

PRESS POINTS . . By JOE BENNETT, Publisher

WOW! What a marvelous spirit we have in this community and surrounding area as far as fine Christian folk are concerned. Oh I know that folks everywhere have a concerned spirit also for their own who are in need, but it seems that in Gorman and the surrounding area when i someone is down and needs help of any kind, that there is always a community spirit that takes over and each individual pitches in and does what is necessary, plus much more, to see that this one is need is taken care of. But after all, isn't this supposed to be the Christian way of doing things. All I know is that other place in the world when held here on Saturday, Februit comes to helping your neighbor and friend when help

If folks would only use the privilege given them, that of being able to elect those who run our government, then a lot of this mess that our country is in would be straightened out in a hurry.

You have heard the old saying "like a duck out of water" a million times I am sure. Well last week the wife and I were driving around and looking at the countryside. We were discussing the dry parched earth and grass. As we passed a pond which always has water in it (as long as I can remember) with ducks swimming around over it, I noticed just how low the water level was on this pond. And believe me, if we don't get some rain before long, those "ducks WILL be out of wa-

There is only one source from which not only the rain, but all of our other sustaining needs come, and that's from the Good Lord. So let's all talk to him about our needs, and when he sees that we truly need this moisture, I am sure he will fulfill our needs. He always does, you know! So next time you are in prayer to God, seek his help in our need for rain.

And remember to smile because God Loves You!

The gas age is ending for electric power plants.

The Texas Railroad Commission says electric companies must begin phasing out the use of natural gas for making electricity.

It won't be easy. Today most of your electricity comes from power plants that burn gas.

But Texas Electric has already acquired new fuels to reduce our use of natural gas. We have two lignite coal plants in operation and several more planned or under construction. We're also

building a nuclear power plant.

national average.

There's no choice. We must build new power plants, and building these plants costs a lot of money. That's one reason electricity is costing you more. But it's the only way to make sure you'll have the electricity you need, at rates still much lower than the
