LLING RACE IS THE VERY LATEST SPO

SWEET CLOVER **VALUABLE FOR**

Properly Inoculated.

county, according to County Agent R. H. Bush, who has been devoting considerable time to the the study of this plant and the results from planting it in this section.

Three years ago, Mr. Bush states, W. B. Starr, a successful farmer living south of Cisco, carried on a demonstration to determine the relative values of hubam and sweet clover for grazing purposes. The hubam is an annual and it came up and the control of the study of the study of this plant and the results from June 24—John Cabot discovered east coast of Canada, 1497.

June 28—First American troops landed in France, 1917.

June 28—Treaty of Versailles signed, 1919.

June 30—Accession of Queen Victoria of Canada and Accession of Canada and Accession of Queen Victoria of Canada and Accession of Canada is an annual and it came up and grew well, but its foliage died early after it had seeded. Sweet clover is a bi-annual plant and produces a ranker growth under adverse conditions and holds its foliage much longer than hubam.

Demonstration Succeeds.
After the demonstrations with hubam and sweet clover, Mr. Starr planted two acres to sweet clover and inoculated it with government bacteria. This inoculation material did not show any appreciable results, but enough plants caught to produce regide regide to the control and Car Pitches sults, but enough plants caught to produce rapid growth. Last year Mr. Starr planted two more acres to sweet clover and again inoculated it with government bacteria. It seemed that every stalk was inoculated this time and he now has a growth about three and one-half feet high and as thick on the ground as it can grow.

Into Ditch.

Mrs. G. W. Carpenter, about 35, was killed Sunday about noon between Gorman and DeLeon, when the touring car she was driving ran over an embankment and overturned, her neck being broken. Her two children, 7 and 3 years of age, were only slightly bruised.

"It is worth anyone's time to see these demonstrations, especially if they are interested in growing crops for grazing purposes," Mr. Bush says.

Last year, according to Mr. Bush, one of the banks at Cisco distributed 100 pounds of sweet clover seed that had already been inoculated to about 25 farmers of that section and about 50 per cent of these showed that the bacteria caught and the crop did well.

Plants Grow Rapidly.

Other fields of sweet clover have been planted in the county without inoculation and on hard land it seems to have done well. This, Mr. Bush says, is conclusive proof that some of Eastland county's soils are already inoculated for sweet clover and that it will grow rapidly from the beginning.

"Uncle" Bob Harper, who lives in

The 91st district court grand jury for Eastland county was empaneled this morning by Judge Geo. L. Davenport, who gave them in charge the entire penal code of the state of Texas and especially charged them on bribery, bigamy or unlawful marriages, false swearing, violation of the prohibition laws, arson, rape, burglary, embezzlement, swindling, fraudulently disposing of mortgaged property, theft, especially of automobiles, and false weights and measures.

The court appointed Will Tyler of Rising Star as foreman and left the appointment of assistants, such as riding, walking and door baliffs to the grand jury.

The court will be in session throu-

ghout the month of June and the grand jury was instructed not to adjourn during that time, but was told by the court that if they caught up with their work they might recess for a short period.

WORKING FAST

Contest Is on to See Which Can Reach Pay Sand First; Tie Race Possible.

Two drilling crews in the Barney Carter pool, about seven miles north-west of Ranger, are engaged in a race to see which can bring in its well first. Both wells were expect? ed in today or tomorrow, in fact, one of them could have been brought in yesterday, it was said, but was held back until assured of adequate storage facilities.

One of these wells is the Pritchard No. 1 of Jerome McLester and associates on the northeast 40 acres of the Pritchard farm and offsetting the Pritchard No. 1 of G. C. Barkley

LOS ANGELES, June 1.—Los Angeles, world movie capitol, became the mecca of Shrinedom today, with rail and motor caravans bringing thousands of nobles to the fifty-first annual conclave of the Imperial Council Ancient Arabic Order Nobles of the Mystic Shrine.

For several days the advance caravans have been pouring into the city, by special trains and in motor droves, after long transcontinental treks. Every delegation of the invading nobles was greeted by a noisy welcoming party. Bands blared and trumpets sounded as the oncoming pilgrims were escorted to the mystic playground arranged for them by their California hosts.

California Shriners for more than half a year had boosted and prepared for the historic pilgrimage to the western coast and it was estimated at least 200,000 nobles from every section of the country would have arrived before nightfall for the "greatest celebration in Shrine history."

Week's Festivities.

Although the official festivities were scheduled to begin tomorrow, lasting throughout the week, downtown and suburban atreets were already alive with thrangs of visiting difference in the cash of the came that the cash of she came the depth.

All drilling records for this country and probably one for the state that depth.

All drilling records for the state that depth.

All drilling records for the state depth, which extend the two crews. Jerome McLester, drilling contractor for Barney Carter, started May 4. Both crews have drilled 3,500 feet since that time, with McLester gaining one day on the othe crew. A total of 25 days have been consumed by McLester in drilling the well 3,500 feet and 25 days was the number required by Ochiltree to drill the Langford No. 3 the same depth, which includes Sundays, making 20 drilling days.

