

## Peanut Bowl Game Tickets On Sale

The Eastland Jaycees would like to take this opportunity to announce that tickets are now on sale for the Annual Peanut Bowl Football Game which will be at Maverick Stadium in Eastland on Saturday, September 19th. They may be purchased at the Rexall Drug in Ranger, Dean Drug in Cisco, and the Maverick Barber Shop in Eastland.

We hope to have one of the biggest parades in the history of the Peanut Bowl. Herman Alsup is in charge of the parade and he has mailed invitations to all riding clubs and bands within a one-hundred mile radius of Eastland County. One of the main attractions will be the Mosha Shrine Temple Motorcycle Club. They will ride in the parade, then bring up the end with a riding exhibition. A mass band show is also planned for the game.

Plan now to attend this annual event, urges Darby D. McCrary. —GP—

## Texas A&M Career Day Set For Oct. 10

school students throughout the state are being invited to the Texas A&M University Agriculture and Engineering Field Day October 10th.

Dr. R. C. Potts, associate dean of agriculture, said exhibits will illustrate "the exciting and challenging fields of agriculture and engineering." Faculty and student representatives will be available to answer questions.

He said the exhibits will be set up in DeWare Field House on the west side of the football stadium. They will be open to the students and the public from 8 a. m. to 4 p. m.

The dean said October 10 also is the date of the A&M-Texas Tech University football game which starts at 7:30 p. m. End-zone tickets will be available to students and their sponsors at special low rates and can be purchased in DeWare Field House.

Potts said the career day is sponsored by the Colleges of Agriculture and Engineering.

## Notice To School Lunchroom Patron

We have been notified that the Federal Milk Program was not extended past September 1, 1970. This was the program whereby the Federal Government shared the cost of any extra cartons of milk over the one carton served with the lunch. With the reimbursement from the Federal Government, we could sell the milk for 5c to the students.

Since the 5c is well below what we pay for the milk, we can no longer sell it for 5c. Effective on Thursday, September 10, 1970 all EXTRA CARTONS OF MILK WILL COST 10c. Remember that the change does not affect the regular lunch program which will still include the lunch and one carton of milk at no change in price. The 10c is for any Extra Milk above the one served with the lunch.

## Prospects Of Bumper Peanut Crop Fades In Area

Peanut growers in Eastland County believe there is no longer a possibility of a bumper crop this year. "It is just a matter of too little rain too late" says County Agent De Gordon. He says it is impossible to predict the size of the crop at this time because conditions vary so much within the county. He thinks there will be high yields produced by individual farmers, but other farmers will not make enough peanuts to pay for the harvesting. Some areas of the county have received good rains since August 14 and other parts have not had more than an inch of rain since May.

He said the Gorman area was probably the driest peanut producing area of the county. Some dry land peanut fields in this area do not have any peanuts under the vines. The irrigation peanuts around Gorman have also suffered. D. B. Warren reports that their irrigation water isn't adequate without some help from rain.

The picture is much brighter in some parts of the county, Gordon says. Crops in the Carbon area look good. The county agent thinks some good crops will be made in that area. More rain and warm weather will be needed to mature dry land peanuts.

Farmers report that the lesser cornstalk borers have caused considerable damage again this year. The agent said it is hard to find a field where insects have not reduced yields. —GP—

## Time To Control Weevils On Pecans

Now is the time to spray pecan trees to control pecan weevils. De Gordon, Eastland County Agent, said the pecan weevils destroyed a estimated 400,000 lbs. of pecans in Eastland County last year. Previous to last year the weevil was not considered a real serious threat to pecans in Eastland County, Gordon said.

The adult weevil is brownish in color and about three-eighths inches long. It looks much like the cotton boll weevil except it has a longer snout. The female chews a hole in the shell and deposits her eggs in little pockets in the nuts. Creamy white grubs with reddish brown heads hatch and feed inside eating the kernels. The grubs get to be about three-fifth inches long. When they reach maturity, grubs chew a hole about one-eighth inch in diameter in the shell, emerge from the nut and drop to the ground in late fall.

