

RECORD CROWD SEES KENTUCKY DERBY WINNER

"Behave Yourself" Walks Away With \$50,000 in 2:04 1-5 on Fast Track.

LOUISVILLE, Ky., May 7.—"Behave yourself," Kentucky-bred 3-year-old, is the winner of the Kentucky derby.

The little brown colt, son of Marathon and Miss Ringlets, from the stable of E. R. Bradley of Lexington, Ky., flashed across the wire a winner, his stable mate, while a record-breaking crowd of 60,000 spectators stood on tiptoes at the Churchill Downs course this afternoon.

Black Servant Second. Black servant, which acted as pacemaker, nearly the entire distance, finished in second place, while Purdy, the crack filly, from the stables of Harry Payne Whitney, coupled with Tryster as the public choice, pulled up in third place.

The race carried \$50,000 in added money, the richest prize for 3-year-olds in the world. It gives \$38,450 net to the winner and \$10,000 to the second Bradley entry, so the Lexington turfman won approximately \$50,000 in addition to several big wagers.

SEAMEN SEEK WORK IN LARGER NUMBERS

BALTIMORE, May 7.—More men applied today at the office of the Seamen's Service bureau for work on American vessels than on any day since the strike began a week ago, according to F. H. Harrison, in charge of the bureau.

"Living Wage" an Untried Theory of Socialism, Railroads Declare

JUDGING MOST BEAUTIFUL CHILD IN FRANCE

To find the most beautiful child in all France, special judges have been assigned to the different districts and there decide upon the entrants in the national child beauty competition.

MOTHERS' DAY!

WASHINGTON, May 7.—Observance of Mothers' day tomorrow by every officer and enlisted man in the army was asked today by Secretary Weeks.

NAT'L FOREIGN TRADES COUNCIL CLOSES ITS EIGHTH CONVENTION

CLEVELAND, May 7.—With unanimous adoption of the foreign trade program for the coming year as recommended by the general convention committee, copies of which will be sent to President Harding, members of his cabinet, senators and congressmen, the eighth annual convention of the National Foreign Trades Council closed a four-day session here this morning.

JOE BURKETT HAS NO RIVAL YET IN RACE

With the announcement of Representative Joe Burkett for the position of senator from the Twenty-eighth district, politics in Central West Texas threatened to be warm for the next month.

SITUATION IN POLAND SHOWS IMPROVEMENT

OOPELN, Upper Silesia, May 7.—French officials here reported that the Poles are evacuating the Rybnik area and are showing an inclination to withdraw from other sections of the industrial region.

MILLIONS IN FOOD SENT TO EUROPE BY AMERICAN FARMERS

HURON, S. D., May 7.—Farmers in ten states contributed 431 carloads of gift-corn for the relief of starving people in Europe and the Near East, according to the report of Carl Vrooman, general director of the gift corn project for the American Farm Bureau Federation.

HARRISON TAKES RAP AT TARIFF PROPOSAL

WASHINGTON, May 7.—Further consideration of the emergency tariff bill today was marked by the introduction of two additional amendments and an attack on the measure by Senator Harrison of Mississippi, Democrat.

FEDERAL COAL COMMISSION IDEA IS ABANDONED

WASHINGTON, May 7.—A provision of the Frelinghuysen bill to provide for a federal coal commissioner was eliminated today by the Senate interstate commerce committee, which voted to report the measure to the Senate.

Ranger Postmaster Under \$1000 Bond on Indictment

ABILENE, May 7.—J. F. Connell, postmaster at Ranger, has been indicted by the federal grand jury on a charge of embezzlement. He made an appearance bond here Saturday in the sum of \$1,000.

L. J. Brian, president of the First National bank at Caddo, was also indicted by the grand jury under an embezzlement charge. It is alleged that he embezzled public money. His bond was placed at \$5,000 and was made. No further information could be had concerning the charge.

JAPANESE WOMAN IS NOTED BANDIT LEADER

TOKIO, May 7.—According to a dispatch from Vladivostok, a Japanese woman living there who is a leader of a notorious band of mounted bandits of Nikolaevsk, left Vladivostok a few days ago to take up active command of the bandits and avenge the death of 125 Japanese residents in Siberia who were murdered by Bolshevik band near Nikolaevsk in June last year.

GERMANS ARM TO RESIST THE POLES

KRUEZBERG, Silesia, May 7.—German reichswehr officers have assumed control of the Kruezberg district. Two thousand army rifles have been issued and guards thrown around the town to resist the Polish forces which are now encamped outside Rosenberg. The Polish army is estimated at 5,000.

MAINTENANCE OF WAY EMPLOYEES ARE STILL BARRED BY FEDERATION

CINCINNATI, May 7.—The United Brotherhood of Maintenance of Way Employees and Railway Shop Laborers, with its membership of about 200,000 cannot be reinstated in the American Federation of Labor until it has turned over to the building trades its members now engaged in station construction work.

FRENCH CENSUS TAKERS MISS PREMIER BRIAND

PARIS, May 7.—Aristide Briand, premier of France, strangely enough was not counted in this year's census as a resident of France. He happened to be in London on important business the day the count was taken. This omission, however, and a great many others was corrected before the final figures were given out.

STANDARD ON WHICH 'SOME WANT TO LIVE'

Says Public Won't Countenance Super-privileged Class of Railroad Employees.

CHICAGO, May 7.—To adopt the theory of the living wage as a basis for determining the railroad wages would be to accept an untried theory of state socialism or the continuation of a super-privileged class, according to Job W. Walber, summarizing up testimony of the carriers in the wage reduction cases before the railroad labor board today.

TWO MEETINGS OF INTEREST TO OIL MEN DUE

The price of oil will be the occasion for two meetings during the next week which will prove of interest to local oil men. One of these will be held in Ranger, the other in Wichita Falls.

CRUSHED STONE ON CADDO ROAD MILE AND HALF

Crushed stone on the Caddo road had been placed for a distance of about one mile and a half late Saturday afternoon. A part of this distance the stone had been rolled and otherwise prepared for the asphalt screenings that will make up the final coat.

FRENCH DIPLOMAT SAYS FRANCE DIDN'T OFFER GERMANS PEACE

PARIS, May 7.—Gabriel Hanotaux, formerly French minister for foreign affairs, has emphatically denied the statement by Count von Bernstorff, who was German ambassador to the United States, that France was ready to make peace with Germany in September, 1914, but was prevented from doing so by intervention of England.

RANGER HI TO HAVE CLASS OF 13 GRADUATES

A class of thirteen will graduate from the Ranger High school when it closes May 30. Of this number six are boys and seven are girls. The boys and seven are girls. The baccalaureate sermon will be preached May 28. It is not known at this time who will preach the sermon.

H. C. L. IN FRANCE IS SLIGHTLY REDUCED

PARIS, May 7.—The cost of living in France has decreased slightly since a year ago while the price of many necessities remains unchanged. Meat of all kinds is as dear as a year ago, despite the fact that livestock on the hoof sells much cheaper. A decrease is promised by the butchers after an ultimatum by the minister of provisions.

CHURCHES OF RANGER WILL HONOR MOTHER

Presbyterians Offer Special Program; Christian Tabernacle Will Be Dedicated.

Ranger churches all will celebrate Mothers' day today with special programs, relating to the occasion. The Christian church will dedicate its tabernacle on Main street, with the dedicatory sermon being preached by Rev. J. B. Holmes of the Texas Christian board of missions.

A special Mothers' day program has been arranged for the morning service at the First Presbyterian church. Special invitation is given to mothers to be present and to the men who are in Ranger who want to honor mother. A program of music has been prepared as follows:

"Mother O'Mine"..... Miss Mavis Douglass "Toll Mother"..... The Tabernacle "Mrs. A. A. Abney and Chorus. "Mother's Prayer"..... O. J. Gibson "Dear Old Pal of Mine," (arranged for Mothers' Day)..... Mrs. J. B. Ames "My Mother's Bible"..... Choir Duett—"Home Sweet Home"..... Mrs. R. L. Sheppard, Lytton R. Taylor. Solo—"My Mother"..... Mrs. L. S. Reavis

# 'RED' RIOTERS IN GERMANY SENTENCED

By Associated Press.  
 BERLIN, May 7.—Communists convicted of participating in the recent rioting in Central Germany received sentences ranging from one hour in jail for disturbing the peace to death for murder.

One man was convicted of murder and sentenced to death, and the trial proceeding on other counts as required by German law, he was further sentenced to 20 years imprisonment for manslaughter, to ten years for robbery, six hours in jail for disturbing the peace, and was deprived of the right of citizenship "for the remainder of his life."

Scores of the Communists were sentenced to prison for terms varying from one to five years.

About 3,000 cases were tried by special courts appointed for the purpose, and which paid particular attention to the prisoners who were of Russian extraction, for the uprisings were charged by officials to be the direct work of Bolshevik agitators.

The majority of the men convicted heard their sentences quietly without display of any emotion and without comment but some young German workmen given long prison sentences fell upon their knees and wept saying they had been "seduced into the fighting" by arguments of clever men and that they did not understand the movement was directed toward the overthrow of the government.

Other defendants asserted they were not fighting for Bolshevism or Communism but for the removal of the "green police" whose presence in the district, armed with machine guns, rifles and hand grenades, was an affront which was unjustified.

## OFF ON 7,000-MILE CRUISE IN 28-FOOT MOTOR LAUNCH

Three adventurous sailors started from the New York Yacht club, N. Y. C., on a 7,000-mile cruise in the 28-foot long power launch "Hippocampus." The little craft is 23.3 feet long on the water line, has a beam of 9 feet 11 inches and a draft of 5 feet. The three are bound for San Francisco and will sail by way of the Panama Canal. They expect to be gone for five months. The photograph shows the adventurous three aboard the "Hippocampus" just before the start of their long cruise. Left to right—J. Albert Chambers, Paul Squibb and Alfred F. Loomis.

# WHISKY, WHISKY EVERYWHERE BUT NOT A DROP TO DRINK FOR POLICE

NEW YORK, May 7.—Whisky, whisky everywhere, but not a drop to drink, paints a paraphrase picture of every police station in New York city.

It has been thus since the recent day when the police department set out to help the federal government make the wet spots in the metropolis evaporate. Each of the 11,000 blue-coats is a prohibition enforcement officer instructed to gather evidence against Volstead act violators.

They go forth daily to gather it—in bottles, in flasks, in kegs and even in barrels. But there is no warehouse in which to store the liquor until the day when it is into court. So the lieutenant at each police station is guardian over the stock accumulating in his precinct.

Many of the stations were looking like ill-kept saloons a few days after the police began mopping up the spots where spirits were spilt. Bottles were hid in desk drawers, behind radiators and under cover of blankets in unused corners. Each day the lieutenant checked up the stock on his arrival and again on departure from duty. Soon the city hopes to arrange for a storehouse.

The city chemist was even harder hit than the police by the new duties imposed by legislators at Albany. Into his tubes a sample of every bottle, every case and every keg must go for inspection. If he finds in the specimens the stuff that pink elephants are made of, it is labeled "evidence" and awaits court action. Moreover, the chemist must go to court with the liquor and give

his official testimony as to its potency.

This kind of activity required most of his business hours even months ago when he had to analyze only narcotics and other suspected poisons seized by city employees. But as soon as the state prohibition law became effective, this official was deluged with new jobs.

During the first week's drive against bootleggers his office became one of the busiest places in the city. Detectives and uniformed police followed one another through the door with samples of the seizures. Bottles piled up everywhere. The employes who labels and numbers all containers brought into the office telephoned his wife that he would not be home for dinner.

