Harmony in the Home and Peace in the World." Such subjects as "Speech Hatred, The Atom Bomb, Adoption of Foreign Farm Families, Workshops, Schools, Bonds, Legislation, and Taxation of Natural Resources," were highlighted.

The startling statement was made that Texans use only 10% of their underground resource production, 90% being shipped out.

Geologists reveal from certain indications, that 35 years from now, these may be gone, and we should build a reserve from them to be used to better our school system. It is said Texas is twenty years behind in school advancement. Along this line, she stated that other channels of business pay much better.

Mrs. Stacy also told of a farm woman from the Netherlands that flew to the Convention in eleven hours and made a fine address.

Mrs. Perry served cake with hot coffee or cocoa to Misses R. W. Douglas, Arthur Talley, A. L. Oiler, D. H. Moore, C. T. Conley, Louis Zachary, W. E. Vanderford, A. Holmon, C. W. Stephenson, E. K. Jones, Walter Stacy, Clark Miller, Ben Herring, Ione Moore, and Misses Jo Garland and Ellen Richards.

The next regular meeting will be with Ellen Richards, Friday, November 5th.

Attend State O.E.S. Meeting Last Week

Those attending the annual session of the Grand Chapter of Texas Order of the Eastern Star, which met in Fort Worth last week, were Mrs. Payne Henderson, Mrs. Ed Bartlett, Mrs. Fred Rollins, Mrs. Orville Allen and Mrs. Rex Golston.

Mrs. Henderson, Worthy Matron, Santa Anna Chapter No. 247, was one of several hundred worthy matrons of Texas, who took part in the Grand Opening and Installation ceremonies.

Mrs. Bartlett was installed as Deputy Grand Matron of this district.

Others attending the installation services were Mrs. Roy West, Mrs. J. D. Henderson, Mrs. Jack Mobley and Mrs. Vernon Penny.

VETERANS NEWS

Qualified persons in Texas, Louisiana and Mississippi can now obtain jobs as clerk-stenographers with the Veterans Administration in Washington, D. C. VA has announced.

VA is extending its recruiting into most parts of the nation because of the current shortage of qualified stenographers in the nation's capital.

Entrance salary for these positions is \$2,498 per year with a very good chance for quick promotion to higher grades. VA said. Travel to Washington will be at government expense.

An adequate number of rooms for single persons are available in Washington at rates from \$5.00 per week and up. Government quarters at Arlington Farms in dormitories are also available for girls.

Employment may be obtained through any regional office, hospital or center of the Veterans Administration.

A savings in insurance premiums is available to World War II veterans who still are paying their insurance premiums on a monthly basis, VA said.

Pointing out that approximately 90 percent of the veterans are paying premiums in a monthly basis, VA explained that they may receive a three percent annual discount by paying their

premiums on a quarterly, semi-annual or annual basis.

In addition, the fewer premiums due lessens the chance of a policy lapsing.

Mr. and Mrs. E. O. Everett and son, Harold of Eastland visited here with his mother, Mrs. H. E. Everett Sunday.

Mr. and Mrs. G. O. Daniel received word last week that their son, James Daniel, had landed safely in Okinawa, having made the trip in 13 days from San Francisco.

Miss Dorothy Burrage has accepted the position as office nurse for Dr. L. O. Garrett. Dorothy attends college in Brownwood in the mornings, but works in the afternoons.

Mrs. Pearl Bosworth and Miss Ruby Weaver of Dallas and Mr. and Mrs. M. C. Weaver of San Antonio were week-end visitors with relatives in Santa Anna and Brownwood.

CARD OF THANKS

We wish to thank our friends and neighbors for their thoughtfulness to us during the time of hospitalization (Lovell's) in the Sealy Hospital, as was manifested in cards, flowers, visits and telegrams. We especially wish to thank the doctors and nurses.

Mr. & Mrs. Lovell Richardson.

Can you think of a grander gift?

Wouldn't you rather have a new portrait of your favorite than any gift you can think of?

Your "favorites" may be your children, your parents, or any other loved one.

They undoubtedly feel the same way... so arrange right now to let us do a portrait of you for their Christmas. By doing it now, you'll give us plenty of time to get every bit of your charm and personality into your portrait.

And your lucky favorites will get exactly what they most want—your Christmas portrait—the gift that only you can give.

Before you forget, call 8161, and make an appointment.

DUNLAP'S

Across Street From High School — Coleman

College students home for the week-end from Abilene were Coyta Griffin, Ethel Stewart and John Hardy Blue of McMurry; Leroy Stockard of A.C.C.; and Earl Jean Woodard and Jeanette Eubank of Draughan's.

Mayor George Johnson returned Saturday from a trip of three weeks to Chicago, New York and other eastern points. Mayor Johnson is looking much better since he made the trip.

Mr. and Mrs. Johnnie Korts of Pampa were Tuesday morning callers at the News office and the Greggs' homes. Mr. Korts has helped on the News on various occasions and worked in Coleman for two years.

Miss Lois Faye Harris spent the week-end with her parents, Mr. and Mrs. Milford Harris and family.

Dr. and Mrs. E. R. Lovelady left Tuesday for Magnolia, Ark., to visit with their daughter, Mrs. Jim Dodson and family.

Mr. and Mrs. Henry Goodwin have moved to their home in the country. Their son, James, who attends college in San Angelo, visited with them last week-end.

Suggs - Dodgen
On Saturday evening, October 30th, Miss Johnnie Lou Suggs and Buford Dodgen were married in the Methodist Church in Andrews, Texas at 6:30 p. m.

The beautiful double ring ceremony was read in the presence of the families of the couple and a few close friends. The couple took their vows before an altar space decorated with white flowers and greenery. Candelabra stood at each end of the wedding decor.

Three of Buford's friends of Santa Anna attended, and were in the wedding party. Kenneth Moredock was best man, with

the bride's sister maid of honor. Webb Golston sang the pre-nuptial numbers and Ray Henderson ushered.

The groom's parents, Mr. and Mrs. A. B. Dodgen of Santa Anna attended, and their daughter and son-in-law, Mr. and Mrs. Z. W. Box and children of McCamey.

The groom is a graduate of Santa Anna High School, and spent 18 months in the Marines. He has been attending college for the past few months.

The couple will make their home in Andrews, where the groom is employed in the oil fields.

Wesleyan Service Guild Met on Monday
Wesleyan Service Guild members met on Monday evening, November 1, in the home of Mrs. Harry Caton with Mrs. Jack Mobley, co-hostess.

Mrs. R. K. Green, gave the devotional. The lesson program was under the leadership of Mrs. Clyde Pittman.

The hostesses served refreshments of pie and coffee to Meses. Blanche Grantham, Hardy Blue, T. T. Perry, Dow McBride, Cliff Herndon, R. K. Green, Jas. L. Harris, Clyde Pittman and Misses. Mary Lela, Woodward, Elsie and Ruby Harper.

Stewards Return From Vacation
Rockwood, Tex. Nov. 2. Our nomination of the luckiest people anywhere would be Mr. and Mrs. Bob Seward, just home from a trip to the West Coast. The trip was a gift from their daughter and her husband, Mr. and Mrs. T. J. Allen, Los Angeles, California.

Some weeks ago, Mr. and Mrs. Allen and Uncle Bob and Aunt Tina, as they are affectionately known, started out on a real pleasure trip. They were gone thirty days and traveled 5,634 miles. They stopped, sight-seeing along the way. They viewed the beautiful scenery and buildings at Pike's Peak, Salt Lake City, the deep snow at Berthoud Pass, Reno, Sacramento, visited Chinatown in San Francisco, viewed Alcatraz, and many others. They visited in Los Angeles and Hollywood, and attended breakfast in Tom Brennan's Restaurant. They saw Judy Canova in person, and came back home through New Mexico, Arizona, New Mexico, El Paso, and a side trip to Juarez. The happy couple are full to the brim of pleasant memories.

City Women Attend Flower Show In Brownwood
The following Santa Anna women attended the Flower Show, which was held in the U. S. O. Building in Brownwood on Friday, October 29th, between the hours of 2 and 8 p. m. by the Brownwood Garden Club:

Mmes. J. R. Gipson, Maggie Culver, Earl Watkins, R. L. Todd, Sam Collier, J. R. Banister, A. R. Brown, O. L. Cheaney, Ray Morgan, Neal Oakes, Norman Hosch, Lee Hunter, L. E. Abernathy, Jack Woodward, Ford Barnes and C. L. Eeds.

They report a marvelous showing of lovely flowers.

Mrs. J. W. Price, Mrs. Cora B. George, Jimmy Patterson, and Doyle Meador of Coleman were dinner guests Sunday evening of Mr. and Mrs. Collin Price and Mr. and Mrs. Alford England.

Mrs. M. Dillinger Moves To San Angelo
On Monday afternoon, Lester Guthrie and Bob Stephenson took the latter's sister, Mrs. Mattie Dillinger, to San Angelo, where she will be living on the same block with her daughter, Mrs. E. E. Behren and family.

Mrs. Dillinger has lived most of her life in Santa Anna, and has many friends here who will wish her happiness and improved health in her new home.

Mr. and Mrs. H. D. Speck have bought the Dillinger home, into which they will be moving soon.

Mrs. Hamiter Has Birthday Tuesday
Mrs. R. L. Hamiter observed her 84th birthday quietly at her home Tuesday, November 2.

The day was made pleasant by the receipt of cards and some gifts, including a birthday cake and candy, and she had visits from neighbors and friends.

Mrs. Hamiter is in better health than she was a while back, but she does not get about much.

Mrs. E. K. Jones left for Austin last Friday to attend the funeral of Mrs. Charles Reid, mother of her son-in-law, Mr. Nye Reid. Mrs. Jones remained for a visit of several days with the Reids and her daughter, Allene.

Mr. and Mrs. Freddie Henderson, and Cley Henderson, who have been living in Abilene, have moved to Warren, Arizona, where the boys will work in the mines. They visited their parents here before they moved.

Mr. and Mrs. Billy Campbell and Mr. and Mrs. Wendell Campbell, all of Slaton, spent the past week-end visiting with home folks.

REMEMBER?
REMEMBER when a bare bulb like this was the last word in lighting? That's when you started calling your electric bill a "light" bill.
Then electricity began to take on more chores. It learned to cook and sew and clean, to wash, and iron, preserve food, entertain the family—in general, to make life healthier and happier and easier all around. Lighting became only a fraction of that job.
Naturally, you came to depend on electric service for more and more jobs—until now you couldn't imagine living without electric service! Today your electric service bill is just about the biggest bargain in the family budget—yet what else does so much, for so little?
Yes, it's a service bill today—it does your chores, cleans your home, cooks your meals, and gives you more time for "living."
West Texas Utilities Company

SCRIPTURE: The Book of Job. DEVOTIONAL READING: Job 23:9-10.

Drama in the Bible

Lesson for November 7, 1918

THOMAS CARLYLE, a crusty dyspeptic but a literary artist of no small skill, was visiting a Christian friend. In the morning at family prayers (so the story goes) his host put into his hands a copy of the Bible and asked him to read a chapter. Carlyle opened at the first chapter of Job; read it—read on to the next and the next—and refused to stop reading till he had finished all 42 chapters.

Job is like that. It is a book you hate to put down. In all the Bible it is the outstanding example of the drama; a drama of conflict in which the opposing forces are not people as much as ideas.

The Characters

THE characters at first are three: God, Satan and a man named Job. Job is a good man, in fact God calls him perfect. He is also prosperous, and thereby hangs the tale. For one fateful day God and Satan have a conversation about this man. The Lord inquires if Satan has seen him, and how good he is. Oh yes, Satan says airily, he has seen him, but he does not think highly of his "goodness." He is too well paid for it. He has a large and happy family, and has immense wealth; why shouldn't he be good? Take away his prosperity and he will curse you to your face, Satan sneers.

So God lets Satan work his malice on the man. In a terrible series of disasters, one rushing on another's heels, everything Job has owned vanishes. His children are killed by storm and fire, and Job is left a childless, penniless man. But Job will not complain; his faith in God still does not waver.

So when next Satan reports to God, the Almighty asks again: Did you see my servant Job? He holds fast to his integrity. Ah, yes, sneers the unbelieving fiend. Yes, but he still has his health. He can have another family, another fortune. Make life itself so miserable that he will long to die, and then you will see his goodness vanish, then he surely will curse you to your face.

So God let Satan do his worst—do all you can to him, God says, only leave him alive. And then Job is made horribly and painfully ill, he cannot sleep for the torture of boils covering him from head to foot. Three of his friends come to visit him. For seven days they sit in silence, and then begins a great debate—with Job on one side and his friends on the other: Why must such things be? Why must good people suffer?

Was Job Real?

DON'T ask: Was Job a real character, or a made-up one like Hamlet and Macbeth? It is very likely there was once upon a time some man by that name who suffered in that way, and that he had friends, not too sympathetic, who talked it over with him.

As Hamlet and Macbeth were historical characters, whom Shakespeare used with high art to express profound ideas, so the author of Job may well have used the trials of some man he knew, or knew of, to express truths about a problem as profound and widespread as the human race.

For Job most surely is real; his local name may be Smith or Jones, and he may be living just around the corner from you. Indeed, sooner or later every man's name is Job. Sooner or later, every thoughtful person has to face the tragedy of human suffering: Why must such things be?

Suffering Is Test

THERE is, however, one solution which comes out in the course of the drama. It is not a theoretical solution; that is, it does not altogether answer the question, WHY must men suffer? It does tell us WHAT we can do about it.

Suffering is a test: A test of man's faith and real goodness. "When he hath tried me, I shall come forth as gold," Job says. (23:10.) The test of a ship is

Rockwood News

By Mrs. John C. Hunter

The women of the W. S. C. S. met at the Methodist Church Monday afternoon, beginning the new study, "The Bible and Human Rights." The study is directed by Mrs. M. A. Richardson and Mrs. Jack Bostick, local and district secretaries of Christian Social Relations.

Mr. and Mrs. Carl Buttry, Mr. and Mrs. W. D. Rehm and family and Leroy McMillan helped Mr. and Mrs. Bob Holman move to San Angelo this week-end. Bob has a position as bookkeeper with the G. E. Construction

not the quiet waters of the harbor but the roaring open sea; the test of a man is not comfort but stress and pain.

To have faith in God only when we are well-fed and softly cushioned is not faith at its best. Faith and goodness prove their reality only when they hold together even when torn by the nails of a cross.

(Copyright by the International Council of Religious Education on behalf of 40 Protestant denominations. Released by WNU Features.)

Co. Mr. and Mrs. Lee McMillan and Mr. and Mrs. Leon McMillan visited relatives in Melvin Sunday.

