

OVERSTREET HEADS WEST TEXAS CHAMBER

OLD GLORY GOES UP AGAIN for the boys who were prisoners of the Japanese after the fall of Bataan and Corregidor. The picture above was taken September 9 at the camp where Sgt. Edgar (Rooster) Beck was interred, when the American 6th Army moved in to liberate the prisoners. The flag was made by the boys in camp. Where they obtained the materials used in making the flag was not revealed.

Bovina Loses Final Game to Vega Six

Fighting doggedly till the final gun, but lacking the reserves to relieve the regular string, which was obviously unconditioned for such a strenuous game, the Bovina Mustangs went down before the strong Vega six last Friday afternoon on the Bovina grid to close the season for Bovina, in which they have failed to win a single encounter.

Final score of the game was 36-18, Vega.

Both teams engaged in a passing attack from the very start of the game, and fumbles on the part of the Bovina receivers proved costly when opportunities for scoring were within the grasp of the Mustangs.

Looney, Brock and Ross were the outstanding men of the Bovina team and most of the plays centered around this trio, with Eberting and Taylor both turning in nice games. Substitutions for the Bovina aggregation were frequent in order to give the hard-pressed first string a breather as the play surged back and forth on the field. The subs, while playing a creditable game, were not equal to the task of holding the heavier Vega squad.

Vega took the lead early in the game and never relinquished it, the first quarter ending at 12-14. At the half, Vega had pulled away from the Bovina boys to the tune of 30-12. In the last period, Vega put in its second string, but replaced them when they were pushed back to their own 5.

In the third quarter, the Mustangs held the visitors scoreless while they ran the count up to 30-18, but in the final stanza, Vega reversed the procedure by holding Bovina down while they were adding six more points.

TO BELEN

Cecil Cravens, who has been employed by the Santa Fe the past several weeks, has been transferred to Belen, N. M.

TO OUT-OF-TOWN SUBSCRIBERS

Under new policy, a charge of 10c is made for change of address. Please include this when you notify us of such change. Otherwise, The Tribune will not be forwarded to new addresses.

HAD GOOD LUCK

Mr. and Mrs. Oswell (Buddy) Jones and Robert Rundell returned home the first of the week from a successful pheasant hunt in South Dakota. There were three hunters in the party, including a Mr. Hunt from Muleshoe, and all of them bagged their limit of 40 birds. Thanks to the generosity of Jones, The Tribune publisher can testify to the "tastiness" of their hunt.

Bovina Implement Co. Will Move Stock

Bedford Caldwell, local manager of the Bovina Implement Company, announced today that the stock of the firm would be moved to Bovina this weekend.

The stock has been maintained in Texico the past few weeks, following purchase of the stock from the Harrison Hardware Company. Caldwell said the firm would occupy the old C. A. Norton building in Bovina when the move is completed.

Ford Farm Sale Set For November 13

A. O. Ford, who announces that he is leaving the farm, will conduct a general clean-up farm sale at his place one mile north and three miles east of Farwell on Tuesday, Nov. 13, starting at 11 a. m.

An extra good herd of milk cattle, including Guernseys and Jerseys, will be the principal feature of the auction, with a good list of machinery also listed to go under the hammer.

Col. W. D. Wanzor of Muleshoe will conduct the sale and Howard Splawn will act as clerk.

SLOANS TO TULSA

Rev. and Mrs. E. J. Sloan have advised The Tribune that they have recently been transferred from Alamogordo, N. M., to Tulsa, Okla., where he has been assigned as pastor of Epworth Methodist Church. Rev. Sloan was formerly pastor of the local Methodist Church and he and his family are well and favorably known here.

Elizabeth, Queen of Roumania (1843-1916) wrote as Carmen Sylva.

New Electric Models Now On Display

Bovina merchants began showing some of the new post-war electric household appliances over the weekend, with the C. R. Elliott Company displaying the new Bendix washer and the 1946 Frigidaire.

The Gaines Hardware Company, also of Bovina, has placed a new Kelvinator on display as well as a new Dexter washer.

Both firms have announced that orders for the new electrical machines are being accepted and delivery would be made in the order in which they are filed.

Slightly Injured As Pickup Overturns

A. L. Tandy, prominent farmer east of here, escaped with slight injuries last Friday when his pickup, loaded with wheat, overturned two miles west of Hereford on Highway 60.

Tandy was enroute to the north plains to take some seed wheat when the accident occurred, and was traveling alone. He said a blow-out in a rear tire caused the vehicle to swerve and upset, righting itself after a complete turn-over.

Aside from a small cut just above the right eye and other minor bruises about the body, he escaped uninjured.

Contour Wheat Seeding Gets AAA Payment

A change in procedure on payment for contour seeding of wheat that was planted this fall has been received by John Martin, at the AAA office in Farwell, with such planting to draw payment under the conservation program of 1945.

Previously, Martin explained, payment for such work drew pay the year the crop was harvested, which would be 1946, but the new order states that applications for payment on the work shall be included in the 1945 papers.

Martin asked that all farmers who had done contour seeding this fall plan to have figures on hand when they visit the office to make out applications for payment. Such applications, he said, will begin to be accepted in "about two weeks", following a district meeting in Plainview on Nov. 15-16.

The crop values of 1944 exceeded the cost of all irrigation facilities in operation by the Bureau of Reclamation in New Mexico last year.

Grissom Wins Santa Fe Trip to Chicago

TWO ARE ACCEPTED

Bobbie Lee Roden and Dewey Jackson Porter, who were sent to Oklahoma City early last week for pre-induction physicals, were found acceptable for general service, it was announced at the office of the local board today.

Mrs. Bessie Lee Henneman, clerk, also stated that she had received no report on the assignment of the four men sent for induction on the October call.

C. W. Grissom, 16-year-old son of Mr. and Mrs. L. M. Grissom of the Oklahoma Lane community, is one of 19 Texas boys named as 4-H club winners of the coveted trip to the National Congress, offered by the Santa Fe Railway.

The announcement of Grissom's selection in the chosen few was made this week by County Agent Lee McElroy, who stated that the Congress would convene in Chicago on December 2nd and adjourn on December 6th. All Texas winners will make the trip in a group, with the Santa Fe acting as hosts and paying their expenses.

Grissom has been a club member for nearly six years, holding various offices with his group. He has done outstanding work in meat production, majoring in swine and turkey, McElroy said. His leadership among 4-H clubbers during the war was largely responsible for his choice as a Congress attendant, as he has participated in several team demonstrations and assisted with the Parmer County Dairy Club Show, held recently.

Bond Sales Still Lag

"Everybody seems to be riding and letting their feet drag the ground," was the comment today of G. D. Anderson, chairman of the War Finance Committee, when asked about the progress of the Victory Loan Drive in Parmer County.

Anderson went on to add that, so far as he knew, less than \$3,000 worth of bonds had been sold in this county since the opening of the drive on October 29th.

Parmer County has been asked to sell a total of \$165,000 during the drive, \$85,000 of which is set up in E bonds. The drive officially closes on December 8th.

Revealing that other weighty matters were burdening him just at this time, Anderson said he expected to "really get to work when I get back from my deer hunt".

Anderson expressed the belief that Parmer County would reach its quota "as we have always done", but added that most bond enthusiasts in the county are now concerned with plans for a deer hunt, after being denied this favorite sport for the past four years.

Commercial Teacher Hired For Texico

"I'll say I've got news—big news," Supt. B. A. Rogers exclaimed Tuesday, explaining that the Texico faculty was complete again, with the addition of Mrs. W. T. Russell, in the commercial and English department.

Mrs. Russell comes from Arlington, Texas. She holds a Bachelor of Arts degree from Louisiana Polytechnic, and has her Master's degree from Southern Methodist University, in Dallas. Recently, she has done work in business offices, but has had six years teaching experience.

She succeeds Mrs. H. Arnold, who had been a member of the Texico school faculty for a number of years. Mrs. Arnold tendered her resignation a few weeks ago due to ill health.

Mr. and Mrs. Russell are currently making their home in Clovis, until they can find quarters in Texico.

OPENING GARAGE

A. M. McDonald and E. A. Toy have leased the old State Line Wrecking yard location in Texico, and announced today that they were opening a general garage and welding shop. Both are experienced mechanics and welders.

For the second time in recent years, this little town has been highly honored by having one of its citizens named as president of the West Texas Chamber of Commerce, probably the largest organization of its kind in the land.

This honor was bestowed on H. Y. Overstreet of Farwell, Monday, when the referendum session of WTCC was held at the Abilene headquarters. It was only five years ago that James D. Hamlin, also of this city, and an uncle of the newly-elected president, was chosen head of the organization.

Overstreet has been on the executive board of the chamber for the past several years.

The annual convention of the WTCC, which has been one of the biggest civic gatherings in the nation since the chamber was formed 13 years ago, has been dispensed with since the beginning of the war, and since that time the annual election of officers has been made by a referendum with all member towns participating in the naming of new officers.

Overstreet and Judge Hamlin left here Sunday for Abilene to attend the referendum assembly and discuss plans for future activities of the chamber.

It is expected that the annual conventions will be renewed next year with the passing of the war.

Overstreet, son of Mrs. Anne Overstreet of this city, has been in charge of the local offices of the Capitol Freehold Land Trust the past several years, succeeding his uncle, Judge Hamlin, who held that position for a number of years.

Who's Not Going On Deer Hunt Seems Question Now

It's not a question anymore as to who is going deer hunting when the season opens in New Mexico on Saturday of this week.

But rather—who is not going?

One thing that seems to be certain is that there will not be a high-powered rifle nor a round of ammo left in Parmer County when the vanguard of hunters take off before the close of the present week.

Not only that, but there are numerous itchy fingers that will be toting old shotguns, loaded with buckshot, when the sun rises on the morning of the 10th.

Most of the hunters from here will invade the Black Range section of southwestern New Mexico, while others will try their luck along the New Mexico-Arizona line. Still others will pitch their tents in the Capitan and Monticello country. Some parties will strike for the northwest to invade the Upper Pecos regions. While others, still undecided where to try their luck, are "just going" huntin'.

OPENS BOVINA STATION

Acclaimed as one of the most modern and attractive service stations along Highway 66, the McCuan Service Station at Bovina began operation the first of last week.

W. E. (Buck) McCuan has just completed the station, built new from the ground. In addition to having ample storage and work rooms, the station is equipped with rest rooms and a large wash rack—all indoors. McCuan said he will carry Gulf products on both a retail and wholesale scale.

Ration Price Files Move to Hereford

"The beginning of the end" for the Parmer County ration board comes on November 13, when all price files of the local board will be moved to the Hereford office.

Mrs. Mose Glasscock, chief clerk, reported that tire rationing for Parmer residents will continue to be handled in the Farwell office, and actual information as to when the office might be completely closed was not available.

It has been suspected for some time that offices in several counties would be centralized, and the moving of the local files to Hereford indicates that that city will handle the finale of rationing.

Returning servicemen may continue to file their applications for sugar ration at the Parmer office, Mrs. Glasscock added.

Funds Allocated For Soil Building Work

Parmer County has been set up for an allotment of \$168,400, as payment for soil building practices carried out under the Triple A program during 1946, county supervisor John Martin reported today.

A total of 42 practices have been approved by the state for farmers in this county, Martin went on, and the county committee is due to meet Thursday, November 8, to choose practices which will draw pay in Parmer county, as well as deciding how much of the funds will be directed to each.

Martin pointed out that the county is definitely on a budget, and plans for the coming year must be drawn up so that no one practice will receive applications for payment in excess of the amount diverted to that work.

Selection of practices made by the county committee will in turn be submitted to the state office for final approval, Martin added.

The Carlsbad Irrigation Project, under the supervision of the Bureau of Reclamation, provides water for 25,000 acres of land.

Bovina Happenings

Mrs. T. E. Turpin and Mrs. Anna Lee Arthur, of Amarillo, visited in the Glover home the past week.

Mrs. Otis Hoffer and children, and sister who lives in Canyon, spent the weekend in Shamrock.

F. H. Wilson and Vernon Ward went to Oklahoma City, Friday, to get a new bus for the school.

Mary Agnes Ross, who is attending school at Tech, spent the weekend at home.

Mr. and Mrs. C. H. Jefferson were in Hereford Tuesday.

Mrs. Erwin Bryant is moving here from Amarillo. Pvt. Bryant went to Washington this week for Army assignment.

Mmes. A. G. White, F. W. Ayres and L. V. Shroyer were Clovis visitors, Wednesday.

Buck Ellison attended to business in Portales, Saturday.

Miss Carrie Jean Hoyle, Portales college student, is visiting in the J. R. Glover home.

Mr. and Mrs. Tolly Caldwell of Lincoln, Neb., and Lt. Geo. R. Caldwell, enroute to St. Louis for reassignment, are visiting Mrs. E. T. Caldwell and Rita.

The young adult class of the ME Church was entertained at a party, Thursday, in the home of Mr. and Mrs. Frank Hastings.

Mrs. Beal has returned home after spending several weeks in the hospital.

Randal Perkins, of the Navy, has been visiting his sister, Mrs. Cecil Floyd.

Bernard Meshew, of the Army, spent the week with relatives here.

Mr. and Mrs. W. O. Cherry were business visitors in Amarillo, Saturday.

The Girls Glee Club of Bovina High entertained the Chamber of Commerce with songs and musical numbers during the noon hour, Tuesday.

Mr. and Mrs. J. I. Rury attended business in Muleshoe, Monday.

Mr. and Mrs. Hubert Ellison were in Clovis, Monday.

Mrs. Mary Gunn, of Clovis, is visiting Mrs. F. H. Wilson.

There was excitement in Bovina Sunday morning, when a number of locals woke up to find tires, tubes and wheels missing from their cars, and it didn't happen to be a Halloween prank. They seem to have vanished in thin air.

Mr. and Mrs. Boyd Gregory visited friends here over the weekend.

A farewell supper for Rev. and Mrs. Maxwell was given at the Holiness Church, Monday night, by members of the church and other friends.

Mr. and Mrs. N. E. Bonds and Thomas were Friona visitors, Friday evening.

Rev. Henry Maxwell, pastor of the Pentecostal Holiness Church, has resigned due to ill health.

Mrs. L. D. Pope, Mrs. L. D. Chiles and son were business visitors here, Monday.

Mrs. Barbara Kessler has received word that her husband has landed in the States after 10 months in the Pacific, and will be home soon.

SEE the most complete and attractive line of Christmas cards ever shown in Bovina at McCuan's service station.

Mr. and Mrs. Faye Cornelius and children, of Amarillo, visited in the Rhinehart home this weekend.

Mr. and Mrs. Donald Belev of Roswell visited Mr. and Mrs. Geo. Trimble, last weekend.

Rochelle Cochran, of Clovis, visited his sister, Mrs. McCuan, Sunday.

Katherine Robards is now employed at Kimbrow Drug.

Harry Jackson is the new proprietor of Rhodes Grocery.

Lois Jean Iness and Joe Hromas spent Sunday in Lubbock.

Mrs. J. H. Elliott has gone to Odessa, to remain through the Thanksgiving holidays with her daughter, Mrs. J. A. Pogue and family.

Lt. Bass P. Elliott, of Camp Fannin, has been promoted to company commander. He is the son of Mr. and Mrs. C. R. Elliott.

Mrs. John Kimbrow and Mrs. C. R. Elliott left Thursday for Stephenville, Tex., for

KILL PEACH AND PLUM TREE BORERS NOW

COLLEGE STATION—The time of year has come to treat peach and plum trees for control of borers, says Paul Gregg entomologist for the Extension Service. In areas north of Waco, trees should be treated as near October 25 as possible, and by November 20 south of Waco. If gum with frass or sawdust is noticed coming out of a tree just below or above the ground line, the borer is at work.

The true borer, or base borer, is the lad to watch for, Gregg says. It works underneath the bark or the tree just above or below the ground line. If it is not controlled it will weaken a tree and prepare it for attacks by other destructive parasites.

