

LAZBUDDY

Orville Tarter is on the sick list. Paul T. Brock filled his regular appointment at the Methodist church, Sunday.

Mr. and Mrs. Ophel Jennings and daughter, D. Ruby, Miss Lucille Meacham were Lubbock visitors, Friday.

Novelline Rink visited Eunice Whitt, Sunday.

D. Riley Jennings visited Margie Mars, Sunday.

Mr. and Mrs. Ophel Jennings attended the funeral of Mrs. Ragel at Ralls, Tuesday. Mrs. Ragel was killed in a car accident, and her husband is in a critical condition. They are the parents of Mrs. Ernest Jennings, of Lubbock.

Mr. and Mrs. O. M. Jennings spent the day, Sunday, with Mr. and Mrs. Otto Treider.

Mr. and Mrs. C. D. Julian visited Mr. and Mrs. Ophel Jennings, Sunday.

Those who visited Mr. and Mrs. B. Whitt, Sunday, were, Joe Bates Jennings, Ernest Brock, Mr. and Mrs. Paul T. Brock and daughter, Myrna Lois.

Rev. and Mrs. Leveal Merriott visited in the home of their parents, Mr. and Mrs. C. E. Merriott last week.

A. L. Pratt of Ralls, Tex., visited with the Merriotts, Mr. Batty a brother of Mrs. Merriott, from Bovina, a sister, Mrs. Barnhouse, of the Syn-dicate Hotel community.

Miss Lucille Meacham was the guest of Willa Mars, Sunday.

Rev. Ernest Jennings and son, Homer, and Grandma Jennings, of Lubbock, visited with the Jennings brothers, Monday.

Prayer meeting and singing at the M. E. Church every Wednesday night.

The Christian Workers Club met at the home of Mrs. George Graham, Tuesday afternoon. Fifteen members and three visitors were present. The program included songs, prayer and devotional (read by Mrs. A. Blackburn). Quilt blocks were set together during the social hour. Mrs. Wesley Barnes received a miscellaneous shower.

The Lazbuddy Study club met at the home of Mrs. Willie Steinbock, Thursday, with Mrs. Raymond Treider as co-hostess. Fifteen members responded to the roll call. Three visitors were present. Mesdames Geo.

Graham, O. M. Jennings and C. E. Eriscoe gave very interesting articles on the program. During the social hour a delicious plate lunch was served by the hostesses.

Mr. and Mrs. Roy White and daughter, Estelle, Thelma Jo Matthews and W. H. Gammon visited the Fat Stock Show in Amarillo, on Wednesday.

Mr. and Mrs. O. M. Jennings were guests in the Otto Treider home, Sunday.

Mr. and Mrs. Minor of Hamlin, Texas, visited in the home of W. S. Menefee, Wednesday. Mrs. Minor is a cousin of Mrs. Menefee.

We are proud to announce that Lazbuddy is to have the same teachers for the coming school term.

PLEASANT HILL

Mr. and Mrs. Maurice Clark and boys are making a trip to Temple, Tex., this week.

Aunt Sue Cook is improving slowly at the Lubbock Sanitorium.

Rev. McDougal filled his regular appointment at the Fundamental Baptist church, Sunday.

Mr. Murry, of Lubbock, a cousin of Mrs. Eula Jarrell, visited with her Sunday.

Mr. and Mrs. Clarence Jones and Jerry Paul have just returned from visiting his parents in Colorado.

Bruce Cowell had his tonsils and adenoids removed Friday. He is doing nicely.

Barry, L. C. and Margaret Lovett and Dilly and Billy Badget spent Sunday in the Smotherland home.

The club ladies finished quilting one quilt and got another half done, besides hearing Miss Wildermuth give an interesting talk. There was a good crowd out to club last week.

Mrs. Jarreldean Bell visited in the Maggie Bell home, Tuesday.

Mrs. Ethel Barnes was able to be out to Sunday School and church.