From where I sit... by Joe Marsh "Husbands, Wives, and Marriage" Maybe you read that survey published recently in a national magazine, entitled "Husbands, Wives, and Marriage." It showed that among happily married couples, those who criticized themselves outnumbered those who criticized the other person. Among unhappily married couples, it was just the opposite—each one tended to criticize the other. That's the way it is in our town, as I guess it is in yours. Criticism, whether it's of a wife's taste for hats, or a husband's taste for pipe

Eureka News

By Mrs. Joe C. Brooke

Mr. and Mrs. Rick Ashenbeck entertained with a 42 party Saturday night. Everyone had a nice time. Cake, cookies, coffee and cocoa were served at refreshment time.

Mrs. Amelia Elkins and daughter, Patsy, spent Saturday in the home of Mrs. Gorman Brinson and family.

Mrs. Odell Henderson of Waits Creek visited Mrs. Joe C. Brooke Saturday.

Mrs. Dave Banks sent an offering to our church, which we were very happy to receive. We want to thank her very much. Mrs. Banks lived in our community for years, but resides at Leaday now.

The Tacky Party and Hallo-

ween Carnival, which was held at the Buffalo gym Thursday night was well attended. Refreshments of cake, pie, orange-ade, and coffee was enjoyed by all, after a series of games. The H. D. Club had charge of the program.

Mr. and Mrs. Thelbert Elkins spent Saturday night and Sunday in the home of Mr. and Mrs. Herman Elkins and Mr. and Mrs. Virgil Curry.

Miss Bonnie B. Terry spent last Thursday night with a girl friend at Bangs and attended the Halloween Carnival there.

Mr. and Mrs. Joe C. Brooke and family visited Mr. and Mrs. O. H. Terry Sunday.

Frances Ann Casey spent Thursday night with Patsy Dempsey.

Our community was well represented at the Bangs football game Thursday night. The Bangs team won again. Just keep it up

Dragons. The game was with Strawn.

Mr. and Mrs. Virgil Curry visited in Coleman Sunday with his parents, Mr. and Mrs. I. G. Curry.

The Buffalo Base Ball Teams were very unhappy Friday afternoon as the Cross Roads team beat both the boys and girls in basketball. However, the Buffalo teams won in Volley-ball. Better luck next time.

Mrs. Juanita Embre of San Angelo visited the first part of the week in the home of her parents, Mr. and Mrs. H. O. Terry.

Mrs. Will Swan of Bangs visited her daughter, Mrs. Gorman Brinson and attended the Halloween Carnival Thursday night.

Mr. and Mrs. E. G. Terry spent Sunday with her parents, Mr. and Mrs. Cupps of Cleveland.

We welcome the visitors and new members of our Sunday School and invite them all back

again each Sunday.

Next Sunday is our regular preaching day. We invite everyone to come out and be with us. Brother Hal Martin of Trickham is our pastor.

A light shower fell here last night and a norther also came with it.

Mrs. E. G. Terry and Mrs. Rebecca Rice are visiting in Cross Plains and Brownwood today (Monday).

Bill Burcham of Kermit, operated about two weeks ago, is seriously ill in a hospital at Monahans. He used to be a barber here in Santa Anna. His wife is the former Marie Harris. Mrs. Milford Harris has been up there the past few weeks.

Celbert Willis of San Diego, California, was an overnight visitor in the home of Mr. and Mrs. Collin Price the first part of the week.

NOTABLE NEWS EVENTS IN PICTURES

← HOME WRECKED BY HURRICANE—(Left) Mr. and Mrs. M. B. Albrington of Fort Lauderdale, Fla., stand by the pitiful heap of possessions that remains of their concrete-block home. The recent hurricane with gales and pounding seas wrecked their new cottage on the Florida beach. Only the foundation of the house remained.

→ BABY LONG NECK ARRIVES—(Right) Baby Bedalla, whose arrival at the Washington, D. C., Zoo early in October, makes the giraffe herd there the world's largest. Baby Bedalla, a healthy, strapping 6-day-old, measuring five feet tall, gets a licking from her mother. The father and mother giraffe were brought from Suez 11 years ago.

TEN HORSEPOWER DIGGER IN ACTION—In these days of power-driven machinery, a ten-horse team is a rare sight even in Australia. This ten-horse team is at use in building an irrigation canal in the Murray Valley soldier settlement near Victoria, Australia, where between 500 and 600 miles of irrigation channels are being excavated. Horses are being used in moving the dirt in preference to motor-driven machines because the stamping of the horses' feet helps bind the soil on the banks of the irrigation canals and thus prevent water erosion. The horses are worked all abreast instead of being strung out in five pairs as is customary in this country.

TWO JUST ALIKE—This pair of unrelated twins cause people of Van Dyke, Mich., to go about muttering in confusion. They are Marie Kohler (left) and Charleen Rogocki (right), both six years old and as much alike as two peas in the proverbial pod. They are not related to each other in any way except in the duplication of their physical characteristics. Their closest friends have difficulty in distinguishing one from the other.

RED REVOLT OR ATOMIC WAR—Constantine Boldyreff, powerful Russian rebel leader, says revolt in Russia is the only alternative to atomic war. Boldyreff says the great mass of Russia's 167,000,000 people only need leadership to revolt.

VICTIM OF HIT-AND-RUN DRIVER—Struck and injured by a hit-and-run driver near Las Vegas, Nev., this mule-tailed fawn seems happy to have 18-months-old Ronnie Gay Bernkrant as his nurse. Ronnie, daughter of Dr. and Mrs. Louis Bernkrant, is proving a capable nurse. Dr. Bernkrant took X-rays of the fawn, fixed up a fractured pelvis and started the deer on the road to recovery. He is happy in his new home.

U. S. DIPLOMATS OFF TO EUROPE—Secretary of State George C. Marshall, (right), with Lt. Gen. Walter Bedell Smith, U. S. Ambassador to Russia (left), and Paul G. Hoffman (center), Economic Cooperation Administrator, board the President's plane Independence at Washington Airport for return to Paris.

SERGEANT HAS HIS OWN ARMY—Sergeant Joseph D. Ferguson and his wife are shown with their ten children in their home at Komiya, Japan, where the sergeant is stationed with the First Cavalry Division. The Fergusons, who hail from Kewa, Wash., recently had their latest visit from the stork. It is believed that the sergeant has more children than any other soldier of the United States occupation forces in Japan.

U. S. BOMB GUIDED BY HEAT—Sergeant William B. Holliman, Daniels, Md., makes final adjustment on Felix, new U. S. Air Force bomb designed to guide its own fall on a target that gives off heat, such as ships, factories, oil refineries or war plants. Air Force designation of the new bomb is VB-6. When dropped it seeks out its target, controlled by heat waves.

Faye Dunn Crowned Halloween Queen On Saturday Evening, October 30

Miss Faye Dunn, sophomore representative, was crowned "Queen of Halloween" on Saturday evening, October 30 at 9:30 p. m. at the High School Auditorium. Miss Dunn, wearing a pink, orange, black and white carnations, was escorted by King Bill Miller, who crowned her with a silver headpiece. After she was seated in the throne, Mrs. Smith, who rendered a vocal solo, after the lights had been lowered, presented the mood of festivity.

Mrs. Pauline Little announced to the court of honor as they entered the auditorium. T. K. Muehry assisted in many of the ceremonies duties.

Members up for the Queen title were Anne Priddy, senior, Julia Badley, junior, and Sandra Shields, freshman.

Judges and Dukes were Sam Moore and Barbara Eubank, Max Eubank and Paula Holt, Howard Hunter and Benita Robinson, Dewey Dunn and Keith Steward, James Milligan and Kelley Wise, James Steward and Neva Rehm, Donna Bell and Mary Teague, and Calvin Perry and Winifred McQueen. The crown bearer was Delbert McGee, and flower girl was Alice Lovelady. Pages were Gary Hosch and Arline Welch.

A program was presented before the coronation of the Queen. Faye Williams conducted an auction sale, with items donated by the city merchants. The school orchestra, under the direction of T. K. Martin, presented two musical numbers, "Missouri

Waltz" and a specially numbered by Max Eubank on the trumpet.

The Girls Octette, composed of Martha Priddy, Sue Gillham, Sandra Shields, Paula Holt, June Parker, Barbara Bruce, Geraldine Lovell and Frances McQueen, rendered several numbers.

Angabelle Price presented a tap routine, "Cow-Cow Boogie," accompanied on the piano by Vernell Newman.

Fred Donham gave a Halloween reading as a climax.

The Junior Class, who received all the profits of the show and carnival booths to go into their class funds, netted approximately \$350.00, according to Pauline Little, chairman of the Carnival proceedings.

W. M. U. Presents Japanese Tea Garden

The W. M. U. of the First Baptist Church presented a most original and interesting program, when they met on November 1, 1948, at the Church Annex. The program presented was centered on Hawaii, Japan and China.

The auditorium of the Annex, where the following program was rendered, was decorated like a tropical flower garden, gorgeous flowers, of all varieties and colors, and greenery and palms filled the room and wafted their atmosphere into the program.

After a selected program of music was presented, Mrs. Dennis Kelley opened with a prayer, followed by a group song. Mrs. T. M. Gillham was leader of the map study, and was followed by Mrs. B. A. Parker with the devotional. Mrs. A. D. Donham, Jr. toured Hawaii with words that made pictures to the listeners. Mrs. Jodie Matthews discussed China, with Mrs. B. Smith following with a prayer. Mrs. Hosch and Mrs. Ford Barnes visited Japan, and entertained the group with word symbols.

Rev. Gillham gave the conclusion, followed by a vocal by Mrs. Irvin Taber.

Following the program, the thirty guests present were invited to visit a Japanese tea garden. As the guests filed into the room adjoining the auditorium, another lovely tropical sight greeted them. The room was lovely with flowers, individual refreshment tables, holding Japanese tea sets and incense holders. Screens, tapestry and gaily colored mats on the floor furthered the Japanese decor.

Mrs. Gillham, assisted by co-hostesses Mmes. Ford Barnes, Foscoe Hosch, and Irvin Taber, served tea and Hawaiian cookies to guests.

W. C. Rushing arrived home from Nogales, Arizona, where he has been working for several months.

Two Honored At Layette Shower

Mrs. Aubrey Brewer of Santa Anna and Mrs. Johnny Marrs of Coleman were honored Wednesday evening, when Mmes. Max Horne, Merle Griffith and Alford England entertained with a Layette Shower at the home of Mrs. Alvie Brewer, in Coleman.

Cut flowers of decorative fall hues were used throughout the entertaining rooms. Liverpool funny was used as entertainment, with the prizes going to the honorees.

Refreshment plates of cokes, cream and cheese crackers and potato chips were served to Mrs. Mex Bradley, Mrs. F. W. Gillespie, Mrs. James Smith, Miss Jo Ann Hambright, the honorees and the hostesses.

Rockwood W. M. S. Meets In Social

The women of the Rockwood W. M. S. met at the Baptist Church Monday afternoon at 2:00 p. m. The meeting was opened with a song, led by Mrs. Pass Estes, and a prayer by Mrs. Inez Steward.

Mrs. J. T. Adian, president, presided during the business session, when plans were made to begin a new study, "What of the Jews?" Week of Prayer will be observed November 29. An offering of \$25.00 cash and canned goods and clothing was received for Buckner's Orphan Home.

After a social hour, in which the members drew names and exchanged gifts, the hostesses, Mmes. Ray Steward and Ora Caldwell, served refreshments of brown and white cookies and hot chocolate. The church was decorated with marigolds and gladioli.

Hostesses for the Christmas social will be Mmes. J. T. Adian, Maud Lovelady and Lee McMillan.

Present were Mmes. J. C. King, Ella Fondren, Boss Estes, Claude Eox, Lois Bryan, Ethel McCreary, Lee McMillan, Delma Buttry, Inez Steward, Ora Caldwell, J. W. Box, Gerlie Wise, Matt Estes, Lillian Rehm, Claude Rutherford, J. T. Adian, and Vera Fay Wise.

Mrs. Steward Hostess To Rockwood Group

A demonstration in making articles of leather was held Friday in the home of Mrs. Johnnie Steward in Rockwood. Present, as instructor, was Mrs. C. E. Davis of San Angelo.

A covered dish luncheon was served to Mmes. Charles Benge, James Eubank, Dick Deal, Nick Buse, Lee Abernathy, Fitzpatrick, all of Whon, Cecil Davis, Lois Bryan, Bill Steward, Denver Ellis, Hilton Wise, Bob Johnson, Sherman Heilman, Blake Williams, Misses Minnie Jean By-

ran and Colleen Wise, Mrs. C. E. Davis of San Angelo, and the hostess.

The group went to Trickham on Tuesday to attend a school of leather craft there.

Mukewater P.T.A. Has Halloween Social

The Mukewater P.T.A. sponsored a Halloween Social, Friday night, October 29th. Prizes for the best costumes went to Peggy Fleming, first; Charlie Ray Fleming, second; Charlene Herring, third; and Jesse Haynes won the surprise package.

Stew was served to a large crowd, and games and fun was there for all.

The November P.T.A. program is incomplete at this time. —Reporter

Arrowhead Troop Tell Of Activities

The Arrowhead Troop of the Santa Anna Girl Scouts had a masquerade Halloween party at their regular weekly meeting last Thursday, October 23, in the home of their leader, Mrs. A. D. Donham, Jr., with their assistant leader, Mrs. E. D. Shields, as co-hostess.

The party rooms were decorated in the traditional black and orange colors, with spoons, black cats and pumpkins.

Games were played and refreshments of sandwiches, cookies, candy, apples, and punch were served to Rose Zella Rushing, Bobra Garrett, Shirley Hale, Betty Scott, Evelyn Oakes, Mary Jane Turner, Delma Drake, Lois Ann Shields, Janice and Larry Donham, and the hostesses. Mary Frances Irick was a guest of the troop.

Attends Church In Body

Members of the Arrowhead Troop and their leaders Mrs. A. D. Donham, Jr., Mrs. Shields and Mrs. D. W. McBride and a part of the Orchid Troop attended services in a body at the First Baptist Church on Sunday, October 31, in observance of the birthday of the founder of Girl Scouts, Juliette Low and the beginning of National Girl Scout week.

Many other activities have been planned for the Girl Scouts through this week, October 31 through November 6.

Shield H. D. C. Meets At Lunch Room

The Shield Home Demonstration Club was organized on Wednesday, October 20, at the

Shield Lunch Room. A business meeting was held Wednesday, October 27. The following officers were elected: President, Mrs. Edgar Shelton; vice-president, Mrs. Douglas Milligan; secretary-treasurer, Mrs. Jack Dillingham; council delegate, Mrs. Claud Bevell; parliamentarian, Mrs. Tom Steward; T.H.D.A. reporter, Mrs. Aubrey Scarborough; and reporter, Mrs. Roy Williams.

The next meeting will be the third Thursday in November at the Lunch Room. All those who would like to become members are urged to attend.

H. L. Loge of Lubbock visited Tuesday with his sister, Miss Mollie Lowe.

BERLIN BLOCKADE Menaces

As Russia Uses Veto Again

(Condensed from New York Times, Copyright 1946)

VETO by Soviet Russia has blocked efforts by the Security Council of the United Nations to solve the Berlin problem by having Russia lift the food blockade of that city in effect for the last five months.