## OPEN SHOOT AT GUN CLUB'S TRAPS TODAY

Novices and nimrods and experts of various degrees of expertness will congregate this afternoon at 2 o'clock at the Ranger Gun club's traps south of town for a free-for-all shoot arranged by the club.

The club's idea is to encourage the sport of clay pigeon shooting, one of the most healthful and fascinating of outdoor pastimes.

Trap shooting is being taken taken up by women more and more with each passing year, and a special invitation is extended to Ranger women who love the out of doors to come out this afternoon and learn to "look down the barrel."

Many women have become expert at the traps after a few workouts. They are naturally quick of eye and those who take kindly to a gun soon develop into efficient sportswomen.

There will be no entrance fee for the events this afternoon, only the regular charge for birds and ammunition.

The club has promised everybody a good time and plenty of entertainment.

"We want everybody in Ranger to come out and enjoy the afternoon at the traps with us," is the gun club's invitation, "and we will do our best to make it an afternoon well spent."

# RANGER REF'G & P. L. CO. NOT IN BANKRUPTCY

Has Conceded Receivership Pending Reorganization, It Is Said.

The Ranger Refining and Pipe Line Company is not in bankruptcy, but has only conceded a receivership while an effort is being made toward a reorganization according to a statement made Saturday by Marks and Flaherty, a law firm representing a part of the creditors of the refining company. It is said that the company is being torn down internally because of a fight that has gone on among officials for its control, and it accepted a receivership in order that a receiver might be appointed and the plant continue in operation until reorganization is effected. At this time the concern has two sets of receivers appointed by two separate courts.

**Two Petitions Filed.**  
A petition to force involuntary bankruptcy was filed against it in Kansas City. At about the same time a second petition was filed at Abilene. In both instances the company accepted an operating receivership and both courts appointed a receiver. W. D. Girard and R. A. Stewart, appointed out of the Abilene court will have charge of its Texas properties while W. Dewitt Kuhn and Karl A. Crowley were appointed from the Kansas City court and will have charge of property other than that in Texas.

On May 30, Federal Judge Wilson of Fort Worth will hold a hearing and decide which of the two sets will be made permanent. Out of the tangle it has developed that if it is held that the Kansas City court has jurisdiction Marks and Flaherty, who filed their petitions in that court will collect a commission in that nature of a fee from its capitalization of \$4,000,000, while if Abilene gets jurisdiction a Fort Worth firm of lawyers who filed the second petition will collect the fee. This is true because the federal law of bankruptcy allows the attorney bringing the petition a fee. The amount to be paid the lawyer is fixed by the judge of the court and in a case involving an amount as great as in this the fee probably will be a substantial sum.

**One Re-organization.**  
The refining company has had one reorganization within the past year and much additional stock sold, it is said. At that time the refinery was earning a net income of \$75,000 to \$100,000 a month, according to information thought to be reliable. It is said that an attempt has been made to wrest control of the concern from one of the men responsible for the reorganization and he in turn has forced the action of the receivership.

## WORKERS IN SWEDEN RESIST WAGE CUT

By Associated Press  
STOCKHOLM, May 7.—An effort to reduce wages and cost of production to the present lower level of prices is being resisted by Swedish wage earners generally, but a start has been

made in the wood pulp and cellulose industry where wages have been lowered 15 per cent.

One of the largest electrical companies has also come to an agreement with its operatives for an adjustment to a lower basis.

## PUBLIC HEALTH WORK IN RANGER SCHOOLS STARTS MAY TWELFTH

Public health work in Ranger schools will start next Thursday, May 12, according to plans which have been worked out. On that day Miss Jean Meyer, a graduate nurse who has been public health nurse in Bell county for sixteen months, will arrive to assume a similar position in Eastland county. Local physicians and dentists will work with Miss Meyer in examining the school children and diagnosing any ailments they may possess.

The federal government, the state health department, the county commissioners, the school board and the Red Cross are co-operating in this work, the value of which was so well demonstrated by similar activities here during the boom period.

## LONDON SURGEON UPSETS THEORY OF WEARING HIGH HEELS

By Associated Press

LONDON, May 7.—There is a growing demand for "aunts" to escort schoolboys and girls who are passing through London on their way to and from school for vacations. American visitors are also keen on securing the services of "aunts" for sightseeing and shopping expeditions. This has led to the formation of an association called "Universal Aunts," composed of about 70 cultured women experienced in travel and having linguistic ability.

Their sphere of usefulness is not confined to the chaperoning of boys, girls and American visitors, as many of the "aunts" are experts in designing dresses and decoration of houses.

Nematodes, tiny worm-like creatures like the well-known vinegar eel, are so numerous in ordinary soil that a handful may contain thousands and even millions of them. It is estimated that if all nematodes were removed suddenly from the soil the soil surface would sink half an inch.

## "TRUTH IN ADVERTISING."

The NASH Four

## OPERATING COST

The low operating cost of the NASH FOUR is a predominant virtue, vouched for by motorists who know this car. Tests covering many thousands of miles have demonstrated that the NASH FOUR is unusually saving of gasoline, oil and tires. Those desiring a car of special economy, light in weight, and with the advantage that light weight answers, are quick to recognize the value of the new NASH FOUR.

Like the NASH SIX, it has two conspicuous and outstanding features—unusual power, due to its perfected valve-in-head motor, and really exceptional beauty of design and finish.

WOMEN PLAN PICNIC.

The social committee of the Woman's Missionary Society will entertain this week with a picnic. The members and their families are asked to meet at the Methodist church at 6 o'clock Monday afternoon, and from the church they will drive to the place selected for the picnic.

1920 CLUB MEETS.

The 1920 Club met Thursday afternoon in annual business session, when the following officers were elected for the ensuing year.

President, Mrs. M. H. Smith; first vice-president, Mrs. O. L. Phillips; second vice-president, Mrs. Rex Outlaw; corresponding secretary, Mrs. C. D. Woods; recording secretary, Mrs. L. A. Duffer; treasurer, Mrs. E. J. Barnes; parliamentarian, Mrs. M. H. Hagaman; press reporter, Mrs. Taggart.

MISS SANDERFORD RETURNS.

Miss Mary Sanderford, daughter of A. J. Sanderford, has returned from Austin, where she has been attending the university of Texas. Miss Sanderford has completed a sufficient number of credits for graduation in June with the A. B. degree. Miss Sanderford is a graduate of the Ranger High school. She specialized in chemistry and also took engineering work, it is said. For four years she has been on the staff of the Texan, the college daily.

MRS. TERRELL ENTERTAINS.

With Mrs. B. B. Liles as assistant hostess, Mrs. C. O. Terrell threw open her home Friday afternoon to the wives of the physicians of the city from 3:30 to 5:50 o'clock. The home was beautifully decorated with pot plants and red and white carnations. Several very interesting contests were participated in, pot plants being given for both the first prize and consolations.

After a very pleasant afternoon had been spent, a delicious salad course was served to the following: Mesdames Stucki, Stackable, Shackelford, Jackson, Logsdon, Leuderdale, Duffer, Holland, Martin and hostesses. On departing each guest was presented with a carnation.

PERSONAL.

Mrs. M. H. Smith left Saturday for Dallas, where she will visit her niece, Miss Louise Bryant, who is attending Southern Methodist University. From Dallas Mrs. Smith will go to Cleburne to attend the Woman's Missionary Society Conference.

J. C. Muller, manager of the Piggy-Wiggly store, is convalescing at the Ranger General hospital from a severe attack of typhoid.

Mrs. Elsie Colbert of the F. & M. bank is recovering nicely from a serious operation at the Ranger General hospital, it is reported.

TEXAS WILL BE BATTLEGROUND OF G. O. P. NEXT

Lone Star State Will Be Real Test of Strength in Senatorial Race.

By BASCOM N. TIMMONS, Times Staff Correspondent WASHINGTON, May 7.—Republicans are planning to make their first real test of strength in the senatorial race in Texas here next, maneuverings here this week indicate.

As a result there will be more Republican poll taxes paid in Texas next year than ever before. The man picked as the senatorial candidate is John H. Kirby of Houston, wealthy lumberman.

Mr. Kirby at last accounts still insisted he is a Democrat, despite the fact that Democrats say he has taken the Republican position on the tariff question. Mr. Kirby is popular with business men in Texas. He has a charming personality and has friends in every part of Texas. If he can be induced to take the Republican nomination for the senate he could be depended upon to poll the largest vote ever polled by a Republican candidate in Texas. The G. O. P. believe that he will be popular enough to win, provided the Republicans and the American parties will stay out of the Democratic primaries and cast their full strength at the November election, when the Democrats having spent their energy in the primaries usually stay at home. The Washington Post, which generally speaks for the Harding administration, explains the Republican plan in Texas as follows: "Texans who are in Washington representing the Republican organization are figuring on making a big fight in 1922 that may land a Republican United States senator for the first time. John H. Kirby of Houston, a wealthy manufacturer, who has been largely instrumental in building up the Republican party in the state, is ambitious, it is said to run for the senate on the Republican ticket to succeed Mr. Culberson. "This would not be interesting, perhaps, except for the fact that there is a possibility, if not a prob-

ability, there will be a coalition among the political organizations next year that may bring about a keen contest, and perhaps defeat for the Democrats.

"The Republicans made no mean showing in Texas last fall in the presidential election, and actually succeeded in electing a member of the house of representatives. The American party has considerable of a following, and the Democrats who supported the former senator Bailey for governor are in a humor to cast their fortunes with a new political affiliation, it is said.

"Entering into the equation is the question of a protective tariff, in which Texas is greatly interested, and if the Republican administration were to get through a tariff bill that would satisfy Texas it is by no means impossible, it is said.

that a Republican may be chosen from that state next year by the combined votes of the anti-Democrats.

The optophone is a new scientific instrument by which light can be made to produce a sound. It is hoped that it can be applied to a method of translating ordinary printing into a series of recognizable sounds so that blind people can learn to read "by ear."

CARE IN HANDLING —Baggage and packages as well as promptness and accuracy in delivering them has been one of the large factors in our success. We shall be glad to serve you. Send us a postal, or call us by telephone. Ranger Transfer and Storage Co. Phone 117 R. R. Ave and Houston sts.

RESTAURANTS MUST CLEAN UP ON MAY TENTH

May 10, waiters, waitresses, cracked plates, cracked cups and saucers and other items about a restaurant or hotel that come in contact with food and which are calculated to conceal a festive germ will go through a delousing process, as it were. Cooks, waiters and waitresses will have to show a clean bill of health in accordance with a state law that becomes effective on that date and cracked crockery will have to be dispensed with. The law has only been recently passed.

So far as is known the city sanitary department has made no move to arrange for the examination of the restaurant and hotel employees. This, however, may not be under the city's jurisdiction, and to see that the law is enforced may be up to the county.

RANGER WILL HAVE TENT-AWNING PLANT

A tent and awning factory will be opened at 211 North Marston street by John P. Young according to an announcement he has made. Mr. Young at present is operating the Young rooms. His factory will also turn out many other articles that are made from canvas. Special orders will be accepted and articles manufactured of any class or color.

Mr. Young has had much experience in this line having operated a like concern in El Paso for many years.

WILL TRADE FOR RANGER REAL ESTATE

I have party owning 205 acres of Ellis county river valley land will trade for Ranger real estate, improved or unimproved. As you probably know, Ellis county is the richest cotton producing county in the world, and this valley land is the richest part of the county. See C. J. Deitrich, or Mr. Mof-fett at Paramount Hotel.