The Fundamental Baptists have announced dinner on the ground on Easter Sunday, at their new church basement, north of the Pleasant Hill school building.

Mrs. Sybil Manns has been helping Mrs. Ethel Barnes a few weeks.

Mr. and Mrs. Riley Black, from Circle Back, Tex., visited in this community last Thursday.

Electric light poles have been dropped from Mr. Pipes' place on north this week.

It is reported that Linecta Parker is recovering satisfactorily from the measles.

1,150,398-POUND INCREASE

COLLEGE STATION—As nearly 900,000 fruit trees and vines planted by Texas home demonstration club women and 4-H club girls during the past three years came into production during 1939, production of fruit rose 1,150,398 pounds over the figure for the previous year.

This factor and unusually favorable weather conditions brought the figure from 2,258,804 pounds in 1938 to 3,410,202 pounds in 1939, in the opinion of Jennie Camp, specialist in home production planning of the Extension Service of Texas A. & M. College.

For the purpose of providing future increases in fruit for home use, 72,228 home demonstration club women and 4-H girls planted 631,742 fruit trees and vines during the year. In addition, more than three million

peach or other fruit seed were planted for budding in 1940, an increase of 1,819,248 over 1938 plantings of seed.

Proper care and management of orchards were emphasized by J. F. Rosborough, Extension horticulturist, with the result that 77,547 fruit and nut trees were budded to improve varieties and numerous other recommended practices were followed, including the planting of green manure crops to increase orchard fertility.

SUDAN & SORGHUM

COLLEGE STATION—Sale of sweet sorghums or sudan grass does not release the producer from responsibility for their threshing and subsequent reclassification as soil-depleting of the land on which they were grown.

Under AAA regulations, sweet sorghums and sudan grass are considered non-depleting if they are grazed off or harvested for hay or silage, but they are considered soil-depleting if used for grain, seed, or sirup.

It is permissible for the producer to harvest his crop and sell it for hay, according to E. N. Holmgreen, state AAA administrator, but instances have been recorded in which the purchaser threshed the hay for seed or grain. Under such circumstances the AAA will reclassify as soil-depleting the land on which the crop was produced, the administrator said, and payments will be withheld.

WHEAT INSURANCE

COLLEGE STATION—Flood and other hazards of farming still bring uneasiness to the heart of the farmer.

But for the 11,040 Texas wheat farmers who took out all-risk crop insurance on their 1940 wheat crops, that uneasiness has been cut to a minimum.

After one year of watching closely the operations of crop insurance under the 1939 AAA program, Texas wheat farmers decided it worked, and as a result the number of policies in 1940 tripled the number for the previous year. Insured acreage in 1940 reached 287,000 acres, assuring the participating farmers a crop of at least 4,943,435 bushels, according to figures from the Amarillo office of the Federal Crop Insurance Corporation.

No indemnities have yet been paid on the 1940 crop, E. R. Duke, state crop insurance supervisor, reports, but adjustments will begin within a few weeks.

The 1940 AAA program placed major emphasis on the necessity for checking the enormous annual loss of fertile soil by wind and water erosion and overcropping.

Two at T. C. U.

Miss Sydna Yokley, honored by The American Magazine as the "No. 1 Ranch Girl of the Nation," enrolled as a freshman in Texas Christian University at midyear. Sydna's chief classroom interest is home economics; her chief extracurricular interest horseback riding. "I just can't imagine being alive and not riding!" Sydna says. So she brought along her favorite mount—Cinnamon—and has him quartered in stables nearby the Horned Frog campus. She and her father are joint owners of the Lazy-L Ranch near Canadian, Texas. Sydna stayed out of college last fall (she graduated from Canadian High last spring) in order to accept a starring role in the Madison Square Garden Rodeo in New York City. "I like Texas better!" is Sydna's evaluation of the bright lights.

