

Young Wellington Editor Wants To Succeed Congressman Jones

WELLINGTON, Texas—As the first candidate to come out flatly against sending our American boys to die in an European war, Deskins Wells, country editor of Collingsworth County, announced this week that he was definitely in the race for Congress and that his platform would be announced shortly.

In announcing Deck Wells said: "I intend to make few promises, but to run on my known record of having worked for farmers and ranchers in my home county, but to make myself perfectly clear, I do give the people of the Panhandle this pledge: I will vote against the entry of the United States into any European war."

"I believe in preparation strong enough to resist any outside aggression, but that our best course is to remain strong and free by conserving

our resources and our boys.

"I was born on a farm near Wellington over 38 years ago, and lived on the farm until I was 25. As a country editor I have worked with and for the people on the farms and ranches for 15 years. Since Marvin Jones' most important service was rendered in behalf of agriculture, I will strive to continue this service to the limit of my ability.

"Not only do I favor the soil conservation program and the farm program, but I will also work for the conservation of human lives. In this district, farmers moving from the land have made worse the plight of workmen who could not find jobs in the towns and cities. For that reason I will support the Farm Security program, the Farm Tenant Act, as well as all sound legislation to relieve

unemployment.

"In my platform, which will be announced shortly, I will be more specific on other important matters, and especially the need of enforcing the immigration laws, tightening them if necessary to keep down un-American activities, which in the main are conducted by the foreign born who are sent over here for that purpose by ruthless governments.

"I am strongly in favor of social security, including pensions for the old, and I will work to create jobs for the young people.

"I do not intend to try to fool the people into believing that I know all that there is to know about being a Congressman, but I do know enough about the workings of the Congress of the United States to realize that any new man you may send to Washington will be a freshman in Congress, and that he will have to work as such at first regardless of his age or how long he has been in politics. I am new to politics and will be to Congress, but I will work hard and faithfully if you send me here.

"I am making this statement in order that my friends over the Panhandle may know for sure that I am in the race. I will greatly appreciate the opportunity of going to Washington and working my way up in order to be in a position to continue the splendid work that has been done by Marvin Jones, whose place cannot be filled, but whose sincerity of purpose can. Your task is to judge the candidates and select that sort of man, regardless of whether it be Deck Wells or someone else."

PLEASANT HILL

Mrs. Theodore Knight returned home from the Memorial Hospital last Saturday, and is showing steady improvement.

Mrs. S. O. Bell is expected to be able to undergo an operation, Tuesday. She has been under treatment for about ten days.

John Hightower, Jr., visited his parents, Mr. and Mrs. John Hightower, last week, returning to his work in Las Cruces the latter part of the week.

Mr. and Mrs. Earl Gallagher, of Hobbs, were here last week. Mrs. Gallagher remained with her mother, Mrs. S. O. Bell, but he has gone back to his work.

Mrs. Dora Moorman received word on Sunday of the death of her sister, Mrs. Annie Rakestraw, in Washington, D. C. The community extends its sympathy to her.

Clovis shoppers Saturday were Mr. and Mrs. I. L. Cone, Mr. and Mrs. Earl Ware, Mr. and Mrs. Mac Good-

man and Mrs. Wilma Lee Barnes.

Mr. and Mrs. Cecil Bell were here from Oklahoma last week.

Mrs. Syble Mann and Elvis Bell accompanied Mr. and Mrs. Joe Bell and son to Lubbock, Friday, to attend the school exhibition put on by students of the college.

A number from here went to see "Gone With The Wind", Monday.

The Library of Congress in Washington is the largest in the world. It contains 5,828,125 printed books and pamphlets; 1,152,285 maps and views.

TRUCKERS TO RECEIVE FIRST AID COURSES

AUSTIN—An advanced course in first aid for Texas truck drivers will be offered through the cooperation of the Red Cross, and instructors for the drivers will be made available in every city where there is an operator, it was announced today by officials of the Texas Motor Transportation Association.

