NUMBER 19

The Drummers—

(An Editorial)

Now that warm weather is approaching, house to house salesmen will be plentiful again this year. In fact, a number of them have already been through our little town, always taking several dollars from our town and leaving nothing. Admitted that some of the merchandise they sell may well be worth the money you pay for it—think how many times in the past a drummer of some kind has knocked on your door and offered you merchandise that appeared to you to be a bargain and you bought it, later to find out that you had been sold some merchandise that was not what the salesman represented it to be. What does he care what he tells you about the merchandise he is selling you? In all probability neither of you will ever see each other again. If you do he will most likely will be selling some other product and will claim not to have been the man you think he is.

The days of the sure, though easy money seem to be over. More and more schemes to get money the easy way are being thought up every day. These people that think up such things are not all in large cities. In fact, they had rather operate in the small towns and communities for various reasons.

In most small towns there is not an over supply of policemen. A lot of small towns do not even have a policeman. These are the places the crooked drummers like to operate in. Here he knows that he can sell his no good merchandise to a number of unsuspecting housewives (and husbands also) and get out of town before it can be realized what he has done. Lots of times when people fall for some slick-tongued salesman's line, they are too ashamed of themselves to call the officers and tell them what they have done. All of these things go to entice the drummers to the small town, where he knows that he is unlikely to be picked up for peddling no-good merchandise.

In most cases the man that comes to your door selling merchandise, is trying to slick-tongue, or fast-talk you into buying something you can get at your village store for the same price or cheaper. This fast-talking salesman never pays any taxes in your town, very seldom he leaves behind him any money that you have paid him, he never patronizes your newspaper or any civic project in your town. In other words, all the money you pay to the out of town salesman, leaves your town, never to return.

All of us know a merchant operating a business must make a profit on his merchandise to be able to sell it. We should also know that a merchant who is in business must sell merchandise

Piggly Wiggly Starts Giving S & H Green Stamps

The Piggly Wiggly grocery store this week has started giving S & H Green Stamps that are redeemable in Nationally Advertised merchandise. Mr. Neal Oakes, operator of the store, invites everyone to come in and let them explain the advantages of S & H Green Stamps to you.

S & H Stamps are being used in a large number of the large city stores. They are just now beginning to be used in the smaller towns. You will be furnished a book to keep your stamps in, and when the book is full, you may exchange it for valuable merchandise.

For other details see the Piggly Wiggly ad on the back page of this newspaper.

PIANO RECITAL

Mrs. Mae E. McDonald, and Mrs. Harry Crews will present their piano pupils in a recital in the High School Auditorium on Friday, May 12, at 8:00 p. m.

The public is most cordially invited.

Carbon paper and sales pad at the News office.

that his store can stand behind and guarantee to you. When you trade at home, you know the store you are trading with is offering you goods that he will have to stand behind. You see this man every day. He meets you on the street, in his store and on Sunday in one of the local churches. This local salesman wants to see his town grow, he has his money invested here, he lives here, pays his taxes here, he gives to the churches, the schools, he patronizes your local newspaper—He is the salesman that you can depend on to give you quality merchandise—every time you buy.

So again let us urge you to keep in mind that when the out of town drummer knocks on your door—that you do not know this man. You know this much about him though—He does not pay any taxes in Santa Anna, he does not attend or contribute to any Santa Anna church, he does not patronize your local newspaper, he is most likely trying to sell you something that you could get a better value on from one of your home town merchants; you will most likely never see this man again (if the merchandise you buy is no good, just throw it away and say nothing to no one about it.)

So, give your home town merchant the opportunity to serve you better, by patronizing him. You will benefit from every business transaction, and so will he. In this manner your money will remain at home, and your town will grow.

Santa Anna Oil News

By Elgean Shield

APRIL OIL ACTIVITIES IN COLEMAN COUNTY

In Coleman County last month there were 27 permits to drill, 12 successful completions, 10 oil wells and 2 gas wells. There were three acidizations, 6 dry holes, and 2 gas wells were abandoned and plugged. Three oil wells were also abandoned and plugged.

Greater Expectations Oil Corporation, on the Neill land, well No. 2, which is about 1500 ft. W of well No. 1, set pipe Friday, May 5, and cemented. They expected to drill in last Monday. There is a good showing of gas and oil.

The Guy Mabee, announces it's well No. 2 on the Leona Thompson land, T & N. O. survey, section 29, 330 ft. from the W line and 1260 ft. from the N line.

D. L. Riley, Coleman, Texas, announces a wildcat to be drilled on the P. J. Reeves land, a 401

acre tract, Ferguson survey, 330 ft. from the N line and 1700 ft. from the W line.

The Western Petroleum Co. announces its Well No. 1, on the C. C. Burroughs land. A 150 acre tract, in the Templeton Gray sand, E. L. R. R. Co. survey, section 2, block 1, 330 ft. from the N line and 330 ft. from the E line.

The W. E. Stepp and Oscar Gould on the T. E. Daughtry land, south 735 ft. and 738 ft. from the W and 1320 ft. from the public road that runs from Coleman to the dump grounds. R. J. Clow No. 735 survey, elevation 1713½ ft. Commenced 11-14-49, completed 12-13-49. Initial production 12 barrels before shot and then 47 barrels. This well is ½ mile southwest of the town of Coleman.

The Westates Petroleum Company on the Shaw land was drilling at around 900 ft. Monday afternoon.

Mothers—

By Mrs. A. L. Oder

For several years, feeling that fathers had not been given the respect due them, I have written articles for Fathers Day. Perhaps it is time for a Mothers Day article.

The institution of motherhood, is worthy of all honor, but not all mothers are.

Believing there have always been more good mothers than evil ones we will mention some of the latter ones first.

Gomer, the wife of the good old Prophet, Hosea, who lived several hundred years before the Christian era, was a sorry type of mother. One day, having drifted into sin, she walked off and left her three children, without a mother's care. Perhaps she did better when Hosea, seeing her for sale, as a slave on the auction block, bought her and restored her to her home and children.

Recently I read of a mother, sitting at a bar drinking, with her baby on her lap. The baby fell to the floor, and another woman sitting by and drinking, said, "I would like to have a baby like that," and the mother said, "You can have this one," and the deal was made. There were many fine mothers in the land of Israel in the days of Gomer.

And when the mother, in the bar room, was giving her baby away, there were uncounted thousands of American mothers, in their homes performing the roll of mother to the very best of their ability.

We think of Mothers Day as being inaugurated by Miss Anna Jarvis, in 1907. That is when it started in America. We are told that several centuries before the Christian era, they had annual Mother-Worship services, which originated in Rome. Children returned home, at such times, with gifts for their mothers just as they do now.

If you are not able to give your mother a nice gift on Mothers Day, don't worry. Just write her a long newsy letter. I read of a woman, who "in the lean years," could not send her mother a gift for Mothers Day—So she wrote her mother a long newsy letter and promised one weekly until the next Mothers Day. The daughter faithfully kept her promise, and the mother had great delight in the letters.

Most anyone could do as much.

Class of 1926 Plans Reunion In June

The members of the graduating class of 1926, from the Santa Anna High School, are making preparations for a class reunion to be held in Santa Anna, in the early part of June.

The plans underway indicate a very nice and gay affair. If any member of the class reads this, please write your ideas, approval, etc., to Mrs. R. O. White, Rankin, Texas, Mrs. A. D. Donham, Jr., or Mrs. B. A. Parker, Santa Anna, Texas. Also anyone who knows the mailing address of Frances Carroll, J. E. Ford, Jr., and Mrs. Cora Rothermel Green, please notify one of the above mentioned.

Hospital Notes—

been admitted to the Sealy Hos-

The following patients have been admitted to the hospital within the past week: Granyille, England, Flisk, Tex. Mrs. Dave Banks, Leady, Tex. Marty Donham, city. Mrs. E. R. Tucker, city. Mr. Joe Spencer, city. Mrs. O. D. Cox, Brady, Tex. Kenneth Wood, city. Mr. Sam Snedegar, Coleman. Mr. W. E. Curry, Bangs. Mrs. E. E. McClintock, city.

Mrs. Mae Flores of Bangs, was visiting and attending to business in Santa Anna Tuesday.

Aubrey Brewer and Mr. John Grammer of Coleman, were in Dallas the first of the week, at market.

Dr. Benson Moves To Santa Anna

DR. W. F. BENSON

Dr. and Mrs. W. F. Benson and son, Bill, moved to Santa Anna last Wednesday and are now located in the Miss Mae and Bettie Blue home, located at 907 Avenue A. His residence phone is 23.

Dr. Benson took over the operation of the Sealy Hospital May 1. Since that time the hospital has been undergoing a change in dress, with all the clinic part of the hospital being painted a light green. A general clean-up and fix-up campaign has been going on since Dr. Benson has been there.

The Santa Anna News joins others in welcoming the Bensons to Santa Anna.

FFA Chapter Give Barbecue Chicken Supper

The members of the Santa Anna Future Farmer of America Chapter entertained their fathers and members of the Santa Anna Livestock Association with a well prepared barbecue chicken supper and a one-act play Tuesday night at the High School Gym. Approximately 200 were present.

The supper consisted of barbecued chicken, beans, onions, pickles, bread, pie, coffee and tea. The invocation was given by Rev. W. F. Smith.

After the supper, the group was invited into the auditorium for a regular session of a Chapter meeting. James Donald Vercher, president of the Chapter, presided. After recognition of all the visitors, a report was given on the activities of the chapter for the past year by Vice-president, Max Eubank. He gave the number of livestock and fowls the members have had for home projects the past year and stated that the chapter had shown in seven livestock shows in Texas this school year, each time showing some of the top winners in each division they entered.

The secretary of the chapter, Billy Ray Weathers, presented certificates of awards to the following boys: James Goodwin in mutton production; James Watson in beef production; Stanley Cobb in mutton production; Billy Ray Weathers in mutton production; Garland Schrader in mutton production; James Donald Vercher in mutton production; Max Eubank in pork production and Thomas Ray Rutherford in beef production.

Following the presentation of awards, a one-act play was given by members of the chapter. The meeting was dismissed in the usual FFA manner.

A. D. Pettit, Vocational Agriculture teacher and sponsor of the FFA Chapter staged the boys raised all the chicken used Tuesday night. They also killed, dressed and barbecued them. The boys and their sponsor are to be congratulated on the success of their annual Father-Son program.

Buy and hold your U. S. savings bonds.

Local Boy Scouts Organize Explorer Scout Troop

A reorganization meeting of Boy Scout Troop 26 of Santa Anna was held Monday night, May 8, at the Boy Scout Hut, with the primary purpose of organizing an Explorer Post from the fourteen year old young men and older. The Lions Club of Santa Anna voted to sponsor the new unit in addition to the Scout Troop they have sponsored in the past. This will give Santa Anna the "Whole Scout Family" i. e., Cub Scouting for the 8, 9, and 10 year olds; Boy Scouting for the 11, 12, and 13 year olds; and Exploring for the 14 and older young men.

The meeting was attended by many of the new adult leaders for the forthcoming year and from the enthusiasm show by them Scouting is assured a bright future in Santa Anna. Harry C. Wiegler, pastor of the First Baptist Church, will head the Troop Committee, aided by C. R. Owen, Jack Mobley, Neal Oakes and Weldon Priest, Bill Adams, who has done an excellent job as Scoutmaster the past year, will continue in the same capacity, but with help this time Bill Day and Add Walker will be Assistant Scoutmasters, giving the type leadership the youth of the community deserves. G. T. England and Dick Bass will serve as Advisor and Assistant Advisor respectfully to the new Explorer Post.

Color slides, taken when the Troop spent an over-night camping trip at the Council Camp Tonkawa, were shown by the Scout Field Executive, Jerry Cole. Also shown were two film-strips explaining the Explorer Program and how it operates.

The meeting was ended with G. T. England telling stories of the sea.

Rilda Stephenson Places First In County Dress Revue

Rilda Stephenson of Santa Anna, 15-year old daughter of Mr. and Mrs. C. W. Stephenson, won first place in the county 4-H Club Dress Revue. She modeled a yellow organdy with yellow and navy accessories. Rilda selected the material and pattern and made the dress.

Ruth Milligan, of Shield, won second place in the dress revue. Ruth modeled a print dress with red and white accessories.

Caryn Burns, of Burkett, won third place. She modeled an orchid dress.

Rilda won a Travel iron and a trip to A & M to model her dress in the state dress revue. Ruth Milligan won a pair of pinkish sheers and Caryn won a bed room lamp.

Rev. and Mrs. S. R. Smith Bereaved

Friends of Rev. and Mrs. S. R. Smith of Brownwood, former pastor of the local First Baptist Church, are in sympathy with them in the loss of their daughter, Mrs. Mildred Sadler, of Carlisle, Ark.

Mrs. Sadler died early Sunday morning, following a lingering illness, lasting several months. Her parents were with her in her passing.

ANNOUNCEMENT

The Mountain City Garden Club will have its annual show on Saturday, May 20th, from 2 to 6 p. m., in the Tom Hays building.

The public is cordially invited.

The Santa Anna P.-T. A. will meet for the final session of the school year, next Tuesday afternoon, May 16, at 3:30 in the auditorium, of the Ward School. Officers for the coming year will be installed.

Miss Sharon Nevins of Brownwood, visited with Julia Ann Bailey over the week end.