Thousands of Young Trees Being Planted

CLOVIS—Thousands of trees are being planted this year by the Central Curry Soil Conservation District, with headquarters at Clovis. Through cooperation with the Soil Conservation Service, approximately 14,000 Chinese elms, 10,000 thornless locusts, and smaller numbers of other species, such as hackberry, black walnut, mulberry, and western red cedar will be supplied in addition to technical assistance in planting of trees, planning of tree sites, and in methods of stream bank protection.

Locations for tree sites should be carefully selected and water retention structures built early in order to provide an abundance of moisture which will be greatly needed by the young trees. In some areas farmers are considering preparation of tree sites for moisture conservation on the same basis as wheat farmers plan to store moisture for their wheat crops. The use of terraces to conserve year-round moisture can serve the same purpose whether it be for production of a wheat crop or for growing of trees. The necessity of storing moisture each month in the year for good tree production is just as essential for young trees as terraces or contour furrows are for producing good crops and good grass.

In soil conservation districts organized in Eastern New Mexico, the following practices have been found to be necessary in successful tree growth: careful preparation of the ground before planting, fencing to prevent damage by livestock, protection from fire and rodents, and frequent cultivation to remove weed growth.

Species which have made the most rapid growth and are best adapted to this area are Chinese elm, honey locust, hackberry, Russian olive, cedar, western yellow pine, wild plum, cherry and apricot. With proper care many trees have grown as much as 10 to 12 feet during a 3-year period.

Palestine, History

At the beginning of the World war Palestine had been in the hands of the Moslems since 1244 and under the rule of the Turks since 1517 it was conquered by British troops during the latter part of 1917 and when the Turkish empire was broken up by the peace treaty, Great Britain was given a mandate over the Holy Land. A civil government under a British high commissioner was established in 1920.

Health Note

By Texas Department of Health

AUSTIN—Looking out in the world with clear vision is the birthright of each and everyone, according to Dr. Geo. W. Cox, State Health Officer. Texas has many hundreds of persons that are blind or with impaired vision. These figures would be more tragic if given before the law was passed making it mandatory to use prophylactic drops in the eyes of new born babies. Since then, blindness caused by birth infections has been greatly reduced.

In the examination of school children, other diseases of the eyes are encountered quite frequently. Chief among these is trachoma. This disease is contagious and causes a destructive inflammation characterized by the formation of trachoma granulations. These gradually form scar tissue. Trachoma, if left untreated, will impair the vision and eventually cause blindness. This happens when the proper treatment is not given or the diagnosis and treatment is not given in its early stages.

Trachoma is most prevalent where

poor sanitary conditions exist. The prevention of this disease consists not only in avoiding the infection but also in maintaining sanitary conditions. Parents should watch closely for any indication of anything wrong with the vision of their children. Many diseases of the eye readily respond to treatment in their early stages, but, if allowed to develop, may seriously affect the vision if not cause blindness.

When the soles wear down, or the heels run over, or anything goes wrong with your shoes—remember, we can fix it! Try our resoling work!

Information for Taxpayers

Because of slight changes in tax regulations, we have compiled the following condensed table, to show you the importance of early payment of your taxes. Each month that you can save in time means money in your pocket:

Penalty and interest for March Payment	3%
Penalty and interest for April payment	4½%
Penalty and interest for May payment	6%
Penalty and interest for June payment	7½%
Full penalty of 8% and 6% annual interest for Jly.	11%

After July 1st all unpaid taxes go on the delinquent roll and costs are added to the 11% penalty and interest.

FARM SECURITY NEWS

Collection of funds advanced to low-income farm families in Region 12 of the Farm Security Administration for the first seven months of the current fiscal year exceeded collections for the last fiscal year by \$92,551.79, according to Thos. G. Moore, county FSA supervisor.

Between July 1, 1939 and February 29, 1940, FSA collections totaled \$2,383,781.55. This was an increase over a similar period last year of \$1,186,792.89.

Mr. Moore attributes the increased collections largely to the planned economy program of the Farm Security Administration for all farmers

who borrow from this federal agency. "This agency," said Mr. Moore, "is helping low-income farm families become self-supporting, by giving them a little financial aid and guidance in sound farm practices."