This was the twenty-seventh time that Soviet Russia has exercised the right of veto to block action by the Security Council. The vote came at a night session of the Council on October 25 on the proposal submitted by six small-power neutral nations for solution of the Berlin controversy.

When the issue was submitted for vote, nine nations voted in favor of the proposal, but Soviet Delegate Andrei Y. Vishinsky raised his hand in opposition, thus exercising Russia's right of veto. Vishinsky was joined by Delegate Dimitri Manuilsky from the Russian satellite State of Ukraine.

Nations favoring the neutral power proposal were: United States, Great Britain, France, Canada, Argentina, Belgium, China, Colombia, and Syria.

U. S. Leaves Door Open

But the United States left the door open for a possible solution of the controversy through negotiations outside the United Nations. Knowing that Vishinsky would exercise the right of veto on the ground that the United Nations has no right to take up any German question so long as Germany remains under occupation by the four Great Powers, American Delegate Phillip C. Jessup, even before Vishinsky had vetoed the proposal, declared this to the Security Council:

"The three Western Governments have indicated their acceptance of the principles contained in the resolution. If the Government of the Soviet Union would give reciprocal assurance that the program suggested in that resolution would be carried out, it can be done."

This was understood to mean that the United States and the other two Western Powers—Great Britain and France—are willing to inaugurate talks with Soviet Russia outside of the United Nations, if Russia will indicate that the suggestions made by the six neutral nations will be carried out. These proposals call for the immediate lifting

of the blockade of Berlin by Russia and the settlement of other issues, including that of German currency, through negotiations which would begin as soon as the blockade is raised. If Russia is sincere in its claim that the United Nations has no authority to take up the Berlin controversy, action of the United States leaves the door open for

uphold that charge and condemn Soviet Russia before the world as a threat to peace. Such action could be taken in the General Assembly where Russia would have no veto.

While the United Nations debated the Berlin situation in Paris, Soviet Russia has been active on the two fronts on which it has conducted the

—Warner in The Indianapolis Tribune

"On one wing and a prayer."

—Fitzpatrick in The St. Louis Post-Dispatch

"Glacier at the door."

early solution of the Berlin controversy.

Still Before United Nations

Although the neutral nations have been blocked in their effort to bring about a solution, the controversy between West and East remains before the United Nations. Vishinsky's veto did not remove the entire Berlin issue from the agenda of the Paris meeting.

Charge brought by the United States, Great Britain and France against Soviet Russia—that Russia has become a threat to world peace—remains before the General Assembly of the United Nations. The General Assembly can

act with the Western Powers: The campaign of words through which Soviet propaganda has been broadcast has continued with increasing tempo, and the campaign of action through which direct results have been sought has been unrelenting.

Propaganda and Action

In the campaign of words, Russia has been using the United Nations as a sounding board from which Soviet propaganda has echoed to all parts of the world. At times Russia has threatened; at other times she has been conciliatory. She has hinted at compromise, even that the blockade of Ber-

lin might be lifted. But when the final test came in the Security Council, Russia again exercised the right of veto to prevent a settlement of the Berlin blockade.

In the campaign of action, Russia has kept up the drive to achieve the main goal of her present European policy, that is, the defeat of the Marshall Plan for Western Europe. Russian pressure has been intensified in two countries vital to the success of the Marshall Plan—Germany and France.

In Germany Russia has taken steps in the last few weeks to indicate that, no matter what action the United Nations might take, the Kremlin is determined to swing all Germany into the Russian orbit. This design was seen in Russian preparations to set up a Communist-led All German Government in the Soviet Zone—probably an important step toward demanding the withdrawal of all foreign troops from Germany.

Communist Strike in France

In France Communists pressed home the campaign to cripple French production through the coal miners' strike, now more than four weeks old. Communist forces in France have made the coal strike a weapon against the Marshall Plan. With coal production halt-

ed and 400,000 coal miners idle, the French Government may be unable to curb inflation and to stabilize currency—a program that is a commitment of that Government under the Marshall Plan.

There has been much speculation among representatives of the Western Powers over the ultimate, and probably sinister, aims back of various Russian moves.

In Eastern Germany the Russians have stepped up organization of a heavily armed "People's Police," eventually to number 400,000 men. There was a shake-up in the Soviet-backed Socialist Unity Party—a coalition of Communists and Social Democrats—which resulted in tighter control by the Communists. Last week there was put before the People's Council, a sort of super-party organization purporting to represent "all Germans," a proposed constitution for a united Germany. Core of the proposed Government would be a "People's Chamber." Anti-Communists, which the Russians call "Fascists and Militarists," would be barred from all political activity and from participation in the proposed Government for United Germany. Apparently Russia is taking steps to insure Communist control for Eastern Germany, even without the backing of the Soviet occupation forces.

Look for Dramatic Move

Western circles have advanced the theory that Russia is preparing for a (Continued on Page 6, column 5)

\$40,000,000 Annual Rice Crop in Texas

By JOHN E. KING

RICE for many years has been one of the most stable grain-growing industries in Texas. There has been steady expansion of production as more acreage was made available for rice-growing.

Texas and Louisiana have been in a close race for leadership among the rice-growing States for a number of years. Some years Texas has outranked Louisiana, while in other years Louisiana has produced more rice than Texas.

Texas now holds first place, having produced more of this valuable food grain for the last two years than Louisiana, its neighbor on the Gulf Coast. The Texas crop in 1946 amounted to 17,716,000 bushels, harvested from

grain binder. The grain was cut and tied into bundles much as wheat was harvested. It was allowed to dry in the field and then hauled to a thresher and threshed as other small grains.

Development of modern drying methods has made possible the use of grain combines for rice harvesting. Rice growers now use combines in the field and cut and thresh the grain in a single operation. The threshed grain is then dried mechanically.

Heat from gas flame is the method most commonly used for drying rice grains. It is necessary to drive all moisture from the threshed grain to prevent spoilage by mold or mildew.

Recent scientific study has made possible the use of the infra-red rays from

Texas PRISON RODEO

Wildest Show on Earth

By FRED GIPSON

(Condensed from New York Times Magazine, Copyright 1946)

IF THERE'S a show on earth wilder than the rodeo pulled off every fall by inmates of the Texas prison system at Huntsville, Texas, you'll be wise to prepare for complete disintegration of your nervous system before you go to see it.

That rodeo is the maddest, roughest, zaniest scramble of wild animals and wilder men ever captured and turned into an arena. It's outlaw versus outlaw, no holds barred. (But if you think for a moment the exits aren't barred, merely look behind you—right down

Texas prison farms to see the show. They occupied a separate screened-off balcony, under the guns of more prison guards; and a study of their faces was something else to think about. Without their prison garb, one would have difficulty distinguishing them from a similar congregation of civilians.

Like all rodeos from Sulphur Gap to Madison Square Garden, this one started off with the monotonous rigamarole of introducing rodeo officials. But the moment the huge arena was cleared of these Important People, the monotony definitely ceased. There was a sudden crashing of chute-gates flung open, and

rampaging bulls were outdoing Gypsy Rose Lee for strip-off effect. They were shedding convicts all over the place, tossing them high, piling them up in all sorts of shapes and positions, then whirling to gore and trample them.

Convicts are a hardy breed, however. They came rolling to their feet, dodging quickly into the clear, then hot-footing it for the safety of the chutes. Only one man was carried out on a stretcher, and he was sitting up before the bearers got him out of sight.

There was a brief pause wherein I got a breath or two, then here it came again—bronco-busting this time, with convicts screwed down deep in their saddles, whooping and yelling, cutting hair with every rake of their spurs. Some were making a ride of it. Others were getting off the hard way.

Out came an old convict mounted on a big grunting bronc that was rolling his belly up to the sun and trying to hang his chin on the moon, all at the same time.

Music and Entertainment

A break came in the rough stuff. The prison's Rhythmic Stringsters came out into the arena under guard. One with a long stretch ahead of him sang "Moonlight and Shadows" in a way that made me shiver, but he got loud and enthusiastic applause from the Cowgirls Goree band—also under guard.

The Dallas County Quadrille, a group of hired entertainers, rode into the arena and put their mounts through the paces to the fiddling tune of "Git Along Home, Cindy" and with a caller directing the turns and shouting in a sing-song voice:

"Now you're right and now you're wrong!
Swing that pretty gal all night long."

And while fiddles wept and galloping hoofs pounded, mounts and riders wove a gay-colored pattern in the swirling dust.

Rodeo Self-Supporting

C. C. Springfield, who handles publicity for the Texas prison system, came over to explain that the Texas prison rodeo is the only prison rodeo in the world. It is self-supporting; it costs the taxpayers not one cent. In fact, it has become a big money-making proposition.

All proceeds of the prison rodeo go into the prison educational, recreational and rehabilitation funds. Out of this (Continued on Page 7, column 4)

TEN WILD BRAHMA BULLS—Ten prisoners from Texas Prison System at Huntsville ride ten Wild Brahma bulls in opening number of Texas Prison Rodeo. Some prisoners make very short rides—others stay on a little longer.

the black bore of a shotgun in the hands of a cold-eyed prison guard.)

The rodeos are held each Sunday during October in the prison arena just east of the "Big Walls." One of these shows is about all any normal spectator can stand. It does one's heart no good to sit and chew on the tip-end of it for two solid hours.

25,000 Spectators

In the stands sat perhaps 25,000 spectators. Several thousand of them were convicts brought in from the various

out into the arena lunged a stampede of wild Brahma bulls, pitching and bawling and kicking, doing their savage best to dislodge the striped-suit riders mounted behind their humps.

Ten Bulls at a Time

"You'll notice we turn out ten bulls at once in our opening scramble," the FBI man next to me said with ill-concealed pride. "Madison Square Garden can turn out only five."

This brag was lost on me. My attention was still on the arena where those

COMBINES HARVEST TEXAS RICE—Three combines harvesting rice on the 600-acre rice farm owned by A. Holmer Seaholm near Eagle Lake, Texas. The combines are owned by Carl Seaholm of Eagle Lake, Victor Richter of Lissie and William Waddle of Eagle Lake. A fourth combine owned by A. Holmer Seaholm was working in the field but is not shown. The four combines were working day and night to keep the supply of freshly threshed rice for the mechanized drying plant sufficient to keep the plant in operation.

412,000 acres. The crop was valued at \$38,798,000. In 1947 both acreage and total yield in Texas were larger and the value of the crop was in excess of \$40,000,000. The 1948 crop bids fair to be larger than the total yield in 1947.

On Gulf Coast Prairie

Production of rice in Texas is concentrated on the Gulf-Coastal Prairie in Brazoria, Chambers, Colorado, Jefferson, Matagorda and Wharton counties, although the grain is grown in other counties where water can be made available for flooding the fields.

Texas rice is grown under irrigation. Fields must be flooded after being seeded and the growing grain kept well watered throughout the growing season. Large quantities of water are required.

Water for irrigating Texas rice farms comes principally from channels of the Colorado, Brazos, San Jacinto, Trinity and Neches Rivers. Where artesian wells can be drilled with adequate outflow, the rice fields are watered from these wells.

Rice growers say their fields require from 24 to 30 inches of water during the growing season. Rice is planted in the spring and harvested in late summer or early fall. Fields are kept covered with water from shortly after seeding to the time the heads are well filled with grain. Irrigation canals are then closed and the fields are allowed to dry out during the time the grain is ripening so it may be harvested.

Harvest With Combines

Formerly all harvesting of rice was done with the old-fashioned reaper or

electric lights for rice drying. Electric power companies have conducted extensive experiments in developing this process. Great rice-drying plants have been built in which the grain is moved on conveyors through drying chambers to remove all moisture. Formerly all these drying plants used natural gas as the heat producing element in drying chambers. But in recent years, millions of dollars have been invested in electric rice-drying plants in which huge batteries of infra-red lamps have been installed so they direct the penetrating heat rays on to moving conveyors on which rice grains to be dried are spread several inches deep.

Infra-Red Rays Dry Rice

Scientific study has shown that the infra-red rays penetrate each grain of rice and drive out the moisture from the interior of the grain far more effectively than heat from a gas flame or other heat-producing fuel. The infra-red rays have been shown to be the most effective drying agent yet developed.

The use of the combine for harvesting and the improved drying methods have tended to reduce the cost of rice production. This has meant greater profit to the rice grower, which, in large measure, accounts for the increased production. Texas has taken the lead in developing these improved methods of harvesting and drying and these in turn have been largely responsible for making Texas the leading rice producing State of the Union.

In addition to Texas and Louisiana, (Continued on Page 6, column 1)

TEXAS BRIEF NEWS -- from Over the State

MILLIONTH MONEY ORDER

The postoffice at Corsicana has been in existence 84 years and during that time has issued one million money orders.

Postmaster G. C. Hudson wrote the millionth money order on Sept. 18. It was for \$1 and the postmaster sent it to himself. He explained that the money order would never be cashed—that he would keep it as a souvenir.

DOUBLE TROUBLE

Mrs. Dorothy Maddox, admitting clerk at a Fort Worth hospital, found the case of Mrs. Green, hospital patient, plenty confusing.

On the same day she admitted two Mrs. Greens, and they entered within 10 minutes of each other. Both had the same doctor. Both had entered for the same type of major surgery. Both their husbands were employed by the same drug firm.

PREDICTS PLENTY OF BEEF

There will be plenty of beef for the United States by next spring. Bryant Edwards, president of the Texas and Southwestern Cattle Raisers Association, predicted. Edwards told a meeting of the directors of the association at Dallas that excellent grain crops and other feed crops in Texas, coupled with better than average range conditions, assure a plentiful supply of feed for cattle during the winter. Edwards made no predictions as to prices for beef.

TEXAN TRAINS BUTTERFLIES

Dallas has a full-fledged trainer of butterflies.

He is Carl A. Anderson, an income tax auditor. Anderson finds his monarch butterflies in egg-stage on milkweed. He gathers the eggs and raises the butterflies through the caterpillar and chrysalis stages until they become full-grown butterflies by keeping them in glass containers.

When the butterflies spread their wings he feeds them a little sugar and water until they learn to come to him for food. The full-grown butterflies in all colors flutter about the room and follow him until they are given food. But they are strictly one-man butterflies, for they shy away from other human beings.

TEXAS IMPORTS MUSKRATS

Texas finally has imported muskrats from Louisiana, and they were delivered free. One load of 27 muskrats was taken from an area north of Abbeville, La., where Louisiana was cleaning some irrigation ditches. They were placed in marshes in East Texas by the Texas State Game Commission.

The deal with Louisiana proved to be an anti-climax to a proposed swap with Oklahoma in which the Sooner State was to exchange 250 muskrats for 500 raccoons. Texas had caught and shipped 200 coons to Oklahoma when the deal was called off, because Oklahoma had been unable to deliver any muskrats.

W. C. Glazener is director of the experimental work involving the introduction of muskrats into the East Texas marshlands.