Control may be obtained by applying PDB crystals around a tree after removing weeds and grass for a distance of 18 inches from the trunk. Dosages are one-half ounce of crystals for a tree under 3 years of age; three-quarters ounce for a tree just coming into bearing; one ounce for a bearing or mature tree, and one and one-half ounce for an old or large tree. Treat only those showing the signs of borer damage.

The crystals are applied in a circle one inch wide and 1½ or two inches from the trunk. If the borer's entrance hole is above the ground, build a dirt mound around the tree so that the crystals will be placed above it. After the crystals are applied to the soil cover them with a few shovelful of dirt and pack it down. After about 30 days, remove the mound

with the crystals to prevent damage to the tree.

Gregg says that borers working in the branches of peach or plum trees can be controlled by painting their entrance holes lightly with a solution of one pound PDB crystals dissolved in one-half gallon raw cottonseed, or raw linseed oil. Remove the gum from the bark before painting and do not paint all the way around, because the solution will injure the limb or branch. The crystals generally can be purchased at most drug or feed stores, Gregg says.

PHILLIPS 66 GASOLINE

AEROSOL EFFECTIVE FOR SOME USES

College Station—Civilians have heard a lot recently about aerosol bombs used in all parts of the world by service men to rid their quarters of flies, mosquitoes and other flying insects. With peace here, aerosol bombs are being made available for civilian use.

Like any other weapon, says Cameron Siddal, entomologist, aerosols have a proper use for best results. The term "bomb" refers to the container—it resembles a bomb, but doesn't explode. The aerosol itself consists of an insecticide, which disperses in the air like fog or mist when released from the container by opening of a valve. Small particles of the insecticide scatter through the air and hit flies and mosquitoes flying about.

The aerosol bombs used by the armed forces and most of those on the market today contain a mixture of DDT and purified pyrethrum.

The bombs are most effective against insects in their flying stage, he says. That means flies, sandflies, mosquitoes and moths. Don't expect aerosols to get rid of crawling insects

such as bedbugs, roaches and dog ticks, or the egg or larval stages of clothes moths, carpet beetles and meal moths. Don't expect it to act as fumigant, either. Other methods of control are more effective and less expensive for these purposes.

BEANS WIN MEDALS

College Station—New varieties of lima beans, the results

of USDA vegetable specialists' research, have won All-American honors and medals. The new varieties Early Market bush lima and Fordhook No. 24 bush lima, products of the specialists' inbreeding and selection program, won high rating following a careful check and comparison under actual field conditions by a seed-trade group known as All-American Selections.

Discharges Filed At Co. Clerk's Office

Sgt. Wayne London, of the 64th Armored Infantry, was discharged at Fort Bliss Oct. 28. London holds the EAME ribbon, with campaign stars of Normandy, Northern France, Ardennes, Rhineland, Central Europe; the bronze star, the combat infantryman's badge, a bronze arrowhead signifying invasion activity, and the good conduct medal. He was in the States for two years, overseas 18 months.

Pfc. Ray E. Hurst was discharged at Camp Swift, Tex., Oct. 30. He wears the Purple Heart for leg injuries sustained last February, in Europe; the combat infantry badge, EAME ribbon, good conduct medal, distinguished unit badge, and campaign stars of Naples-Foggia and Rome-Arno. Hurst was overseas 20 months.

In uniform for three years, Sgt. Clinton H. Skaggs received his discharge at McClellan Field, Calif., on Oct. 21. He has the good conduct medal.

S-Sgt. Loyde A. Brewer, who served with the 515th air group, received his discharge at Fort Sam Houston, Oct. 21. Brewer served in the Egypt-Libya, Naples-Foggia and Rome-Arno campaigns, and has the American defense and good conduct medal. He was in service almost four years, spending 31 months overseas.

Alfred J. Seaton, storekeeper 2-c, was discharged at San Diego, Oct. 24. After serving for some months on the USS Medusa, Seaton returned to the States last spring, and has been stationed at Ream Field.

Cpl. George Templar, of the MPs, was discharged at Fort Bliss, Oct. 30. He was a telephone operator, serving three years, 13 months overseas. He holds the good conduct and A-P ribbons.

Pfc. Arlin R. Dilger, of the 830th Field Artillery, received his discharge at Fort Sam Houston, Oct. 26th. In service five years, he spent 10 months in the EAME theatre, and has the good conduct badge, American defense colors, and campaign stars of the Ardennes, Rhineland and Central Europe.

Sgt. Delmar L. Langmire was discharged at Fort Bliss on Oct. 30, after almost five years in service. He was with an airways communications group, overseas 13 months, and holds the A-P and American defense ribbons.

Pvt. Daniel E. Mann, who served with an AA outfit, was released at Fort Bliss, Oct. 18. He spent two years overseas, 19 months in the States, has the A-P and American defense colors.

Tulon G. White, carpenter 1-c, was released from active duty Oct. 29, at San Pedro. He served with a Seabee outfit.

Cpl. George Templar, of the 631st MP outfit, was discharged at Fort Bliss on Oct. 30. He holds the A-P and good conduct ribbons, having served 13 months overseas and 29 in the States.

Hubert Stonewall Talley, a

storekeeper second class, was relieved from the Navy at Camp Wallace, Oct. 24. Jean Karyen Anthony, coxswain, was discharged at Norman, Okla., on Oct. 29.

Otho Melvin Hammonds, who served with the Seabees, as electricians mate 1-c, received his discharge at Camp Wallace on Nov. 2nd. Billie Joe Foster, fireman 2-c, was discharged at Lido Beach, N. Y., Nov. 1; and John Lemuel Eubanks, gunners mate 3-c, was discharged from the Coast Guard at Long Beach, Nov. 1.

Sgt. Edmond T. Caldwell, Jr., was relieved from the air force at Lincoln, Neb., on Oct. 29. He served as an instrument mechanic, was in the ser-

vice three years, and has the good conduct medal.

Pfc. Vance Eason arrived to record his discharge this week, being separated at Fort Sam Houston on Nov. 3rd. A rifleman, he was overseas with the 323rd Infantry for 17 months participating in the Southern Philippine and Western Pacific activities, and flew home from Japan. He has the A-P, Philippine liberation, American theatre, good conduct and victory ribbons to his credit.

JARRELL GRATEFUL

W. H. Jarrell, who conducted a farm sale at his place the first of last week, has expressed himself as well pleased

with the results of the sale, and asks The Tribune to convey his appreciation to those attending the sale, and especially to the buyers. Col. Dick Doshier of this city, had charge of the sale.

Washing Machine Care

College Station—It's simple and wise to keep washing machines in good repair. Many housewives will be buying new machines soon and they should start from the first giving their new machines the care they deserve, says Mrs. Bernice Claytor, specialist in home improvement of the Extension Service.

Here are tips on washing machine care:

First, know the machine by studying manufacturer's printed directions. Avoid overloading. Too many clothes in the machine at one time will cut down on efficiency.

Keep the drains clear of lint, and keep surfaces clean and dry. Take special care of all rubber parts, drain hose, keep rubber free of oil at all times. Oil should be applied to moving parts when necessary, and bolts and screws must be kept tight.

D. K. Roberts, Farwell. 50-tfc

BARNES-HAM NUPTIALS ANNOUNCED HERE

A quiet wedding occurred at the Methodist Church last Saturday evening at 8:30, when Minister Ebb Randol of the Church of Christ officiated at a double ring ceremony uniting Miss Etta Marie Barnes and Lawrence Ham in marriage.

The bride, a daughter of Mr. and Mrs. T. O. Barnes of Roswell, was dressed in beige wool with brown accessories, wearing a corsage of small yellow chrysanthemums. For something old she wore a lock of hair belonging to her mother-in-law, and carried a blue silk handkerchief.

Attendants were Mr. and Mrs. Doyle Cummins of Friona.

The couple left immediately for Carlsbad, N. M., on a brief honeymoon tour, returning to Farwell, Monday.

Mrs. Ham came to Farwell with her parents a few years ago, and is employed locally. The groom is the son of Mr. and Mrs. R. V. Ham of this city, and a graduate of the Farwell high school. He served with the U. S. forces in the African theatre, attaining the rank of sergeant. He was discharged recently and is employed at the Clovis air base.

They will be at home in Farwell, having recently purchased a home from Claude Rose.

SINGERS GATHER AT CHURCH OF CHRIST

Singers from Melrose, Clovis, Portales, Muleshoe, Friona, Bovina, Lariat, Lazbuddy and Texico-Farwell gathered for a song fest at the local Church of Christ, Sunday.

This was a regular meeting of the singers, who assemble each first Sunday at one of the churches in the various towns.

Minister L. C. Cox reported a large crowd in attendance, and added that the singing was enjoyed by all, with special numbers given by representatives of different groups.

PTA THANKSGIVING DINNER, THURSDAY

The annual Thanksgiving dinner and social of the Farwell Parent-Teacher Association will be held Thursday of this week, Nov. 8, at 8 p. m., in the home economics building of the school.

Officials announced that the celebration comes early in the month, since it is held on the regular meeting night of the PTA, the second Thursday.

Committee members stated that it was possible some patrons may have been overlooked when requests for contributions to the dinner were made, but urged that all patrons of the school be present.

BOOTH TO PLAY

Ronald Earl (Pete) Booth, who is now in his second year at the University of Texas, majoring in music, writes that he has been nominated to play piano numbers in student recital at the Fourth Annual Music Festival of the Federated Music Clubs, when the group meets November 8-10. Pete is accompanist for the college glee club.

ZONE MEETING HELD IN CLOVIS, 1ST

The zone meeting for Methodist WSSC groups was held the past Thursday in Clovis, in conjunction with the district set-up meeting, in session there for two days.

Mrs. C. C. DeGraffenreid, of the Melrose society, was re-elected as president of the zone, and Mrs. Charles Walker, of the Texico-Farwell church, was named as secretary-treasurer. The Melrose ladies also took home the banner for attendance.

Visitors from here included Rev. and Mrs. Charles Walker, Mrs. G. W. Atchley, Mrs. Roy B. Ezell, Mrs. Ruby Dixon, Mrs. Floyd Parks, Mrs. A. H. Overstreet, Mrs. W. H. Graham.

APPROACHING MARRIAGE REVEALED LOCALLY

Mr. and Mrs. Delbert Hudson, of the Lazbuddy area, are announcing the engagement and approaching marriage of their daughter, Marguerite, to 2nd Lt. Robert C. Johnston, son of Mr. and Mrs. George E. Johnston, 1905 E. 11th, Superior, Wis. No date has yet been set for the nuptials.

The bride-elect is a graduate of Lazbuddy high school, and received her BS degree from WT in Canyon in May, 1945. She is now the physical education director of Dinmitt high school.

Lt. Johnston is a graduate Central High, Superior, Wis. He was inducted into service in 1942 and received his commission as a bombardier at Deming, N. M., May 1944. He had radar training at Langley Field, Va., graduating March, 1945, and served six months overseas with the 15th AAF. He is now home visiting his parents, and at the expiration of his furlough will report to Santa Ana, Cal., for re-assignment.

ARMISTICE PROGRAM AT TEXICO SCHOOL

Rev. Virgil Hunton, of the local Baptist Church, has been asked to make the principal address at an Armistice Day program, to be held at the Texico school, Friday, Nov. 9, at 2:15, Texas time.

In making the announcement, Supt. B. A. Rogers extended a cordial invitation to returned or discharged servicemen, and added that several would be asked to speak briefly during the program.

OFFICERS NAMED TO HANDLE ANNUAL

Students who will take the responsibility of preparing the 1945-46 annual for the Farwell school were named the past week, with Mrs. Earl Booth as sponsor of the project.

W. H. Graham, Jr., is editor in chief, with Tommie Randol as society editor; Jo Ann Williams as advertising manager; Jeatonne Morris as reporter in chief, assisted by Don Williams; Max Ford will serve as business manager; and Joseph Threet and Sybil Ham are responsible for cartoons.

The yearbook will be issued next spring, and will chronicle the school news of the year with stories and pictures of students and events.

HALLOWEEN PARTY HELD WEDNESDAY

A general high school party was enjoyed by Farwell students and their guests, the past Wednesday night, in celebration of Hallowe'en.

The affair was arranged on a "trip" basis, with the party first assembling at the home of Jeatonne Morris, where cocktails were served. Next stop was in the home of Mr. and Mrs. Woodie McDermitt, at which time the group received sandwiches, and the final meal stop was with Wynelle Brown, when dessert was served.

The youngsters then went to Clovis, where the majority attended the YSO Hallowe'en party at the Armory, and concluded a busy evening by attending a midnight spook show at a Clovis theatre.

BACK FROM TRIP

Mrs. Frank Smith and Modelle, Mr. and Mrs. Roy Hawkins and children of Bovina, have just returned from a visit to South Texas near Eagle Pass, in the homes of W. M. and C. A. Norton.

WESLEYAN GUILD TO MEET NOV. 13TH

Mrs. M. C. Roberts will have charge of the program, next Tuesday night, November 13, when the Wesleyan Guild of the Methodist Church meets in the home of Mrs. V. Scott Johnson in Farwell.

The program will begin at 8 o'clock, and all members are urged to attend. Visitors are welcome.

MRS. THORNTON IS CLASS HOSTESS

Mrs. Roy Thornton was hostess to the Wesley Bible Class Tuesday afternoon, with Mrs. Albert Thomas as assistant hostess. Mrs. A. D. Smith was the program leader.

Refreshments were served to Mmes. O. B. Pipkin, Ruby Dixon, Anne Overstreet, B. N. Graham, B. E. Nobles, Ralph Humble, M. C. Buck, Lena Yoder, Roy Ezell and G. W. Atchley, members; Mrs. Charles S. Walker, visitor.

Mr. and Mrs. Frank Greathouse, of Elida, spent Thursday night as guests of Rev. and Mrs. Chas. Walker. Greathouse is district lay leader for the Methodist churches.

Mr. and Mrs. Willis Magness were visitors in Muleshoe, Tuesday.

NEWS FROM OUR BOYS IN UNIFORM

Anderson Re-Enlists

Capt. G. D. Anderson, Jr., has re-enlisted in service, and is stationed at Fort Sill, Okla. "Penny" returned to the States in early summer, having been through the African and Italian campaigns with the field artillery. He is serving as an instructor at OCS in Fort Sill.

Bruce Enjoys Duty

Gunner's Mate James Bruce, brother of Mrs. Mose Glasscock, writes that he is having a big time in Japan and nearby islands, having been left there as a member of the naval occupation force. "We expect to be home by Christmas," he writes, "and will come home via the Suez canal and into an Eastern port", thus circling the globe.

In Vet Hospital

Woodie Glasscock, of Muleshoe, has been confined in the veteran's hospital in Amarillo for several days, suffering from an extremely serious attack of asthma. His condition was reported as some improved the first of the week.

Walling, Hall Home

Mitz Walling, who was recently discharged from the AAF, and Raymond Hall, relieved from the Navy medics, arrived here the past weekend for visits with friends and relatives. Walling did his service at Sheppard Field. Hall returned a few months ago from the Pacific hot spots.

Jack Seaton Home

SK-2c Alfred J. (Jack) Seaton, son of Mr. and Mrs. A. M. Seaton of the Lazbuddy community, arrived home Wednesday of last week after 44 months and 10 days in the Navy, three years of which was with Admiral Halsey's fleet in the Pacific. He was assigned to the USS Medusa and saw service at Bougainville, New Guinea and in the Coral Sea.

Bill Watkins Home

Bill Watkins, son of Mr. and Mrs. Chester Watkins, has been discharged from the Army and arrived home last Friday.

Mrs. Tom Grady and daughter, Elizabeth, of Roy, N. M., were here the past Friday, attending business matters and visiting friends.

WOMEN '38 to '52'
are you embarrassed by
HOT FLASHES?

If you suffer from hot flashes, feel weak, nervous, highstrung, a bit blue at times—due to the functional "middle-age" period peculiar to women—try this great medicine—Lydia E. Pinkham's Vegetable Compound to relieve such symptoms. Pinkham's Compound HELPS NATURE. It's one of the best known medicines for this purpose. Follow label directions.