# Cisco Has Some Edge on Roads Open to Traffic, Inspection Shows

**GRADING FINISHED ON LARGER PART OF SYSTEM; ROCK GOING DOWN AT TWO PLACES; RANGER-EASTLAND-CISCO ROAD WAITS ON STATE AID; EASTLAND HAS ACCESS TO PLEASANT GROVE; NO START TOWARD DESDEMONA; YEAR MORE.**

By ERNEST W. SPARKS,  
Times Staff Correspondent.

I have been over the entire system of the Eastland county roads which are to be hard surfaced. I left Ranger Wednesday morning with W. K. Fleming of the contracting company and his chief engineer, Cohen. At that time I was frankly skeptical that any great results had been obtained in the year that the road work has been going on and I was determined that none of the blarney nor the high sounding technical terms of the engineer, should blind me to actual conditions.

I was out to see with my eyes and not my ears. I was in a mood to be critical and to pass judgment only as my common sense told me that judgment should be passed.

Wednesday and Thursday we traveled over approximately 100 miles of road bed, the majority of which is waiting for the hard surface to be applied. We passed through fields and forests; through sandbeds and over hills, through cuts and fills with the journey ended. It is my very best judgment if a few minor breaks were built up and all the culverts and bridges were constructed, Eastland county would have an excellent system of roads if another dollar of the \$4,500,000 bond issue were never spent.

**Permanent Grade.**

The reason that statement is made is because the distance we traveled, nearly every foot of the sub-grade is built for permanence, and were it today opened for traffic it would, with only a nominal upkeep, stand for many a year. And I will say here that while I left Ranger expecting to be fed on terms of both blarney and engineering lingo that would leave me gasping for the real truth, the reverse happened. The only statement coming from Mr. Fleming was that he only asked that I tell of the things I saw in plain facts and not color the version one iota.

Wherever I met men connected with the road, they were frankly pleased that the Times was sending someone to see just what had been done. This "glad you came" spirit gave me an inkling I was due to see something, because when men are pleased with their handiwork and are proud to show it, something has been done to bolster that pride.

**The Railway Dump.**

The most fitting analogy I can think of to carry the impression of the sub-grade as it exists today is that the company could lay its rails and begin operations with very little additional work on the grade. The means that the highways of the county are built on air-lines. Where a fill was needed it was built, and where a cut was needed it was dug. Of both I saw many places where dirt had been built up or dug down for a depth of from two to twelve feet. One cut I remember especially. At its deepest point it was twelve feet and had been dug through stone for most of its length. Everywhere the roads take the shortest distance where engineer difficulties are not too great.

In the southern part of the county I saw great heaps of sand and many of them that had been hauled from the right of way and clay

brought in in wagons to make the grade, and everywhere there is sand, clay has been dug from the earth to cover it.

**Clay on Rock.**  
In the northern part of the county, there are spots where clay is being hauled for a mile or more to cover stone surfaces through which no plow will pass.

It is very noticeable that the new highways do not follow the old roads. The majority of the mileage is through new territory and most of this right of way had to be cleared of shinnery trees. I saw many spots where at either side of the road the brush appeared so thick that a cow could not pass through.

I am going into this detail to try to give an impression of the immense amount of work that had to be done before the grades could be gotten to their present shape. Shortly I will speak of the roads between the towns and cities where it was necessary to depart from the old regular routes, right of ways had to be secured and fences built. All of this fence is not constructed but much of it is and more is being built.

**Well Satisfied.**  
I know to do this vast amount of work required time; whether too much time has been consumed I cannot say, but to gain some idea, I inquired of persons in Gorman, Rising Star and Carbon. I asked them pointblank if their folks were satisfied with the progress that has been made during the year. In Rising Star my information came from the Chamber of Commerce and was to the effect that they were pleased because they had much faith in their county commissioner and he had told them that everything was moving at as good a pace as possible.

In Gorman they were pleased but said they had felt that things were dragging in spots. However it was stated that the commissioner had explained that the county was holding operations back to some extent in order to save engineering fees. I was told there that this expense was a large item and that if much additional work was undertaken these fees would be doubled or trebled.

In Cisco I did not inquire as to the state of mind of the people. Cisco, either through good fortune in location or other cause, has been favored in the matter of passable roads. However, its advantage is not very great, and it would be negligible according to the information I gleaned, if work had not been stopped on the Ranger-Cisco road while the county is waiting to receive state and federal aid.

On the whole it appeared to me that the county was making an effort to give each precinct the same amount of work and have it all go forward at the same time.

**Sleeping on Rights.**

Ranger, I think has been sleeping on its rights in not insisting that the road to Desdemona be built. On that highway there has not been a clod turned, and I have formed an opinion unsubstantiated, that there will not be until Ranger folks insist that it be done. I will say here too, that this is not the contractors' fault. They are working by the yardage or other road measures and I believe work where they are told by the county commis-

## ROAD CONDITIONS

Ranger-Thurber—Twelve miles; ten miles of grade completed; open to traffic for five miles; part of culverts in others being constructed; abutments for Russell creek bridge completed, steel now in the Ranger yards for the span; work on the remaining grade going forward.

Ranger-Caddo Road—Two miles of grade in; culverts built; hard surfacing being placed; open for traffic.

Ranger-Desdemona Road—No work started.

Ranger-Pleasant Grove—Three miles; grading being done; Ranger-Eastland—Seven miles; four miles of grade completed; no culverts; county waiting for federal aid.

Eastland-Cisco—Nine miles; six miles completed; no culverts; open for traffic majority of the distance. Also waiting for federal aid.

Eastland-Pleasant Grove—Eight miles; grade in, culverts in and road open for traffic for five miles.

Eastland-Gorman—Nineteen miles; eighteen miles of grade completed; majority of culverts in, others being built; open for traffic only a short distance.

Cisco-Dothan—Eight miles; eight miles of grade completed; culverts all in and road open for its length.

Cisco-Rising Star—Twenty-one miles; grade completed; many culverts in, others being built; road open for perhaps half its length; surfacing being done.

Gorman-Desdemona—Grade in, culverts built; not open for traffic.

sioners. By that statement I mean that it is my opinion that the county commissioners, for example, will say to the contractors, that they can start on project 4, 5, or 8 as the case might be, or any other section of the road, but the contractors themselves cannot say where they will work. It is also my opinion that the commissioners regulate the speed of the work on any certain section in order that all sections may receive approximately the same amount of work with the cash that is available. This opinion has been formed because the precincts have all been given about the same progress with the first \$1,000,000 which is now spent. While they were offered me, I did not have time to secure the exact figures for this expenditure of \$1,000,000 but roughly it was given me as being \$500,000 for grading and bridges; \$240,000 for right-of-ways, fencing and allied expenses; equipment has cost about \$140,000, with the remainder probably running to engineering expenses and material. These figures are only approximately, but both the contractor's books and those of the county are open to the public, according to my information.

**The Trip.**

When we started the trip to cover the whole system of surface roads, we went east almost to the Erath county line, over the Thurber road. We lacked a short distance on the east end of covering this entire strip because of fences that have not yet been out from across the grade and built along the right-of-way. However I have the word of the engineer and Mr. Fleming that that distance has been properly graded.

A small distance west of the point at which traffic now quits the sub-grade and about four miles from the county line, is the Thurber hill. I am not sure that that is the proper name but it will answer. The hill meant is just before the road dips

down in the Thurber valley. Space here does not allow it but sometime the writer is going to dig up all the descriptive adjectives in his vocabulary and attempt to write an epic of the view that springs at one over that valley as the brow of the hill is reached. It is worthy all the fine phrases of a Washington Irving.

**Engineering Feat.**

On that young mountain, if I am any judge, is one of the best strips of engineering that will be found in the state on a dirt highway. In the course of a mile, I am told the grade rises for a distance of 300 feet. Yet at no time should the gears of a machine have to be changed, so easily does the highway climb.

In the parlance of the engineers, I am given to understand that it is less than a 5 per cent grade. It follows the course of a canyon and in places makes one think of what has been written of the Bright Angel trail in the Grand Canyon. The road follows the hill, which has been cut away for many feet, leaving a solid wall. On the opposite side is a drop of from four to fifty feet. A car out of control would surely come to grief there. On this strip only a small amount of finishing needs to be done before it is ready for the crushed stone.

Farther west toward Ranger, the grade is built for quite a distance until the former contract of Neal Bros. is reached. Perhaps a mile here has to be "done over"; meaning that it has to be filled in and leveled up. Then a short distance farther on is a space of perhaps a half of a mile that has never been graded at all. It passes over a divide of almost solid surface rock. That space is now being graded by covering it over with clay. In that immediate section, perhaps twenty-five teams are at work. From that point the grade is constructed to a point within a half a mile of its sloping point within the

city limits. It is my understanding that this half mile or so will be built as quickly as the city secures the right-of-way.

**At Work on Culverts.**

While all the culverts along the Thurber road are not built, many of them are, and a concrete gang is now constructing others. The gang Thursday finished the abutments for the Russell creek bridge. This structure will be a single steel span. The material, it is said, is now in the Ranger yards and the bridge will be completed within three weeks. With the spaces mentioned connected up the Thurber road will be ready for the stone which will start being laid within a short time. A small crusher is now on the road crushing stone for the concrete culverts. It will be put to grinding ballast for the surfacing as quickly as it can be released from its present work. Much of this rock ballast will not come from a crusher but will be broken and laid by hand. However, that will be touched upon later.

From Ranger to Eastland I would estimate that eight miles of the grade has been constructed to such a state that it could be finished quickly. To the best of my recollection the culverts are not in place. The grade begins just across Colony creek, three miles south of Ranger, and continues to within a mile and a half of Eastland or thereabouts. I have it from George Davidson, county manager for the Fleming Construction company, that this road is now awaiting state and federal aid before it will be finished. This aid is expected momentarily and at this time County Highway Engineer Eccles is in Austin for a conference pertaining to it.

It is said that where such aid is granted the state insists on supervising the construction of the road. It is thought under the plan that is being submitted, that \$300,000 and possibly more will be granted for use on this highway. Once secured, the road is in a state to be completed rapidly.

Beyond Eastland and toward Cisco the same condition prevails except the Cisco road was farther advanced when the order came to stop operations and for that reason its length, which is about eight miles, is opened for traffic. However no culverts are yet constructed and the traveler must cross the open holes that is left for them.

**Excellent Drainage.**

While on the matter of culverts it might be well to mention here that to the view of the layman at least, the entire system of highways from beginning to end has a perfect drainage. One driving over it is amazed at the number of culverts and bridges and they all seem to be at a spot where they are needed.

Where Cisco is more favored than other towns is because of the Rising Star and Dothan roads. It was while going to the latter place from Cisco that I wondered as we tore along at sixty miles an hour if the remains would be messy after we had dropped into a chug hole and done a double somersault with our car on top. But the chug hole did not show up. That eight miles of road is like a race course, with every culvert in place. The Rising Star road is also being used by traffic for a part of its length and many of the culverts are in along its length. Others are being rapidly built by a large concrete gang. The

road from Cisco that connects with the Leary road, then on towards Breckenridge probably will be under construction by the time this is in print. As an offset, the Ranger-Desdemona road should be under way at about the same time. But as far as I could learn the county commissioners have not yet shown any inclination to start that strip. The roads from Gorman to Carbon and thence to Eastland, and from Gorman to Desdemona are almost as well advanced as the Rising Star-Cisco road. In fact they only lack a few culverts and the completion of two bridges. The grading is finished and is of the same quality that prevails over all the other roads—full width, built like a railway roadbed, with material of lasting quality. One of the bridges is across the river at Eastland the other is across the same stream from Gorman to Desdemona. The abutments are in the course of completion. The

NITROS POUND PILL AND WIN WALKAWAY FROM SWATTERS

Sixteen Wallops, Eight for Extra Bases, Show Nine Was Feeling Fine; Adkins Pitches Steady Game Throughout; Swatters Lead Until Fifth.

