During this period, nature is supposed to be preparing the internal organism of a woman for a safe and speedy delivery; but it is more the exception than the rule when nature, unaided, performs her part at the crisis in a manner to relieve pain and contribute to comfort.

"I was afraid," writes a prospective mother, "until an experienced mother told me about MOTHER'S FRIEND,"

"--but now I cannot recommend Mother's Friend too highly for I know it helped me wonderfully, and I can almost say my baby was born without pain. At the present time I am using it again, as I do not want to go thru the ordeal without it."

Three generations of prospective mothers have used MOTHER'S FRIEND. When gently applied, during the period of expectancy, it soothes the fine net-work of nerves, lubricates the broad, flat, abdominal muscles and prepares the way for an easier, quicker and practical delivery.

PECAN TREES THRIVE IN IRRIGATED VALLEY ing back from France, making labor

By Associated Press

By Associated Press EL PASO, Texas, Dec. 8.—After years of experimenting, farmers in the irrigated valley near El Paso say they have found a pecan tree which grows luxuriantly in the valley's climate and soil. All attempts had been futile until this year. The nuts from the tree are of the paper-shell variety and this year's output, though small, is said to be of a rich flavor.

rich flavor. The fact that the scattered experimental trees did well proves, the farmers contend, that pecan trees, hitherto thought impossible in West Texas, can be grown in this territory. Farmers are planning to plant a number of the trees, Turkish Baths and Body Massages. feeling assured of success.