RETURNS SUNDAY

Mrs. Vance Crume returned Sunday night from Fort Smith, Arkansas, where she had spent the weekend visiting her husband, stationed at Camp Chaffee. She also visited relatives in Lawton, Okla., enroute.

ATTEND SCHOOL MEET

Supt. H. A. Clift and Virgil Kelly, of the Farwell school were in Amarillo the past weekend, attending a district meeting of school executives. They visited friends of Kelly's in Canyon, enroute home.

JUNIOR PLAY CHOSEN

The Texico juniors have selected their annual play, Tom Hudson, sponsor, said today, adding that production date would be set before the Yuletide holidays. The play is entitled "Here Comes Charlie", and is a three-act comedy.

Lee Bradshaw, of Omaha, Neb., arrived here Friday to spend a month with his wife and baby son, who reside with her parents. "Brad" is in government work and travels out of Omaha.

R. V. Ham has gone to Hot Springs, for a 3-week course of the baths. His son-in-law, Lawrence Wagner, is subbing for him with the local waterworks.

Mr. and Mrs. DeVere Roberts arrived here the past week to visit in the D. K. Roberts home.

Mr. and Mrs. Raymond Ross, of Morton, Tex., announce the arrival of a son, Saturday, Nov. 3. Mrs. Ross is the former Katie Graham, of Farwell.

Mrs. Anne Overstreet will leave this week for Oklahoma City, for a visit in the home of her son, Laurence.

Benton Graham, who had spent a week here with his parents, left Saturday on the second lap of his journey to South America, where he will resume work with Socony-Vacuum.

HOUSEHOLD

SCISSORS . . .

Here's an item that has been out "for the duration" now back in stock in limited quantities. These scissors are 7 and 8-inch in length, and made of good materials.

HUNTING KNIVES—

Those hunting knives came in the first of the week and if you'll hurry you may be in time to get one. They are dandies.

CARD OF THANKS

We would like to thank every one in Parmer County for their sympathy; their many acts of kindness, the many visits to the hospital, the lovely flowers sent during his illness, and for the lovely floral offerings at the graveside. For all these we thank you. "Smithie" is gone but not forgotten.

Misses Carrie and Loula Smith, Mrs. Ed Brown, Mr. and Mrs. Will Perry and Family.

Pink and Blue Shower

A pink and blue shower was given Nov. 2 for Mrs. Andries Drages. Games were played and refreshments served to Mmes. Herman Schulz, W. R. Miner, C. E. Stevens, J. E. Johnston, F. S. Pounds, Hertha Ries, Manuel Wagner, Glen Phipps and the hostess, Mrs. L. Hoffman and Mrs. O. A. Nowell sent regrets.

300,000 PLACE ORDERS FOR NEW FORDS

DEARBORN, Mich.—More than 300,000 persons placed orders for the 1946 Fords on V-J Day and Oct. 28, although they had no knowledge of what the cars would cost, Ford Motor Co. discloses. Dealers in many cities reported that the showroom crowds exceeded those that saw the historic de-

but of the "Model A" in the fall of 1927, J. R. Davis, director of sales and advertising, said. The 10,000,000 who saw the Model A set an all-time record for crowds attending an auto presentation.

Telegrams, letters and telephone calls are bringing an avalanche of praise and acclaim to Ford headquarters, he said, and abandonment of car rationing has given the public new incentive to view cars and place orders. "The public calls it the greatest Ford it has ever seen, and two things everyone wants to know is 'how soon do we get them' — and 'how much?'" he said.

Every display point in the nation reported "orders above expectation" and said "healthy deposits" accompanied them. V-8 Day, Oct. 26, marked the first nation-wide unveiling of any post-war car.

Tribune job printing is best.

Health Notes

By Texas Department of Health

AUSTIN—There is no other communicable disease as dangerous as whooping cough to the very young, and there is no other disease causing an equal amount of suffering of which parents show such an unaccountable disregard, not only for the safety of their own little ones, but also for the lives of the neighbors' children, said Dr. Geo. W. Cox, State Health Officer. There is no natural immunity to this disease during the first six months of life as there is against measles. It is at this age that whooping cough strikes its hardest blow and over 80% of the deaths occurring in children are under one year of age. The disease is usually transmitted by direct contact with secretions of the mouth or nose, and only a very short exposure is required to contract the infection. Handkerchiefs, drinking cups and toys also may transmit the infection.

"The infection is communicable from the appearance of the first systems and is most contagious at this early period when the nature of the affection can only be suspected. The incubation period is commonly seven days. A slight fever, running of the nose and a cough make their appearance so gradually and insidiously that a diagnosis is practically impos-

sible unless a history of exposure is obtained. When the "whoop" appears there is no mistaking the disease. If there is whooping cough in your community, keep other children away from your little children and keep your youngsters at home. Call your physician early. Isolation of all cases for at least two weeks from the development of the characteristic cough should be rigidly enforced.

Irrigation of another half-million acres of rich farm land in New Mexico, added to the 540,000 acres now irrigated, would be but one of several far-reaching benefits which could be realized in the postwar era.

A new \$22,000,000 nylon salt plant will be erected near Orange in the near future.

You are hereby commanded to appear before the Honorable District Court of Farmer County at the Court House thereof, in Farwell, Texas, at or before 10 o'clock A. M. of the first Monday next after the expiration of forty-two days from the date of issuance of this citation, same being the 10th day of December A. D. 1945, then and there to answer Plaintiff's Petition filed in said Court, on the 23rd day of October A. D. 1945, in this cause numbered 1337 on the docket of said court and styled James D. Hamlin, plaintiff, vs J. R. Meason, et al, Defendants.

A brief statement of the nature of this suit is as follows, to-wit: Plaintiff alleges that on or about March 1, 1920, J. R. Meason and Mrs. J. R. Meason, being then and there the owners in fee simple of

Lots Seventeen (17) and Eighteen (18), Block forty-two (42), of the original town of Farwell, Farmer County, Texas,

made, excuted and delivered to James D. Hamlin for a valuable consideration a General Warranty Deed, which General Warranty Deed was signed, acknowledged and delivered and title to said land passed to James D. Hamlin, and that said deed is lost and there is no copy of said deed available and that the purpose of this suit is to recover title and possession of said land and to remove the apparent cloud from the title, as is more fully shown by Plaintiff's Petition on file in this suit.

The officer executing this process shall promptly execute the same according to law, and make due return as the law directs.

Issued and given under my hand and the Seal of said Court, at office in Farwell, Texas, this 23rd day of October, A. D. 1945.

Attest: D. K. ROBERTS,
Clerk, District Court,
Farmer County, Texas.
By: Dorothy Lovelace,
Deputy

Tuesday, Nov. 13th

SALE STARTS AT 11:00 O'CLOCK

CATTLE—MILK STOCK

All these cattle are extra good and above the average

- 4—Gurnsey cows, 6 years old, giving four gallons of milk.
- 1—Gurnsey cow, 3 years old, giving 3 1/2
- 4—Gurnsey cows, 3 years old, giving 3 1/2 gallons.
- 1—Gurnsey cow, 3 years old, giving three gallons.
- 1—Jersey cow, 7 years old, heavy springer, gives 5 gallons when fresh.
- 1—Jersey cow, 7 yrs. old, heavy springer.
- 1—Jersey cow, giving 4 gallons.
- 1—Jersey heifer, giving 3 gallons.
- 1—Jersey cow, 4 years old, giving three gallons.
- 2—Black Jersey cows, 4 years old, giving 4 gallons.
- 4—Jersey heifers, coming 2 years old, heavy springers.
- 1—Heifer calf.
- 1—Jersey bull, coming two, a good one.

MISCELLANEOUS ITEMS

- 1—Row of picket fence.
- 1—Bunch of smooth wire.
- 5—Hog houses.
- 1—10x12 granary.
- Some fence posts.
- 1—Pump jack for windmill.
- 1—Universal electric milker, 2 unit.

FARM IMPLEMENTS

- 1—John Deere broadcast binder.
 - 1—Row binder.
 - 1—Wide tire wagon.
 - 1—4-row monitor.
 - 1—Sod planter.
 - 1—1940 Farmall H with 4-row lister and cultivator attachments.
 - 1—McCormick-Deering No. 62 combine, 6 foot.
 - 1—7-ft. tandem disc.
 - 1—4-wheel trailer.
- Pitch forks, shovels, hoes and many other small items too numerous to mention.

CHICKENS AND POULTRY SUPPLIES

- 114—Rhode Island hens, extra goon ones.
- 1—12x12 brooder house.
- 1—Good chicken brooder.

HOUSEHOLD GOODS

- 1—Living room suite.
- 1—Work stand.
- 1—Montgomery Ward electric washer, has gas motor with it.
- 1—McCormick-Deering No. 2 cream separator.
- 1—Bunch of milk cans.
- Lots of fruit jars.

BUNDLE FEED

Some bundles of African millet.

LUNCH WILL BE SERVED AT THE NOON HOUR ON THE GROUNDS

THE NEW 1946 FORD

Here is the most beautiful Ford ever built—with more advancements than many pre-war yearly models. There's new and greater horsepower, stepped up from 90 to 100, improved economy in oil and gasoline . . . and massive, rich new styling. We cordially invite you to come in and see the smart new 1946 Ford.

SIKES MOTOR CO.

FARWELL, TEXAS

Community Hospital at Friona, Plan

A charter was granted for the Parmer County Community Hospital, at Friona, on Oct. 4, and work is progressing toward providing a suitable place where members and families of members of the corporation may obtain medical, dental, surgical, nursing, hospitalization, and relative services and benefits.

The people of Parmer county who become members will own and operate the hospital. Fee for a life membership is \$100 for any size family, and the money goes to build and equip. Annual dues are assessed according to the size of the family: \$12 for one, \$16 for two, \$22 for three, \$25 for four and \$2 per person for any over four. The family is defined as father, mother and all unmarried children at home. Dependents are blood relatives who live with the family and depend on them. These may be included for \$6 per person.

Volume of membership will make the hospital successful. Doctors, as well as other employees, will work on salary, and all funds go through the hospital treasury.

The service plan outlines benefits to members. Non-members may use the hospital, paying fees in accordance with those charged in the territory. Surpluses will be used to supply hospital needs, and no dividends are paid except in service.

All Parmer County residents are invited to become members and see the hospital in operation as soon as possible.

PIE SUPPER HELD AT LAZBUDDY

The pie supper sponsored by the Lazbuddy Community Club was well attended, last Friday, and proceeds were realized sufficient to take care of the school lunch room.

The Friona High School band gave a concert preceding the program given by the directors of the Parmer County community hospital, wherein an effort was made to acquaint those present with the nature and plans of the hospital. A number of memberships were sold.

W. H. Flippin Jr., served as auctioneer. The Club president today extended Club thanks to all who cooperated.

ATKINS EXPECTED HERE

S-Sgt. Tom Atkins, recently liberated from a Japanese prison camp, is now in Clarksville, Tex., visiting his parents, and will arrive here around Nov. 14 for a visit with friends. Tom was employed locally before induction into the 200th. His sister, Sgt. Myrtle of the Wacs, is expected to accompany him here for a visit.

The average speed of propellers in use on today's commercial airplanes is between 1600 and 1850 revolutions per minute.

Much PW Labor Being Used In Parmer Co.

"We have more PW worker contracts on hand now than we have ever had before," County Agent Lee McElroy said today, when asked as to the amount of prisoner labor being used in this county.

Such men, from the Hereford internment camp, are being used by farmers to handle the feed crop harvest now in progress over the area. All the crops, McElroy reorted, are being bundled, since the growing season was so short that little

or no grain matured. Asked if there was sufficient labor forthcoming from Hereford to handle all requests, the agent said, "We haven't had one turned down yet."

Santa Fe System carloadings for week ending Nov. 3 were 25,622 compared with 27,634 for same week in 1944. Cars received from connections totaled 11,773 compared with 16,410 for same week in 1944. Total cars moved were 37,395 compared with 44,044 for same week in 1944. Santa Fe handled a total of 39,070 cars in the preceding week.

NOV. 21, 1945

AN IMPORTANT DATE FOR
THOUSANDS OF ARMY VETERANS
NOW IN CIVILIAN LIFE

Between now and November 21, thousands of Army veterans will reenlist in Uncle Sam's new volunteer peacetime Army. Because men who have been discharged between May 12 and November 1 of this year and reenlist on or before November 21 will be able to return to the Army with the same grade as they held when discharged.

Men with six months of satisfactory service discharged as privates will, on reenlistment before November 21, be given the grade of private first class.

Men now in the Army who apply for discharge after NOVEMBER 1 for the purpose of reenlisting in the Regular Army will also retain their present grades, if they enlist within 20 days after discharge and before FEBRUARY 1, 1946.

"BEST JOB IN THE WORLD"
These special privileges are typical of the new law recently passed by Congress. Few opportunities for a lifetime career offer as many attractive advantages.

Can you think of any other job that would give you good pay, your food, clothing, quarters, free medical and dental care, world-wide travel, 30 days furlough every year, education and training in any of nearly 200 skills or trades, and enable you to retire with a life income any time after 20 years' service?

There isn't any! That's why a job in the Regular Army has been called "The Best Job in the World."

HIGHLIGHTS OF THE NEW ENLISTMENT PROGRAM

- Enlistments for 1½, 2 or 3 years. (1-year enlistments permitted for men with 6 months' service.)
- Men reenlisting retain their present grades, if they reenlist within 20 days after discharge and before Feb. 1, 1946. The same applies to men discharged between May 12 and Nov. 1, 1945, who reenlist before Nov. 21, 1945.
- An increase in the reenlistment bonus to \$50 for each year of active service since the bonus was last paid, or since last entry into service.
- 20% extra pay when overseas.
- Paid furlough, up to 90 days, depending on length of service, with furlough travel paid to home and return, for men now in the Army who enlist.
- Mustering-out pay (based upon length of service) to all men who are discharged to reenlist.
- Option to retire at half pay for the rest of your life after 20 years' service—or three-quarters pay after 30 years. (Retirement income in grade of Master or First Sergeant up to \$155.25 per month for life.) All previous active federal military service counts toward retirement.
- Benefits of GI Bill of Rights.
- Family allowances for the term of enlistment for dependents of men who enlist or reenlist before July 1, 1946.
- Choice of branch of service and overseas theater in Air, Ground or Service Forces on 3-year enlistments.

PAY PER MONTH—ENLISTED MEN	Starting Base Pay Per Month	MONTHLY RETIREMENT INCOME AFTER:	
		20 Years' Service	30 Years' Service
In Addition to Food, Lodging, Clothes and Medical Care			
Master Sergeant or First Sergeant	\$138.00	\$89.70	\$155.25
Technical Sergeant	114.00	74.10	128.25
Staff Sergeant	96.00	62.40	108.00

Texico Teams Dropped In Softball Tourney

The Texico boys went out in the first round, and the local girls in the second round of play at the Curry county softball tournament for senior teams, held the past Saturday at Ranchvale.

Grady turned the tables on the boys in their first game, defeating them 10-3. Coach C. E. Sanders reported ruefully that "they just found our weak spots and took advantage of them."

Melrose went through the meet to take the boys' crown with Ranchvale in second. The Texico girls tripped

through their opener with the Melrose team to win 12-4, but were unable to handle an unbeaten Ranchvale team, and went out of competition, 13-5.

Coach Tom Hudson reported that his girls led Ranchvale for the first two innings, and then slipped behind. Grady and Ranchvale met in the girls' finale, with Ranchvale emerging on top.

MIDWAY CARNIVAL IS BIG SUCCESS

The carnival held at Midway school Nov. 2nd, sponsored by the PTA, was well attended, and Miss Jackie Mae Lawler was crowned carnival queen, with Misses Rose Warren, Joy

McDonald and Margaret Jesko as attendants.

Booths were many and varied. The adult grand prize for bingo went to Jimmie Lorraine and the junior prize was won by Arnold Longman. Proceeds from the carnival totaled \$257.30.

The sponsors extend thanks to merchants and others who assisted in promoting the affair successfully.

