\_J\_ We would like to join the community in welcoming the new pastor of, the First United Methodist Church and his wife and two children to Gorman. He is filling the vacancy of Rev. Dwaine James and wife, Susan, who have moved to Alabama. Rev. Sam Partee and family come to Gorman from Blanket. They were moving in and getting settled the first of the week and were hard at work on Tuesday getting the parsonage and yard in shape. Come out and hear Bro. Sam preach his first sermon for the Gorman church on Sunday. The Partees stated they were very excited about coming to Gorman. So lets all give them a good ole warm Gorman welcome. \_J\_

The meal consisted of Spaghetti and meat sauce with French bread and ice tea. Cherry and strawberry cheese cake were served for dessert.

After finishing our meal our guest speaker, Mrs. Nedra Green, gave a very touching talk on the subject of Mothers. Following Mrs. Green, was our FHA President Kristy Barnett with her farewell speech. And she also gave a gift presentation to her mother, Johnnie Barnett and to Mrs. Ruby Lee Kinser.

Preceding Kristy was the new FHA President Caye Little, presenting the Seniors with a gift representing a token of our appreciation for their leadership through the years of high school.

Well Begin and his folks have really gotten the world in a tough spot again. Begin ordered the bombing of the nuclear site in Iraq. This attack has set off total disbelief in all the countries of the world who just couldn't believe Isreal could do such a thing. Now the U.S.A will be blamed for the incident since Begin used planes bought from the U.S.A. So again we will get slapped in the kisser for some stupid act over which we have no control. And it will be up to the Good Ole U.S.A. to try and bring things back to normal even though it wasn't our idea. It seems we always have to be the peacemakers of the entire world. Sometimes I think we should just tell all the countries who are always at each others throat that they will just have to solve their own problems. Then maybe we could balance the budget. It seems we always have to "buy" peace every time some little country goes nuts. Begin stated that they were forced to destroy the nuclear center before the Iraq's bombed the Jews. Why should the Iraq's be allowed to have a nuclear if other countries (including Israel). But I am sure the U.S.A. will get the brunt of all the flak caused by the raid. So what else is new.

Remember the clean up day at the Frank A. Gray Park this Saturday at 7:30 p. m. and be there to help plan the upcoming July 4th Picnic now in the planning stage. You are invited to come and bring a freezer of ice cream or a cake and enjoy the fellowship and fun while doing something that has to be done.

WASHINGTON (AP) - The government will allow no more than the already approved limit of peanuts to be imported into the United States this year.

Agriculture Secretary John Block said the current special import limit of 301.7 million pounds will expire July 31 as previously scheduled.

Block said expiration of the special import quota at that time would continue to ensure McCoy did two days active that the unsually large amount of peanut imports would not interfere with the sale of the American crop, which will not be marketed until later this summer.

The normal import quota is 1.7 million pounds, but it was increased by 200 million pounds in December in the wake of a severe drought that damaged substantial portions of the 1980 U.S. crop.

President Reagan, acting on a recommendation by the International Trade Commission, raised the quota another 100 million pounds to 301.7 million in April to ensure sufficient domestic supplies until the new U.S. crop.

> Through May, nearly 83 percent of the relaxed quota had been filled, the Agriculture Department reported, and foreign importers had requested government inspection for all but 900,000 pounds of the quota.

> Shellers must complete negotations for further imports under the relaxed quota by June

# Why gas is plentiful:

## **Two New Sources**

There's enough natural gas in proven and existing reserves to heat America's homes and run its factories for many years. And now gas is flowing in enormous volumes from two new sources: the tight basins and the deep basins right here in Texas and Oklahoma. Experts

believe each of these sources could double the nation's proven supply. And our pipeline system will let us deliver your share of this gas efficiently and economically. It's another reason to be glad you're served by the Lone Star system.

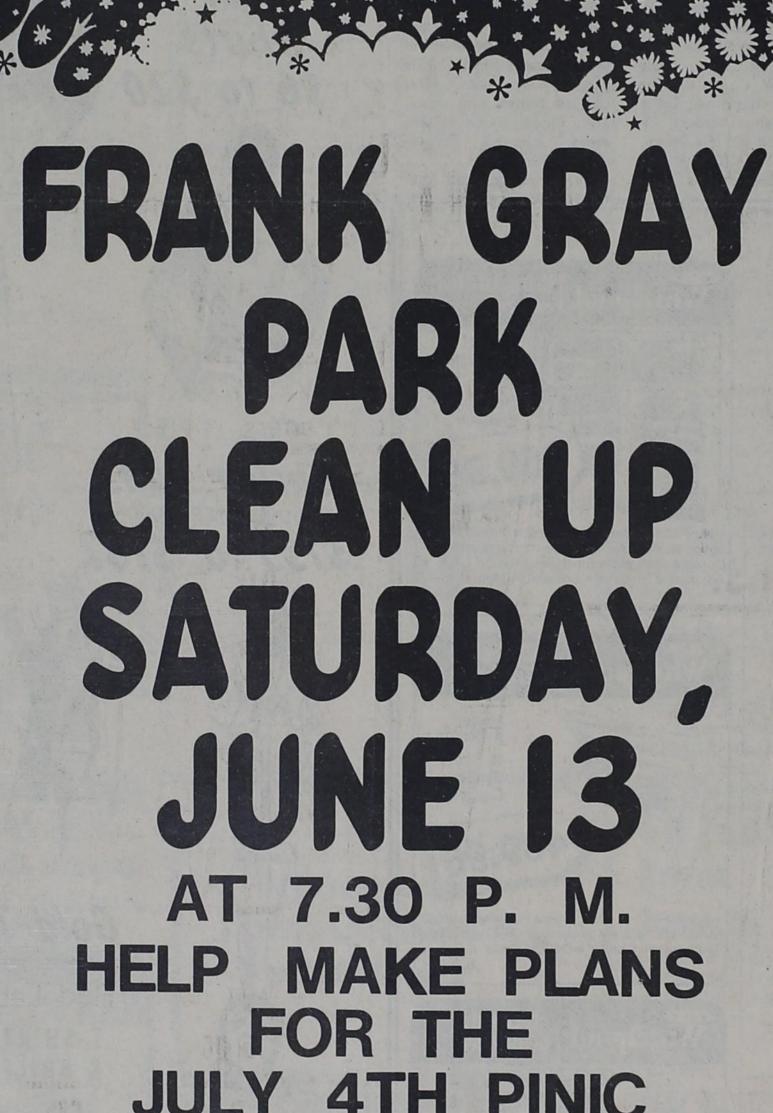

Gas. It's plentiful, efficient and right for the times.
