Farm Safety Week Proclaimed July 25-31 By Co. Judge Bailey

County Judge Scott Bailey has officially proclaimed July 25-31, 1965, as Farm Safety Week in Eastland County, according to Jack Cozart, president of the local county Farm Bureau.

In his official proclamation, County Judge Bailey said: "All the citizens of Eastland County are deeply concerned about the safety and well-being of farm families from whom we receive our abundance of food and other essential agricultural commodities.

"Farm and ranch accidents reap a grim harvest of lives each year in Texas. 'Thousands more suffer painful disabling injuries, and property damage adds great economic loss to the terrible toll of farm and ranch accidents.'

"During this special week, a state-wide farm accident prevention education program will be undertaken by the Texas Farm Bureau, the Texas Farm and Ranch Safety Council, the Texas Agricultural Extension Service, 4-H Clubs, the Texas Safety Association, Future Farmers and Future Homemakers of America, Young Farmers and Young Homemakers of Texas and the Eastland County Farm Bureau, with the theme, 'Safe and Alive in '65.'

County Farm Bureau President Jack Cozart said that a different phase of safety would be emphasized each day during the week: Sunday - reverence for life; Monday - safety begins at home; Tuesday - agricultural chemicals; Wednesday - prevent falls; Thurs-

County Included In Regulatory Fish And Wildlife Program

Hunters, fishermen, landowners and other citizens of Eastland County have been assured an opportunity to participate in a modern, scientific program of fish and wildlife management by recent Acts of the 59th Legislature.

The last legislature included Eastland County in the Regulatory Responsibility Program of the Texas Parks and Wildlife Commission, the laws becoming effective on August 30, 1965. The bill received Governor Connally's approval by his signature on June 17th.

The new law specifically charges the Texas Parks and Wildlife Commission with the responsibility of conducting scientific research on game and fish problems, setting of open seasons, bag limits, and methods of taking wildlife resources in the county.

A principal objective of the regulatory responsibility program is the management of wildlife resources based on scientific research findings. The program incorporates adaptability and flexibility to meet emergencies such as drought, flood, fire or other causes which may endanger one or more species of wildlife by waste or depletion. The Commission can act in the interest of ranchmen, landowners and the hunting and fishing public to conserve the threatened wildlife species without waiting for normal legislative procedure.

The Commission can act also to provide a more lenient cropping of the wildlife resources when research findings indicate an increased harvest is justified in the interest of proper management. Eastland County joins a rapidly growing number of counties in seeking the most efficient way possible to deal with local game regulations.

Residents of Eastland County will be informed of the findings from research conducted by game and fish technicians, game wardens and other resource specialists of the Commission. Before the Parks and Wildlife Commission issues the required proclamations containing open seasons, bag limits and other rules and regulations for harvesting the counties wildlife resources, announced public hearings will be held. These hearings will be advertised at least ten days prior to the hearing date.

At the public hearing the proposed regulations will be read and explained to those present. Pertinent questions the public may have will be answered. The full proceedings will be recorded and presented to the Texas Parks and Wildlife Commission when that body meets to prepare regulations for taking game and fish in the affected county.

Although the Legislature granted the Commission at least 90 days after the acts become effective to "... conclude its investigation, hold its hearings, and promulgate its proclamations, rules, regulations and orders", Eastland County citizens can be assured that Commission technicians are already at work on the program for their areas.

The benefits of participation in the regulatory responsibility program, in addition to the assurance that scientific research is set as the basis for management, are many. Under the program, the numbers of the various species can be adjusted to the carrying capacity of the range, thereby contributing to the health and well being of the individual animals and insuring against range damage or destruction.

Sex ratios of some species, such as deer, can through scientific harvesting, be adjusted to the desired buck to doe ratio dictated by good herd management.

The over-all and lasting benefit is that the people of Eastland County have made a progressive step which will help insure the perpetuation and wise use of their wildlife resources for themselves and for future generations.

The law affecting the County becomes effective August 30, 1965. However, general and special laws now in effect will remain so until the issuance of the Commission's rules and regulations in accordance with the terms of the Acts.