The adult weevil usually emerges from the ground after rains in late summer. Gordon said large numbers of these weevils were found August 31 and September 1st.

Two different materials may be used for weevil control. Guthion is recommended for commercial orchards where cattle do not graze. It should be used at the rate of two pounds of 25 percent material per 100 gallons of water.

Homeowners should spray yard trees with Sevin to control the weevil. Trees in pastures where cattle graze should also be sprayed with Sevin, the county agent suggests.

Gordon said if honeydew aphids are present Malathion should be added to the spray solution, since Sevin will not control aphids.

If mildew or other such diseases are present the agent recommends adding a fungicide such as Du-Ter, Cypex, Maneb, or Polyram to the spray solution. Trees should not be sprayed after shuck begins to split. —GP—

# Panthers To Open Season On Friday Night At Hawley

The Gorman Panthers will kick off the football season on Friday night when they travel to Hawley to take on the Bearcats in an 8:00 p. m. encounter.

The Hawley team is expected to be a real fine ball club this season and will be a real test for the Panthers to open their grid season against.

Injuries have hurt the Panthers thus far in the season. Jackie Selman is still out with his injured foot and in practice this week Steve Patterson, starting end, received an injury to his ankle which is expected to sideline him for an indefinite time. Also Kenneth Butler, a fullback, got his finger stepped on causing a severe injury which will keep him out of contact for several weeks.

In the scrimmage against Early on Friday night the Panthers were much improved over the scrimmage with Albany. Mark Arnold did a good job at his defensive halfback position. Quintin Wright showed much improvement at his tackle position on offense. Jimmy Guthery caught several passes playing the right end position, and Johnny Scitern also grabbed several aerials from his halfback post.

The Panthers are looking much better but are still lacking the spark that is so necessary for the team to settle down and get their performance and timing to the essential point. However, we look for the Panthers to find this spark and fire when they go onto the field for the season opener at Hawley Friday night. Because surely they know they will need to do their very best to come out on top in this game. Hit, Panthers, Hit!

There is a line-up and schedule for the Panthers printed in the Panther booster ad elsewhere in this issue. —GP—

FINE RUN — Kenneth Butler, fullback, is shown being stopped following a fine run on Friday night. Other Panthers in the picture include Mrs. H. Roberts (31) and Steve Eaves (71).

## NEW GRANDSON FOR MR. AND MRS. SHORTY WELCH

Maternal grandparents are Mr. and Mrs. Shorty Welch of Gorman and paternal grandmother is Mrs. Angila Donato of Panama. Mrs. Doubleday is the former Virginia Welch. —GP—

PASS INTERCEPTION — A fine defensive effort is shown above by Rudy Espinoza as he really put out to come up with an interception in the scrimmage on Friday night.

Mr. and Mrs. J. C. Cook visited last week in Houston with their daughter, Mr. and Mrs. B. B. King.

Ethel Williams has returned from a visit in Rochester with her daughter, Mr. and Mrs. T. E. Benson.

**THE AMAZING PLANT BULB**  
The bulb is a special underground stem which enables a plant to live through the winter. Like a seed the bulb holds within itself the undeveloped future plant. Unlike a seed the bulb has much stored-up nourishment, and a plant grows more quickly from a bulb than a seed.

The tulip, narcissus, lily and hyacinth are flowers grown from bulbs. The gladioli are grown from corms. Corms are like bulbs, except bulbs live on from year to year and corms die every year.

Our most important job is to have the flowers you want, when you need them. Our stock is always complete, and we happily supply your needs whenever you call.

The Senior Citizens met at the Fire Hall at 2 p. m. Tuesday, Sept. 8 for games of 42, 84 and Dominoes, with time out for cookies and punch.

