## THOUSAND BARREL FLOW FROM DEEP SAND

### Water Brings Big Revenue To City of Ranger

#### RANGER WATER PLANT PAYS GOOD PROFIT

Gross Annual Receipts About \$144,540 Annually; Pump Capacity Taxed

Figures, as is well known, do not lie. A little figuring shows quite decidedly that when the city of Ranger bought the water supply system of Ranger at a price which, with improvements added, amounted to less than \$200,000, the city made a good trade.

Consumption of water in Ranger is just now exceeding the pumping capacity at the water plant, according to reports of officials having the care of the water supply. Night and day crews are keeping a steady flow of water from Hagaman lake into the city's water mains, and yet they are not equal to the task of providing for the wants of consumers and keeping the standpipe full so that an emergency supply is always on hand. An additional pump is to be installed, so the increased wants of the consumers may be cared for.

**City Making Money.**  
It is stated that the pumps are now sending 550 gallons of water each minute into the mains. This is 33,000 gallons each hour or 792,000 gallons every 24 hours. This amounts to 23,760,000 gallons every 30 days or 284,920,000 gallons each year of 365 days.

The cost of water to consumers was reduced one-half, or to 50 cents for each 1,000 gallons, when the city took over the water system, with a monthly minimum charge of \$150 to each consumer whether or not 3,000 gallons of water was used during the month. On a basis of 50 cents for each 1,000 gallons, the city's gross income from water should be \$12,045 each month, or \$144,540 each year.

Of course there are some expenses. The city pays 4 cents for each 1,000 gallons of water taken from Lake Hagaman, at present estimated, which amounts to \$11,395 each year, and there is also interest on bonds, cost of operations at the pumping plant, wages, overhead costs, depreciation. These will not amount to \$33,144 annually, but say they do, and the city of Ranger has a clear profit of \$100,000 from its water plant.

Some of the water is sold by the city at less than 50 cents for each 1,000 gallons. For instance the Texas & Pacific railroad has a contract for a large supply at a price that gives the city very little profit, and quite a large amount of water is said to be sold to persons living beyond the city limits at a flat rate which may bring in much less than is paid by water consumers within the city limits. But the city has more than 1,000 water consumers on meters, so it is fair to assume that at least the net profit amounts to \$50,000 a year. If the city would publish a report of its water earnings and expenses it would be interesting to compare it with these estimates.

**Will Buy New Pump.**  
During the spring the city of Ranger had an opportunity to buy a large electric pump from the Oil Belt Power company at a greatly reduced price, but did not do so, the officials evidently not foreseeing at that time there would be such a demand for water as has developed this summer. But the increasing demands of consumers and the inability of the pumps to meet these demands and keep water in the standpipe on Eastland hill has brought considerations of the officials to a head and, according to C. A. Love, city secretary, a new pump is to be purchased and installed as soon as possible.

Up to this time no definite figures have been kept on the amount of water pumped into the mains, but an electric meter has been ordered, according to Mr. Love, and is to be installed at the entrance to the big main leading into the city, so it may be known just how much water is pumped into the city. Water sold outside the city limits or going into any other than the city's big main will not be measured for the present, apparently. The Oil Cities Electric company has extended its lines from across Lake Hagaman to the power house and will install a transformer of sufficient size to take care of the electric meter.

**Is There Leak in Pipe?**  
Nearly all water consumers within the city of Ranger are supplied through the big main leading from the pump house to the standpipe, but many laterals connect with it on the way and during the last week so much water has been taken by consumers through these laterals that it has seemed impossible to get any water into the tank, or not more than five or six feet at most. Either the consumers are using most of the water pumped into the main before it reaches the standpipe or there is a

#### Oil Companies Meet Crude Price Advance Posted by Prairie

United Producers met the raise in crude oil price effective yesterday as per Prairie schedule. Magnolia Petroleum company met the same raise, effective today, but with a slight difference in two of the lower gravities, as follows:  
Below 28 degrees Baume gravity, \$1.28; 28 degrees to 29.9 degrees Baume gravity, \$1.35. All others same price as schedule posted by Prairie company.

#### SINGLE HEAD FOR NATIONAL DEFENSE URGED

Col. William Mitchell Declares Present Triple-Headed System Unsafe

**SAN ANTONIO, July 11.**—That the United States should have a single department of national defense, with all branches of the country's forces co-ordinating, instead of continuing the present policy with the navy, army and air service virtually unrelated, was the statement of Col. William Mitchell, Eighth corps area officer, addressing the Rotary club here. He said the present system was hazardous.  
Colonel Mitchell left today for a 10-day inspection tour of the San Antonio-San Diego airway, recently completed. He is flying in a DeHavilland plane.

#### Quick Method of Curing Tobacco is Being Investigated

**MANILA, P. I., July 11.**—Possible cure of tobacco in eight or 10 days, instead of the year required under present methods, was disclosed here today by John Heber and German scientists working under the auspices of the government. The government is financing the experiments, the method of which is being kept secret.

#### Alleged Defaulting Bank President Dies While Awaiting Trial

**KANSAS CITY, July 11.**—Joseph R. Gant, alleged defaulting president of the closed Centropolis bank, died at his father's home here early today, taking with him the secret of what happened to \$630,000 of the bank's funds.  
Gant has been ill since last November, when the bank closed and he was arrested on charges of embezzlement and forgery. He was released on \$50,000 bond. His continuing illness prevented his being brought to trial. Gant appeared broken-hearted and willed himself to die. His mind weakened, but during his entire illness he never once revealed the secret he alone knew of what had become of the money.

About 2,700 depositors, many of them of the laboring class, lost all their savings when the bank closed.

#### Neighbors' Quarrel Leads to Tragedy in Which Women Suffer

**FREDERICK, Okla., July 11.**—M. L. Graham of Loveland, a dairyman, is in a hospital here today suffering from self-inflicted gunshot wounds, having tried to kill himself after he had killed Mrs. Nell Macklin and her daughter, Laura. Mildred Macklin, 10, was also injured by a shot from Graham's gun. Two younger children of the Macklin family who were playing in the yard escaped injury.  
Neighbors said the two families and quarreled. They lived next door to each other.

#### HALMACH COMPANY TO DRILL TEST WELL NEAR CARBON

**CARBON, July 11.**—Machinery and material is being placed on the ground for drilling an oil well on the southeast quarter of section 19 of the Gilbert tract of land two miles east of Carbon. This test is to be drilled by the Halmach company and operations will begin within a few days, possibly Monday. It is to be 1,500 feet.  
A number of shallow wells were drilled in this section some months ago and many of them were fairly good producers of oil.

**THE WEATHER.**  
West Texas—Sunday and Sunday night, generally fair.

#### BRYAN OBJECTS TO SCIENCE IN SCOPES TRIAL

Court May Throw Out Chief Dependence of Defense in Presentation of Case.

**DAYTON, Tenn., July 11.**—"Are we going to be permitted to defend ourselves?" is the issue sharply thrust into the Scopes evolution trial today by attorneys for the defense. Clarence Darrow and his staff of legal assistants took advantage in the pause of the trial to confer as to meeting the unexpected resistance of Bryan and the prosecution to the admission of scientific evidence.  
"It simply settles down to a clear-cut question," said Dudley Field Malone, of Scopes' counsel, "and that question is whether we are going to be permitted to defend ourselves."  
The court ruling on scientific evidence will probably have a major effect on the trial and may expedite its termination if the ruling is adverse to the defense.  
"Young Gordon showed himself mighty smart, I'll tell you," the townfolk said to each other in discussing the turn of events on the trial.

#### Three Men Indicted For Fourth of July Tragedy in Boston

**BOSTON, July 11.**—Timothy J. Barry, president of the ill-fated Pickwick club, and one of nine against whom secret indictments were returned by the Suffolk county grand jury in connection with the collapse of the Pickwick club building, was held on a charge of manslaughter for the death of Patrolman Paul Halloran, one of the 44 victims of the tragedy, when arraigned in superior court Saturday afternoon.  
George C. Funk, architect, who was recently engaged in making repairs on the building, and Hyman Blumberg, lessee of the building, were also arraigned and held on charges of manslaughter. All three pleaded not guilty and were held in \$2,000 bail each for trial next Wednesday.

#### Lower Temperatures With Fair Weather Forecast for State

**DALLAS, July 11.**—Generally fair weather with slightly lower temperatures was predicted for the state over the week-end by the weather bureau here today. The high temperature of the last week slumped generally over the state Friday. Abilene was the only point in the 100-degree column.

#### Enraged Mother Will Defend Her Child and Strangers Are Warned

**SAN ANTONIO, July 11.**—"If a parent can be guilty of kidnapping her own child, then I am guilty," said Mrs. Virginia Canaday, returned here yesterday from New York, with her son, Roscoe Jr., 5 years old, who was taken from his father's home at Forest Hills, N. Y., last Tuesday.  
"Now I am not only ready to defend my boy and myself in the courts, but the next strange persons who come into this yard and who cannot give a satisfactory account of their presence will be summarily dealt with," continued Mrs. Canaday.

#### PONZI IS SENTENCED TO PENITENTIARY FOR LARCENY

**BOSTON, July 11.**—Charles Ponzi, famous bushel basket millionaire, was sentenced today to seven to nine years in state prison on four counts of larceny by Judge James A. Fisk of Suffolk county superior court.  
The larceny indictment grew out of Ponzi's financial operations here several years ago, when he dealt on a huge scale in international reply coupons, promising 50 per cent profit in 90 days.  
Pending an appeal to the supreme court stay of sentence was granted until Monday when he will be required to renew bail of \$10,000.

#### GOVERNOR EXTENDS MORE EXECUTIVE CLEMENCY

**AUSTIN, July 11.**—Governor Ferguson granted four conditional pardons today, and seven restorations of citizenship.

#### RANGER GETS SPLENDID RAIN

About an Inch and a Half Fell Within Two Hours.

Apparently a mere thunder shower, that started falling about 6 o'clock with the sun still shining, the light rain rapidly developed into a downpour that flooded the streets in a short time and rain fell steadily for about an hour and a half. Main street was half full of water, with the stream reaching the top of the curb and running over the sidewalk part of the time.  
The big gray cloud finally swung westward-taking the rain with it although a precipitation of an inch and a half at least was estimated for the downpour in Ranger and the immediate vicinity.

The water will not come amiss, as the farmers of this region were hoping to insure a good feed crop this year. Farmers in town for their weekly shopping wore pleased smiles as they cheerfully waded through the flooded streets or waited patiently in doorways for the rain to subside.  
Ranger will have a temporary relief from the scorching sun. The range had not been materially hurt by the heat as yet, but was fast exhausting the water supply near the roots of the grass and the rain of Saturday night was welcome to revive the grazing.

#### RACE TROUBLE BREAKS OUT IN DETROIT, MICH.

Negroes Occupying House in Exclusive White Neighborhood Shoot White Boy.

**DETROIT, Mich., July 11.**—The shooting of a white boy twice through the thigh by one of six negroes barricaded in a house in what hitherto has been an exclusive white neighborhood was the occasion of a near-riot in that section of the town as the house was placed under siege.  
The outbreak is the third and the most serious in the last few weeks.

