## The Leader Christian

### MOTHER FINDS HELP ...In Religion!

I FIND THAT IN RAISING CHILDREN I MUST HAVE HELP ABOVE THAT WHICH EARTHLY FRIENDS CAN GIVE. MY CHURCH FURNISHES THAT HELP WHEN I AM FAITHFUL IN ATTENDANCE

All scripture is given by inspiration of God and is profitable for doctrine, for reproof, for correction, for instruction in righteousness.

2 Tim. 3:16

The Christian Leader will make its first appearance on Friday, October 23. Its editors and owners are not strangers by any means, but on the other hand are well-known in church and social groups over Eastland County, and have the welfare of this area at heart.

Ray B. McCorkle, former editor of another Eastland publication, will be editor of the new publication. Much of his time will be devoted to the upbuilding of our churches, and his column "Reflections From Life", will appear on page one each week. This is a spiritual column devoted to the advancement of our churches to Christianity in general. The paper will be Christian, but non-denominational, and protestant ministers are invited to send in news from their churches.

These items will be used in so far as space permits. Just remember the paper is Christian, though strictly non-denominational, and we trust contributors will bear this in mind.

Eugene Baker, commonly known as "Kernel Gene", is owner and publisher of the Gorman Progress, is co-owner, and for the time at least, The Christian Leader will be published in his Gorman offices.

It will be a joint partnership, with the editor "getting it in" and Mr. Baker "getting it out."

There are to be several features, including the editor's "Around the Square" column, a school page and plenty of church and county news.

Subscription rate is \$1.50 per year in Eastland County, and \$2.00 elsewhere. Subscriptions will be accepted in Gorman or in Eastland at P. O. Box 148.

Our Churches always lead in the march of civilization, and that is the reason most American citizens are willing to honor and support them.

We had this in mind when we named our new publication, THE CHRISTIAN LEADER. We shall strive at all times to give you fair and unbiased general news, but our Churches will not be neglected.

Excelsior Club Enjoy Evening Discussion On Amusements

Members of the Excelsior Club enjoyed a table round discussion of Amusements on Tuesday evening when they met in the home of Mrs. T. G. Jackson.

Mrs. E. C. Sutton, in charge of the program, gave a clever introduction interspersing her address with appropriate and clever quips. She then presented Mrs. Edna Nunnally who gave the origin of the circus. She told of P. T. Barnum's inspiration as a groceryman to sell fun as well as groceries.

Barnum established a museum that came alive to delightfully entertain millions of people from every continent.

Mrs. Mae Jones discussed from experience and observation Community Fairs which she said had their culmination in the greatest fair in the world, The State Fair of Texas.

During the business session Mrs. D. J. Jobe was accepted as a member. Fifty-cents per capita was voted for the Halloween School Carnival Chili. Also two separate amounts were allotted for school furnishings at the grade and high school.

Members will be allowed guest at the joint-club meeting October 27th.

PROTOCHEMS DELIGHT AND AID MALADY

Protochems, the by-product of oil, are a source of delight and aid to the housewife and the lady of fashion.

Milady finds herself donned in nylon, acrilon or dacron, the fabrics which have been the result of petroleum research.

The soapless detergents are a boon to the woman who has had the hardwater problem.

