Commission Gives Cooper Instructions as to Vice Suppression.

Stop open gambling. Stop whisky selling. Stop immoral women from parading the streets and soliciting men. Stop the punch boards and slot machines.

Force the cabarets to operate decently with the front doors, open or close them up.

These were instructions given Chief of office yesterday afternoon. Mayor M. H. to any sympathy. Hagaman issued the instructions to the new chief and his directions were agreed

No "Blue Laws."

"It is not my wish to put this city under the ban of stringent 'blu. laws;' public opinion is strongly in favor of some libertics in regards to the Sunday laws. It likes to see a show and occasionally buy a cigar or soft drink. But the sentiment of the public is openly against conditions as they have existed in this city. All I ask of a chief of police is that he make Ranger a decent place in which to live. The places operating as saloons and gambling houses must close. The downtown streets and public buildings must be freed of licentiousness until my wife or daughter or any citizen's wife and daugh-ter may pass by without seeing things that will/be an insult to their womanhood

M. R. Newnham asked the new chief to find the places selling whisky and operating gambling games as fast as he could and close them as fast as he found them. After the whisky selling, gambling and the parading of women is stopped. Mr. Newnham asked that the chief see that it continued so. In the past, he said, it would be stopped for a few weeks then break out again. Public Sentiment.

T. G. Deffebach declared that while personally he was in favor of enforcing every law as written, he realized that something had to be allowed for public sentiment and sentiment in this city was

Eddie Cicotte told the grand jury that he understood eight players were to get eighty thou-sand dollars but were "double crossed" by gamblers and so far he knew of only three, himself, Jackson and Williams, who had received any money for 'throw-ing" the series. Either Gan-dill, whom Cicotte said first ar-ranged the "throwing," or Abe Atwell, go-between of the gam-blers, got the \$75,000 which the eight players were to have re-ceived, he said. Cicotte and Jackson were not promised immunity in return for their con-fession, Replogle said, but will be .liable .to .prosecution .the same as the others.

Work is progressing nicely on both the Young and Cooper schools .and it is now but a matter of a few weeks when the shacks in these ward schools may b abandoned. The enrollment of 401 at the Young school insures that the new build-ing there will be filled to capacity on opening day.

The greatest congestion, in attendance in any of the schools is that at Centra primary. Two new teachers have been added to the corps in this building since opening day, and still some of the rooms are overcrowded. It now appears that so soon as the new buildings can be occupied one of the shacks now used in the ward schools will have to be moved to Central so as to insure for that school whole-day sessions.

The football squad is rapidly getting into form preparatory for the game next Friday. The temporary loss of Arthur Williams from the team is a distinct set back, but the boys are trying to make good the loss by greater efforts in clos training. Sofus Larsen, a Darish scientist who has recently made a report founded on researches of archives of the middle ages, has completed a work which he says proves that Skoip, the Norwegian, "rediscovered America" in 1476, sixteen years ahead of Columbus and twency years before John Cabot reached th Straight of Hudson.

Larsen uses the term "reliscovered" considering that the original discoverer was Liev Ericksson, the Norseman, in the year 1000. Barsen's researches develo he asserts, that about the year 1475 the ing of Portugal sent a message to th king of Denmark and Norway, Chri tian I, requesting him to fit out an expedition and attempt to find a sea pas sage to Asia—in reality a northwest pas sage. An old document to that effec was found in the Danish state archive The expedition was headed and piloted by the Norwegian pilot Jon Skolp, to whom redit is given for having reached as far as Labrador and found part of the actual entrance to the northwest passage. on America, first published in 1552 by Francesco Lopez de Gomara, a priest of Scville, it is mentioned that Labrador was reached for the first time by Norwegian sailors, piloted by John Scolvus (Jon Skolp), This information was first made public by the Norwegian professor of listory, Gustav Storm, in 1886, But at that time this part of the history of at Boston Store, as their agent. the discoveries was still in its infancy, and isolated as it was then, the informa-tion naturally had to be used with very great caution. Later on new material was found pointing in the same direction. One

of the sources was a famous globe, dating from 1537 and made by the Dutch physiian and mathematician, Gemma Frisius, who points out that North America was reached in 1476 by Johannes Scolvus. Johannes Scolvus is a name unknown n Norwegian history. Dr. Larsen connects it with the Norwegian surname Skolp, which means a man from the shores or fishing places of northern Norway. Stomach Was Out of Orde and Head Ached, So Kentucky Man Took Black-Draught.—"It Cured Me," He Says.

Nancy, Ky .-- Mr. Marion Holcomb, of this place, says: "For quite a long while, I suffered with stomach trouble. I would have pains and a heavy feeling after my meals, also a most disagreeable taste in my mouth. If I ate anything with butter, oil or grease, I would spit it up. I began to have regular sick headache.

"I had used pills and tablets, but after a course of these I would be constipated. It just seemed to tear my stomach up. I found they were no good at all for my trouble.

"I heard Thedford's Black-Draught recommended very highly, so I began to use it. It cured me. I keep it in the house all the time. It is the best liver medicine made. I do not have sick headache or stomach trouble any more."

When suffering from headache, constipation, stomach or liver trouble, try the old and well-recommended, purely vegetable, Thedford's Black-Draught.

Just as Black-Draught brought re lief to Mr. Holcomb, so it also has to thousands of others and should help you, too.

The Reduced Cost of Tire Mileage for Your Small Car

Do you realize that Goodyear Tires are priced no higher today than in 1910 and that their mileage actually costs less than it did a decade ago?

During this period Goodyear has been able steadily to increase the amount of mileage built into its tires and, consequently, the cost of Goodyear mileage has actually declined.

In no part of the Goodyear line has this decline been more marked than in the present 30 x 3-, 30 x $3\frac{1}{2}$ and 31 x 4-inch sizes of Goodyear Tires, made especially for small cars.

If you own a Ford, Chevrolet, Dort, Maxwell or other car taking these sizes, go to your nearest Service Station for them-get the unusual value contained in their construction and delivered in their mileage.

TODAY she can "make a train" or fix a tire as well as anybody.

As soon as a luxury becomes a necessity the point of view changes.

Two or three years ago you would have listened to more varying opinions about tires than you could shake a stick at. Mileages, construction, treads and whatnot.

It's different now. Tire users are working towards a unanimous feeling.

You express it one waythe man down the street another. But sifted down it amounts to this:

That the only way to settle

Select your tires ac-cording to the roads they have to travel: In sandy or hilly country, wherever the going is apt to be heavy - The U. S. Nobby.

your tire problem is to get a tire of known value and stick to it.

III

We recommend and sell U.S. Tires because their value is known.

There's no guess about it.

It was the U.S. quality policy which led to the perfection of the straight-side automobile tire, the pneumatic truck tire-two of the greatest additions to tire value that have ever been made.

As representatives of the oldest and largest rubber concern in the world, we are in a position to tell you something about tire values. Come in some day and talk to us.