Santa Anna News Purchases New Polaroid Camera

In line with the efforts of the Santa Anna News to bring you a better newspaper each week, we have purchased a new Polaroid Land Camera. This is a new type camera. It takes the exposure and develops the picture, all in about 60 seconds time. The News was able to purchase the camera through the cooperation of the Santa Anna Chamber of Commerce.

Although your editor knows very little about photography, we are going to attempt to have one picture of local interest in the paper each week. Just what the subjects of the pictures will be might be hard to say at the present time, but we have a number of plans for the new camera, and right now our hopes are running high for a number of good local pictures.

In the past we have not carried many local pictures because of the high cost of the engraving. That is, the cost of making a plate for the paper, after the picture has been developed. We still must hold this cost to a minimum, but we are going to have some local pictures also.

In this manner we must ask your cooperation. If you know of some incident that you think would be of interest to the other citizens of Santa Anna and surrounding territory we would appreciate your letting us know about it. If we consider it news value to the public, we will be glad to try our luck at getting a picture of it for the paper. If you know of anything you think might be of interest to our citizens for the news, value, we would also appreciate your calling it to our attention.

Flying Saucers!!

Your editor has been wondering for quite a while when some one would come in and make the first report of seeing a "Flying Saucer" in this area. So far as we are concerned Mr. Jack McSwane of Rockwood has the honor of being the first in Coleman County.

Early one morning last week Mr. McSwane got to his field just after sun-up to do some plowing. Shortly after he started plowing he noticed something in the adjoining field that seemed to hover about five feet above the ground and seemed to be a circular object. Mr. McSwane did not go to investigate the object that seemed to be flying around in Mr. Fred Shuford's field, but he kept a close watch on it. The object never seemed to move very far, it just hovered right close to the ground and was a bright shiny, circular object.

Later in the morning it seemed to just disappear.

After thinking the situation over, Mr. McSwane realized that a hired hand that was working for Mr. Shuford had his Model-A Ford parked right where he saw the object. The Ford was painted with Aluminum paint and the sun was glaring on the car, thus seemingly making the often talked about "Flying Saucer."

Mr. McSwane said he thought most of the "Flying Saucer" stories comes from similar things. We here at the News office, agree with him.

So goes the story of the "Flying Saucers."

Mrs. Ben P. Purcell and son, Bill, of Childress, visited with her sister, Mrs. C. L. Eeds, on Wednesday of last week, while enroute to Kerrville to visit Mr. Purcell, a patient in a hospital there.

Mrs. E. R. Rathjen and daughter, Patricia, of Seymour, came Sunday for a three weeks stay with Mrs. T. E. Horton and family. Patricia will finish school here, after which will join Mr. Rathjen in Franklin, Ky.

Rockwood News

By Mrs. John C. Hunter

The Rev. H. E. Dutton, pastor, preached at the Methodist Church Sunday. He announces 4th Quarter Conference to be held Sunday, May 14, at Chisolm, land.

Local Baptist Church News

Mothers will be honored at the morning services of the First Baptist Church Sunday, May 14. The pastor will give roses to the youngest mother present, the oldest mother present and to the mother with the most children present. In each case the mother and the child or children must be present. It is a privilege to pay tribute to Mother. It is hoped that a great number will be in the church services honoring mother in that way. The sermon topic for this service is "The Christian and His Home." The Fellowship Class met in the home of Glen Smith last Tuesday evening at 8 p. m. Seven men were present for this class meeting. This class is for men of the Adult I Department of the First Baptist Church. Mr. Smith is the president and Harry C. Wigger is the teacher. Plans were made to make this a monthly affair with the next

meeting to be in the home of O. L. Oakes, June 8. The Brotherhood will have its regular meeting Tuesday, May 16, 8:00 p. m. Men from Gouldsburg will have charge of the program that night. The Coleman County Baptist Workers' Conference will be held at Whon Baptist Church Monday, May 15. The Board meeting will be at 6:00 p. m. Supper at 7:00, and the program at 8:00. Rev. Levi Price is to bring a report of the Chicago Convention at this meeting.

SPECIAL: One Dozen Bem-burg Sheers, \$4.95 and \$6.95. Ladies Shop.

Joel F. Cook and Floyd Bonner, from Killen, visited in the Richard Bass home over the week end.

Mrs. J. F. Simmons left on Wednesday of last week for a visit of two weeks in the home of her son, Beal Simmons, and family, at Lubbock.

Trickham News

(By Lea Mitchell and Mary Catherine Fellers)

Rev. Clarence Powell of Brownwood, a Baptist pastor, preached Sunday morning and night.

Visitors of Mr. and Mrs. Hillburn Henderson Sunday were: Mr. and Mrs. Virgil Lancaster, Jerry and Ginger Haynes, and Mr. and Mrs. Fred Haynes and Billie Don.

Guests in the Marion Ford home Sunday were: Mr. and Mrs. Grady McIver and children, Misses Lea and Betty Mitchell and Mary Catherine Fellers.

Miss Bell Henderson, County School Supervisor and Mrs. Ruth Lagow, visited the Trickham school Monday afternoon.

Luncheon guests of Mr. and Mrs. A. J. Martin Sunday were Mr. and Mrs. Chleo James and Roberta.

Mr. and Mrs. T. J. Paulson and children of Fort Worth spent several days with his sister and family, Mr. and Mrs. Key Bradley.

Horace Goodoin of Call Creek was a visitor at church Sunday.

Mrs. C. F. Shields was happy to have the following visit her last week: Mr. and Mrs. Elmer Haynes, Mr. and Mrs. Brenson, Mrs. Beula Kingston and Mrs. T. H. Vernon.

Mrs. R. D. Kirkpatrick visited in the O. R. Boenicke home Sunday evening and went to church.

The Trickham 4-H Club met last Tuesday, May 2, at the club room. Their sponsor, Mrs. Oscar Boenicke and Miss Beth Rawlings met with them.

Bond Featherston made a business trip to Fort Worth last week.

Misses Peggy Ford and Betty Mitchell attended the play given at the Brooksmith school last Thursday evening.

Mary Catherine Fellers spent last Thursday night with Lea Mitchell.

Mrs. Vernon and Frank Wells spent last week end with relatives

From where I sit... by Joe Marsh

Mud Lake Gets "Cleared Up"

County officers got a notice from the government not long ago, asking them to change the name of Mud Lake. Seems it's a pond, not a lake, by government standards.

Because it lies entirely inside our town limits, we asked to do the name-changing ourselves. Figured we'd think up a brand-new name. Mud Lake's really not very muddy—sort of pretty, in fact.

County people said go ahead, so we held a Town Meeting. Everyone suggested something. Windy Taylor thought "Taylor Pond" would be nice, because his place borders

it—for about 30 feet! But we finally decided to call it "Turtle Pond" in honor of the real owners.

From where I sit, naming that pond wasn't the most important thing in the world—but the way we did it was. Everyone offered his opinion and then the majority vote decided it. That's the way it should be—whether it concerns naming a pond, or having the right to enjoy a friendly glass of beer or ale—if and when we choose.

Joe Marsh

Statement of a rancher from San Angelo, on file at Humble Oil & Refining Co., Houston, Texas.

"I'll tell the world I'm sold on Humble Esso Extra motor oil"

The extra qualities of Humble Esso Extra Motor Oil have convinced thousands of motorists that it's the best they can buy.

HUMBLE ESSO EXTRA MOTOR OIL was introduced in July, 1949. Since then, thousands of Texas motorists have changed from some other motor oil to Esso Extra. Their demand for the extra cleaning, cooling and lubricating qualities of Esso Extra recommend this unique motor oil to you. Esso Extra is the only motor oil that combines detergent-dispersive action with superior wetting ability, anti-oxidizing quality and highest viscosity index... Change to the best motor oil you can buy—change to the oil users recommend.

tion KRLD-TV in Dallas this coming Saturday, May 13, at 6 p. m. The Indian Band includes in its 50-member personnel Coyita Griffin of Santa Anna. The band played here last Fall while on tour in this area.

In addition to the 6 o'clock television program, the band is also scheduled to play an earlier program at 4 p. m. over station WFAA in Dallas. Although the KRLD program is to be televised,

it will also be broadcast over the station's regular schedule.

Members of the band will stay in Dallas Saturday night. Sunday morning the group will present worship services at two Methodist churches there. The first will be an early 8 o'clock service at the Oak Cliff Methodist Church, and the second will be the regular 11 o'clock service at the Urban Park Methodist Church.

H. D. Club Has Supper & Program

Approximately 40 persons, members of the Santa Anna Home Demonstration Club, and their families met in the lunch room Monday night for a supper, and Mothers Day program. This was an appreciative affair, in connection with Home and Family Week. All agree this was one of the finest suppers ever given by the club.

After the supper, a very interesting program on Family Living and Mothers Day was given, with Mrs. Doug Moore, Mrs. E. K. Jones, Mrs. Arthur

Talley and Ellen Richards having special parts.

Mesdames Louis Zackary, E. K. Jones, Sam Rutherford, Sam Grant and Arthur Talley sang, "Where We'll Never Grow Old." This was followed by group singing.

The club presented Mother Standly with two beautiful pictures. Mrs. Standly is the only charter member of the club, now a member. Thorough all the years she has been a faithful, and cooperative member.

Very fittingly, several months ago, she was made Club Mother for life.

Mountain City Garden Club Meets

Mrs. O. L. Cheaney was hostess to the monthly meeting of the Mountain City Garden Club, Friday, May 5, with 13 members present.

Topics discussed were: "A Flower Show" and what flowers would be ready for a show in June. "Day Lillies," "Culture of Ferns" and "Trees" were also discussed.

Mrs. Gay gave a brief report of the convention of "The Heart of Texas Garden Clubs," held at Brownwood at the Country Club on May 3.

The Highlights of the Brownwood meeting included several distinguished visitors from Austin, Waco and other cities. The Club rooms were decorated with many gorgeous flower arrangements furnished mainly by the Brownwood women.

A display of corsages made by Garden Club women was a center of attraction throughout the day. The Blue ribbon was awarded to the lady who used the new Hybrid Day Lily in maroon shades.

Mrs. Gates of the Violet Crown Garden Club in Austin brought an interesting arrangement made from an exotic flower from Hawaii in pastel shades of pink and orchid.

Mrs. Alden Davis of Austin presided over the clubs reports of their years' work and their projects. The Austin women used as their project for the year, "The Cleaning out of City Alleys" giving us "something to write about."

The Ruth Circle Meets

The Ruth Circle of the W. M. U. of the First Baptist Church, met Monday afternoon in the church auditorium, at three o'clock, for their regular meeting.

At the close of an interesting and very helpful program, the members went to the Annex dining room, where they were served a dainty refreshment plate by Mrs. Seth Risinger and Mrs. Callie Gray.

Mrs. McCreary Has Bible Study at R'wood

When the Rockwood W. M. U. met at the Baptist Church Monday afternoon, in Bible study, Mrs. F. E. McCreary directed the study of "Psalms" 133 through Proverbs, Chapter 1. Members taking part in the study were Mmes. R. S. Fondren, J. T. Adian, J. W. Box, Ray Steward, Joe W. Wise, Eyan Wise, A. L. King, and Ray Caldwell.

T. E. L. Class Has Tea And Book Review

The T. E. L. Class of the First Baptist Church, were hosts to the ladies of the church, at a Silver Tea, and Book Review, at 3:00 p. m. in the church annex on Tuesday, May 2.

Those in the receiving line were officers of the class, Mrs. Edd Moore, Mrs. Carl Ashmore, Mrs. Walker Newman, Mrs. Lester Newman, Mrs. Walter Ferguson, and Mrs. Neely Evans.

Mrs. Mary McClure was at the register.

Mrs. Edd Moore, president of the class, had charge of the program, which opened by singing the class song, "Blest Be the Tie." Mrs. Byrd Arnold led the prayer.

Mrs. Harry C. Wigger reviewed "The Prophet of Little Cane Creek" by Harold Dye. The class color was carried out by decorating the room in beautiful red roses.

Refreshments of iced punch and white cake squares were served.

Plate favors were pansies tied with white ribbon. About 40 ladies were present.

Don Hunter Marks 9th Birthday

Mrs. J. A. Hunter entertained with a party honoring her son, Don, on his 9th birthday, Friday afternoon, at her ranch home near Rockwood. Don's classmates, including the Cub Scouts were guests.

After a regular Cub Scout program, games were enjoyed and ice cream and cake were served the guests and mothers present, including Mrs. Bill Bryan, Mrs. J. T. Avants and Larry, Mrs. Marcus Johnson and Nikki, Mrs. Tony Glass, Mrs. Tommy Briscoe, and Rev. and Mrs. H. E. Dutton.

PHILLIPS DRUG

Eighth Grade Students Has Dinner

The colonial theme was used in decoration and program, and the class colors of pink and white were featured when the eighth grade held a formal banquet in the school lunch room Saturday night.

The tables were placed in a square and laid with white linen, centered with runners of pink crepe paper. Bowls of pink roses, colonial dolls in pink frocks, and pink candles in milk-glass candlesticks were used. Place cards were hand-painted and were tied with miniature colonial bouquets. Jay Steward, class president,

was master of ceremonies. The Rev. J. H. Martin gave the invocation; Donnie Oaks read the history, and Roy Buse gave the will. Speaker of the evening was Supt. R. K. Green and Mrs. Martin was at the piano to accompany the singing by Joann Dann, Joan McClellan, Evelyn Shields, Evelyn Oakes, Ola Taylor, Nelda Steward, Joyce Smith, Ann Tatum, and Vonnie Akins. Teachers present besides those mentioned were Mr. and Mrs. J. A. Harris, Mrs. Frank Turner, Mrs. Jim Harris, Mrs. Willie C. Gilbreath, Mr. and Mrs. Bill Adams, Miss Alta Lovelady and Mrs. W. B. Sparkman. About 90 were present.