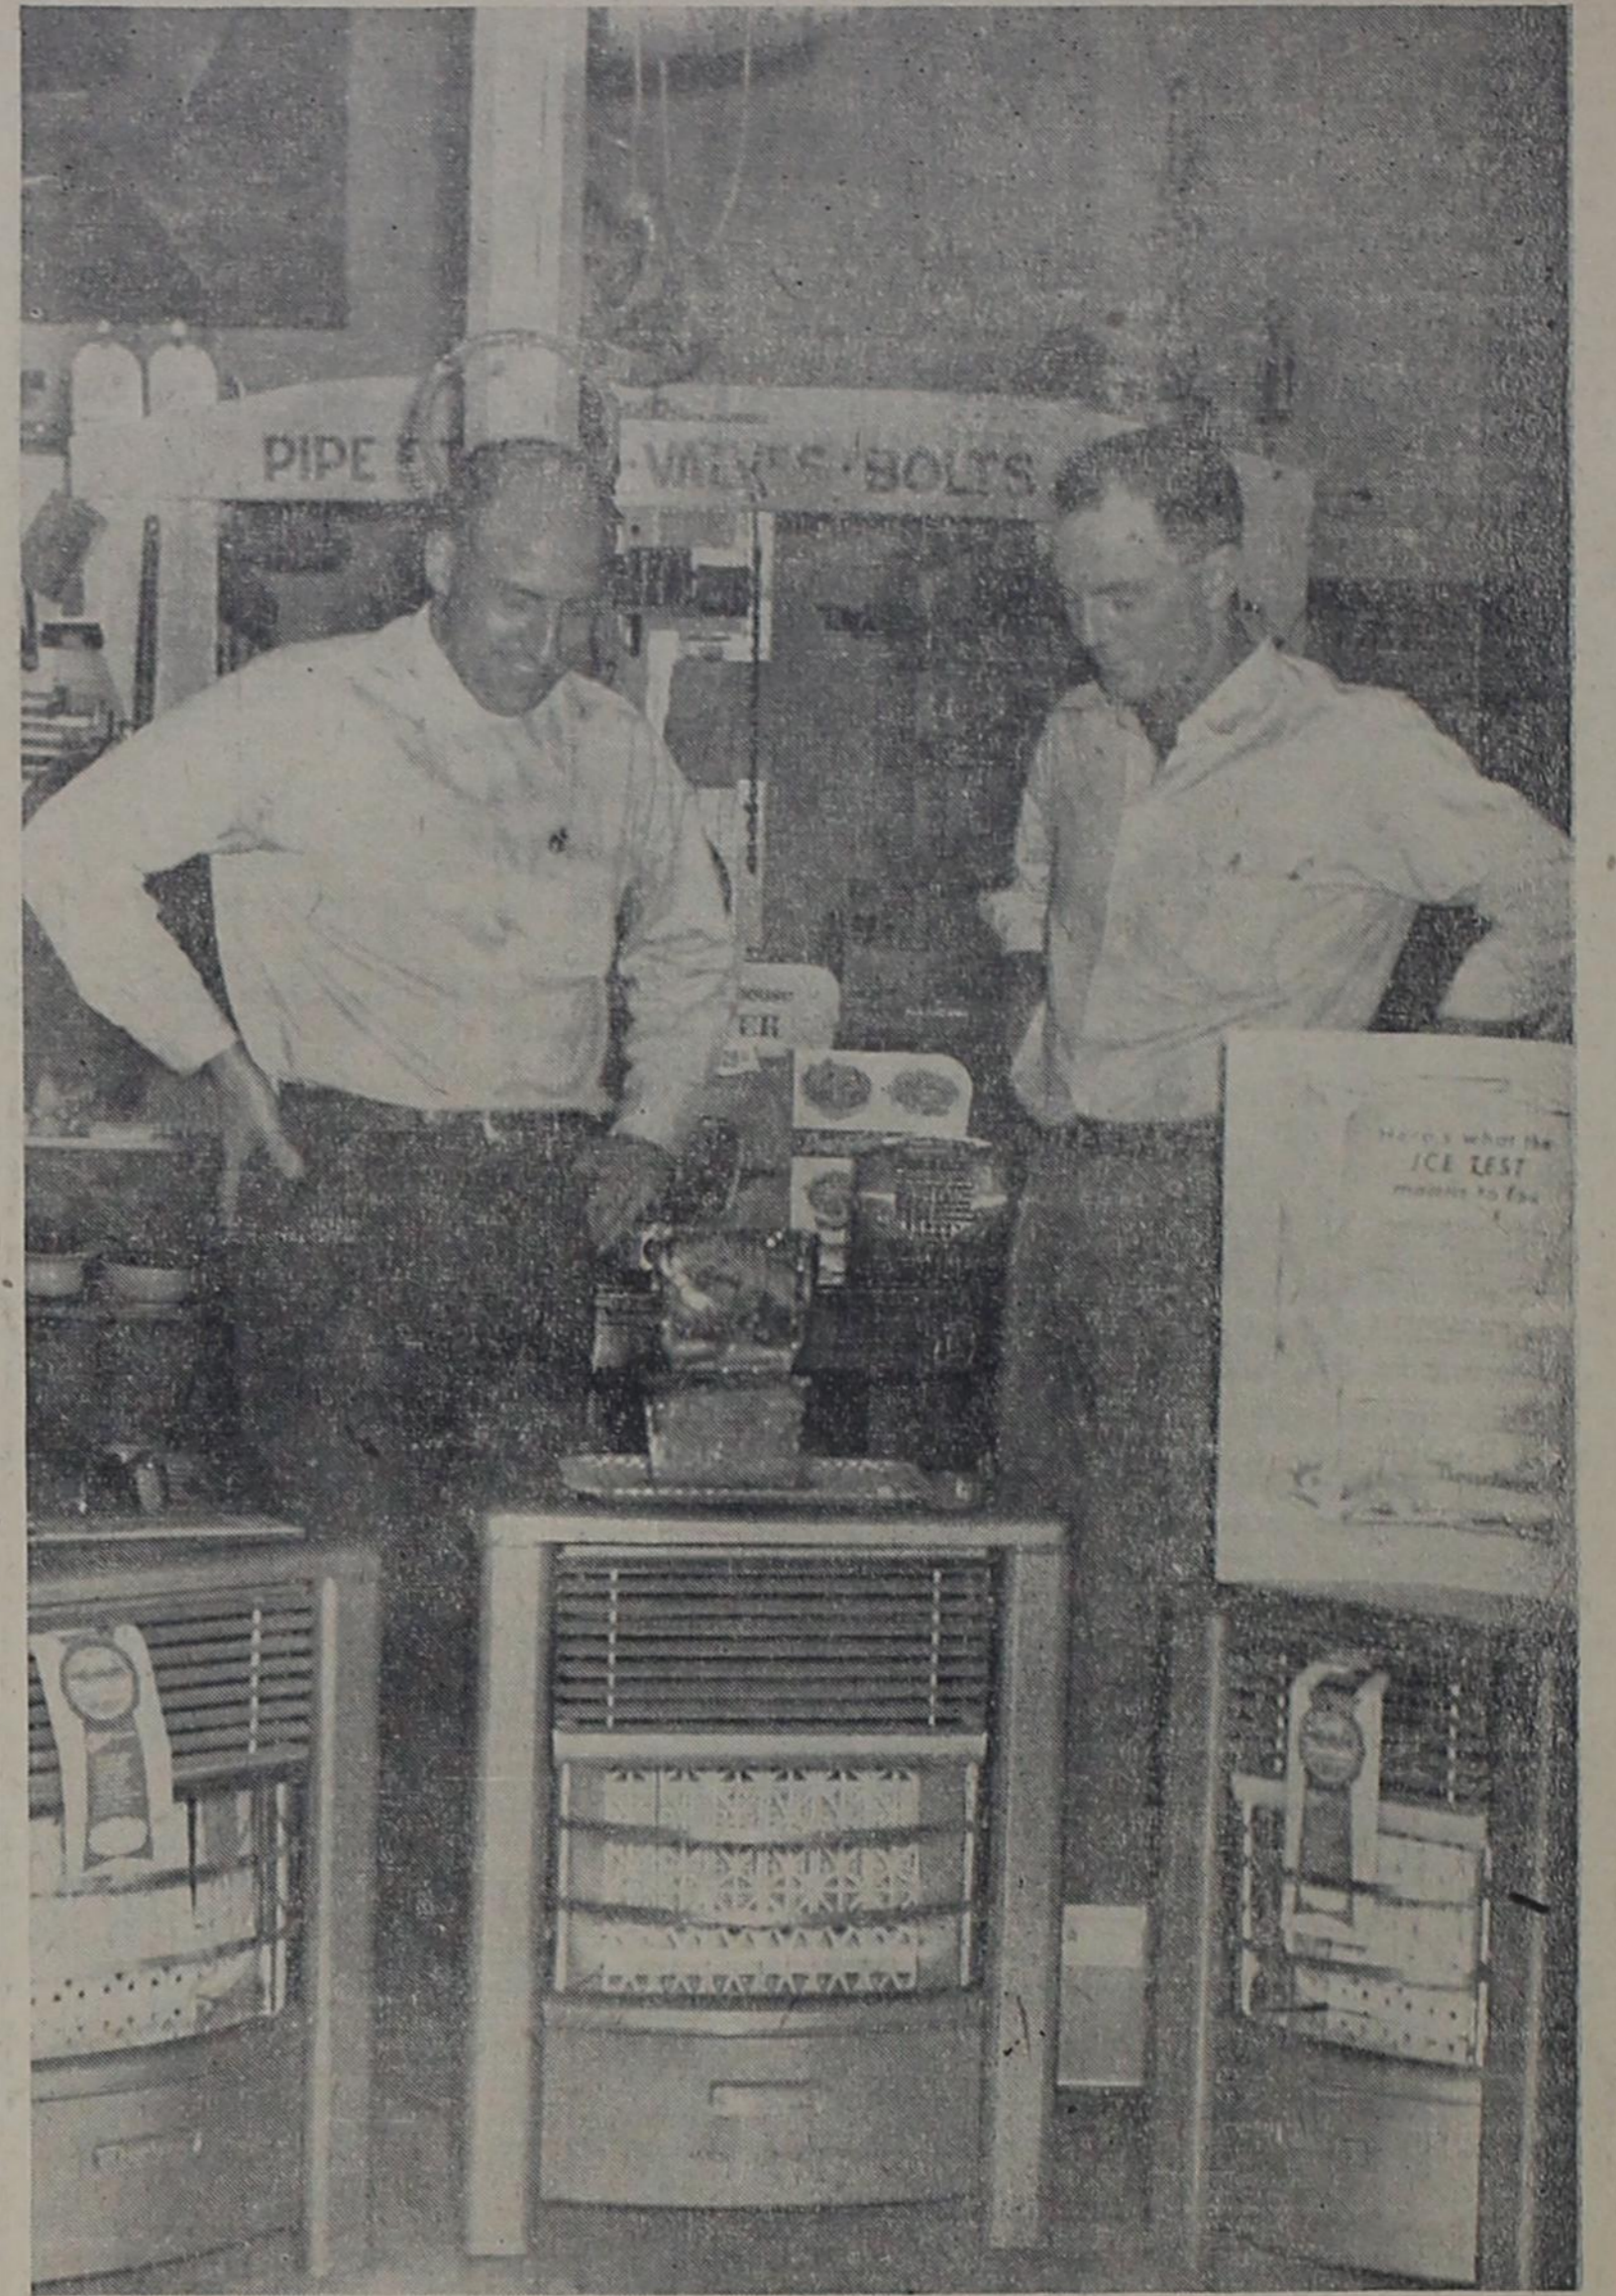

Hundreds of gadgets, household furnishings, sport clothing and equipment and even furniture are being made from protochemicals.

Mrs. Reid is better. We hope she is home soon.

Charley Atchison was surprised last week when his children, Wayne and wife, and Anna Jean Falls and her husband came home for his birthday.

The Falls are going to Alabama where he will take nine weeks of school in the Air Force.

LANE DIXON, WINTERS, ON RESEARCH STAFF FOR U-T OIL STUDY

WINTERS, Oct. 10 (RNS) — Lane Dixon, son of Mr and Mrs W. I. Dixon of Winters, received his B. S. Degree in geology from the University of Texas on August 27.

He has accepted a position as a research scientist with the Bureau of Economic Geology at the university. He will be an assistant to Dr. Virgil E. Barnes, research scientist. Dr. Barnes is writing a professional paper on subsurface Ellenburger, which should assist oil companies in making the identification and location of oil deposits easier.

As a part-time job, Dixon has worked at the bureau since the spring of 1951. He spent last summer in Midland, gathering data and cores for the project in which he is assisting Dr. Barnes.