RUNDELL ENTERED IN PORK PRODUCTION

Murrel Rundell, of the Oklahoma Lane 4-H club, has been entered as the Parmer county representative in the state-wide pork production contest, Agent Lee McElroy reported the first of the week.

Last year, in a contest sponsored by the Portland Cement Company, Rundell was rated first in bidistrict competition, and third in state. Entries in the contest received cement from the sponsors, to be used in making hog lot improvements, the agent explained.

To further carry out the program, a state-wide contest was set up this year to determine the most economical gain on feeding out six pigs, via the use of improvements made last year, and Rundell's records have been entered for consideration.

Three state ratings will be given, with \$75 war bond to the top man; \$50 to the second; and \$25 to the third-rated contestant. Announcement of the winners will not be made until January.

COAL PORK—These pigs eat bituminous coal and like it. Farmer Byron Somers, Canton, Ill., who feeds the porkers, says they like coal for its mineral content. Other farmers in Illinois area buy coal especially for pigs and keep it scattered about the pens.

The ATOMIC BOMB Is Now A Serious Home Problem

By CABELL PHILLIPS
(New York Times)

IN ONE of the most thoughtfully worded and profoundly urgent messages he has yet composed, President Truman asked Congress early in October to build a foundation of legal authority for the protection and the promotion of our researches into the production of atomic energy.

The discovery of the means of releasing atomic energy, he said, "began a new idea in the history of civilization," and he added:

"Never in history has society been confronted with a power so full of potential danger and at the same time so full of promise for the future of man and for the peace of the world. I think I express the faith of the American people when I say that we can use the knowledge we have won, not for the devastation of war, but for the future welfare of humanity."

The President asked Congress to attack without delay the primary problem of domestic policy in the whole field of nuclear physics. The secondary problem of what to do about it in the international field, he said, would have to be tackled later.

The President did not accompany his message with a concrete proposal for legislation. However, from other sources responsible leaders in both the House and Senate received copies of a twenty-one-page draft which presented in detailed form the broad outlines of policy which the President's message suggested. It was apparent that many weeks of careful work had gone into its preparation.

Atomic Energy Commission

Basically the bill provides for the creation of an atomic energy commission with broad powers over the entire field of nuclear physics and over the extraction and processing of pertinent raw materials. The objectives set forth for the commission are "the promotion of the national welfare, securing the national defense, safe-guarding world

peace and the acquisition of further knowledge concerning atomic energy."

All of the assets of the Manhattan engineer district, which means the huge plants and facilities at Oak Ridge, Tenn.; Pasco, Wash., and elsewhere, as well as all the files, documents, and other possessions relating to the great experiment, would be turned over to the new commission. It would continue the work which is still going on, but shift most of the emphasis to mastering atomic energy for peaceful pursuits.

As the President was careful to point out in his message, this proposed broad grant of authority for the atomic energy commission would be used with the interests of private enterprise in mind, while retaining firm control. The government, nevertheless, would be expected to encourage independent research in university laboratories, for example, and even in industry for the commercial application of the new energy source. The government would reserve the right, however, of free and complete access to all such activities, and to call a halt thereto when it felt the public interest to be threatened.

Unique Task

Congress, therefore, has set out with anxiety and even foreboding on a task unique in the parliamentary history of the world, an attempt to control the well-nigh uncontrollable, atomic energy and the atomic bomb.

And on this point Maj. Gen. Leslie R. Groves, who was the Army's administrative head for all the work that at length produced the atomic bomb, told

a question of a superior American scientific brain, he said. It was in large part the superiority of American industry, management and labor.

It was these factors to which more than all others he attributed the present American pre-eminence and a fair prospect that this country would remain ahead, at least to a degree.

At least, he hazarded, it would take the "most powerful of countries" from

military-commerce sub-committee hearing on behalf of the Association of Oak Ridge Scientists. The hearings were on a proposed national science foundation to explore the atom and other scientific developments.

Curtis predicted that the scientists' suggestions for international control might be scoffed at as visionary.

"In reply," he said, "I will simply state that the possibility of developing atomic energy was also so labeled a scant six years ago, and yet today it is a reality."

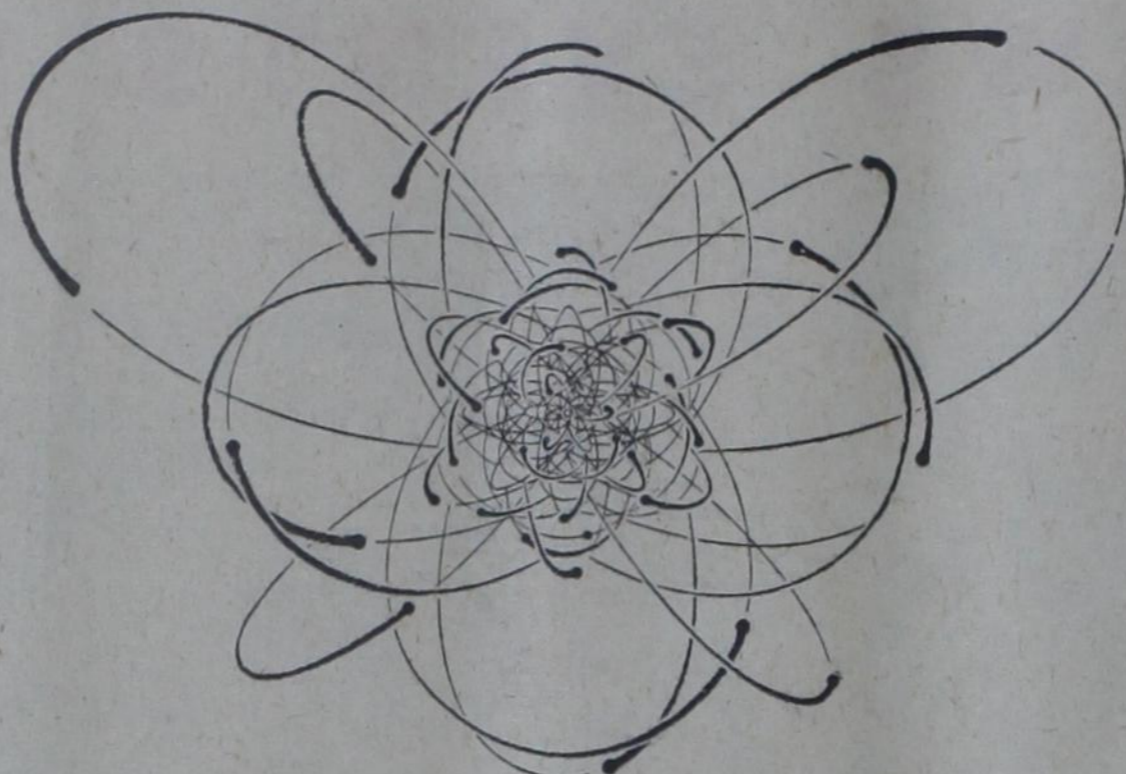

"We can see no reason why a similar miracle cannot be achieved in international relations."

"We regret that the atomic age began, of necessity, with hideous destruction," Dr. Curtis said. "Our only consolation is that it helped to achieve a peace which must now be maintained."

President Truman talked at the White House with legislative leaders about the future use and control of atomic energy.

He has spoken of retaining in America the industrial know-how of making a bomb. But Curtis said it is impossible to distinguish between the purely scientific facts and the industrial processes.

Two scientists who helped harness atomic energy denounced administration bills for its control as an invitation to the world to get into an atomic bomb race.

ATOM PORTRAIT of an element of the uranium family. The outer orbits of electrons are easily penetrated, but atomic power can be tapped only by smashing the inner core of uranium with projectiles such as neutrons.

five to twenty years to "catch up," and in the meantime, in both the aspects of offense and defense, this country would not have been idle.

Dr. H. J. Curtis, one of the men who helped make the atom bomb, called for a miracle in international relations to prevent a war too horrible to contemplate. He said the impelling motives for a miraculous improvement in diplomacy should be just as strong as those which moved us to create the atomic bomb.

For International Control

Dr. Curtis testified at a joint Senate

JAPAN in COLLAPSE, Says MacArthur

By HUGH BAILLIE

(World Copyright, 1945, by United Press)

JAPAN will never again become a world power, Gen. Douglas MacArthur said at Tokyo recently in an interview with the United Press.

"Japan industrially, commercially, militarily and every other way is in a state of complete collapse," MacArthur declared. "Her food supplies are scarce and she faces conditions in this emergency that may well become catastrophic. Her punishment for her sins, is just beginning, will be long and bitter." The supreme commander told me that war criminals will face trials. Japan's army has been absolutely abolished. The remnants of Japan's navy are doomed to destruction except "minor specimens which may be retainable for scientific or museum purposes."

The Japanese are not being treated brutally but the surrender terms, no matter how harsh, are being rigidly enforced, MacArthur emphasized. Furthermore, he said, Japan can expect no relief, no food, clothing, or supplies from the Allied powers this winter.

MacArthur pointed out complete execution of the terms imposed by the Allies is expected to take many years.

The man who pursued the Japanese from Australia to Tokyo, plans to remain personally on the scene enforcing, directing, and administering Allied rule over the Japanese.

Jap War Machine Will Be Destroyed

All Japanese munitions and all munition plants which survived the war will be destroyed, MacArthur said. Japan will be kept on an austerity basis regarding sports, entertainment and luxuries.

Reiterating that he has no political aspirations, MacArthur said he started as a soldier and intends to finish as one.

"I'm on my last public assignment, which when concluded will mark the definite end of my service," he said.

MacArthur received me in his new headquarters in Tokyo. His paneled office is in one of the few large buildings which survived the bombings. Oil

paintings hang on the walls. From the room where a Japanese insurance magnate once operated, the general directs operations throughout the Japanese Empire and the regions which Japan once seized.

The general is keen, magnetic, decisive and intolerant of delays or inefficiencies. He radiates energy and driving force.

My own observations are certainly in accord with his estimate of Japan's condition as far as visible evidences are concerned.

The nation's cities and industries are pulverized and paralyzed. Lacking outside assistance, recovery will be ex-

The dominant feeling among the masses appears to be relief that the war has ended before all were killed, but death will stalk the land this winter for lack of food and shelter.

With her cities, factories, navy and air force mostly gone, Japan's only weapon at the finish consisted of a big, formidable army which was prepared to fight American landings to the death—Okinawa style. But this is the very army which laid down its arms in droves.

MacArthur told me how 150,000 American troops went ashore without loss of a single life.

MacArthur said this bloodless occupation of Japan was impossible without retention of the Emperor for surrender purposes and he declared that maintenance of the Emperor during the disarmament proceeding had resulted in an "untold saving of American lives, money and time."

Denies Various Reports

During the interview MacArthur vigorously battled down various reports regarding the occupation such as that the Japanese were hiding arms, that Japanese soldiers were sneaking into the gendarmerie, that the Japanese fail to realize they are thoroughly licked or that the Americans have not yet come into actual possession of surrendered Japanese arms and ammunition.

He revealed that the Japanese military and secret police were being abolished, that no permanent Japanese army for policing purposes will be maintained, that nothing will be done regarding the employment of 3,000,000 Japanese soldiers who must exist or die as members of a civilian population which is already without houses, under-fed, and heavily unemployed.

My first question: "In the occupation of Japan are the terms of the Potsdam declaration being enforced to the letter?"

"Absolutely, yes," was his answer. "There seems to be an impression in the United States that you are going to tolerate the existence of a standing army of Japanese who will do most of the policing of Japan," I said. "Would you care to comment on this?"

This query evoked an emphatic reply.

"There is no fabric of truth in this statement," MacArthur said. "The Japanese army has been completely demobilized and absolutely abolished."

RADAR HELPED to Speed Victory

By KERMIT McFARLAND

Scripture-Howard Staff Writer

RADAR has made the human eye old-fashioned.

Without it, victory in the war with Germany would have been long delayed, perhaps even lost.

With it, the assault against Japan was immeasurably speeded up.

Without it, the imminent development of commercial aviation might have been permanently curtailed.

With it, the world soon will be able to overcome its most persistent handicap—the weather.

Today, for the first time, the Combined Chiefs of Staff, United States and Great Britain, removed the basic restrictions which have kept the lid on the story of radar, magic eye of the war.

The existence of radar has been known to the public but most of its achievements have been kept secret. Some of them still are secret.

Radar Helped Beat Huns

But, on the initiative of Admiral William D. Leahy, chief of Staff to President Truman and a member of the Combined Chiefs of Staff, the U. S. and Britain decided to let the public in on the wonders of the new electronic science.

Here are some of the things radar accomplished in the war against Germany:

It helped the British air force beat back the Nazi bombers in 1940 and 1941. Early sets developed by the British enabled the RAF to intercept and shoot down many of the German raiders before they reached their targets in London. The warnings made possible by radar reduced the need for constant air patrols and permitted the RAF to make maximum use of its numerically inferior force.

Although the Germans themselves had developed radar to a high degree, for some reason they did not adopt evasive tactics to escape advance detection by the British and did not concentrate air raids on the British radar stations, which were easy targets because of their high antennae.

Atlantic Battle Won

Radar was the chief medium by which the Allies won the Battle of the Atlantic.

Heavy aircraft, equipped with radar, hunted down and sank the German U-boats which had plagued United Nations sea lanes. In May, June and July of 1943 alone, nearly a hundred Nazi submarines were spotted on radar scopes in Allied planes and destroyed.

This description came from Dr. Harold Urey of Chicago and Dr. H. J. Curtis of Oak Ridge, Tenn., who objected at a news conference to secrecy regulations proposed for an atomic energy commission.

The two scientists got backing from others who worked with them, but their position varied widely from that of Dr. J. Robert Oppenheimer, former California physicist, who also worked on the bomb. Oppenheimer told the House military committee he favored the general provisions of the administration bill to set up a government commission which would direct both development and control of nuclear energy. He asked for confidence in the government.

The scientists' statements were made while Gen. H. H. Arnold was telling another committee that the next time an atomic bomb is used it probably will be in a winged, guided missile launched from aircraft far out of the reach of defenses.

Those were the high lights of discussion which stirred atomic energy talk at the White House, on the floor of the Senate and in committee rooms all over the Capitol.

ATOMIC BOMB TO BE TRIED ON FLEET OF SEIZED SHIPS

Two experiments with atomic bombs which may determine the future of the navies of the world are being worked out by naval officers in the Pacific.

The first will be designed to show the effect of the atomic bomb on a large fleet of surface craft, ranging from battleships to small landing vessels. The ships for this experiment will be taken from the Japanese and German fleets.

The second is expected to show what happens when atomic force is used in deep water as a depth charge.

This is the experiment which naval officers and scientists will watch with the greater interest because as yet they have no data on the consequences of releasing such incalculable energy on water.

The Nazis soon installed a device to detect the radio impulses which enabled radar to locate a surfaced submarine. But the Allies countered with a new "micro-wave" which made this detection device useless. The Germans then developed the Schnorkel, a tube which enabled submarines to recharge their batteries and provide ventilation while submerged. By this time, however, the Allies had the Nazis virtually whipped on the continent.

Devised originally as a defensive weapon, Allied scientists meanwhile switched to the use of radar in offensive action.

It became an indispensable around-the-clock bombing and to aerial navigation.

Used on D-Day

Radar-guided planes were used to level Nazi coastal defenses preliminary to the invasion of Normandy on D-Day. Radar enabled heavy bombers to find

FLYING FORTRESS of RAF Coastal Command has radar devices extending from nose and under wings; these planes sought surfaced subs and convoy stragglers. Below, radar-controlled searchlight helped AA gunners locate Nazi bombers and flying bombs over England.

and destroy German war plants, transportation hubs, supply depots and airfields, regardless of heavily overcast skies.

Because of radar, the Germans got no rest, day or night, in good weather or bad, from the deadly assaults of Allied planes. Without radar, the Allies couldn't have beaten the Germans to the punch. For it was the relentlessness of the Allied pounding which whipped the Nazis before they could get their new weapons developed and into full-scale production.