When drivers complete the first aid course and meet the requirements, they will be allowed to carry first aid kits, wear a Red Cross chevron and display the Red Cross mobile unit first aid marker on their trucks.

Motor carrier experts pointed out that the adoption of such a training course will be a great step in promoting safety work in highway travel. Competent trained drivers will be equipped to render first aid treatment under many emergency conditions.

Annual National 4-H club encampment will be held this year in Washington, D. C., June 12 to 19, the Extension Service of the Department of Agriculture has announced. The general theme of the week's program will be "What's Ahead for Rural Youth?"

Garden Guessing Game

Ferry-Morse Photo

Here's a guessing game for gardeners that carries with it a good lesson in fertilizer application.

Systematic addition of plant food (complete commercial fertilizers are now most widely used) is essential for real success in almost any garden. Proper use, however, as directed by the fertilizer manufacturers, is vital. The pitfalls of careless application of fertilizer are shown by the picture above.

New—which of the three lettuce plants pictured received the heaviest application of fertilizer? Each was planted in the same moderately rich soil and grown under the same conditions in a test of fertilizer reactions at a Ferry-Morse Seed Breeding Station.

Here's the answer. The plant at the right received the heaviest application—in fact several times more than recommended. The one in the center received a moderate overdose, while the flourishing plant at the left was treated as recommended by the fertilizer maker.

So, in applying fertilizer to your garden, be cautious; and follow directions carefully. You will not get ten times as good results as your neighbor simply by applying ten times as much fertilizer as he does. In fact, over-heavy applications can retard plant growth, as is evidenced by our contest picture above.

SUPERFEX Gas Burning REFRIGERATOR for rural homes

Burners do 24 hours work in 2 hours... go out automatically

PRODUCT OF PERFECTION STOVE COMPANY

NO MATTER where you live, Superfex, operated with either propane or butane gas, will save food, time and money, save trips to markets and

save miles of steps. Superfex costs little to operate because the burners remain lit only about two hours out of 24.

Enjoy better living, greater variety of more wholesome, appetizing foods, delicious frozen desserts, with the refrigerator that pays for itself with its savings.

Superfex can be had also with burners for kerosene.

Come in, or write or phone for free demonstration in your kitchen.

VISIT US IN OUR NEW LOCATION

To the end that we may be in a position to render our customers a superior service in more comfortable and attractive quarters, we are now happy to announce that we are established in our new locations in the new fireproof structure recently completed by Mrs. Florence Wallace on Main Street in Farwell.

We believe that our customers are entitled to the very best of service and accommodations, and our new locations, we believe, will go a long way in facilitating the services that we have tried so

earnestly to render in the past. The people of Texico-Farwell and surrounding trade territory have been mighty good to us—without which our new and modern facilities would have been an impossibility.

We invite you to come in and see us in our new locations. As has always been our policy, we will do our utmost to please you in every detail and render you a satisfactory service that is second to none.

The State Line Tribune

Curtis Douglas Enters Race for Senate Post

Curtis Douglass, popular Panhandle attorney and former District Judge, is a candidate for the state senate. Yesterday he announced his platform would be based on a fair deal in attempting to "better the welfare of Texas with action instead of promises."

"It is the duty of the Legislature to cooperate with the administration in power," he said. "If there is a failure on the part of the administration to chart the proper course, then the Legislature should lead the way. The mandate of the people should never be ignored. Legislators should live up to their campaign promises. A do-nothing policy leads to ruin."

Douglass ran second to senator Hall and was eliminated by a few hundred votes in 1936.

"The candidate said, 'I still believe no state lawmaker should represent corporations, interests and clients whose interests are contrary to the general welfare and still pretend to serve the people who elected him. I am a firm believer that every lawmaker should be required to file his inventory of property, under oath, when he is elected, and another inventory at the end of each succeeding year, showing his people all sources of revenue obtained and from whom received. This would give the voter a check on all incomes of their public servants.'"