Dixon is a 1949 graduate of Winters High School, where he was an honor student, and was voted as the Most Popular Boy his senior year. He was a letterman on the football team, a member of the student council, and the Future Farmers of America, and was vice-president of the junior class.

At present, Dixon is a member of the University Geological Society, the Mico, and the 730th Field Artillery Battalion Reserve Unit in Austin.

During the six weeks' semester this summer, Dixon was stationed at Brady on a field trip, as a part of his geology studies.

Mr. and Mrs. Dixon and children, Peggy and Lane, formerly lived in Gorman. Mr. Dixon was the Mail Carrier of Route One.

Dearborn present the new Fall radiant heater which is readily accepted as an attractive bit of furniture.

The cabinet styled stove has the forward heat flow circulating for chair level warmth. All mothers look for the extra safety protection that the Cool Safety Cabinet affords. Curious little fingers find only a cool smooth surface.

The forward flow makes for cleanliness and prevents ceiling smudges or discoloration.

Tops of Dearborn heaters polish like fine furniture and may be used as another table.

CHEANEY NEWS  
Reporter, Mrs. Bill Tucker

Aunt Ellen Tucker is still holding her own these past few days. Neighbors have been so good to come sit up nights, bringing food, and other nice gifts. J. B. Blackwell is still experiencing a serious head trouble which began quite awhile ago. Treatments have not given the desired results he expected. Visitors at the Cheaney Church of Christ on Sunday morning were Mrs. Richard Tucker and Mrs. Hattie Love of Ranger. Also Mrs. Griffith of New Mexico, who is the guest of Mrs. A. H. Dean. Mrs. Griffith will also visit in Comanche with her daughter, Mrs. Ann Love, and family. Jack Love of Odessa came by for a short visit with his mother, Mrs. Ann Love, during the week. Mr. and Mrs. Billy Tucker and son, Garland of Jal, N. M. were here Wednesday and Thursday with the parental Fred Joiner and Bill Tucker families. Junior Love, of Ft Sil, Okla, spent the week end at home with his parents and sister Mr. and Mrs. A. H. Love and Betty. Recent visitors in the Theibert Jones home was his younger brother, Captain Billy Jones, and his family of Sheppard Air Force Base, Wichita Falls, Texas. Thanksgiving is not so far away and you should see that big flock of bronze turkeys on the farm of Mr. and Mrs. Jack Rodgers near Salem. Several thousand, in fact, and they surely look fine. Everybody, men and women, are busy with harvesting the peanuts. So much so that some of us failed to make it to Church Sunday much to our regret. But that is the way of the peanut harvest - but making hay while the sun shines is the best policy when your years work is on the ground, there is a need for making every minute count. Washington

"As It Looks From Here" OMAR BURLISON Congressman 17th District. During the few days since my return to Washington, I am able to gather a few impressions that might indicate future courses of action on the part of the administration. On the domestic side, the farm program and what to do with farm surpluses is undoubtedly the biggest problem to be faced. Some of the good intentions voiced earlier by Mr. Benson, Secretary of Agriculture, have now gone out the window. The impression is that they are now facing realities, instead of theories. On the national and international scene, the number one question is how to gear our defenses and military power to the fact that Russia has the hydrogen bomb. President Eisenhower has made some pretty strong statements to wake us up to the possible danger. It seems to me he is going to have to do some very plain talking in order that the entire Nation may know something of the awfulness of such a possible bomb attack. There is current newspaper talk about an agreement with Russia to disarm, or at least to control the output of atomic and hydrogen bombs. It should first be understood that Russia has offered to discuss such an agreement, but as usual with the Russians, there is a catch to it. They would probably agree to most anything, but they have balked at any arrangement for inspection to see that the agreement is carried out. Other things shaping up for the coming Session of the Congress are: the matter of taxes; balancing the budget; revisions in the Social Security laws; recommendations for changes in the Taft-

