GORMAN, TEXAS
 A Nice Place To Live . . . Work . . . and Raise a Family!

Don't know why I didn't think of the above slogan. The young man (anybody under fifty is young to the Kernel) who thought up this slogan recently purchased Acra Auto Supply and has joined the other progressive young men that have moved to Gorman. Ron Hudson said if you would stop by his place he would gladly give you a bumper sticker for your car.

Thanks, Ron.

As Texas is becoming more closely related to Old Mexico the following article should be of interest to all of us.

MEXICO CITY, June 19, 1972 - Mexico opened an institution of higher learning in the United States this week - in San Antonio. Why?

The answer to that question lies in the personality, leadership and goals of Mexico President Luis Echeverria Alvarez. The new dynamic President of Mexico is visiting the U. S. this week to discuss a couple of major problem areas between Mexico and this country.

If his track record here comes close to his achievements in Mexico since his inauguration December 1, 1970, he will go back home with some commitments about the Mexican laborers in California and the salinity problems of the Mexicali Valley caused by the Colorado River waste.

His visit to Texas gave this state a clue to his major goals in Mexico. He dedicated the San Antonio Mexican Cultural Institute — located in Hemisfair's Mexico pavilion. It is symbolic of the principal changes Echeverria is attempting in Mexico's way of life.

His enthusiasm and determination to solve Mexico's problems has become contagious among all government leaders in his country.

His common workday is 12 to 14 hours — with no complaints from Mexico's government leaders and their staffs. There is no "siesta" in Mexican governmental circles these days. The new leadership in Mexico is determined also to get rid of the "manana" image — and turn it to "today and tomorrow."

They recognize internal problems — and have programs to do something about them. "Most of Mexico's problems can be solved by education," Echeverria believes.

His program for educational reform in Mexico points out the fact that he means what he says.

Echeverria anticipated the country's education problems before he started his six-year term as president (a president may not succeed himself in that country).

"President Echeverria studied the country's population statistics and discovered that 500,000 children per year will be entering the elementary education program," states Mexico's Secretary of Education Victor Bravo Ahuja.

"Mexico has a population of 50,000,000 — half of which is in the rural areas. One-fourth of the population is between six and 14 years of age. There were no schools for 150,000 students wanting to enter elementary school.

"More than 12,000 new teachers must be trained each year to educate these new students," the Secretary of Education continued.

Mexico will have 11,000,000 or one-fifth of its entire population in elementary school this year. Only 57 percent of

Evonne Ogle and Robert Reeves Set July Vows

Mr. and Mrs. Virgil Ogle of Newport, Texas announce the forthcoming marriage of their daughter, Evonne, to Robert Reeves, son of Mr. and Mrs. R. C. Reeves of Rt. 2, Eastland.

The bride-elect attends North Texas State University and is a graduate of Bowie High School.

Mr. Reeves is a graduate of Gorman High School and North Texas State University. The wedding date has been set for July 21, 1972 in the First Baptist Church in Newport.

the elementary school students finish grade school — and this is up from 45 percent two years ago. Echeverria's goal is to get 75 percent of the grade school students into high school.

He does not believe all high school graduates should go to college. (There are 133,000 students attending the University of Mexico this year.)

Echeverria has more than doubled the budget for technical institutes. Although the cost of college is only \$12 to \$15 a year tuition in Mexico, the Mexico President is trying to direct high school graduates into technical and trade institutes.

"We believe that it is a mistake to send everyone to a university. The President's education policy has three principal points," the Secretary of Education relates, "giving students a chance to accept every educational opportunity, get into their working lives without frustration, and the economic opportunity for everyone to be educated."

Here are some other facts and figures given to newsmen by Mexico's Secretary of Education Victor Bravo Ahuja.

27 percent of the national budget (up 23 percent from last year) goes into education. 66 percent of the people on Mexico's federal government payroll work in education. 88 percent of education in Mexico is financed now by the Federal government.

With all of this interest on education — it is easy to see why President Echeverria wanted to open a Mexican educational institution in San Antonio.

More buildings will be added later, classrooms, labs and a library. Operated by the Secretary of Foreign Affairs Emilio O. Rabasa, the Institute will feature classes in Spanish for four levels, also anthropology, literature and Mexican history.

Exhibits of Mexican arts and crafts, Mexican painting and excavations of ancient temples will be featured also.

Swimming Pool Payment Made

The Gorman Swimming Pool has benefitted so far this summer by lots of hot afternoons and many energy filled boys and girls. Don Spraberry chairman of the Swimming Pool Committee, reports that the contributions that were asked for at the beginning of the summer enabled the committee to pay the bank \$1,000 on the principal of the indebtedness of \$8,054.85. Never before has the swimming pool committee been able to make a payment on the indebtedness during the middle of the summer. A total of 1,616.32 has been contributed since the special drive in the Spring. Some of this does include the regular pledges that have been made.

Don Spraberry said that he hopes that if no major breakdown occurs in equipment that another payment can be made in the fall. Those who have not fulfilled their pledges to the swimming pool for this year are encouraged to do so as soon as possible. Any person who would like to make a contribution to this fund may do so at the bank, or by presenting it to Don Spraberry or Mrs. Rooney Williams.

8 ways to save money on air conditioning.

1 Set thermostat between 76 and 78 degrees—the lower the setting the more electricity the unit uses.

4 Install proper duct, ceiling and wall insulation and weatherstrip windows and doors—keep hot air out, cool air in. (Helps reduce winter heating costs too!)

closed—prevents excessive loss of cool air and infiltration of hot air.

7 Shade windows from direct sun-

light with awnings, blinds or draperies—reduces the load on the unit.

2 Replace disposable or clean permanent type filters as required—clogged filters make the unit work harder and use more electricity.

5 Shade the outdoor unit from the sun

but keep the unit free of grass or other obstruction that might prevent proper air circulation.

3 Provide adequate attic ventilation—helps reduce heat buildup.

6 Keep windows and fireplace dampers