\$6,000,000 PECAN INDUSTRY

San Antonio now does a pecan business that amounts to \$6,000,000 a year. A group of eighteen business men say the volume can be doubled and have set to work on plans to make this a \$12,000,000 industry for the Alamo City.

The pecan industry has become "big business" since 1940 when the annual output of these nuts exceeded 100,000,000 pounds. Texas produces 40,000,000 pounds of the Nation's pecan crop each year, and 20 per cent of the country's pecan output is processed in San Antonio.

Formerly all nuts were cracked by hand. From 5,000 to 6,000 workers were employed in cracking nuts and extracting the meat. Now all this work is done by machinery. With 10 machines the work formerly done by 6,000 persons is done more quickly and efficiently. A team of two men and eight women can extract 500 pounds of pecan meats an hour.

MAKEUP KIT CAUSES FIRE

A woman's makeup kit can be a dangerous thing, especially if it contains a mirror.

Mrs. D. Swilling drove from Agua Dulce to Alice. After she had parked at the curb, she took a mirror from her handbag to inspect her makeup. When she left the car, she left the mirror on the seat.

Later, Sheriff H. T. Sahn saw the car in flames. He grabbed a fire extinguisher and saved the automobile but only after considerable damage had been done to the interior.

The mirror, serving as a reflector glass, had focused the sun's rays onto a spot that set fire to the upholstery.

CHEMICAL INDUSTRY GAINS

The petroleum-chemical industry in Texas is mushrooming along the Gulf coast. Oil companies, recognizing the postwar necessity of efficient conservation of petroleum and its by-products, are joining the chemical industry in investing hundreds of millions of dollars in synthetic chemical plants.

Abundance of cheap fuel—natural gas—and the State's huge oil resources are the primary factors attracting holders of synthetic processes to Texas. Since 1940 more than 80 large chemical manufacturing plants have been built, or are now under construction, along the Texas coast. These plants represent an estimated construction cost of approximately \$750,000,000.

MAN LIVES TO BE 101

Benjamin Franklin Blackman, 101 years old, died at his home in Trinity recently. He was born in Texas during the days of the Republic and had lived in the State all his life.

He is survived by two sons, three daughters, 25 grandchildren, 14 great-grandchildren and one great-great-grandchild.

NEW BOOK ABOUT TEXAS

The second book by Judge A. W. Neville of Paris, "The Red River Valley—Then and Now," has just come from the printers. Judge Neville's first book was a history of Lamar county, where he has made his home for most of his 84 years.

The new volume by the Paris author has been designed and printed under supervision of Carl Hertzog, book designer and type expert of El Paso. The book contains 27 pen and ink sketches drawn by Jose Cisneros, Mexican artist, especially for the volume.

CHILD HAS 10 GRANDPARENTS

Claude William Jernigan, Jr., infant son of Mr. and Mrs. Claude Jernigan of Tyler, can probably claim more grand parents than any other child in East Texas. He has ten grand parents going back four generations on both sides of his family.

On the paternal side, his grand parents are Mr. and Mrs. Walter Jernigan of Tyler; his great grandmother, Mrs. Grace Jernigan of Tyler, and his maternal great grand parents, Mr. and Mrs. Claude Florence of Tyler.

On the maternal side he has his grand parents, Mr. and Mrs. John Elliott of Arp; paternal great grand parents, Mr. and Mrs. J. W. Elliott of Arp, and his maternal great grand mother, Mrs. Alice Barron of Arp.

PLANT BLUEBONNET SEED NOW

Now is the time to plant bluebonnet seeds in Texas for blossoms next Spring. The best time for planting the seed of the famed Texas flower is in the early fall about the time the seeds ripen. This seeding time was fixed by nature as part of the plan for self-propagation of this beautiful flower.

The bluebonnet has a tough little seed and best results can be obtained by soaking the seed for about 24 hours before planting. After soaking rake the seed into the soil at once before the seeds dry. The plants thrive in cold weather. Only the worst freeze will damage them.

The bluebonnet does best in light sandy soil that is rich in lime. Bluebonnets should be planted in a sunny place that is well drained. They don't like to be shaded, and they do best without cultivation. Do not fertilize the soil as fertilizer often kills the plants. Small plants can be transplanted, but it is best to plant the seed where the plants are to grow to maturity.

INVENT JET-PROPELLED BICYCLE—These three youthful inventors, who live in Falls Church, Va., have designed a jet-propelled bicycle, capable of speeds up to 15 miles an hour with its single jet. The boys are at work on a three-jet unit which they hope will give them a speed of 50 miles an hour. Left to right they are: John Hunton, 16; Bobby Dent, 15; and Mac Walther, 15.

RANCHER'S WILL AIDS CHILDREN

Children of Texas were listed among the beneficiaries in the will of Frank Hays McFarland, ranch owner, who died at Fort Worth recently.

The will provides that at the death of Mrs. McFarland, a trust fund is to be set up from income of large ranch holdings of the McFarlands. Income from the trust fund is to be used for a day nursery for under-privileged children. It also is to be used to provide low-interest loans to young men and women for education and vocational training.

BUBBLE GUM FOR FISH BAIT

There is a new use for bubble gum on the South Plains of Texas.

Mrs. J. C. Hollingsworth of Idalou and a party of friends went fishing at Fort Phantom Hill Lake near Abilene. The fish were not biting and Mrs. Hollingsworth finally placed the wad of bubble gum she had been chewing on her three-way hook and threw the line back into the water.

Almost immediately she got a strike and after considerable difficulty hauled in a 12-pound buffalo.

Mr. Hollingsworth, the woman's husband, sells bubble gum at Idalou.

TEXAS OYSTER FARMS PLANTED

Four oyster experimental farms have been planted in the shallow water of the bay off Rockport under supervision of J. L. Baughman of the Marine Laboratory at Rockport. Three of the farms are located near Cotton Bayou, Phillip's Bayou and Flag Bayou, and the fourth is in Tres-Palacios Bay near Collegeport.

On each of the farms approximately 125 barrels of oysters were planted for the purpose of checking the mortality rate, growth, weight and quality of the oyster meat. Once every 30 days one of the marine biologists from the State-owned Marine Laboratory will make an inspection tour and his findings will be recorded for future reference in biological experiments in Texas waters.

GOAT KNEW WHERE TO GO

The Rotary Club of Denison acquired a goat with the idea that it would be billeted with any member having a poor attendance record. Such member could pass the goat to another member only by regular attendance.

But the goat escaped and strayed away. Oddly enough, he showed up at the bottling plant of Norman Foebel, a member of the club, and arrived there on the day that Foebel was to have been given the goat because of his poor attendance record.

TO NAME SHIP FOR TEXAN

When the cargo vessel of the U. S. Transportation Corps now called the Acorn Knot steams into San Francisco, the ship is to be rechristened the USAT Sergeant George D. Keathley. This honor will come belatedly to a Texas hero.

Sergeant George D. Keathley was a native of Olney. He has been awarded posthumously the Congressional Medal of Honor for his daring exploits as a member of the 58th Infantry Division on the Italian Front. He was killed at Mount Altruzze on September 14, 1944, after forcing back three enemy counter attacks in which all commissioned and non-commissioned officers of the second and third platoons of the company had become casualties.

HOUSTON RESIDENT IS 117

Houston lays claim to having the oldest living resident of the United States. He is William E. Norris, a retired Negro minister, who says he is 117 years old and has a birth certificate to prove it.

Norris was born in Bordeaux, France, March 12, 1831, and came to this country with his father when he was 6 years old. They were slaves of Joseph Barbee of Galveston until set free by Lincoln's Emancipation Proclamation.

Patrick Barbee, great grandson of Joseph Barbee, is a member of the Houston Fire Department. He gives verification to Norris' claim as to his age.

SPORTING News

TEXAS SPORTS WRITERS RATE HIGH SCHOOL TEAMS

Port Arthur, Amarillo and Brackenridge High of San Antonio are rated as the three top-notch high school football elevens, based on team strength indicated to date, by the Texas Sports Writers Association.

Although three teams were eliminated from the top ten teams by the sports writers after the third week of play, the three top teams remained: Port Arthur, Amarillo and Brackenridge High of San Antonio. The three teams that were removed from the list of ten top elevens are Brownwood, Corpus Christi and Arlington Heights of Fort Worth.

The Sports Writers rated the ten top teams in this order: Port Arthur, 266 points; Amarillo, 184 points; Brackenridge of San Antonio, 170 points; Odessa, 132 points; Wichita Falls, 122 points; Baytown, 117 points; Waco, 103 points; Sweetwater, 83 points; Highland Park (Dallas), 61 points; Lubbock, 36 points.

NATIONAL GRID RACE SHAPES UP AS CLOSE

Notre Dame, one of the top contenders for national football honors every year, again ranks as the people's choice for 1948 laurels. But football experts would not be surprised if several other teams should equal the won-and-lost record of the Fort Bend, Ind., Irish during the coming season. Georgia Tech and North Carolina could be the southern teams to do it. Southern Methodist Mustangs and the Texas Longhorns also are hungry for football honors in the Southwest. In the East it could be Pennsylvania or Penn State, with the Army and Villanova also given a fair chance. In the Midwest Michigan, Purdue and Missouri are hopeful, while California, Oregon and Denver are given high ratings in the Far West.

DOAK WALKER RANKS AMONG FOOTBALL'S BEST

Matty Bell, Southern Methodist University football boss, pondered long and shook his head doubtfully when asked if Doak Walker is the greatest football player he ever coached. Bell admitted that Doak ranks among the best players he ever

BUILDS HOT-WEATHER HOUSE

Henry Scharnhorst of Edinburg has designed a hot weather home that lets in all the breezes and keeps out only the mosquitoes.

The framework of the house is of the usual construction, but the walls and even the roof are of screen wire.

In case of a sudden shower or rain-storm in the night, all the occupant has to do is to reach out of bed and flip a few electric switches, starting up several small motors. Two motors take a canvas roll from under the eaves and unroll it over the top to provide a rainproof roof. The others swing solid, weatherproof panels over the open screen walls.

Scharnhorst has received U. S. Patent 2,445,386 on his invention.

CHIHUAHUA AS STATE DOG

Texas has no officially designated State dog. State Senator Rogers Kelley of Edinburg has proposed that the Chihuahua dog be made the official State dog for Texas.

"That dog is more Texan than Mexican," the Senator, who is a Chihuahua dog fancier, said. "I'm going to do something about it. I'm going to introduce a resolution at the next session of the Legislature to make the Chihuahua the official dog of Texas. The Mexican Chihuahua is not Mexican at all. It is Texan. Sure, it came from Mexico. But so did Texas."

CAR PARKERS ARE HONEST

G. D. Hindman of San Benito noticed a woman having trouble inserting a coin in a parking meter. She finally gave up and carefully placed the coin on top of the meter and went to do her shopping.

Hindman's curiosity was aroused and he went to the meter to investigate. On top of the meter he found three coins—the one placed there by the woman motorist and two others that had been placed there by earlier parkers who had been unable to operate the jammed meter.

WINTERS MAYOR ENTERS T. U.

Eugene S. Baker, mayor of Winters since 1947, has gone to Austin where he entered Texas University, matriculating as a freshman.

Baker, known to his friends as "Skeeter," was graduated from the Winters High School in 1936 and for the last twelve years has been prominent in religious and civic affairs of his home town. He served as superintendent of the Presbyterian Sunday School for a number of years and is a past president of the Winters Jaycees and of the Winters Volunteers Fire Department. Baker trained with the 90th Division at Camp Barkeley after entering the Army in 1942. He landed with the invasion force on D-Day and was in Germany at the end of the war.

W. L. Pratt will serve as mayor pro-tem while Baker is attending the University of Texas.

WALKER PLAYED 16 GAMES FOR THE PONTIAC

Walker has played 16 games for the Pontiac and has carried the ball 249 times for a gain of 1,204 yards. He has lost only 175 yards. He has completed 72 out of 123 passes for a gain of 798 yards. He has had only 7 passes intercepted. He has crossed the goal line 17 times and has kicked 19 out of 24 tries for conversion points. In two seasons he scored 124 points.

Walker has played in 16 games for the Pontiac and has carried the ball 249 times for a gain of 1,204 yards. He has lost only 175 yards. He has completed 72 out of 123 passes for a gain of 798 yards. He has had only 7 passes intercepted. He has crossed the goal line 17 times and has kicked 19 out of 24 tries for conversion points. In two seasons he scored 124 points.

TOWNSEND ALL-STATE BACK, ENROLLS AT TEXAS U.

Byron Townsend, Texas' greatest high school football player for 1947, has enrolled at the University of Texas, and is working out with the Texas Longhorns.

Townsend was the most widely sought football player in the State and received bids to enter practically every college in the country that rates its football eleven high among school activities. He delayed for months before announcing his decision as to the school of his choice.

Playing with the Odessa High School football team last year, Townsend was chosen as all-State back on the mythical high school eleven.

DUCK OUTLOOK DECLARED GOOD, MANY BIRDS DUE IN DECEMBER

Ducks Unlimited has sent out a report from Pops Glassell vice president, to the effect that a significant improvement has been noted in the duck population, most pronounced in Alberta, Canada, and appreciably better in the southern areas of Saskatchewan and Manitoba. Glassell in his report credits information on the duck population to R. A. Leeson, organization president.

Although the Southern States already have a few ducks that come as the vanguard of the big flights, the lateness of the hatching season in the Canadian hatching grounds should keep plenty of ducks flying southward through December, Leeson reports. Leeson says that an unusually large number of flightless young may be seen even now in the great hatching marshes.

THE FLOP FAMILY

CURRENT COMMENT

By STAFF EDITOR

Shortages Hinder Recovery

Food and coal shortages have slowed world reconstruction and helped develop inflationary pressures, the United Nations reports.

A study by the Economic Affairs Department shows that both shortages of coal and low nutritional standards in food have considerably reduced productivity and retarded industrial production.

Almost all of Europe and Asia suffered a decline in the per capita production and consumption of food in 1946-47, and the food situation has been even more acute in 1948 as result of poor harvests in Europe. The United Nations reported that this additional deficiency has been only partially offset by increased grain imports from exporting countries.

Ban Undesirable Comics

The un-funny funnies that feature murder, mayhem or lust have been banned in 50 cities of the United States, says the American Municipal Association. Most of the cities have set up censorship committees that pass on comic books before they are offered for sale.

It was also reported, however, that the constitutionality of the laws under which cities have banned undesirable funny books are being challenged. A recent decision by the United States Supreme Court held unconstitutional a New York law that prohibited distribution of magazines composed principally of criminal stories or stories of bloodshed or lust.

Giant Carrier

Engineers in the Navy base at Philadelphia are laying out on their boards the biggest, most powerful aircraft carrier the world has ever seen. Construction of the vessel will begin in a few months at Newport News, Va., and it will join the fleet early in 1953.

The carrier will displace 65,000 tons and will be able to launch planes the size of the B-29 bomber from a flight deck 1,030 feet in length and entirely without obstructions.