Hartley Law; and numerous items of unfinished business carried over from the last Congress. The next Session of the Congress promises to be busier than the last. The new administration put off a great many things until it was more experienced on which action will need to be taken. During my visit back home, I greatly enjoyed talking to people and getting their views. It is hoped that everyone will continue to give me the benefit of their thinking and suggestion on the issues vitally affecting all of us. Never before in history has the public been so well-informed on so many subjects as our people are today. It is true that there is also a goodly amount of misinformation, too, but usually we are able to sift the grain from the trash and come up with a pretty clear attitude on what is happening. It is often confusing enough without such distractions, but it seems most people feel they must take a greater interest in public affairs. In my opinion, those who feel that way are correct. In these days our very survival may depend on it. The Department of Agriculture has announced a hay program for the drouth areas similar to the emergency livestock feed. The difference in their thinking is that the hay program should be worked through local feed dealers. Ten million dollars is earmarked for the purpose, most of which will go for cost of transportation. Shipping charges from the North and Midwest where hay is available amount to about the purchase price at the source of supply. Obadiah is the shortest book in the Old Testament.

## Gasoline for Sunday driving... or Natural Gas to cook next Sunday's roast?

Most people think only of gasolines, lubricants, and fuel oils when the petroleum industry is mentioned. The fact is, practically all oil producers are also natural gas producers. So today the driller of a wildcat, or exploratory well, calls his venture successful if the well discovers either oil or gas.  
If it is an oil well, then he has helped to supply the country's increasing needs for oil and oil products; if it is a gas well, he has discovered additional supplies of an efficient, economical fuel for household and industrial use.  
The petroleum industry's development and conservation of the country's natural gas resources is a practical demonstration of the progress to which Oil Progress Week invites attention.  
Beginning with the location of the well, advanced geological and geophysical studies of underground formations aid in the selection of likely oil or gas producing

areas, but still the odds against a wildcat well producing either gas or oil are eight to one.  
If a natural gas field is discovered, reservoir engineers immediately begin their studies to determine the best producing methods to conserve the underground energy and to obtain the maximum production for the longest possible time.  
If the gas that is discovered is "wet," it is processed in gasoline plants which remove the liquid parts and send them to refineries for further processing into motor fuels and aviation gasolines, or to petrochemical plants to be converted into a long list of useful chemical products, among which are the plastics and synthetic fabrics with which you are so familiar. "Dry" gas, the residue from gasoline plants, and sometimes produced direct from the gas field, is the natural gas that burns in literally millions of homes throughout America and under the boilers of thousands of American industries.  
So, whether a wildcat well discovers oil for gasoline or natural gas for the kitchen stove, it adds to the available energy resources of the most highly mechanized nation on earth; it supplies products essential for today's and tomorrow's high living standards; it gives additional strength to measures for National defense.

# OIL progress

Oil is what America goes on and grows on. Oil heats homes . . . powers farms . . . fuels cars, planes, tractors, steamships, locomotives. Oil lubricates every wheel that turns on every road, in every factory. Oil is the life-blood of America's industry . . . the bulwark of America's defense . . . the bright promise of America's future.

Oil Progress Week  
OCTOBER 11th to 17th

To discover more and more oil . . . to develop more and better oil products — this is the constant aim of the American oil industry — and we who handle the gas of the nation join in paying tribute to you.

### THIRD GRADE

The third grade studied fire prevention last week, but we were made very sad because one of our number - Judy Burns - got seriously burned while burning trash last Saturday morning. It is the hope of the class that she will soon be much improved.

### FOURTH GRADE

We are happy that our Cubs have won every game they have played. They haven't been scored on and that is something to be proud of.

We are also happy that we have received our pictures. Mary Thompson, Linda Shell, and Freddie Gilmore didn't get their pictures.

Friday in Geography we saw a film about the Eskimos in Alaska and Canada. We saw the new highway to Alaska and Canada, and the place where they can salmon. We wrote reports for English class on what we saw in the pictures - picking out the nouns in each sentence.

### FIFTH GRADE

We are giving three minute reports about birds, animals, trees, wars, Halloween, locomotives, and plants. In band we are learning to play songs and play our horns. Kay Ann Craddock has gone to the Dallas Fair; she will be back Tuesday. In Geography we are studying the mountain states and making posters. In art we are making Halloween posters, witches, and masks. We are making things to hang in the gym. Jackie Don Simpson got two of his front teeth broken off last Thursday.