#### Harrison County Gas Well, Flowing Thirty Million Feet, Ablaze

**MARSHALL, Texas, July 11.**—Efforts were being made today to put out the fire at the Bryson gas well, near Waskom, which has been blazing since yesterday.  
The well came in yesterday with an estimated flow of 30,000,000 cubic feet daily and burst into flames soon after coming in. Damage from the blaze already is said to exceed \$5,000.

#### SAN QUENTIN CONVICT ON WAY LEADING TO GALLOWS

**SACRAMENTO, Calif., July 11.**—Floyd Hall, San Quentin convict-slayer, was found guilty today of the murder of Joe Litzberg, local merchant, by a jury which deliberated 22 hours. The jury was unable to agree on the punishment, but under the law Hall must hang, according to Judge Busick, who tried the case.  
Hall, with Joe Tanko, both serving life sentences in San Quentin, escaped some weeks ago and terrorized this section with bold raids and robberies. Hall was captured but Tanko is still at large.

#### VICTIM OF HIJACKERS IN OKLAHOMA NEAR DEATH

**AMARILLO, July 11.**—Jack Jones of Oklahoma City was in a hospital near Channing suffering from injuries received when he was attacked and robbed. Jones, who, physicians say, will die, told rescuers that he had been hijacked while hiking to Oklahoma City. The robbers threw him from the car after inviting him to ride and then slugged him over the head, he said.

#### BURNING TRASH BOX CALLS OUT FIREMEN

A charred trash box on Main street, midway between Austin and Rusk, marks the spot to which the Ranger firemen were called Friday night about 9:30 o'clock. Someone had tossed a lighted match of half-burned cigarette into the box and started a blaze. Wade Swift pulled it into the street and the chemical truck soon had the blaze out. Acting Fire Chief Mannichia proved himself an able fire fighter.

**SAN ANGELO.**—Sheep sales active; 11,537 head shipped from here during one week.

#### INTELLECTUAL AGAIN SEEKING SUPER THRILLS

College Man, Scion of Wealth, Air Service Cadet, Charged With Murder of Friend

**NEW YORK, July 11.**—Through-out New York state and reaching northward to the Canadian border, a search is on for Phillip Knox Knapp, former Cornell university student, wanted for the murder of a taxicab driver.  
Believed to be in hiding somewhere in the Adirondacks, the man, alleged to be a super-thrill slayer, is sought by former buddies at Mitchell Field, Long Island, where he was an air service cadet and by police and constabulary of all kinds, the long fingers of wireless and representatives of law forces of all north-eastern states reaching out to seize him.

Whether insane or diabolically clever, the young man, scion of a prominent Syracuse, N. Y., family, appears, according to the police, to be bent on satisfying a lust for thrills.  
Already he has left behind him the widow and children of Louis Panella, hard-working taxicab driver and a friend of the airman at Mitchell flying field. Panella was found July 4, his body buried beneath slabs of cement in a church near the field. In his pockets were cards of Knapp.  
The police believe these cards were placed there by Knapp in the belief that by the time the body was recovered it would be decomposed so that identification would be impossible and it would appear as if Knapp's body would be unearthed instead of Panella's.

An unusual train of circumstantial evidence against Phillip K. Knapp, army deserter and scion of a wealthy Syracuse family, who is alleged to have committed murder for the super-thrill that inspired the Leopold-Loeb crime, will be presented to a special grand jury here July 17.

#### Heat Victim Taken In Refrigerator Car To Cooler Climate

**ISLE ROYALE, Mich., July 11.**—Lying on a cot in the hold of the steamship America, surrounded by cakes of ice, L. J. Chapman, wealthy dairyman of Kansas City, arrived here today, seeking the coldest spot in the United States.  
Holding the distinction of being the first human freight ever to cross the docks at Duluth, Chapman was shunted in his ice packed refrigerator car to the awaiting steamship. Chapman's journey from Kansas City, where he was a heat victim, has caused considerable interest here.

#### President Confers With State Secretary Over Chinese Issues

**SWAMPSCOTT, Mass., July 11.**—America's course towards China and its troublesome problems are expected to be framed over the week-end in conferences between President Coolidge, Secretary of State Kellogg and Under-Secretary of State Grew. While the conferences are described as consultations on foreign problems, China is the center of the vortex.  
The president is known to want to start on this highly important question, which, according to the Chinese problem. The state department has been represented as desiring to see the stability of China, with gradual abolition of extra-territoriality.

#### TWELVE-YEAR-OLD BOY IN HOUSTON HANGS SELF

**HOUSTON, July 11.**—Raoul Mesa, 12, went to see a western movie yesterday, then came home and attempted to emulate the hanging scene. His step-mother found him dead. He had placed a lamp cord about his neck and fastened the other end to a nail in the wall, and the chair on which he had stood slipped from under his feet.

#### ILL HEALTH PROBLE CAUSE OF SELF-INFLICTED DEATH

**HOUSTON, July 11.**—James Wit-over, 36, a neat cutter, committed suicide here yesterday by shooting himself in the heart with buckshot. His wife found the body in their bedroom when she returned from a trip into town. She said he had been in ill health recently and had fretted over it.

#### Unmasked Ku Klux Klan Parade Moves In Chicago Suburbs

**CHICAGO, July 11.**—More than 2,000 citizens claiming to be adherents of the Ku Klux Klan paraded through Chicago western suburbs early today on a campaign to close up scores of outlying saloons and vice resorts.  
No violence was committed, so far as the police could learn. Hundreds of women were in the parade, which moved by automobile from suburb to suburb. No mask or Klan paraphernalia was in evidence.  
The parade was intended to warn the vicious element to close up and get out, it was said.

#### RANGER CITY JUDGE ADVISES ON LIQUOR LAW

Manufacture or Possession of "Choc" Beer for Personal Use Unlawful

Residents of Eastland county and of Ranger who have been deluding themselves into thinking that manufacture or possession of "choc" beer for their own personal use and not for sale is not illegal are laboring under an expensive delusion, according to Ranger City Judge A. A. Diehl.  
Many have been requesting information from Chief of Police O. V. Davenport regarding the exact status in the eyes of the law of possession or manufacture of "choc" beer for their own personal use. Some thinking it is not illegal, have gone ahead and manufactured the beer and while many have not come within reach of the arms of the law, Chief of Police Davenport said Saturday that he would vigorously push a campaign to stop such practices, playing no favorites. Many reputable citizens of Ranger have been making beer, according to the chief, who declared that all such law violations must stop or arrests will be made.

The letter to Chief of Police Davenport from City Judge Diehl is as follows:  
"Having been requested by you for an opinion as to whether or not the manufacture of 'choc' beer or beer, is a violation of the state law, I beg to advise you as follows:  
"Veron's Texas criminal statutes, 1925, supplement Title 11, chapter 6-A, article 588½, reads as follows: That it shall be unlawful for any persons, directly or indirectly, to manufacture, sell, barter, exchange, transport, export, deliver, take orders for, solicit, or furnish spirituous, vinous or malt liquors, or medicated beverages, or any potable liquor, mixture, preparation, containing in excess of one per cent of alcohol by volume, or any equipment for making such liquors, or to possess or receive for the purpose of sale any such liquors herein prohibited.

"Article 588½-QQ prescribes the punishment and says: Any person violating any of the provisions of this act shall be deemed guilty of a felony and upon conviction thereof shall be punished by confinement in the penitentiary for any period of time not less than (1) one year or more than (5) five years.  
"Of course there are some exceptions, such as where the 'sale' is made for medical, mechanical, scientific, or sacramental purposes, and where a permit has been secured from the proper authorities, but the possession of 'choc' beer or the sale of same for purely beverage purposes, or any other mixture or preparation containing in excess of one per cent of alcohol by volume, is a clear violation of the law.

"I have examined closely the acts of the thirty-ninth legislature, which convened in Austin, January 13, 1925, and adjourned March 19, 1925, and I find no change in the law whatever, except as to the disposition of intoxicating liquor when seized by an officer.  
"I am, Sir, very truly yours,  
"A. A. Diehl, City Judge."

#### Eastland County Club Boys and Girls to Go Into Camp This Week

It is estimated that from 300 to 400 club boys and girls and others interested in the club work of the county will be present in Eastland, Thursday morning, at the opening of the fourth annual encampment of Eastland county agricultural clubs. The encampment will be held at the Brelsford pecan grove, about one mile north of town. It will continue three days.

#### AGED MAN IN DALLAS TAKES HIS OWN LIFE

**DALLAS, July 11.**—Despondent because of the infirmities of age, William Whiteline, 72, committed suicide in a shooting gallery here early tonight. A note found in a pocket gave directions for disposition of his body.

### SENTENCE SERMON.

You can talk all you please about the magic of hard work, but there really is no magic in anything except right thinking. Any man thinking slave thoughts will create slave conditions.

#### WELL AT FIRST THOUGHT DRY IS PRODUCING

Hickey-Hart-Carter's Pritchard No. 2 Gushing Oil From 3,538-Foot Sand.

Drilling the Pritchard No. 2 of the Abilene-Cisco Oil corporation and Barney Carter, located on the south-east part of the Pritchard farm, deeper into the pay sand Saturday, after running casing for the previous two days, resulted in increasing the flow of the well to about 1,000 barrels. It is also known as the Hickey-Hart-Carter well.

Original depth of the pay sand was said to be about 3,538 feet and the well is now about nine feet in the sand. The well was first drilled in several days ago when the bit struck the top of the sand unexpectedly and the well started flowing by heads. Casing was run into the hole and the well was then drilled in. Gravity of the oil is of the same degree, 41.6 degrees Baume gravity, as that found in the other producing wells in the Lake Eastland sand. The well is an offset on the south to the C. C. Barkley Pritchard No. 2, now flowing about 200 barrels a day.

Drilling activity as a result of the bringing in of the Pritchard No. 2 of the Abilene-Cisco Oil corporation and Barney Carter and Barney Carter's Langford No. 4 for producers has started other wells that had previously shut down pending developments in the wells drilling. Other wells nearby have never ceased activity and a number of them are expected to drill in some time during the first part of the week.

#### TERRELL NOTES SERIOUS ERROR OF LEGISLATURE

Highways and Schools Lose Gasoline Tax, Which Goes To General Revenue.

**AUSTIN, July 11.**—In an opinion suggesting that the state tax rate will be reduced, Comptroller Terrell called attention to what he described as a serious error of the last legislature in failing to appropriate three-fourths of the gasoline tax to the highway fund and one-fourth to the schools.

Mr. Terrell directs attention to the fact that chapter 5 of the act of the third called session of the thirty-eighth legislature imposing a one-cent per gallon tax of the last legislature, appropriates the revenue derived from such tax in the proportion of three-fourths to the state highway commission and one-fourth to the free school fund of the state, and it appears that the fund so derived was specifically appropriated for said purposes for the two years ending Aug. 31, 1925, but he is unable to find where the last legislature appropriated such tax money and the same will, therefore, under such conditions, go to the general revenue after Sept. 1, next. The state collects about \$375,000 monthly on gasoline sales and at this rate there will accrue to the general revenue fund the sum of \$9,000,000 additional during the next biennium.