Discusses Pensions

On pension matters, Douglass stated, "It is the mandate of the people that the pensions be paid, that the school teachers' retirement fund be paid, the blind be cared for and all other social security obligations met. The voters decided all of this in no uncertain terms. I shall favor any reasonable tax bill to procure these funds as long as it does not incur hardships on any particular group or upon those we wish to aid. I do not think it proper for me to announce a cure-all law for any problem, for, after all, I would only be one of 31 senators that would have a voice in the matter."

"I do believe such a problem can be worked out satisfactorily by both the legislative and executive branches of the government to fulfill the mandate of the people, and I will certainly fight for the solution of these problems."

Douglass said he believed that all types and sizes of business should be considered on the passage of any law, that there should be no discriminating laws.

He said he believed that labor should have the rights of bargaining. He strongly favors that school proportions be based on the number of students rather than population of districts, he said.

Douglass said he is an advocate of consolidating equalization boards, an assessing and collecting agencies into one, thereby saving thousands of dollars in costs of administrative

government and also equalizing school, county and state tax rates. He cited three examples of counties in the Panhandle that employ a gas and oil expert each year to assess taxes for the county. "Then the school employs this expert to set their taxes," Douglass said, "and when this expert has finished duplicating his first list, he has received thousands of dollars in salary for doing the same work."

Sees Economy Ahead

Douglass said he believed in practicing economy, stating: "You can't tell me that we cannot economize, and by that I don't mean to quit spending where the spending is doing good. We are living in a progressive age, and our advanced and modern views demand better schools, better advantages and better living conditions in general. It is not those expenditures going to the progressive and beneficial things I would cut, it is the useless waste and spending that should be discontinued. There are too many duplications, too many overlapping, tax eating agencies, too much waste and far too many useless jobs. A real practiced economy, without regard to political favoritism, would mean millions of dollars saved, likely rendering new taxes of any kind unnecessary."

Douglass said he believed the state, in cooperation with the federal government, could be induced to establish a natural gas laboratory in the Panhandle of Texas, to determine the fullest extent of the many uses of natural gas. Such an experimental station, Douglass said, would prove beyond all doubts that new industry could thrive in this area, leading to many manufacturing plants being established in the heart of the largest gas field in the world.

"Give business and industry, both large and small, a fair deal," he said. "The progress, development and welfare of the country depends upon the success of business institutions,

Will this calf bring 66¢ a pound?

It's HARD to tell... but EASY to pick a winning oil

To encourage the great work of the 4-H Clubs, Phillips representatives frequently bid in 4-H Club prize animals, offering 66¢ a pound in honor of Phillips 66 products.

Which of the thousands of animals now being raised will win?

Even experienced judges of cattle can't answer the question until all the animals appear in the ring. But when you want a winning oil for your motor... you have a simple, easy, rapid way to pick the champion lubricant.

To do away with all question and doubt, the great Phillips refining organization makes this plain, straightforward statement. If you want our best oil, remember we specify that Phillips 66 Motor Oil is our finest quality... the highest grade and greatest value... among all the oils we offer. Ask for it, when you make the seasonal change in lubricants which every engine needs.

LARIAT NEWS

Mr. and Mrs. E. V. Billingsley, Scott and Lou Ellen, accompanied by Juanita Harmon, spent Sunday in Fort Sumner, visiting Mr. and Mrs. Wesley Vaughn.

A weeks revival has been going on in the Church of Christ, with I. F. Woods conducting the services. It has been well attended by surrounding communities.

Mr. and Mrs. C. A. Felts from Hereford, have been visiting in the R. T. Jenkins home.

Herbert Jenkins, son of Mr. and Mrs. R. T. Jenkins, has been on the sick list.