### SIXTH GRADE

We are very sorry about Judy Burns who was burned seriously and is now in the hospital. We

are all hoping she will get well soon.

We are very glad six weeks tests are over. I suppose everyone is satisfied with their grades.

Our English Club will meet this coming Friday to elect officers.

A number of pupils in our Class have picked cotton. They are pretty sore but their pocket book is flushed.

We are very glad we won over Dublin. We were all pulling for Our Cubs.

### SEVENTH GRADE

Well we did it again! The Cubs went to another roaring victory by defeating Dublin 43-0 last Tuesday night. Our next game will be against Cisco Thursday, October 23, 1953. We would like for everybody to come and back the Cubs.

We are going to start electing Halloween Queens next Friday. We surely hope to win this time, so if some seventh grader comes knocking at your door give him a penny or two to back the seventh grade.

Last week was six weeks tests. As usual we all failed.

We are proud to have a new girl in our room - Mary Lo Britten.

### EIGHTH GRADE

The Cubs went to a roaring victory Tuesday night by defeating Dublin 43-0. The Gorman fans were very pleased with the boys. We have an open date this Thursday, but next Thursday we want everyone out at Brogdon Field Backing The Cubs against Cisco.

Well six weeks tests are over and are we proud. Everyone made fair grades, we hope.

Next Monday we start electing candidates for our Halloween Queen's Race. If an eighth grader comes by selling chances on a dressed chicken, be sure to buy about five chances. Next Saturday stop by Jay's Grocery and buy one of our luscious, delicious, magnificent, and beautiful home made pies or cakes for your Sunday dinner.

Some of the boys are still writing themes. Corkey and Eddie, take note.

That's all from the eighth grade this week.

### FISH TALES

Here we are starting a new six weeks of school. Everyone is glad that six weeks tests are over.

The Freshman class have been pretty busy lately getting book reports and English projects ready to turn in.

The Gorman Panthers were defeated 33 - 13 Friday night. This Friday we have an open date.

That's all the news for this week. See you next week.

### JUNIOR NEWS

Well, everyone is breathing freely again as our six week's tests are over, and we are not having to study so hard. But the worst is yet to come, Thursday, when we receive our report cards. After that we won't ever breath 'again'.

The boys played a good game Friday night. Although we didn't win, it will not knock us out of the place in district, as it was not a conference game.

The contest between the juniors and seniors is still on and getting in full force. So, if any of you need a magazine or want to renew an old one, see some of us juniors, if we don't see you first and buy a subscription from us.

### SOCIAL STUDIES

The American history class is studying the Federal Constitution - our objectives in this study are, to understand how the Con-

### GEORGE SAMUELS ATTENDS TELEVISION SCHOOL

George Samuels is attending Television School at Albert, Michigan. George feels that he has found his niche.

After receiving his medical discharge from the Navy when he had his ear drum bursted it seems that he could not find an opening at work that he was qualified to fill.

He has been in the Television School for about a year.

stitution provides for a federal system, with a division of powers between the states and the central government and a system of checks and balances within the central government. And to determine the contributions the Constitution has made to the growth of representative government.

The World history class is finding the statement to be true, "The roots of the present are deep in the past," from their study of the Athenian and Spartans. A Greek rally day was held Wednesday and our students found that there were many differences among people of that age. Many were similar to our likes and dislikes of today.

World Geography class has just completed a study of the physical structure of the earth. Next we shall find how people are living and why they are living on certain areas of the earth. To find what each country contributes to others; thus we will have a deeper understanding of society at home and abroad with this background it will deepen respect for, and sympathy with other peoples of the world.

### F. F. A. NEW

Well, here I am again with a few notes of news.

Test are over with and I think most everybody is satisfied. Mr. Bramlett says so at least.

Say, wasn't that a good rain we got. It surely will help these cover crops. I'm sure it hurt some folks peanuts and hay crops but I don't guess there is much we can do about ordering this rain. We just hope it helped people more than it hurt them.