SWEETWATER, May 7.—With Adkins pitching tight ball the Nitros had little difficulty in defeating the locals here today, 10 to 2. Lefty hurried an eight-hit game and with a commanding lead was never in serious danger. All the Nitros hit hard, getting seven two-baggers and a triple with eight singles, for a total of sixteen hits. Manager Allen hit two doubles at opportune times. Hardy, a local youngster playing his first game for the Swatters, hit a single, double and triple and had a perfect day in the field.

Score: SWEETWATER. Players— AB. R. H. PO. A. E. PETE CAWTHON SAYS HE'LL BE IN RANGER ON MAY EIGHTEENTH

Pete Cawthon, the Houston boy signed up with the Nitros, in a personal letter to H. L. McCormick of the Times, says he will report on the 18th. Pete should be a mighty handy man to have around a ball club, according to all reports. He first attracted attention while playing with Southwestern at Georgetown, and no less a judge than Kid Gleason of the White Sox said he looked like a big league prospect. He also has played college ball in the North. Last year he coached the Beaumont High school team and this spring assisted Arbutic with the Rice Institute team. This indicates he has a wise baseball head on young and capable shoulders.

INDIANA COEDS ARE BALL PLAYERS BUT DO NOT LIKE 'STEALING'

BLOOMINGTON, Ind., May 7.—Indiana university co-eds have taken up baseball and are making serious effort to organize class teams. Helen Coblenz and Marjorie Hill, coaches, have announced regulation rules will be followed with a possible revision of that pertaining to stealing home. Just what the objection is has not been explained; neither has a likely change in the playing code been advanced. Four girls have shown exceptional style on the pitching mound. Dorothy Simering, Hazel Spencer, Ruth Baker and Grace Stanton have developed control and have proved effective in the training games. Katherine Yansick and Henrietta Rosenthal are the "Babe Ruths" of the candidates. Just how far the girls intend to go with their baseball proclivities has not been announced. Nevertheless, they have acquired a liking for the national pastime and play the game seriously and strenuously. Students faculty and Bloomington residents have become interested in the girls' playing and a big crowd daily attend the practices.

ABILENE COPS SERIES IN FAST GAME, 5 TO 4

ABILENE, May 7.—Abilene took the deciding game of the series today, 5 to 4. Abilene secured only five hits but mixed them with bases on balls and scored as many runs. Mineral Wells secured only one hit off Hill in the four and two-thirds innings he worked. Abilene's fielding was jam up. Abilene scored the winning run on Briscoe's error. Philpott who was secured from Abilene, again started today getting the seventh putout in all parts of the field. He also got a double and a single. Wise Fletcher got 3 hits out of 3 times up. Etheridge, Kemper and Stover, San Angelo men were barred.

BUSINESS MEN AND GULFERS TO SETTLE SCORE 'AFTERNOON

The business men and the Gulf Production will settle the indecisive conflict of last Sunday this afternoon at 5:30 out at the ball park. Last week's game was ended by the rain during the first inning. This contest is the first of a "busy week for the business men." On Wednesday they will play the Olden Athletic club, composed mostly of Magnolia men, and on Friday they take on the Bullock Oil field team, which has thus far mopped up all opponents.

CARPENTIER SAILS!

HAVER, France, May 7.—Georges Carpentier, heavy champion boxer of Europe, sailed for New York today on the steamship La Sorie.

TO COMPETE FOR BRITISH TITLE

Miss Edith Cummings of Chicago, one of the leading golfers of the country, who will take part in the British championships. The British tournament opens May 30 at Turnberry, Scotland. Miss Cummings, who will play under the colors of the Oawentsi other American girls competing with an's golf champion, who already is in England getting in shape for the tour.

Wellesley College Has Strong Crew This Season

The Wellesley college crew is ready to begin its season. The eight has been whipped into shape by frequent practice on Lake Waban and is said to be one of the strongest ever turned out by the famous girls' college. The attractive and athletic young women who compose the crew have been trained and coached for their contests as would a male crew. The girls take their work very seriously and in their trial spins on the lake have shown plenty of speed. The photograph shows the Wellesley varsity eight starting out for a trial spin. From left to right—Sibyl Wardwell, coxswain; Dorothy Brainard, stroke and captain; Gladys Hathaway, No. 7; Marion Smith, No. 6; Jeanette Luther, No. 5; Eleanor Snow, No. 4; Dorothy Conant, No. 3; Helen Sherman, No. 2, and Mildred Hess, bow. In the insert is Miss Dorothy Breingan, who is in charge of the crew.

HERE'S WHATSA MATTER 'TH JOHNNY SINGLETON

Johnny Singleton, Nitro center fielder who came home the other day to give his injured leg a chance to heal will be unable to play in the series at Mineral Wells, as he first intended. He will be one of a party going over to witness today's game, however. Johnny's limb is rounding into pretty fair shape now, and he should be able to resume his old stand when the nine gets home. He thinks he is suffering from "charleyhorse," but that is a mistake. The Times is going to tell just exactly what is the matter with Johnny, as gleaned from the pages of a medical article which will be delivered at a convention in the North, and sent us away ahead of time so we would recognize its value and publish it. Here's Johnny's ailment;—brace yourselves! He is suffering from "nothing more than the secondary effects of an inordinate lesion." Pitchers, the same article informs us, do not have a sore arm: They suffer from "bursitis of the shoulder." And any player sliding into a base is liable to injury by directing lines of force against the sacro-iliac joint. Oh, science, oh baseball, oh ignorance!

SAN ANGELO SHUT OUT BY CISCO 7 TO 0

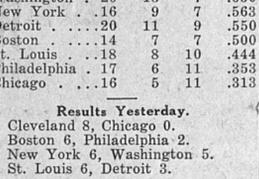

SAN ANGELO, May 7.—Burlison, behind brilliant support, held Cisco to five singles today and scored his fourth victory of the season and San Angelo's first shut out, 7 to 0. The Bronchos made three runs in the first off Cruse. He gave way in the second to Johnson, who was pounded as hard.

THE REAL SENSATION.

The real sensation came in the eighth when Old "Treetop" Harris, groovin' 'em for the Stars, whirled on his heel from the mound and caught Eastland's first baseman, Graves, asleep at third. "Treetop" has his own personal style of extending both arms high above his head at a wide angle before he delivers the ball, and Eastland fans and players hollered "Balk!"

DESCH MAKES NEW RECORD AT 400-YARD HURDLES

August Desch, speedy timber-topper from Notre Dame, broke the world's 400-yard hurdle record when he galloped the quarter mile over ten hurdles in 53.45 seconds at the University of Pennsylvania relay carnival held at Franklin Field. The previous record of 54.15 seconds was held by Watt of Cornell. The above photo was made as Desch cleared the last hurdle.

August Desch, speedy timber-topper from Notre Dame, broke the world's 400-yard hurdle record when he galloped the quarter mile over ten hurdles in 53.45 seconds at the University of Pennsylvania relay carnival held at Franklin Field. The previous record of 54.15 seconds was held by Watt of Cornell. The above photo was made as Desch cleared the last hurdle.

EASTLANDERS LOSE 8 TO 5 TO OUR OIL STARS

Some Ball Playing and Bit of Comedy Contribute to Good Entertainment.

It was real cloudy at Nitro park Saturday afternoon. There were two seasons for it. The ordinarily smiling Texas skies were obscured by a bunch of sereaff clouds and then the ball lot was generously sprinkled with some twenty or more of the members of the Ranger Oil Stars, who did valiant battle with the Eastland Oil Burners. The Ranger Jazz Baseball Artists took the long end of an 8 to 5 score.

Included in the ultimate verdict were a number of wordy squabbles anent fine points of the game; more than one pair of barked shins; at least one whizzed one into center field for from forcible contact with a knotty fist and one corpulent ump who, sans armor and shield, only cast aside his dignity as official arbiter and took refuge in the time-honored expedient of ducking during the last two frames. At that he drew laudatory comments from the fans for his hardihood, for more than one swiftly hurled pellet found its first resistance in the depths of his ample "buzzum."

YESTERDAY'S RESULTS TEXAS LEAGUE.

At Galveston— R. H. E. Galveston 3 5 0 Beaumont 2 16 0 Batteries: Lee and Lapan, Scott, Maine and Whaling.

FILING EQUIPMENT WANTED—Will buy a few used Letter Files and Legal Form Files in first class condition. Write, giving make and full description to Lock Box 258, Abilene, Texas.

SPORTS

RHINE SEASON FOR BASEBALL IN FULL SWING

Uncle Sam's Army Has Its Own "Big League;" Three Teams at Coblenz.

Coblenz, May 6.—The baseball season on the Rhine has opened and now is in full swing, for the national game follows the American flag. Uncle Sam's army here has a "big league" of its own and, with the coming of spring, baseball has taken precedence over all other forms of sport.

Coblenz has three teams entered in the league, while nine from Andernach, Neuwied, Engers, Mayen and Sayn make up the eight teams. Two games are played each week by all teams and, while it is too early in the season to predict whether any Ty Cobbs or Babe Ruths will be developed, the brand of baseball which is being dished out here would compare favorably with high-class amateur or semi-professional teams which play Saturday games in medium sized cities in the United States.

Besides the regular league, every company has its baseball nine and from these are taken from time to time ambitious youngsters to graduate in the "big league."

Boxing and soccer football which have been to the fore during the past winter have now practically been relegated to the second place. The Third battalion of the Eighth infantry won the soccer championship from the Second battalion of the Eighth infantry and the footballs have now been put in camphor until the fall.

Boxing Still Popular. Poxing, in spite of the hot weather, still retains much of the vogue it has enjoyed during the winter. At the Young Men's Christian association liberty but a few evenings ago between 4,000 and 5,000 officers and enlisted men, with General Alvey occupying a ringside seat gathered to see a ten-round bout between Leo Huggins of Jersey City, the featherweight champion of the American Army of Occupation, and Dienard, the French champion, who had come up from Mayence to try conclusions with the American.

The French champion won and, although the doughboys were greatly disappointed at the defeat of their favorite they cheered the winner with as much enthusiasm as if he had been one of them. Some pretty fair fighters have been developed.

The basketball season closed early in April and the pennant was won by the eighth infantry.

Officers Play Polo. Officers have become addicted to the polo habit. Four teams are playing semi-weekly games and the commanding general is taking a deep interest in the games. He is encouraging young officers to take up riding, as he told the correspondent it was one branch of the service in which he were somewhat behind the other armies of occupation on the Rhine. This deficiency is being promptly remedied, however.

The spring trials of the Coblenz Racing club, which took place early in April, developed some spirited racing over the half-mile track. Forty-four teams were entered in the five races and, but for the absence of bookmaking, the affair would have looked like real racing at any well regulated track.

The Y. M. C. A. is maintaining 36 tennis courts throughout the area and nine courts in Coblenz.

A golf course with a well appointed club house is in operation at Airdrome field a few miles out of Coblenz.

Another well frequented spot is the army library, composed of 35,000 volumes under the management of the Y. M. C. A., and which is opened to officers and men from 1 to 10 p. m.

The Salvation Army canteen and Men's club is also very popular with the boys.

