MILLIONS OF FAMILI

"I will build a car for the multitude" Said Henry Ford in 1903-Read how the fulfillment of that prophecy is now made possible through the

Ford Weekly Rurchase Flan

For many years it has been Henry Ford's personal ambition to make the Ford the universal family car—to put it within the reach of the millions of people who have never been privileged to enjoy the benefits of motor car ownership. During the past fifteen years over 7,500,000 Ford cars have been placed in the hands of retail customers—more than a million and a half of them within the past twelve months—and yet there are still millions of families who are hopefully looking forward to the day when they can own a Ford. And now the way is open.

Under the terms of this plan you can select your Ford Car, set aside a small amount each week and you will be surprised how soon you will own it. In the meantime your money will be safely deposited to your credit in one of the local banks where it will draw interest.

Think it over. Five dollars will start an account. The whole family can participate in it—father, mother, brothers and sisters each doing a little. Why not start today. Stop in and talk it over with your local Ford dealer. He will be glad to fully explain the details of the plan and help you get started toward the ownership of a Ford car.

TO BE CUT INTO FARM TRACTS

Big Section In Southwest Panhandle District Will Be Cultivated.

AUSTIN, April 14 .- A land deal was made here yesterday when 120,-000 acres of the Yellowhouse ranch in Lamb, Hockley, Cochran and Bailey counties changed hands, the consideration being \$1,500,000. It was sold by J. P. White, associate of the late Maj. G. W. Littlefield, to Malcolm H. Reed and associates. White and Littlefield owned the land jointly until a few years ago when it was divided and the former now sells his share.

Yellowhouse was a famous ranch and it passes out as a cow ranch and will be given over to farming. The Reed interests are to divide it into 177-acre tracts to sell it to homeowners. It is said to be good cotton land and each tract is to have a start in cotton growing. All of the land is said to be tillable.

Times Have Changed

FEW centuries ago the word "idiot" meant a member of the Roman citizenry. Citizens in general would resent the implication that the word conveys, today. There are still idiots, but the application of the word is entirely different from what it was of old.

There was also a time when some advertisements had to be taken with a grain of salt. A few misguided advertisers thought they could sell their goods better by misrepresenting them. Those advertisers have long since gone out of business or mended their ways. Hard experience taught that untruthful advertising didn't pay.

Other advertisers proved that the only way to advertise successfully, make regular customers, and build up good will was to tell the absolute truth about their goods.

Today you can depend on the merchant or manufacturer who advertises. The concern that tells you frankly what it is doing is a good concern with which to do business. The store that advertises is a progressive store that has something worth while to say to you. And companies that advertise their products or services believe in them. You can safely share their confidence.