Billy Billingsley, son of Mr. and Mrs. Earl Billingsley, and Lois Robertson, daughter of Mr. and Mrs. J. C. Robertsin of Lariat, were united in marriage, Saturday evening at Melrose, N. M., with Margurite Smith and Garland Billingsley as witnesses.

L. D. Rundell, Marvin Coffee and Walter Hurst left last week for Lubbock to join a CCC camp.

Gordon Harmon and Dana Jenkins made a business trip to Oklahoma, the first of the week.

and the people, in turn, rely upon the prosperity of business for their security.

"Plains Only Clients"

"To sum it all up, we must have a new order of things. We must have an order that will mean that our lawmakers must and will look to the interests of the people rather than the interests of a special few. There will be little or no relief in taxes, in pensions, in economy and all the other problems confronting us so long as our legislators continue to serve two masters. 'No man can serve two masters.' That saying is as true today as when written 2,000 years ago. 'The government of Texas must be returned to the people. If common sense, fairness, a willingness to work and the sacred interests of the people as a whole could be called a platform, such is my platform. 'I shall have only one client while in the Senate and that client will be the citizens of the Panhandle of Texas.'"

Health Notes

By Texas Department of Health

AUSTIN—Now that spring is here, Dr. Geo. W. Cox, State Health Officer, advises out-of-door enthusiasts to include protection against typhoid fever among their preparations for spring outings unless they have been immunized against typhoid within the last two to three years.

The advice applies particularly to fishermen, hikers, boy and girl Scouts, Campfire girls, and any others who are looking forward to out-of-door activities.

"The danger from typhoid has been greatly reduced," Dr. Cox said, "through the protection of public water supplies from pollution; careful medical supervision of each case of the disease and painstaking investigation of the sources of infection; improved sanitation of milk production; the sanitary supervision of other food supplies; and through individual and community cooperation in the disposal of sewage. But there are still sources of infection to which individuals are exposed, for which vaccination affords the only protection."

"Some of the danger that persists after the means of public protection have been carefully observed is literally 'handed out' by people who

are 'carriers' of the disease. A 'carrier' is a person who has had typhoid and who continues to pass germs that cause the disease, in bodily discharges, long after he or she has recovered.

"Typhoid is contracted by way of the mouth, through water, milk, or other foods contaminated by typhoid germs. Some of the most serious outbreaks have been traced to 'carriers' who were careless in their personal habits.

"Typhoid control demands constant fight against the disease through both public protection and individual precautions. Young people are particularly susceptible to ty-

phoid. Vaccination against the disease gives individual protection against typhoid. Three injections of the typhoid vaccine—a week apart—will put you in the protected class. It takes several weeks for the protective treatment to establish itself in the system. Therefore the State Health Department urges you to be immunized against typhoid now."

The Smithsonian Institution in Washington has the largest jewel in the world, an almost flawless crystal of topaz, weighing 152 pounds or 250,000 carats.

WEEKLY NEWS ANALYSIS

Nazi Invasion of Scandinavia Draws Berlin Closer to Reds; Europe Awaits Rome Reaction

(EDITOR'S NOTE—When opinions are expressed in these columns, they are those of the news analyst and not necessarily of this newspaper.)
Released by Western Newspaper Union.

The above photo was taken when Sumner Welles (right), U. S. undersecretary of state, visited Paris. With him are Premier Paul Reynaud (left), then finance minister, and another French official. When the photo appeared in the French magazine, L'Illustration, Nazi secret agents immediately charged that the map in the background showed a plan for partition of Germany. Issuing a denial, the French foreign office said the photographer had merely done a poor job of "touching up." At Washington, Sumner Welles said he hadn't even noticed the map at the time.

INVASION:

Europe's long dormant warfare suddenly sprang into action. First sign was a North sea battle in which a German troop transport was lost. If the world wondered how troops happened to be moving in the North sea, the answer was not long in coming. Fatalistically, Danes watched their little nation occupied by Germans. A few hours later Nazi troops, planes and warships descended on Norway, which immediately declared war and asked for British-French aid. Neutral for the moment were Sweden and Finland, caught between the Russ-Nazi pincers. Immediate object of the German attack: To defeat Britain's North sea blockade and safeguard Swedish steel shipments bound for Germany.