Both welfare organizations are doing their utmost to make the American soldier in Germany feel somewhat nearer home and it is the consensus of opinion from the commanding general down, that they are doing wonderful work and that their departure from the field would create a void which it would be impossible to fill.

NINE TO EIGHT WIN FOR RISING STAR VS. SIPE SPRINGS TEAM

RISING STAR, May 7.—The Rising Star baseball team met the Sipe Springs Gassers on the diamond here last Wednesday and played a ten-inning game with a final score of 9 to 8 in favor of the home team. The feature of the game was a home run hit by Dutch Schultz, of the Rising Star team, while two men were on base. Buchannan pitched the game for Star and Wright L. Felt was the catcher. The game preceding this was played against the DeLeon team, at DeLeon last week, with a score of 20 to 9.

The Rising Star team is strictly amateur, of a man on the team receiving one cent of remuneration for his base ball service, and every one of the players being engaged in some steady occupation in the town. The local people have a great pride in their team, and give it enthusiastic support.

FROM RAH RAH BOY DIRECT TO MAJOR LEAGUES

This Is Unique Record of J. Riggs Stephenson, Second Baseman for Cleveland.

CLEVELAND, May 7.—From the college campus direct to the major leagues without previously having seen a professional baseball diamond, is the unique record of J. Riggs Stephenson, second baseman with the world's champion Cleveland "Americans."

Stephenson probably is attracting as much attention as any player in the big leagues. His play around the key-stone sack equals that of a veteran. In his first seven games with the Indians he made 15 hits out of 26 times at bat, an average of .577, and accepted 25 fielding chances perfectly.

When Bill Wambagans, unassisted triple play hero of the world's series last October, sustained a fractured arm during the trip north from the spring training camp at Dallas, Manager Tris Speaker filled the gap with Harry Lunte, utility infielder. A few days later Lunte wrenched his ankle and Speaker found himself without a second baseman.

Gets Excused. Stephenson, who signed with the Indians last spring, was attending the University of Alabama. He was to have joined the team when he finished his studies in June. Speaker explained the circumstances to the university officials and his request that Stephenson be excused until May was granted.

A week before his leave of absence from college expired Stephenson learned that neither Wambagans nor Lunte would be ready to play by May 1 and he notified Manager Speaker that he had decided to remain with the Indians all season, the college authorities giving him permission to return in the fall to complete a course in engineering. He will receive his degree in February.

Stephenson is an all around athlete making the college baseball, football, track and basketball team and being picked on all—Southern football, baseball and track teams.

The Alabamian received a tryout with the Indians at Dallas for two weeks. This in his first professional diamond he had ever seen. He reported to Cleveland April 12, the day before the American league season opened. His record for the first seven days follows:

Table with 4 columns: Team, AB, R, BH, 2B, SB, PO, A, E. Rows for Cleveland, St. Louis, Detroit.

Cleveland 2 1 1 1 2 0 1 1 0 Totals 25 8 15 3 4 1 14 14 0

Up to this year Stephenson played shortstop on the University of Alabama team. Sewell was the second baseman, but changed to shortstop, when he joined the New Orleans Southern association team. At Speaker's suggestion, Stephenson switched to second base.

more accuracy than any player in the American league. Tobin has made a good start this year, making 15 hits in 28 times at bat in his first seven games. In the opening series against Cleveland at St. Louis he made 11 hits in 18 times up.

Last year Tobin made 46 extra base hits, his 202 hits and batting average of .340 being excelled by only seven batsmen in the American league.

"In the opening series at St. Louis Tobin was the one man we just could not put out," said Bagby. "He had us guessing and never failed to cross us when we played him for a bunt, he hit it out. When we figured he was going to swing, he bunted. When we shifted the field he dropped the ball in left. He is the hardest man in the league for us to get out."

JOHNNY TOBIN IS DOPED AS WORLD'S CLEVEREST BATTER

CLEVELAND, May 7.—Pitcher James Bagby, who led all pitchers in organized baseball last year with 31 victories for the Cleveland American league team, thinks Johnny Tobin, right fielder with St. Louis, is the most scientific batsman in the country and a worthy successor to Willie Keeler, who led the National league in 1907 with a batting average of .432.

Bagby, says Tobin has the ability to hit the ball as far as other heavy hitters, can bunt more skillfully than most of them and places his hits with

Cisco Has Some Edge on Roads, Inspection Shows

(Continued from Page 5.)

steel for these bridges, it is said, is in the railroad yards. Eastland to Pleasant Grove.

From Eastland to Ranger by the way of Pleasant Grove the road is finished for the first five miles and the culverts have been built. Eastland has the advantage of that much road bed.

It is at this point that the road comes in from Leeray and it is also at this point that our party had to quit the grade and come over the old route toward Ranger. I saw the road no more until within three miles of Ranger, but I was told that the grade was complete from the place we left the road bed until we reached it again. I found that on the last three miles about twenty-five teams are at work building on into this city. What has been done on the Leeray road I do not know.

Except for the discrepancies mentioned, the entire system is now ready for the crushed stone, and in two places it is now being applied. One of these is on the Caddo road and the other is on the Rising Star-Cisco road.

I did not pass over the Caddo road but I believe that more stone has been placed there than at any other point and the work has been going on for a longer time. This and the fact that the road is being used even up to some extent any advantage that Cisco might have.

Putting on Surface. On the Rising Star road, the system of applying the stone is to first lay a base by hand. Larger rocks are beaten up and placed one against their fellow for a depth of about eight inches. Laborers then go over the jagged ends with a sledge hammer and beat them down smooth, the chips falling into the crevices. This is then rolled with an eighteen-ton roller. On top of this base a coating of small crushed stone for about two inches is applied. Into this mass a stream of hot asphalt will be forced which will act as a binder. Then over the whole a coating of fine screening will be placed. The road will be rolled again and the final treatment will be a last coating of asphalt. According to the engineers this combination makes the best possible macadam road, which will be well up to the standard of any road in the state.

My information is that this manner of applying the stone will go over the entire system of road

with the exception of the Bankhead highway, which will be built under government supervision.

In addition to the two points where stone is now being applied, it is said that work of like nature will start at several other places shortly. This work will be done by subcontractors, as has much of the dirt work.

M. E. Donovan, who has the rock job on the Rising Star road, told me that he would lay 1,000 feet of the surface daily. However, his present job only extends to Romney—about half the distance. Beyond Romney another contractor will take up the work.

Located near Eastland is a large stone crushing plant. It is equipped with three crushers and from that point it is expected that the crushed rock will be supplied for the surface on Eastland to Gorman, Cisco, Oldham, Leeray and Pleasant Grove. Two tracks, an industrial line and a standard gauge switch are now being built to care for this work. Over the switch carload shipments of the stone will be made to Gorman and other points.

The industrial track will be built down the grade from Eastland towards Gorman. This track comes in sections and is two feet wide. Former government gasoline motor trucks and cars will be used over it. The contractors have about a dozen of these motor trucks ready for action.

It is my opinion that the county commissioners will have the rock work done, as they have the dirt, each precinct receiving a proportionate share. It is also my opinion that it will require at least a year to finish the job, provided funds continue to be available from the sale of bonds.

IBANEZ PLEASSED WITH HIS VISIT TO AMERICA

MADRID, May 7.—Vincent Blasco Ibanez, author, who has returned to Madrid, in the course of an interview here today spoke enthusiastically of his reception during his visit to the United States where he declared Spain and things Spanish occupied more attention than any other nation of Europe, which receive scant notice.

Donor Ibanez gave his impressions of Mexico, which he said should be left to work out its own destiny. Latent anarchy existed among the Indians there he said, while the worst feature was the militaristic clique dominated by illiterate generals.

The novelist declared he intended to refrain from publishing his novel on Mexico, as it would be "pouring oil on flames."

FRIENDS AND FOES OF BLAIR AS COMMISSIONER TESTIFY

WASHINGTON, May 7.—Testimony for and against senator confirmation of David H. Blair of Winston-Salem, N. C., to be internal revenue commissioner was heard today by the senate finance committee in secret session but a decision was deferred. The committee meets again Wednesday to resume consideration of the matter.

## IMMENSE PRICE PAID FOR PART OF MANHATTAN

### Island Indians Bought for \$24 and Booze, Now Highly Valuable.

By Associated Press  
NEW YORK, May 7.—Manhattan Island, once sold by an Indian for \$24 and a few drinks of firewater, has become so valuable that a tiny plot stretching only 31 feet along Broadway recently was leased for an annual rental of about \$133 a square foot. Real estate men said this was the highest figure for which land was ever rented here.

The site is at Broadway and Thirty-fourth street, and extends about 50 feet along the latter. Several years ago a department store wished to buy the corner plot, having procured the land on both sides as the site of a skyscraper. But the owner would not sell, even for \$1,000,000, and the big store had to erect its home around the small buildings.

A four-story structure, housing on the ground floor a busy cigar store, still remains on the valuable corner lot, on all sides lofty buildings rear their bulks of steel and stone. The new lessee, who will pay \$3,500,000 for rent, taxes and other expenses over a twenty-one year period, plans to erect a narrow skyscraper on the triangular plot. A candy-making corporation will occupy the building.

Twenty years ago Robert S. Smith, who owns the property, started realty men by paying \$387,000 for the land, which has only 1,250 square feet of area. He had come to America with \$5.75 from his native Russia in 1880. When he bought the property, he was told such a small strip was not

worth the price and could never be profitable.

Within a few hours after the \$3,500,000 lease was drawn up, another candy concern offered \$10,000 more a year for the land, but it was too late.

## GERMANS PROGRESS LITTLE IN SOLVING REPARATIONS TANGLE

BERLIN, May 7.—Reichstag leaders admit tonight that no progress has been made in the direction of solving the present crisis. This announcement was made after a day crowded with conferences over the ultimatum of the allies on the reparations terms. The German People's party and the Democrats alone went on record opposing a new cabinet which would accept the allied ultimatum.

Clericals and majority socialists were divided in their attitude former chairman Herman Mueller of the majority socialists, who is Dr. Johann's former minister of transport signed the Versailles treaty was opposed to acceptance of the ultimatum. Deliberations today centered wholly around financial indemnity, which

## Your Tire Bills

YOU can save the price of from four to seven inner tubes this year.

Put this money in your pocket by fitting out with Lee Puncture-Proof Tires—extra-heavy, finely made tires, road-proofed with the three patent disc-layers, a distinctive Lee feature, absolutely unpuncturable yet pliant and "frictionless."

Your saving in tubes alone will bring down the cost of Lee Puncture-Proofs to about that of ordinary tires.

Put Lee Puncture-Proofs on your car.

Know, in advance, exactly what your tire and tube bills will be for the next twelve months.

In addition—you save time, temper and the annoyance of changing tires on the road.

# PROGRAM FOR WEEK

**TEMPLE**—Sunday, Monday and Tuesday, "Blind Wives," all-star cast, also Universal comedy. Wednesday, Alice Brady in "Out of the Chorus," also 8th episode of "Fighting Fate." Thursday and Friday, Elliott Dexter in "The Witching Hour," also farce comedy, "Wet But Dry." Saturday, "The Daughter of Devil Dan," featuring Harrison and Kimpton Green, also "Vanishing Trails," fifteenth episode.

**LAMB**—"East Lynne," all-star cast, also comedy, "April Fool." Tuesday, Oliver Twist Jr., in "Goodwin," also "Roaring Lions," comedy and Pathe News. Wednesday and Thursday, May Allison in "Marriage of William Ash," also Rollin Comedy and Pathe Review. Friday and Saturday, Bert Lytell in "The Message From Mars," also comedy, "Hallroom Boys," and Pathe News.