"Farm families who borrow from FSA," he continued, "are assisted in planning their farm and home operations, keeping accurate records, and getting the best possible use out of the money they borrow."

Mr. Moore said diversification, a live-at-home program, conservation practices and following approved practices of seeding, feeding and production are some of the basic factors in the success of the thousands who are becoming rehabilitated.

Although the repayment record established by thousands of farmers in Texas, New Mexico, Oklahoma, Kansas and Colorado is an important yard stick in measuring progress in rehabilitation, it is not the only index of progress, according to FSA officials.

The increased net worth of these rural people, higher living standards and better health are of equal importance in the records for the past seven months.

BIG LEAGUERS TO PLAY EXHIBITION AT LUBBOCK

LUBBOCK—Sam Rosenthal, President of the Lubbock baseball club, announced today that the Chicago White Sox of the American League and the Pittsburgh Pirates of the National circuit would definitely plan an exhibition game at the Lubbock baseball park on Thursday afternoon, April 4, at 2:30 o'clock.

It will be the first time in history that two major league teams have played a spring exhibition game in Lubbock, and Rosenthal anticipates a huge South Plains crowd at the game. The White Sox and Pirates will clash in ten exhibition games this spring, and Lubbock will be the scene of the third game of the series.

There is a strong possibility that Big Jack Knott, a well-known West Texan from Brownwood, will pitch for the White Sox in the Lubbock exhibition. Knott, right-handed curve ball artist, won 11 and lost 6 for the White Sox last season. Manager Jimmy Dykes of the White Sox has advised Rosenthal that he probably will save Knott for mound duty here.

Rosenthal has announced that the Lubbock game will feature the absolute first string line-ups of the White Sox and Pirates. Some of the White Sox stars who will definitely play here include Luke Appling, shortstop who batted 314 last season; Eric McNair, infielder, who slugged American league pitching for a hefty 324 average last season; Michael Kreevich, outfielder, who solved the American league slab artists for a 323 average; Michael Tresh, the American league's best young catcher, and Ted Lyons, veteran of more than fifteen American league campaigns who won 14 and lost 6 last season with his slow, teasing curves and change of pace.

PLANS WELL UNDER WAY FOR JUNIOR STOCK SHOW

LUBBOCK—Premium lists and entry blanks have already been mailed to over 117 county agents and vocational teachers in 39 counties in West Texas and Eastern New Mexico for the tenth annual South Plains Junior Fat Stock Show. Premiums amount to approximately \$500 this year, which is an increase over the 1939 list.

The South Plains Junior Fat Stock Show has paid to exhibitors during the past years in excess of \$110,000 for premiums and purchases. This money has been distributed to 4-H club and FFA students over 36 counties in West Texas and three counties in Eastern New Mexico. Last year approximately \$17,000 was paid out by the Show to exhibitors, and officials believe this year's amount will be even more than that.

Sponsored by the Panhandle South Plains Fair Association, the Lubbock Chamber of Commerce and Board of City Development, the show tends to promote and stimulate the practice of feeding surplus feed to livestock for home and commercial use by the people of the South Plains and adjoining counties. Extension Service and Vocational Agriculture Leaders play an important part in directing the activities of the annual event.

C. C. Jobson, Lubbock county agent, recently announced the various departmental superintendents. Heading the Baby Beef Division will be Jason Gordon, county agent at Farwell, assisted by L. M. Hargrave, vocational teacher at Wolfforth. Ralph Howe, county agent from Crosby county, assisted by L. A. King, vocational teacher at Lorenzo, will direct activities in the Fat Pig Division, while the Fat Lamb division will be supervised by Henry Elder, vocational teacher at Lubbock, and V. F. Jones, county agent from Amherst. Judges in the three divisions are W. L. Stangel, Baby Beef; Casey Fine, Fat Pig; and Ray C. Mowrey, Fat Lamb.