#### CARPENTER IN DALLAS MADE ILL BY SUNBURN

**DALLAS, July 11.**—If you don't believe it gets hotter than the temperature indicates in Dallas, listen to this one.  
A carpenter, Paul Reavis, 43, has been working in the blazing sun for days during an unbroken heat spell, and had become so sunburned that he had to be treated at the Emergency hospital for sunburn.

A hospital physician said his ailment wasn't imaginary or slight, either, and that he was really in need of medical attention.

#### FORMER OKLAHOMA OFFICIAL HELD FOR UNPAID FINE

**MALESTER, Okla., July 11.**—Fred Dennis, former state banking commissioner of Oklahoma, who was sentenced to one year in the penitentiary and payment of a fine of \$10,000, was held by prison authorities today in default of payment of the fine.

#### ALTERATION LEADS TO DEATH OF ONE DISPUTANT

**LOCKHART, Texas, July 11.**—H. N. Moon, hotel keeper, was at liberty today under \$5,000 bond in connection with the fatal shooting of C. D. Patton here late yesterday. Moon waived examining trial.  
Patton was slain following an altercation, officers said. The cause of the altercation was not learned.

**JACKSONVILLE.**—Large quantities of tomatoes being shipped from here.

STORM IN WISCONSIN CLAIMS ONE LIFE. STURGEON, Wis., July 11.—A storm hit Sturgeon bay late this afternoon with one known casualty.

SPURGEON BELL GOES TO OHIO AT HIGHER SALARY. AUSTIN, July 11.—Spurgeon Bell has resigned as dean of the business administration school of the University of Texas, after 13 years of service in that capacity, to become head of the bureau of business research at Ohio State University, at a salary of \$7,500 per annum, compared to the \$5,000 received at Texas University.

TAHOKA.—The local telephone company has let a contract for erection of a new building to house the company's plant here.

PORT ARTHUR.—Work progressing rapidly on new \$75,000 Deuster building.

good, and she is recovering as quickly as could be expected. Mrs. J. S. McDowell, who underwent an operation Friday at the Clinical hospital, is reported as doing splendidly. Mrs. Wade Swift and son are visiting in Los Angeles and Long Beach, Calif. W. B. Palmer is expected home today after an absence of seven weeks spent in Amarillo.

TWENTIETH CENTURY CLUB.

Zinnias, periwinkles and roses, all summer garden flowers, did a battle royal with blue bells from the fields, in holding their spray in floral decorations at the meeting of the Twentieth Century club, Friday afternoon, when Mrs. John Thurman extended the hospitality of her delightful home to the members and some extra guests.

As if rivaling the work of nature, were several oil paintings, the work of a sister of Mrs. Thurman, that depicted Texas blue bonnet fields near Austin, with the capitol dome in the distance, which were advantageously displayed on the mantel. The interior was skillfully decorated to be conscious only of the comfort within.

In the midst of this comfortable setting, five games of bridge was played, and when the scores were totaled up, it was found that Mrs. W. J. Lowe had club high score, and she was awarded a lovely, and that Mrs. Roy Jameson was the successful guest player, receiving a lovely rose Normandy lace covered boudoir pillow, and Mrs. G. C. Barkley the low prize, a quaint pair of candleholders. Food at the Thurman home at any function always passes out of the ordinary to the distinctly different menu of frozen salad, stuffed fish, olives, tea, ice cream and black walnut cake and other goodies was just another confirmation of the cuisine this hostess is noted for.

Club members and guests present were: Meses. Frank Brown, Walter Burden, G. C. Barkley, Frank Chapman, D. L. Holland, E. L. McMillen, E. J. Wiss, Charles Walts, Roy Jameson, D. L. Jameson, J. T. Gul-lahorn, A. G. Jury, C. O. Terrell, L. H. Flewellen, Paul Lacy, E. E. Crawford, Frank Brahoney, Hall Walker, W. J. Lowe, W. S. Adamson.

CHRISTENING AT GORMAN. At the Methodist church in Gorman this morning will be enacted a very unusual, yet sacred service, the christening of the young son of Mr. and Mrs. M. H. Smith, formerly of Ranger, but now of Dallas. It is unusual because of the fact that in the Methodist church it is not customary in the christening of infants to have god-mothers nor god-fathers, but this case will be an exception and that honor has been bestowed on the Ranger people. Mrs. O. L. Phillips will stand as god-mother, and M. H. Hagaman as godfather at this service, while the child's grandfather, Rev. Joe Walker will officiate at the service.

The infant will be christened "Joe Walker Smith" and Mrs. Smith lives in Ranger many years and were identified with all civic, social and church work of the community. "This is the first child to bless their home and doubtless quite a few other friends of theirs will join the christening party this morning and go with them to Gorman.

NEW HEALTH NURSE ARRIVES. Miss Joyce Conley, the new health nurse, who will succeed Miss Faye Nixon, who recently resigned that position, arrived Saturday and is stopping with Mrs. George Armer. Miss Conley will work with Miss Nixon until the 10th of August, after which time she will take a short rest before beginning active work here in September.

UNIVERSITY MAY GRANT EASEMENT FOR WIVES. AUSTIN, July 11.—In an opinion by assistant R. J. Randolph, the attorney general's department holds that the university regents may grant an easement or right of way over university lands to the American Telephone and Telegraph company for lines.

CHICAGO WOMEN DECLARED ELIGIBLE FOR JURY DUTY. CHICAGO, July 11.—Women of Chicago today won a fresh victory for equality with men in the eyes of the law.

STORM IN WISCONSIN CLAIMS ONE LIFE. STURGEON, Wis., July 11.—A storm hit Sturgeon bay late this afternoon with one known casualty.

SPURGEON BELL GOES TO OHIO AT HIGHER SALARY. AUSTIN, July 11.—Spurgeon Bell has resigned as dean of the business administration school of the University of Texas, after 13 years of service in that capacity, to become head of the bureau of business research at Ohio State University, at a salary of \$7,500 per annum, compared to the \$5,000 received at Texas University.

TAHOKA.—The local telephone company has let a contract for erection of a new building to house the company's plant here.

PORT ARTHUR.—Work progressing rapidly on new \$75,000 Deuster building.

Richest Widow Is Married

DETROIT, July 11.—Mrs. Matilda B. Dodge, widow of the late John F. Dodge, wealthy automobile manufacturer, is now the bride of Alfred G. Wilson, Detroit lumberman.

The two were joined in marriage at Mrs. Dodge's home here in a ceremony surprisingly simple. Only immediate friends and relatives were present.

Immediately after the ceremony they left for New York, to sail for an extended honeymoon tour in Europe.

Wilson remarked that he would resign of his lumber business as soon as the wedding trip was over. "I'd be lost without it," he said. Mrs. Dodge had been known as the wealthiest widow in America.

there will be cars and members of the organizations sponsoring the movement, to take them to the nurse. "Health 1000 per cent" is their slogan. The interest of the whole community should center on this human round-up. Most of us would ride miles to see a cattle round-up. We'd sit all day under a blazing sun if we had the opportunity to see another one. This should be a matter of civic pride. A few blue ribbons to parents of children who test 100 per cent perfect would not be bad—we give them to owners of cattle, hogs, dogs, and cats. Make it a point to see that the clubs fostering this movement have all the local support that they need. One hundred per cent of human boys and girls, for a proper start in life.

ST. PAUL, July 11.—No relief is sighted from the hot wave that gripped the northwest today, sending the mercury over the century mark in several communities.

Two protrations were reported in Minneapolis when the mercury climbed 20 degrees to a maximum of 91. At points in the Dakotas long time records broken yesterday were again collapsed when the mercury made a new high mark today.

PRESIDENT SEES MOTORCYCLE RIDER GET BAD FALL. SWAMPSCOTT, Mass., July 11.—Motorcycles are becoming something of a jinx to the presidential party. This afternoon, while enroute back from Lynn, the president witnessed what appeared at first to have been a very serious accident, when a cyclist, whose identity was not established, skidded a few feet in front of the president's car and crashed into the ditch. The cyclist was pronounced painfully but not fatally injured.

About ten days ago Mrs. Coolidge narrowly escaped injury when a motorcycle policeman swept into the drive as she was about to pass out through the entrance of White court.

JACOB H. VANDERBILT DIES IN WASHINGTON. NEW YORK, July 11.—Cornelius Vanderbilt Jr., today informed the United Press of the death of Jacob H. Vanderbilt at Tacoma, Washington, this morning. The telegram announcing his death read: "Jacob H. Vanderbilt died of heart disease at Tacoma, Washington, this morning. He was the last of his generation of the family."

CHICAGO WOMEN DECLARED ELIGIBLE FOR JURY DUTY. CHICAGO, July 11.—Women of Chicago today won a fresh victory for equality with men in the eyes of the law.

Six Dwelling Houses In Ranger Sold to Mineral Wells Man

Consummation of a deal whereby six houses belonging to the Mid-Kansas Oil company of Ranger, located in Burger addition, east of town, were sold to W. S. Scruggs, of Mineral Wells, was announced Saturday by C. E. Maddocks & Son, insurance and real estate firm of Ranger.

The consideration was said to be about \$10,000. Mr. Scruggs, according to C. E. Maddocks, bought the houses as an investment and will rent them out. Workmen are to be put to work repairing the buildings at once, as several of them are in need of repair, Mr. Maddocks said.

Fireworks Exhibition In Ranger is Success

Between 200 and 300 persons within Nitro park and between 2,000 and 3,000 persons on the outside enjoyed the Fourth of July fireworks exhibition in Ranger, Friday night. Within the park, benches had been placed on the ground in front of the grandstand, so that it was cool and delightful for the spectators, and the view of the pyrotechnic display was fine. Without the park all around the fence and on top of Ranger heights hundreds of automobiles filled with passengers were drawn up and they enjoyed the rockets and Roman candles that went high in the air and exploded, but the real gems of the exhibition were pouring over a precipice, the American Legion emblem, the American flag, the names of the leading business houses in letters of fire, and other designs could not be seen outside the fence.

The exhibition was designed, arranged and set off under direction of James A. Eoze, electrical expert who during the war was connected with the bureau of high explosives. It did not start until absolute darkness prevailed and then it was a perfect exhibition. It lasted for more than one hour and held the spectators entranced. The Ranger band played all the evening and added much to the pleasure of the occasion.

**Dramatic Club Will Raise Money to Water Evergreen Cemetery**

A number of young matrons and young ladies of Ranger have formed what they are pleased to call the Series Dramatic club, the object of which is to stage a series of entertainments for the purpose of starting a fund with which to pipe water to Evergreen cemetery, Ranger. The entire proceeds, above expenses, are to go into this fund.

The first play contemplated is a lively three-act comedy entitled "Breezy Point." Some of those participating are: Misses Morris, Brauer, Ward, Davenport, Arnold, Bishop, Bifers, Black, Mrs. Spalding, Mrs. Jones, Mrs. Arnold, Mrs. Thompson, Mrs. Hurt. There are between 35 and 40 characters in the play, Miss Morris is to coach the program. "Daddy Long Legs" is expected to be the second of the series.

Evergreen cemetery can be made a beautiful spot, it is said, if water be provided for the trees, flowers and grass, but dependence cannot be placed on rainfall.