**MAJESTIC**—Sunday, Monday, Tuesday, Wednesday and Thursday, Greer and Lawlin Pioneer Girls Company, Picture Sunday, Frank Mayo in "The Magnificent Brute," also comedy, "Her Nature Dance," Monday and Tuesday, Antonio Moreno in "Three Sevens," Wednesday and Thursday, Halbrook Blinn in "The Ivory Snuffbox," Friday and Saturday, Five acts of Pantages Vaudeville and picture, Dorothy Dalton in "The Jungle Child."

**LIBERTY**—Sunday, Rex Beach's famous story "The North Wind's Malice," all-star cast, also Larry Semon in "The Sportsman," and Pathe Review. Monday, Constance Talmadge in "Good References," also "Glue Factory," Mutt & Jeff, and "Ruth Roland" in "The Avenging Arrow." Tuesday, William E. Hart in "Between Men," also "Nonsense," a Mermaid comedy. Wednesday, "The Revenge of Tarzan," and Snub Pollard Comedy, also Charles Hutchinson in "Double Adventure." Thursday, William Russell in "Quick Action," also Consolidated Comedy, "Happy Day," and "The Purple Riders." Friday, "The Sage Brusher," all-star cast, and Mack Sennett Comedy, "His Last False Step." Saturday, Roy Stewart in "Red Haired Cupid," and Sunshine Comedy, "The Slicker." There will be a morning matinee for the children on Saturday between 9 and 11:30, under the auspices of the Young School Mothers' club. Program—Bill and Bob in "Catching the Coon," and comedy, "Edgar's Little Saw."

**LAMB.** Certain stories—in novel or play form—constitute an important part of our American civilization, as do the telegraph, the telephone, the incandescent bulb or the automobile; they are an integral part of our life. Only a small number can be counted among this high order: "In Old Kentucky," "The Old Homestead," "Ben Hur," "Way Down East," and greatest of all: "East Lynne." Originally written by an English novelist, Mrs. Henry Wood, the novel was soon translated to the United States and dramatized as well. So many scores of editions have been published here and so many hundreds of presentations of the play have been seen on our stage, that it has come to be regarded as an American product—just as a foreign born infant brought here will absorb our civilization and become a representative American citizen.

The greatness of "East Lynne" lies not alone in the five generations who have known it, nor in the hundred million Americans to whom it has been familiar; the basis of its universal appeal as a book, as a play—and now as a photodrama—lies in its humaneness, its sympathy, its sweetness and its moral lesson. Nothing can long endure which is founded on a false morality; that explains the fleeting popularity of the great mass of our literature, our drama and our films. It takes an epic tale to endure the rest of time; "East Lynne" is the evergreen, the hardy perennial in the garden of literature. Showing at Lamb today and Monday.

**LIBERTY.** Larry Semon was hunting big game in Turkey, and found it under terrifying circumstances. Taking a snap shot at an ostrich, around the corner of a building, he peppered the Turkish army with bird shot, and fled wildly from the wrath of the injured soldiers. He took refuge in the Sultan's palace, penetrating to the inner quarters and witnessing a dance of the harem beauties. It was a beautiful spectacle, but Larry was to pay dearly for the treat. "The Sportsman," a Larry Semon comedy, in which these and other interesting and laughable events occur, will be shown at the Liberty Theatre today.

As punishment for his trespass and other offenses against Turkish custom, Larry and his black servant are thrown into a den of lions, finding bigger game than they had bargained for, and having to face it without weapons. They escape in surprising fashion.

**TEMPLE.** Seldom in motion pictures is the public given such an acting treat, in combination with such a superb reproduction as happens in the William Fox special offering, "Blind Wives" which will be the featured attraction at the Temple Theatre, for three days, starting today. The picture is based on "My Lady's Dress," the well-known stage success from the pen of Edward Knoblock, and it is a riot of richness, beauty and variety.

"Blind Wives" is really five plays woven into one. Two of the leading players enact five different parts and another plays four roles. Estelle Taylor, who won great acclaim in "While New York Sleeps," the Fox special which flashed brilliantly across the screen recently, has the leading feminine role. She plays the grand lady who would dress and promenade regardless of the cost, a French weaver, a crippled girl of the New York slums, the unfaithful wife of a Russian fur-bunter, and a beautiful model in a dressmaking establishment.

Maro MacDermott plays opposite her in all the scenes. He is her wealthy but harassed husband, her rejected sweetheart, her sister's beau, her husband in the Russian episode, and her cruel employer in the last story. MacDermott is always good. He is a consummate actor and his performance is distinguished throughout. Harry Southern plays prominent roles through and adds to his laurels. The picture as a whole is a sensational, dramatic story, with its various phases woven together as perfectly as the beautiful silk of milady's dress. It comes from William Fox as a worthy successor to "While New York Sleeps."

**ACTOR PERFORMS ACT WHILE OFFICER WAITS TO TAKE HIM TO JAIL**

The man who walked the tight wire at the Majestic theatre last night worked while a policeman stood guard over him in the wings. While he did his thrilling stunts the thought is bound to have been with him that he was going to spend the night in jail. The man, J. F. Collier by name, was arrested Saturday afternoon by Rangers Thomson and Eads on a charge of being a deserter from the United States army. The desertion is said to have occurred at San Antonio. Collier and his partner open the vaudeville show at the Majestic. After he was arrested he was delivered to the safekeeping of Chief of Police Reynolds and Reynolds in turn after much coaxing was induced to let him do his act at the Majestic. To be sure of his safe keeping he sent Jimmy Daniels, acting night captain, with him. Daniels returned him to the police station after his act was over.

## INDIANS PITCH TENT ON ROOF OF NEW YORK HOTEL

Chief Two Guns White Calf, "the man of the buffalo nickel," and his band of Blackfeet Indians from Glacier National Park reservation, Montana, are visiting in New York City. The Indians have pitched their tepees on the roof of the Commodore hotel, where they will stay during their visit. The photograph shows members of the band leaving a tepee atop the Commodore roof, to get a view of the "big city," and little "Joe Heavy Breast" and his sister, "Mary Two Guns White Calf" enjoying a view of the "big city" from the roof.

**GALBERT & BRANNON'S BROWN WELL WEST OF TOWN LOOKING GOOD**

Galbert & Brannon's Brown well, west of town, looks like a good one at 3621 feet, it is reported. It is at the top of the sand and gives evidence of the best well in the pleasant Grove extension since the Eldorado proved up the territory with its Williamson well. The Brown is 600 feet northeast of the Williamson. It crooked the hole from 3617 to 3621, just before passing through the lime, but kept going until the sand was touched to see what the well looked like.

The hole will be straightened and the well drilled in today or Monday and indications are said to forecast a 2000-barrel producer.

**WILLIAM MASON MORAN IS RANGER'S YOUNGEST ROTARIAN**

William Mason Moran is the youngest member of the Rotary club. He was elected to membership in that august body at the last weekly luncheon when Johnny Moran of the North Texas Supply company informed his fellow members that the young fellow had arrived at his house

and taken up a permanent abode there. William Mason is said to be a lusty young fellow, hefty and well able to qualify as a college yell leader.

**BRITISH PUBLIC IS AGAINST SHOOTING OF LIVE PIGEONS**

LONDON, May 7.—English public opinion is being stirred by a concerted attack by the press against pigeon shooting and as a result, a bill has been introduced in parliament which would make this form of sport illegal.

The storm arose over a contest recently at Chatham where live birds were released from traps for a shoot-in competition. Support for the proposed anti-shooting measure is promised by the government and is being warmly given by the Royal Society for the Prevention of Cruelty to Animals.

Agitation against this form of sport has extended to Monte Carlo, where many upper-class English spend part of the winter, and where the practice is said to be an institution. The Prince of Monaco is reported to be sympathetic to the attempt to eliminate the live pigeon shooting and to substitute clay pigeons.

Theodorico Borgognoni who died in the year 1266 advocated and practiced the modern aseptic treatment of wounds nearly six thousand years before it was re-discovered by Lord Lister and applied by modern surgery.

The prehistoric monument of great upright stones at Stonehenge, England, is being excavated and evidence has been found of a still earlier series of monumental stones, which were removed by the prehistoric builders who erected the present stone. The purpose of these two successive monuments and the kind of people who erected them remain unknown. In the case of the more recent series evidence has been found that the stones which lie horizontally along the tops of the upright were once fitted into mortises and lowered into place, implying that the primitive people who erected them possessed some equivalent for ropes and at least a sufficient knowledge of engineering methods to permit the raising and lowering of stones weighing several tons.

WILL BURKETT RESIGN?

Full representation for West Texas is a vitally important matter at the coming session of the legislature. Redistricting of the state, the West Texas A. & M., and other matters, the urgency and justice of which are not questioned, demand that every ounce of strength which West Texas can muster shall be on hand at Austin when the legislature convenes. For that reason, West Texas whether potential supporters of Mr. Burkett or not, have been behind him in the controversy with Governor Neff which must have had some bearing on the governor's decision to call the election. Mr. Burkett pointed out to the governor that to refrain from calling the election meant denying representation to the twenty-eighth district, which statement was manifestly true and expressed the feeling of the district's voters. Because every possible legislator is needed at Austin in order to obtain for West Texas its just deserts. And Representative Burkett expressed the issue clearly and succinctly in his last communication to the governor. In following out this line of thought however, one wonders if Mr. Burkett has considered the fact that in case he is elected to the senate, he will have omitted the very deed he accused Governor Neff of committing—denying representation to West Texas. And if Representative Burkett makes the race while he still is representative, he will have done that very thing. For his election will not have taken place and been certified and his resignation as representative be filed in time to give the Eastland county district opportunity to elect a representative to succeed him.

One wonders, when he considers this proposition and Mr. Burkett's known views upon it, whether he has reviewed the situation from this angle. And if he has reviewed it, does Mr. Burkett intend to resign now in order that men may be elected to both the senate and house in time to participate in the special session, no matter who is selected? Or does he intend to hold his present place, and thus convict himself of willingness to commit the very crime against West Texas which he asserted the governor was committing.

MOTHER'S DAY.

Mother is the best loved person in America, or the world. Not any particular mother, but every mother, has her sincere worshippers who think that she is one beyond compare, the best friend, the most steadfast friend; loyal and helpful in any occasion of trouble or distress, whose affection cannot be bought away nor driven away from her children by any act they may commit. She is on their side forever and regardless of what may happen or may not happen. Being so as an individual, mothers in general have become welded in the public thought as an institution, a distinct entity apart from the rest of the world in emotions and reactions to happenings. Who that venerates and cherishes his own mother but does not have a high admiration and respect for all other mothers as well? And thus we have Mothers' day, a day set apart for public expression of this sentiment which abides in every human heart, no matter how lofty nor how low the station of the child. Mothers' day is young as a special occasion, but it gains strength with every passing year, and well is it so. For purity of life is her ideal. And

it is by her gracious example, the thoughts—sometimes unbidden—of what she would think, that keeps many a lad and lassie balancing precariously on the straight and narrow path, or walking confidently down it, with never a thought or look for the depths below.

Mothers' day as occasion for celebration has only been in existence since 1908, so far as records show. But even in this is only the fourteenth year that mankind has worn a red carnation as a tribute to a living mother, and a white one for a mother who is dead, the spirit which marks the day is symbolic of all the ages.

Coal deposits have been discovered in New Mexico. It remains to be seen how this interesting fact will be made an argument for an increase in price.—Boston Transcript.

