Way to Ranger to Be Pointed Out By Signs on All Roads.

Efforts are being made by the New Chamber of Commerce to replace the canyon road to Strawn as a detour while that portion of the Bankhead highway between Ranger and Strawn is being surfaced, it was learned this morning. By cutting a temporary road through a field, it is thought that a better detour can be furnished tourists until the Bankhead highway is completed through this section in the late winter or spring.

Sign posts are to be put up along whatever route is decided upon to replace the present detour. Sixty such signs in the shape of an arrow pointing toward the city and bearing the lettering "To Ranger-Chamber of Commerce" have been contracted for and will be put up on all highways leading into Ranger.

The party posting the signs will start in Mineral Wells, Eastland, Gorman and other surrounding towns and will place them at intervals along the statute against syndicalism, passed in seized. various routes. TO KEEP HER HOME!

All persons who have been bitten by a dog in the last week are warned by the health officers to make an investigation to determine whether the dog was mad. A report was received yesterday that a woman resident of the Strawn road vicinity, whose name could not be learned, had been bitten by the same black puppy which attacked eight other persons Saturday. The woman, it is stated, did not know that the dog in question had been found on examination to be infected with rabies and was consequently not given treatment. Friends are understood to have advised her yesterday of her danger.

Preparations have been made to give the Pasteur treatment in Ranger at the Terrell laboratory, under direction of the city health officer and seven children are now undergoing treatment

Approximately thirty dogs, most of them in the Strawn road vicinity, have been killed by the police since the rabies infection became known the first of the week and others found running loose on the street are to be killed. The authorities explain that while there is no occasion for any panic, it is necessary for people owning dogs to co-operate in the protection of the city by keeping their dogs tied up or

MIKE COLLINS.

Michael Collins, hero of the Irish revolution or whatever it may be called, is dead, slain by bitter-enders who could not recognize that practical accomplishment of desired ends, and then peace, is more desirable than a continued turmoil in the name of liberty, after liberty has been achieved.

Therein Collins proved himself a cost and places the welfare of his people above petty pretense and dreams of glory, to be won only with needless and appalling pain and suffering.

Ireland can do its own worrying about what the future holds, with Griffith and Collins, the two great moderate leaders, claimed by death. But all the world can look to Collins as an example of what a national thero should be. America needs his sort-broad-minded men who can be wise, be moderate, strive for peace when strife has gained its object, and remember that common sense when an object is gained yields far more to human wellbeing than does fanatic-

BREAKS GIVE

STAMFORD, Aug. 24.—The break went against the Nitros yesterday and they dropped a fast game to th Colonels, 2 to 1. Lybrand yielded only four hits and was given errorless support but Mitchell staved off threat after threat and blanked the visitors except in one round, when a pinch rap sent Pyle across the pan.

A triple by Williams gave Stamford a score in the first round and a walk followed by Baker's safety put the winning marker over in the sixth.

The Nitros came close to victory in the ninth, when they died with two on after considerable jockeying of play-

SHALLOW SAND STRUCK SOUTH OF EASTLAND

EASTLAND, Aug. 24.-The territory about three miles southwest of this city has furnished another important surprise. The Plateau Oil company's No. 1 Owens encountered the shallow sand, making 2,000,000 feet of gas, and is estimated to be making 100 barrels of oil. Some estimates have been as high as 150 barrels. It is flowing steadily from the 1,340-foot sand. It is located in block 3 of the H. & T. C. railway survey and is about a half mile north of the sensational Car-de-zone 3,350-feet Hough well that opened up a new

care of the production. George Beggs of Fort Worth struck the same sand in his Gibson well but it only made dry gas. This well is a half mile south of the Ovens of the Plateau company.

> This letter has been mailed all over the Seventeenth district during the past week; and published in all the newspapers as political advertising. It is prepared and circulated by Mr. Blanton himself as a campaign document, at an expense of thousands of dollars, and that notwithstanding his statement that he could not meet Mr. Callaway because he had already spent all the money authorized by law.

The fact is that Mr. Callaway never sought to obstruct the draft or any war measure. His speech in Comanche in August, On Holding Love 1917, did more to promote the draft and adherence to the law than any one thing done in the county. During the war Mr. Callaway personally directed and took part in the work on his farms, which produced wheat and other food products enough John Thurman, C. C. Craig, C. D. Mr. Blanton prefers this form of campaign to coming out in the open and meeting Mr. Callaway like a man, as he has challenged him to do through the columns of your paper and through circulars distributed over the district. I see that 77 itizens of Lometa, Texas, sent Blanton a telegram asking him o meet Callaway there, and I understand that 50 citizens of Santo and over 200 citizens of Carbon and Gorman on last Saturday sent him similar requests, offering to pay all expenses if he would meet Mr. Callaway and answer the charges made against him. He has refused all petitions, though he is still in the district and has no other speaking dates which would inter-Bracken has lived in Ranger for sev- This preparation for the treatment fere with his meeting Mr. Callaway.

CAVINGS resulting from capacity manufacture are now offered to the buyer of the Studebaker Special-Six. The new price of \$1275 is \$200 under its former price.

Studebaker reductions became effective August 1st after Studebaker had completed the biggest seven months in its 70 years' history. And at a time when Studebaker had 15,000 unfilled orders on hand! It is a Studebaker policy of long standing to share manufacturing savings with the customer.

The performance, durability, comfort and quality of the SpecialSix are recognized everywhere. And here's new proof of its endurance: Studebaker's sales of repair parts, covering accidents as well as service, for the first seven months of 1922, were less than they were for the first seven months of 1919, in spite of the fact that 186,000 new cars were sold and put into operation since January 1, 1920.

The Special-Six at \$1275 represents a new standard of valuethe greatest value Studebaker has ever offered, and that means a value that is positively unapproached anywhere in the industry.