Radar took some of the "sting" out of the German V-2 pilotless bombs. With the far-seeing eye of radar, the Allies spotted these bombs as they left their launching ramps on the continent and fighter planes blasted many of them from the skies before they could reach their targets.

Radar also was used to aim anti-aircraft fire at these bombs.

Radar Guides Bombers

In the last 18 months of the German (Continued on Page 4, column 5)

PART OF \$250,000,000 TREASURE recently found by U. S. searchers in the Tokyo Imperial Mint, these ingots of gold and silver are checked by Col. R. C. Kramer (second from left) of MacArthur's GHQ and Maj. Gen. Chase (third from left), commander of the 1st Cavalry Division. Other millions of treasure that Japan looted from conquered countries has been found in hideouts in and around Tokyo. (U. S. Army Signal Corps Radiophoto. International Soundphoto.)

tremely difficult. Vast areas, many square miles of which were once teeming business districts and extensive residence areas, are now hideous ruins and seemingly endless jungles of weeds and rubble.

Masses Appear Stupefied

The masses of people appear stupefied by this devastation and defeat which has been visited upon them, although some leaders obviously are attempting the first steps toward reconstruction and rehabilitation. But anything they do seems almost futile in face of the massive job confronting them.

CURRENT COMMENT

By STAFF EDITOR.

Road to Reconversion Needs Assistance of All in Nation

THE road to conversion can be as bumpy as the war path. What can you do to help smooth it? Here's the answer, given by government officials:

First, keep doing some of the things you have been doing.

Keep on buying war bonds. There still is more money than goods.

War bonds not only are a good investment, but every \$18.75 taken out of circulation, is an \$18.75 sock at inflation. Inflation (which means that everything you buy costs more than it's worth) is the villain that often precedes a depression.

If your areas still are conducting salvage campaigns, pitch in and do your share.

During the war you were urged to go into special lines of work. These were bottleneck industries which could toss a monkey wrench into the entire war machine if they failed to produce. Reconversion has bottlenecks, too.

Each can do a little bit. A little bit multiplied by 130,000,000 is a whale of a lot on the long road back.

U. S. to Destroy German Munition Plants

I. G. Farben munition plants in the American occupation zone have been ordered blown up as part of the Allied program to smash Germany's war-making potential, military government authorities announced.

The Americans also designated additional industrial plants in their zone, including a Bremen shipyard, as available for disposal by the Allies in part payment of Germany's reparations.

Twenty-one plants in the American zone so far have been made available for reparations. Several more important installations will be added to the list.

The plants eventually will be dismantled and shipped out of Germany to designated Allied powers.

Gen. Dwight D. Eisenhower reported that the Army has seized forty-five

Farben plants, twenty-five of its sales offices and four miscellaneous installations.

Jap Black Marts to Be Wiped Out

Gen. Douglas MacArthur clamped down on black market profiteers with an order forbidding American service men and civilians alike to send abroad any funds except "legitimate pay allowances."

A black market has sprung up in Tokyo on American food, candy, blankets and other scarce items obtained from American soldiers. When similar markets operated in Europe, American soldiers for a time sent back to the United States more money than they earned.

MacArthur's order provided that an American wishing to exchange Japanese yen for United States money orders, other securities or any negotiable source of American currency must submit a certificate signed by a responsible personnel officer.

The certificate must state that the issuing officer "has personal knowledge that the funds . . . were obtained as payment allowances from a finance officer of the U. S. Army and not from black market operations, sale of property or other illicit source."

Argentine Upheaval

Damonte Taborda, former chairman of the Argentine "Dies Committee," charged that the political upheaval in Argentina resulted from Nazi plotting to regain military supremacy and world power.

Taborda head of the Argentine Congressional Committee investigating subversive activity, arrived in Rio De Janeiro October 6. He is editor of the Buenos Aires afternoon newspaper

Critica, opponent of the Peron regime.

At a press conference Taborda said the Argentine conflict was not internal but a part of a struggle by Nazi forces to regain their lost power.

He said it was "indicated" that German submarines arrived on the Argentine coast and others may have been sunk by their crews. He said the submarines "undoubtedly" brought Nazi

The Bank of Japan, in which Emperor Hirohito's family holds a quarter ownership, is closed. Twenty-one government-controlled financial institutions has been seized on orders of Gen. Douglas MacArthur.

The action not only will inventory Japanese war booty. It also will throw light on how the Japanese were able to finance a world war. It will lay bare, too, the system through which the Emperor and the richest families of Japan virtually boss the affairs of the once war-like country.

Meanwhile, Gen. MacArthur has ripped the veil of mystery off the Emperor by stripping the Jap government of its power of censorship of the Japanese press, radio, and other sources of information.

Japanese papers printed stories of Hirohito's visit to Gen. MacArthur. Tokyo ordered them to suspend publication. Gen. MacArthur cracked the whip on Tokyo—and told the papers to print what they pleased about Hirohito, under U. S. censorship.

Government control of the Japanese press has been the main instrument for building up a "super-man" atmosphere about the Emperor. In effect MacArthur's order will permit the Japanese to learn that their Hirohito is a man, not a god.

sions in Korea, and the 86th in the Philippines.

As the troops are sent home, Gen. MacArthur said, the low-point men will be screened out to remain with the occupation forces, replacing high-point men from the units in the field.

Synthetic Rubber Replaces Natural

Will your tires of tomorrow be made of synthetic or natural rubber? That question is being debated by rubber experts throughout the country. Before the war synthetic rubber was in the test-tube stage. Today it has met war-time demands and it's getting better all the time.

Rubber comes from the East Indies, mostly. Although the war is over, it will be some time before the plantations will produce natural rubber to supply the world again. However, synthetic plants in the United States are producing rubber in greater quantities than were used before the war.

Motorists may soon be able to replace their worn-out tires with new ones—synthetic ones. An end of tire rationing is forecast soon. In the rubber industry center, in Akron, Ohio, factories have gone back to peace-time production already.

Herbert E. Smith, president of a large rubber company, predicts competition—synthetic versus natural rubber. The prize is a market totaling 800,000 long tons a year. He said that the world will use 50 per cent more rubber than it did before the war.

Submarine Losses

Fifty-two submarines of Uncle Sam's fleet of more than 200 were lost during the war, the Navy reported in announcing that all losses have now been made public. Forty-three of the subs failed to return from war patrols, four were known sunk, two were destroyed to prevent capture, and three old-type vessels were stricken from the Navy list due to loss or damage.

Returning Art Treasures Stolen by Germans

The Allies have a \$2,000,000,000 headache in Germany in the form of stolen art treasures. Officials in charge of the huge project have one main aim—to get the art objects back to their proper owners in good condition.

In charge of the American end of the job is an organization with a big name—American Commission for the Protection and Salvage of Artistic and Historic Monuments in War Areas. The commission's name completely states its purpose.

Art treasures were found hidden in odd places throughout Germany. Salvage missions took army art officials through castles, banks, brickyards, schools, choir lofts, tunnels, salt mines and caves.

Refinery Produces Low-Cost Alcohol Out of Petroleum

Development of a huge plant for producing alcohol from petroleum, which now is pouring out 20,000,000 gallons a year and is due for expansion, was described by M. W. Boyer, general manager of the 1,100-acre Baton Rouge, La., refinery of the Standard Oil Company of New Jersey.

This tremendous flow of industrial alcohol, which can now be sold profitably at 26c or 27c a gallon as against the 70c to 90c price the government has been paying for grain alcohol, has played a part in brightening the industry outlook in the South.

Boyer reported his plant was operating at full capacity and said his company had ideas for pushing it still further.

As Usual, He's Elected

politicians, technicians and even possibly Adolf Hitler.

Big Japanese Banks Held By Americans

Japan is going to have to give up the untold billions in wealth it stole from lands it conquered in its try for world domination.

Stage Ready for War Trials

The first international criminal court of its kind ever established will convene in Nuernberg, Germany, November 20 for a trial that its sponsors believe will go a long way toward ending aggressive warfare.

Twenty-three of the men who led Germany into and through the European war already have been served with indictments charging them with unprecedented crimes against peace and humanity in the Reich's bid for world conquest.

Through exemplary punishment of the guilty, sponsors of the four-power tribunal trying the defendants hope to make war-making so hazardous and unattractive that future leaders will hesitate long before opening hostilities.

The 23 defendants—24 if former Nazi party chieftain Martin Bormann can be found—will be tried together rather than individually. In this respect, the trial will follow the pattern set by the British trial of 45 concentration camp guards at Luenberg.

Radar Guns the Answer to Atomic Bomb Threat

Radar, a scientific miracle itself, may be the answer to the question of how to control the atomic bomb, the most terrible engine of destruction ever devised by man.

The United States Navy announces perfection of a radar gun able to destroy any hostile bomber approaching within 50,000 feet—more than nine miles—of a warship. Such a gun may protect future fleets from atomic bombs and may be developed into an equally effective defense for land areas that might be targets for enemy attack in the future.

Radar, the instrument that uses radio waves to detect an approaching airplane or ship in time of war, is made to set the range and fire the radar gun, so that an enemy bomber would be blasted out of the skies long before it could reach its objective.

Occupation Forces Figured at 400,000

Four hundred thousand men are to make up the United States Army of occupation in Japan. By the end of March 1,250,000 soldiers will have returned home from the Pacific.

Under a program announced by Gen. MacArthur, the divisions in the Pacific will be located, by January 1, as follows:

On Japan—11 divisions: The 11th Airborne, 1st Cavalry, 77th, 81st, 25th 97th, 32nd, 41st, 24th, 98th, and 33rd. In Korea—the 7th, 40th, and 6th. In the Philippines—the 93rd, 96th, and 86th.

The divisions which will finally remain as occupation troops are the 11th Airborne, 24th, 25th, and 1st Cavalry on Japan the 7th and 8th Divi-

Grass Root Reveries

By JOE GANDY

(Copyright, 1945, by the Southwest Magazine Co.)

I LOVE November more than any fall month—love its cool crispy days and its Thanksgiving. If there ever were a time to be thankful this is the time. God gave us victory, and now that the war is over, let us turn to thoughts of peace and reconversion, to jobs for returning soldiers and to taking care of disabled veterans.

Another foremost thing for which to be thankful is that the war ended a year sooner than expected. Our casualty list is slightly over 1,000,000, yet it could have been 2,000,000 had Japan fought on with its army of 4,000,000 trained soldiers. Therefore, our hearts should overflow with thankfulness this Thanksgiving time.

Maryland still has the whipping post for law violators, a law passed 64 years ago. Recently the sheriff of Marlboro, Maryland, administered 10 lashes on the bare back of a 200-pound man for beating his 98-pound wife. This was a punishment that certainly fitted the crime. In colonial times many States legalized the whipping post and I should like to see this old law revived in America, not only for wife-beaters but for teen-age boys who violate laws with contempt and impunity. I can remember when pas and mas used hickory switches after moral persuasion had failed. And, incidentally, some pretty good citizens have been raised via hickory switches.

"If he doesn't stop this reckless spending will some day be wearing patches on the seat of his pants."

House legislation chopped government spending by 52 billion dollars recently. Now we will begin to get somewhere if the Senate approves the cut. Far too long has the government been on a spending spree. It is high time to sober up and get down to business. Uncle Sam has been called a rich uncle, and once upon a time he was rich, but now he is \$300,000,000,000 in the red and if he doesn't stop this reckless spending will some day be wearing patches on the seat of his pants.

Disillusioned Japanese, tasing the bitter dregs of defeat, will see the guns, tanks, and other war materials with which they hoped to conquer the world melted down for use in the manufacture of peace-time goods. Col. R. J. Ballard, chief of the Eighth Army's economic section, told Nipponese authorities in Tokyo. It will take time to get out of the heads of the Japanese that they are mighty warriors destined to conquer the world. But MacArthur will do it if let alone—he will take the ego out of the Japs and all this silly stuff about being a superior race. The only thing I see superior in the Jap race are bullying, swindling, lying and stealing.

Total war casualties for the United States are 1,070,524, as reported to date, but the home-front accident toll reached 36,355,000 during the war, the National Safety Council points out. That's a huge home casualty list com-

pared to the war casualty list. It is estimated that about half of the home-front accidents were caused by carelessness. What can we do to cure carelessness? Warnings seem to do little good. Nor does teaching and preaching. Maybe we should enact and enforce drastic laws against carelessness.

The atomic bomb is turning out to be a Frankenstein monster to the United States. What to do with it is a problem that I hope and believe we shall be able to solve. It's loaded with enough explosive power to wipe out every living thing on earth. For this reason, because it is so powerful and devastating, nations may be afraid to use it against nations lest they all be destroyed. In that case, it might be the means of bringing about everlasting peace.

Atomic energy, we are told, may eventually control the weather. That would be calamitous. If we ever know what kind of weather we are to have, life will be monotonous. Much of our conversation is about weather. If hot we want it cold; if cold we want it hot; if dry we want it wet; if wet we want it dry. In my neck of the woods we speculate more about the weather than anything else and now, since the war is over, we have nothing to talk about except weather and crops.

"Passing Day" columnist in the Baylor County Banner, Seymour, Texas, says the most bankrupt man in the world is one who has lost his enthusiasm. Quite true. Enthusiasm keeps us young as we grow old, it makes us good companions, it makes us friends, it makes us keep faith with ourselves and our Creator, it enables us to conquer the unconquerable, it licks poverty and privation, it overcomes failure and wins success.

TEXAS BRIEF NEWS --- from Over the State

SON RENEWS 1877 BRAND

In 1877 S. G. S. Thomas registered his brand, Bar-Over-T on left hip, in Brown county. In 1945 his son, W. L. Thomas, of Brownwood, renewed the brand which has been used by the family for 68 years.

89TH BIRTHDAY, 65TH ANNIVERSARY

On his 89th birthday recently, Roann Clark and Mrs. Clark celebrated his birthday and their 65th wedding anniversary at their home on East Waco Ave., in Cooper, Delta county.

CITY BACKS ITS HIGH SCHOOL

Duty No. 1 of the newly organized Hillsboro Booster Club is to obtain transportation for its citizens to out-of-town football games played by the Hillsboro high school team. Practically the entire citizenship lined up to support the team.

1832 HALF DOLLAR STILL GOOD

C. F. Hopson, of Madisonville, Madison county, counted up his day's receipts and found a peculiar looking half dollar. Slightly larger than the modern coins, the half dollar, made in 1832 and now in its 113th year, had a smooth edge with letters around the edge reading: "United States Half Dollar." It rang true, was genuine.

PALOMINO ASSOCIATION GROWS

When George D. Barber became associated with the Palomino Horse Breeders' Association three and a half years ago as editor and business manager of "Palomino Horses," a monthly magazine, and "Palomino Progress," year book and registry, there were 167 members and 499 horses registered. Now there are more than 2,000 members and more than 5,000 Palomino horses registered in the association. Mr. Barber has resigned to go into other business.

PASSED UNHARMED UNDER MOVING TRAIN

Eighteen-month-old Larry Head, clad in his three-cornered pants, was sitting in the center of the Santa Fe track near his home between Bay City and Sealy, Austin county, when the engineer of a Santa Fe train first saw him. Horrified, the engineer slammed on the brakes. He and his fireman, Eldridge, ran back, found the child uninjured lying in the center of the tracks several cars back. They returned the baby to his mother, Mrs. W. W. Head.

TEXAS RED WOLF RETURNS

Texas was once the native habitat of the Texas red wolf. Spreading out over most of the State, he was found on the Edwards Plateau, in parts of East Texas, and even in Arkansas. When ranchmen set out to destroy all wolves and coyotes in the 1890's the red wolf, along with others, practically disappeared. Ranchmen in the Big Bend country report the return of the red wolf. It is assumed he has crossed the Rio Grande and come up from Mexico where his species has kept alive for the last half century.

CO-ED PITCHES TENT ON CAMPUS

Pretty Donna Mae Newton, of Marshall, Texas, high school graduate, arrived at North Texas State College at Denton to find she was one of 1,204 applicants who could not be accommodated with rooms in campus dormitories. With no place to stay, she borrowed a Boy Scout pup tent, pitched it on the campus and moved in with toothbrush, washcloth, towel, pillow, suitcase and newly issued books. A picture of Miss Newton and her tent appeared on the front page of a Denton newspaper, and in short time a room was found for her.