SCRIPTURES: Hosea, especially 11:1-4, 8:11-14, 13:14-15
DEVOTIONAL READING: 1 Peter 1:7

Forgiving Love

Lesson for May 11, 1950.

ALL RELIGIONS believe in God. But not all religions know the God who loves. Gods that rule, gods that threaten and punish gods that sit on high and cast down thrones... The mystery of religions is not in their plenty of gods, but in their lack of every religion that believes in a God capable of love. We Christians say that God is love. But already centuries before Christ the inspired Hebrew prophet Hosea was saying that the high God, the Holy God, not only can but does love his creatures on earth.

Dr. Foreman

Love With an IF

BUT HOSEA goes further than this. Even the religions that teach the love of God do not always understand it. That there are "favorites of heaven" is an idea common to many religions, ancient and recent.

The notion that God loves those who love him, that his love is a reward for good behavior, that he loves good people but not bad people, in short that he loves only the lovable—this is believed by a great many, but it is not true. To put it in another way: Many religions, and even some persons in the Hebrew and Christian religions, suppose that God loves us with an IF.

Some of the more primitive religions think of God as loving only if he feels like it, if he happens to be in the right mood. There is no telling when he may love and when not; he is as unpredictable as spring weather. The higher religions know better; God is not capricious and impulsive like a child.

But still sometimes even in better religions God is thought of as loving with an IF. If you love me (he is thought of as saying), I will love you. If you are good enough to love, I will love you. If you earn my love, I will pay you by loving you.

No IF in God's Heart

HOSEA HAD LEARNED a deeper lesson from God. Through his own bitter experience (see last Sunday's lesson) he knew that his own love for his wife outlived all the shame she had brought to his heart and home. In himself he knew, as a living fact, love for an unworthy and unlovable person. So—and so much more—God could, would and did love his unfaithful people Israel.

"God so loved Israel," said the prophet. "God so loved the world," says the Gospel. God's love is not the bargaining kind; He does not wait till we are "good enough." His love has no IF in it.

Suppose We Say No?

AT THIS POINT something must be said that would seem to go without saying, only there are so many persons who misunderstand the truth just here. God is love; we learned that in Sunday school when we were small, we have seen it in mottoes on the wall, we have grown used to the idea. But sometimes we twist this truth into something else.

We think, "If God is love then it doesn't matter much what we do. He is going to look after us and see that we come out all right. Nothing's going to hurt us because our loving Father is right here to protect us." This is a mistake.

Hosea teaches, and the Bible as a whole teaches, that God's love is not compulsive; that is, his love must be freely received because it is freely offered. We can say "No" if we insist.

And if we do turn our backs and run away, the consequences are terrible and not even God's love will keep us from them.

It is only the person who turns his heart to God who finds that love, like sunlight, casting out the fear and the evil from his mind and heart.

The Cost of Love

THE DEEPEST TRUTH of all is one which Hosea partly sees, but is fully seen only in the New Testament. God's love for sinners is costly. It is not a light thing, easily given.

As Hosea's darling of

C. A. Oliver, Pastor

Gomer cost him much, so the love of God for his wandering children costs him more. That this is true, Hosea realizes.

But to know what the love of God really costs, we have to stand in the light of Calvary. Paul speaks of the church of God, "which he purchased with his own blood." There can be no higher price than that.

Local Methodist Church News

In observance of Childhood Sunday and our quarterly general assembly, a musical demonstration was given by Miss Elsie Lee Harper and Mrs. Smith preceding the class sessions on the first Sunday. Appreciate decorations included a triptych of "Christ Blessing the Children" on the altar, and two life-like child choristers on the platform. "The Child in Our Midst" was the pastor's subject.

At the evening hour, at which time the high school seniors were honored, the subject discussed was "Self Discovery." In keeping with the occasion Miss Sandra Shields sang, "Now in the Days of Youth." Splendid attendance was noted

at the various services. It is hoped that the record continues, and that even more of our people become interested in the church.

A large group was present for the Monthly Men's Breakfast. Out of town guests were Rev. Bruce Cox and Mr. G. S. McClellan of San Antonio, who were guests the evening before at the Lion's Banquet and over night guests at the parsonage.

The women are well into their current mission study, "Missions at The Grass Roots." They are anxious that others join them for these timely discussions. Those attending the Guild Luncheon on Monday evening report a most enjoyable time together with plenty of delectable food.

Choir members are to be guests of honor at the Fellowship Supper, the 17th.

METHODIST HONOR SENIORS

Members of the graduation class and high school faculty were honored at the Methodist church Sunday evening. As guests were met at the door they were handed rose and silver badges, their colors. They were also given autograph folders emphasizing the same color motif. After the invocation, games, including "Recognizing Our Names," "Going to College," and "A Graduation Love Story" were enjoyed. Favors were miniature diplomas which cleverly revealed the future of the honorees. Delicious brick ice cream and

cookies were served by Miss Elsie Lee and Ruby Harper and Mrs. Mobley. The group attended the evening worship service which was planned especially for them.

Paul Tucker of Odessa and Joyce Peyton, made a trip to Breckenridge Sunday.

Mr. and Mrs. Bryan Blevins, Mr. and Mrs. C. W. Chance and children and Mrs. Mae Ferguson, all of San Angelo, spent Sunday with Mr. and Mrs. John Gregg and children.

Mr. and Mrs. J. W. Jordan, Jr. of Cisco, and Mrs. D. J. Weather, and Billie Franklin, of John Tarleton State College, of Stephenville, visited in the home of Mr. and Mrs. J. W. Jordan over the week end.

Mrs. Leland Goodheart and daughter, Janet, of Sacramento, Calif., arrived on Thursday of last week, for a two weeks visit with her parents, Mr. and Mrs. Walter Ferguson.

Mrs. Ella Stiles plans to go to Amarillo at the week end for a two weeks visit with her daughter, Ann Stiles. Her sister, Mrs. Joe Baker, of El Campo, is expected to come and stay with their mother, Mrs. J. W. Collier, while Mrs. Stiles is away.

SPECIAL: One Dozen Bem-burg Sheers, \$4.95 and \$6.95. Ladies Shop.

M. Sgt. and Mrs. Leonard Tyler, of San Antonio, spent the week end with Mr. and Mrs. Richard Bass.

Mr. Leonard Foster, of Hamlin, and Mr. and Mrs. Frank Sparkman of Coleman, were Sunday visitors with Mrs. W. C. Rushing and daughters.

Major Rex Golston returned to Santa Anna Sunday from a visit to Killeen. He left Mrs. Golston and the boys for a longer visit with her parents, Mr. and Mrs. D. W. Nickens.

FOR SALE: 1941 Chevrolet 2 door. First reasonable cash offer will be accepted. See Snow-Cone man at the Carnival.

Mr. and Mrs. T. J. McCaughan and Margaret, were in San Antonio, for the weekend, to arrange for Margaret's entrance into Trinity University next autumn.

Mr. and Mrs. E. J. Ralstin, of Fayetteville, Ark. and their son and daughter-in-law, Mr. and Mrs. George Ralstin and Chiquita, of Fort Worth, were week end visitors in the home of Mr. and Mrs. W. A. Standly.

Mr. and Mrs. Curtis Richardson and daughters, Barbara Ann and Eula Marie, visited his parents Sunday.

Mr. and Mrs. William Wheeler and Jimmie of Albany, visited Sunday with his mother, Mrs. Taylor Wheeler.

Mrs. Alhson Allen, the former Florence Hays, of Anity, Ark., has been visiting with the Tom Hays family.

"Campus of Champions"

Versatile Oklahoma A. & M. College students from all corners of the world come to study a variety of career subjects. The sprawling Sooner State center of knowledge is known far and wide as the school with the "campus of champions." (Story Page Two.)

Oklahoma A.&M. College Famous 'Campus of Champions' As School Goes Into 59th Year of Expansion And Building

By RICHARD M. CALDWELL

Quality, low cost and practical education has been the aim of the Oklahoma A&M College at Stillwater since its establishment by an act of the first Territorial Legislature in 1890.

In its fifty-ninth year, the college embraces four fields of service. These are: teaching directed toward technological and vocational education; public and extension services and research.

A&M has earned a reputation as "A Campus of Champions and Opportunities," through its top-ranking students in national competitions, especially in the Division of Agriculture. These have excelled in livestock, horticulture, grain research and agronomy.

Through its School of Engineering, A&M has become worldwide renowned as the scene on which the parking meter was researched. Its current work on the cyclone detecting device is equally spectacular. The college is equally ambitious in analyzing and perfecting its student body in its progressive divisions of Arts and Sciences, Education Oklahoma Institute of Technology (engineering), Home Economics, Veterinary Medicine and the graduate school.

Accent at A&M is on research and laboratory facilities as well as classroom direction. It is presently emphasizing quality student development in some 75 departments of its eight major training provinces. Botanists, plant pathologists, music, drama, speech, psychology, chemistry, business administration, geology, journalism and intensive business leaders, among others at college are not only developing master classes but meeting the highest professional educational standards.

Campus Is Famous

The 250-acre handsomely landscaped campus of small lakes, Williamsburg architecture, laboratories, classroom buildings, residence halls and other fine structures has come to be one noted for hospitality, student democracy and scholarship.

With some 50 major structures on the campus, the A&M College valuation exceeds \$40,000,000 at the present against a similar valuation of \$4,000,000 in 1933, including equipment, buildings, non-structural improvements and land. The college has title to or long lease on approximately 40,000 acres of land. Fifteen A&M Agricultural Experiment stations, either directly college or correlated with federal agencies, conduct directly applicable and scientific public service research.

The college has a broad out-of-state student enrollment, with some 100 internationals registered here from 30 nations. Current registration at A&M exceeds 12,000. It is estimated that 100,000 students have received degrees from the college. Over 12,500 GI's have availed themselves of the veteran education program to date and the college wartime facilities served over 40,000.

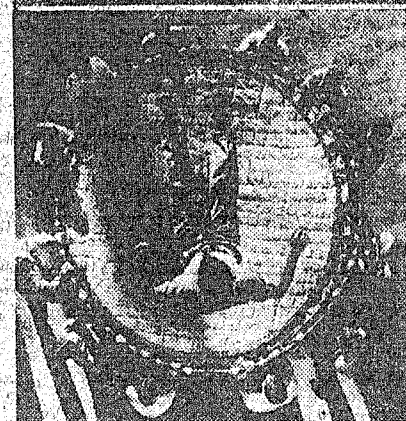

Out-of-state tuition operates on a reciprocal agreement with states mutually agreeing to drop this fee. Admittance from high school is on credit hours and diploma, not on rigid subject content.

The Research Foundation created in 1941, opened broadest avenues for scientific investigation at the college along with several other already existing ones serving prac-

tically every province of education in the college.

The year 1944 saw the creation of Oklahoma's Flying Farmers on the A&M campus, an organization that has progressed to national status and of international influence.

In 1945 the college set up this state's first major branch college at Okmulgee, serving both college and sub-college level students. As a trade school and training center for handicapped men and women, it has become regionally renowned. The transfer of some 5,000 acres at

Surveying or practicing fire drills . . . it doesn't matter. You'll find every kind of worthwhile training at Oklahoma's famous A. & M. College.

Oklahoma's War Camp Gruber to the college recently broadened the scope of agricultural educational services through joint projection of experimental and extension divisions.

Largest Project

The GI housing project at A&M at the close of the war was reputedly the largest and among the very first completed and studied as a pattern for college campuses throughout America.

In 1947, when the nucleus material of the famous Klockner-Humbolt-Deutz diesel laboratory came to A&M, over 214 other major bidders, it focused attention of power propulsion sciences to Oklahoma. Set up as the Oklahoma Power and Propulsion Laboratory, it is serving industry on a state, national and governmental scale, correlating the skills of engineering, chemical and other scientists on the campus in major projects.

On the heels of these came the announcement of the renaming of the Engineering School, founded in 1911, to the Oklahoma Institute of Technology, an act broadening all fields of engineering sciences. This was followed by the establishment of the School of Veterinary Medicine, as a southern regional center,

A&M's eighth major province of training, by the expansion of aeronautical studies and the Institute of Veterinary Research, whose field laboratory in this state is reputedly the nation's foremost in Anaplasmosis research and control studies of livestock diseases.

A&M has developed a highly-rated School of Architecture; one of the nation's few professional schools for men in Hotel and Restaurant Management; achieved the first major Land-Grant College accreditation for its field of Technical Training; perfected a unique Fire Training school, dubbed the "West Point of Fire Service" by the National Fire Protectors' Association; pushed soil conservation, sorghum, grain and agricultural chemistry, wheat and livestock feed research, animal breeding and soil sciences to top-rank ratings. Noted for its chemical, electrical, industrial engineers, mathematicians, commerce and education division specialists . . . the growth of the college has moved on a master plan, expanding its cultural and varied training fields.

The post-war forties have seen a continuation of the 25-year building program inaugurated by College President Dr. Henry G. Bennett in the late twenties.

