You cook for pennies...

when you cook electrically

You'll be delighted to find out how little it costs to cook the modern electric way. Surface units cook by direct contact with utensil bottoms, use heat thriftily. The electric oven, insulated all around including the bottom, keeps heat inside where it belongs. And once the oven reaches the temperature you select, it uses electricity about one-fourth of the cooking time. It costs the average family only about 3¢ a meal to cook with flameless electricity. See your electric range dealer soon. Cook better . . . live better . . . electrically!

Never Too Young To Learn Safety

Phil Silvers switches roles from comedian on his Saturday night CBS television show to his private-life role as father of twin 2½-year-old daughters, Candy and Cathy. Phil gives the youngsters some pointers on fire prevention and safety from the Junior Fire Marshal Magazine. This spring, more than 4.5 million boys and girls in the Junior Fire Marshal program, a public service activity sponsored by The Hartford Insurance Group in elementary schools across the country, are carrying out a special campaign to survey community fire and accident causes. The popular TV and movie performer's twin daughters have been named honorary Junior Fire Marshals.
