SENIOR CITIZENS NEWS

Well, here I go again. I guess that some of my writing has been just too radical. So I will try to tone it down. Tho I want to thank those that have talked and called me, thanking me for what I have written.

I went to Stephenville for eye checkup last week. It was not too hot on what he said about my reading. He gave me a scare there. He said to keep on reading as Long? My sincere prayer is that I can keep on reading, even if it is very, very slow as long as I live. I had rather read any time than watch the tube.

The old folks are sure perking up lately. Those gardens are sure putting a bloom in their cheeks and a little more spring in their steps now. That is so wonderful for them.

The people here sure owe Easley a big "Thank You" for the spuds they gave to the people of Gorman. Even the Man that bought a truck full and peddled them out the next day. I am sure he made a nice profit also.

Our office gang is a honory as usual. It is getting to where I am a crook with the crooks. I really wish I had never started playing their way. Tho it was a force on me.

It is not quite as bad as a Quilting Bee. Tho you hear some bull stories at times. Tho they are always true when Hickey tells them.

I noticed where the Methodist have a new pastor. We are hoping that he is the right one for them. Good Luck to you and your congregation.

There has been so many that have passed away that I cannot name them all. Our Sympathy goes out to their loved ones. May you look for guidance from above in your sorrow.

I received a card from my granddaughter Mr. and Mrs. Ronnie Patterson and children of Muleshoe. They had just visited "Royal Gorge" Colo.

I want to tell this story. Elbert, Cora, my wife and I visited that place in Aug. 1961. The Bridge that crosses the Arkansas River is 1/4 mile long. The banks of the river are over 100 feet solid rock to the bottom. I just wonder how long it took the water to cut that deep thru that rock? It must have

Alvis and Bonnie Scitern, Cula Palmer, W.R. Yardley, James Peppers, Ina Scitern, Amy and Kevin Scitern, Mary Margaret and Patricia Hudson, Nita Scitern, Muri Lasater, Georgia Fae Skaggs, Irene Harrison, Virgie Dennis, Tim Dennis, Evelyn Yardley, and Leta Hogan.

Our musicians were: Chuck Rivers, Rex Kinser, Carrol Hogan, Hershell Cordell, Lloyd Glasson, Dale Hogan, Marion and Annie Dennis, Billy Joe and Joyce Dennis and their daughter Jackie.

been Eons and Eons of time doing that.

We walked across the bridge. No road on other side. Just a suspension bridge. There was a fence about two feet high to keep you away from the bank. A boy about eight years old climbed over the fence. There was a steel post 1 1/2 in. diameter cemented into that rock bank. The boy took a hard halt on the post and swing over the edge of that 100 ft. canyon three times and said, "Look here Mama! She laughed and thought it was smart. Everybody screamed. I said "Lady, you are crazy, that is not smart." Several said, "Mr. you are right?" That was Elberts birthday and that night we stayed in Cimerron, N.M. It snowed six inches.

While we were in Denver we went to the Museum. There we saw the assembled bones of Dinosaur and other pre-historic skeletons. Some up to I believe 35 ft. in length. Also eggs of Dinosaur broken and turned to stone. It will make you wonder how long this world has been here.

Down at Irdell last summer the Bosque went dry for the first time in the memory of man and in that solid rock bottom there are tracks of those prehistoric animals and also where their tails dug. So at the time those animals lived there those rocks were just?

You name it. Either warm mud that turned to rocks.

All of the above are just facts and cannot be refuted. It is there for all to see.

I noticed where the Consumer is blaming the farmer for the high cost of living. That is not so. In a pound loaf of bread the farmer gets 5 cents. In a \$1 box of cereal the farmer about 5 cents. In a suit of work clothes he gets \$1 to \$1.50. In a wool suit he gets maybe \$3. The same way in vegetables sold to canneries. Also look at peanut butter. The Middle man cuts it very thin to farmers.

The filling Stations have ruined their fingers changing prices.

Feel Like You're Trying to Air Condition the Entire Neighborhood?

It's not a pleasant feeling, is it? Using energy and money so fast it's like the walls weren't even there.