Nine Buildings

The present \$15,000,000 building march of progress at A&M embraces nine major structures. These are a spectacular stadium and added facilities for a sports and athletic program that consistently lies in with regional tops; a \$4,500,000 Student Union; Home Economics and Vet Medicine centers; a men's dormitory for 1,100 residents and said to be the nation's largest residence hall under one roof; water and power plant, serving as a gateway for city water supply, a woman's residence hall and a modern dairy palace. A new library is on the immediate building agenda.

At the half-turn of the century, A&M looks back on one decade after another of advancement. Its graduates and former students are holding responsible posts throughout the world. To its campus come thousands of Oklahoma youth, club, church, educational and scientific groups throughout every year. Its short courses, its extension services have extended campus facilities until its boundaries are state and regionally wide.

The institution's dynamic president, Dr. Henry G. Bennett, in his twenty-second year of service, is America's senior Land-Grant College president in years of unbroken service at a single institution. For over 42 years an educational influence in Oklahoma, and the Southwest, he has served the government and U. S. Army on missions to Canada and Europe in the role of food and agricultural rehabilitation expert.

"Students at A&M are continuously making and sustaining the candid values of education they are applying in the practical tests of life," he said recently.

One result of the present investigation of atomic secrecy likely will be an increase in personnel for the Bureau of Investigation. J. Edgar Hoover, the G-Men's chief, has told the Senate-House Atomic Energy Committee that he needs at least 300 more men. It has been ascertained that there are 540,000 Communists and fellow-travelers in the U. S. A tenth of them, Hoover says, are dues-paying members of the Red party.

Smiles Come Back

I had a smile—
I gave my smile away;
The milkman and the postman
eman
I enjoyed it every day.
I took it to the shop,
I had it on the street,
I gave it without thinking
To all I chanced to meet.
I gave my smile away;
As thoughtless as could be,
And every time I gave it,
My smile came back to me.
—Julius Henry Cohen.

Terse and Verse

If a trouble comes your way,
Don't ask a friend to share it;
Leave it for a brighter day,
And you — just grin and bear it.

If a joy comes into view,
Go more'n half way to greet it;
Just feel sure it is for you—
And that's the way to meet it.

Full o' Philosophy

The early American Indians didn't go in much for agriculture. The boys hadn't figured out a system of parity payments.—Lubbock (Texas) Avalanche.

We learn from the radio that the best way to catch a rabbit is to hide behind a tree and make a noise like a carrot.

4-H Club Champ Always Wins Out

Perhaps it wasn't too much of a surprise to Texas 4-H'ers when Howard Altenhof, 20, won second place in the National 4-H Achievement Contest at the 4-H Club Congress in Chicago. After all, Howard long has been a recognized leader in Guadalupe, his home county, and the entire State of Texas. When one has a record of outstanding accomplishments such as Howard's, you expect great things for and from him.

In addition to his trip to Chicago, he received a \$150 college scholarship, both of which were provided by the National Committee on Boys and Girls Club Work, Chicago.

Howard has completed his eleventh year of 4-H Club work, and actually has sold more than 100,000 pounds of beef and 158,000 pounds of pork, and it all started with one pig. He has produced more than 10,000 bushels of corn, and this has gone to market through his cattle and hogs.

He was National Meat Animal Contest winner in 1947 and represented his fellow Texans at the National 4-H Club Camp in Washington, D. C., in 1948. He has put his profits back into his ever-expanding program and today he owns, with his father, a farm, all equipment necessary to operate it and plenty of livestock to stock it. All this resulted from his active 4-H work.

It has been said that Howard has accomplished in 4-H work what many an adult farmer fails to do in many years of farm operations, and we're inclined to agree. Howard Altenhof may well be one of Texas' outstanding farmers, because he has achieved what he set out to do—to make the best better!

Know Your Bible?

The names in the column to the left are the fathers of the men named in the column to the right. All are important figures in the Old Testament. Can you match them correctly?

Our Proven Plan for Business Men, Farmers, Lodges, Schools and Churches

A wonderful Spring and Summer business opportunity! Operate for private income, benefits, building funds. Our plan simple, profitable. No capital required. You furnish show location with seating (school, lodge hall, warehouse, etc.). We furnish films, screen, projection equipment, adv. material, tickets. All film, equipment fireproof, underwriter approved. All late talking pictures, westerns, serials available. Arrange for one show only or regular schedule. Old reliable house, now furnishing hundreds of successful operations. Write NOW for complete details, give 3 references and present occupation, no obligation.

STEVENS PICTURES, INC.
213 So. Pearl, Dallas, Texas

Army Veteran James Redford of Fort Worth (Tex.), whose career was turned to leather crafts by an injury in World War II. A veteran leather merchant, Dave Tandy, helped encourage the youth toward a profitable hobby that now keeps him busy filling orders from every part of the country.

Fort Worth Firm Assists Veteran In Leather Hobby

Since the end of World War II, craft work of all kinds has become increasingly popular, and thousands of veterans have turned to some sort of handicraft, such as pottery, woodwork, etc., but none have caught on like leather craftsmanship. Besides being the oldest and most beautiful known to mankind, leathercraft is also one of the most interesting and profitable crafts handed down to us through the generations.

The re-habilitated veteran has benefited more by this art than probably anyone. Leatherwork is most popular because it offers an easy way to adapt the skill of one's hands, and there is no end to the adaptability of leather itself. It is indeed profitable due to the relatively few people per capita now employed in leather industries. And veterans, who upon discharge found it difficult to hold regular employment due to handicap received during their years in the service, have turned to self-employment in seeking a career in leathercraft. Such is the case of army veteran, James Redford of Fort Worth, Texas.

Returning to his home town after discharge, he tried several jobs, but lost them because of a severe head injury that subjected him to amnesia and blackouts. Redford had first encountered leather work during a short stay in the William Beaumont General Hospital in 1944. With many unsuccessful attempts behind him in various forms of employment, he appealed to Dave Tandy, general manager of the Hinckley-Tandy Leather Company of Fort Worth, who recommended a local instructor in the art of leathercraft. With the assistance of the Veterans Administration Home Training Program, Redford secured the necessary equipment to pursue his new career at home. In a short time he had mastered the necessary skill for making all types of leather goods and de-

cidated to make leather carving his life work.

After a few months of concentrated application and help received from Hinckley-Tandy Leather Company in securing outlets for his finished leather products, his efforts began to pay off in earnest. In one month alone he received \$400 worth of orders from wholesalers and finally produced in one month an amazing total of over \$1200 worth of belts, billfolds, purses, watch bands etc.

Today Redford keeps himself busy in his home workshop filling the constant flow of orders he receives regularly from outlets in several states. The case of James Redford, rehabilitated veteran, who finally found his niche through leathercraft, is typical of thousands of people who have found leathercraft a profitable hobby or profession. But, leathercraft is so versatile, and flexible in its application and use, the demand never stops, and anyone, even with no experience and a small outlay of investment, can establish themselves in an interesting and lucrative business.

No man is stepped on unless he lies down first.

4-H Clubbers Will Beat Record of '49

Based on the increasing popularity of the National 4-H Poultry Achievement Program, the 4-H'ers should top their last year's record of raising a total of 8,000,000 chickens, turkeys, ducks and geese. Likewise, the enrollment figure is expected to pass the 150,000 mark, reached in 1949.

County extension agents and local 4-H Club leaders work with the youth, instructing them in newest methods and approved practices used in poultry and egg production. Members are encouraged to carry out the six main objectives of the program, which briefly are: Learn the place of poultry in the economy of the farm; acquire skill in poultry raising; assist in production of eggs and fowl to provide adequate supplies for food; appreciate the nutritive value of eggs; learn to grade and market poultry products; study scientific developments and apply the knowledge to home flock production.

The 4-H'ers carefully keep records showing production of birds and eggs and also general achievements in other phases of club work.

Question: Will hens lay well in their second year of production?

Answer: Old hens normally don't lay very well in their second year's production. They usually start to lay late, and then at a low rate. Most good poultry raisers plan to replace the greater part of their flock with pullets each year. Many house pullets only. It is only by housing a pullet flock that winter eggs can be obtained. May hatched chicks will start to lay in October or November, so it is not too late to start chicks for winter laying.

It is a hard lot that pretty women have to face. The average man won't believe they have brains, and the average woman won't believe they have beauty.

It's Fun to Get the Family In For Candy

Almost anyone will enjoy a box of homemade candy or cookies for special occasions. The children enjoy helping make the good things to fill the boxes. If you have no pretty boxes, save any small ones you can find. Let the children decorate them by pasting on the pictures from last year's holiday fancy cards or some paper. Some easy-to-make candy that is good for the children can be made from dried fruits. Dates with the pits taken out may be stuffed with several fillings.

A piece of nut meat, peanut butter mixed with enough orange juice to make a stiff paste, or a quarter of a marshmallow, are easy to do. They may be left plain or rolled in granulated sugar. For a different flavor, add one teaspoon cinnamon to one-quarter cup sugar and mix well.

You probably have your own pet recipe for fudge and panocha. Have you tried using evaporated milk instead of regular milk? You do have to watch the mixture more carefully while cooking to avoid scorching, but the results are smooth.

The Whole Family Goes For Brownies

Nut brown "brownies" with tall glasses of milk—what a treat for spring!

- 2/3 cup sifted flour
- 1/2 teaspoon double acting baking powder
- 1/4 teaspoon salt
- 1/2 cup butter or other shortening
- 2 squares unsweetened chocolate
- 1 cup sugar
- 2 eggs, well beaten
- 1/2 cup broken walnut meats
- 1 teaspoon vanilla

Sift flour once, measure, add baking powder and salt, and sift again. Melt shortening and chocolate over boiling water. Add sugar gradually to eggs, beating thoroughly. Add chocolate mixture and blend. Add flour and mix well; then add nuts and vanilla. Bake in a greased 8x2-inch pan in moderate oven (350 degrees F.) 35 minutes. Cut in squares. Remove from pan and cool on cake rack. Makes about two dozen brownies.

May Recipe

- 1 cup cooked Comet rice
- 2 eggs
- 1/2 teaspoon salt
- 3 teaspoons baking powder
- 1 cup milk
- 5 tablespoons melted shortening
- 1 1/2 cups flour
- 2 teaspoons sugar

Beat well the rice, milk, beaten eggs, shortening. Sift flour, sugar, salt and baking powder into batter. Mix only enough to combine. Bake in greased muffin pans. Yield: 12 average size muffins. Temperature: 400 degrees F. Time: 25 minutes.

Choosing Perfume Is Important Task for Clever Young Bride

The smart bride is the girl who plans well in advance all the details of her wedding. She wants to be her radiant, happy best on this day of days, and her alter appearance is sure to reveal the strain of any last minute alterations and preparations.

During those exciting pre-marriage weeks, you may spend hours shopping for the clothes for your trousseau and just the right gloves, hats, shoes and jewelry. And it is important that you use equal care in selecting that most personal of all your accessories—your fragrance. Whether you wear a wedding gown in the traditional manner or are married in a street dress of blue or one of the heavenly new mauves, you will want the aura of fragrance surrounding you to be as unsophisticated and feminine as your costume.

No heavy perfume for the fresh, radiant bride! Rather, you'll want a light, subtle scent to match the clear brilliance of your eyes. Take time to select the fragrance which is exactly the one for you. The myriad of delicate floral bouquets or fresh, spicy scents offer a wide choice to the discerning bride-to-be. The perfume expert in your favorite store will be happy to guide you to the right perfume. So that you may be sure that your selection is the right one, here are a few simple rules to follow.

Try the perfume on your own skin. Scents change on each individual, because the chemistry of the skin affects the fragrance. Always let the liquid dry before smelling it.

Don't try more than three perfumes at any one time. If you don't find the one that you like, take a walk around the store and come back to try three more.

Once you have found your fragrance, use it adroitly. A dab behind each ear certainly is not enough to envelop you in fragrance. Put perfume on all the pulse spots—in front of the ears, along your throat, at the corners of your mouth, on wrists and inside the crook of your elbows. Saturate a small pellet of cotton and tuck it in your

Emphasis on Measurements Is Timely As Garden Vegetable Season Gets Under Way

Film Star Barbara Hale shows her daughter, Jody, one of the first lessons in being a model grownup daughter—putting away her clothes after each laundry day. An annual Daughter's Day observance has been launched for such special training for youngsters throughout the Nation. Experts say it makes better-trained adults, too.

Correct measurement is so easily done and so obviously necessary, it is just about taken for granted. Coming down to cases, did you ever try to measure a "heaping teaspoon?" For instance, you can heap on more baking powder, let us say, sometimes than at others. Careful homemakers avoid, as they would a plague, such indefinite measurements as "heaping" and "butter, size of an egg." All measurements, of course, should be level.

Erma Meeks of the Hawaiian Electric Company provides us with just the appropriate verse to complete this discussion. Clever, isn't it!

She guessed the pepper, the soup was too hot,
She guessed the water, it dried in the pot.
She guessed the salt and what do you think?
For the rest of the day, we did nothing but drink.
She guessed the sugar, the sauce was too sweet,
And by her guessing she spoiled the meat.
What of the moral? 'Tis easy to see;
A good cook measures most carefully.