We hear that the FFA boys at Carbon got the money from this district this year. Lucio boys. It is said that they had some Southdown sheep and distributed them among the boys. We hope the boys have good luck and make gobs of money. (By the way, this money is a state finance and it is given to a different town in each district each year. Gorman received it a few years back.

We have been working in the shop for the last few days. Some of the boys have been welding while others have been doing carpenter work. We have really been learning things. The boys really think a lot of shop work and as Mr. Bramlett says "This course isn't balanced without shop work and field trips for you learn about 87 percent of your knowledge through your eyes." We find this very true.

Well I guess that is about all for now.

You're an eye-ful in a trifle

**"America's Proving Ground" Is Topic Of Study For W. S. C.**

The Woman's Study Club met in the home of Mrs. Othell Clark Monday evening. Their subject of study was "America's Proving Ground - The Home."

Mrs. G. C. Acrea discussed the phase, The Influence of the Mother's Personality Upon The Child's Character. Her address was well received and described as inspirational.

Lines appearing in the year-book above the printed program were "No country rises above its homes and no home above its mother."

During the business session the club discussed plan for improvement at Frank Gray Park.

Coffee and cake was served at the social hour.

A kitchen sink that bounces dishes is one of the latest things to come out of an oil well through industry.

**Church Of Christ Notes**

In the Mid-Week services held each Wednesday at 7:30 p. m. we have completed covering the Book of Genesis and have started through Exodus. This is proving to be an interesting study. There are also classes for the children.

The sermon Sunday morning over KERC, Eastland, will be, "The Great Physician." This can be heard at 8:00 o'clock Sunday morning.

At the regular worship Sunday morning the topic for discussion will be "Untried Christianity"

Sunday night the subject will be "Sold for Nought, Redeemed without Money."

A cordial welcome awaits you. Leroy Cowan, Minister

**GORMAN BAPTIST ATTEND ANNIVERSARY OPENHOUSE AT REV. H. D. BLAIRS**

Gorman Baptist attending the openhouse celebration of the 50th wedding anniversary of Rev. and Mrs. H. D. Blair on Hwy 89 between Cisco and Eastland are Rev. and Mrs. Tom Small, Mrs. Ellen Oldham, Mr. and Mrs. Jesse Parker, and Mr. and Mrs. D. R. Clark.

The gift of the Gorman Baptist Church were a satin covered wool comfort and a wool blanket.

Guests enjoyed delicious punch and cake from the floral centered refreshment table and afterward viewed the many gifts.

Rev. Blair served as Cisco Association Missionary for 26 years. The office from which he resigned at the fall meeting of the Association. Although he has retired, Mr. Blair frequently finds himself called upon to preach or to teach, a privilege which he gladly accepts.

**FALLS TALE: CURTSY COAT CHAPTER**

Mother's delight, little girl's pride, is this tailored topcoat in all wool cut suede. Fitted to perfection 'cause it's a Curtsy Coat... and made with deep hem and turn back cuffs to keep pace with that growing miss. Ideally suited for school wear... and Sunday school... with plenty of warmth built into the sturdy woolen fabric and the lambs wool inner lining. "Styled for this year and next." NAVY, RUM, KELLY GREEN. Sizes 6x to 14.

sturdy HIKER hand-lasted MOCCASINS

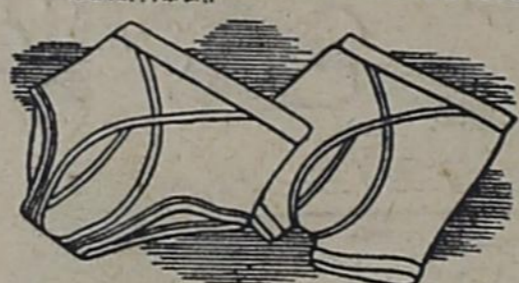

During formative years, little feet need the gentle support and natural freedom of a carefully designed shoe. Following nature's pattern, Buntees Hiker gives baby the heel support and toe room required, while soles are firm and flexible with an extended sole back stay. Insides are perfectly smooth, too, to assure baby complete comfort. Buntees Hiker comes in red, white, brown, smoked, elk finished leather. Sizes 1 to 6, narrow and wide.