**Ranger C.M.T.C. Boys Will Begin Drilling Early Monday Evening**

All boys who have signed up for C. M. T. C. work and who desire to become officers their first year at camp are requested to meet Captain Wasaff of the reserve officers' corps, in front of the city hall Monday afternoon at 7 o'clock.

Captain Wasaff will put the boys through some of the regular drills that they will go through at camp, and show and tell them a number of things that will be of use at camp. It is hoped to have several Ranger boys promoted to officers their first year, and for this reason Captain Wasaff is drilling the boys, in order that they will make a good showing and have the officers' attention turned to them.

About 25 Ranger boys have signed up and others wishing to go may see C. C. Patterson at the Chamber of Commerce or Dr. Logsdon in the near future and sign up.

**RANGER WATER PLANT PAYS GOOD PROFIT**

(Continued from page one.)

leak through which much water is running to waste. It is hoped, however, that when the new pump is installed the standpipe may be kept filled. An odd thing at this time which gives rise to the suggestion there may be a leak in the big main is that the pumps are working just as hard through the night and consumers draw little water after midnight, yet little water flows into the standpipe.

Several engineers, including experts with the Oil Belt Power company and the Thurber Brick company, have volunteered to study the situation with a view to advising the city what should be done to insure an adequate water supply to Ranger at all times. They will advise what number of new pumps may be needed and perhaps suggest that auxiliary water mains be put down. The city commission has not obligated itself to act immediately on the advice it will receive, but at least it will be something for it to consider.

There is no water shortage in Ranger and the short supply in some sections of the city, notably Ranger heights and Highland park, has been inconvenient and annoying rather than disastrous, but the inability of the pumps to keep the standpipe full of water for any emergency call has worried the city commission so much that it was deemed advisable to call in the engineers and ask them for advice.

**Dam Being Raised.**

A water supply that will more than double the present capacity is to be available for Ranger before the end of this summer, according to M. H. Hagaman, owner of Lake Hagaman, from which Ranger gets its water. The dam is to be raised between four and five feet, work has been started and it is to be completed within the next two months, Mr. Hagaman said. Dirt from the rock crusher is being hauled to the dam and a crew of men will be put on the dam as soon as sufficient material has been collected. The dam is now 35 feet above the original creek bed; the additional height of the dam will give the lake so much greater width as to more than double its holding capacity, it is claimed.

**VALLIANTS DELIGHTED WITH STATE FLORISTS CONVENTION**

Mr. and Mrs. T. R. Valliant returned Friday from Brownwood, where they attended the annual convention of the Texas State Florists association. They went and returned in their car and took a tent with them so they might enjoy camping out on the way and while in Brownwood.

"The convention was a great success in every way," said Mr. Valliant, "and the entertainment of visitors by the Brownwood people was delightful. The convention devoted much of its time to routine and technical matters, the latter especially pleasing the members, many of whom attended, as I did, because of what may be learned at such a convention. Much attention was given to the matter of floral designs."

The florists elected Edgar Hall of Austin as their state president for the ensuing year and decided to hold the next convention in Galveston. The meeting was brought to a close

Thursday night with a banquet in the First Methodist church of Brownwood.

POLAR PARTY MOVES ONWARD THROUGH ICE

MacMillan Arctic Expedition Plans Flights to North Pole

ABOARD THE BOWDOIN, July 11 (Delayed in transmission, relayed by radio to United Press).—The Bowdoin and Perry, MacMillan Arctic expedition ships, were steaming northward today, pushing through the ice clogged sea and making good progress. Commander MacMillan and Engineer James went to Jack Lone to get supplies cached there the last expedition, the radio report said. Reinhertz shot the first seal of the trip and important scientific specimens are being secured all the while.

As the vessel plowed the sea the naval officers who will explore the polar region by airplane, drew plans for establishment of bases. It was decided that an intermediate base will be formed between the main base at Etah and the base on the polar side.

Supplies will be cached at the bases so the machines need not be overloaded. Spectacular dashes will be avoided, they decided. Each unit will feel its way, because the difficulties are unknown.

McDonough Wins Auto Race From De Paolo On New Speedway

WASHINGTON SPEEDWAY, LAUREL, Md., July 11.—Robert McDonough, driving a Miller Special, won the 250-mile automobile auto racing classic before a crowd of 50,000 persons, to dedicate the new speedway here, this afternoon. Driving at a terrific pace, sometimes

RANGER GOLF PLAYERS URGED TO BE ON HAND

Mineral Wells Comes Today With Strong Team For Tournament Play

Members of the Ranger Country club golf team are to communicate with Gifford Clegg early this morning and signify their intentions as to playing in the match tournament with Mineral Wells, this afternoon at 1:30 o'clock, at the Ranger Country club course.

Team Captain Clegg urges that all players be sure and get in touch with him or "Pete" Finney as soon as possible and for all to be at the course not later than 12:30 o'clock. Following the golf matches, a buffet supper will be served to members of the Mineral Wells Country club and their ladies and to members of the Ranger Country club and their ladies. All members of the club are urged to attend the golf match regardless of whether they play or not and a delightful time is promised to all by the arrangements committee.

The Mineral Wells golf team is one of the best in the Oil Belt Golf association this year, as in the past, and all players on the Ranger team are urged to turn out. Mineral Wells will send about 20 players, it is said, and the entire Ranger team is wanted at the course not later than 12:30 o'clock.

ELECTRA.—Work under way paving local streets with asphalt.

Harvard-Yale Track Athletes Score Over Oxford-Cambridge

By United Press. HARVARD STADIUM, CAMBRIDGE, Mass., July 11.—Second place athletes came in for unusual glory here this afternoon when the Harvard and Yale track combination won the seventh annual track and field meet from England's Oxford-Cambridge team. The score was 7 1/2 to 4 1/2 and the victory hung on the second place when each team tied with six first places.

Captain D. G. Lowe, of the English team, and the Olympic six hundred meter champion, was the individual star of the meet.

CARPENTERS' UNION SENDS GIFT TO TIMES' STAFF

Members of the Carpenters' union met last night in the Odd Fellows' hall, the business meeting being followed by a social session during which refreshments were served. Notice of the Times' staff across the street busily at work getting out the Sunday morning paper, they sent over to them a liberal supply of delicious ice cream, enough for all to enjoy a large portion. The Carpenters' union certainly found the way to the hearts of the Times' staff.

PORT ARTHUR.—Plans under way for improvements at Central hotel to cost \$40,000.

Great bargains on all Art Goods, Saturday and Monday only. Annie Laurie Art Shop, Eastland.—Adv.

EASTLAND LIONS WIN GAME FROM DUBLIN LIONS

The Dublin Lions lost the baseball game played in Eastland Friday afternoon, with the Eastland Lions' team by a score of 17 to 4. The game was rather close until about the fifth or sixth inning, when the locals staged a drive and brought in six or seven runs.

Following the game the Eastland club gave the visiting Lions a dinner at the American Legion club, which was well attended.

B. F. BENNETT SPENDS DAY VISITING RANGER FRIENDS

B. F. Bennett, former secretary of the Ranger Chamber of Commerce and now field secretary of the West Texas Chamber of Commerce, was in Ranger yesterday visiting members of the West Texas organization. He will leave this morning for Plainview, where he is now making his home.

Mr. Bennett said that Ranger was one of the liveliest and most prosperous looking cities he had seen in West Texas. He commented on the new building now under way and the many other improvements in the city which indicate stability and growth.

GRADUATE WORK BEING DONE AT UNIVERSITY

AUSTIN, July 11.—Many teachers and students are taking graduate work in the University of Texas, 381 being enrolled this term, according to H. W. Harper, dean of the graduate school.

According to Dr. Harper, a large number of teachers are taking special courses leading towards degrees during the summer because they are unable to attend during other terms.

He said that the facilities for taking care of the graduate department will soon have to be increased to take care of the constantly growing number of students.

The favored subjects are English, history, education, economics, sociology, government and business administration.

### NATIVES OF MISSISSIPPI FORM SOCIETY

J. D. Brummel of Carbon, President; Miss Lillian Woods Secretary; Picnic Planned

J. D. Brummel of near Carbon, was elected president and Miss Lillian Woods of Eastland elected secretary, of an organization of ex-Mississippians organized at Cisco Saturday afternoon. The meeting was held at 2 o'clock in the city hall and was presided over by Dr. Joseph W. Gregory of Cisco. All native Mississippians and their children are entitled to membership in the association.

It was decided at the Cisco meeting that a free-for-all picnic would be held at Lake Cisco, on July 29, and a committee, composed of J. E. Spencer, chairman; Rev. I. Lamb, Mrs. R. Q. Lee, Dr. J. W. Gregory, D. J. Moss and Frank E. Harrell, was appointed to arrange a program and make the necessary arrangements for the picnic.

### Preparations for Gorman Fair Fast Getting Under Way

**Special Correspondence.**  
GORMAN, July 11.—President Gorman of the Gorman Fair association has announced the following appointments as heads of the various departments of the fair to be held here this fall: Livestock, Dick Gray; field crops, L. C. Underwood; poultry, H. L. Capers; art, Mrs. E. V. Huffstader; cooking, Mrs. M. Graham; sewing, Mrs. E. E. Haile; flowers, Mrs. Frank Kirk; canning, Mrs. J. E. Foster; entertainments, Lester Hooker.

The heads of these departments will meet again next Wednesday at which time a place for holding the fair will be arranged for. The grounds at Bass lake have been tendered the committee as a place for holding the fair.

### LAWYERS TAKE TESTIMONY BEFORE JUDGE FIRMIN

Judge John W. Brady and W. D. Hart of Austin, and W. M. Harris of Dallas were in Ranger, Saturday, taking testimony before Judge A. E. Firmin in an important federal court case pending in Austin. E. L. Diggs, bond broker, of New York, was in the party.

The lawyers of the group were old-time friends, and it was the first time they had all been together for several years.

## EASTLAND WILL CELEBRATE 50TH ANNIVERSARY

### Homecoming Reunion and Display of County's Products Scheduled For Oct. 1-3

Plans for the county-wide fair and celebration of the fiftieth anniversary of the founding of the city of Eastland, which is to be held Oct. 1, 2 and 3, are well under way and the event has already gained considerable publicity throughout the county and the state as well. Secretary Briggs of the Eastland Chamber of Commerce is in receipt of a letter from the Dallas Chamber of Commerce stating that a news item regarding the fair and homecoming had appeared in the Dallas News and that the Dallas Chamber of Commerce would gladly co-operate with the Eastland Chamber of Commerce in securing the attendance at the fair of former Eastland county citizens now living in Dallas.

**County Co-operating.**  
Secretary Briggs stated Saturday morning that the plans had progressed far enough to insure a good program and a world of good, wholesome entertainment. He said that the citizens of the county were showing a splendid spirit of co-operation which would greatly assist in making the event a success.

A meeting of the board of directors of the Eastland Chamber of Commerce will be held some time this week at which time a number of the committees for the fair and celebration will be appointed. The matter of arranging the catalogue for the fair will also be taken up at the meeting this week, it is stated.

**Plans for Home-Coming.**  
Arrangements for the homecoming will be left largely to a committee of old settlers, Mr. Briggs stated, and the program will be especially arranged for the entertainment of the "old-timers." In fact this feature of the fair will be a revival of the old Eastland county reunion that was held annually in Eastland for 30 or 40 years and which was suspended during the oil boom in this section.