A Warning to All Homemakers

Your family meals are more apt to be low in vitamin C now than at any other season of the year. Nutritionists tell us that studies of the blood plasma of school children have shown that there is a deficiency of ascorbic acid or vitamin C during late winter and early spring. Here is the explanation: Many of the vegetables and fruits used for meals have lost part of their nutrients in winter storage. What to do until spring gardens are in production? Some of us farm folk like to "take to the woods" in the spring for wild greens such as dandelion, poke, water cress, dock, etc. In North Georgia one spring day, I counted seven edible wild greens only a few feet apart. Dandelion, dock, mustard or sheep sorrel, and purslane (pussley) may be used raw in salad, as well as cooked. Caution: all greens should be well washed, but never soaked. Wash and keep cold, if necessary to hold them for a while.—Sallie Hill in the Progressive Farmer.

Correct Make-Up Choice

Use the right make-up. If you don't feel qualified to select it, trust the experienced salesperson.

Menhaden is Uncle Sam's No. 1 commercial fish, and boasts a number of regional aliases. In various parts of the country its names include bughead, bugfish, oldwife, alewife, greentail, chebog, mossbunker, whitefish, bonyfish and fatback.

bra so that you yourself enjoy the scent as it rises.

Short Stories Based On Facts And Figures

A little known secret of transporting minnows for long distances is to carry in airtight containers. A milk can with a tight cover is ideal for carrying large numbers. One or two gallon, wide-mouthed glass jars are ideal for carrying smaller amounts. Place fresh water in the container, put in minnows and screw lid on tightly. When jar is opened, change water and replace tight cover. Minnows may be carried safely and generally will remain lively for 24 hours.

* * *

Two backwoods fishermen spotted a game warden coming toward them. One had a fishing license, the other didn't.

The warden saw one of the men break and run. He gave chase. After a long, gruelling run he finally

caught up with the man and asked to see his license. It was shown, and all was in good order. The officer left, muttering under his breath.

You guessed it: The man who didn't run also didn't have a license—but of course he'd vanished by the time the warden had caught his friend . . .

Here's a tip to housewives from the extension home management specialists of Texas A&M College on cleaning the grids in the waffle iron. They say that a paper napkin soaked with household ammonia and placed between the grids . . . and left over night will do the job. The ammonia loosens the brown cooked on accumulation of grease and it may then be wiped off or

rubbed off with steel wool. (This cleaning method is often used also for cleaning the inside of ovens.)

* * *

Question: Some of my growing chicks have been losing their feathers. What is the cause of this?

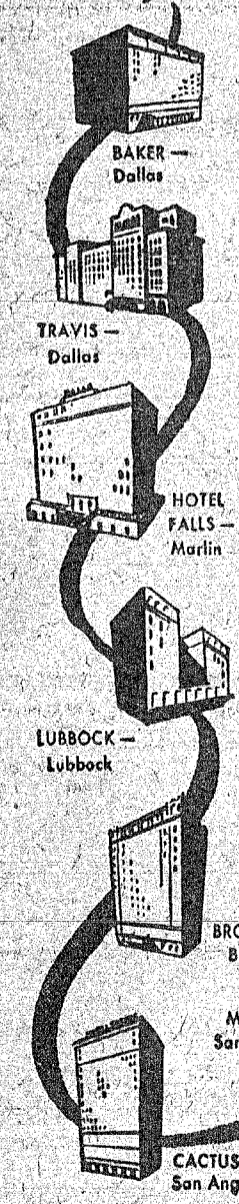

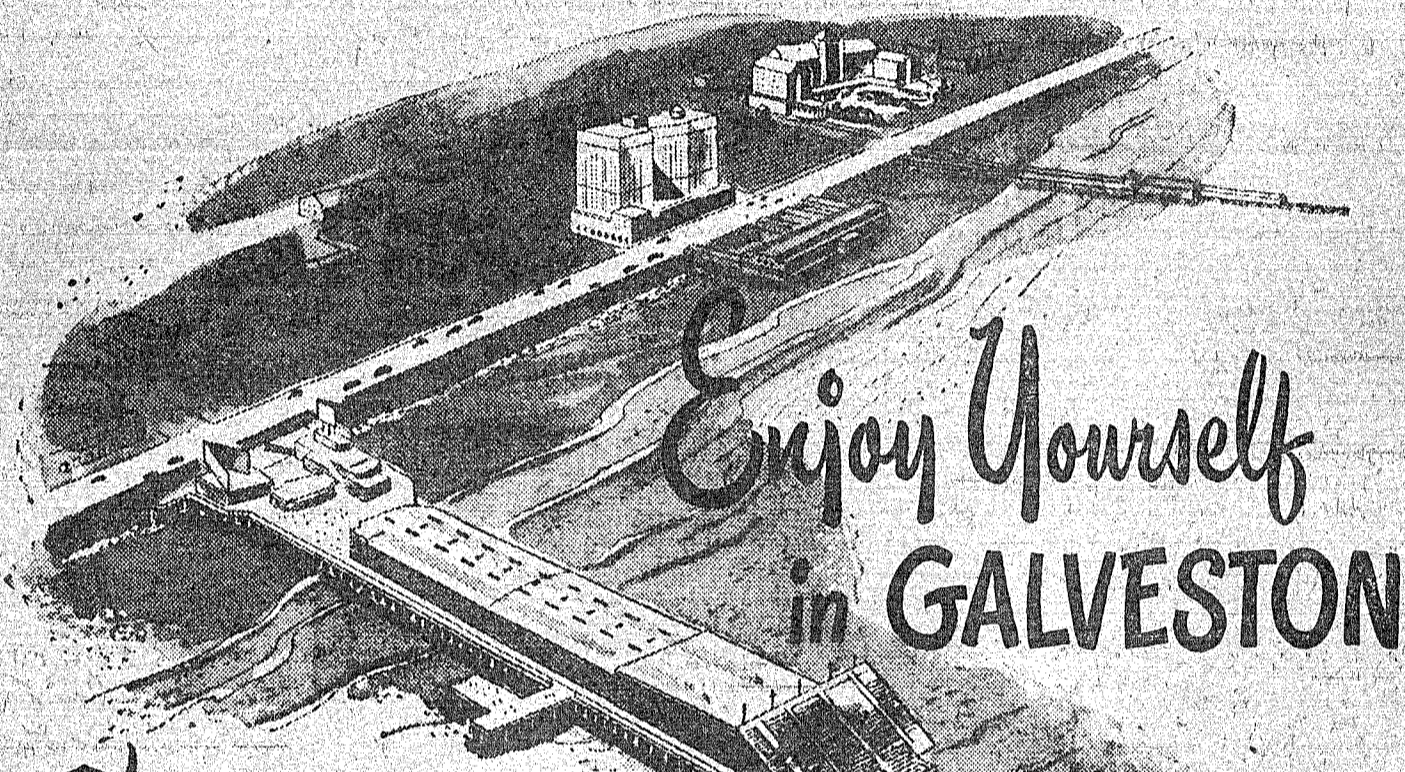

Answer: There are several causes. First, all chicks molt during the growing period. Second, there is an inherited factor, which is often found in the general purpose or heavy breeds which causes a tendency to slow feathering. Third, overcrowding and other poor management factors cause a loss of feathers in growing stock.

* * *

How a bat flies in the dark and does not collide with walls has been the subject of investigation for decades. It was established by Drs. R.

Galambos and D. R. Griffin (Harvard) four years ago that a bat sends out a note of high pitch which is reflected by a wall and heard. Whereupon the bat knows what it has to do. We have, then, something like radar, with sound as the disturbance to be reflected instead of a radio wave.

Prof. T. Hartridge (St. Bartholomew's Hospital Medical College, of London) published in 1920 the theory "that bats during flight emit a short wave-length note and that this sound is reflected from objects in the vicinity." There is no doubt about this now. In fact, bats can steer clear even of carpet threads or thin wires in complete darkness. Injure the ear of a bat so that he cannot hear, and he plumps right into an object.

"Remember The Alamo" Recalls Great Courage

"Remember the Alamo!" That Texas cry of freedom was uttered so long ago that many Americans today have almost forgotten it — yet that appeal was one of the most famous war cries of the world, and once stirred America to its very heart.

It grew out of that epic struggle in 1836 which gave Texas its freedom from long-hated Mexican rule and tyranny.

What was the Alamo? Simply a Franciscan mission built in a grove of cottonwoods that gave it its name, where now stands the City of San Antonio.

When the merciless Mexican tyrant, Santa Anna, marched into the region with 4,000 men to destroy the Texans who had dared to rebel against his authority, approximately 180 men assembled to oppose him.

Without even a ghost of a show in open battle, they marched into the ancient thick-walled mission and awaited the attack.

No Doubt About Outcome

There never was any doubt about the outcome. Death for the defenders was the only possible result. But those defenders were commanded by Col. W. B. Travis, and among them were Col. James Bowie, originator of the famous bowie knife, and Col. David Crockett. Here were three of the most intrepid frontiersmen that America has ever known.

From Feb. 23 to March 6, 1836, the determined Texans repulsed every assault.

Santa Anna's cannon finally made a breach in the wall, but the Mexicans paid dearly to get through it.

The men in the Alamo had fought for one purpose—to gain time for

Gen. Sam Houston to assemble a Texas army.

The force he got together was pitifully small, but the Texans fought with dauntless fury. "Remember the Alamo!" was the savage shout that rose from their lips. Probably never in history have men fought more savagely, more fearlessly. Nothing could stop them.

The Mexicans gave way. Santa Anna was captured. Mexican domination and Mexican tyranny were ended for all time. And Texas was free. A decade later she entered the Union, the United States of America, as the Lone Star State—proud of her citizens, typical of those who did so much to make America great.—Lewis E. Theiss in Grit.

Maybe a yawn is bad manners. But it is an honest opinion.

SOME NEW VARIETIES

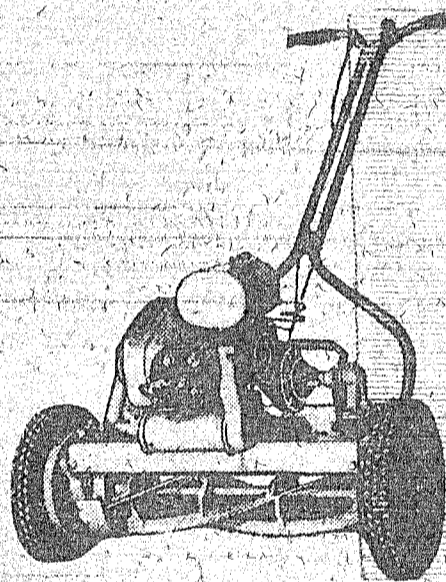

Home gardeners and in some cases commercial growers should try some of the new varieties of vegetables that are now being offered for the first time. Plant breeders are working continuously to improve and develop better and more productive crops. The new varieties are the result of this work.

Illegal Wealth

Joint sovereigns of Andorra, pygmy country in the Pyrenees, are the President of France and the Spanish Bishop of Urgel, but its people elect their own parliament every four years. A devoutly religious community, it has grown wealthy by smuggling and black-market trading.

The RANGE RIDER—and The EDITORS

By WELDON OWENS

ROBERT H. BRIDGES in Bob and Jess column in The Bethany (Okla.) Tribune-Review: "Automobiles have improved considerably in the last 25 years, but Oklahoma drivers have failed to make a similar advance. . . . One out of every three applicants for driver's license failed to pass the test last month. Almost 10,000 applicants passed, while 5800 failed."

Deplorable it is, Mr. Bridges, but they're still trying. Especially women. I heard a woman ask an officer the other day: "Tell me, Officer, which signal do I use when I start to turn a corner and suddenly decide not to," . . .

MRS. KATE COLLIER in The Oakdale (La.) Journal: "The president of a retail association whose membership includes stores in all parts of this country and Canada recently said that the three feet of space between the customer in front of the store counter and the retail clerk behind is the most important space in the country today. The maximum of consumer's goods, he added, is necessary for full employment."

WHAT MRS. COLLIER says is profoundly true. That space between the customer and the counter is precious. Just ask the man or woman who has begun to fill it up with waistline. And that stuff adds quietly. Somebody once said: "When old age comes, as it's bound to do, you'll hear it creeping up on you." Well, that space fills up without warning. But that's not the sad part of Mrs. Collier's warning. She adds that when retail sales fall to a seriously low point, we've got a depression on our hands. And at the same time, while the depression is on, there's less to eat, and the customer gets thinner, and the space between the customer and the counter gets big-

ger. That's where we came in.

CHAS. B. HALL in The McGregor Mirror: "This special edition of The McGregor Mirror greets arrival of Union Asbestos & Rubber Company to this section. There are only two other such plants in the United States."

THE MCGREGOR EDITOR'S 16-page edition was a whopper, and a credit to the entire staff. I worked on The Mirror back in the days when I had only one chin, and

BEST OF THE MONTH

A fellow on the jury asked the judge if he could be excused from serving.

"Well, why do you think you should be?" the judge asked.

"I owe a man \$25 that I borrowed, and he's leaving town today and won't be back for about three years. I wanna catch him before he gets to the train, and pay him," the jurymen explained.

"Brother, you're excused," the judge said. "I don't want anybody on the jury who can lie like that."

* * *

For fun and philosophy about the headlines of farm and ranch news, two products that have been favorites for generations, bring you the following program.

Sundays, 8:30 a.m.: Blue Tag Seeds and Feed.

Weekdays 6:15 a.m.: White Swan Coffee.

