The course will consist of two lessons at each meeting and upon completion of the course a certificate will be awarded to each student.

One of the things which will be of great importance to you, your family and members of your community, is the ability to take care of your medical needs. This may be necessary for many reasons. For example, people may be isolated in a community shelter or in an individual home shelter for extended periods of time because of the effects of fallout may prohibit travel. Doctors may be unable to respond to requests for medical attention because they themselves cannot be exposed to fallout, they may be injured, or they may be required to provide medical services to more people Mr. Carter is another Gorman than they may be capable of handling.

As everyone opened the door and entered, a mood of Fall gaiety permeated the room in greeting. The tables were centered with colorful pumpkins, persimmons and greenery trailing to the central interest, a Pilgrim lady in gold dress and bonnett surrounded by miniature turkeys and fruit. Even the napkins of gold further detailed the Fall color feeling. Adding to the mood were the aroma of coffee and hot rolls.

Mrs. Edgar Higginbottom, class president, opened the luncheon program with the devotional, "The Living Word." Citing several recent major tragedies in the national news, Mrs. Higginbottom continued by noting the reactions of the various people concerned. Those who based all on material values were desolate, and those whose values were based on truths from "The Living Word" sustained their temporary trouble in true Christian faith based on eternal

# Demonstration new 63 Chevrolet truck teatures the hard way!

When we came to a river we got wet. This river bed was paved with rocks the size of melons. What a test for new light- and heavy-duty suspension systems this was!

Conventional light-duty units have coilspring independent front suspension—easier on truck, load and driver.

Users of new conventional medium- and heavy-duty units who have to operate in close quarters are going to like the narrower front ends (up to 7 inches).

## New engines, suspensions, frames and narrower front ends show their stuff on Mexico's tough Baja Run!

With months of proving-ground tests under their belts, why did new Chevrolet trucks take on the rugged Baja (bah'hah) Peninsula?

This is the toughest line of trucks Chevrolet has ever built. Sending them over the most punishing terrain in North America (a road totally unlike the fine highways on the Mexican mainland) was double proof of this fact. Frames, engines, suspension systems were subjected to stresses far greater than trucks normally encounter. You can be sure that trucks that can handle this kind of beating can handle any kind of work. handle any kind of work.

Cowboy quarterback Eddie LeBaron has brought his team right up in the top bracket of the NFL in the Eastern Division. Eddie is presently the league's leading passer, throwing to Cowboy stars Frank Clarke, Billy Howton and Foison. The Cowboy attack is well balanced with the outstanding running of Amos Marsh and Don Perkins.

Cowboy defensive play has been nothing short of great this Texas over Rice season with such stalwarts as Bishop, Dowdle, Tubbs, Lilly, Nolan, and others holding their SMU over Texas Tech strong opponents on numerous Wisconsin over Ohio State occasions to help their team to Alabama over Tulsa