Farmer's Federal Gas Tax Refund Forms Are Now Available

Farmers and ranchers of Eastland County are reminded that claims for the Federal Gas Refund must be submitted before September 30th. The claim may be filed only by the owner, tenant, or operator of a farm situated in the United States and operated as a trade or business. This refund is on the four cent per gallon excise tax paid on gasoline and diesel fuel used by operators on their farm during the period of July 1, 1964 to June 30, 1965. This refund has no connections with the claims for refunds sent to the State Comptroller office. The gasoline used on an operator's farm by custom contractors is also eligible for the refund, but used in highway travel is not.

The special postcard form 2240 is the proper one to use to submit fuel claims, and they have been mailed to operators who reported in 1964. New farmers and those who have not received the Form 2240, may obtain one from the Farm Bureau Office, 208 West Commerce, Eastland, and they will be glad to fill it out for you.

Farm Bureau was instrumental in obtaining both the state and federal tax refund for non-highway-used gasoline.

As It Looks From Here

Omar Burleson, M. C.
17th. District, Texas

WASHINGTON, D. C. — OUR NATION SEEMINGLY has more than its share of world problems. Some have been assumed — others have been thrust upon us.

MEETING THESE CHALLENGES IN OUR OWN INTEREST should be our first concern.

WITHOUT MAKING IT A MATTER OF "misery loves company," the Communist world has its problems, too.

WHILE NECESSARY TO APPRAISE our strength and our weaknesses, the inventory is not complete until we make the same appraisal of our adversaries. To penetrate the Iron Curtain and the Bamboo Curtain with accurate estimates is not easy. A few things, however, are in evidence.

RUSSIA HAS HAD TO PUT MORE OF HER RESOURCES into building agriculture to the point where she can feed her people. It appears they are having real difficulty in finding money for anything more than home defense.

FAIRLY GOOD INFORMATION POINTS TO ANOTHER GRIM agricultural year for Communist China. There likely is small chance she can do more than equal last year's grain production. At the same time, the nation will add 10 to 15 million more people to its population.

FROM THE POLITICAL STANDPOINT, en Bella's overthrow makes Russian foreign aid to Algeria a probable loss. The Soviets had invested considerably in a steel plant in Algiers and the Red Chinese had counted on Ben Bella to carry the ball for them in Africa. The new government is no bosom friend with the West, but it threw a monkey wrench into the Afro-Asian Conference to be held in Algiers, and also forbade the holding of the Communist Youth Festival scheduled near the end of July.

FOLLOWING THESE EVENTS SEVERAL AFRICAN NATIONS have denounced the Chinese Communists for attempting to corrupt their governments.

IN THE CARIBBEAN THE COMMUNISTS were sure they had the Dominican Republic in their power, but the President of the United States changed their minds.

Large Attendance Is Expected At Annual Sheep & Goat Event

Ranchers from several nearby counties are expected to attend the 4th. annual Eastland County Sheep and Goat Field Day at Ranger July 30, according to Dr. John Foster, DVM, chairman of the chamber of commerce agricultural committee, who, with County Agent J. M. Cooper, are co-sponsors.

The affair is expected to get underway at 9:30 a. m. on the above date at the old Tiffin gas plant, 3 miles northeast. The field day this year features an Angora goat show and a goat judging contest under the direction of B. S. Dudley, Jr., local vocational agriculture teacher. Al Garrett, Mason County Agent will judge the animals.

Other items on the agenda for the all-day program include: status

FIDEL CASTRO IS HAVING TO SELL BREED CATTLE to pay off Cuba's current debt demands.

AFTER HEAVY COMMUNIST EXPENDITURES IN THE CONGO, Moise Tshombe has fairly well stabilized things there for the present. Arms are not flowing into the Congo from Algeria and Egypt.

FINALLY, THE RIFT BETWEEN THE SOVIETS AND Communist China appears irreparable.

FROM THE MILITARY STANDPOINT, RUSSIA IS COMMITTED to aiding North Viet Nam. Even with plentiful military supplies, their problem of getting them into operation in Viet Nam is not helped by the Gobi Desert and the Himalaya Mountains.