THIS WHALE WAS LOST

A live whale 12 feet, 10 inches long, was found in shallow water near Saint Joseph's Island near Rockport, Aransas county, by Clyde Townsend who manages a ranch on the island, owned by Sid Richardson, Fort Worth oil man. Mr. Townsend beached the whale which was identified as a "Globicephala Ventriososa." This whale was about two years old and may have been lost, because these whales usually migrate in large schools from Greenland and the coast of Norway to the Cape of Good Hope and from Japan south to New Zealand and east to Peru, but seldom show up in the Gulf of Mexico.

ONLY ONE ITALY IN U. S.

In the entire United States there is only one town listed by the name of Italy. This town, in Ellis county, Texas, was founded 69 years ago but for 45 years the town never had a single Italian citizen. Then, an American of Italian descent, Leonard Rizerie, moved to Italy from Philadelphia. After living in Italy a quarter of a century, Mr. Rizerie sold out and will return to Philadelphia where his parents settled immediately after the Civil War. In Italy he operated a tailor and dry cleaning shop. Two of his sons fought in the Pacific and a daughter also is engaged in war work.

PROTECTION OF DEER ENDS

For the first time in 10 years, deer hunting will be legal in the Breckenridge area—Stephens, Throckmorton, Palo Pinto and near-by counties—November 16 through December 31. For 10 years there was no open season in this section to permit the deer to restock the country.

"LITTLE AUDIE" BUYS CIVVIES

First Lt. Audie L. Murphy, holder of the Congressional Medal of Honor and all other American medals for valor, of Farmersville, Collin county, Texas, showed up in Hollywood in civilian clothes. He was the guest of Actor James Cagney who is interested in making a movie of Murphy's life and heroic Army career. "Little Audie," as his friends call him, wore civilian clothes for the first time since he joined the Army. He had just completed his terminal leave.

FARMER MANUFACTURES BOLL PULLERS

W. M. Rake, a Wilbarger county farmer, exhibited his first cotton boll pulling machine on the streets of Vernon recently. Mr. Rake has ten of the machines under construction and all have been sold. The harvester, used after the leaves have fallen, takes two rows at a time, is pulled by a tractor. Two men are needed to operate the machine.

"BUYING A TEXAS FARM"

War veterans and others who expect to buy land in the near future will find a new bulletin issued by Texas A. & M. College Extension Service of interest. Title of the bulletin is "Buying a Texas Farm." It was written by Joe Matthews, Extension assistant in agricultural planning, and Dr. H. E. Hampton, associate professor of agronomy of the college. The bulletin deals with farm land values in the Southwest, tips on location and what to look for in selection of a farm or ranch. Copies may be obtained from Extension agents or by writing the Extension headquarters at the college.

400-YEAR-OLD BOOK EXHIBITED

Four hundred years ago Johannes Spangenberg of Nordhausen, Germany, wrote his book dedicated to "Young Christians, boys and girls." The book, a "Postilla," was in the form of questions and answers on Epistles and Gospel lessons for every Sunday and church holiday and included the Ten Commandments and the Lord's Prayer. This book, written in the time of Martin Luther in the German language, was not printed until 1584 and then in sections, one part at Nuremberg and another part at Frankfurt on the Main. The book, well preserved, is bound in leather and printed on fine parchment. It was exhibited by Joe Ed Bostwick of Waco in the First National Bank of Giddings, Lee county, where he was making some improvements on the building occupied by the bank. Mr. Bostwick's grandmother brought the book from Germany in 1840.

60 YEARS IN CORYELL COUNTY

Mr. and Mrs. H. J. Franks were never much hands at moving around the country. Sixty years ago they married in the Mountain community of Coryell county and there they stayed. They celebrated their 60th wedding anniversary in Raby Park at Gatesville recently.

WOMAN, 102, SPENDS BUSY YEAR

Mrs. Mary Elmore Stansell celebrated her 102nd birthday in September at the home of her granddaughter, Mrs. Maude Belvin who lives 17 miles southeast of Hamilton, Hamilton county. Mrs. Stansell's hobby is piecing quilts and she had several beautiful ones to show for her 101st year. Born in Franklin county, Alabama, she has four living children.

A. & M. COLLEGE VETERAN EDITOR RETIRES

After a quarter of a century of service, A. D. Jackson, editor of Texas A. & M. College Experiment Station publications, resigned October 11. He was 70 years of age. In 1903, while editor of The Mineola Monitor, in Wood county, he sponsored a young school teacher, Prof. B. Youngblood, in an effort to teach practical agriculture in the local school. Jackson furnished the land, 20 acres, and this project became the first successful agricultural experimental teaching in secondary schools in the Southwest. This led to the eventual establishment of the Extension Service of A. & M. and later to the establishment of the modern 4-H clubs.

VETERAN EDUCATOR DIES

Dr. Annie Webb Blanton who died recently at the age of 75 was the first woman to be elected president of the Texas State Teachers' Association. She was a former State Superintendent of Public Instruction. For the past 22 years she was professor of education administration at the University of Texas.

BALD EAGLE SHOT IN EAST TEXAS

A bald eagle, one of the first seen in Rusk county in many years, was shot by Alma Stroud, an oil man, while out hunting recently. The eagle had a wing spread of five feet, four and one-half inches. Near the spot where the eagle was shot, Mr. Stroud found a newly killed goose.

47,463 VISIT McDONALD OBSERVATORY

Since the University of Texas McDonald Observatory opened in 1939, in the Davis mountains of West Texas, near Fort Davis, exactly 47,463 persons have visited the institution. Chief attraction is the magnificent 82-inch telescope. The observatory holds open house on the fourth Wednesday in each month, from 8 to 10 p. m. Visitors will be limited to 200 each open house. Admission may be obtained by writing to Dr. Otto Struve at the Observatory, Fort Davis, with self-addressed stamped envelope.

LONG MAY IT WAVE—A guard of honor salutes torn and tattered American flag that flew over Hickman Field, Honolulu, when Japs attacked December 7, 1941. Now it is raised over Irumagawa Airfield near Tokyo, headquarters for 5th Air Force.

20,000 BLOSSOMS BY PLANE

Three times weekly flowers arrive in Dallas by plane for redistribution to the North and East. They come from California, usually 20,000 flowers at a time. No refrigeration is needed since the plane throughout the trip flies at an altitude of 10,000 feet where the temperature is low enough to keep the flowers in good condition.

OLD TRAIL DRIVERS ELECT

Thirtieth annual reunion of the Old Trail Drivers' Association of Texas adjourned in San Antonio after a two-day session when new officers were elected. Richard (Uncle Dick) DeBardeleben, of Tilden, McMullen county, was elected president to succeed A. W. Billingsley, of San Antonio, who has served four terms. Other officers elected included John Doak, of Del Rio, Val Verde county, vice president; W. B. Palmer, San Antonio, re-elected secretary-treasurer, and Bruce Roberts, Uvalde, Uvalde county, re-elected chaplain.

THEFT OF AIRPLANE CHARGED

Theft of an airplane was charged against a Dallas man recently after a plane, left at Victory Airport, disappeared. The owner left the plane to be converted for use as a cotton duster.

60 YEARS IN JONES COUNTY

C. Spurling, of Anson, Jones county, celebrated his 90th birthday this fall and recalled that at the age of 30 when he settled in the county, it was open range country. He came from Rush county, Indiana, 60 years ago with his wife, Ellen Booth Spurling, who also was born in Indiana.

PRAIRIE FIRE SWEEPS RANCH

Fifteen sections of the famous Swenson Ranch in east Haskell and west Throckmorton counties were swept by prairie fire recently. Farmers fought the blaze until fire departments from both Haskell and Throckmorton arrived. Burned area extended from the Haskell-Throckmorton highway north to Swenson's West Camp and east for several miles.

HORSEMEN ROPES YOUNG COYOTE

Old-time cowhands will have to look to their laurels. Dale Low, manager of the Miami Motor Co., was riding in his pasture in Roberts county when he came upon a young coyote. He ran the coyote for several hundred yards, trapped him in a ditch and dropped a rope over his head. He dragged the animal to the ranch house as proof of his roping ability.

LUCKY EDITOR WINS \$500

Roy W. Hahn, of the Briscoe County News, published at Silverton, has received a \$500 check from Gene Howe, publisher of The Amarillo News-Globe, for guessing nearest date to the official end of the war. His guess was September 2, 1945. Everyone else thought the war would last much longer. There were thousands of guesses entered in the contest conducted by "Tack" of The News-Globe.

A REAL BARGAIN

Glider, sold as surplus property at the Lamesa, Dawson county, Air Field, went like hot cakes to farmers. No wonder! With each brand new glider, still crated, went a well-built steel trailer equipped with four brand new pre-war tires and a tarpaulin—all for \$520.

FREDERICKSBURG PLANS CENTENNIAL

Citizens of Fredericksburg voted to give over the entire year of 1946 to a great victory festival celebrating the 100th anniversary of the town's founding. High point of the centennial will be reached the week of May 8 in honor of arrival of first settlers from Germany, May, 1856.

PET SQUIRREL BITES WOMAN

A neighborhood pet squirrel attacked Mrs. H. M. Roark, of Rockdale, Milam county, and bit her on her arms, hands and legs before she could escape. Prior to this time the squirrel never had attacked any person.

DUDE RANCH ESTABLISHED

The famous "White House" on the old Charles Taft ranch, 15 miles north of Corpus Christi, Nueces county, and the 335 acres upon which it is situated, is to become a dude ranch. Operators will be Mr. and Mrs. H. M. Conway, of Fort Worth. They plan, in addition to operating a dude ranch, to farm and run livestock. The headquarters known as La Quinta, a huge three-story house, was completed in 1907 and burned to the ground about seven years ago. When the new headquarters was completed, more than 125 employees of the ranch attended open house. President William Howard Taft and many other notable men of the time were guests at the Nueces county "White House."

GILA MONSTER IN DENISON

For the second time recently a big gila monster has been found in Denison, Grayson county. The animal, whose bite usually is fatal, was 18 inches long. It was found at the home of Fred Armistead, 1224 West Hanna. The first monster was found near the home of F. D. Vincent, 1126 West Shepherd.

11TH PINT OF BLOOD GIVEN

Although she is 64, Mrs. Willia Mae Crowder, Madisonville, Madison county, never is bothered by the loss of a little blood. She has given her 11th pint of blood to a patient in a Houston hospital. Her blood is type "B" and she has frequent calls for it from hospitals.

TOO MANY DEER IN SOME AREAS

In some parts of Central Texas the deer population has been estimated at 100 to 300 to each 640 acres. The Texas Co-Operative Research Unit at College Station says that crowded conditions on range results in death to the deer even in good seasons, and advocates that the numbers be reduced so that the range will provide adequate support for the deer population as well as for livestock.

NEW DIRECTORS FOR COWBOY REUNION

Texas Cowboy Reunion, Inc., met at Stamford and elected three new directors. They are K. K. Francis, A. M. G. Swenson and F. E. Hudson, who will replace A. C. Cooper, Cleburne Houston and W. B. Tayman. Retiring members had served from 10 to 15 years each on the board. The reunion, held at Stamford, is one of the oldest cowboy get-togethers held in the Southwest and draws big crowds each year.

TEXAS HAS AIR ADVANTAGE

With scores of fine Navy and Army airfields in all sections of Texas available for civilian use, the State has a run-a-way head start on most sections of the country in the coming "air age." These airfields are distributed from border to border and can be converted to civilian use with very little expense. There are 25 main fields and 55 auxiliary fields in the State and most of them are near centers of population well suited for peace-time aviation.

WHERE THE BUFFALO ROAMED

In 1874 more than 4,000 buffalo grazed on the prairie where San Angelo's Fairmont Cemetery now is situated. In that year W. A. Alberthal, newly arrived at Fort Concho from his home in Fredericksburg, decided to locate there permanently. There he stayed until last month when he died. He was buried, at the age of 86 in Fairmount Cemetery. When he first moved west, Federal soldiers stationed at old Fort Concho kept a watchful eye on the Indians and gambled and drank with the buffalo hunters. Mr. Alberthal opened a tailor shop in the Fort and, after the town grew up across the Concho river, continued at his trade until San Angelo became a thriving oil and cattle metropolis. All of the pioneers for whom the streets and avenues of San Angelo are named were at one time or another customers of the tailor from Fredericksburg.

Radar Helped to Speed Victory

(Continued from Page 2)
war, nearly all the bombing raids on Germany were guided by radar. Radar took the B-29s from their Marianas bases to Japan, provided the accuracy which made superfort raids so effective, and guided the planes back home. Radar makes camouflage worthless. Radar simply ignores it. Warships equipped with huge radar apparatus can spot enemy surface or air forces many miles away and attack them long before they would become visible to the naked eye. Radar was used in Europe and in the Pacific to guide paratroopers and glider forces to their landing areas. Ironically, the U. S. had radar equipment at Pearl Harbor when the Japs struck December 7, 1941, and the man in charge of this equipment warned of the approach of the Jap bombers. The fact that the warning was not acted upon was no fault of radar.

THE FLOP FAMILY --- By SWAN

A LITTLE FUN *Jokes to Make You Laugh*

About Time

A proud mother walked into the furniture store clutching a small monthly payment. She placed it on the counter happily.

"Here," she said, "is the last installment on our baby carriage."

"That's fine," said the clerk, "and how is the baby?"

"Oh," was the reply, "he's being discharged under the point system next month."

When Pigs Call Names

Papa hog, growing tired of the sty, wandered down to the village brewery, where he found a big puddle of sour beer that had been poured out. He guzzled up so much of the stuff that when he went home he was staggering badly and squealing with a wild and joyous abandon.

Mamma hog quickly shunted him around the barn out of sight of the baby pigs, and with a furious grunt exclaimed, "You shameless wretch! What do you mean making such a human hog of yourself before the children?"

Line Up

Ann was one of the most popular girls in town and when she was married the church was crowded with her friends and after the ceremony, they all rushed to kiss the bride. After about a half hour the breathless girl was puzzled and, looking down at one little man, she said: "I don't know you. Why are you kissing me?"

The little man scratched his head. "I dunno, lady. When I got in this line outside, I understood it was for cigarettes."

Fine Honor System!

Little Bobbie: "Mother, have I been a good boy lately?"

Mother: "Yes, dear, a very good boy."

Bobbie: "And do you trust me, mother?"

Mother: "Why, of course, mother trusts you, son."

Bobbie: "Then why do you go on hiding the jam?"

Gentle Reminder

A Kansas editor hit on the following gentle reminder for dunning delinquent subscribers to the paper:

"There is a little matter that some of our subscribers have seemingly forgotten entirely. Some of them have made us many promises, but have not kept them. To us it is a very important matter—it's necessary in our business. We are very modest and do not like to speak about such remissness."

F-f-f-funny!

Fickle Farmer Flanagan, fixing furrows for fodder, finds famous family fortune, feels faint, fearing Federal fines, forfeits findings, feeling fairly fleeced.

Line Busy

He picked up the telephone, but found the line busy. "I just put on some beans for dinner," he heard a woman say. A few minutes later he tried again. The same two women were still talking.

"Say, lady, I smell your beans burning," he broke in.

There was a scream, two receivers went up, and the line was open.

Surprise!

A local war worker managed to order one of those prefabricated houses from a mail-order company, and fussed and struggled to put it up. A few weeks later the company got a nasty note from the customer, complaining that he had followed directions, but that there was something wrong about the house. He was pretty sore about it, too.

An investigator who was rushed to the scene looked the house over, then yelled, "Look mister, you've put up the house upside down!"

"I have?" cried the puzzled home owner. "No wonder I kept falling off the porch."

Means Business

A woman may put on a riding habit and never go riding. She may put on a bathing suit and never go swimming. But when a woman puts on a wedding gown—she means business.