Although no reward is in sight for the western coast and it was estimated at least 200,000 nobles from every section of the country would have arrived before nightfall for the western coast and it was estimated at least 200,000 nobles from every section of the country w

BIBLE THOUGHT.

I am Alpha and Omega, the be ginning and the ending, saith the Lord, which is, and which was, and which is to come, the Almighty.—Revelation 1:8.

Universally laws are supposed to hostesses, Miss Ruth Hagaman and be made by legislative bodies. The mesent world court proposal is that present world court proposal is that supper for Fort Worth. the laws are to be made by "scholars" after the court is organized. It has often been demonstrated that when entrusted with law-making our best scholars often turn out to be "duds." International laws, like other laws, are apt to be best framed by an assembly of men from all walks of life-business men, scientists, manufacturers, lawyers, doctors, tradesmen, editors, and men generally fami-

liar with practical affairs. It would seem to be a wise thing first for all nations to enact a system of laws to be known as international law. That being done, the next step would be to organize a court to interpret the laws in cases of controversy.

WHAT TAKES MEN AWAY?

Every year 460,000 men in this country over 20 years of age leave home, never to return. Death claims them. A few thousand also leave through the divorce courts. About 133,000 men leave home annually through the courts-less than onethird of the number who leave home through the cemetery.

Out of the 460,000 men over 20 years of age who will leave home this year by the cemetery route, 118,-300 will leave home by the heartdisease route; 53,000 by the kidneydisease route; 41,000 by the apoplexy route; 38,500 by the cancer route; 47,500 by the tuberculosis route.

If every thousand men walking down a certain street were warned that 8 to 20 of their number would founder of Oneida Institute, tthe fabe killed in that street during the year by falling masonry or other street hazards, they would certainly story at Chautauqua. turn into another street. Yet, statistics show that number are killed by accidents, and that 65 per cent of the men and women who pass green cemetery.

Swimming Party To Honor Visitors

BORAH AND THE WORLD COURT
Senator Borah's plain and understandable position relative to a world court is to first get some laws in writing and then set up a world court to declare and administer them, is seemingly unanswerable. The suggestion is good as regards domestic laws and courts, and there is no conceivable argument why international law and world courts should not come under the same rule.

Miss Ruth Hagaman and Miss Helen Gholson of Ranger entertained with a swimming party and chicken barbecue at the Leon Lake, Sunday afternoon in honor of Mr. and Mrs. Richard Phillips of Fort Worth. ELECTRIC IRON AND CHALK GREASE SPOT REMOVER You may not think of an electric iron as a remover of grease spots but nevertheless it can do a very nice job if properly used. If the offending grease spot is on either silk or woolen clothing first spread the garment on an ironing board with a layer of porous paper imme-diately beneath it. Then cover the spot with a sprinkling of powdered French chalk and put another piece of porous paper over that. This done connect your electric iron and when it becomes thoroughly heated iron the paper above the grease spot. In five or 10 minutes, depending

upon the particular grease spot and how old it is, the job will be done. Then either brush off the French chalk with a clothes brush or better yet get out your electric cleaner. In the latter procedure the upholstery tool and flexible hose should be used and the French chalk will be speedily drawn into the cleaner bag instend of settling all over the room in the form of a fine white dust. When all the chalk has been clear-

ed away you will find that the grease spot has also vanished and unlike the gasoline method of cleaning spots there is no chance with French chalk and the electric iron of a ring being left on the goods. The heat of the electric iron melts the grease so that it may be more readily absorbed by

Just Such Help

American Legion

Wants for Veterans

In the sales engineer of the Celite Products company, of Houston, it would be difficult to recognize Private Frantz P. Brogniez, who was discharged from headquarters company, 143rd infantry, 36th division, in January, 1918, because of physical disability. A helping hand extended to him, gave Brogniez a "lift" over his post-war difficulties and enabled him to reach the responsible position.

To bring to every disabled world war veteran in need the type of help that meant success to Brogniez is one of the big tasks which the American Legion hopes to accomplish un-

abled him to reach the responsible position.

To bring to every disabled world war veteran in need the type of help that meant success to Brogniez is one of the big tasks which the American Legion hopes to accomplish under the national \$5,000,000 endowment fund for disabled veterans and orphans of former service men, now being founded. Income from the fund will be used to assist and supplement the government's work for the disabled.

In September, 1920, Brogniez, helped by the government, enrolled in a course in chemical engineering at the Rice Institute at Houston. He was graduated in 1923 with a B. S. degree in chemical engineering. In addition to his chemical studies, the veteran studied business administration during summer terms at the Univeristy of Texas and petroleum chemistry in the laboratories of the Sinclair refinery at Houston.

In his present work Brogniez acts both as sales manager and advisory engineer for his concern in the southwestern territory. He is pointed to by the American Legion as a living example of the justice and wisdom of giving the disabled veteran a little help in re-establishing himself in life.

Letters Should Be Correctly Addressed

A letter, postcard, parcel, or news paper, entering the mails is simply a piece of mail.