Immediately the European air was filled with question marks. Would this sudden turn of events draw Russia and Berlin closer together in a common drive against Scandinavia? Most important, what reaction would this abortive Nazi attack bring from Italy, sole major European power still at peace?

THAT TALKIE WAR:

Everybody was making speeches in England, France, Germany, Canada, and elsewhere. Mainly, they were fight talks, intended to convince neutrals, enemies, and home publics that this was not a phoney war. Premier Reynaud of France was especially insistent that the war was gen-u-ine, and broadcast as much by radio to the United States. He assured Americans that the allies would win, and would inaugurate a "real" peace.

In Germany, Airmaster Goering, Fibmaster Goebbels, and Labor-boss Ley also talked their heads off. The usually well-balanced Goering said, in a speech to some of his student flyers, that Germany was going to strike a deadly blow in the western theater of war, whenever Herr Hitler decided to finish off the allies. It all sounded very impressive. Pudgy Dr. Ley, ever bellicose, got off some of his generally pungent observations, which tend to take an anti-capitalist angle.

Prime Minister Chamberlain said he was "10 times" as confident as he was last September, and he and his generals gave the impression that, somehow, they had out-bluffed the Nazis on the western front. According to these gentry, Hitler had lost his golden opportunity for an overwhelming Blitzkrieg attack, and that from now on the Fuehrer was going to get it, economically, in the

neck. Intensification of the blockade, the English chieftains stressed. Chamberlain re-shuffled his cabinet, but seemed to satisfy nobody very much. Winston Churchill, first lord of the admiralty, who now wears a yachting cap, was made director of all three unified armed services. Churchill and Chamberlain never have been friendly, and Churchill's elevation was received with mixed emotions.

Following young Minister Cromwell's "boner" in Canada, came another "unfortunate" speech by Gordon Conant, attorney general of Tory-minded Ontario. Conant spouted that the allies might lose if the United States did not enter the war, and that Canada had better exert every effort to snare Uncle Sam in the coils of Mars. Secretary Hull was annoyed, as were congressmen,

Gordon D. Conant, attorney general of Ontario, who urged Canadians to help enlist active support of the U. S. in the allies' cause.

and also many Canadians, who believe ardently in handling the Santa Claus next door with consummate tact. Said one Canadian parliamentarian: "That's not the way!" Chamberlain's talk of increased economic warfare threatened Yugoslavia in the Adriatic, and Norway's coastal waters, bauxite and iron destined for Germany being the primary English objectives. Norway said she would defend, with arms if need be, the freedom of her shipping. Italy was infuriated by the Adriatic situation (Mussolini considers the Adriatic as his lake); and Japan, in the Far East, growled against John Bull. And speeches were made, too, in Norway, Yugoslavia, Italy, and Japan.

COUNTING SHEEP:

Roosevelt told census-takers that his income was more than \$5,000, while Senator Tobey continued to attack the personal-financial census data. He charged that some of the census "snoopers" were communists, others the creditors of their victims, and still more the enemies of the well-to-do. Secretary Hopkins, badgered on all fronts, had sent forth 120,000 of these so-called creatures, to "prey" on the estimated 135,000,000 Americans. Hopkins told his census-takers to act polite. How polite they would act with Senator Tobey, remained to be seen.