Did you know that a 1/16" crack around your door lets out as much cool air as a 4" x 4" hole bored right through the middle of it?

The Governor's Office of Energy Resources can help. We've got a free home-energy quiz. Just jot down some basic information about your house. We'll send you a computer analysis that tells you (1) how to make your house more energy-efficient; (2) how much it'll cost; (3) how much energy you can save; and (4) how much money you can save. You decide which of the suggested modifications make sense. In terms of increased comfort. In terms of a utility bill you can live with.

Call us toll-free at 1-800-252-9361. We'll tell you where you can pick up a quiz form in your area. And we'll answer any questions you might have. So you can begin to get your own house in order. And let the rest of the neighborhood fend for itself.

TORNADO WARNING DEVICES

When a tornado warning has been broadcast for your area you can use your TV or radio as a warning device. The following will tell you how.

USING YOUR TV SET

First - warm up your TV set and tune in Channel 13 and darken the screen to almost black (using the brightness control).

Second - turn to Channel 2 and leave the volume control down. Your tornado detection device is now in operation. Lightning will produce momentary white bands of varying widths across the screen (color sets produce colored bands). A tornado within 15 to 20 miles will produce a totally white screen and remain white (color on color sets). Should this occur, turn off your TV set, take your portable radio and seek a place of shelter immediately.

This system was discovered by Newton Weller of West Des Moines after 12 years of study. It works because every TV set has Channel 2 at 55 megacycles.

Lightning and tornados generate a signal near this frequency which overrides the brightness control. Channel 13 is at the high end of the frequency band and is not affected. This is why the darkness must be set on that channel.

USING YOUR RADIO

Use a portable radio for emergency instructions and in case of power failure. If the radio is tuned to the 550 kilocycle band, lightning will cause intermittent static. A tornado will cause steady, continuous static.

Most homes have these two warning devices. It might be well to clip these instructions and keep them on hand during the tornado season.

GORDON SPOT

Several Eastland County Cattlemen and their families went to the Texas A&M Campus Friday and burned their brands in wall panels of the new Robert J. Kleberg Animal Science Center. The branded stairway contains a panel for each county in Texas. The Eastland County panel was branded with irons from such noted ranches as the T.C. Fambro and Sons ranch at Ranger, The Terrell Ranch near Lake Leon, the Clint McCain Ranch south of Eastland, the Skeet Clark ranch at Rising Star, Mrs. J. A. Hart ranch at Alameta and the Ed Harrison Ranch of Gorman. The Donovan Ranch brand of Cisco will be burned-in at a later date. The history of each brand and interesting stories of the ranch families were left for all to see at the Kleberg Center.

Cankerworms continue to infest oaks, elms and many other trees in Eastland County. In some cases entire trees have been defoliated. Cankerworms are also called inchworms. They have a habit of moving from branch to branch or dropping from trees on silken threads. There is usually only one generation of cankerworms per year. We hope the cycle is about over. Defoliated trees should soon develop new leaves. However, you may want to control cankerworms in yard trees by spraying with an insecticide such as canbaryl (Sevin), orthene and methoxychlor.

This is a disease known as peach leaf curl. After the disease is visible, control is difficult. You need to prevent the disease by spraying in November and January with a copper fungicide such as Kocide 101. This dormant spray also controls several other peach diseases. Kocide 101 can not be used while the leaves are still on the trees.

Inflation affects your electric bill even more than your grocery bill.

Every time you go to the grocery store you can see what inflation's doing to your food bill. But because you don't buy electricity by the can, you probably don't realize how inflation affects the cost of electricity.

Fuel costs are up, particularly natural gas. Equipment costs are up. Power lines, transformers and poles cost us more every day. Just like milk costs you more every day.

The millions of dollars we must borrow to build plants to ensure your electricity needs in the future are costing us more.

The cost of building these plants is higher, too, because of inflation. And because of the time and money it takes to comply with an ever-increasing number of government regulations. The longer it takes to build, the more inflation takes its toll.

Inflation, overregulation and rising fuel costs are all making your electricity cost you more. But by using electricity wisely you can do your part in keeping that cost down in your home.

At Texas Electric, we want you to know what you're paying for.