Owens

strangely enough, Charlie Hall cares naught for extra revenue from a special edition. So it is true when he says the edition was published for the sole purpose of greeting the new industry. The McGregor editor is one tutor in the fourth estate who was content long before he made his first million. A bowl of vegetable soup traveling its third day and fresh white onions used to paint his personality with a picture of contentment. And since his talented son-in-law, Thomas Edward Mooney, has moved in with Wife Bonnie and a baby, Mr. Hall's cup runneth over. Well done, Mirror staff.

C. K. MICK in The Smithville (Tex.) Times: "In the very near future, Dr. R. J. Rodgers, state veterinarian, will be in Bastrop County making TB tests on cattle. For all who are interested please notify D. B. McCombs, county agent, by postcard, with the following information: Name and mailing address, location of farm and number of cattle in your herd."

EDITOR MICK is doing a good favor with such publicity. Because, next to human beings, the cow is

the chief carrier of tuberculosis. However, we should not hold that against the lowing, cud-chewing dairy. She's a kind-hearted animal and one of man's best friends. Her cousin, the Brahman, wears a hump that breeders boast is an extra "seven-pound roast." It is well that science is working to freeze out the germs that invade Bossy's milk factory, and weekly newspapers are helping do the job through their columns. In the meantime, let not our judgment against the cows be too harsh. They're a patient lot to tolerate cold milking fingers on a wintry morn.

E. F. STAHL in The Melrose (New Mex.) News: "The government of this nation is dominated by the small towns and the rural areas—not by the great city populations. That striking fact is developed in an analysis of the United States Congress published in The American Press. The study shows further that 42 Senators and 132 Representatives have a weekly newspaper as their hometown paper."

THE PILLAR of democracy and Christianity still stand in the villages. There is no doubt. Where men and women sing from the waist up in church, and neighbors still borrow sugar and syrup, you'll find real living. Even if some of them bring back a borrowed quart of milk in a pint pitcher. The man who lives outside the metropolis should offer a regular prayer of thanks for not having to dodge traffic and feeling the freshness of pure air every day. I knew one fellow who was so happy after he moved to a little town that he would wake up during the night—laugh a while—then go back to sleep.

KONAWA (Okla.) LEADER: Mrs. Pearl LaMunyon recently sold her interest in the Konawa Peanut Company and is moving to Enid. She will be office manager and bookkeeper for the Enid Events.

SURELY Oklahoma editors will welcome Mrs. LaMunyon into the fourth estate—fresh out of the peanut business. Although Enid Events will gain, the peanut industry can ill afford to lose such talent as has Mrs. LaMunyon. The peanut was born in South America and has become a popular American family in recent years. Its hay, oil and butter are delicacies for man and beast. And 'tis said that no greater will power hath man than to eat only one salted peanut and quit.

THE OLD WEST TEXAN says nobody is entirely useless. Even the worst of us can serve as horrible examples.

It Happened

Snake Two-Day Battle

From West Virginia comes the story of a very unusual fight. While walking up Snyder Run, in Gilmer County, Simon Arnold heard a gurgling noise behind a big log. He was in a hurry and didn't stop to investigate. Next day, however, he heard a gasping noise behind the same log. He decided to check into the matter.

Behind the log Arnold saw a blacksnake, big around as my arm, and a big chicken hawk locked in a death struggle. Although held in the snake's coils, the hawk was still biting and clawing. One claw was buried in the snake's side, and the bird had pecked a sizable hole in the reptile's body. The grass was worn and beaten down where the two had been fighting for two days.

Arnold killed the snake. When the hawk was free, it attacked its rescuer. The man had to kill it, also. Arnold said he believed the hawk would have killed the snake since the latter was practically exhausted when beaten loose from its prey.

Gun Cranks Note

If you're a lover of guns and haven't seen the new Ithaca catalog—you've got a treat coming. It's crammed with guns, shooting tips and everything a gun crank loves. You can get it by sending 10 cents to Ithaca Gun Co., Box 6, Ithaca, N. Y. Ithaca, you know, is the gun for either righthanders or lefthanders. They make a safety on either side, and that bottom ejection of shells is the greatest improvement made on shotguns since smokeless powder! Write for the catalog and see what many sportsmen consider the top shotgun of this country is all about. And it's light to handle.

And while we're on the subject of guns, I want to tell you about a breed of "shootin' irons" that's getting to be known as "America's Finest Rifles." Roy Weatherby calls his creations "Tomorrow's Rifles Today" and they're absolutely the sweetest dreams come to reality that have popped my eyeballs in a mighty long time. Weatherby's, Inc. specializes in the magnum rifles, you know. And now, for the first time in history, this company announces an exclusive on chrome-plated rifle bores in their de luxe rifles. If the word "gun" does anything to you, then this company put out a free illustrated catalog you don't want to be without. Write for it at Weatherby's, Inc., Sporting Goods, Dept. WS-1, 8823 Long Beach Blvd., South Gate, Cal.

Success is the knack for getting along with some people—and ahead of others.

Cicero's Trip to Leonard's Is Important Event

By JOHN WELDON

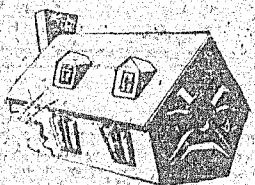

No wonder Cousin Cicero couldn't find his way home yesterday. He couldn't even find his way out of Leonard's. That is, until one of the courteous floorwalkers spotted him and helped him to the door facing his farm eight miles away from Fort Worth.

That Leonard's store is the biggest thing Cousin Cicero and I have ever seen since we helped Uncle Ide build a new silo before the war. They tell me the Leonard boys started out with a bank account that looked worse than an old pension check. Well, it's a lot different today.

Their food department is a shopper's paradise. A lone spreader, 22,000 square feet, and 200 feet is nothing but expensive, cold refrigeration to keep fancy stuff or chitlin's fresh for thousands of shoppers and sightseers every day. The place where they sell cakes and cookies and stuff like that is 75 feet long, all glass and shining prettier than dishes Papa has dried.

No More Waiting

You can go upstairs without walking. They've got some things they call escalators. Uncle Ide sure would go for them, because he doesn't like

to do anything that causes a fellow to have to move. Free parking is another thing. It really comes in handy when in a little 25x60 foot spot. Something big in the farm store, or their furniture department... or dry goods. You can't mention anything they don't sell. And while you're shopping, their loud speaker system always stays on the job finding "lost" children, or making emergency calls.

The building for the department store is a three-floor and basement layout, and the food building is a five-story and basement structure. And they're connected by a passageway.

We didn't get to meet the owners, but a clerk said their full names were Marvin

Leonard, Obie Leonard, Bob Leonard and Paul Leonard. The last two

are sons of "Every day it's like a Obie Leonard big family reunion" ard, the clerk said.

In the farm store, a two-story building, we never saw such a bunch of merchandise. All shining and new, and everything old-time, advertised brands.

Growth Is Fast

I don't see how anybody can grow so fast in business but the Leonard's have shown merchants in the South how to do it. Why, they say they will do nearly fifty million dollars worth of business this year. And if you'll try to move around real fast on some Saturday afternoon in some department, you'll agree they'll do it. More than 100 key supervisors are in charge of hundreds of clerks and other personnel.

The store is 32 years old, but that's all that's old. Buildings, ideas, merchandise are brand new. They

just spent two million dollars in an expansion program.

One of the men told me that their combined selling space for the store is nearly a fourth of a million square feet. I don't see how anybody but a bacteriologist can talk in the same figures as they do business in. They say it helps them save customers money doing business on such a big scale.

Anyway, it's a long way from the 25x60-foot space at N. Houston, where they started in December, 1918. And it's a long way from the old-fashioned way of doing business out of a cracker barrel.

I'm going back again when Aunt Sarah from Chicago comes. I want them to see how we do things in the South. And she won't worry about getting lost in Leonard Bros.' store. She wrote she's bringing a Boy Scout and a compass.

Pipes Good for Other Things, Too

GARY, Ind., (NPC)—Claud W. Gray of El Paso, Texas, is a steam-fitter with ideas. He has pipe dreams that are practical. He believes pipes can be used otherwise than as mere conveyors of water, steam and gas. This he has demonstrated with an invention that his friends confidently believe will net him a fortune.

Recently Gray applied for patents on a system of pipes that parallel the sides of windows and doors. The system includes wiring to operate, by electric current, solenoids that snaplock bars in and out of openings. The pipes contain glycerin. Sash cords are attached to vacuum cups in the pipes. Windows slide up and down by vacuum and gravity.

Banks and businesses like Brink's Express Company in Boston could greatly benefit by the installation of his system, Gray maintains. When the robber puts in an appearance, someone kicks a button that slams and locks all windows and doors simultaneously. Another button touches off the regular burglar alarms. Mr. Robber runs for exit. He is trapped. The police come and take him away in the "paddy wagon."

FROM CHINA TO NEW YORK'S PELL STREET—Mayor of New York's Chinatown, Shavey Lee (left) points out a landmark on Pell Street to Li Tsung-Jen, who was acting president of China until he was ousted from office early in March by Chiang Kai-Shek's announcement that he was "resuming the presidency." Mrs. Li (right) looks too. Friends gave the Lis a birthday party. Former President Li has been in this country for medical treatment.

Our Farm Expert Writes--

Business men and farmers of Arkansas are singing the praises of George Trollope, the man who is responsible for making that state a leader in the turkey-growing industry.

Just five years ago, Trollope "sold" Arkansas on the idea of raising poultry in general, and turkeys in particular, in order to obtain a balanced economy.

Today, farms from Little Rock to Conway, on to Ozark and up through the mountains to Missouri, are dotted with flocks of broad-breasted bronze turkeys that equal or excel any grown in this country.

Although the turkey business was

new to Arkansas farmers, Trollope was an old hand in the game. He had initiated wide-scale turkey programs in Texas and Colorado and saw each one make money for the communities producing them.

Trollope didn't confine his Arkansas efforts to talking, either. He worked personally with every farmer who wanted to go in the business; usually was on hand when the first poultts arrived.

Now the turkey growers of Arkansas know how much Trollope was doing for them in the early stages of the program—for the birds with the big drumsticks really are paying off.

YOU CAN'T MISS WITH THESE COMFORTABLE...

INDIAN MOCCASINS...

Every member of the family will want a pair of these comfortable Indian Moccasins. Typical western from their fringed cuffs to their drawstring ties... Made of washable natural colored elk (including soles). Ideal for either indoors or out... a perfect combination for wear with blue denim... rodeo... or sportswear!

Homeless Girls Get Home During Big Celebration

WHITEFACE, Texas.—Thousands of West Texans looked over Girls Town, U. S. A., recently, and were "mighty proud."

"We're mighty proud to be part of it," said booted, suntanned V. T. Brady, riding around on his Palomino horse as a member of the sheriff's posse of Lubbock.

The posse estimated it served "the biggest, best barbecued beef in the world" to 5,000 persons. Some of them came 400 miles just to look over this low rambling ranch house, stretched out over the plains of West Texas.

It's the first permanent residence of Girls Town, U. S. A., a home for homeless girls.

It will be the home of 12 girls living in the ranch headquarters of Girls Town now. And it will be the home of more girls who need a home until 64 fill up the 32 bedrooms.

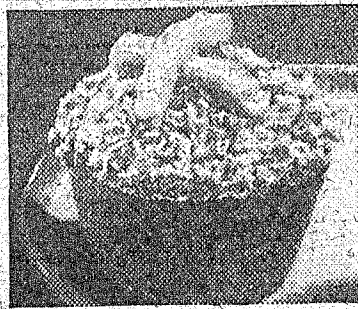

"I want you to envision seven residences like this," Miss Amelia Anthony, founder and director of Girls Town, told the crowd standing outside the residence. "A home for 500 girls. That is our plan for Girls Town within the next 10 years."

People came from all over West Texas—from Amarillo, Abilene, Littlefield, Odessa, Midland, Lubbock, Big Spring, Levelland, Sweetwater and Snyder. Six members of the sheriff's posse at El Paso—400 miles away—came to see.

About 60 members of the sheriff's posse from Lubbock, 52 miles away, were there with their best horses, fanciest saddles and Sunday boots. They're the ones who started at 5 p. m. on a recent Saturday barbecuing seven cows to serve the following day.

Cal Farley, who founded Boys Ranch at Old Tascosa, near Amarillo, Texas, 11 years ago, was there. The ranch is the home for 126 boys now.

"There's seldom a case, when we take a boy, that a sister isn't involved," Farley said. "She needs help, too. And you've got to take these boys and girls away from that environment that made them need help. There isn't any question but what a place like this is needed."

Gives "come-on" to any meal

CHEESE BRAN MUFFINS

No creaming, no egg-beating—one easy mixing this Kellogg-quick way.

- | | |
|-------------------------------|-------------------------------|
| 1 cup All-Bran | 1 egg |
| 3/4 cup milk | 2 tablespoons soft shortening |
| 1 cup sifted flour | 1 cup cheese, grated |
| 2 1/2 teaspoons baking powder | 1/2 teaspoon salt |
| | cheese strips |

- Combine All-Bran and milk in mixing bowl.
- Sift flour, baking powder, salt together into same bowl. Add egg, shortening, grated cheese. Stir only until combined.
- Fill greased muffin pans 3/4 full. Bake in preheated, moderately hot oven (400°F.) about 20 minutes. Place thin cheese strips on top of each muffin and continue baking about 5 min. 10 medium muffins!

America's most famous natural laxative cereal for diets of insufficient bulk—try a bowlful today!