WEAPONS:

The U. S. battle fleet eased out of its San Diego Pacific base, for seven weeks of maneuver on Fleet Problem 21—activity designed to teach the boys in blue how to protect our West coast and Pacific outposts. A Japanese admiral protested, but nobody paid much attention to his ire. The navy, also, had under construction a flying boat boasting 84 tons and 9,000 horsepower, which will be good for a round-trip to Japan, where the hostile admirals grow

NAVY TEAMWORK

WASHINGTON.—On March 20, 1917, a tall, husky young man from Perth Amboy, N. J., heard Theodore Roosevelt speak at a rally in Madison Square Garden, New York. When the youngster left the meeting he was so fired with patriotism that he stopped at the first recruiting station and enlisted in the navy. He rose quickly. Because of his knowledge of seamanship, gained as a kid on the Jersey coast, he began his service as a bosun in command of a coast patrol boat. A little later he was commissioned an ensign and ordered to a transport which carried thousands of troops to France.

Today this youthful patriot sits at a desk in a second floor office of the great, sprawling, white stuccoed Navy building on upper Constitution avenue, the acting boss of the navy. That Lewis Compton is acting boss of the navy is known to few even

LEWIS COMPTON

'All you need is a good assistant.'

in Washington. He is not a politician. He is a business man who believes in running public affairs in a businesslike manner. He didn't seek out the job. It sought him out and was offered to him strictly because of his qualification.

It happened this way: In the fall of 1936, when Roosevelt persuaded Charles Edison, son of the famed inventor, to take the post of assistant secretary, the first man to congratulate him, in his office in East Orange, was Lewis Compton.

"Thanks, Luke," said Edison, "but I have no business taking this job. I don't know the bow of a ship from the stern."

"You don't need to," said Compton. "In the navy there are plenty of men who do. All you need is a good assistant. Count me in."

"Do you mean it?" said Edison. "Sure," was the reply. "What are you doing Monday?" said Edison. "Come down to Washington with me and we'll fix things up."

Won Edison's Admiration.

The two men had become acquainted only the year before, when Compton was state director of relief in New Jersey. Edison, president of Thomas A. Edison Industries, Inc., was also starting a laboratory experiment in federal housing in New Jersey, and needed some white-collar relief workers. Compton assigned relief workers to the housing project in a way that evoked Edison's admiration.

Instead of handing him a lot of butchers and bakers, he allowed Edison free range to select skilled men, regardless of politics, with the result that the New Jersey FHA had the most efficient record in the country.

This was the beginning of a mutual admiration between the two men.

A clear-sighted perseverance lies behind Compton's work today in re-organizing the navy department. He and Edison, both with the background of business men, insist that the shore establishments of the navy, which employ 100,000 civilian workmen—riveters, steam-fitters, electricians, designers—cannot be well directed by an officer trained only in commanding a ship.

In other words, you can't build submarines by throwing a steam-fitter into the brig if he doesn't salute and say "Aye, aye, sir!" The navy's shore establishments constitute one of the largest industrial enterprises in the country, and Compton and Edison hold that they should be directed by men trained in industrial management.

These and other administrative reforms of Edison and Compton are regarded as heresy by the brass-hats, but they have the support of President Roosevelt and they are being put through.

MERRY-GO-ROUND

Experts say that airplane types change so rapidly that a new plane is out of date in almost six months. Therefore, British and French purchases are enabling the United States to develop both types and factories, giving the army and navy the cream of the crop.

When the Germans got an offer of Red Cross aid from Norman Davis, they said, "No, thanks."

Decision Was Quite Just, Considering the Evidence

The magistrate was deaf, but certainly not deaf to the two men before him. The first man leaned forward earnestly.

"Sir," he exclaimed, "this man owes me a grocery bill amounting to no less than \$20, and refuses to pay it!"

The second man sprang up. "That's a lie!" he cried, indignantly. "My dog didn't bite him."

There was a pause while the magistrate reviewed the situation, then he announced his decision.

"Gentlemen," he said, "I fully appreciate your feelings, but I can see no reason why you should not combine to support your mother."

Strange Facts

Might in Mite
Ream of Love
150-Mile Shadow

The most powerful permanent magnet of its size in existence is a piece of sintered alnico, made recently in a General Electric laboratory. This bit of alloy, which is smaller than a thimble and weighs less than three-quarters of an ounce, can lift and hold 200 pounds, or 4,450 times its own weight.