Material for the Eastland county exhibit at the Dallas fair this fall is now being collected and arranged by Mr. Briggs of the Eastland Chamber of Commerce. This exhibit will likely be shown at the Eastland fair, but it will not be placed in competition with other Eastland county exhibits, Mr. Briggs said.

People of Eastland county, who

have friends or relatives who formerly lived in Eastland county, are asked to write them, extending an invitation to them to pay their old home a visit during home-coming week.

### KATY IMPROVING ROADBED BETWEEN MANGUM AND CISCO

In accordance with its plan of general improvements on the Texas Central branch, which includes the laying of heavier steel on much of the line from Waco to Rotan, the M., K. & T. railroad has a crew of men with a steam ditcher at work widening the cut and making a fill between Mangum and Cisco and near the Grapevine school.

### COLORED BAPTISTS INVITE WHITE FRIENDS TO SERVICE

St. Paul's Baptist church (colored) is to observe today as "rally day," and the members have invited their white friends to "come over and help us."  
The Rev. A. L. Leake, pastor of the Ranger Central Baptist church (white), has agreed to preach in St. Paul's church at 2:30 o'clock this afternoon and will ask members of his church to attend and give what help they can. In the event the Rev. Mr. Leake finds that he will be unable to attend and preach, Dr. A. K. Wier, a layman in the church, has promised to take his place.

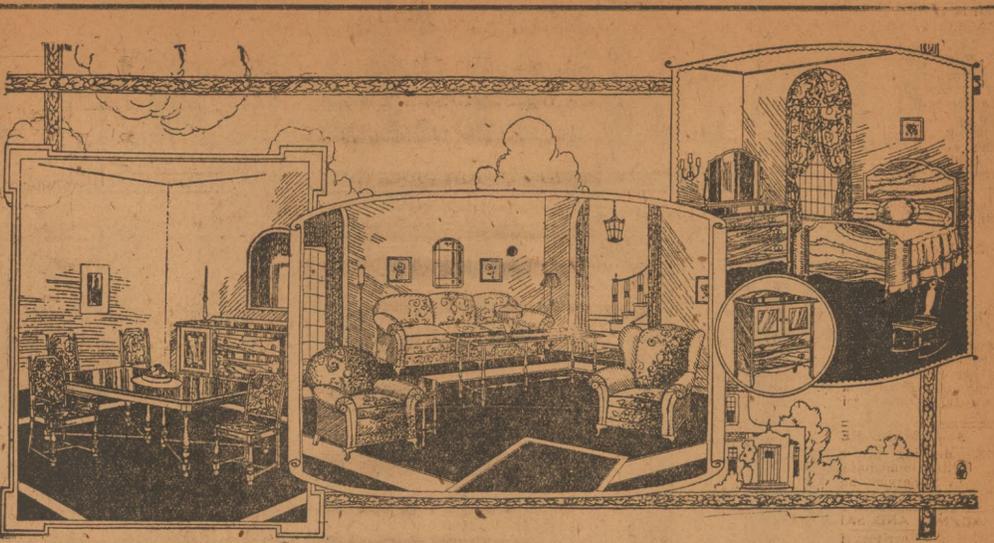

St. Paul's church has arranged to have the 30 jubilee singers present to sing for their white friends. Special seats will be provided for the white folks attending.  
St. Paul's church is one-half block north of the First Baptist church (white) and its pastor is Rev. A. G. Menogap.

### DALLAS LEADING STATE IN AUTOMOBILE FATALITIES

**By United Press.**  
DALLAS, July 11.—Dallas led other large cities of Texas in the number of automobile fatalities since Jan. 1, 1925, according to a report of the United States department of commerce. Twenty-seven deaths here as the direct result of automobile accidents are shown. San Antonio was second with 15, and Houston third with 12. Fort Worth had only seven.

### DENVER RAILROAD MAY MOVE ITS OFFICE TO DALLAS

DALLAS, July 11.—Tentative plans call for the removal of the Denver, Rio Grande and Western railway from Fort Worth to Dallas. C. N. Gray, general agent of the road, indicated here today.  
The Fort Worth office is the only one maintained by the road in the state. The recent extension of the Denver line from Fort Worth to Dallas is believed to be the reason for the change.

# CHICAGO GENEALOGIST HUNTS HEIRS TO FORTUNES AGGREGATING TEN MILLION DOLLARS A YEAR

By ROY J. GIBBONS (NEA Service Writer)

CHICAGO.—Unclaimed estates of mystery men and women—persons who die without revealing enough of their past to indicate their heirs—total something like \$10,000,000 every year in this country.

W. C. Cox, probate genealogist here, who has built up a successful business in finding the legal heirs of the mysterious ones, is responsible for the estimate. He solves hundreds of such cases annually.

The \$10,000,000 in unclaimed fortunes consists of money, land and property that lawyers are unable to turn over to known relatives. The amount does not include contested wills, disputed inheritances and the like.

Illustrative of the mystery folk is the case of "Old Jim" Michael, which Cox has in his files.

**Came Here Alone**  
"Michael, so we found," says Cox, "immigrated alone to the United States from the Isle of Man. In his youth he roamed through Rhode Island, Illinois, North Carolina and Maryland."

"Finally he settled down and

amassed a fortune of about \$75,000. One night, at the age of 103, he was murdered.

"Neighbors, friends and public officials knew nothing of his past. He seemed to have cut off all communication with his family.

"The Isle of Man is now being combed for possible relatives. "But unless some are found, the Michael fortune, now swelled by added interest, will revert to the state in which Michael died, since this is the procedure in such cases."

According to Cox, the estates of women comprise much of the mystery in his files.

**Minnie Price's Case**  
His records are full of them. Some are solved and some are beyond solution.

Moral missteps, unfortunate marriages and similar factors are the principal causes for women to refuse to reveal their past, Cox has found. They hold to this stubbornness even on their deathbeds.

"One of our most unusual cases," Cox says, "was that of a Minnie Price, who lived a recluse. She died in delirium, telling a priest that she was born in Powhattan, Ark., in 1870,

and that she had two half-sisters named Rose and Margie Skaggs.

"We turned up these Skaggs women after a long search, but they claimed they had never heard of Minnie Price. There the trail ended."

But the case which Cox regards as the most complicated one he ever worked on concerned the estate of a woman named Lanon who died in Los Angeles.

She left a fortune of \$100,000 and from the faintest of clues a nephew was found after months of search in Louisville, Ky.

Through this nephew, Cox traced a sister of the dead woman to New Rochelle, N. Y. In New York he also found two other nephews.

Just as the court was about to turn the \$100,000 over to these heirs Cox received a wire from California saying "Son claims Lanon estate. Petition filed today."

It was a thunderbolt from out of the blue.

**Examined Paper.**  
The alleged son had what seemed almost indisputable proof to support his contention, including letters signed in the name of the dead woman.

Cox took one of the letters and finally found the firm that manufactured the paper on which it was written.

He substantiated that the paper had been made years after the date on which the letter was supposed to have been written.

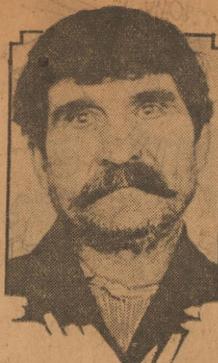

Searching for the kin of mystery men and women who turn up in the port of the missing at death, has been a hobby and business with Cox for 20 years.

Some of the heirs never knew they had such a relative as the one who had died and made them wealthy.

"The fake heir is the bane of this work," Cox says. Thousands of such spurious heirs write him annually claiming interest in some estate he is working on.

**INSTRUMENTS RECORDED**  
Warranty deed, L. C. G. Buchanan to J. U. Williams, lot 3 and E 1-2 of lot 2, in block 8, Joe Young addition to town of Ranger \$1500.

Warranty deed, C. B. Sanderson to W. H. Guy, all of lot 2, in block 21, town of Carbon, \$1000.  
Warranty deed, Mike Arlla et ux., to Ervin Lieb, SE 1-4 of section 94, block 3, H. & T. C. Ry. Co. survey, Eastland county, \$100.

## Never Talks

Fuller Shellenberger, life prisoner at the Nebraska state penitentiary, hasn't spoken one word for 10 years. This is because he "talked himself into prison," confessing a murder when he thought he was dying, only to recover and be convicted and sent to prison. He answers all questions by shaking or nodding his head.

**VARIETY IS THE SPICE OF SLOGANS.**

Trade-marking in town has become so common a habit that the question of competition seems to be entering into the practice. Some towns and cities whose virtues have been compressed into a slogan discover that others have adopted the same formula. The wayfarer, hypothetically speaking, who might be exhorted to "anchor in Akron" might be invited also to "anchor in Ashtabula."

The secretary of the Huntington, W. Va., Chamber of Commerce, taking cognizance of the confusion that has resulted, has suggested the establishment of a "slogan exchange" which would perform the same function as a registry division for trademarks. Consequently the organization bureau of the Chamber of Commerce of the United States has agreed to act in that capacity and will inform cities, upon application, whether the slogan they have coined has already been thought of by another city.

**Proper Nutrition and Right Exercise Give Vigorous Health in Middle Life**

What is going to be the fate of the athletic American girl when she tops 30 and enters the category of matrons? Acknowledged the physical superior of the young women of previous generations, will 40 see her fair but fat, going the slow way of her predecessors, or will she preserve the new health and beauty level, vanquishing the evils of age as she meets them?

**Avoid Over-Nutrition.**  
 She can keep her looks and her vigor if she will but continue her rational physical activities, according to Frederick L. Hoffman, LL.D., consulting statistician of the Prudential Insurance company, who bases his assertions on data procured from 4,000 adult men and women. Statistics show that many of the chronic degenerative diseases of middle life can be traced to over-nutrition, resulting from improper diet and lack of proper exercise.

"These conclusions rest upon some 4,000 measurements of adult men and women, of different natures and races," said Dr. Hoffman. "They prove conclusively that present day American women under 30 are unquestionably better developed than the young women of any previous generation, but they show also that the woman past that age indicate an increase in weight and blood pressure suggestive of organic impairments. Once such impairments become fixed they are most difficult to remedy. The three common ones are diseases of the heart, kidney troubles and intestinal stasis. All three of these may be directly correlated to over-nutrition and lack of proper exercise.

"It will be a great pity and an incalculable loss to the nation if our fine, vigorous young women do not preserve through middle life the splendid vigorous health they have built up. To do it they must watch not only their weight but their measurements. Very few persons know anything whatever about their development except in regard to height and weight. Many other bodily proportions and their changes in point of time are of the utmost significance.

**Chest and Muscle.**  
 "Chest expansion is indicative of a person's vitality. Any reduction is likely to mean a diminution of vigor. Muscular strength shows itself in the expansion of the upper arm. When that falls short of its usual measurement it indicates that the muscular tissue generally is getting flabby. Other measurements have their own significance. Our adult women should watch them carefully under the guidance of a physician if they are to keep in first class condition and attain a length of life and strength beyond the normal.

Despite many discouraging circumstances encountered by farmers during recent months, the crop situation in middle west, southwest, and other sections tapped by the Santa Fe railroad, may be regarded as favorable, says J. F. Jarrell, manager of agricultural development department of the railroad.