They say the word "Hooch" is a Scotch exclamation of elation, and you know the only stuff that will elate a Scotchman.—Pittsburg Gazette Times.

President Harding didn't realize how large his popular support was till every original Harding man came to Washington for a job.—Louisville Courier-Journal.

The brotherhoods admit that the railroads are in a critical condition, and they can point to a number of reasons except wages.—Indianapolis Star.

MINNESOTA'S  
\$100,000,000  
ROADS BEGUN

ST. PAUL, May 7.—Minnesota's \$100,000,000 good roads project, to permanently improve highways connecting the principal towns and the ten thousand lakes for which the state is famous, was launched this week.

Charles M. Babcock, state highway commissioner, has organized a maintenance force of more than 1,000 men with a patrolman for each five-mile section and special gangs to keep the gravel roads in best condition until paving is laid over the entire 7,000-mile system. Actual operations started May 1. Contracts for additional hard-surfacing will be awarded soon, according to the highway department, which will spend approximately \$10,000,000 on highways this season and increasing amounts each year thereafter.

The Babcock good roads plan was adopted at the last election and put into effect by the legislature which has just adjourned.

Improvements will be financed with the proceeds of a 2 per cent tax on the list price of motor vehicles, in lieu of other taxes. A state ad valorem tax levy of 1 per cent and local levies will be continued to provide funds for improvement of lateral or feeder roads. Minnesota already has long stretches of paving arterial routes and hundreds of miles of good gravel roads. Completion of the Babcock plan will mean a good road to every farm gate in the state and the highway department predicts that the most important lines will be hard surfaced within five years.

RISING STAR-CISCO  
ROAD GRADE FINISHED

RISING STAR, May 7.—The grade on the public highway leading from Rising Star to Cisco, has been completed and the work of installing bridges is well under way, and the contract has been awarded for the surfacing, so that work will start immediately. The contract for the first eight miles of the road was given to M. C. Donovan, and the first four miles out of Romney will be built by Mr. Maddox. It is expected to have the road entirely completed within four months. The surface of the road will be what is known as the Telford process believed to be the best hard surface road which could be secured for the money, inasmuch as the stone to be used can be found along the road and obviate the necessity of long hauls.

GOOD ROADS 'RAG'

If you would keep the golden rule, And help to bear another's load, Then why not help the old gray mule, By dragging that bumpy road. There is one great thing that Ranger needs. That's roads that folks can travel. So friend if you would sow the seeds, Make use of drag and gravel. You may not have a fine new car, On whose speed you like to brag, But please don't let that be a bar, Keep using the split log drag. If you want Ranger to be the hub Of all fields round about, Then citizens, let's don't be a "dub," And let the other towns crowd us out. We have spent our money to build good roads, Then do not quarrel and nag, And say the taxes are useless loads, Get busy and use the drag. Don't expect the other fellow to do. Be willing to do your part, Let every man into the working line fall, And give our good roads the right start.—Mrs. Ben Browning

JUANITA WEDS HER "LILY LOVE"

"With this ring I do thee wed," said Juan Miller to his bride, Juanita Miller on "the throne of love" on the Joaquin Miller estate overlooking Oakdale, Cal., during the most unusual wedding ceremony California has ever witnessed. The bride is the daughter of the late Joaquin Miller, poet of the Sierras, "Juan Miller," who was heretofore John Reid, has been her-alded far and wide as Juanita's "lily love." The bride received the "kiss of life" from Juan while movie cameras purged applause. Juanita, for part of the ceremony, was garbed as an Indian maiden in a costume that might have once clothed ninety-eight pounds of potatoes. This costume she wore an inclination at times to imitating the affair ordered her daughter to get a blanket. A safety pin tucked the wayward bodice in place and the ceremony proceeded while the movie cameras continued their purr of applause. Needless to say, all were pleased including Juanita and her "lily love."

Josephus Daniels Tells Story of American Navy's Exploits in World War

(Continued From Page One.)

him a figure ranking second to not one of the great men who preceded him in that great office. Hamilton and Gallatin and all the famous secretaries of the treasury solved important financial problems, but, in the magnitude of the task, not one of them had such world financing to carry out as Mr. McAdoo accomplished so brilliantly.

But no man in that war council will grow so much in the perspective of history as Newton D. Baker, secretary of war. I was in intimate daily association with him. I knew his large grasp of the problems with which we had to deal and his whole-hearted devotion to duty. I could appreciate his broad vision and his scrupulous sense of justice.

His task was far greater than that of Stanton, but he showed no less ability in discharging it, and with the great ability went a charity, kindness and courtesy which won him the esteem and confidence of all his colleagues.

My most happy recollection of those crucial days is my intimate association with Newton D. Baker. He does not know what playing to the gallery, self-seeking or pretense are. He shouldered every so-called error of others in the field and department, and with a generous spirit, gave support to those who were entrusted with important duties.

I want, in the remainder of this article, to write of those men, referred to in my first paragraph, whom the war picked up and put in posts of burdensome obligation—at least to write of such of them as became with us members of the war cabinet.

The story of the war industries board has been told, happily, so that the man who will write the real history of the war (he may not yet have put his pen to paper) can grasp the magnitude of the mobilization of industries under the able direction of its head, Bernard M. Baruch. He had made his fortune in Wall street, buying stocks when they were low and selling them when they were high—the secret of success in that center of making and losing fortunes in a day.

my approval. After conference Mr. Baker made the engagement for the three of us to see the president. On our way over to the White House I told Garfield that what we would advise the president to do would raise the most violent storm of the war.

"Go Ahead," said Wilson. "None of us had any illusions that it would be popular. The matter was laid before the president. He met the drastic proposal without flinching. In fact, he grasped the necessity for it sooner than had either of us, and he told Garfield to go ahead, saying in substance: 'It is necessary, absolutely necessary, toward our greatest effectiveness in the war. Nothing must stand between us and the goal.' Garfield issued the order. The storm broke. The newspapers or most of them, raged the next morning. 'Mr. Garfield's stupidity,' was displayed in big type, and editorially he was roasted over a hot coal fire."

About midnight that night, just as I reached home, "long distance" called me. The editor of a great newspaper in New York was on the other end of the telephone line. His paper had given the president earnest and able support in his war policies.

"Have you seen Garfield's damn fool order about the use of coal?" he asked.

"Yes," I replied. "What do you think of it?" he asked. "It is the worst order ever issued," was my answer. "I am glad," he chuckled over the telephone, "to find a cabinet officer who agrees with me. We are going to try to carry out that order tomorrow. May I quote what you said?"

"Certainly," I replied. "But you must add that I accompanied Mr. Garfield to see the president when he presented it for approval, and I joined Mr. Garfield in recommending the policy of the president. I thought then and I think now that it is the worst order ever issued. Only one thing could have been worse."

"What was that?" answered my now rather disgusted fellow editor at the other end of the line. "Not to have issued it," I answered. "Conditions are so desperate that there is no way to save the situation but to carry out that order until the situation improves."

Vance McCormick Makes Good. Vance McCormick, head of the war trade board, was beloved by all his colleagues. President Wilson's regard for his abilities is such that he twice offered Mr. McCormick a cabinet portfolio. Both times he declined. "I don't want to live my life without ambition for preference or honor. My very soul was in the war. His loyalty to the president was based on kindred beliefs and aims. In the 'war cabinet' was one of the men who always made good, winning the hearts of his associates by his frankness and their confidence by his sound judgment.

One of the most delicate duties to be decided was what to do with the property of the aliens. The president would not hear to the confiscation of private property, but it was understood that their property must not be left in the hands of enemies of the country. It was therefore decided to appoint an alien property custodian. For that post the president selected A. Mitchell Palmer, afterward attorney general, known later as "the fighting Quaker." In 1913 he had declined the portfolio of secretary of war because of his Quaker faith. In 1917 he was aroused to the belief that war alone could pave the way for permanent peace and justice, and he enlisted with all his soul and ability.

His knowledge of the law made him a valuable and incidental member of the president's clearing house for war.

If I carry out my plan for writing a book on America's part in the world war, the part this clearing house played in giving great assistance to the president will make a leading chapter.

ARTICLE 6.  
This is the concluding article of this series.

Families from surrounding territory are moving into Ranger to live because of the excellence of Ranger schools. The admirable picture shows, the fine shops, the good streets also attract them.

Less concrete but just as important is the attraction Ranger affords with its general up-to-dateness; its smartness in fashions and habits; its air of enterprise and prosperity.

Ranger attracts. Week-ending in Ranger is becoming a habit, not only with the man from the oil fields, but the prosperous families which live in the surrounding region.

Shopping in Ranger is still the best and most attractive shopping for many miles around.

All these things make Ranger a good and an attractive place to live in. And here is a play that it is to be hoped Ranger will keep up.

A great industry was looking for a location in the Central West. Before deciding upon the city it took two steps:

1. It employed a man to go amongst the workers in its line all over the country and find out what they most would like to have in any town they lived in.

2. It went looking for the town that provided these things.

Schools Come First. The investigator learned that the first thing the head of a family wants is good schools for his children. Next, he wanted for his wife and children churches. Third in the list was good picture shows and open-air theaters. Fourth came up-to-date stores. Along about there somewhere came reasonable cost of living. But he forgot that until he had assured himself of the schools, the churches and the recreation.

30,000 DEAD  
WILL STAY ON  
FOREIGN SOIL

Four Bits of France Holding Bodies of America's War Heroes.

BY WEBB MILLER.  
United Press Correspondent.  
PARIS. (By Mail).—More than 30,000 bodies of American soldiers will lie forever in French soil. Four bits of French soil have been chosen as the final resting-places for the bodies—four bits of France that "will remain forever America." The permanent fields of honor will be Romagne, Belleau, Flanders Field near Bony, and Suresnes on the outskirts of Paris.

A commission headed by Col. C. C. Pierce, has approved the choice of the four permanent cemeteries. The commission, which is composed of W. M. Kendall, C. M. Moore, James Grenleaf and Major George Gibbs, architects and artists, are inspecting the sites with a view to recommendations for beautifying these fields to make them the most beautiful burying places in Europe.

The Romagne field will hold the majority of the bodies of men killed in the Argonne fighting—14,000 in all; the Belleau field on the hillside near Belleau Wood will contain 7,000 bodies; Suresnes will hold 4,300 including many bodies of wounded who died in Paris hospitals, while Flanders Field will contain 1,300.

At present the American Graves Registration service is engaged in disintering the bodies intended for shipment back to the United States. Up to the present 14,646 bodies have been disintered and shipped. Nearly five thousand bodies are lying at the ports awaiting transport. By October all the bodies requested for shipment back home will have been shipped. Then the Graves Registration service will begin the task of concentrating the remaining bodies in the four permanent fields.

This task will occupy nearly all of next year. The size of the task—and incidentally an idea of the debt of the allies to America—is more vividly shown by a map in the office of Major C. L. Sampson of the Graves Registration department than could be told in words.

At every point where the body of an American soldier was buried was stuck a red pin. The map which comprises all of France, Belgium and Luxembourg is literally studded with red pins—from the Pyrennes to the Argonne, from the Alps-Maritimes to the English channel—the soil of France is sprinkled with American dead. Altogether there are 550 pins on the map—meaning that at 550 different points there were buried American soldiers; sometimes a lone grave, sometimes a dozen, sometimes hundreds. Many of the graves are hundreds of miles from the fighting lines. At these places wounded soldiers died in hospitals or soldiers on leave died and were buried on the spot. The line of American communications from the ports to the fighting lines can be traced across France by the row of red pins indicating burial places.