If, because of inadequate or in-

collect address, and in the case of the package—improper wrapping—a piece of mail must be taken out of the regular postal machinery for "directory service" or "hospital service," it becomes a nixie.

575
If the postal sleuths are able to correct the address, or return to

514 sender for a better one, it again be-436 come a piece of mail—though "de-447 layed mail" is the better sobriquet. If, after an exhaustive effort, the

postal "detective" must give up the puzzle, and there is no return address, the piece of mail is consigned to the dead letter office, where it again changes its name to dead letter or dead parcel, as the case may be.

Its period of evistence as a Nive speeking heaving just here investigation.

Athletics Has Big Part In University Student Activities

AUSTIN, June 1 .- Approximately AUSTIN, June 1.—Approximately 70 per cent of the men students of the University of Texas are engaged in some form of competitive athletics, according to statistics recently comaccording to statistics recently compiled by Berry Whitaker, of the college of phisical activities. This is lege of phisical activities. This is of the university, and is about seven per cent above that of other universities in this section. This year there were 2,132 individuals actively engaged in athletics, with the intramurals leading in number of participants. This figure represents 69.9 per cent of the male students in the per cent of the male students in the university and embraces only those who were supplied with equipment by the college of physical activities. The sum total of athletic participants would average around 80 per cent, according to L. Theo Bellmont, dean of the college of physical activities.

Of the 2930 men participating in intramural activities, 165 took part in football, 1144 in basketball, 933 in baseball, 1144 in basketball, 933 in baseball, 160 in track, 95 in tennis, 67 in wrestling, 62 in cross country, 42 in hiking, 141 in handball, 59 in swimming and 62 in golf. These figures show an appreciable increase over preceding years due to the efforts of Berry Whitaker in encouraging intramural activities accountries. couraging intramural activities, according to members of the staff of the athletic department.

Regular physical training classes have enrolled 1705 students, who engaged in football, field ball, basketball, handball, tennis, golf, cross country, weight lifting, wrestling, boxing, fencing and swimming. These courses are over to freshmen and ourses are open to freshmen and

Varsity sports have 536 participants, including 283 football men, 72 in baseball, 58 in basketball, 84 in track, 18 in tennis, 11 in wrest-ling and 10 in cross country.

BY CHARLES P. STEWART | Agricultural Department, to have NEA Service Writer .

ASHINGTON - With the THAT the coast guard's antipublic health service strain-ing every nerve to stamp disease out, the Agriculture Dehooch blockade isn't all that it's advertised as being is the interpretation placed here on Wayne B. Wheeler's latest talk of enlisting the Navy Department in the war. The Anti-Saloon League, partment is racking its brains to start new ones—diseases of bugs. A first-class, very deadly, highly contagious bug disease is the best way of dealing with the pests. according to Wheeler, its chief at torney, has opposed the navy's em-Spraying, gassing and all me-chanical methods of exterminating ployment in enforcing prohibition except as "a last resort."

them are satisfactory enough as far as they go, but they're not as comprehensive as a good epidemic. Besides, they're expensive, hard work and involve continually keeping at it. A disease, once started, runs automatically. It Besides, the Justice Department ruled against it two years ago. But the law can be changed, Wheeler remarks. On land, he mentions the army. George Washington, he recalls, used it "in 1794 to suppress the whisky rebellion in western Pennsylvania. If another whisky rebellion develops which cannot be suppressed by civil au-thorities I believe Uncle Sam has wearing off, grow worse-for the THE difficulty is to find the I right kind of diseases for all

as much red blood in his veins as he had 131 years ago."

Though Wheeler adds that he has "no reason to believe the coast guard and civil authorities will the different varieties of bugs. Of course the department's hostility toward them is based on their appetite for farm products. They eat millions of dollars' worth annually. The urban public may not realize this but farmers do. fail in their attempt to suppress rum smuggling and bootlegging." official Washington ventures the guess that he wouldn't be suggesting military and naval measures if he weren't thinking about them. What's more, the bug birth rate is increasing alarmingly—much faster than the death rate, despite all science can do. The Agriculture Department lays this largely

A NTI-TOBACCO crusaders in and around Washington have launched a drive for \$1,000. time may not be ripe, most of them agree, for absolute prohibition of the weed by law, but they do favor legislation against cigarets and against smoking in such public places as elevators, restaurants, theaters, hotels and railroad stations. Ultimately, when the country is educated up to it, they hope for an enactment suppressing tobacco altogether. Dr. Harvey W. Wiley, notable for his pure-food and drug activities during a long term as chief chemist for the Agriculture Department, is perhaps the best known of the moveand fatal-send them in to the ment's supporters.

Arthur with Sour Lake and Batson. farms.

to the destruction of birds. It's been checked now, but it went on almost uninterfered with until

quite recently. The department estimates there are only about half as many birds today as 40 years ago. Birds eat bugs as fast as bugs eat crops, but only half

enough of them can't get away with a sufficient quantity. The balance has been disturbed. "Not

all the government aid in the world," as one departmental ex-

as much as twice as many birds could."