### Scenes From Santa Barbara

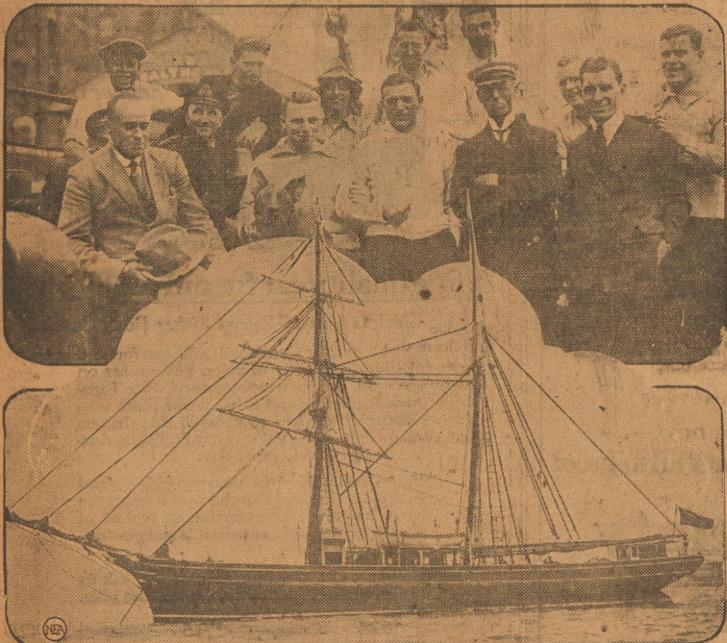

Sailors from an American man of war landed in Santa Barbara immediately after the quakes and set up a portable radio receiving and sending outfit in State street, the main thoroughfare. Details of the tragedy and appeals for relief were sent out through this station.

William Gibbs McAdoo, former secretary of the treasury, arrived at Santa Barbara before the earthquakes had ceased and took a hand in relief work. Here he is shown on the job with a group of boy scouts.

### Another North Pole Expedition

Gretir Algarsson, the well-known explorer, will attempt to break the "farthest north" record with a ship. He expects to reach this point and return to Liverpool within six months. Upper photo shows Algarsson seated with his mascot police dog among his crew, all of whom are volunteers for this expedition. Lower photo shows Algarsson's boat, "The Island."

### BRECKENRIDGE-FORT WORTH MOTOR BUS TO BE PUT ON

BRECKENRIDGE, July 11.—A sixteen-passenger motor bus, with the name "Miss Breckenridge" in gold letters on the side, will soon be in-

stalled by the Lone Star stage line to run between this city and Fort Worth. It is equipped with heating arrangements, ventilations in the top and electric lights on the inside. The bus was built by the Fremont Metal Body Works of Fremont, Ohio, and

is mounted on a Lincoln chassis. It was driven through from Fremont, arriving here via Fort Worth Wednesday. CISCO.—Five cars cattle shipped recently to Fort Worth markets.

### Coal Miners Threaten Strike

At a meeting of the United Mine Workers of America, held in Scranton, Pa., John L. Lewis, president of the union, announced that unless the railroads and mine owners break their combination against the mine workers the miners will be forced to strike. Left to right: Chas J. Golden, John Yorishin, Andrew Matthey, Oral Garrison, John L. Lewis, president of the international union, Thomas Kennedy, John Butler and Enoch Williams.

### Germans Making Surprising New Discoveries in Chemical Products

(By GUENTHER TONN) United Press Staff Correspondent. BERLIN, July 11.—That the American Dyestuff industry has ousted its German competitors from the markets, is asserted by the German Association of German manufacturers. Even in Germany itself American firms are, according to

the same source, offering aniline colors far below those fixed by the association. The German chemical industry is at present only working to 65 per cent of its capacity. It is, however, slowly recovering from a period of stagnation and while the home market is still unable to absorb its pre-

war quota of the output, exports are in spite of tariff legislation abroad slowly increasing. Dutch Buy Much. Germany's main customers are the Netherlands, where the mushroom chemical war industry is dying a lingering death, Mexico and India. Russia too is a fair customer and, moreover, a large potential market. Recent negotiations between the chemical industry and the Soviets with a view to financing larger exports are nearing completion and are expected to give a substantial fillip to the output. Great hopes, are, furthermore,

placed in the diligent research work of the laboratories. Announcements of important discoveries are expected. The nitrate industry, especially, is said to have in store a number of surprises with which it hopes to down all competitors abroad. Synthetic Alcohol. Another chemical product expected to bring in a golden harvest in the near future is synthetic methyl alcohol. This, it is anticipated, will soon conquer the whole world. The American efforts to invoke the protective tariff against this new discovery are not taken very seriously. It is pointed out that the price differences between this alcohol and the product manufactured by the old methods prevailing in the United States are so great that American manufacturers cannot possibly hope for effective protection, but must come to an understanding with the German producers.

### PARDONED MAN MUST STAY IN JAIL UNTIL COSTS ARE PAID

DALLAS, July 11.—Though he has been pardoned by Governor Miram A. Ferguson, C. R. Crawford of Fort Worth, sentenced to ninety days in jail for driving while intoxicated, cannot be released because he cannot pay court costs amounting to \$210, Gib Calloway, his attorney, said today. Under the law they must be accounted for by one day in jail for each half dollar in costs. At the rate 420 days more jail service await him. Calloway said, however, that he would make a motion that the costs be re-taxed, as \$114 of the costs were for character witnesses and that the law does not authorize charges for more than two character witnesses.

Assignment, J. P. Gabler et al., to C. W. Hoffman et al., all of W 1-2 of NW 1-4 of section 25, block 2, H. & T. C. Ry. Co. survey, and all of W 1-2 of SW 1-4 of section 25, block 2, H. & T. C. Ry. Co. survey, except 10 acres off south end of said lands, containing 150 acres, \$1.

OUT OUR WAY

BY WILLIAMS

THE SHATTERED IDOL

J. R. WILLIAMS 7-11 © 1925 BY NEA SERVICE, INC.

Stewart's Washington Letter

BY CHARLES P. STEWART NEA Service Writer

WASHINGTON — British attempts to create a world impression that China is in revolt against foreigners in general, rather than against two particular nationalities, are fretting some of the Far Eastern experts in the State Department considerably.

Their information is that Chinese hostility is directed almost solely against the British and Japanese, that leaders of the movement have gone out of their way to express friendship for Americans and that they have been surprisingly successful in creating a similar feeling among the ignorant mass of their countrymen, who can't tell white men apart unless they're told.

It naturally isn't Britain or Japan's interest to have it appear that they especially are the objects of Chinese hatred.

It not only raises a question as to the reason for such an attitude toward them, and them alone, but might prevent them from securing other nationalities' American support, if they should decide to adopt strong repressive measures on a large scale.

JAPAN, her contacts with the western world relatively limited, can't "doctor" Oriental news very effectively, but England, largely in control of its sources, is succeeding extremely well at it.

That there's trouble the British freely admit—even emphasize—but no more for them than for anybody else, according to the dispatches they let get through—patches which, in the absence of much other information, are quite generally passed along and reprinted here, which is just what the British want.

THE worried officials, themselves pretty accurately posted, don't like seeing the public misled.

Mistaken publics sometimes make it hard for governments to stick to the policies they think best.

JUST now it serves Britain's purpose to present to the Occident a picture of a Bolshevik-crazy China, in arms against all civilization.

Sometimes it's to her interest to

present an ugly picture of the Occident—all but herself—to the Chinese.

For instance, when some rough-neck citizen of any other country than her own kicks a native coolie off a gangplank and he's drowned—quite a common occurrence—the British-controlled press all up and down the China coast emphasizes his nationality and his brutality for all it's worth.

But if an Englishman does the same thing, he's a "foreigner"—that's all.

ALL over the world local native British newspapers and reviews, and British influence, carry on this work.

In South America it never ceases. There's no out-and-out clumsy misrepresentation, that you can put your finger on, and say, "This isn't so."

Just a dab of color, here and there—nothing the thing has the required pro-British and anti-everything else look.

American trade doesn't seem to realize this. If it did, perhaps it would try some of it for itself.

HINTS are current that Secretary of State Kellogg is beginning to suspect he's fired more or less at half cock in the matter of that warning to President Calles.

The rest of Latin America certainly reacted very unfavorably—not to mention Mexico—and maybe the secretary has been hearing from there through North American diplomatic channels.

It's reported that American interests in Mexico have found fault, too.

THE truth seems to be—judging from little State Department leaks—that Ambassador Sheffield, who isn't a Spanish scholar and hadn't been south of the Rio Grande long enough to have seen much for himself, took as the foundation for the story he told Kellogg certain American grievances which do exist and slapped a far weightier superstructure on it than the underpinning justified.

Kellogg took his word for it and there you are.

Sheffield is going back to Mexico but it wouldn't surprise anybody in Washington if he didn't stay long.

FIRE COST \$1,044 A MINUTE

America's bill for fire waste last year, 1924, was \$1,044 a minute, an annual loss of \$548,000,000, exceeding all previous high records. These are the figures of the Actuarial Bureau of the National Board of Fire Underwriters quoted in a bulletin issued by the insurance department of the Chamber of Commerce of the United States and the national fire waste council.

The total amount of property destroyed during the year was equivalent to more than half the annual interest on the national debt.

Much of this enormous loss is preventable waste. "Although the fire losses of the United States continue to mount," says the bulletin, "it is not necessarily an indication that they cannot be reduced. The experience of the 1924 Inter-Chamber Fire Waste Contest shows that losses in the reporting cities were reduced to the extent of \$4,000,000 over their

average for the preceding five years coincident with the activities undertaken by local fire prevention committees. The per capita loss in these communities was \$3.10, as compared with the national average of approximately \$5.00.

What has been done in some cities might well be duplicated in others through energetic fire prevention programs carried on under the auspices of local chamber of commerce and similar organizations. Although fire waste is a national program, it can only be solved through the combined endeavor of all communities."

What is claimed to be the largest electric exhaust fan in the world is now being put in place at one of the Rand gold mines of South Africa. When in operation this fan will draw 9,000 cubic feet of air per minute from a shaft 3,500 feet deep and will be used to expel the foul air from the entire mine.

MOM'N POP

BY TAYLOR

OH CHIEF! HERE'S A TESTIMONIAL THAT JUST CAME IN - IT'S A BIRD!!

Dear Mr. Gwyn - For years I have been in the habit of snoring nights and it disturbs my wife very much.

YE GAUWS! LAY ON YOUR SIDE - YOU'RE SNORING AGAIN

I've tried every way to stop but with no result. A friend suggested that since Vocal Mids beautifies the voice perhaps it would beautify my snoring - I tried it.

I'LL TRY A JAR - IT CAN'T MAKE ME SNORE ANY WORSE

Now my wife refuses to go to sleep until the wee hours of the morning because I snore so beautifully. She says it surpasses the best music and has sold our piano phonograph + radio.

HOW WONDERFUL! HE'S SNORING A GRAND OPERA SELECTION NOW

Defective Vision of School Children Found to Be in Need of Correction

INDIANAPOLIS, July 1.—One child out of every 11 in the public schools of American cities and one child out of every seven in the schools of rural districts in the United States have such seriously defective vision as to be handicapped in their school work.