Old carriers had to have islands on their flight decks for navigational purposes and to direct gunfire. The development of radar, however, has made it possible to get rid of the islands.

In the modern carrier, two devices are needed to launch and take on planes at high speed. One is a catapult, which hurls planes into the air. Another is arresting gear which brings the

plane to a stop when it returns to the flight deck. The new carrier will have four, instead of the usual two, catapults, and they as well as the arresting gear will be more powerful than any previously constructed.

Planes launched by the vessel, it is reported, will have a fighting range of more than 2,000 miles.

Electric Nation

Ninety-four per cent of the Nation's 39,750,000 occupied family dwellings now have electric service. In addition, electric consumers are daily buying more of the accessories such as stoves and radios that burn power.

About 85 per cent of the electric industry's patrons are residential and rural type. Commercial users—such as small stores, filling stations, and theaters—make up about 13 per cent. The remaining one per cent include large industrial plants, electrified railroads, and highways which are illuminated.

The Edison Electric Institute also reports that customers are using more electricity than ever before. In 1940 the average annual use per domestic consumer was 952 kilowatt hours. For the 12-month period ended last June 30 average annual use reached the total of 17,505 kilowatt hours.

The industry, even at that, is not at the saturation point, because some homes do not yet have electric service and new homes and shops and stores are constantly being built. During the first six months of this year 1,125,000 customers were added to power lines. Of these, more than 819,000 were residential users.

Steel Industry Prepared

The United States fabricated steel industry would be prepared in the event of war to put into operation any government plan of production with minimum delay. T. R. Mullen, President of the American Institute of Steel Construction, told the annual convention of this organization in Quebec, Canada. If war should come, there would be little need for conversion of facilities of the steel industry, he said.

"The industry at present has facilities for any production that might be called for," he declared. "Many plants

have increased facilities since World War II and are prepared for any call the government might make."

Espionage Rings

A special report of 1,000 pages, made public by the House Un-American Activities Committee, declares that two Communist underground rings were operating in the State Department in the nineteen thirties. The report covers the private questioning of witnesses.

The committee statement quoted Whittaker Chambers, self-styled form-

times the speed of the fastest bombers used in World War II and as fast as the speediest jet fighters yet developed.

Symington also said that jet-driven planes have flown "hundreds of miles an hour faster than the speed of sound." This means that the X-1, supersonic rocket research plane developed by the Army Air Force, has flown at a speed of 860 miles an hour or even faster. Speed of sound at an elevation of 35,000 feet is 660 miles an hour. Aviation experts say Capt. Charles E. Yeager, first supersonic pilot, has attained a speed of 1,000 miles an hour.

Lend-Lease to Russia An Old Account

Rule of Berlin isn't the only disagreement between United States and Soviet Russia, Moscow is long overdue in settling its huge, \$11,000,000,000 lend-lease account left over from the war. The U. S. has just sent a new request for settlement of the bill.

Russia broke off negotiations last March. The Soviet Union is the only country that got sizable quantities of lend-lease that has balked at settling its war-time account. Great Britain and France both closed their accounts more than two years ago.

In general, the United States has asked Russia—as it asked other Nations—to pay a reasonable sum for only the civilian-type goods it received under lend-lease up to September 2, 1945. This in other cases has averaged less than ten per cent of the total aid given. No payment has been asked from any Nation for actual materials of

Civilian goods sent to Russia included \$1,078,965,000 in machinery and equipment, 2,800,000 tons of steel, 1,198 locomotives, 11,155 freight cars, \$10,910,000 in construction machinery, 8,071 tractors, 375,883 motor trucks, and 2,670 tons of petroleum products.

Bright Outlook for 1949

Noting that personal incomes are setting a record for 1948, the Bureau of Agricultural Economics predicts that the 1949 incomes will be just as high. And what's more, the Bureau predicts a continuing boom in employment for 1949.

At the same time, the Federal Reserve Board paints a rosy picture of the Nation's farmers. Their buying power this year, Reserve Board experts say, is more than twice what it was before the war.

However, the agency adds, "Incomes received by farmers who operate small acreage have been small, and it appears that sizable numbers of these farmers have been taking industrial jobs and have been leaving the farms."

The Board estimates that 10 per cent fewer persons worked on the farms at the end of 1947 than before the war, while non-farm population has risen nearly 20 per cent since 1937.

Education's Army

A national drive to recruit at least a million new teachers for grade and high schools is being planned by the National Commission on Teacher Education and Professional Standards. Its first objective will be to persuade more young men and women to become trained teachers. Last year the Nation's colleges turned out only 20,000.

Particular emphasis is to be laid on recruiting for grade schools. Educators consider the first eight or nine years of a child's schooling the most important of all. And they are alarmed because the greatest teacher shortage exists in schools below the high school level.

2,300 College Scholarships

Aptitude tests will be given on December 11 to candidates for 2,300 college scholarships under the Naval Reserve Officers' Training Program. Applications must be submitted by November 15. High school boys in their senior year and graduates between the ages of 17 and 21 may apply. Forms are available at most high schools and colleges and at all Naval recruiting stations.

Candidates who pass the aptitude tests will be interviewed and given physical examinations, after which scholarships will be awarded to the highest ranking on a State quota basis. Successful candidates will be given a four-year college course with the government paying for tuition, books and other ordinary fees, with \$50 a month living allowance. Students may select their own schools and their own courses within certain limits. After graduation they must serve for two years on active duty as commissioned officers in the Navy or Marine Corps. Successful candidates will begin their courses in the fall of 1949.

Draft Calls

Fifteen thousand young men will be drafted into the United States Army during December. This will make a total of 25,000 draftees taken by the Army by the end of this year under the new draft law, a previous quota of 10,000 having already been set for November.

Physical examination of potential draftees began about October 4.

Neither the Navy nor the Air Force has asked for men thus far. They expect to fill their manpower needs by enlistments.

The Army, however, plans to increase its monthly draft quotas to about 25,000 men in January and to continue at around that level until it reaches the maximum strength authorized by Congress.

The Army now has about 540,000 officers and men. Its manpower ceiling is 900,000, but officials say it has funds to maintain only about 790,000 men during the current fiscal year, which ends next June 30.

An estimated 9,000,000 men 18 through 25 years old registered for the draft. At least 250,000 of them will be called up as rapidly as the Army can expand its training facilities to handle them.

Veterans' Ventures

It's tougher going now than it used to be for veterans who want to start their own business.

"The veteran who starts a venture of his own today—unless he has a unique idea which no one else has thought of—can expect to face increasingly stiff competition," says Secretary of Commerce Sawyer. "Under present costs he will need more working capital than in normal times, and his risk is greater."

A survey by the Department of Commerce has shown about 20 per cent of recent business failures were World War II veterans.

Podunk Is a Nice Town

There really is a town named Podunk. It is in Massachusetts and it is a nice town in which to live.

Residents of Podunk, Mass., have launched a move to let the world know that there really is such a community and that it is a nice town and has modern improvements.

President R. S. Wakeman of the Podunk Community Club says lexicographers who have ignored the word and newspaper reporters who have bandied the word about will be invited to Podunk for a sightseeing tour and a dinner.

Traffic Accidents

Since all of us are motorists or pedestrians, it is not surprising that the largest item on our annual accident bill is the cost of motor vehicle accidents. According to the National Safety Council, our economic losses from traffic mishaps in 1947 amounted to \$2.65 billion.

All traffic accidents are attributable to faults in the driver, the vehicle, the road, or a combination of these factors. "Human failure" of one kind or another is by far the predominating cause, accounting for upwards of 85 per cent of all accidents.

Hawks for Air Power

Falconry is the ancient sport of hunting with various species of long-winged hawks. The powerful, highly trained birds fly from the falconer's wrist after such quarry as pheasants, quail and rabbits. In the hunt the hawk "stoops" (flies downward) upon its victim at great speed, like a dive-bomber. In Britain some hawks have been trained by Royal Air Force falconers to scare away flocks of birds that sometimes hamper landing or taking off of aircraft. Recently London got a request from RAF-trained hawks from air-lift officials at Berlin's Gatow airport. They said that birds had become a "potential hazard" to air-lift operations.

Indians Burned Coal

The history books usually attribute the first American use of coal to colonists in the East, but investigations reported to the Bureau of Mines indicate that coal was being used in the Rocky Mountain area more than 200 years before Columbus.

The investigations disclosed unmistakable coal and coal ash in connection with fires used by the Hopi Indians of the Arizona pueblos in burning pottery as early as the thirteenth century. Other investigations have uncovered primitive coal workings and crude mining instruments used by the Indians.

\$7 Billion Accident Loss

In the U. S. last year economic losses sustained in mishaps of all kinds reached an estimated \$7 billion, something like a third more than our entire appropriation for the European Recovery Program. It is nearly twice what we spent on education in 1947.

These losses averaged about \$200 per family.

—Des Moines Register

"This Will Take a Little Time."

er/Communist, as saying that he and Alger Hiss, former State Department official, belonged to one group. Chambers said Hiss tried to get one Noel Field, also a State Department employe, to join the group, only to discover that "Field was connected with another."

Rocket Plane Speed 860 Miles

Air Secretary W. Stuart Symington has officially disclosed that the United States has developed a jet-driven bomber that can fly with a speed of more than 600 miles an hour—three

Grass Root Reveries

By JOE GANDY

(Copyright, 1948, by the Southwest Magazine Co.)

"The frost is on the pumpkin and the fodder is in the shock," wrote James Whitcomb Riley, the great American poet. I looked out the window one early November morning and saw a miracle had happened during the night. A heavy frost lay on the ground. Beautiful beyond description, the frost covered a field I had plowed the day before. Frost, chemists say, is the poor man's fertilizer, for it contains nitrogen, phosphate and lime.

November brings not only hoary frost, but Thanksgiving. As the Great Day arrives, we humbly bow our heads to thank God for manifold blessings. No prayer should be said without thanking God for blessing America. He has given this nation power, glory, honor, wealth and leadership and may we use the leadership wisely and well.

Yes, we need God's help as never before in our dealings with lustful nations that threaten war, that seek world domination and enslavement of all peoples. Our prayers this Thanksgiving should be for patience, tolerance, kindness and firmness. Above all, that we have peace on earth and be spared the horrors of a Third World War.

Don't try to keep up with the Jones family, for the Jones family may be four-flushing; may be one of those families living beyond its income. The government says 28 per cent of American families are living beyond their income. No surer way to ruin and bankruptcy than to spend more, than you earn and owe more than you can pay.

A woman writer in a leading national weekly says:

"I don't know why it is that men think women are not good managers when a woman can manage to walk along a street on a windy day carrying a handbag, three small packages, two big packages, and still have a hand to hold her hat on and one to keep her dress down."

Most women are better managers than most men. They not only manage the housekeeping, but manage the kids and 9 times out of 10 raise them to be useful citizens.

It is hoped by the time this is read

that Russian Communists will have raised the Berlin blockade. Stalin and his gang showed poor judgment when they put on the blockade, which has backfired on Russia. The airlift of the Western Powers made the blockade ineffective and at the same time proved to Europe and the rest of the world that there is latent power for peace

chapel, clinics, hospitals, house-to-house, street meetings and jails. I personally know the executive of a big printing plant who is also spreading the gospel of Christ. He prints religious tracts by the thousands and sends them free to any one who will distribute them. His address is 715 Jones Street, Fort Worth, Texas. Write to this address if you want tracts free.

A food expert warns there is danger that hunger will stalk the world. He is the noted food nutritionist, Sir John Boyd Orr, of Scotland, lifelong student of agriculture and livestock. Sir John should visit the great Southwest and see how hunger is licked. Not a chance to go hungry here where we raise plenty of black-eyed peas, sweet 'taters, cornpone and sow-belly. Bring on your hungry hordes, Sir John, and we will show 'em how to raise plenty to eat on a few acres in the Great and Glorious Southwest.

A secret of long life was passed on by Mrs. Liddy Lodge, of Denison, Texas, who recently celebrated her 99th birthday. Here is the secret: "Work," she said, "hard work and plenty of it is the only reason I can give for a long life." There's much truth in what she says. Hard work seldom kills, but hard work plus worry will kill. Statistics of life insurance companies show that busy people live the longest. Loafers usually die before their time. Nature abhors a vacuum and it also abhors a loafer, who is a human vacuum. Keep busy and you will live longer and live happier.

Cash income of the nation's farmers reached a new record high of \$17,900,000,000 during the first eight months of 1948, the Agriculture Department reported. The farmers' actual profit, however, was probably less than in the same period last year, remarked the department, because of the increased cost of producing crops and increased cost of living. Gross farm income this year is running four per cent above the previous record high of last year. The dollar ain't what it used to be. I can remember when silver dollars were in circulation, that some folks called them cartwheels. Not so nowadays. If silver dollars were in circulation now, some folks would call them pinwheels.

"We humbly bow our heads."

or war in America, Great Britain and France. Stalin had better respect this power and not blindly plunge the world into another war that he cannot and will not win despite his silly propaganda to the contrary notwithstanding.

I heard a man say the other day (and he was a poor man) that he deplored the tirade against rich men that accused them of every crime from grand larceny to murder. This poor man thinks rich men are an asset to America's domestic economy, that without them there would be no material progress, no big manufacturing plants, no investments in great enterprises and fewer jobs for workmen. "Why should we hate the rich man? We need his money, his brains, and his energy to build a better world in which to live," the poor man said.

Spreading the gospel of Christ throughout the world by means of phonograph records is the purpose of Gospel Recordings, Inc. It is an interdenominational faith work that operates with all evangelical organizations. To date Gospel Recordings has made master recordings in 93 languages and dialects. The records are played in mis-

TEXAS Farm News

Development of a strain of goats that will produce mohair of the finer grades throughout their life is one of the projects to be undertaken at the Bluebonnet Farm, new Texas A. & M. experimental tract near McGregor. Officials at the farm expect to have full support and cooperation of the Texas Angora Goat Raisers Association, Texas Sheep and Goat Raisers Association and other organizations interested in the raising of sheep and goats. This has been one of the chief objectives of the Southwest Texas Angora goat breeders for many years. Mohair growers and warehousemen over Texas report that kid-hair is in good demand and the price is satisfactory, but there is little or no demand for mature hair. The clip from older goats is coarse and the coarseness increases with the age of the goat. It is to eliminate this quality that the Bluebonnet Farm project seeks.

Agricultural extension workers in Grayson county, through the use of "pilot plot" experiments conducted during the last few years, have demonstrated that the soils of that county have been

greatly denuded of top-soil by wind and water erosion and the fertility thereby greatly reduced. Experiments have shown that most of the soil is starved for basic elements—nitrogen, potash and phosphate. Experiments conducted under direction of C. O. Spence, associate county agent, reveal that fertilizers used by farmers should be used in formula adaptable to the type soil upon which a specified crop is planted. Previous crops planted also determine to considerable degree the formula and amount of fertilizer needed.