The following were present: Stoker (Curley) Richards, (Compound) Easter, (Shorty and Bidder) Littlefield, Newton and (Double Six) Bennett, (Honest and Bossy) Bennett, Flora Perrin, Nola Underwood, Grace Skiles, (Big Man and Mama) Henderson, Eleotra Tatum, Charles Harris and Gladys Harris, S.O.S. Chairman.

The following went to Comanche last Wednesday for a noon luncheon with the Senior Citizens: Mr. and Mrs. George Bennett, Mr. and Mrs. Chester Henderson, Flora Perrin, Nola Underwood and C. C. Easter.

My, what a delicious meal, just

go and try their rattle snake steaks smothered in onions, some delicacy, fit for a king. We played 42, 84 and dominoes and enjoyed fine fellowship.

See you next Tuesday, if you're not too lazy to come be with us. Honest George

**Here's something else owners say about Long Peanut Combines**

**"It's the Thrifty One"**

When it comes to up-keep costs it's a downright miser! Throughout, this machine is built to last. Special permanently lubricated bearings seal out dirt and dust. All gears and sprockets have been specially hardened to hold up longer under the rugged conditions found in peanut harvesting. Fewest number of moving parts mean fewer to wear out, fewer to cause trouble.

Some owners have run LONG combines for four years and spent less than \$150 total for repairs! Not only do you spend less money, you have less down-time... more harvesting time.

**CHEVY'S NEW LITTLE CAR IS OPEN FOR BUSINESS.**

We call it Vega. We also call it "the little car that does everything well." Because it does.

**Everything? Everything.**  
Vega moves well, stops well, steers well, rides well, handles well, responds well, passes well, travels well, parks well, wears well, and is priced well under what you'd expect to pay for such a talented little car.

In our highway tests, Vega has been getting gas mileage in the neighborhood of the little imports, which isn't a bad neighborhood.

Yet unlike your average little car, ours steps right out when you step on the gas.

The engine is a specially designed overhead cam four with a lightweight aluminum alloy block. It turns slowly and quietly at turnpike speeds, with power to spare.

Disc brakes are standard in the front. So are bucket seats, except on the truck.

How we doing so far?

**Numbers speak louder than words.**  
The wheelbase is 97 inches.  
Total length is just under 170 inches, or nearly four feet shorter than a full-size Chevrolet.

Height of the coupe is just 50 inches, nine inches lower than the leading import.

Width: a nice stable 5 1/2 feet. Weight: 2,190 lbs. for the sedan. Engine displacement: 140 cubic inches.

Fuel economy: about 25 mpg, with the standard engine and transmission, in our highway tests.

Horsepower: 90. You can order 110. (80 and 93 hp, SAE Net.) Seating capacity: 4 adults. What it all adds up to is a lot of little car.

**Three cars and a truck.**  
Vega turned out so well that we couldn't turn out just one.

So we're turning out four: the sporty little hatchback coupe shown open and closed in the foreground below; the sedan, on the right; the Kammback wagon, on the left; and the little panel truck, in the rear.

Oh, and a special GT version of the coupe and wagon which we'll show you later on.

**September 10th is Opening Day.**  
All 6,300 Chevrolet dealers are handling Vega, so you shouldn't have to go very far to see and drive one. Chevy's new little car is open for business. Look into it.

## My Visit to Germany

By Cassie Sue Nelson

I left Dallas Love Field on July 1, 1970 at 2:35 p. m. on a Pan American Jet, on my way to Germany to visit with my brother, sister-in-law and niece, Jimmy, Maggie and Tena Lyn Nelson. Jimmy is stationed with the Army in Germany.

It was my first plane ride and I sure did enjoy it. We arrived in Chicago at 5:30 p. m. I changed planes there and got on a big one that was the biggest one that they make. They called it a 747 Jet. We got on the plane at 7:15 p. m., but we got on the runway and the power on the airplane wouldn't go so we went back and they fixed it and finally we got off at 9:15 that night.

