PRESS POINTS. By JOE BENNETT, Publisher

Thanks a million for all the nice compliments I have been getting recently on the column. We are trying real hard at the job and all the pats on the back sure make us feel

Another Correspondent has been added to the Progress Family. She is Mrs. Velma Hastings of Carbon, who will begin sending in the Carbon News next week. Again the Lord has blessed us, as we were seeking someone to send in the news and, behold, another correspondent. Thanks a bunch to Mrs. John Rodgers, a Progress reader, for urging Mrs. Hastings to start sending in the news. We appreciate it LaTonne.

So look for the Carbon News starting next week, and all you folks over Carbon way will be able to read your local news in the Progress. Now if we could just get

I hope the children and adults of our community and area will take advantage of this work and the wonderful swimming pool we have here. Boy, after cleaning out the other swimming pool for so many years, it sure was nice to have such a nice pool to work on for a change. This pool is a big asset to our city and area, and the people, especialy the kids, should take full advantage of it.

The swimming pool committee feel very fortunate indeed in securing a lifeguard for the pool so that it can be opened this season. The new lifeguary is Sheri Pond. She is a student at Hardin-Simmons University in Abilene, who is home for the summer with her parents here.

I ran into a heck of a rain Saturday night returning from Abilene, and I managed to drag it along with me almost to Carbon, but the latch on by back bumper broke and it got away. Well at least we did get a little moisture during the morning hours. And right now any amount helps.

In case you see a "camera bug" running around with a couple of cameras and a lot Lonnie, taking pictures of the our town.

# Things to remember not to forget before you go on vacation.

For economy and energy efficiency, here's a quick checklist of important things to do around the house before you go on vacation.

☐ REFRIGERATOR OR FREEZER: Change thermostat control to slightly warmer (or "Vacation") setting according to manufacturer's recommendations.

☐ ELECTRIC RANGE: Make sure all switches are in the "Off" position.

☐ WASHING MACHINE: Turn off water supply at faucets.

WATER HEATER (ELEC-TRIC): Turn off at circuit breaker. Upon returning run a small amount of water from a hot water faucet to make sure there's water in the tank before you turn the circuit back on.

☐ TELEVISION SETS: Unplug from electrical outlet and disconnect antenna.

LIGHTING: Be sure all lights are off except those needed for security, such as: 1) yard light with automatic on/off control; 2) lamp in living area with automatic control.

☐ AIR CONDITIONING: Normally, air conditioning should be turned off completely while on summer vacation. However, if there is anything in your home that might suffer heat damage, raise thermostat setting 5 to 10 degrees above normal and leave unit on.