Wednesday, March 27, beginning promptly at 1:00 p. m., on the fairgrounds, the auction sale will be conducted by Col. Kenneth Bozeman.

POLACK CIRCUS COMES BACK TO AMARILLO FOR 4 DAYS AT AUDITORIUM

It will not be necessary to wait until the good old Summertime to see a full fledged circus, as the Khiva Shrine Patrol at Amarillo has again arranged with Polack Brothers Circus to present its complete show in the City Auditorium at Amarillo for four nights and three matinees, starting Monday, March 25th. This was such a success last year that no doubt the auditorium will be crowded to capacity, insofar as the Polack Brothers management advises that they will not only have some of the old favorites here, but many new and novel features as well. The auditorium is an ideal place to hold this offering, for not only is the crowd seated in comfy chairs, but they can

also see this fine attraction from any part of the building.

Orphans and underprivileged children will be guests at the matinees in a special section of seats, both thru the generosity of Shriners as well as merchants and charitably inclined citizens who are interested in seeing these young unfortunates have a good time.

Groups of employees organizations are also to attend on special evenings. Those unable to use their purchased tickets are also arranging with Chairman Davis of the underprivileged children committee to turn their tickets over to him so as to enable the less fortunate to attend.

Stars of the larger tented circuses have joined this large traveling circus, consisting of The Belle Troupe of teeter board stunts; the Harrison Trio, unicycle riders; The Orton Troupe and Miss Marrimote in balancing, high perch and iron jaw feats; the Flying LeClaires who on the flying trapeze offer some hazards which were not seen here last year; Miss Teresa who bears the reputation of being unexcelled for her daring the air and her heel catch from a trapeze, with Miss Mona the trained elephant, Captain Hamiter and his lions, Snider's Bears, and Betty Hilton's dog revue forming some of the animal features. This year's efforts are being made to bring the Liberty Horses here, which no doubt will appeal to all horse lovers in the Panhandle section. Eugene Randow with his famous group of clowns will have many bags of new tricks to keep the audience in an uproar of laughter, for a circus naturally would not be complete without clowns aplenty to fill in after the thrills and sensations.

REFRIGERATED FOOD LOCKERS

COLLEGE STATION—Refrigerated food lockers, within the next few years, are going to bring about a big change in many Texas farm families' way of living.

The change will be all to the good, believes H. H. Williamson, director of the Texas A. & M. College Extension Service. "We've tried to find the weak spot in the food locker plan, but so far we haven't been able to find any," he said.

Advantages claimed for the refrigerated food locker system include: Saves family \$50 to \$100 a year. Makes fresh meat, vegetables and fruit available the year around. Aids in providing balanced diet. Makes for improved health.

Refrigerated food lockers have been operating in the Mid-West and Pacific Coast for several years with marked success. Three years ago a group of Hale county farmers went to Oregon, Washington, and Idaho to study dairy cooperatives there. They kept running into food locker plants and heard a lot about the ser-

vice they were giving farmers. When they got back to Plainview, they built a 250-locker plant as a department of their cooperative creamery. The plant was so successful that another 250-locker unit was added in the fall of 1939. Now there are refrigerated locker plants—mostly cooperative but including some commercial set-ups—scattered over the Plains country, among them plants at Floydada, Falls, Petersburg, Tahoka, New Home and Brownfield; there are a few scattered in other parts of the state.

Highway Commission for the past five years, last night raised the curtain on the 1940 gubernatorial contest.

Hines, announcing that he would later issue a platform and discuss every issue pertinent to the campaign. He has been a resident of the precinct for the past decade or longer, and has become known among his neighbors and all who have known his strict integrity and honor, and for his super business ability.

Mr. Moseley, in asking the suffrage of the voters of the precinct, assures them of his strict and continuous attention to duties of the office, at all times in the interest of his constituents and to all the people of the county, and that he is abundantly qualified to administer the duties of the office, efficiently and fairly. He candidate for Governor of Texas, will make a good commissioner if Harry Hines, member of the Texas elected.

