### from Higginbothams

It looks like mouse and you

say it like moose. It's a mousse.

Mousse is a French word which literally trans-lated, means "froth." Cooks use it to refer to a rich dish that is spongy or frothy. Mousses can be sav-ory or sweet, hot or cold

Fish, meat, vegetables, or cheese are often used for savory mousses, which are lightened with beat-en egg white or gelatin. When served hot, they are set in a dish of water and either steamed or baked in the oven.

Cold mousses make a scrumptious dessert and re light enough to follow a heavy meal or a lad-es' luncheon. Whipped cream is often added to ncrease the dish's fluffiness and add to its goodness. The classic cold mousse is chilled, but not frozer However, frozen mousses are sometimes accepted as members of the family.

A mousse is an elegant dish that is perfect for entertaining since it can be completely prepared ahead of time. It makes a great treat for the fam-ily teel ily, too!

Use your blender (from Higginbothams, of course) to create this refreshing AVOCADO MOUSSE. Serve it with an assortment of fresh, frozen, or canned fruits and shredded lettuce:

COMBINE in blender container and blend until jello is dissolved: 1 T. gelatin dissolved in 2 T. cold water, 1 pkg. Lime Jello, 1 c. boiling water. Add a c. cold water, i c. mayonnaise, I c. ripe avocado. Blend until smooth. Refrigerate until partially congealed. Fold in i c. heavy cream that has been whipped. Pour mixture into a mold greased with mayonnaise and allow to set in refrigerator until congealed. Unmold just before use, or unmold and refrigerate until use