It's Still Just Common Cold, Whatever The Neighbors Say

Suzanne Thomas, 17-year-old daughter of Mr. and Mrs. J. A. Thomas, 1828 S. Henderson, Fort Worth, wrote the following lamentation for The Daily Lass'O, Texas State College for Women, Denton, newspaper. The common cold definitely got a unique treatment here, and various editors are relaying it to their readers.

By Suzanne Thomas

Early in the afternoon it was an allergy. As the hours passed it became hay fever. By nightfall I was diagnosed by the many unlicensed physicians in the dorm as a "common cold case."

Some pessimist mentioned pneumonia. I happened to remember reading that 20,047 new influenza cases were reported in the United States last week. Frantically I rushed to my neighbors, seeking advice on how to cure a cold.

One friend recommended the old saying, "Feed a cold; starve a fever." This was no help because I was the victim of both cold and fever.

At the next door I was told that if I choked to hold my hands high above my head. By then my head felt so big I didn't think I could reach around it.

The next adviser suggested some old remedies her great-grandmother

practiced. "Try bear grease on your chest," she said. "If that doesn't help put blocks of paregoric around your neck to keep more cold germs from entering."

A set of roommates advised me to go to bed in a flannel jacket. That was a good idea, but the temperature was 80 degrees.

As I finished my 900th kleenex, I met a fellow sneezer. With tears in her bloodshot eyes she moaned that some just have to suffer.

Mustard plasters, honey, sulphur and molasses, heating pads and hot water bottles, rest, fruit juices and all sorts of drugs were some of the other "cures" I was advised to try. Oh yes, someone else mentioned the hot toddie, but I was afraid to run the risk.

When I finally returned to my own room I took a box of aspirin, blistered myself in a hot bath, drank a hot lemonade, went to bed and died.

P.S.: Don't take my advice. Go to Hygeia and get the proper treatment for the common cold.

* * *

Miss Thomas is a sophomore Journalism student at TSCW and will be sports editor of the excellent school publication next year.

Colleges Spend Money To Bring Rodeo Fans Fun

Famous educators of yesterday little dreamt that some day thousands of dollars would be spent for rodeo arenas at leading colleges.

Among improvements being made at Texas A&I College in Kingsville, Texas, is a \$10,000 rodeo arena, built on the college campus. Rodeo stars of this South Texas institution have become the college heroes, and the A&I Rodeo Club completed construction of pens and other arena necessities in preparation for the Intercollegiate Rodeo held in conjunction with the recent South Texas Fair and Exposition.

On the more serious side, residents and business men of Kingsville have reported raising more than \$40,000 of the \$50,000 they had pledged toward construction of the A&I Student Union Building.

The Kingsville Chamber of Commerce recently gave a check for \$40,000 to Pres. Ernest H. Poteet of A&I. Another \$4,000 has since been raised. President Poteet, accepting

the check on behalf of the college board of directors, said: "We are deeply grateful to the people of Kingsville for their interest and financial support."

Meantime, the rodeo improvements show a pronounced tendency of husky South Texas college boys to bust broncs and bulldog steers. A year ago the rodeo club was not even recognized by the college. Today it is called the "darling of A&I." The rodeo arena was built by college boys who volunteered to work on it—and even obtained much of the lumber free of charge from Kingsville firms. Even the girls have worked on the arena. It's the college cowboy who is the "big man" on the campus now.

Grim Warnings On Insect Wave Given Farmers

A grim warning that vast hordes of crop-destroying insects may swarm over the South Plains of Texas and much of the Southwest this year was given to farmers by state, area and county agricultural experts.

Favored by a mild winter, an extra-large supply of insects and eggs are present in the area, waiting only for favorable climatic conditions to develop in field-scouring armies.

Indications point toward a heavy infestation of insects in 1950, due largely to a mild winter and a large number of over-wintering eggs and adult insects," read a report submitted to D. W. Sherrill, county agent, Lubbock County, Texas, by Guy E. Carpenter, entomologist stationed at Lubbock on the district agent's staff.

"Whether this infestation materializes depends to a great extent on weather conditions, especially moisture," Carpenter pointed out.

Carpenter and Sherrill said the announcement was not intended to alarm farmers but to alert them so that if insects do appear in heavy numbers, proper control methods may be applied before too much damage is done.

Grasshoppers apparently pose the most serious threat of coming forth in great numbers. Carpenter indicated, but the wheat aphid or greenbug already is making a strong bid for unpopularity.

The northern counties of the South Plains, where wheat is a major crop, already have greenbugs developing in damaging numbers.

Permanent Memorials

Remember the grave of your loved one, with a most gorgeous permanent remembrance. Wreaths, 18-in. overall, \$2.25 each. Sprays, 14x30-in., each, \$2.25; "midget" grave blankets, 20x40-in., each \$4.25. Grave blankets, 30x80-in., each \$7.50. Hearts, 18-in. overall, each \$3.25. Crosses, 18-in. overall, each \$3.25. Stars, 18-in. overall, each \$3.25. Pillows, 20-in. overall, each \$4.00. The most beautiful and gorgeous products ever made, decorated and lacquered, will stand any kind of atmosphere. Prepaid to your door.

BRULE VALLEY NURSERIES AND EVERGREEN CRAFTS, Brule, Wisconsin

Fruit Shipments Decline in Texas

AUSTIN, (Special). — Rail shipments of fruits and vegetables in Texas totaled 7,246 carloads in February as compared with 9,670 in January. Grapefruit juice canning in Texas for the 1949-50 season through Feb. 25 totaled 2,601,205 cases, falling 39 per cent from a year earlier, the Texas Cannery Association reported. . . . Twenty-one businesses failed in Texas during February as compared with 21 in January and 12 in February, 1949, Dun & Bradstreet reports. . . . Charters were granted to 329 firms with a capitalization of \$6,032,000 in February, 1950, as compared with 368 charters issued in January with a capitalization of \$6,393,000.

No one is entirely useless. Even the worst of us can serve as horrible examples.

There's plenty of room at the top because someone is always falling asleep and falling off.

MOTHER KNOWS BEST!

News and Comment About Farm and Ranch

Dust and Drouth Lashing the Life From Sooner Soil

ANADARKO, Okla.—An elderly farmer squinted grimly into a biting, blinding sandstorm which pushed dunes of dirty pink top soil across his once-fertile farm.

"I'm not giving up," said J. A. Lane. "Dust and drouth came before and we licked it. We can lick it again."

Lane's 160-acre farm lies in the middle of a "potential dust bowl," which government agencies say extends over 150,000 acres of southwestern Oklahoma. The area hasn't had a soaking rain in six months. An unceasing wind gnaws at Lane's farm, spreading a cancerous growth of dunes and kicking up dirt clouds that swirl far across country.

Seen as Act of God

Lane views the desolation of his farm as an act of God. He prays for relief—for rain.

About 350 farmers within a 10-mile radius of Lane's place share his longing for rain, but many of them are better off than he.

Only a few hundred yards from Lane's devastated farm are growing crops, lush and green in amazing contrast.

That land has been handled by modern soil conservation methods different from practices of the 82-year-old Lane, who has worked the same land since 1907.

Was Just Unlucky

Lane knows that dry weather is the basic cause of his trouble.

"I was just unlucky," he told me. "We didn't get anything planted as a cover crop before the last good rain. My land is naked. It doesn't have any protection from the wind."

Local dust storms rise over a 60,000-square-mile area in Caddo County, Okla., every day or so. The gritty clouds have spread across the entire Southwest and Middle West a few times but they form more frequently here.

The dunes of drifting top soil encroach on Lane's farm yard, piling around his outbuildings like snow banks. In some places the dunes are drifting from eroded land onto the growing crops of adjoining farms. —Carter Bradley, United Press Writer.

YOU NEED IODINE

Small but steady quantities of iodine are needed by the body for normal growth and development, healthy skin and hair, mental alertness, physical vigor as well as a preventative for goiter. The best source for this needed supply is "iodized" salt.

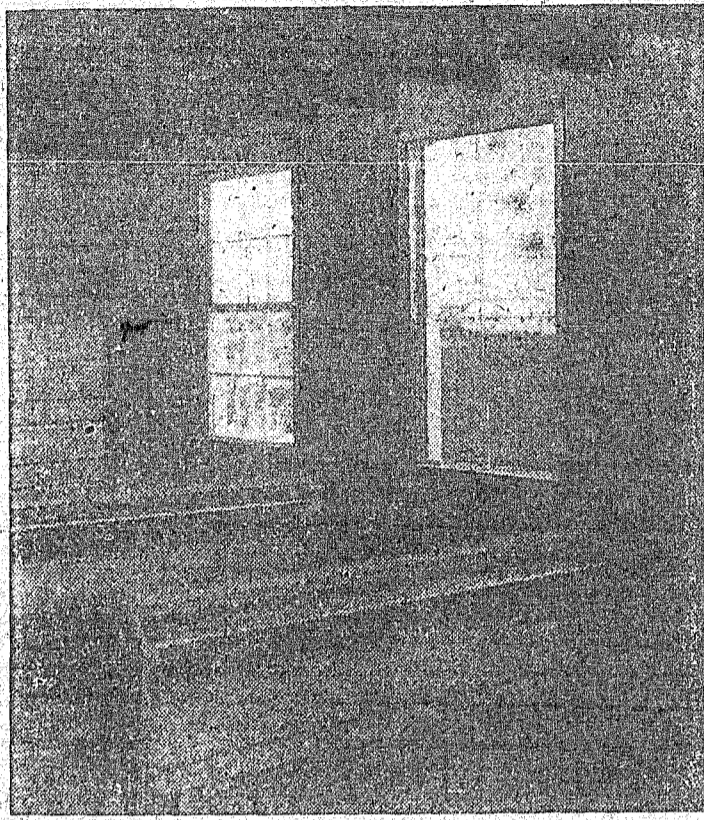

By choosing a floor carefully, small rooms can be made to appear larger, large rooms can be brought down to size. Warm colors make a cold room inviting, cool colors "cool off" a warm room. Light-colored furniture can be brought into focus against a dark floor; dark, bulky furniture can be lightened up with a light-colored floor.

Paradox: It is easier to tell identical twins apart when they are together than when they are apart.

STARTED CAPONS

COST far less than turkey poult, are easier to raise, bring premium prices all year 'round and are preferred by many over turkeys. The demand for CAPONS exceeds the supply. When you're looking for greater profits in poultry—turn to CAPONS. We sell mail order only. Our chicks are blood-tested, SURGICALLY CAPONIZED and taken thru the most tedious period for you. They grow large, fast and heavy. Information on growing and fattening CAPONS sent with each order. For further details and prices, write to,

WALTER'S POULTRY FARM EAST NORTHPORT AIR SHIPMENTS
NEW YORK made to all parts of
the United States

Added protection for the poultry flock now may be obtained through the use of improved building materials. The walls of this laying house, for example, have been lined with asbestos-cement flat sheets. These easily-applied sheets keep out rats and other rodents. They're peck-proof and fire-resistant as well. Ease of cleaning helps promote sanitation and ward off poultry diseases.

Triplets Back At Home On Native River Front

JONESVILLE, La.—The 2-week-old Hardie triplets are at home—but they aren't expecting many visitors.

Even the doctor who spent three days bringing them into the world isn't planning to go see the thriving babies.

"It would take me too far away from the clinic," said Dr. N. G. Nasif.

Home Is Houseboat

Home for the babies is a four-room houseboat, anchored two miles up the flood-swollen Ouachita River. They share it with their parents, Mr. and Mrs. Lester Hardie, and seven other children.

Dr. Nasif said the three children, Jodie and his sisters Julia and Judy, have ceased to be a local attraction.

And even if people wanted to see them, they'd have to go to a lot of trouble, the doctor said.

People would have to get a boat to get to the Hardie home.

Each Gains Pound

Dr. Nasif said each of the babies has gained a pound. Jodie, born March 7, weighs 6 pounds. Julia, born the next day, weighs 7, and Judy, born March 9, is the heaviest at 8 pounds.

Papa Hardie's luck seems to have changed for the better since his three blue-eyed, brown-haired babies arrived.

Hardie, a commercial fisherman, suffers with chronic bronchitis and neuritis caused by years of living on the damp river, Dr. Nasif said.

Waits for Ebb

But the two-week rest while his babies were in the clinic seems to

have helped him some, the doctor added.

The triplets are getting little special care, the doctor said. They share the same bed and are on the usual diet.

Dr. Nasif said they received donations—canned milk and baby food, about \$400 in cash, clothing, bedding and money for a washing machine.

Prevention Only Means to Control Bang's Disease

Brucellosis or contagious abortion is a widespread infectious disease, caused by the organism *Brucella abortus*, that affects all classes of dairy and beef cattle. All animals are susceptible, but brucellosis is most prevalent in pregnant cows and heifers, where the disease germs localize in the reproductive organs and udder. Undulant fever in man is caused by the same organism, and may be contracted by drinking raw milk from infected cows or by handling infected animals. Healthy herds generally become infected by the addition of diseased cows or heifers.

The only noticeable symptom may be the premature birth of a dead calf, which, if it occurs, usually takes place between the fifth and eighth months of pregnancy. Retained afterbirth, vaginal discharge, sterility, and decreased milk production are among the chain of events that often follow infectious abortion. An infected animal rarely aborts more than once or twice in succession, although it usually continues to react positively to the blood test and should be regarded as a dangerous spread of disease to non-infected animals in the same herd. The rapid agglutination test, properly conducted and interpreted, is a dependable means of diagnosis.