Coffee pot discoloring can be removed from the inside by rubbing with salt.

With every course

...KRISPYS of course!

Indeed—we serve these flaky squares Right through 'most every meal, Because they give all other foods An added taste appeal!

They're extra crisp That's plain to see They're extra good Believe you me!

Sunshine KRISPY CRACKERS

...all through the meal!

LOOSE-WILES BISCUIT COMPANY—Brown Cracker and Candy Company Division

Turned T'other Foot

Admiral Halsey tells about getting to a football game late and stepping on a sailor's foot while scrambling to his seat. The sailor, not looking up, yelled, "Get off my foot, you big lug." Then recognizing the admiral, he blurted: "O, my gosh! Beg pardon, sir. Here's my other foot—go ahead—step on it!"

Feminine Translation

The young matron listened attentively while her doctor prescribed a remedy for her nervous condition. "Madam," he said, "you require Turkish baths, plenty of fresh air; also you should dress in warm clothes."

That evening she told her husband all about it: "The doctor said I'm in a highly distraught condition, dear, and that it is essential for me to go to Palm Beach, and to buy myself a new fur coat."

For Here's the Blend of Perfection

DELICIOUS, SATISFYING ... INVITING IN AROMA

Admiration Coffee is regularly enjoyed by more people than any other blend in the Southwest. Its heart-warming goodness, luxurious flavor, and energy-giving richness have made it a best-seller everywhere. No wonder it's called the "blend of perfection." No other coffee in America will ever again completely appeal to you once you've become an Admiration user. No other coffee could.

YOUR MAN WILL LOVE IT!

Admiration is a man's favorite. Brewed at full strength, its rich, mellow goodness will satisfy the most exacting male "coffee crank." One cup, two cups, a whole pot—it's all the same. The flavor never varies. That's because special roasting locks the flavor into every pound to stay.

Admiration COFFEE

LUXURIOUS FLAVOR IN EVERY CUP

Poultry News

Vigor and Health
By Dora L. Thompson
(Capper's Weekly)

More and more poultrymen are centering their attention on means of maintaining vigor and health rather than on ways of treating sick birds. A sick bird in a flock is a liability. What has caused this sickness, should be the main question in the owner's mind. To identify the sickness, he needs to make a thorough examination, sometimes of the internal organs. Turkeys ailing with what is commonly known as blackhead look and act much like turkeys ailing with another disease known as trichomoniasis but an examination of the liver of the turkey suffering with the latter disease will have cheesy appearing spots slightly above the surface of the liver. I am told, while the spots on the livers of birds suffering with blackhead are sunken below the surface.

This paragraph in the recent issue of Successful Farming magazine has interested turkey raisers who have had trouble with blackhead and has made them wonder whether the control remedy could be obtained and how much should be given. I quote the paragraph: "A most effective step in control of turkey blackhead is early dosing with phenothiazine. This drug kills the blind pouch or cecal worm which is the go-between, or intermediate host, of the tiny parasite responsible for the disease."

It is sometimes advisable to give individual treatment when birds get most of their feed by ranging for it. In such cases, the drug may be given in a hard

gelatin capsule that contains between one-tenth and five-tenths of a gram of the drug. Dr. Morley A. Jull states that such a dose daily for four days may be given if necessary. He adds that it appears to be practicable to treat the whole flock by adding the drug to a limited quantity of feed, which should be fed when the birds are slightly hungry. When mixing the drug with the mash, he suggests that one allow a half gram of the drug per bird for the flock.

This is especially a good time of the year to raise broilers. It is not good because they are particularly any more easily managed at this weather period of the year but because so few people start them except those in the broiler business. Broilers marketed from now to March 1st generally command the best prices and it should not be too long before you will not have to worry about any more ceiling prices in this respect.

If you are going to sell hatching eggs, buy you some new males now. Early maturing males which are far enough along at this time are the best. Get some which really are of good blood lines, not just the kind which look like they are what you want. Check them for parasites before bringing them on your place. After you have brought them to your farm, isolate them for ten days to see if any unexpected diseases show up.

If you are not a scientific feeder or a practical one which has proven his mettle, then my advice to you is to feed an all-mash to your birds because it is more foolproof than other feeds and the most economical in many such cases. It takes a good feeder to feed home grown grains properly.

Texas Farm News Reports

In some sections of Texas peach trees were reported in bloom in October. D. C. Porter, Route 4, Lott, Falls county, said he had 15 acres of peach trees in bloom and while it might bring fresh peaches for Christmas, the situation looked bad to him, as it may mean a poor crop next year. On the other hand, the situation had its advantages. He harvested 2,500 pounds of honey from 55 bee hives and the bees were taking full advantage of the peach tree blossoms.

Although the government will reduce its buying drastically, A. L. Cramer, of the Texas Cannery Association, reports Rio Grande Valley citrus growers and processors look for a prosperous year. He pointed out that warehouses are practically empty and retailers' shelves are almost bare of all canned citrus fruit products.

Parade of grass-fat steers, grown in Texas, started to the Northern markets early in the fall. The cattle brought top prices. A shipment of 901 head grown in South Texas and grazed in Kansas, averaged 1,063 pounds and brought \$13.02 per hundred, or an average of \$138.40 per head. Seventy head from the Welder Ranch at Victoria, Texas, and 50 from the Fleming Ranch at Victoria brought \$14 per hundred pounds.

The war against waste of the soil, erosion, continues. Despite World War II, the fight against waste of the land has never stopped. There are 127 soil conservation districts in Texas, 252 in Texas, Oklahoma, Arkansas Louisiana. Twenty-nine new districts were organized during the war. The soil conservation service in this four-State area had 730 men in the armed service. They are put to work as fast as they return to civilian life. The service has \$29,000,000 for operation and research this year. It is believed this eventually will be increased to \$40,000,000 or \$50,000,000 annually.

Grayson county's cotton crop was latest in history, and, due to adverse weather and boll weevil, probably will be about half normal size.

Tom Green county's pecan crop is expected to reach 1,000,000 pounds this year, and J. L. Rainey, of San Angelo, nurseryman and pecan grower, says it is the finest crop in Texas. Harvest got under way the middle of October with most of the pecans contracted by the grove to buyers, who will provide labor for harvesting. The pecans, are expected to bring five to 10 cents on the tree for native pecans, and up to 20 cents a pound for paper shells.

Lettuce is at its best in the southern part of Texas when winter grown, Miss Margaret Bracher, Harrison county home demonstration agent, reports. If planted in October or November it should head in January or February and should remain in head until warm weather causes it to go to seed. In the colder parts of Texas lettuce should be transplanted in a protected spot as it will not stand extremely hard freezes.

The heel fly is not much of a traveler and seldom gets more than a mile and a half away from his birthplace. Therefore, a ranchman, even in an area where heel flies are abundant, may protect his own cattle with a little trouble. It takes the small larva of the heel fly a full year to develop into grubs and then into heel flies. It thus has only one life cycle a year. Once eradicated from a ranch, the cattle may be kept free of the pest with little trouble.

THE FARMALL SYSTEM
...FOR FARM PRODUCTION

THE INTERNATIONAL TRUCK
...FOR FARM HAULING

The Farmer is building his future. He did a whole of a job during the war years. The Farm ranked equal with the Armed Forces—equal with the War Plants.

Now that peace has come, which one of these three goes right on? Whose job is bigger than ever?

The Farm—and the Farmer!

Yes, you are looking to '46, and to International Harvester. At every International Dealer's store there is a rising call for modern equipment. You have made your old equipment do—now it is time

for the new... and the better.

We know our great responsibility as the leading builder of the power and tools you need. Count on Harvester to do its utmost to build the new equipment you must have to carry on with your work.

Keep in touch with your International Dealer. He'll be in better shape, month by month, to get you a new Farmall Tractor and the improved equipment we are building for postwar farming.

INTERNATIONAL HARVESTER COMPANY
180 N. Michigan Ave. Chicago 1, Illinois

When it comes to your postwar truck, remember that it's only INTERNATIONAL that outfits the farmer for both production and transportation. For nearly 40 years of its 114-year history, International Harvester has built International Trucks.

For four long years, new International Trucks went off to war by the tens of thousands. Today we're building them again for the home front in light-duty and medium-duty sizes that hadn't come off the assembly lines since early '42.

DEALERS EVERYWHERE TO SERVE THE FARMER

INTERNATIONAL HARVESTER

Robert Reddell, of the Cedar Gap community in Taylor county never expected blackeyed peas to pay better than cotton, but this year he planted one acre to peas and gathered three crops, each bringing around \$75, or \$225 for the one-acre harvest. That beats cotton, he says.

Adequate small grain winter pasturage for dairy herds helps the Texas farmer go into spring with his cows in fine shape. Late feed crops placed in silo helps offset limited supplies of protein feeds. G. G. Gibson, of the A. & M. College Extension Service has urged farmers to cull out low producers so that their feed may be "sold" to the cows which pay highest prices.

From one-fifth acre of land, J. W. Morrow, shoe repair man of Arp, Smith county, produces enough sage each year to bring him an income of \$300 to \$500. Starting as a hobby several years ago, Mr. Morrow secured the finest sage he could find in East Texas and started experimenting. He saves the best plants each year for he says this works out better than planting seed. Morrow washes, grinds and sells his product direct to an established clientele. He intends to start raising black pepper, as he believes East Texas will grow the finest quality of pepper.

U. S. Rubber Co. has developed a new fabric from chicken and turkey feathers which resembles wool. The cloth is to be used in suits, dresses, sweaters and other apparel. Experiments were started when the company learned 100,000,000 pounds of chicken feathers and 30,000,000 pounds of turkey feathers were going to waste annually.

While operating his machine shop in Marshall, Ed Emery has been learning best methods of farming by operating a 20-acre experimental farm between Hallsville and Harleton in Harrison county. After failure of cotton, due to weevils, Mr. Emery tried various crops and now is experimenting with tobacco and hegarri. The tobacco planted this year was white burley and has shown good results, Mr. Emery said.

A ton of lime to the acre has been recommended for Cherokee county by County Agent C. Metz Heald for both fields and pasture land. The lime, he says, paves the way for other materials needed to enrich the soil. Lime and phosphate combination gives better results, the agent reported, than if applied one following the other.

Waco grocers report they are selling more lye and buying less waste fat since McLennan county housewives started making their own soap. Recipe for making lye soap appears on some brands of lye and some women follow methods used by their grandmothers in making home-made soap.

Success of the fight against pink bollworms in Nueces county is indicated by the fact that government entomologists working there found only 15 this year. Despite wet weather the fields in the county were well cleaned up. Heaviest infestation in the area was reported in Jim Wells, Duval and Jim Hogg counties to the west.

Cass county farmers for generations fought to kill out the grass, and now with Federal aid they are trying to make it grow again because it provides best and cheapest feed for livestock. Last year 232 farms in Cass county received \$13,869.55 assistance to improve approximately 3,083 acres of pasture land.

To save tomatoes from frost, Miss Pauline Lokey, Potter county home demonstration agent, told gardeners in the early fall to pull up the whole vine and hang the plant with its green tomatoes still attached in a dry place, such as the garage. This keeps the vegetable fairly well for a few weeks and the tomatoes gradually redden on the vine.

"My Austin wheat produced 20 bushels to the acre while my Red May made only 14 and my Tenmarq 9," T. R. Martin, a Denton county grain demonstrator at Justin, reported in a late issue of "Extensioner," monthly magazine of the Extension Service A. & M. College of Texas. Greater yields from pedigreed grains are estimated to have brought Denton county farmers more than a quarter million dollars in increased incomes.

In Bureau of Animal Industry experiments some of the cattle on the King Ranch in South Texas have been getting their phosphate in liquid form. The phosphate is added to make up for insufficient phosphorus in the native vegetation. The phosphate salts have been given experimentally in two forms, disodium phosphate and deflourinated triple superphosphate, in quantities sufficient to supply 6.5 grams of phosphorus in six gallons of water. The deflourinated product is used to eliminate the poisonous effect of flourine. The treatment results in more productive breeding stock and in better gains by calves. Some ranchmen add bone meal and other forms of phosphorus to the feed.

Seventeen Central Texas counties are included in the Texas Turkey Triangle, recently organized turkey raising and marketing co-operative. Walter W. Cardwell, manager of the Luling Foundation Farm, Caldwell county, was elected president.

Many growers in the Rio Grande Valley are shipping their lemons in their natural color, green, without coloration, and Associated Growers of Mercedes, Hidalgo county, has undertaken an advertising campaign to sell lemons to the public without artificial color.

In the season just closed \$675,000 worth of broom corn was marketed at Beeville. Most of this broom corn was grown in Bee county. The crop brought a top of \$250 a ton. Some, graded down be-

It's the BONE AREA you should cure first

ALL the tang, the mouth-watering goodness, the keeping qualities of your season's meat depend upon what happens in the bone area. The meat around the bone is rich in flavor. However, it's the meat most likely to develop souring and off-flavor.

The Morton Way of curing helps put your meat on the safe side quickly... starts the cure at the bone.

Morton's Tender-Quick, dissolved in water makes a fast-acting curing pickle. Pumped into the meat along the bones, it immediately starts the cure at the most vulnerable spot—the bone area. Then, rub the outside with Morton's Sugar-Cure. This sugar curing salt strikes in, curing toward the center and gives your meat an unmatched flavor of rich, wood smoke.

The result is a safer, surer cure, uniform from rind to bone, no off flavor, no bone-taint, no waste — meat that is sweet, firm, tasty, with the last ham of the season's cure tasting just as good as the first.

FIRST... Dissolve Morton's Tender-Quick in water and pump into hams and shoulders along the bones. This rich, fast-acting curing pickle starts curing INSIDE... helps prevent bone-taint, off-flavor, under-cured spots, giving a safer, surer, more uniform cure.

THEN... Rub with Morton's Sugar-Cure which strikes in, curing from OUTSIDE toward the center... giving you a thorough cure, long keeping quality, and the rich, wood-smoke flavor you like.

Cure meat the safer, surer MORTON WAY

Our Boys and Girls

ANIMALS KNOW THEIR MEDICINE

By FRANK W. LANE
(Condensed from Animal and Zoo Magazine)

Dumb animals, it appears, are not nearly so "dumb" as man in his conceit has been wont to imagine. The observations of naturalists show that many of the proud discoveries of recent medical research were anticipated in the instinctive practices of our furred and feathered friends. Preventive medicine is widely practiced among animals. When the American black bears come out of hibernation in the spring, they are out of condition and are liable to fall an easy prey to sickness. But they

will start their meal on this part of the prey, so that if they are disturbed they will at least have made sure of their vitamins.

According to C. C. and S. M. Furnas, writing in "Man, Bread and Destiny" (Yale), when dogs and cats lick themselves, it is not only for toilet purposes, they are transferring their vitamin crop which has accumulated among the dirty hairs into their stomachs. Man's natural vitamin D factory is in the practically hairless skin. But with animals the accumulated layer of body secretions in their fur is the seat of their vitamin D manufacture. Rats normally exposed to irradiation and adequate diets do not get rickets. If the same rats are prevented from licking themselves they become rachitic even though they are amply irradiated. If the hair of a rabbit is kept washed with ether to remove fats and oil the animal develops rickets even if irradiated. There are other animals in which cleanliness is next to rickets. Since the sensitivity of the human nose has made it customary to keep the household dog well washed, manufacturers of canine food have found it necessary to put vitamin D into dog biscuits.

The American Nature writer, Archibald Rutledge, says: "Both birds and animals bathe regularly to rid their bodies not only of parasites, but of possible sources of infection. These baths are of many varieties—water, sun, mud, dust. In the Yellowstone old grizzly bears use the hot sulphur springs which may alleviate aches and pains incident of age. It is almost a daily habit of such game birds as the quail, ruffed grouse and wild turkey to take dust baths to discourage insects."