The longest love-letter in the world is at the British museum. It was written by one of Queen Elizabeth's courtiers to his lady, and runs to 410,000 words, on over 400 sheets of paper.

For more than 250 years, Finland has required both men and women to be able to read and write before they are married.

El Piton peak on Tenerife, the largest of the Canary islands, rises abruptly 12,200 feet above the Atlantic ocean and, at sunrise and sunset, casts a shadow nearly 150 miles.—Collier's.

Real Freedom

The only freedom which deserves the name is that of pursuing our own good in our own way, so long as we do not attempt to deprive others of theirs, or impede their efforts to obtain it.—Mill.

Use of Food Locker Plants Increasing

COLLEGE STATION—Recent announcements that the Houston Bank for Cooperatives expects to assist local communities in financing at least fifty refrigerated food locker plants in Texas during 1940 indicate the tremendous popularity of this movement in Texas.

Before 1939, there were only two freezer locker storage plants in Texas equipped to give complete service in the handling of meat, according to C. E. Bowles, cooperative marketing specialist for the A. & M. College Extension Service, but by September at least 16 plants were actually in operation in the state. In addition, recent surveys made revealed that there were 51 plants operating or under construction in Texas prior to the first of the year.

Some of the questions which come up in connection with a freezer locker plant, Bowles believes, are: How many people will use the lockers? What are the advantages of having a locker plant owned cooperatively by those who use it? Should provision be made for year-round curing of pork?

Small plants of less than 200 lockers usually have financial difficulties unless operated in connection with a going business, such as a cooperative gin, creamery, poultry association or similar concerns. Then a part of the overhead can be borne by the older business. As a separate business unit, 250 to 300 lockers seem to be the minimum which should be undertaken.

SHORT COURSE DATES GIVEN

COLLEGE STATION—The annual Farmers' Short Course at Texas A. & M. College will be held July 8-12. H. H. Williamson, director of the Extension Service, has announced.

The annual gathering will again be divided into three sessions. The junior short course for 4-H club members and other boys and girls is scheduled July 8 and 9 and the adults will meet July 11 and 12.

County agricultural and home demonstration agents will hold their annual conference in between these two sessions on July 9, 10, and 11.

A number of special groups, including the Texas Home Demonstration Association and the Texas Agricultural Writers, have scheduled their annual meetings to coincide with the adult session.

protein, and a 10 percent protein grain mixture does the job. Spring mesquite, buffalo, dallis or carpet grass needs to be supplemented with a 12 percent protein mixture, Bermuda or rhodes grass, needs a 14 percent supplement.

Here are some sample grain mixtures: 22 percent protein—100 lbs. ground ear corn or maize heads, 100 lbs. wheat bran, and 100 lbs. cottonseed meal; 14 percent protein, same except only 20 lbs. of cottonseed meal; 12 percent protein, same except only 10 lbs. cottonseed meal; and 10 percent protein, 100 lbs. ground ear corn or maize heads and 80 lbs. wheat bran.

Since spring grass is high in water, cows should be offered all the dry hay, bundle feed, or cottonseed hulls they will eat—usually 5 to 10 pounds per day per cow.

Art Colony Planned for Summer, Canyon

CANYON—Improvements at Buffalo Courts will be started this week in preparation for the West Texas State College summer art colony.

Students enrolled in the Palo Duro School of Art will be housed in the picturesque native stone courts which during the regular session constitute the home of the athletes. The large two-story recreation hall will make ideal studios for the art colony, in the opinion of Miss Isabel Robinson, head of the department of art.

Daily trips to nearby canyons, lakes and ranches will be made by the art students. During the first six weeks of the summer session, beginning June 6, the instructors in the art colony will be Grant Reynard of Leonia, N. J., artist-in-residence, and Miss Robinson. They have exhibited widely, and Mr. Reynard is one of the nation's best professional artists.