Five Whitesboro farmers have agreed to participate in a program for raising certified wheat seed as a move to improve the quality of wheat grown in that part of Grayson county. Gene Foster, vocational agriculture teacher at Whitesboro, said that 100 bushels of certified Comanche wheat seed have been purchased from the Denton Certified Seed Growers Association, and will be planted in small seed plots. The seed will plant 80 acres and the harvest is expected to be about 1,680 bushels. Farmers participating in the program are: R. D. Butler, Howard Ainsworth, Carman Brookshear, Nick Bone and Jim Thomas.

Artificial insemination of dairy cows is growing in Collin county. Up to Sept. 1 Collin county ranked fifth among the 28 counties in the State that have organized artificial breeding associations. Jack McCullough, county agent, reported that 503 dairy cows had been bred artificially in that county. Dallas county, with 928 cows bred artificially, ranked first; Parker county, with 589 cows, was second; Denton county with 549 breedings, was third; and Johnson county, with 536 breedings, was fourth.

James Driggers and Lack McMahan, Future Farmers of America at Princeton, will receive free trips to the All-American Jersey Show at Columbus, Ohio, as result of their efforts at the Texas Jersey Show held at Tyler in September. Driggers' Jersey heifer was selected at the show to be one of the heifers to represent Texas in the All-American Jersey Show. McMahan was chosen to go with the Texas herd to Columbus as showman and herdsman.

Jack Lynch has resigned as vocational agriculture teacher at Honey Grove and will become a field man for the soil conservation program in North Texas. He will maintain headquarters in Dublin and will supervise soil conservation practices in 52 North Texas counties.

OPHELIA, PLEASE
Don't desert us now that jam season is here. Will raise your pay to \$10 a day and give you afternoons off. Please come back and bake more of those golden-brown Light Crust Biscuits.

Ray Crowell, dairy operator at Abilene, has sold 24 head of producing cows from his dairy herd of Jerseys to a Louisiana buyer for \$7,000. Crowell kept some of his younger cows and now has a herd of 70 head of Jerseys.

Bill Jones, former mule dealer of Abilene who has turned to cattle, has completed a feeding barn 84 feet long on his ranch southwest of Abilene. The barn has feed bins in each end and a self-feeder through the rest of the barn 12 feet wide. Jones has put 50 head of steers on feed and plans to increase the number under feed if the price outlook continues favorable.

By eradicating cedar on his ranch in Edwards county many years ago, O. Q. Marshall, Rock Springs rancher, says the carrying capacity of his ranch has been increased fully 300 per cent. Since the cedar

C. A. Hingus of Friendswood, Galveston county, is plowing 40 acres of old rice land into strips 36 feet wide in preparation for an improved pasture of White Dutch clover and Dallas grass. The field is being plowed up and down the greatest slope in order to get the maximum drainage. He has fertilized with 500 pounds of superphosphate, 50 pounds of muriate of potash and 100 pounds of nitrate of soda.

More than 10,000,000 bushels of the 1948 wheat crop has been placed under Government loan in Texas, Oklahoma and New Mexico, Latham White, field director of the Production and Marketing Administration, Dallas, reports. White said that about 3,000,000 bushels have been placed under the loan in Texas, more than 6,000,000 bushels in Oklahoma and about 335,000 bushels in New Mexico.

Cleve and Pat Hamilton of Dimmitt have sold 330 head of mixed calves for fall delivery to Tice Younger of Texline for 28 cents a pound.

HYBRID CORN YIELD LARGE—J. S. May and son display corn grown for seed on Texas blackland farm. This corn averaged 75 bushels to the acre with liberal use of fertilizer—250 pounds of 5-10-5 fertilizer and 75 pounds of ammonium nitrate to the acre.

was eradicated every kind of grass is coming back, Marshall says. Range on which he had not been able to graze sheep in 20 years is now carrying sheep the year round. Marshall has lived on the same ranch 20 miles east of Rock Springs since 1889. He is credited with being the first rancher in Texas to eradicate cedar from his land.

Milk output in Texas during August registered an increase of 1 per cent, according to the survey conducted by the University of Texas Bureau of Business Research. Manufacture of dairy products declined 6 per cent from July to a total of 63,300,000 pounds during August. All types of manufacture of dairy products declined from 3 to 17 per cent compared with August, 1947.

Ralph Goolsby, who has been operating a dairy at Abilene, has leased a farm one mile east of Waco and has moved his dairy herd to the new location. Goolsby moved to Abilene from Jones county several years ago and has engaged in the dairy business at Abilene. His dairy farm has been in the drouth area for the last two years and scarcity of water caused him to move to Waco. The day after he started moving to Waco a heavy rain fell on his Taylor county ranch.

Members of the Whitesboro FFA chapter have 100 hogs on feed for market. Gene Foster, vocational agriculture teacher, says the boys have been given instruction in the mixing of feed for their own use, since the funds of the chapter are limited. The FFA boys mixed 8,000 pounds of feed for their hogs. The formula consisted of 200 pounds of meat scraps, 200 pounds of cottonseed meal and 100 pounds of dehydrated alfalfa leaf meal. This formula supplies a 40 per cent protein content feed, Foster said, and the cost averaged \$4 per 100 pounds.

Under the 1948 range improvement program of the Kinney County Agricultural Conservation Association, 37 ranches have completed range improvement practices and 15 others are expected to finish their programs in the near future. The most widely used practice is that of eliminating destructive plants, and the next is construction of earthen dams.

Freddie Weisan, Umland community farmer, says that terraces on his farm have demonstrated their value this year. By holding the moisture when rains fell, the terraces caused the land of terraced farms to produce two-thirds more cotton to the acre this year than adjoining land that was not terraced.

Here's How Throat Specialists Proved CAMEL MILDNESS In 30-Day Smoking Test!

In a recent test, hundreds of men and women smoked Camels—and only Camels—for thirty consecutive days. Smoked an average of one to two packs a day. Each week, the throats of these smokers were examined by noted throat specialists—a total of 2470 examinations. These throat specialists found NOT ONE CASE OF THROAT IRRITATION due to smoking CAMELS!

Prove it Yourself! Make the Camel 30-Day Test in Your "T-Zone"

All Eastland county cotton, quarantined because of the pink boll worm, must be ginned at plants with approved sterilizing equipment in order to meet government regulations. Eastland county does not grow much cotton, but all growers have been asked to abide by these regulations.

In Goliad county Mrs. Anna Dea McGlothling showed neighboring farmers how to prevent erosion. In the meanwhile she plans to divert the water on her farm 12 miles west of Goliad. She did the work with heavy machinery about the middle of 1949.

At least 25,000 acres of vegetables will be planted in Harris county this fall, according to a survey made by Sam Doerre, manager of the Farmers' Co-operative Market at Houston. The acreage will include plots ranging from small kitchen gardens to farms of more than 150 acres. The potential value of vegetables to be grown in Harris county is placed at \$12,000,000.

STARTING the cure at the bone is what makes the Morton Way of curing meat so sure. It's at the bone area where bone-soft, off-flavor, and souring are most likely to develop. The Morton Way helps stop them before they ever get a chance to start.

And it's this simple to do. Dissolve Morton's Tender Quick in water for a fast-acting curing pickle. Pumped into the meat with a Morton's Meat Pump, this immediately starts the cure INSIDE—gives you a feeling of security and a certainty of results you get only with this method.

Here's why Morton Cured Hams taste Better
After starting the cure at the bone, rub the outside with Morton's Sugar Cure. This sugary curing salt strikes in, curing toward the center, and gives your meat a rich, old-fashioned, wood smoke flavor.

The result of this double-acting cure—from the INSIDE out and from the OUTSIDE in—is the best tasting, best keeping meat you've ever had—mouth-watering goodness, sweet-as-a-nut flavor—no bone taint—no waste. Try the easier, simpler, safer Morton Way yourself this year. Morton Salt Co., 120 S. La Salle St., Chicago 3, Ill.

Cure your meat the improved MORTON WAY

RICE CROP

(Continued from Page 2) Arkansas and California are important rice growing states.

Rice Growing Problems
Principal problems for the rice grower in Texas are black kernel disease and the maintenance of soil fertility. Most growers produce rice on land for one or two seasons at most and then retire the land to grazing for two or three years. Some growers plant rice only once in five. By rotating rice on the coastal prairies in this manner it has been possible to maintain soil fertility. Large acreage in each rice plantation is thus needed. All rice grown in Texas except that needed for seeding purposes—which averages about 3 per cent of the crop—is sold on the commercial market. The food and brewing industries consume most of the Texas crop. Houston and Beaumont are principal rice milling centers in Texas.

Better Agricultural Methods
Agricultural experts in Texas and the Agricultural Extension Service of the Texas A. & M. College for several years have been urging rice growers to plant only chemically treated rice in order to insure better

stands and to guard against seed-borne plant disease. Experiments have disclosed that chemically treated seed produce larger yields than untreated seed planted on similar land and grown under similar conditions. For 1945-46 the average for land under experimental tests was a yield of 41 bushels to the acre for untreated seed, 46 bushels for seed treated with 2 ounces of phylon, and 43 bushels for seed treated with 1/2 ounce of the new improved cocoran.

Rice as Livestock Feed
For many years it was believed that rice and rice products could not be fed to livestock successfully. Rice was considered worthless as a stock feed. But this theory, so long adhered to along the Texas Coast, has been discounted and proven false by experiments on the J. M. Huffington Ranch near Hockley.

The owner of this ranch during the last two years has fed out many beef cattle on a mixture of rice bran and peanut hay—two products grown on the ranch. He has not found the ill effects that had been claimed to result from feeding rice in any form to his cattle. But, on the other hand, he found that a mixture of rice bran and peanut hay is a well-balanced feed for beef cattle.

Huffington also has proved that rice bran is a good feed for horses. A blue ribbon winning filly at the Houston Fat Stock show was entered by Huffington. This filly, he said after the award had been presented, had never fasted any kind of feed except rice bran from the time she was weaned from her mother. Studies are now being made in many parts of the Texas Gulf Coastal Prairie where rice is grown to find ways for preserving and even increasing soil fertility. It is hoped to find a way that will enable a rice grower to improve soil fertility of land on which he grows rice without having to retire rice land about three years out of five. Improved farm methods, coupled with improved harvesting and drying methods, have contributed much to the rice growing industry in the past and hold out the promise of larger yields with lower production costs for the future.

USE SUNGLASSES WISELY

The value of sunglasses as eye-protection against heat and light radiations depends upon how these dark specs are used. You are not using yours wisely, for example, if you read, knit or sew in the sun while wearing dark specs. Nor are you helping your visibility any by wearing dark glasses for night driving. Wearing glasses on those days when the sun is in hiding—or after you come indoors on a sunny day—is not making good use of these protective lenses. If you gaze directly at the sun through dark glasses, you should be reminded that staring at Old Sol is an unwise practice. Make a habit of focusing your gaze downward. If the reason you don't wear your glasses when you bask in the sun is because they annoy you, buy a pair which doesn't pinch your nose or slide down.

A LITTLE FUN Jokes to Make You Laugh

Essay On Man

A little girl's essay on man: "Man is just a worm in the dust; he comes along, wiggles around for a while and finally some chicken gets him."

Got the Job

Tommy, aged 14, set out to get a job. He asked a foreman of a local engineering works for one. "What can you do, son?" asked the foreman. "Anything," replied Tommy. "Can you file smoke?" asked the foreman. "Yes, sir," replied Tommy with a grin. "if you'll screw it in the vise for me." He got the job.

Name Themselves

The mistress of a Mississippi plantation, inspecting the farm one day, heard the herder urge: "Git along Stumbly, git along Pokey, git along Sleepy, Silly, Nutty, Lazy." "My goodness, Ben," said the lady, "it looks like you've thought up a different name for every one of these 30 or 40 cows." "No, Ma'am, that ain't the way it is. You just let cows alone and they'll name themselves."

Family Heredity

Little boy in woodshed: "Father did grandpa spank you when you were a little boy?" Father with paddle: "Yes, son." Little boy: "And did great-grandpa spank grandpa when he was a little boy?" Father: "Yes, son." Little boy: "And did great-great-grandpa spank great-grandpa?" Father: "Yes." Little boy: "Well, don't you think with my help you could overcome this family heredity?"

Double Trouble

The chief constable of my small home town is also the veterinary surgeon. One night the telephone rang and his wife answered. "Is Mr. Thomas there?" asked an agitated voice. "Do you want my husband as a veterinarian or as constable?" "Both," came the breathless reply. "We can't get our bulldog to open his mouth, and there's a burglar in it!"

Jim Hill's Thrift

Even after becoming boss of a great railway empire, Jas. J. Hill retained his habit of extreme thriftiness. Making one of his periodic inspections one day, he discovered a perfectly good spike lying on the roadbed. With fire in his eye and the spike in his hand, he sought out the section foreman. Luckily, the foreman saw Big Jim coming with spike in hand. Like every employe, he knew Hill's reputation, so he rushed to meet him and exclaimed: "Sure glad you found that spike, Mr. Hill! I've had three men looking for it for nearly a week."

Poultry News

Newcastle Disease Among Poultry

A fairly new disease is reported among poultry flocks of the Southwest. It is called Newcastle or "P-E Disease" among poultry raisers. It can affect chickens, turkeys, pheasants, pigeons and even quail, says Dr. W. C. Banks, extension veterinarian of the Texas A. & M. College. First diagnosed just two years ago in Texas, it has been reported in practically all parts of the State and in nearby States since then.

"P-E Disease" is a virus. It moves from one bird to another by contact, feed, water, air, and probably through the egg. Lice and mites may also be carriers, as well as the recovered birds. The disease often shows up first in young chicks as a disturbance in the breathing like bronchitis. Then, from two to five days later, nervous symptoms appear. The bronchitis-like disturbance in the breathing may not be noticed, but the nervous symptoms followed shortly by paralysis of some part of the bird, most often the legs, wing or neck, can not be missed. So far there is little a poultryman can do to combat the disease except remove diseased birds and quarantine the houses and brooders. It may be necessary to remove all poultry for 60 to 90 days and disinfect the houses with a lye solution—one pound of lye to 6 or 7 gallons of water—or a lysol solution—one pint of lysol to 10 gallons of water.

Hybrid Hens Are Better Layers

Hybrid pullets, originated by crossing and re-crossing three regular breeds of chickens, are sturdier and give higher egg yields than nonhybrids. This fact has been demonstrated on numerous farms in the Southwest and in experimental work at the Texas A. & M. College, the Oklahoma A. & M. College, and at many other colleges and experimental stations. A breed of chickens noted for its laying qualities is generally crossed with another breed that is noted for its sturdiness and hardiness. Another cross-breed is produced in a similar manner by crossing two other breeds that possess qualities the grow-

Day at School

Little Tobey was telling mother about his day at school. "Mother," he said, "today our teacher asked me whether I had any brothers or sisters, and I told her I was the only child." "And what did she say?" asked his mother. She said: "Thank goodness!"

Slim Faith

The old colored preacher called his congregation together to pray for rain during a drought. "Your faith am slim," he exclaimed. "We is all gathered to ask de Lord for rain, and not one of you hab brought yo' umbrella!"

