Girl in Case Beautiful and Intelligent Special to the Times. LAWTON, Okla., Nov. 26.—Clara

Smith, 27 years old, for whom the officers are searching, alleging that she fired the shot from which Jake L. Hamon died this morning, was born and reared in Lawton. For ten years she has been in close touch with the dead oil operator. When 17 years old she entered his employ, and in 1913, accompanied him to Ardmore as secretary and stenographer. From a girl of common school education and little experience she became mentally trained until she frequently held the position of confidential advisor to Col. Hamon, in matters pertaining to his oil operation, railroad building, townsite plans and even politically, according to statements made by his friends. It is said that she advised him last year not to enter the race for national committeeman, telling him that he could not win.

Married Hamon's Nephew. In 1916 she married a nephew of Jake Hamon's, a son of a dead brother. She and her husband, it is said never lived together after the ceremony. At this time young Hamon joined his uncle's office force in Ardmore. For a time following her marriage the young woman lived in Oklahoma City.

Chicago is now undergoing a reform wave. Other cities have had them in the past and the same cities will have them in the future. For vice, like hope, springs eternal, if not in the human heart, at east in the crowded marts of human kind. It would be the same in smaller places if it were granted the immunity from publicity which obtains in cities where no man knows his neighbor. Even in cities, it boldly and more boldly flaunts itself in the faces of citizens, until finally they are aroused and another clean-up is staged. As regularly as the swing of the clock's pendulum the same action recurs.

Ranger has many of the characteristic f the larger cities. One of these is the natter of attending to one's own business and not prying into their neighbor's. Padre Martinez a few days ago received an urgent sick call which took him away from his rectory a long distance on horseback through the rugged mountains of that vicinity. Accompanied by a boy, he began the long trip, carrying a rifle, a hunting knife and some rations. Suddenly, while in the rocky fastness of the mour tains they were attacked by two large bears. The boy fainted but the priest kept his composure. He shot one bear killing it instantly. In the meantime the other bear jumped on the unconscious form of the boy and was preparing to tear the flesh when Padre Martinez came to the rescue with his hunting knife. As the blade plunged through the heart of the bear, the animal relaxed its grasp on the boy and gradually sank to the ground where it bled to death.

they've read stories snappy of friends, in and out of the town. and they've read all the ads and learn to save scads, buying advertised goods of renown.

The home-town newspaper records every caper of people, their doings and things, as the town's biggest booster, it's up with the rooster, every modern improvement it brings.

But circ'lars and hand bills, that clutter the doorsills, are poor advertising at best; from the porch they are swept, while the newspaper's kept to be read during leisure and rest.

Now the moral is plain; when you start a campaign to bring folks new harness or ice, put your ad where 'twill tell them, what you have to sell them, and how much they save on the price.

Put your ad where they'll read it; constant sight makes them heed it; thrifty readers will come to your store. Here your ad is expressive while the hand-bill oppressive, is scattered from gateway to door.

T'S not a bit of trouble to have plenty of good things to eat on hand all the time, when you use Calumet Baking Powder.

It never allows baking trouble. You don't "dread" to bake. There is nothing to worry about—and that really is the hardest part of it.

Mix up a batch of biscuits or the finest kind of cake—it's all the same. There is never but one result—the sweetest and most palatable of foods.

There is not as much worry over baking costs either. Because Calumet costs less—when you buy it the price is moderate.

It costs you less when you use it—because you don't use as much of it—it has more than the ordinary leavening strength.

You get more out of the flour, sugar, eggs, shortening, etc., because there are no failures-no waste. The most critical of baking powder judges gave it highest awards, World's Pure Food Exposition, Chicago,—Paris Exposition, Paris, The largest selling brand in

A pound can of Calumet contains full 16 oz. Some baking powders come in 12 oz. cans instead of 16 oz. cans. Be sure you get a pound when you want it.