HARRY HINES CASTS HAT INTO THE RING

AUSTIN—Tossing his hat into the ring with an announcement as a candidate for Governor of Texas, Harry Hines, member of the Texas elected.

Texas-New Mexico Utilities Company

"A program of industrial development centers around the manufacture of raw materials into finished products"

Oil

LOCATED in all sections of Texas, 141 refineries manufacture into finished petroleum products 80 per cent of the State's crude oil production. In contrast, Texas processes only 3 per cent of its cotton production and none of its wool or mohair. Petroleum refining now constitutes 41 per cent of the value of all Texas manufactures.

Of the 225,000 Texans regularly employed by the oil business of the State, 25,000 skilled workmen and 5,000 office employees (a \$50,000,000 annual payroll) are employed in this one division of our oil industry.

All of the Texas oil refined in our State, whether used in Texas or shipped to other states, paid last year in taxes an average of 9.8 cents per barrel.

Sportlight

by GRANTLAND RICE

LOS ANGELES.—Two youthful, venerable, sprightly, ancient members of the sporting fraternity are setting a new record in California this spring. Both are on active duty and their combined ages reach the tidy total of 154 years.

Their names are Connie Mack and Amos Alonzo Stagg—Connie and Lonnie.

As Lonnie Stagg starts spring practice for his College of the Pacific football team, Connie Mack starts a new year as manager of the Philadelphia Athletics.

Connie and Lonnie are each 77 years old. Both have been highlights in competitive sport for over 50 years. Both go well back into the eighties for their start, so far back that only a fading few today remember the period that happened to start them off and away on the long, long trail.

GENERAL HUGH S. JOHNSON Says:

The Republicans' lot is not a hopeless one. They could win in the coming election, but they can't do it with nothing and, as has so often been said, they can't beat somebody with nobody. Their job is to recapture some of the great groups the New Deal took away from them.

The biggest of these is the farm population of the midwestern states, especially Ohio, Indiana, Illinois, Iowa and possibly Nebraska. That is not as hard as it seems, both Ohio and Illinois are distinctly doubtful now. But to make a Republican victory certain in those states they must have two things—a definite farm program, and a candidate who can convince the farmers that they really mean it.

A winning farm program is relatively easy—a direct and simple subsidy on domestic consumption financed by a processing tax and coupled with a minimum of regimentation.

Yes, a processing tax is a sales tax. So in greater or less degree is every other tax. The bulk of federal revenue is from sales taxes—apparent or hidden.

Yes, consumers will kick, but what difference does it make to them whether they pay a higher price for farm products engineered by Mr. Wallace's destructive and artificially created shortages of production, gigantic stored surplus and lost export markets, or pay the same price part in cost or part in tax? I have written this argument several times and shall write it several times more, because it is both right and important and it hasn't yet been accepted.

After trying and failing with every other farm scheme known to man, the fourth New Deal thinkers are probably aware that this is the only practical approach of the farm problem, but won't advocate it openly, not only because they did not devise it but have opposed it in favor of others which promised greater political regimentation and control.

It therefore remains available as a winning Republican weapon in the corn, wheat and Bible belts, but those great open spaces have been fooled so often by Republican promises of "equality for agriculture" that the G. O. P. would need an automatic convincer to be sure of selling them.

Grantland Rice

Ask Me Another

A General Quiz

The Questions

1. What was Edward Payson Weston's best record for a day's walk?
2. Is there such a thing as an original etching on paper?
3. Who are the Beef Eaters?
4. Was John Smithsonian, founder of the Smithsonian Institution, an American?
5. Are albino horses bred successfully on American ranches?
6. What is the origin of the Finns?

The Answers

1. Eighty-two miles, in 1867, made on a walk from Portland, Maine, to Chicago. Weston was 28 years old at the time.
2. No. An etching is drawn directly on a metal plate.
3. Beef Eaters is the popular name for yeomen of the guard instituted by the English royal household in 1485, and still in service.
4. No, he was an Englishman and had never visited the United States.
5. Yes. Unlike all other animals, these animals are foaled white.
6. The Finns are descended principally from the Mongols, though now of varying degrees of mixture.