Independence

A demented fellow who was harmless but whom everybody liked lived in a small town and had no means of support. The "boys" got together and decided to chip in 50 cents each and create a job for—we'll call him Lem. They then appointed a paymaster. There was an old brass cannon in the town square, and Lem's job was to polish this cannon every day, rain or shine. At the end of the week the paymaster would turn over seven dollars to him. Lem worked with great zeal for about three months, polishing and polishing. Then one Saturday night he approached the paymaster with a wild gleam in his eye. "I'm quittin' this here job," Lem announced. "What's the matter?" the paymaster asked. "Aren't you satisfied with the work and pay?" "Oh, yes," Lem replied. "But I've been savin' my money. Yesterday I bought a cannon of my own. Now I'm goin' into business for myself!"

The Great Depression

There was a man who lived by the side of the road and sold hot dogs. He was hard of hearing and had no radio. He had trouble with his eyes, so he read no newspapers. But he sold good hot dogs. He put signs up on the highway telling how good they were. He cried, "Buy a hot dog, mister?" and people bought. He increased his meat and bun orders. He bought a bigger store to take care of his trade. He finally got his son home from college to help him. But then something happened. His son said, "Father, haven't you been listening to the radio? Haven't you been reading the newspapers? There's a big depression on. The European situation is terrible. The domestic situation is awful. Everything is going to the dogs." Whereupon—the father thought. "Well, my son's been to college; he reads the papers and listens to the radio and he ought to know." So the father cut down on his meat and bun orders, took down his advertising signs, and no longer bothered to stand out on the highway to sell his hot dogs. His sales fell off almost overnight. "You're right, my boy," the father said to his educated son, "we certainly are in the middle of a great depression."

This may take time...

Place eight pennies—4 heads and 4 tails—over the numbers 1 to 10 as shown. Now, can you alternate the pennies—tail, head, tail, head, etc.—in four moves, switching two adjoining pennies in each move? See answer at bottom of page.

dramatic move in Germany. She could propose—presumably before the Council of Foreign Ministers—that all the Big Four Nations take all their armed troops out of Germany. Russia would propose at the same time that the new constitution which the Communists have prepared be adopted for all Germany. Such a proposal would put the Western Powers on the spot. To reject it might rouse widespread resentment among Germans, for the Germans in all zones want an early end to foreign occupation. To accept it would be opening the way for possible domination of all Germany by Russia through the Communist Party. Developments in Germany and France, coupled with disclosure through debate in the United Nations at Paris, have underlined the feeling of pessimism that has marked the Paris sessions. The feeling is this: No matter what words may be spoken or action taken in the United Nations, the real decision in the East-West struggle will hinge on the success or failure of the Russian campaign to wreck the Marshall Plan.

PLANT-LIKE ANIMAL

A jellyfish, although a member of the animal kingdom, has many traits of growth like a plant. First it swims, then it settles to the ocean floor where arms or tentacles form. The top moves up and another segment grows under it. The bottom segment has no arms. Then another segment grows beneath the second and so on until a dozen are formed. Now the top with the tentacles breaks off, rolls over

and swims away. The next segment grows arms, then it breaks away until all 12 are brand new jelly fish, ready to start the process over again. Some jellyfish are almost too small to be seen, while others are two feet across.

COVER LEFTOVER PAINT

Melted paraffin poured over leftover paint will keep the paint in good condition for future use.

Therefore we ought to give the more earnest heed to the things which we have heard, lest at any time we should let them slip. Heb. 2:1.

HOUDINI DEFIED ALL LOCKS AND BARS

By WALTER KING
(Condensed from The Commercial Appeal, Memphis, Tenn.)

"Challenge! I, the undersigned, have deposited with the manager of this theater the sum of \$100 which I will forfeit to any person who can handcuff me so I cannot escape!"

So boasted Harry Houdini, world's champion handcuff king, and he never once lost his money. Whether he was sealed in an iron casket, bound hand and foot and stuffed into a milk can, or handcuffed and locked in the staunchest jail cell, he always succeeded in making a get-away.

Houdini was a big success because he trained himself for his career from the time he started school, and always kept himself in the pink of condition.

Houdini worked for a locksmith several months in order to study all types of locks and handcuffs. Then he began training himself to withstand great physical hardships. Fortunately, he was gifted with exceptional muscular control. He practiced making his wrists and ankles bigger when he was being tied or shackled, then could relax them to normal size for slipping out of the bonds. For months on end he trained for immersions in freezing water. He took cold baths until he could climb into ice tanks without feeling numb.

No jail in the world could hold Houdini, but he kept the secret of his miraculous escapes to himself because, he said, "The knowledge would be dangerous in the hands of a criminal."

At Boston he was bound from head to foot by a heavy silk fish line which was

MARRY HOUDINI, THE HALLUCINATION-KING, HAD A STUNNING WOMAN THAT NO MAN COULD HOLD HIM. HOUDINI DID NOTHING BUT HOLD HIMSELF UP IN A MISTAKE OF MINUTES. HOUDINI DID NOTHING BUT HOLD HIMSELF UP IN A MISTAKE OF MINUTES. HOUDINI DID NOTHING BUT HOLD HIMSELF UP IN A MISTAKE OF MINUTES.

then securely sewn up. It took 45 minutes to complete the job. Houdini set himself free in just over an hour and a quarter but his body was a mass of welts and bruises when he was through with the struggle.

His fame spread rapidly and he made an exhibition tour of Europe. There was hardly a river or harbor in France, Germany or England into which he had not dived manacled hand and foot.

Perhaps the greatest circus stunt in Houdini's bag of tricks was making a five-ton telephant disappear. It was a case of "now you see it, now you don't." When asked how he performed this vast trick the master magician would simply smile and say, "Not even the elephant knows."

Houdini's daring feats of physical prowess brought him the most fame. In 1918 he thrilled a large crowd by freeing himself from a straitjacket while suspended in mid-air 30 feet above the street.

Houdini always had a soft spot in his heart for children and invalids. Scarcely a week went by in which he did not perform at an orphanage or a hospital. He even invented a show for blind children. Houdini had a way with birds and animals too. Dogs, cats, canaries, parrots, and even eagles seemed to love to work with the friendly trickster. His affectionate fox terrier Bobby won considerable fame for his ability to escape from a pair of tiny handcuffs.

Harry Houdini died on Halloween in 1926 taking most of his secrets with him. It was lucky for the world that he chose an honest career. Had he been an outlaw, no jail would have ever held him.

EEL WRIGGLES THROUGH ODD LIFE CYCLE

Roasted, boiled, baked, stewed, fried, pickled, or in jelly, eel meat long has been enjoyed as a food delicacy by many people in Europe and Asia. Americans, however, have generally found eels too snake-like for their taste. The ancient Romans found eel meat a great delicacy. An old French recipe calls for drowning an eel in wine and then stewing it.

In Japan, eel eating has been regarded since ancient times as a remedy against summer lassitude, something like spring tonic. Each year, on a certain day, the season is officially opened, and all who can find and afford the dish take part.

Among the many edible fish consumed in Western Europe, the eel is a favorite; from Italy to Scandinavia. England imports large quantities of eels.

The Wends in the marshy Oder River region of Eastern Germany have given eels an honored place in song and folklore. A Spreewald swamp home without eel trays, as one traveler has said, would be like a chicken farm without a chicken coop.

In private life the familiar fresh-water eel is one of the oddest of fish. For more than 2,000 years its origin was a mystery. Aristotle asserted that eels grew out of mud. Isaac Walton said they came from horsehair in the water. One tale spinner contended they were born of beetles.

The actual breeding grounds and earliest life stages of the eel were discovered by a Danish scientist who in 1905 began a long series of ocean cruises and laboratory tests. It was already well known that in the fall mature female eels in river haunts would suddenly stop eating, change to silver color, and start downstream. In coastal waters they would be joined by the males, and together they would set out for an unknown destination.

Investigators finally discovered that the objective, both for American and European eels, was in the deep Atlantic waters north and northeast of the West Indies. Still later, another central breeding place on the other side of the world was located in the Indian Ocean.

In these deep-sea areas, each year's young are spawned. The parents die. The baby eels are hatched into flat, transparent bits of life. As they slowly swerve toward respective homelands, the young grow at first into flat, cigar-shaped forms. When near the coast, they shrink, turning into the round, silty eel, as young eels are called, and these eventually develop into adult eels and start the life cycle again.

SOUND STERILIZES MILK

British scientists have discovered that milk can be effectively sterilized by subjecting it to supersonic waves—sound pitched far too high for man to hear.

Using sound vibrations 40 times more shrill than any whistle audible to human ear, electronics experts at the Mullard Research Station at Reigate, England, have evolved a vibrator that can be fitted to milk trucks or railway tenders. During transportation from farm to dairy it may be possible to sterilize 1,000 or more gallons of milk in less than one hour.

HOW TO TELL TREES' AGE

Telling the age of a tree is a nice trick. If you can do it, And there's little reason why you can't.

It's as easy as two times two. In fact, you can amaze your family and friends with your superior nature knowledge by merely applying simple mathematics, according to D. Q. Grove, chief field supervisor of the Davey Tree Expert Co.

There are only two requirements:

1. You must determine the diameter of the tree trunk.
2. You must be able to multiply, at least by 8.

Now that that's all set, the Davey expert is ready to help you unravel the mystery of arboreal ages. The following table, used by Davey field men, provides the ciphers that will enable you to approve. Inmate fairly accurately the ages of 17 different kinds of trees. You get the answer by first estimating the trunk diameter and then multiplying that number by:

1. 2 1/2 for chestnut, white elm and tulip;
2. 3 for black walnut, and 3 1/4 for black oak;
3. 4 for birch, sweet gum, chestnut oak, red oak, scarlet oak and sweetgum;
4. 5 for ash and white oak;
5. 6 for beech, sour gum and sugar maple;
6. 7 for shagbark hickory.

Most home owners don't realize it takes many years, generally about half a century, for a shade tree to attain mature beauty. The simple system for determining arboreal ages will help bring a keener appreciation of tree values and of the necessity for giving them the attention and care they require to continue to flourish.

BIRDS BEGINNING MOVE SOUTHWARD

Many small birds have already flown south for the winter, and others are going every day. Soon the Summer bird population will have vanished, to be replaced in part by birds that nest far north in Canada and Alaska, and count the snows of our ordinary northern Winters no hardship.

The shape of the continent funnels many migration streams from east and west into the same areas in Central America and southeastern Mexico. Although the birds mingle on the common Winter feeding-ground, they sort themselves out when time for return flight comes in Spring. So interbreeding does not occur, and species and varieties remain distinct.

Business Opportunities

LADIES! Sew up baby booties, read-out, easy, interesting spare or full time money. Sell stores and friends. Postal orders particular. R-O-C-A SALES, Dept. K-7, P. O. Box 551, Evansville 3, Indiana.

HEALTH demands sale of good feed, seed and hardware business in heart of fruit district. Address Box D, Paonia, Colo.

BEST CAFE in this town, clearing \$12,000 year. Established business. Business runs \$16,000 per year. Owner has business in other states to look after. Real money-maker. Taken at once, price only \$11,500. R. F. Easterwood, phone 215, Athens, Tex.

OWNER RETIRING will sell established profitable Men's Furnishing and Shoe Store, 100% location in Austin, Write Pat Adelman, Brown Bldg. Austin, Tex.

FOR SALE—In Montgomery, Ala., small retail furniture store dealing in all new nationally advertised merchandise. This is an excellent opportunity. Owner has good reason for selling. Contact P. O. Box 665, Montgomery, Ala.

GARAGE, body shop and machine shop fully equipped; 1 block from center on main street, highway; collect town. 15,000 population; 8-year lease; first-class equipment; price \$4,000. Box 215, Fayetteville, Ark.

FOR SALE—Home and auto supply store, doing big business. Priced at half value. P. O. Box 437, Bastrop, Texas.

Train horses by circus method. Free book. American Horse Training Institute, Box 11-110, Columbus, Kansas.

SHOE REPAIR—Busy shoe repair shop in Sedalia. Filling, grinding, repairing, repairing, living quarters, and lease \$750. General store in small town, living quarters. Two improved farms. A. M. Combs, Ionia, Mo.

FOR SALE IMMEDIATE delivery all metal electric brooders, fishers, laying cages. Write for our money saving prices. Chewalla Brooder Mfg. Co., Holly Springs, Miss.

HELP WANTED

WANTED—Tenant farmer on shares, extra money for extra work. Possibility of small salary, give nationality, number, address to family, also where located. Post Office Box 306, Moscow, Texas.

MACHINERY

CATERPILLAR, D-13,000 Diesel engine, D-6 angle dozer, 15-vd. carryall, 6 K.W. Kohler elec. plant, 15 K.W. super Diesel generator, 100-hp. engine, L. Phillips, Glenmore, Pa. Circle 22-B-3.

BARGAINS in Industrial Engines, Several 50 H.P. Gasoline Engines in excellent condition. Less than half price. 1-335 HP. Le Roy 8 power unit, 1-250 HP. Le Roy 8 power unit and other engines of various sizes. Industrial Engines, 732 North Main St., Ft. Worth, Texas, Ph. 3-9824.

MAINTAINER in tip-top shape. Hare Filtrif, P. O. Box 25, Rannoch, Pa.

FOR SALE—Five new standard 1940 automatic cars, \$175 each, and one standard automatic butane but gas tank, \$120. This equipment is in-use used but guaranteed to be a complete set. See R. KNOTT, Phoned 4802, DeWitt, Arkansas.

1947 MODEL 122-12-C, 110 combine. Priced reasonable. J. D. Greenon, Box 74, Sumnerfield, Tex.

REAL ESTATE

FOR SALE—2-story brick building and complete stock of groceries, liquor, hats, and shoes. Located on the corner of 2nd and 10th. Write R. D. Willard, Box 97, Wortham, Texas.

FOR SALE—Apartment house, 8 apart. ments; on corner of 12th and 10th. Write R. D. Willard, Box 97, Wortham, Texas.

500 ACRES of the best wheat land in eastern Colo. All in cultivation, 320 in summer fallow, wheat up and in fine shape. Immediate possession. Also complete set of farm machinery to farm it. 3 combines, 2 tractors, 2 one-way plows, 2 chisels, 2 mowers, 2 disk harrows, 2 mowers, 2 mowers, 2 mowers. No comp. terms, 8 miles from town. H. D. Stevens, Burlington, Colo.

FARMS AND RANCHES

FOR SALE—195 acres of fine dairy and farming land with barn and house on 200 ft. frontage. Ideal location. Box 312, Bonham, Texas.

RANCH IN NEW MEXICO—1512 acres with good improvements. Also 100 acres just outside of city limits. Good well water. All city conveniences. Write Post Office, Box 801, Carlsbad, New Mexico.

FOR SALE—Small modern farm furnish. ed. Livestock, hunting and fishing. Close to P. M. Collins, Lehigh Grove, Oklahoma.

