value from your electric range, follow these tips:

1. Use flat bottomed pans for better contact with

the electric unit. Also, use tight-fitting lids to reduce cooking time and moisture loss. And match pan size to unit size to avoid heat loss.

2. Don't open oven doors unnecessarily, since this causes heat loss and extends cooking time. It also can result in under cooking.

3. Use a minimum amount of water. The more water you use, the

#### **Hearing Tests** Are Important

If you have a hearing problem of any kind you owe it to yourself to have an Electronic Hearing test made to find why and what can be done to help you before it is too late. The tests are free and will only take about 20 minutes of your time. We check your ears for packed wax, the tubes that let your ears breathe, then with the machine we check your hearing nerve, (bone reading) air conduction, (outside sounds) then measure how much sound the ear will take. We can pinpoint your problems and explain in plain English what can be done to help you, then you make your own decision. We never try to highpressure you into buying anything. There are thousands of people today suffering from hard of hearingness, (even some that wear Hearing Aids) just because they waited too late to do something about it . . . don't let this happen to

From The Living Bible But when Gallio became governor of Achaia, the Jews rose in concerted action against Paul and brought him before the governor for judgment. They accused Paul of "persuading men to worship God in ways that are contrary to Roman law." But just as Paul started to make his defense, Gallio turned to his accusers and said, "Listen, you Jews, if this were a case involving some crime, I would be obliged to listen to you, but since it is merely a bunch of questions of se-mantics and personalities and your silly Jewish laws, you take care of it.