IN SPITE OF THE TREMENDOUS MANPOWER OF Red China and her growing submarine capability, the key railroad from Southern China to North Viet Nam is approximately 300 miles long, has about 140 bridges and 60 tunnels. Over this line must travel the bulk of her military aid to Hanoi.

WHEN THE CHIPS ARE DOWN AND AN ALL-OUT EFFORT on our part is invoked, the vulnerability of supply lines to North Viet Nam is tremendous. In addition, other military targets are highly vulnerable.

THE SITUATION IN SOUTH VIET NAM IS BOUND to get worse before it gets better — our position in Berlin — our stake in the Dominican Republic — our commitment in Korea — our relations in Latin America — the weakened position of NATO, mainly because of France — are problems no less. These are not all, and we need no more. However, we cannot run away from those we have. At the same time, the other side in this world's ideological, economic and military conflicts is far from having things its way.

PERHAPS ONE OF THE GREATEST ITEMS OF CREDIT are signs of our willingness to assert ourselves on the side of right and not let our timidity paralyze actions which we know must be taken to sustain the right.

DESDEMONA NEWS

By MRS. ETHEL KEITH

Attendance at the different churches was below normal due to vacation and these hot days.

However, Sunday, July 18 was "Darrell Dossey Day" at the First Baptist Church. The Dosseys have been here three years serving our church very well. A surprise program was presented by Mrs. Ed Crumbley. Also special music by 3 intermediates, Derenda Sharp and Sady Rainey singing "What A Friend," with Karen Guthery at the piano. Corsages were presented to each member of the Dossey family. Then Sunday night

of the screwworm control program; toxic weeds and plat to sheep and goats; price outlook for wool, mohair and lambs; Government support prices as well as the activities of the Texas Sheep and Goat Raisers Association.

Dr. John Foster, DVM, said that lunch would be available on the grounds at noon.

There are now over 50,000 head of Angora goats in the county. The animals form an important part in the agricultural economy of the area according to the county agent. There were less than 5,000 head in 1930.

Bill Marslender, chamber president, will welcome the group to Ranger.

Others on the program include, Dr. J. B. Henderson, Coleman, area veterinarian for the Texas Animal Health Commission, John McHaney, A&M University economist, J. G. Meredith, Eastland, ASC office manager, Dr. W. R. Hardy, Sonora, Ranch Experiment Station, and Gaylord Hankins, Rock Springs, President of the Texas Sheep and Goat Raisers Association.

CARD OF THANKS

May I take this means to express my heartfelt thanks to every one who was so good to me during my recent stay in the hospital. Special thanks to Dr. Rodgers and Dr. Brown, the nurses and staff of the Blackwell Hospital, to those who visited with me, sent flowers, gifts, cards and prayers, and to neighbors who brought food to my home and helped my family in any way.

May God's richest blessings be with each of you.

Like any other fashion accessory, eyeglasses must be kept clean — the frames for attractive appearance and the lenses for better vision. Many facial squint lines are caused by straining to see through smudgy lenses.

Rubbing with a dry cloth smears soil and grease, so glasses should be washed at least once a day to remove finger marks, cosmetics, and dust. This daily bath is indispensable in summer to wash away perspiration, sun lotion, salt water, and sand.

A good routine is to immerse glasses, frames and all, in warm soap or detergent suds, then go over them with a well-lathered soft cloth. Optical experts advise wiping lenses from side to side instead of in circles. A soft brush will coax soil from hinges, filligree metalwork and cutwork.

After rinsing, wipe the lenses and frames dry with a clean lintless cloth. Lenses made of unbreakable resin should be washed the same way. Authorities warn against rubbing them with silicone treated paper which tends to scratch and damage resins.

Few cake frostings freeze well.

Frostings containing egg whites are not suitable for freezing because they dry out and become crystalline.

Whipped cream fillings are also unsuitable.

For best results when freezing a cake, cover the cake with an uncooked frosting made of confectioners' sugar. The fat will keep moist and creamy for four to six months.