120-ACRES, \$3,500 cash, new house, pool, boat, hunting, fishing, schools, Flood Allen, near Easton, Adams, Wisconsin.

RABBITS

RAISE RABBITS COMMERCIAL—Big income for full time producers, or handsome supplement to your present income in spare time. Write for free booklet. Get into this amazing industry now. Rabbit Federation, 200 Barrett Building, San Jose, California.

EMPLOYMENT TO CONTINUE

Federal economists predict that the present boom in employment and in personal income will continue through 1949. At the same time, the Bureau of Labor Statistics reports that in August wages of factory workers reached a new high at an average of \$53.86 a week. It said that there was a small drop in retail food prices during that month but that the general cost of living in this country had increased one-half of one per cent.

Speak, move, act in peace, as if you were in prayer. In truth, this is prayer.—Fenelon.

all through the meal... I RECOMMEND... the FLAKIER cracker! because: they're tender-baked for extra flakiness in the worlds most modern ovens.

Sunshine KRISPY CRACKERS

FROM THE THOUSAND WINDOW BAKERIES OF Sunshine Biscuits, Inc.

PRISON RODEO

(Continued from Page 2) has come funds for such things as artificial limbs for prisoners, travel fare home for destitute inmates reprieved from the penitentiary, holiday dinners, movies, books for the library and the like.

All rodeo contestants are inmates and volunteers. Trick ropers, jack riders, clowns and such are hired from the outside, but do not compete for prizes. Prizes for the winners are not high and no man receives prize money in a lump sum. He is given credit on the prison system bill and can draw on his winnings at the rate of only \$3 a week. This "Springfield" explained, is to discourage the building up of class distinction among the prisoners.

For years the Methodist and Baptist churches of Texas have fought to prevent the prison rodeos from being held on Sundays, but with no success so far. The rodeos could be held any day of the week, but they drag on Sundays that the show draws out big crowds and big money.

Milking Wild Mares

The next acts were ready. Wild mares were being crowded into the chutes. The wild-mare milking contest was about to be staged. The convict milkers crowded up to the chutes, reaching through the bars to test the milk flow.

"Don't want 'em, running, a duster in on me!" one cried.

Another, ducked a stream of milk and allowed his mare was fresh enough.

Then out they came, with two convicts to each mare, one to set his teeth in her ear and pull her head down, the other to dodge wicked hoofs and squirt a few drops of milk into the narrow mouth of a coke bottle. Instantly, there were mares and convicts down all over the place, with other mares and convicts leaping over them or stumbling and falling on top.

Mares snorted and squealed. Some lashed out with wicked heels and some reared high, chopping with their forefeet at the men clinging to their heads. One slung a convict loose from her head, slamming his body against a brick wall with such force that the sudden sound of impact carried completely across the arena. The man fell to the ground and lay limp while another mare and two convicts fought back and forth across his body.

Judge Picks Winner

Then a striped figure darted out of the mad, scurrying and raced for the judge, holding aloft his coke bottle. Reese B. Lockett, mayor of Brenham and judge of the milking events, snatched the bottle out of the convict's hand, tilted it to his mouth to make certain it held milk, then proclaimed the convict winner.

Came more bronc busting, more bull riding, a wild mule race, a wild cow milking, and

More people use Morton's

When it rains it pours

more contestants carried out on stretchers.

Grand finale of the show was a mad chariot race, with clowns riding two-wheeled carts hooked to wild Brauner bulls in such a manner that the bulls could swing around and run at their own carts if they chose. And some did.

"We're thinking about taking part of our show to Madison Square Garden next fall," Springfield commented as we headed for the gate.

The FBI man nodded. "It'd be excellent publicity for the prison," he agreed.

THOUGHTS ON PEACE

Blessed are the peacemakers; for they shall be called the children of God.—Matthew 5:9.

The truest and surest way in which we can serve our fellowmen is not so much to do anything for them, as to be the very truest, purest, noblest being we know how.

—Frances P. Cobbe

This world can never be made right by force, nor by fear, nor by power. In the long run nothing conquers but ideas, nothing governs but the Spirit.

—Leacock

HOUSEHOLD HELPS

By MARGARET MOORE

NEW IDEAS EASE IRONING TASK

Ironing the family wash is such an ingrained habit, so much a part of the weekly chores, that most women never give a thought to the way they do it. Few women were ever really taught how to iron. They just learned, of necessity, and go on doing the job trial and error, brute force and sweat methods.

There is an easier, scientific way to iron developed on the basis of original research by Dr. Elaine Knowles-Weaver of Ohio State University.

The new methods were launched last year when one manufacturer of irons began teaching women how to iron a man's shirt in 4 1/2 minutes—and do a more professional job than most women can do by their own methods. Now the system is expanded to cover all kinds of garments.

There are three basic rules for the new technique, says the company, which points out that any ironing equipment can be used. First, bring the garment to the iron. Instead of the iron to the garment; second, handle the garment as little as possible, and third, use the left hand as well as the right, for ironing.

Proving that the old-fashioned ironing methods are too much of a job for most women, the company's research showed that with a four-pound iron—which is about average among new irons—the housewife lifts the equivalent of 2 1/2 tons while doing an average ironing for a family of three.

She does all the ironing with the right hand, lifting the iron and putting it down constantly—and she winds up with tired feet and legs, a tired back, and an exhausted set of right arm and shoulder muscles.

For the new methods, the housewife sits down on a chair or stool which puts her at a convenient height to work on the ironing board. Instead of doing a lot of lifting, she slides the iron as much as possible, and to put it at rest where it won't burn the ironing board cover, she just tilts it back, instead of picking it up and replacing it on end.

The method includes the steps in sprinkling and folding along with ironing—and did you know that you shouldn't roll sprinkled garments up into a tight roll?

If you do that, you just roll wrinkles into the garment, and then you have to iron them out. It's much better to fold each garment loosely, instead of rolling it up, because it gets damp just as well without wrinkling. Avoid using too much water, because then it takes too much time to iron the garments dry.

DOLL'S SNOW SUIT

5672

By MRS. ANNE CABOT

A colorful knitted snow suit in authentic Norwegian design is scaled to fit a 20-inch doll. Knitted in forest green, red and white soft wool, the set is complete even to mittens and after-ski shoes. Dress a discarded doll in this outfit and see how quickly it becomes the 'pride of the collection' again.

To obtain complete knitting instructions, stitch illustrations and graph charts of pattern Design of Doll's Snow Suit (Pattern No. 5672) send 15 cents in COIN plus 1 cent postage. YOUR NAME, ADDRESS and the PATTERN NUMBER to ANNE CABOT, Southwest Magazine, 1150 Avenue of the Americas, New York 10, N. Y.

Please do not send order to Mrs. Margaret Moore, Fort Worth, Texas. Send order to Anne Cabot, Southwest Magazine, 1150 Avenue of the Americas, New York 10, N. Y.

ASPARAGUS SOUP

This creamy asparagus soup is the basis for autumn luncheon.

Here's how you make it. Take 2 pounds of fresh asparagus or a 2-pound package of the frozen and cook in boiling salted water until tender—drain, saving the liquid. Dice about half of the asparagus. Add water to the liquid to make 6 cups. Put diced asparagus, 6 bouillon cubes, 2 tablespoons of minced onion, 1/2 cup diced celery and teaspoon of salt into vegetable liquid and simmer for half an hour. Force through sieve. Melt 3/4 cup of vitaminized margarine, stir in 6 tablespoons of flour and add asparagus stock slowly. Heat until thickened, stirring all the time. Add 1/2 cup of sweet cream and the remaining asparagus tips. Serve hot, garnished with pimento cut in any desired shape. Makes 6 servings.

Tip for Asparagus

For a Sunday night supper platter arrange cooked asparagus on the serving dish, top with creamed tuna and a sprinkling of Parmesan cheese. If the platter is of a heat-resistant material it can be put under the broiler for a few minutes so the cheese will melt and turn golden-brown.

HOW TO KEEP HAIR HEALTHY

Is the prospect of a fall permanent filling you with dread?

A permanent can be a good permanent only if a woman's hair is healthy. Hair, after a summer of too much sun, too much wind, and too little brushing, does not have the elasticity and gloss that go with hair and scalp health.

Reconditioning is in order. It means a little effort, but it's worth it because the end result will be hair restored to beauty, and hair that will "take" a permanent the way fine leather takes a polishing.

Without one weapon your fight on the effect of a summer's neglect is lost before it starts. The weapon is the good, the sturdy, bristled hair brush, wielded by you with all the constancy and vigor you can command. Combine massage of the scalp with brushing of the hair shafts and you can change the state of your hair from sickness to health in a month.

The kind of a brush you use is tremendously important and if you're looking for a super dupe, see the one that has just come to market—one made of shining lucite with bristles that revolve. The bristles, which are of either nylon or the wonderful boar bristles we simply couldn't get during the war, are set in lucite bearings, rotating freely in the base of the brush.

Does all this sound mechanical and gadgety? It isn't at all. The sturdy, long bristles revolve of their own accord as they pass through the hair in normal brushing action and their "feel" as you sweep the brush easily and naturally thru your locks is wonderfully pleasant.

The revolving bristles set in little sockets as they are in this new brush give it another advantage. The bearings are set about an eighth of an inch above the back of the brush. When the brush is turned over, bristles upward, the little raised bearings, set in even rows, give you scalp massage tips.

It is something of a double edged sword in your war on lack of luster. Massage is every bit as potent as brushing in stimulating the natural oil from which all hair beauty flows. With this newcomer to the hair brush field—laundable and guaranteed for a year—you should find hair reconditioning a pleasure.

TESTED RECIPES

Now is the time to prepare such rich repasts as roast fresh pork, and trot out all the trimmings!

Fresh pork is high in food value, rich in protein and minerals such as phosphorus and iron, and an especially good source of thiamin (vitamin B-1).

Children who do not get enough B-1 cannot grow normally, become tired and cross, and often have poor appetites. Sometimes they have dull aching pains and even neuritis.

To keep our families in good condition, serve lots of fresh pork.

ROAST PORK WITH RUBY PEACHES

1 fresh pork loin 1 1/2 tablespoons flour
1 1/2 teaspoons salt 1/2 dozen whole cloves
1 dozen of black pepper 2 tablespoons plum jelly
1 cup peach halves Parsley for garnish.

(Be sure to note weight of pork loin when buying, for roasting time depends on weight.)
Mix salt, pepper and flour, and rub well into the outside of the meat. Press a few whole cloves deeply into the fat here and there. Place fat side up on rack in roaster and slip into hot oven (475 degrees Fahrenheit) 15 minutes to warm through. Reduce oven temperature to 350 degrees, start timing, and roast uncovered with no water in the pan, allowing 30 minutes for each pound. (In other words, if your meat weighs five pounds, you will roast it 2 1/2 hours.)

It should come to the table crispy golden on the outside, tender and juicy in the center. Undercooking of pork is unsafe for health. Overcooking makes it thready and unpalatable.

For best slicing, plan cooking time so roast may be done and out of the oven 20 to 30 minutes before serving time.

Drain peaches and save syrup for use later. Arrange halves in shallow baking dish and put a teaspoonful of plum jelly on each flat side. Put jelly in center of each. Run oiler until heated through. Arrange platter with pork roast, garnish with parsley, and serve at once.

HONEY-NUT STEAMED PUDDING

1/4 cup shortening 1/2 teaspoon salt
1/2 cup honey 1/2 teaspoon cinnamon
1/4 cup sugar 1/2 teaspoon nutmeg
1 egg 1/2 cup All-Bran
1 1/2 cups sifted flour 1/2 cup milk
2 teaspoons baking powder 1 teaspoon vanilla
1/2 cup chopped nuts

Cream shortening until light and fluffy, gradually stir in honey and sugar. Add egg; beat well. Sift together flour, baking powder, salt, cinnamon and nutmeg; mix with All-Bran. Add first mixture alternately with milk. Stir in nuts and vanilla. Fill greased mold two-thirds full; cover tightly. Steam 1 hour. Serve with orange or other fruit sauce.
Yield: 6 servings.

BURNED!
get quick RELIEF

Apply Sayman Salve! Shuts out air, cools the skin, eases pain. Keep it handy—in medicine chest or near kitchen stove. Favorite "first aid" for minor burns... over 10 million jars sold!

Double Blankets Can Be Made Single Size

Double blankets are much easier to handle, both in laundering and bedmaking if cut apart and bound separately. They are nice, too, on a warmer night when one may be removed if they prove too warm.

Rusty Curtain Pins

If the curtain pins have become rusted, let them lie for a few minutes in a bowl of water to which ammonia has been added. Then take them out and rub with a dry cloth to remove the loosened rust.

Thank You!!

As soon as you get back from a pleasant week-end, send your hostess a thank-you note. You will be thought of as a perfect guest if you perform this small task to show your appreciation for your hostess' efforts to entertain you.

HEREFORD BREEDERS TO HOLD SHOW

The South Texas Hereford Breeder-Feeder Association's twelfth annual show will be held at Beeville on Nov. 1 and 2. A fine quarterhorse show is to be held in connection with the cattle show. There also is to be a rodeo conducted by Rocky Reagan. Auction sale of the Hereford cattle will be held at 2 p. m. on Nov. 2.

BRIGHTEN THE SOUP

If you are serving chilled cream of chicken or mushroom soup be sure to garnish each bowl with a bright vegetable; use very thin slices of radish, thin cucumber strips, chopped green pepper or parsley or coarsely grated carrot.

NOTICE CHANGE OF SCHEDULE

7:52 A.M. eastbound trolley will run at 8:02 A.M. after Tuesday. Conductor stopping 10 minutes for hot light crust biscuits, butter and jelly.

PARTY-LUNCH SPECIAL:
Cheese Bran Muffins
Make 'em in a Jiffy
... Serve 'em Hot!

Crunchy toasted Kellogg's All-Bran muffins laced with cheese... you'll get "raves" on these every time!

2 tablespoons melted shortening
1 egg, slightly beaten
1/2 cup milk
1 cup Kellogg's All-Bran

1 cup sifted flour
2 1/2 teaspoons baking powder
1/2 teaspoon salt
1 cup grated American cheese

1. Combine shortening, egg and milk; add All-Bran and let soak for five minutes.
2. Sift flour with baking powder and salt; add cheese. Add to first mixture and stir only until combined.
3. Fill greased muffin pans two-thirds full and bake in moderately hot oven (400° F.) about 25 minutes.
Yield: 9 muffins (2 1/4 inch size).

America's most famous natural laxative cereal—try a bowlful tomorrow.

THRIFTY PAINT JOB

If the kitchen wall behind the stove is getting you down, here's a helpful hint. Don't think that one soiled wall means the necessity and expense of a complete new paint job. Simply re-do the wall that needs attention, using a paint which is a different color from that of the rest of the room, or paper the offending wall with one of the popular washable wallpapers. Select a paint color or wallpaper design that contrasts or blends with your present kitchen color scheme.