Prevention is the only means of control. The following management control practices are worthy of consideration: (1) Do a blood test; segregate or dispose of infected animals. (2) Practice rigid sanitation. (3) If possible, raise your own herd replacements. (4) Avoid outside breeding. (5) Provide clean maternity pens for calving. (6) Purchase only blood-tested negative animals from negative herds. (7) Isolate all herd replacements for a 60-day re-test period.

This First-Grader Can Fly, She's 11 Years Old But Hasn't Learned to Add The Simplest Numbers in School Yet

Not many first graders can fly, but the Akron, Ohio, public school system has one who can.

With her scholastic background, this one should be the brightest pupil in school. But she's 11 now and still can't add two plus two.

Poor Peggy! Other pupils have written many stories about her. The stories all have been filed away carefully by Miss Alice Blair, first grade teacher at Leggett School.

Born in School

A few choice titles are "Peggy Flies to School," "Peggy Likes Good Boys and Girls" and simply "Peggy Is a Dove."

Daughter of two ring-tail doves brought to school by a teacher, Peggy was born in a nearby room and adopted by Miss Blair and her pupils.

The teacher soon became expert at repairing broken wings and curing other bird ailments. Peggy's influence started outpourings of sympathy for whatever sick animals Miss Blair's pupils could find. And they found plenty of them.

Just Won't Leave

Peggy spends each day in school, but at night she is bundled and Miss Blair takes her home—along with other feathered creatures that might be on hand at the time.

When the birds recover from BB wounds, narrow escapes from cats or near starvation, Miss Blair releases them from her back yard.

But not Peggy. She's been given lots of chances, Miss Blair says, but she won't leave. She's devoting her life to the first grade.

Destroy weeds and grass as soon as they show above ground. Cultivate quite shallow, as deep cultivation will destroy vegetable feed roots.

It's Circus time, and six-year-old Sam Mason got caught at a familiar trick. President Roy Stamps of the famous Gainesville Community Circus is doing the catching. A special show was being held for photographers only. (Photo by Ed Miley, courtesy of Dallas News)

Children of the World Lost a Great Benefactor When Famed Dentist Died

Children lost a great friend a few days ago. Death claimed him.

Most of them had never met him, because he worked in his laboratory out at Baylor University, Dallas, Texas, from early in the morning until late in the afternoon. His labing until late in the afternoon. Lots wasn't feeling very well. He always explained that he had to finish something before he went away so the "little folks won't hurt so much."

This friend—Bernhard Gottlieb—was a very famous man in the grown-up world. He was a dentist, a doctor of medicine, a teacher and a scientist.

But most important to kids and their friends all over the world—he found out why their teeth decay and hurt. Better still, he taught dentists a simple and inexpensive treatment to materially reduce decay.

Because of him, more children can eat candy without the pain of a "sweet tooth." Kids who are just getting their permanent teeth some

day may never have a cavity if they see their dentist at least twice a year, getting this treatment. It makes the teeth stronger, whiter and decay resistant. Some tests during the last eight years have proved it will also help their moms and dads.

The "treatment" is a simple matter. The dentist saturates the teeth with three liquids. Dr. Gottlieb called them zinc chloride, potassium ferri cyanide and silver nitrate.

The first two produce a hard, white metallic salts which is water resistant, while the silver nitrate gives extra protection for the back teeth. The salts penetrate thousands of tiny canals which run from the outside of teeth into the softer dentin. In pictures of teeth Dr. Gottlieb took for many years, he saw that bacteria, always present in the mouth, traveled down these canals through the hard enamel to the inside to start their destructive work.

Blocking of these canals was the reason he believed that fluoride applied to the teeth had been partially successful (20 to 40 per cent) in reducing decay. Fluoride chemically attracts calcium, which blocks some of these canals, but does not block them as thoroughly as the three other liquids, he said.

Veterans of World War II, already busy spending nearly \$3 billion in dividends on their national service life insurance, have been promised another dividend in 1951. It will not be nearly as large as the payment now being distributed, but it will total many millions.

AGE AND YOUTH

McCormick was 23 when he invented the reaper, but Verdi wrote an opera at 80. Westinghouse was only 23 when he invented the air brake, but Goethe finished writing "Faust" at 80. Thomas Jefferson wrote the Declaration of Independence at 33, but Justice Oliver Wendell Holmes at 90 was still writing brilliant opinions. — Jerry Fleishman, in Trailer Talk.

Hey, Kids! Here's Good Memory Game

Take 15 to 20 familiar objects—a toothpick, a thimble, a cup, a salt shaker, a button—and place them haphazardly on a table.

Have each of your party guests come into the room and look at the objects for one minute. Give each a sheet of paper and a pencil as he leaves the room.

The object of the game is to see who remembers and is able to write the names of the most objects on the table.

A variation of the game is to divide the guests into two sides and give one point for each item each person remembers. The side with the most points after the papers are checked wins.

Cane With Half-Dimes Given Mrs. Washington

Among exhibits of the Federal Hall Memorial Museum in New York City is a walking stick ornamented with a silver half-dime, said to be the first U. S. silver coin ever struck. The story is it was minted in the presence of George and Martha Washington and presented to Mrs. Washington. The half-dime piece was discontinued in 1873.

U. S. mints also have turned out 3-cent and 2-cent coins. One 3-cent piece, of silver, introduced in 1851, saw wide use until it was discontinued in 1873, after almost 43,000,000 had been minted. Another 3-cent coin, of nickel, was issued from 1865 to 1889.

The bronze 2-cent piece was authorized during the Civil War. Withdrawn in 1873, it was the first coin to carry the motto, "In God We Trust."

Did You Know?

Beavers sometimes attain a weight of 60 pounds.

In winter the lynx grows on its feet tufts of hair that serve as snowshoes and enable it to travel over soft snow.

In summer the weasel is yellowish brown. In winter its fur is white and known as ermine.

The spotted skunk is often called the hydrophobia skunk, but it has not proved more susceptible to hydrophobia than any other animal.

Unlike the whitetail, a mule deer when flushed will run a short distance, then look around, thus giving the hunter a standing shot.

Riddle of The Week

What has a white gown and an orange cap? A lighted candle.

What does everybody want, then wants to get rid of as soon as he gets it? An appetite.

Flying fish simply glide. They have no "wing" muscles to make actual flight possible.

Some needlefish move through the water vertically, weaving their bodies from side to side.

RUPTURE-EASER

A strong, form fitting, washable support. Back lacing adjustable. Snaps up in front. Adjustable leg strap. Soft, flat groin pad. No steel or leather bands. Unexcelled for comfort. Also used as after operation support. For MEN, WOMEN and CHILDREN. Mail orders give measure around the lowest part of the abdomen. Specify right or left side or double. We prepay postage except on C.O.D.'s. PIPER BRACE CO. 308 E. 12th, Dept. 000 Kansas City 6, Mo.

SPORTS

There was too much wind and too much dirt in it—so rattlesnake hunting wasn't up to par in Okeene, Okla., and the deadly diamondbacks got a break.

But some 2,000 persons ignored the swirling dust storm and attacked the nearby gypsum hills to capture almost 350 rattlers.

The weather—with 50-mile-an-hour wind—chopped this year's take almost in half from previous years. The rattlers, which hibernate in canyons during the winter, just don't like this dirt.

So the snakes stayed at home and weren't receiving the hunters.

About 3,000 other persons from 19 states walked around this small North Central Oklahoma town and looked at the snakes the hunters carted back.

* * *

JIM MITCHELL and Bill Kawalski, a couple of hunters from Enid, Okla., hit the towering hills. They were quilted with dirt when they returned here—but they had four rattlers jailed in small sacks.

They were proud—as all hunters are—of their catch. They especially talked about a captured four-footer. "He's a good one, this one," said Kawalski, a first-year man in rattler rustling.

And Mitchell added:

"I had to get down on my hands and knees and crawl in under a cliff for that baby. He struck at me once and I got out of there fast. I went back after him and he was ready to strike again when I slipped my snake stick noose around his head."

* * *

IT'S AN ANNUAL get-together, this hunt conducted by the International Association of Rattle Snake Hunters. And the folks of Okeene—called "Rattle Snake Gulch" during the two-day hunt—go all out to entertain their visitors.

The out-of-towners can take in a couple of sideshows—featuring snakes, of course.

Like the one named "Fearless Fosdick."

Arthur Jones of Carlsbad, N. M., removes his shoes and socks. Then, barefooted, he enters a pit packed with scores of rattlers.

One of them bit him a couple of years ago, but this year he finished his day-long show without a mark.

* * *

JONES ALSO challenged all-comers to a rattler milking contest. Five persons—four men and one woman—accepted. But Jones, the professional, ended the victor. He milked three snakes in 30 seconds and got four CC's of the deadly venom.

Two trophies were awarded. L. L. Shipman and H. H. Tomlinson, farmers from Watonga, Okla., captured the longest snake—63½ inches.

John G. Burke of Middlebury, Vt., took the trophy for coming the farthest distance to the hunt.

The Oklahoma Flying Farmers also got into the act when their entry—Sue Johnson, 17, of Thomas, Okla.—was crowned the association's "snake charmer."

good idea to try out the fishing within 10 to 12 months after the pond is stocked. If the fish are keepers, fish the pond as much as possible.

How to tell how the fish are getting along—If fishing gets poor and stays poor for a season, the chances are the pond is overstocked. This can be checked with a minnow seine between July and October. Make several hauls along the shore. If you catch many tiny bream and a few fingerling bass, fish are in balance.

Joe Louis Will Make Exhibit Circus Tours

Joe Louis, for 11 years the awesome Bronx bomber of boxing, says he will not return to the ring.

Instead he will start an exhibition tour of South America early next month and then make a \$1,000-a-day swing through Canada with Dailey Brothers Circus. Six days weekly he will exhibit training techniques with the circus.

Louis, who rode a pair of explosive fists from an Alabama cotton patch to an honored niche in ring history, has been showing definite signs of a comeback for weeks on his current southern tour.

He went so far as to say it would be rare to be the first retired undefeated heavyweight champion to return to the ring and recapture the world crown a second time.

Last month, though, he went into a long huddle with the owners of the circus and the new development was confirmed in Waco, Texas.

Louis, nearing 36, arrived in Waco from Austin, Texas, by car. Attired in blue slacks and a sport shirt, he talked briefly with reporters in the office of the College View Inn, a hotel for Negroes overlooking Waco's

Paul Quinn College. His Waco exhibition opponent was Corp. J. H. Homer, Camp Hood, Killeen, Texas.

Louis, took in a double-feature movie before the fight for relaxation. Louis is an avid western movie fan, his manager, Marshall Miles, said.

In a formal statement drawn up with Miles' aid, Louis said:

"After due consideration by Marshall Miles and Manny Seamon, my trainer, I will not return to the ring to try to regain the heavyweight championship. Instead, I will make an exhibition tour through South America and on my return will join Dailey Brothers Circus on May 24 for a tour of Canada."

He thanked the public, press and radio for "being so kind to me throughout my career." Louis retired March 1, 1949.

Hauser Hits Most Homers

Strange as it seems, Babe Ruth, conceded the mightiest slugger in baseball annals, doesn't hold the record for the most homeruns in a single season. The Bambino's mark of 60 for the 1927 season still stands as the top all-time performance in the big leagues, but a fellow named Joe Hauser lashed out 69 in 1933 while playing for Minneapolis in the American Association. Incidentally, Tony Lazzeri, later a star with the New York Yankees himself, equaled Ruth's total when he smacked 60 roundtrippers in the Pacific Coast League in 1925. Clarence Kraft's 55 for the Fort. Worth Cats in 1924 is still the Texas League record.

Leon Hart, Notre Dame's all-American end, is the first football player since Johnny Mack Brown seriously considered to have a real chance for film fame.

Narrow minds think nothing right that is above their own capacity.

Wrestles Bear

ASBURY PARK, N. J.—Two-ton Tony Galento, once a heavyweight boxing contender, returned to the ring in what was a bear of a match. Tony boxed a three-round exhibition with a 500-pound bear at Asbury Park's arena.

Promoter Roland J. Hines said the New Jersey boxing commissioner, Abe J. Greene, okayed the match.

Farm Ponds Supply Fish

Visions of lazy summer afternoons under a shade tree will lure many southern farmers and ranchers to stock their ponds and lakes with fish this spring. But there are lots of questions which must be answered satisfactorily before such dreams become reality.

There are questions about stocking rates, fertilizing, control of undesirable fish and best kind of fish to stock.

These questions can be answered by information recently released by the Soil Conservation Service.

What is the best pond?—A pond of not more than one acre can provide all the fish the average family can use. New ponds are better than old—you can start them right. The watershed should be protected from erosion. It is best to have a drain pipe to permit draining all the water. Edges should be two to three feet deep, and the pond should be fenced.

Which are the best kinds of fish?—Experience has shown that bass and bluegill bream can be managed most effectively in farm or ranch ponds.

What production can be expected?—Unfertilized ponds support 25 to 200 pounds of fish per surface acre of water. Fertilized ponds support 200 to 600 pounds.

How to increase production?—Commercial fertilizer (6-8-4 or 8-8-4 is best) added to the water at the rate of about 100 pounds to the surface acre per month from April to November usually increases production tremendously.

When to start fishing?—It is a