The situation, though serious, is not nearly so bad as the public has been led to believe.

Conservation of the eyesight of school children is fundamentally a duty of the school system.

As a first step toward the fulfillment of this duty, a uniform law for the examination of the eyes of school children should be adopted by all cities and states.

These are some of the findings and recommendations contained in an exhaustive report entitled "Conserving the Sight of School Children" presented Wednesday before the National Education association by the joint committee on health problems in education of that organization and the American Medical association.

A Year's Study

The report is the result of a study which has been under way for more than a year by these two organizations. This study was conducted and the report was prepared under the direction of Dr. Thomas D. Wood of Columbia University, New York, chairman of the joint committee.

The study extended into 375 cities and rural districts, including every state in the Union; it was participated in by the school authorities and health officials of all these communities and by nearly 100 of the most eminent ophthalmologists of the United States. The report, which covers 50 printed pages, will be brought to the attention of every city, state and county superintendent of schools.

The joint committee of the National Education association and the American Medical association found that during the year of this study approximately 5,000,000 school children in the United States received

eye examinations and that an average of about 12 percent of these children were found to have defective vision. This figure, says the report, suggests that considerable progress in eyesight conservation has been made in schools since previous studies and this progress has resulted in decreased percentage of eye defects.

In Rural Districts

The investigators found that rural districts generally report a larger percent of defective vision than city districts. In Pennsylvania, for instance, rural districts show 16.8 percent of defective vision among 500,000 pupils examined, while the cities of that state show only 8.5 percent

among 370,000 pupils examined; rural districts in Iowa report 14.4 percent defective vision and city districts in the same state 6.3 percent defective vision. The explanation of this difference can not positively be made, says the report, but it seems likely that it is due to such differing factors as conditions under which the tests were obtained, bad illumination in rural schools and homes, and the small number of corrections of visual defects provided for rural children.

"In spite of progress in certain school districts, the problem facing school administrators today," declares this report, "is to find effective means of removing the handicap of defective vision of one-eighth of the 24,000,000 school children. This is important not only to secure greater efficiency in acquiring an education, but to conserve vision for greater helpfulness in adult life and in old age."

IT'S WORTH IT ALL!

The assuring and protecting powers of an Insurance Policy is worth many times the amount of premium paid, because the assured shifts the responsibility of an expected loss to the Insurance Company—thereby eliminating all fear and worry—leaving this time to be devoted to his pleasure and business pursuits—You can't afford to longer delay.

Musical Selections to be Used This Year in State Music Memory Contest

AUSTIN, July 1.—The contest list of music memory selections to be used in the state-wide interscholastic league music memory contest during the ensuing school year has been announced by Roy Bedichek, chief of the interscholastic league bureau.

These 50 selections are made the basis of the league contest in all the county meets in the state, from which 100 per cent papers are submitted in the state-wide contest, according to Mr. Bedichek.

This year's list, which contains 30 new selections, follows: Small Song (Penobscot Indian tribal song); "Rounded Up in Glory" (American cowboy song); "Believe Me If All Those Endearing Young Charms" (Irish folk song); "La Golondrina" (Mexican popular song); "Santa Lucia" (Italian folk song); Erl King, Schubert; Serenade, Schubert; The Two Grenadiers, Schumann; On Wings of Song, Mendelssohn; Songs My Mother Taught Me, Dvorak.

Unfold Ye Portals from the Redemption, Gounod; If With All Your Hearts from Elijah, Mendelssohn; Cujus Animam from Stabat Mater, Rossini.

Habanera from Carmen, Bizet; Bell Song from Lakme, Delibes; Spinning Song from the Flying Dutchman, Wagner; Evening Star from Tannhauser, Wagner; Oh, Promise Me from Robin Hood, De Koven; Barcarolle from the Tales of Hoffman, Offenbach; Prize Song from the Meistersinger, Wagner; Home to our Mountains from Il Trovatore, Verdi.

Merry Wives of Windsor Overture, Nicolai; Poet and Peasant Overture, von Suppe.

First Movement from the Fifth Symphony, Beethoven; Second Movement from the Fifth Symphony, Beethoven.

Waltz of the Flowers from the Nutcracker Suite, Tchaikowsky; Arabian Dance from the Nutcracker Suite, Tchaikowsky.

Final from the String Quartet in G Major, Mozart.

Gavotte from Mignon, Thomas; Minuet, Goceherini; Hungarian Dance No. 6; Brahms; Valse Triste, Sibelius; Triumphant March from Aida, Verdi; Polonaise Militaire, Chopin; Rakoczy March, Berlioz.

Intermezzo from the Jewels of the Madonna, Wolf-Ferrari; Nocturne in E Flat, Chopin; Prelude to the Third Act of Lohengrin, Wagner; Salut d'Amour, Elgar; Funeral March of a Marionette, Gounod; Etude in G Flat Major, Chopin. (Opus 25, No. 9); In a Three-Horse Sleigh, Tchaikowsky; Waltzing Doll, Poldini; Moment Musical, Schubert; Finlandia-Sibelius; Ave Maria, Bach-Gounod; Silent Night, Gruber; Ride of

GREATEST YEAR FOR BUILDING IN THE SOUTH

Twenty-Five Cities in Sixteen States Amass Total of \$260,883,179.

ATLANTA, Ga.—The greatest building year that the cities of the South have ever known is forecast in the preliminary totals for the first half of the year issued today by the survey department of G. L. Miller and company, southern real estate mortgage bond house, of this city.

The twenty-five leading cities of the sixteen southern states, omitting Baltimore, which usually included in the list, amassed a total of \$260,883,179 for the first half of the year, which exceeds the same period for 1924 by almost eighty-five million, or 46.9 per cent. These same cities during the month of June, reached a new high figure of \$54,348,769, an increase of 101.8 per cent over June, 1924.

If the remaining cities of the section maintain the same proportionate gains as the leaders, the total for the half year for the states at large will be over \$350,000,000, which indicates that the larger cities of the South will approach the three-quarter billion mark before the end of the year.

The gains are spotted all over the entire section. The leading cities of Missouri vie with the amazing centers of Florida in piling up leads over last year, while Nashville, Louisville, Tulsa and Birmingham all have had unusual construction records for the year.

During June, the Florida cities made their greatest strides. Miami was well on towards seven millions, Palm Beach almost reached four millions while West Palm Beach, across the lake, was over two millions. St. Petersburg, Tampa, and Lakeland exceeded a million, while Jacksonville was not far away. The most interesting feature of these totals is that they are not accounted for by a few very large buildings, with the single exception of Palm Beach, but are made up of a large number of varied structures, in which residences and business houses are very numerous.

Only five cities out of the twenty-four leaders showed losses for the first half year, and these were relatively small, due in large measure to unusually high totals which had been reached during 1924.

### SUB-SEA RADIO BROADCASTING TESTS COMING

Experiments Will Be Made From Bottom of Ocean Off Atlantic City.

PHILADELPHIA.—Radio station WIP, the powerful broadcaster in the Gimbel Brothers store, this city, have announced that they will conduct more sub-sea broadcasting tests from the bed of the Atlantic ocean. On July 31, 1924, Station WIP successfully broadcasted from the bottom of the sea—the first time such a thing was ever done. C. A. Jackson, deep sea diver, descended into the Atlantic ocean off Atlantic City, N. J., with a microphone fastened inside his diver's helmet, and while walking about the bed of the ocean, vividly described the sights there.

**Apparatus to Be Used.**  
On the morning of July 11, 1925, the diver tender "Hester" of the Philadelphia Salvage corporation, will anchor in the Atlantic ocean off

of the Steel Pier at Atlantic City, N. J., in about seventy-five feet of water.

Station WIP maintains a remote control station on the Steel Pier, connected by private long distance telephone wires to the main station in the Gimbel Brothers store, Philadelphia. Special cables will be run from the microphone controls on the Steel Pier out into the ocean, and secured on the "Hester."

Then at 3:15 p. m., C. A. Jackson, the diver, who made radio history last year, will descend into the Atlantic ocean with a microphone in his helmet. He will take with him a specially constructed sub-sea searchlight built for the occasion by the Westinghouse Electric company's lamp division. This will project a powerful beam of light through the water and enable the diver to see much farther than he ordinarily could. Jackson will intimately discuss the scenes of the ocean's bed.

Fifteen minutes later, Dr. M. Francois D'Eliscu, physical director of Station WIP, whose daily setting-up exercises broadcast at 7 a. m. are eagerly listened to by thousands throughout the country, will descend into the ocean in a diver's outfit to broadcast his setting-up exercises while standing on the ocean bed. This will be the first time that phy-

sical culture lessons have been given while the instructor was seventy-five feet below the surface of the water. Dr. D'Eliscu, a graduate physician, will study carefully the effects of the water pressure on his muscular control.

**Invitation to Neptune.**  
At 8:45 p. m., Jackson will again descend, taking the Westinghouse specially built lamp with him, and he will read, while under the water, an invitation from Mayor Bader of Atlantic City, to King Neptune to be present at Atlantic City's annual beauty pageant next September. The invitation will be written on waterproof material, indelible ink, and Jackson will be enabled to read it by the aid of the searchlight carried with him.

The Westinghouse engineers will build an unusually powerful sub-sea light. Heretofore these lights have been used to locate submerged bodies, and have not been of the super-power class. But it is expected that the lights being built for the diver's broadcast will project a beam strong enough to be detected on the surface of the water at night.

**Stations to Broadcast.**  
Station WGBS of the Gimbel Brothers store in New York city, station WMAF, South Dartmouth, Mass., and station WPG, the municipal radio

station of Atlantic City, will be tied to station WIP for simultaneous broadcasting of this history-making event. The microphones in the helmets of the sub-sea divers will be connected by waterproof cable to the remote control station of WIP located on the Steel Pier.

Special apparatus will amplify the voices before they are transmitted over the sixty mile stretch of land wires connecting the remote control on the Steel Pier to the main station of WIP in the Gimbel Brothers store in Philadelphia.

### Nervousness Easiest Alibi, Says Doctor

By United Press.  
NEWARK, N. J., July 11.—Nervousness is used as an alibi to cover a multitude of disagreeable traits, according to a diagnosis of the great American malady made by a physician studying the effects of habit upon health. While real nervousness is the result of disease, he finds that the majority of people given to talking about their "nerves" are merely ill-tempered and self-centered, and take small pains to cultivate control or any degree of patience. "Too many people have fallen into

the bad habit of fairly exploiting their 'nerves,' and secretly must consider all the consequent disagreeable expressions, displaying lamentable lack of poise, as marks of distinction. Else why would they continually talk about being 'so nervous'? In fact so persistently do they refer to this unpleasant condition they seem almost to brag about it.

"The only person justified in having a nervous breakdown is the one who has undergone a severe strain, mental or physical, over a prolonged period," he continued. "His reserve strength has been exhausted. His nerve cells have broken down. His nerve control is lost as a result. Even his mentality may suffer a setback."

"But the average person falls back on 'nerves' as an excuse for every known mean or foolish act they perform. Men are as guilty as women; perhaps more so. Everything that is contrary to the nervous person's self-approved convictions 'gets on his nerves,' and excuses him for displays of bad manners or selfishness. Few have any shame because of this lack of self-control."

