For more than 80 years, Lone Star Gas has been providing safe, dependable energy to its customers. By following a few simple rules, you can help make sure you and your family stay safe and sound with natural gas:

- Always have qualified service people install, regularly check and maintain all gas heaters and appliances, following the manufacturer's instructions for installation, ventilation, and operation.
- Always use a gas appliance only for its intended purpose. An oven, for example, should not be used to heat a room.
- Always keep flammable materials and substances away from gas heaters and appliances. Remember, a pilot light is constantly burning.

**IF YOU SMELL GAS** in your home, or know you have a gas leak, follow these rules:

- 1 Everyone should leave the house immediately, leaving the doors open for ventilation.
- 2 Do not switch anything electrical on or off.

- 3 Do not use your telephone (telephones use small amounts of electricity).
- 4 Do not strike a match or do anything else that might cause a spark.
- 5 Go to the nearest telephone and call Lone Star Gas Company. Wait until we have found the cause of the gas leak before returning to your home.

If you smell gas while you're outside, contact Lone Star Gas immediately.

## The Wandering Lament

No one can take what we see through these tears,  
Losing you was always our greatest fear.  
It was just yesterday when you were so near,  
But now it seems as though you were never here.

Though you left us without saying good-bye,  
What we shared, and our love, was never a lie,  
And in the emptiness of our crowded minds,  
Your name and your face we will always find,

But bitter numbness takes your place by our side,  
As these tears of agony we shamefully try to hide.  
Your name in our throats is so painful to speak;  
We the living must truly be the weak.

You took every part of us we chose to give to you,  
And left us your love and a precious part of you,  
So in these gifts to use that you have left behind,  
For you, and for ourselves, these things we must find:

All of your hopes, to help us travel the road;  
Your joy and your peace, to lighten your load;  
And your strength, to help us overcome this fire,  
So we can fulfill your one final desire:

To someday see one another again  
In a perfect world know as Heaven.

In loving member of Royce Ridens, Ashley Withworth, Annette Love, Terry Clark and all of these we love and miss.

## Old Recipe Still In Use Today

As we grow older, we tend to remember Christmas'es Past!! Looking through my old receipt book I found Ethel Harrell's receipt for Divinity Candy. She always made a huge amount and brought it to the Hospital on Christmas Day. A treat for the Nurses and Doctors on duty, who didn't get to celebrate Christmas. Mind you this was before Electric Mixers. She used a hand egg beater so in Memory of Ethel Harrell, I hope you will publish her receipt, it still works beautifully!! However, use a big bowl to beat it in or use 1/2 receipt!!

## Bach To Britten A Christmas For All Time

Christmas is a time for good music and good friends. Both can be enjoyed on December 4th at 4:00 p.m. at the Cisco Junior College Auditorium. The members of Eastland County Community Chorus and Cisco Junior College Singers have combined to perform two favorite works of the Christmas season, J. S. Bach's *Cantata #142* and Benjamin Britten's *Ceremony of Carols*.

Bach's *Cantata #142, To Us A Child Is Born*, was originally composed in Gorman but will be performed in English. Steve Zell will accompany the choruses on the organ. The soloists, Leeann Westmoreland, Cory Hull and Christ Spangler will be accompanied by Carol Stuard (harpsichord) and Nettie Wilson (cello).

The second half of the concert will

be one of Britten's most popular works, *Ceremony of Carols*, which is accompanied by Barbaradon Brooks of Abilene on the harp. The soloists in this piece are Lori Harris, Paula Harris, Mandi Senterfitt, Sally Callan, Michele Osburn, and Adrian Sheppard.

The Sunday afternoon concert which is free to the public promises to bring in the Christmas season with beautiful sounds across the centuries that can be shared with friends and family.

### FEEDING COWS THIS WINTER?

Cow/calf producers may want to do a little nutritional review of their winter feeding program for this upcoming year for two good reasons...FIRST - margins of return are pretty narrow with the decrease in market prices and SECOND - to familiarize themselves with proper feeding for optimum cow management.

Let's analyze these reasons starting with cost of inputs and margin of returns.

First, a producer needs to know

what requirements in protein and energy that a cow has and the differences in requirements in protein and energy that a cow has and the differences in requirements in protein and energy that a cow has and the differences in requirements based on stage of pregnancy or lactation. This information can be learned from any feeds and feeding books or by giving me a call and we will discuss these requirements. Then you need to know what sources are available to meet these requirements. Remember, cost of inputs and margin of return should be our main emphasis on meeting a cow's requirements with supplements.

Let's use some examples:

**COW** - Dry Cow in middle third of pregnancy - calving March-April; Weight = 1000 pounds; Total Dry Matter intake per day = 25 to 30 pounds; Total Crude Protein intake per day = .86 pounds.

**FEED SOURCE** - Coastal Bermuda Grass Hay - tested at 8% crude protein; Native pasture assume 2.5% crude protein.

**FEEDING SUGGESTIONS** - This cow would have to eat 35 pounds of native pasture to meet her protein requirements; This cow would have to eat 11 pounds of 8% hay to meet her protein requirements, however you're short 19 pounds on energy requirements because her total intake should be 30 pounds. Does your native pasture have the ability to meet the 19 pounds per day?

Next example:

**COW** - Same Cow

**FEED SOURCE** - Native Pasture 2.5% protein; 20% range cubes; This cow would require 1 pound of 20% cubes if your pasture can supply 27-29 pounds of native pasture...(that's a lot of pasture).

Now let's look at the input cost: 8% Coastal Hay - value \$50/Ton = .025cents/lb.; Total pounds of protein per ton = 160 = .31 cents/lb. of protein; 20% range cubes @ \$180/Ton = .09 cents/lb.; Total pounds of protein per ton = 400 = .45 cents/lb. of protein.

Producers should determine their available native pasture, plug in the pregnancy/lactation stage requirements, explore available feed sources and cost, then determine what the most economical source of wintering cows will be in their situation.

For more information on wintering cows, contact the Eastland County Extension Office, 629-1093.

## Delicious Drinks To Take The Chill Out of Winter

Red Raspberry Mulled Cider (left) is a winter drink to warm up to, while Citrus Pineapple Punch (right) makes a delicious chilled holiday treat.

(NAPS)—This winter, warm up the long, cold nights with festive, deliciously sweet, low-fat and non-alcoholic alternative drinks from Smucker's.

- 1 quart apple cider or apple juice
- 1/2 cup Smucker's Seedless Red Raspberry Jam