During the second six weeks of the colony, the instructors will be Derald Swineford of Norman, Okla., who will teach sculpture, carving, and modeling, and Mrs. Alice Nichols who will be acting head of the department. Mrs. Nichols, in addition to other work, will teach metal

work in jewelry. Miss Mary Lou Roberson of Lubbock will be librarian. A director of recreation will be appointed soon.

It is the purpose of the art colony to provide here the same caliber of instruction which students ordinarily get in eastern or western art centers. Mr. Reynard, for instance, has top rank in painting and etching and is an associate member of the National Academy of Art in New York City.

CANNIBALS

COLLEGE STATION—About this time of the year baby chicks exhibit tendencies toward cannibalism.

The tendency, according to Geo. P. McCarthy, poultry husbandman of the Texas A. & M. Extension Service, is intensified by crowded conditions in the brooder house and lack of space at the feed hoppers.

Cannibalism can be controlled by darkening the windows with red paint or paper. A red light in the brooders will help. So will the feeding of clipped oats, but plenty of grit must be provided to help the chicks grind the oats.

Other chick troubles come in the form of rickets, slipped tendons, and nutritional paralysis.

Rickets is indicated by ruffled feathers, wobbly gait, sore joints, and tendency on the part of the birds to sit most of the time. Put the brooder on green range or add one-half of one percent of cod liver oil to the ration.

Chicks with slipped tendons have big hock joints and crooked legs. The addition of 20 percent wheat gray shorts to the ration will prevent this.

Birds with nutritional paralysis walk on the hock joints and their toes curl inward. Birds on green range are not likely to be affected. Milk and dehydrated alfalfa should be given to birds not on range.

Coeds at the University of Kansas, who attend the annual pig dinner of the Phi Gam fraternity, traditionally kiss the roast pig snack on the nose as it is carried around the table.

FREE COTTON CLASSING

AUSTIN—The first application for free cotton classing to be approved in the Cotton Belt for the coming season was announced today by the Agricultural Marketing Service. This application represents the Taft Farms One-Variety Cotton Improvement Association, of Taft, San Patricio County, Texas, of which county R. R. Gibbs is the agricultural agent.

George E. Miller, who is in charge of the Austin office, reports that the Taft group has 18 members who have planted 2,729 acres to Delfos 719 cotton. This is the second season that this group has availed itself of the free classing supplied by the Agricultural Marketing Service for growers who have organized to improve the quality of their cotton. The group will be supplied with daily market news reports to supplement the classing.

Instructions for making application and forms for applying can be

obtained by addressing the Agricultural Marketing Service, P. O. Box 1140, Austin, Texas.

Once a sturdy "workaday" cotton cloth, gingham is now sheer and soft and makes some of the most fashionable tailored clothes for summer. The more expensive new gingham are preshrunk and have a crease-resistant finish.

Change now to OIL-PLATING... and "the old gray engine seems more like she used to be"

At birth her cylinder walls were almost like mirrors. The more of that polish you want to keep, the more you want your engine OIL-PLATED by changing now to patented Conoco Germ Processed oil.

OIL-PLATING in your engine, like chrome-plating on bumpers, stays constantly PLATED UP. For an apparently magnet-like attraction comes to Germ Processed oil from its man-made extra ingredient, so that engine parts are surfaced with their close-held shield of OIL-PLATING... drain-proof.

Remaining fully PLATED UP in the highest-speed engines, OIL-PLATING plainly keeps Wear from doing Summer "business as usual." Wear once thrived during starting periods, but now before the starter ever starts, your OIL-PLATED engine is ready-lubricated—a positive step toward preserving the old gray engine... or a new one. OIL-PLATED cylinders long keep the roundness of youth, and that makes your Germ Processed oil keep. Change today—to Your Mileage Merchant's Conoco station. Continental Oil Co.