HOLD THAT CHICK! Mongrel Pluto has job of running herd on loose chickens who stray from pens in Fort Worth, Texas. Trained by Charlie Mills, he grabs an elusive fowl with his paws. He never injures chick, but then a playful pup might be forgiven for grabbing mouthful of tail feathers.

search out and eat certain berries and dig up large quantities of the bulbs of avalanche lilies and Spring Beauty. These have a laxative action and put them in condition once again. If an alligator is killed soon after it comes out of its hibernating quarters and its stomach opened, a heavy wooden knot, a stone, or other similar indigestible substance is frequently found. A reliable American Nature writer, who has watched many an alligator in its native haunts, suggests that the reptile swallows these substances deliberately. He points out that during the hibernation sleep it is necessary for the digestive organs to be kept in working order. This is done by providing them with a hard object on which they can slowly work throughout the winter.

When an animal has to face a big physical ordeal it will sometimes go on a special diet. By a careful study of the mule deer, it has been found that the female, when pregnant, selects her food as carefully as any human mother under orders from her doctor. Buck deer, when about to grow new horns, have been known to travel for miles to drink water which is rich in lime. Even upland birds during the mating season will resort to places where shell-fish are found. They need lime for their egg-shells and take pains to get it.

On a rainy day a wild turkey has been seen to force its youngsters to eat the leaves of a spicebush, that do not ordinarily constitute part of the fare of young turkeys. But in the rain young turkeys get bedraggled and tired, and resistance to disease is lowered. In the bitter spicebush leaves the young birds obtain the necessary tonic.

Captain C. R. S. Pitman says that some of the tribesmen in the northern portion of Uganda have a theory that the lion digs up and eats a species of bulb known in the local dialect as "lion's medicine" before it goes hunting. The bulb is supposed to act as a temporary stimulant. It is quite possible that lions do consume this root for medicinal purposes just as cats when out of sorts will eat grass and other vegetable matter.

The important part played by vitamins in a well-balanced diet is a comparatively recent discovery. Yet, judging by what they eat, animals seem to have been aware of the importance of vitamins to health. In the springtime even domestic animals will rush for the fresh green grass, which is so rich in vitamins, in preference to the dried hay which is far more abundant. In Canada, moose often dive to the bottom of lakes to get the wild lily roots, and caribou can be seen digging deep into the snow-banks to get the first green shoots.

Dr. Wilborn J. Deason, of Chicago, has pointed out an interesting factor about the diet of carnivorous animals: they get their supply of vitamins by eating the liver and pancreas (known to be rich in vitamins) of their victims. Often the great carnivora

Even the supposedly dirty carrion birds act as though they appreciate the value of cleanliness. To quote Rutledge again: "We may wonder why carrion birds are not infected by their food. But Nature has supplied the vultures with heads that are practically featherless; they scrupulously clean their huge beaks; and, further, the vulture is the only bird known to me which will select a high place exposed to the sun and sit there with wings extended for the purpose of cleansing his feathers. The manner of the bird's life calls for special caution in sanitation and he takes it."

Sir Ray Lankester writes: "The adjustment of organisms to their surroundings is so severely complete in Nature, apart from man, that diseases are unknown as constant and normal phenomena under those conditions. Every disease to which animals are liable, except as transient and very exceptional occurrence, is due to man's interference."

But in spite of every precaution a wild

FOUR OF A KIND—Vinnie Lucas ropes famous Arcady quadruplet calves for first photo at farm in Dyer, Ky. Purebred Hereford calves weigh 340 pounds each at age of five months

creature will sometimes fall ill or meet with an accident, and it is then that some almost miraculous cures are affected. Cowboys and trappers say that it is notoriously difficult to poison a wolf or coyote. It has been suggested that this is because the moment one of these creatures realizes that it has taken poison, it contracts its abdominal muscles and thus ejects everything it has swallowed. The vomiting may, however, be the result of the irritant action of the poison on the stomach, but the effect is the same in enabling the coyote to apply drastic first-aid. It is said that if a wolf is bitten by a rattlesnake it will start chewing snakeroot as an antidote. A similar case of a fox using a bit of sheep's wool instead of hay, is related in Edith Oliver's "Without Knowing Mr. Walkley."

COLORADO RANCHES

We are offering a select list of plains and mountain ranches, favorably priced. Write for our new Winter Catalog.

VAN SCHAACK LAND COMPANY

RUFUS B. KLEIN, Manager

724 17th Street Denver, Colo.

Business Opportunities

GRAIN ELEVATOR, DRIER AND FEED MILL—20-car capacity, located on Texas-Mexican Railway; also good retail business. \$30,000 for elevator, mill and drier. Stock also available at inventory. Also similar plant with same capacity at Raymondville, Rio Grande Valley, \$30,000. C. S. Herring, Robstown, Tex. Dept. 3030.

ONE COMPLETE LAUNDRY with 100 h.p. boiler, 5-roll Troy ironer, 110 in.; also smaller laundry and dry cleaning plants. Cash or terms. Marvel Manufacturing Company, 113 Live Oak St., San Antonio 2, Texas. Dept. 3201.

A REAL OPPORTUNITY for quick sale: 55-room, three-story brick hotel, corner lot, paved both sides. 1 block off square on Highway 80 in county seat town, well furnished; 30 houses, large daily; has income of \$800 per month. Price \$35,000, \$15,000 cash, balance terms. This is no run down shack but the best of equipment throughout. Original cost twice this amount. 300 ACRE ranch on Highway 80, new modern rock home, three-car garage, tenant house, lots of sheds, corrals, barns, etc.; plenty of water, light and gas; modern tractor complete, good pickup, 70 head white face, 250 goats. In fact, everything needed for complete small ranch. You move in, they move out. Price, \$42,000. Many other small or large tracts. Let me know your needs. S. E. Price, 404 Exchange Bldg., Phone 258, Eastland, Texas. Dept. 3207.

BUILD your own mail order business at home. Make extra money. Easy to learn. Send for free circular or one dollar for ten business getting ads with complete plans. J. Olcott, 606 Girod St., New Orleans, La. Dept. 3170.

FOR SALE—Complete portable skating rink, good tent, floor skates and music. Also one khaki-color tent complete with poles. Write Roller Rink, P. O. Box 781, Plainview, Texas. Dept. 3145.

Gebhardt's Chili-Quik
FOR MAKING CHILI CON CARNE

YOUR GROCER HAS IT OR CAN GET IT FOR YOU.

FRESH MILK 3 MONTHS OLD

A new method of quick-freezing whole milk is now making it possible to serve wounded soldiers returning from overseas on Army hospital ships with brimming glasses of the beverage as appetizing and as tasty as any to be had on the farms of America, the War Department announced recently.

Although in some instances the milk has been kept in the frozen state for three months, its taste is as fresh as if it had just come from the cow and the bacterial count is

lower than that in the average milk supply of most American homes.

This welcome and important addition to the diets on the hospital ships resulted from a series of researches carried out by the Veterinary Division of the Office of the Surgeon General.

Although cannibalism is growing less common throughout the world, some eaters of human flesh are still getting their meals. Most active cannibalistic tribes live in sections of Africa, New Guinea and inner Australia.

CRIB DOLL
By MRS. ANNE CABOT

Small children adore this crib doll. It's 22 inches long, soft and flexible and looks like a sleepy baby cuddled up in a little bed. Make it of pink, blue or white outing flannel, white cotton or soft wool jersey. Hair is made of wool yarn—face is embroidered on—eyelashes are made of black thread. Tie a satin ribbon around the "sleeping-suit" neck—finish off the braids with a matching bow and you'll have an absolutely adorable doll to give to a child.

To obtain cutting pattern, sewing and finishing directions for the Crib Doll (Pattern No. 5468) send 15 cents in COIN, plus 1 cent postage. YOUR NAME, ADDRESS and the PATTER-NUMBER to Anne Cabot, Southwest Magazine, 1150 6th Ave., New York 19, N. Y.

Please do not send order to Mrs. Margaret Moore, Fort Worth.

HOME-MADE CHRISTMAS GIFTS

Dear old Merry Christmas is just around the corner and it is getting time to plan what you will give your friends and your family as well as the youngster friends, too.

Get out the old scrap bag, Mom, and get your thinking cap on. There are stacks of gifts to make and so many to make happy by just one small hand-made item, and so inexpensive, too. Aprons are always good gifts and who has enough of the gay little ones. Tape, ruffles, rick-rack and ribbon can make darling ones and they go off so fast on the sewing machine. Make a pair of pajamas for the daughter and she will like a handkerchief holder for her best girl friend. Laundry bags are good for the next door neighbor and pot holders can't be beat for the one you almost forgot. Shoe bags can be made to match if you like.

You know all the yarn you just couldn't throw away? Just take the odds and ends and you can make a swell pair of house-slippers in no time. Finish it off with a scrap of ribbon, or just plain if it is for a boy, maybe, or a turn down cuff. You can crochet a little beret or hood for any size girl who can always use a new one with a scarf to match and there is always mittens that go off in such a hurry that you are through before you know it.

If you have lots of little girls friends you can make doll clothes. Have you ever seen the look on a little girl's face when she sees her new doll's wardrobe? It is something to remember. They can be made on the machine or your fingers and a touch of lace and ribbon set them apart from this world. A doll you made just for the baby will delight him beyond measure. Elephants, lambs, dogies, clowns are just a few of the many toys that are easy to make and tots just love them.

If you like embroidery work you can make handkerchiefs that have a personal touch, with an initial in the corner. Pillow slips are always a needed gift and initials or just a spray flower or your favorite stitch along the hem line add so much. Lunch cloths, scarfs, doilies and towels (hand) can be added to the line of quickly made gifts.

Surprise your neighbor with a small hand-made gift and she will forever remember your thoughtfulness. Gifts are a good neighborly policy.

UNRATED FAT IN THE NUT VARIETIES

Bountiful harvests of peanuts, pecans, almonds, filberts and English walnuts in this country offer ration-free fat to bring richness and flavor to meals.

Most nuts are at least half fat, say nutritionists. Nuts are also high in protein so that they can alternate at times for meat in a main dish, such as nut loaf. Also, nuts provide V vitamins—especially thiamine—and a little iron and calcium. But as far as nutrition is concerned, nuts are most effective used to supply some of the needed fat in meals.

Fats do more than provide calories for energy in a highly concentrated form. Some fat in a meal makes it more satisfying. That is, the fat digests slowly, so the meal "stays by you." In addition, fats perform certain functions for health and well being which no other kind of food can

take over. There is fat in a good many foods, such as butter, margarine, salad dressing, whole milk, meats, soybeans, avocados—and nuts.

Home economists of the U. S. Department of Agriculture offer a few suggestions for using nuts in cooking:

In pastry, pecans ground fine may substitute for half the fat. Mix and bake like plain pastry.

Chopped nuts added to biscuits, muffins, waffles, or cookies, give flavor and a crisp note. Usually, ¼ to ½ cup of chopped nuts to each cup of flour is a good allowance.

Nuts added to the batter make a plain cake or cottage pudding richer. In a cake batter ¼ cup of nuts to each cup of flour is likely to be plenty.

Nuts in a baked mixture tend to absorb moisture and make the finished product dry. So when using a large proportion of nuts, place the nuts first in boiling water a few minutes. Then drain, and add them to the mixture in the usual way.

IF THERE'S WEAR IN AN OLD COAT

If there's wear in an old coat yet, this is a year to give it first aid or beauty treatment, or both, and put it on active duty for fall or winter. The clothing shortage is not over. Clothing specialists offer the following suggestions:

MENDING A SMALL HOLE OR TEAR—Ravel yarns from a straight inside seam, because repairs with self-thread are most nearly invisible.

LINING REPAIRS—If worn only at neck, sleeves, and hem, consider repair of a lining with matching or harmonizing fabric. Apply a shaped facing about two inches wide at the back or neck, and a two or three-inch band at cuff and hem. Catch-stitch to the old lining for a decorative effect. If a lining is worn at underarm, shields or lining cloth tacked in will do double duty. They take the rub and serve as patches to hold a frayed lining in place.

A WHOLE NEW LINING—If the old lining must be ripped out, take care not to stretch or tear it, because the pieces when pressed will serve as the pattern. Attach the new lining loosely, as in a new coat, so as not to draw up the coat.

INTERLINING—For a warmer coat, make and attach an interlining either inside or outside the lining. If interlining

is wanted only across the upper back, this can generally be put in by removing the lining only at upper back and back of arm-hole, and tacking or quilting the interlining to the inside of the lining.

BETTER BUTTONHOLES—If button-holes are slightly raveled, fasten off thread to stop raveling, and rework with button-hole or blanket stitch. If badly raveled, machine stitch around hole close to edge, then rework. Renewed buttonholes may call for bigger buttons. Some of the new coats have large decorative buttons.

REMODELED COLLAR AND CUFFS—The worn edge problem can sometimes be solved by cutting down collar and cuffs to smaller shape. Or, making new reverses or collar and cuffs of velvet, velvet, or fur may give the coat a new and different air.

RESTYLING SLEEVES—If exaggerated sleeves are recut, remember that the lining must be changed to suit. Sizable shoulder pads are still being worn. New pads may perk up a coat, and these can be bought or made at home.

PRESSING—To give a repaired coat a finished look, steam press wool fabric. Protect it with one of the treated press cloths which can be bought with directions for use, or by covering the wool with a dry wool cloth, then a dampened cotton cloth. To steam press, set down, then lift the warm iron with just enough force to drive steam through the wool, and after pressing lift the cloths and beat the fabric by hand or with a wool block to drive out steam. Before pressing, be sure that the lining lies smooth under the coat so it won't get wrinkled.

TESTED RECIPES

Oatmeal Butterscotch Cookies
1 package butterscotch pudding
1 cup 3-Minute Oats
1 cup flour
¼ teaspoon salt
½ teaspoon soda
½ teaspoon cream of tartar
1 teaspoon vanilla
1 egg
½ cup melted shortening.

Combine in order and form in roll. Then chill. Slice thin and bake for seven or eight minutes in oven at 350 degrees.

Sweetpotato Pie
Of all the pies for which American cooks are famous, the favorite with many is the pie filled with yellow sweetpotato custard.

The following recipe for sweetpotato pie comes from home economists of the U. S. Department of Agriculture.

Ingredients: 2 tablespoons fat, melted; ½ teaspoon salt; ½ cup corn syrup or sugar syrup; ¼ cup orange juice; 1 teaspoon grated orange rind; 2 cups mashed sweetpotatoes; 1 or 2 eggs, separated; ½ cup milk.

To make: Add fat, salt, syrup, orange juice and grated rind to the hot mashed sweetpotatoes. Add beaten egg yolks and milk. Beat well. Fold in stiffly beaten egg whites.

Pour this mixture into a 10-inch baked pie shell and bake in a moderate oven 30 to 40 minutes.

FAMOUS FOR FLAVOR

There's so much richness in **MOUNTAIN GROWN FOLGER'S COFFEE**

You should try using ¼ less per cup!

FOLGER'S COFFEE
Mountain Grown

Cheese Potatoes
3 tablespoons melted fat
4 medium sized boiled potatoes
2/3 cup corn flakes
½ cup finely grated cheese
½ teaspoon paprika
1 teaspoon salt.

Pour 2 tablespoons fat into shallow baking pan. Cut potatoes into one-half inch slices and place close together in pan. Brush tops with remaining fat. Roll corn flakes into fine crumbs; combine with cheese, paprika and salt; sprinkle over potatoes. Bake in moderately hot oven (425 degrees F.) about 15 minutes.

Yield: four servings (5 slices each).

Indian Pudding

A dessert that is completely independent of your sugar supply is one for the files these days. And that is just what this good Indian pudding is—and the family will go for it, too. Boil four cups of milk with one-third cup of corn meal—either white or yellow—and then cook them over boiling water for 15 minutes. Stir in one-fourth cup of molasses and cook for five minutes more.

Now cool the mixture slightly and add one-fourth cup butter or margarine, one teaspoon of ginger, one-half teaspoon of cinnamon, one-half teaspoon or so of salt and one-fourth cup of corn syrup. Last of all, add one well-beaten egg. Mix all this thoroughly, pour it into a buttered baking dish and bake in a slow oven for two hours. Serve the pudding hot with cream—or for something extra special—with vanilla ice cream.