The food on the plane was very good. They served steak fillet, green beans and one little potato. The next morning they

served us a hot roll and orange juice or coffee.

We landed at London, England at 1:30 a. m. London time. Their time is 6 hours ahead of our time. We left London at 12:20 p. m. and landed in Frankfurt, Germany at 1:30 p. m. three hours behind schedule. Jimmy, Maggie and Tena Lyn were waiting for me. They took me to their home in Grossgrunlach, but they were making preparations to move to another house in Stedom, Germany, vacated by another army couple coming back to the States. The house in Grossgrunlach was a two story house. Their home has electricity, but many of the houses there do not have electricity. Each house is fenced in with door bells connected to the gates. No one can get in unless the tenants push a button to let them in.

Germany is a lot different from our country. The weather was mild and it rained a lot. They sweep and mop the streets, and they sweep the ground. Some streets are made of brick and they are very narrow.

The people have to go to the Economic Exchange System (EES) Center to get their money exchanged for stamps. All purchases are made with the stamps. There are no credit cards. The women buy their food daily for each day's meals, rather than in large quantities. They walk to the markets. Snitzels (steak) is their favorite food. German bread is very hard when you eat it. They drink beer like we drink water. Even the children drink beer.

Bicycles are their main type of transportation, and their bicycles have to be inspected. Only the rich have cars, and most of the people are poor.

Carts loaded with grain and hay have to be pushed to the mills. Boys and girls from age 9 and older push these carts.

Their hot water heaters are very different from ours because they have to put wood and coal in their heaters to heat the water.

The girls wear short dresses. Men wear walking shorts everywhere, even to work. Most of the women are about 30 years old when they have their first children.

The boys and girls go to school in shorts, and they go for only a few hours in the mornings, and not always every day. They take their lunches. School is held for eleven months of the year. They are out part of July and August.

The German army is a lot different from the United States Army. They are drafted for six years, and they have to live on post, never getting to go to town. They must wear their military uniforms at all times for the first two years. They do not get much money, and they don't have a PX or Commissary privileges.

When the Germans visit other people, they shake hands when they come in and when they leave. Also they usually bring flowers. Even numbers of flowers are for lovers and sweethearts and they are usually roses. Odd numbers of flowers are for friends. They don't believe in artificial flowers. They have real flowers in balcony boxes with lights focused on them. A real pretty sight.

They play their national anthem at the beginning of every movie. I attended one German movie, but could not understand it, of course, so did not particularly enjoy it.

ADD TO MY VISIT TO Germany  
We saw some hippies just like here in the States.

We also had hamburgers at an American hamburger stand.

We went to a place called Garmish. It has very pretty mountains. There was snow on these mountains and we went up on a cable car and the snow was knee deep.

We also visited in Fulda, Germany with Ray and Ellen Kandy. Ray is stationed there with the Army. They are from Carbon. Here at Fulda we saw a castle made of gold, and wood-carving shop where cuckoo clocks, figurines and beer steins are carved. We also visited a zoo. It was similar to our zoos only larger and it had no snakes. The Germans don't believe in having snakes in the zoo.

I met one sixteen year old German girl that spoke English, and enjoyed visiting with her.

The time had come to go home, so on August 16 I left Frankfurt at 8:30 a. m. and arrived in Chicago at 1:50 p. m. We had to go through customs and they were very strict, too. You can't bring meats, tobacco or drugs into the U. S. Some Germans were trying to bring marijuana into the U. S. in some candles, so I was in the line waiting to go through customs for two hours. During this time my flight to Dallas left, and I was advised that I would be put on the first available flight to Dallas. I called my mother and daddy at Love Field, and after a seven hour wait I finally left Chicago at 8:30 p. m. and arrived in Dallas at 11:35.

