De Leon will be celebrating its 59th annual Peach and Melon Festival this year on On Tuesday, July 31 at 3 p. m. De Leon Study Club will sponsor an informal tea honoring the ten queen candidates. The queen of the festival will be chosen on this date at 9:30 p. m. and will be crowned in the Queen's Coronation on Wednesday, August 1. She will reign for one year and represent De Leon in all parades and such activities.

On Tuesday night, July 31 the festival is host to a beauty contest for five and six year old girls that live in the De Leon School District. Lucky little miss will be presented roses and a crown. She partakes of the queen coronation and all entrants ride on a float in the street parade.

The State Peach Queen contest will be held on Saturday, August 4. Contestants will be presented at 9 p. m. at the Festival grounds on Saturday night. Murray Cox of Radio Station WFFA will be master of ceremonies.

Tips for using electricity efficiently:

Think twice before you open this door:

The habit of opening refrigerator and freezer doors only when it's really necessary is a saving habit. The cold air that rushes out each time has to be replaced, which causes the unit to run more and use more electricity. Make a mental list of the items you need before you open. the door, then take out as many of them as you can at one time.

Here are other suggestions for using minimum amounts of electricity to get maximum benefits from your refrigeration equipment. If your refrigerator has to be defrosted manually, do it before the

ice deposit gets one-fourth of an inch thick. Ice (frost) acts as unwanted. insulation and causes your refrigerator to work overtime.

Let hot foods cool to room temperature before you place them in. your refrigerator or freezer.

Use a refrigerator thermometer to help you attain temperature settings of 35 to 40 degrees for your refrigerator and zero temperature for your freezer. Settings below these temperatures could be a waste of electricity and cause unnecessary wear on the appliances.

And turn the dial to a warmer setting in the refrigerator section according to manufacturer's recommendation), when you're going to be away for a week or longer. It's our job at Texas Electric