More than 400 Americans are engaged in various parts of France and Belgium in disintering the bodies for shipment. By October about 45,000 bodies will have been shipped. The nearest of kin of 19,861 have specifically requested that the bodies remain in France. The others for which there is no specific request for shipment home will remain also.

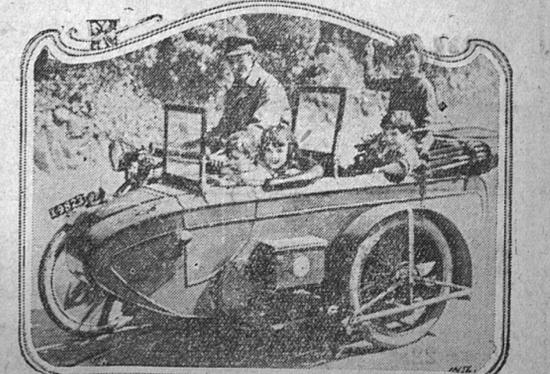

When finally completed the permanent cemeteries in the United States—long, precise rows of grassy mounds with spacious walks between. At the head of each grave will be a stone marker with the name and organization of the soldier lying beneath.

The permanent fields are being designed as shrines for Americans in Europe for all time to come. Already hundreds of friends and relatives of the fallen are flocking to the graves. The American army will probably have a lower percentage of unidentified dead than any allied country. The Graves Registration service expects eventually to identify all except a very few bodies.

The Memorial day committee of the American Legion is already preparing for the observance of Memorial day when a wreath will be placed on every American grave in France.

Models found recently in an ancient Egyptian tomb show slaves engaged in home brewing and in pouring off the clarified beer into round stone jugs, no doubt an exact reproduction of the way in which the household art was practiced over four thousand years ago.

SIDECAR TAXI POPULAR WITH KIDDIES

A group of happy English youngsters returning from a morning at the beach in a novel Torquay sidecar "taxi." This new type of sidecar is proving very popular with Londoners.

# DRILLING ON B. F. TERRY LAND STARTS SOON

### Rising Star Displays Interest in Coming Operations in Hilburn Field.

AN INTERESTING prospect in the Hilburn field at present is the well to be drilled on the B. F. Terry land, west and running north, from the tracts on which are located the Jacobs and Terry-Jacobs wells, each producing from different depths, although less than 100 feet apart. The Terry-Jacobs has been making from 60 to 100 barrels of oil per day for nine months, from the Caddo lime, found at 2,450 feet, and the Jacobs

well which passed this depth without a showing, and made a three million foot gasser from the Hilburn lime, found at 3,000 feet, and which is now producing 100 barrels of oil per day, and steadily increasing its flow. The well to be drilled on the Terry tract is contracted to Waldo Bradstreet, who drilled the discovery well of this field, at that time a contractor for H. V. Foster et al, but now venturing for himself, and the syndicate which bears his name. Being more familiar with this field than any other operator, and being more successful than almost any contractor, it is believed that he will stand a good chance to get a big well on this location, as it is conceded by the oil fraternity that neither the Jacobs nor the Terry-Jacobs have done what a well in this locality should do with successful operation and good luck. The Terry lease is a 64-acre lease and if production is secured from the first well, others will be drilled immediately, according to Mr. Bradstreet's plans.

Drilling activities in the Hilburn field include the following: Humble Oil & Refining company, on their Durham No. 2, drilling at 1,000 feet; Magnolia Petroleum company, on their Collier No. 2, underreaming at 1,560 feet.

The Simms company on the Bonner lease is drilling at 1,610. The B-D Oil syndicate which spudded in on their Smoot lease, are delayed from drilling by an accident to the wooden conduit. Humphries syndicate on the Brooks tract is drilling at 800 feet. Kitsap King Granite syndicate have let a contract for the well on the Weems tract one and one-half mile northeast of town, where they hope to find the sand that the Texas company has in the Bowden well, at 1,560.

Madden and Madden shot their well on the Day lease, with a small shot, but trouble with putting the well on the pump again has prevented the determination of the effect on the production. Hutton No. 2, of the Sun company has been producing 120 quarts last week and is standing with fluid in the hole.

The Delmar Oil & Gas company have a representative in the field dismantling wells on the Walter Hitt lease. This is on the northern edge of the pool, and was among the first leases developed. These people have no other acreage in this field.

The Texas company on the Amis tract, just out of town to the north, are drilling with a rotary at 800 feet. West from Hilburn, two miles, the Sturm Oil company on the H. L. Vest tract, which has been fishing at 2,680 feet for several weeks, resumed drilling one day last week, but had another accident within twenty-four hours and are again delayed. This well has a nice showing of oil at the present depth.

On the Harris tract, farther west, toward Cross Plains, the Greenlee company have resumed drilling at

1,500 feet, after an extended shut-down.

South of Cross Plains, three miles the Roxana Petroleum company on their Rudloff well are drilling a 1,500 feet. If this makes a well it will open an immense scope of territory for development, as it is five miles from any production.

Near Cross Cut is another interesting wild cat, the well of the Sesame Oil company, just rebuilding the rig which was blown down by the high wind last Sunday. This location is one and one-half miles east from the well of the Penman Oil & Gas company, drilled eighteen months ago, and still making 5,000,000 feet of gas. In Brown county, activity is on the increase since the Kirkpatrick Lamb well on the A. J. Williamson tract, created a sensation by going over the top with the bit two feet in the pay, and still making 150 barrels of oil per day, without being drilled in or shot.

The want of pipe line facilities prevents the complete test of any of the wells in this field, but the Prairie Pipe Line company are considering the laying of a line to relieve the situation.

Several drilling contracts are being negotiated, and locations for other wells will soon be made. The Bailey-Bowen company have a location for No. 2 on the Gilliam tract, where they have a good producer that has been in for several months. The Cox well has been completed at a total depth of 2,600 feet, and will plug back and shoot at 2,400 feet where they had a showing of gas, but no oil.

In the Wyndham well of the Honea et al, oil and gas to a considerable extent are shown and this well will be shot from 2,370 to 2,450 with the expectation of making it a good producer.

## IF GERMANY DISARMS POLAND SHOULD TOO

MAIDSTONE, England, May 7.—Minister Lloyd George declared today that if Germany disarmed in accordance with the treaty of Versailles she would be entitled to ask the allies to insist on the disarmament of Poland.

## GALLSTONES

Dr. E. E. Paddock, a physician of Kansas City, Mo., is giving away a Free Book that tells how hundreds of people have obtained wonderful results from a simple home method of treatment in cases of inflammation of the Gall Bladder and Bile Ducts associated with Gall Stones. This booklet tells all about Catarrh of the Gall Bladder, thickening Bile, etc. Give picture of the organs affected and tells things you want to know, things that have worried you. Mrs. Jol Wade says: "I believe I would have been dead if I had not taken this treatment. I have been out 1500 for operation and doctor bills, and I feel your treatment has done me more good than all the others." There is no such pain and suffering associated with these troubles that it would be a kindly act to get this valuable Free Book for any sufferer. No charge. Write obligation. Just send name and address today to Dr. E. E. Paddock, Box 112, 221 Kansas City, Mo.

# JOHNSON NO. 1 DRILLED NEAR CRYSTAL FALLS

### Struck Pay at 3,285 Feet and Promises to Be Big Gusher.

Special to the Times  
CRYSTAL FALLS, May 7.—The Johnson No. 1 well on the Yeaman survey, two miles southwest of Crystal Falls, was drilled in this morning and, according to the officials, will be the largest gusher in the north Stephens county field when completed, striking the pay at 3,285 feet. The sand has been tapped two feet, spray from the flow tank covering the lease.

Completion of the well will be made Saturday by which time it is expected the Prairie company will have laid a pipe line from the Guaranty No. 1. Storage tanks have been provided by the Johnson company but from the showing of the well these were believed inadequate. This is the first completion of the Johnson company in this field. They are controlling 420 acres.

That an active drilling campaign will be started immediately in the vicinity of the gusher by other companies is evidenced by the fact that many new locations have been made and rig timbers ordered.

## EASTLAND NAMES COMMITTEE TO MAKE AWARDS IN CONTEST

EASTLAND, May 6.—A committee consisting of Solon Featherstone, Virgil Seaberry and Theodore Ferguson has been appointed to act as judges to pass upon the papers of the high school students in the contest inaugurated by the Chamber of Commerce and Merchants' association, as to "Why Is Eastland a Good Place in Which to Live and Invest?"

This contest started May 1 and will end May 15, at which time all papers will be turned in to Professor Peterson, and by him in turn turned over to the committee, which will decide as to the winner, who will be awarded a ten-dollar trading coupon good at any one or more of the local stores; members of the two organizations mentioned. This is done for the purpose of selling Eastland to Eastland people. The prize winning theme will be printed in the local papers.

Another prize has also been offered to the high school pupil or other person who answers correctly the greatest number of a given number of questions pertaining to the statistical history of Eastland and Eastland county, pertaining to taxable values, school rates, tax rates, etc. This contest also started May 1 and will close May 15 simultaneously with the others. These ideas are for the purpose of acquainting Eastland people with their own, and arousing the necessary interest in civic affairs, and more especially in the minds of the boys and girls of the high school, the men and women of tomorrow.

## BEGGARY DECREASES, THIEVERY GROWS IN FRANCE SINCE WAR

PARIS, May 6.—There is 80 per cent less begging in France than previous to 1914, according to police statistics but theft has increased in about the same proportion. The police explain this phenomena by saying that the temptation constantly held out to the gaily inclined to enjoy themselves appeals in those who cannot afford it as well as those who can. Criminality among women and chil-

## LONDON SEEKS WOMEN TO ESCORT STUDENTS TO AND FROM SCHOOL.

LONDON, May 6.—The mothers who train their children to walk with toes pointing outward and counsel their little girls never to wear high heels when they grow up, have been told they were all wrong, by Dr. W. H. Trethowan, orthopaedic surgeon, in an address at the institute of Hygiene. "To walk properly," he said, "the feet should be kept absolutely parallel. The 'quarter to six' attitude is one of the big mistakes of physical training. Three minutes to 12 and three minutes past is what you want when standing. "A long stride is not good for the feet. A slow, short step is better, for it makes you rise on the toe.

"Never discourage a child who is turning his toes in unless he has an actual deformity of the foot. He is probably trying to cure himself of knock-knees or weak ankles."

Reasonably high heels are very excellent things, the surgeon said. Low heels are all right for children, or for adults with a perfect foot, but unfortunately no foot was perfect.

"I advise, unhesitatingly," he added, "the use of high heels. I do not mean by that the silly three-and-a-half to four-inch Louis heel with its curved mechanical shape and inefficient support. The height of the heel for remedial purposes should not exceed two and a quarter inches. In cases of overstrained feet, slippers must be avoided."

drugs has notably increased. Among a hundred persons found guilty of crime before the war there were 12 women and five minors; there are now 30 women and 14 minors in every hundred convicted.

Besides the temptation to have a good time, the police say sensational moving pictures have had a good deal to do with the development of crime among women and children.

Cases of assault and battery and other offenses which are largely credited to alcoholism, have decreased. This is attributed to the suppression of absinth and to abstemious habits acquired when war-time restriction made it impossible to drink at all hours of the day.

Examination of the teeth of ancient Egyptian mummies shows that the decay of the teeth, pyorrhea and other forms of dental diseases occurred five thousand years ago much as they do today. The preservation of teeth by filling appears never to have been discovered by the Egyptian surgeons. Toothache must have been common, but was probably regarded as inevitable.