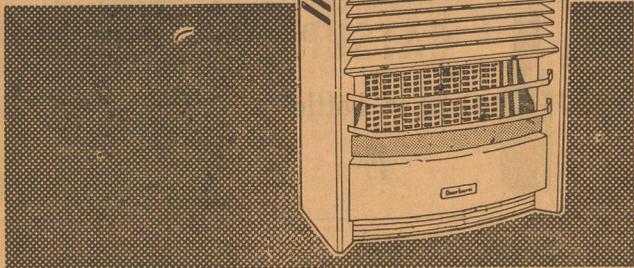

I sure did enjoy my stay in Germany. I think that anyone who has a chance to go over there, should go because it is a real interesting place to visit.

**WASHINGTON**  
"As it looks from here"  
**OMAR BURLESON**  
Congressman 17th District

WASHINGTON, D. C. — SOME PEOPLE IN RESPONSIBLE positions continue to issue predictions that campus unrest and violence will increase during the 1970-71 school year. Such statements tend to encourage the very thing they seem concerned about. If expected, the radicals will not be disappointed by the expectations.

PREDICTIONS ARE RISKY BUT THERE are some indications that violence connected with protest may have passed its peak and is being checked. For one thing, the force of public opinion, which is being heard. Another sign, which offers hope, is what appears to be a stiffening effort on the part of school administrators and faculties towards preventing and curbing the disruption of their institutions. This may be one and the same thing but taken together it can restore order on campuses.

IN WISCONSIN, WHERE A BOMBING RECENTLY occurred at the University, the Green Bay paper wrote "We have had it, right up to here." Reaction of this nature is in evidence in California and Kansas.

MANY FACULTY MEMBERS AND SCHOOL ADMINISTRATORS are hearing the voices of public opinion and know that unless there is restraint a wave of repression, which is opposite the permissiveness and so-called academic freedom, which some have been on the front line defending, will no doubt assert itself.

SUPPORT OF THIS VIEW WAS RECENTLY expressed by Dr. Sidney Hook, Professor of Philosophy at New York University and a member of the University Centers for Rational Alternatives, who is identified as a liberal, when he testified before the Scranton Commission on Campus Unrest.

DR. HOOK SAYS THAT IT IS SHAMEFUL that the militant

radicals have had faculties who encourage attacks on the academic freedom of their colleagues. He further said that "opportunistic administrators with flexible backbones have been chiefly responsible for the decline in academic freedom. They have lacked the moral courage to uphold their professional standing as teachers and seekers of the truth."

THIS "FAILURE OF NERVES AND INTELLIGENCE," in Dr. Hook's view, has provided American colleges and universities with the "greatest crisis in their history."

DR. HOOK DESCRIBED HIS EFFORTS and that of associated scholars, as proposing to restore true academic freedom and have presented an orderly plan for that purpose.

HE CALLS FOR IMMEDIATE ACTION at the beginning of this

school year, for a clear statement of principles and rules governing the expression of dissent. Under his plan, faculty, students and administrators acting together would define the kinds of impermissible conduct and behavior. Punishment would be spelled out with clarity.

VIOLATORS WOULD BE DEALT with first by student-faculty groups properly selected and finally by court injunctions, if the first efforts failed. If disorder results in arson, assault, vandalism or the prevention of other students from pursuing their studies then a committee of teachers and students should accompany police to restore order. The plan provides for actions against guilty teachers and students with no amnesty and no appeasement in areas of violence.

WAY CAMPUS order can best be restored. Again public opinion is asserting itself more strongly with each outburst of disgusting violence. Officials at these institutions where these unlawful acts are occurring are beginning to realize that unless responsible students, teachers and administrators face up to their responsibility that outraged parents, alumni and legislators will impose a harsher plan of their own.

**a study lamp with this tag!**

These lamps cover the work area with the proper light for long hours of homework. The high-level illumination is diffused, so that there's no direct or reflected glare. And the wide upward-and-outward light distribution reduces the sharp contrasts that add to eye fatigue.

Study lamps come in a variety of attractive styles. And the tag certifies that the manufacturer has met the rigid specifications of the Better Light Better Sight Bureau and the Illuminating Engineering Society.