"Of course when a person is over-fatigued his self-control is lessened. The natural reactions to his primitive instincts are quickened. Inhibitions break down."

At Munday, Texas, there is a cotton seed oil mill which is entirely operated by electricity. The cotton seeds are first "cooked" electrically and then pass to electrically operated presses where the oil is extracted. Heretofore this mill was run by steam power and steam was used for "cooking" the cotton seeds preparatory to extracting the oil. It is expected that electrical operation will materially reduce the cost of running the mill.

## National Ford Truck Week to Be Observed by the Leveille-Maher Motor Co. With Showing of Ford-built Bodies

The coming week has been designated as national Ford truck week and Leveille-Maher Motor Co., local authorized dealers, has arranged for a complete showing of Ford built truck bodies.

Entrance of the Ford Motor company into the manufacture of commercial bodies indicates a new and important advancement in this division of motor transportation since it shows that Ford is bringing into delivery and hauling services the same low cost and high value that has made the Ford passenger car the most popular in the world. The Ford truck chassis has long held the lead among light commercial vehicles and at present approximately 75 per cent of the one-ton trucks in use are Fords.

The business man or farmer who is interested in reducing hauling costs will have the opportunity this week

of becoming fully acquainted with these Ford built truck bodies which, because of the economies of Ford quality production, are offered at low prices.

Arrangements have been made by Leveille-Maher Motor Co. to keep show rooms open every evening during the week so that all may have an opportunity of inspecting the trucks and as an opening feature a truck parade will be held through the business streets Monday afternoon.

More important, however, Leveille-Maher Motor Co. will be prepared to give demonstrations of any of these units and those interested are invited to enter their requests for the demonstration as early as possible.

The Ford-built body combinations for the famous Ford one-ton truck chassis include the open express type, the express type with either screen sides and canopy top or with top alone, and the stake and platform body. This latter body is of particular interest to the farmer and truck gardener, for it is adaptable to every agricultural hauling requirement as it may be used with either grain or cattle sides. With stakes it provides unusual space for carting garden produce.

A closed cab, adaptable for use with any of these bodies, also is provided and has grown greatly in popularity since its introduction. It is of all-steel construction, roomy, with demovable panels in the back and affords complete protection for the

driver in inclement weather, with ample ventilating facilities. The displays also will include the new pick-up body, which is mounted on the rear of the Ford runabout, providing a light delivery car which meets a variety of requirements where quick delivery is an important factor.

### HIGH COST OF CONGESTION.

The towering office building, once the monument of municipal enterprise, is beginning to arouse some misgivings among those who wrestle with municipal problems. Engineers are now urging "that cities be spread out rather than built up."

"Higher and higher buildings," said Harlan Bartholomew, city plan engineer of St. Louis, in an address before the civic development group at the annual meeting of the Chamber of Commerce of the United States; "and ever greater concentration of business are not so much monuments of business enterprises as they are symptoms of economic waste."

"Witness New York's \$500,000,000 expenditure for subways with congestion greater today than ever before. The 'congestion tax' of New York is estimated at \$1,000,000 per day; of Chicago \$600,000."

"We have scarcely begun to explore the field of relation of street space to building content and use."

## OLDEN

OLDEN, July 11.—Dr. H. M. Barker left Thursday for Chattanooga to join Mrs. Barker and children, who are visiting Mrs. Barker's parents. The doctor will be gone about a month.

Mr. and Mrs. Lewis Sneed and Jim Watkins of Muskogee, Okla., have been visiting in the J. W. Horner home here the last few days. Misses Gladys and Oleta Jennings, who have been visiting their grandparents, Mr. and Mrs. J. L. Andrews, the last week, will return to their home in Dallas Sunday.

Mr. Bean of Mullins, Texas, has come to Olden and is putting in a moving picture show in the building just vacated by the Evans Drug company.

Mr. and Mrs. Lindson Hartman have come on their vacation to visit with relatives at Cleburne, Mexia and Marlin.

Mr. and Mrs. E. L. Roefe and son, Gale, have returned home from their vacation, visiting in Oklahoma and Kansas.

Mr. Watts and family of DeSmet moved to Olden Thursday. They are employed by the magnolia Petroleum company.

Green Wright and son, Pete, and Bob Wright and son, Jack, left Friday on a few days fishing trip on the Brazos.

The Methodist revival will begin here Sunday night at the new church. Preaching services will be in charge of the pastor, Rev. Mr. Logett, and Mr. Martin of East Texas will have charge of the song service.

Mrs. J. L. Haynes and baby daughter are visiting Mrs. Haynes' mother at Bridgeport. She is very ill.

Mr. and Mrs. J. W. Horner left Saturday, accompanying their cousins, Mr. and Mrs. Lewis Sneed and Jim Watkins to visit at San Antonio, Harlingen, Brownsville, Galveston, and several other points. They will visit their cousins, Dr. and Mrs. John Watkins, at Harlingen.

Miss Christen Acers, who has been visiting her cousin, Mrs. C. M. Wynne and family, has returned to her home in Abilene.

During the past year \$400,000,000 new capital has been invested in electric service companies of the nation and now approximately three million Americans have \$7,000,000,000 invested in these companies. Further it is estimated that to meet the demands of the industry during the next ten years will require additional capital to the extent of \$10,000,000,000 or about \$2,000 for every minute of the coming decade.

FABENS.—New high school building nearing completion.

WESTBURY.—Well of Port Arthur Oil & Development company now at depth of 3,500 feet with strong showing of gas and good oil indications.

# Exquisite, That's The Word

## The New Fall Dorothy Knapp Frocks are Exquisitely Beautiful

Webster says:

Exquisite means refined, delicate, nice, choice, excellent, highly finished.

This new shipment of Fall Frocks just received are all this and more. Mere words can hardly do them justice.

We might say they are more fascinating than anything our resident New York buyer has ever sent us.

One of the most satisfying features in buying from this collection of Dresses lays in the fact that each and every model is individual, both in design and color arrangement, and are constructed of the superior Migel Silk.

The assortment comprises a full list of sizes.

There is a perfect fitting model for every type and figure.

Price Range  
**\$42.50**  
to  
**\$57.50**

Below You Will Find Listed a Few of the Outstanding Numbers. Be Sure to Call in and See the Entire Collection

One that strikes the eye first is a Velva embroidered and applied combination in African brown and wood brown, showing the new long sleeves and Jenny collar effect. In the manufacture of this beautiful fabric the looms have a patent feature exclusive with the Migel Silks and Velvets. Designs are produced in the weaving process and are not burnt in by acids. We are enthusiastic over this beautiful Frock as well as many other in the group.  
Price **\$49.50**

There is also a group of a dozen or more in smart Crepe Satins in combinations of wood, brown and black, henna and black and henna, navy and black combined. These models come both in full sleeves of embroidered net and also the new half-length puff sleeve. The skirts for fall are also modified and show

the full flare and the waist is in basque effect. These models range from **\$42.50** to **\$57.50**

Another fascinating style in the lot is of the bouffante effect in wax-wing striped velva bodice combined with seal crepe satin skirt, finished with large medallion outlined with fur. This number is priced **\$54.50**

Crepe Faille will be extremely popular for early fall wear. This number is in the latest pitch pine green, a distinctly sport model with the high embroidered collar and full length sleeves and finished with extreme novelty belt and large buckle. Priced **\$42.50**

Our July Clearance Sale of all Summer Merchandise Now in Full Swing.  
New Fall Shipments Arriving Daily

## Now-a One-Profit Car in the Quality Field

STUDEBAKER has achieved one-profit manufacture in the quality field. This marks a new era in the automobile industry. Studebaker's achievement eliminates unnecessary profits running up to \$500 on a single car. It banishes double overhead. It results in quantity production of quality cars. It vitally affects pricing by establishing a new criterion of value in the fine car field.

**TWENTY-FIVE** years ago practically all "manufacturers" of automobiles were nothing more than assemblers. They purchased motors, bodies, tops, axles, etc., from parts makers who were the manufacturers in reality.

On this basis it was easy to become an automobile "manufacturer," and more than five hundred makes of automobiles have had their day in the American market and disappeared. They are represented only by "orphan cars" with practically no resale value.

Notwithstanding this writing on the wall many manufacturers still assemble their product, piling profit upon profit for the ultimate purchaser to pay. Each profit which a maker pays to a body builder or parts supplier enters into his cost just as though he had spent the money for steel or plate glass or upholstery. Although it represents no value he not only passes it on to the purchaser but figures his own profit on top of it.

The Ford is a one-profit car and reigns supreme in its field.

In the fine car field Studebaker—and Studebaker alone—now offers the American public one-profit values.

During the past seven years, when demand exceeded supply, Studebaker has been plowing earnings back into plants and machinery until we are now able to make this announcement.

Foundries, stamping mills, machine shops, are now complete. As final links in the chain of one-profit production, the enormous Studebaker body plants have been operating for months at peak capacity. Resources totaling one hundred million dollars are concentrated on the production of this one-profit car.

No other individual manufacturer in the world (except Ford) possesses such facilities for the complete manufacture of automobiles.

That is why Studebaker is able to put finer steel, finer wood, finer upholstery, better workmanship, hundreds of thousands of miles of re-

### Why Studebaker is the "one-profit" car

There are more than 60 makes of passenger cars built in the United States, but very few are manufactured complete in the plants of the producers who sell them.

Only 42 build all their own motors—and one of the 42 is Studebaker. Of the 42 which claim to make their own motors only 14 make the iron castings, stampings and forgings which go into their motors—and one of the 14 is Studebaker.

Only 5 make all their own bodies and one of the 5 is Studebaker.

Only 2 make all their own motors, bodies, clutches, springs, axles, gear sets, differentials and steering gear. One of these 2 is Studebaker and the other is Ford.

Contrast this with Studebaker, where the entire car is designed and built as a unit—and engineered complete. This construction means (1) longer life—(2) greater comfort in riding—(3) greater freedom from repair expense—(4) greater resale value.

With the advent of this one-profit-one-overhead plan of motor car manufacture, it is folly today to buy a car by the same comparisons you used yesterday. Today you must measure all cars with this "one-profit" Studebaker.

One-fourth of all American passenger cars built today belong in the fine car field—a total of 57 different makes selling above one thousand dollars.

There are 21 Studebaker body styles available on three different chassis. The Standard Six Models, 113-inch wheelbase, 50 h.p. engine, \$1125 to \$1600 f.o.b. factory. The Special Six Models, 120-inch wheelbase, 65 h.p. engine, \$1450 to \$2120 f.o.b. factory. And the Big Six Models, 127-inch wheelbase, 75 h.p. engine, \$1875 to \$2650 f.o.b. factory.

And you may buy your Studebaker today with the assurance that it will not be arbitrarily stigmatized by any act of ours as a "last year's model." Instead of spectacular annual announcements of "new yearly models," Studebaker has adopted the policy of keeping its cars up-to-date in body styles and chassis design every day in the year. Therefore, buy your Studebaker now!

THIS IS A STUDEBAKER YEAR  
**The STUDEBAKER CORPORATION of AMERICA**