Doan's are especially for poorly working kidneys. Millions of boxes are used every year. They are recommended the country over. Ask your neighbor!

DOAN'S PILLS

About Connie Mack

The amazing point concerning Connie Mack is the youthful spirit and the youthful keenness he still holds about his job of managing a ball club.

On this spring trip to Anaheim, Calif., he gives you the impression of a young manager anxious to make good. Yet Connie Mack has won at least nine American league pennants, and he has packed away

more than his share of World Series triumphs. He has been in baseball as player and manager for 60 years. But those 60 years have taken nothing away from the fire that still blazes in his soul. The vital spark shows no sign of any smoldering ash.

In his day he has had at least three great teams. For one reason or another, largely financial, he has had to break them up and build again. Today he is just as keen and eager to build another as he ever was before.

CONNIE MACK

Connie expects and hopes to win another pennant before he marches into baseball's Valhalla. He doesn't think it will be this year—not with the Yankees and Red Sox barring the road.

He has paid out as much money this season as any other owner has paid out—possibly more. And Connie is no millionaire. For above everything else he wants one more American league flag—one more World Series championship.

Connie Mack was 42 years old when I first met him in the Giants-Athletic clash of 1905—the series that lifted Christy Mathewson to the heights. No one could have figured then that this lean, middle-aged sportsman would still be driving forward 35 years later, as young in 1940 as he was in 1905—as he was in 1890.

He Knows the Game

What makes Connie Mack a great manager?

"He is one of the greatest I ever knew," Ty Cobb told me recently. "Possibly the greatest, when you figure the smaller bankroll he has had to work with. Connie was never a member of the driving, hard-bitten type. He would rather encourage you. But he was never any softy. He always has demanded condition and the hustling spirit. Also, he has known every angle of baseball—pitching and catching, infield and outfield play, baseball strategy, baseball psychology. And a ball player who wouldn't hustle for Connie Mack would never battle for anyone."

You have part of the answer here. You might look back over some of the cast that Connie has called to the field—
Catchers—Mickey Cochrane, Wally Schang, Cy Perkins and others.
Pitchers—Rube Waddell, Eddie Plank, Chief Bender, Jack Coombs, Herb Pennock, Bob Grove, George Earnshaw, Joe Bush.
Infielders—Stuffy McInnis, Eddie Collins, Jack Barry, Homerun Baker, Jimmy Foxx, Jimmy Dykes and many others. And star outfielders who are far too numerous to mention by name.

Patterns SEWING CIRCLE

ing about her feet, just like the one she admires on you!

Easy to make, to put on and to iron, this pattern is just as useful and practical, in both its guises, as it is charming. For the wintry weather remaining, make it up in challis or flannel. For Spring it will be adorable in chintz, gingham or percale. It's really a style she'll enjoy the year-round.

Pattern No. 8633 is designed for sizes 6, 8, 10, 12 and 14 years. Size 8 requires 2 1/2 yards of 39-inch material in frock length, with short sleeves; 3 1/2 yards in housecoat length with long sleeves; 3 1/2 yards with short sleeves without nap; 1 1/2 yards trimming.

Strange Facts

Black to White
3-Lane Sidewalk
Bouncing Checks

The whitest of all white pigments is titanium dioxide, which is made from ilmenite, a black sand. This transformation, taking five days, requires several complicated chemical processes, after which the substance is calcined at a high temperature and ground into a fine powder.

By marking off its busy sidewalks into three traffic lanes, the inner for window shoppers and loafers, the middle for slow walkers and the outer for those in a hurry, Louisburg, N. C., (pop. 2,182), has eliminated its pedestrian traffic snarls.

The eggs of such animals as sea urchins, starfish, worms, snails and even frogs have been fertilized in laboratories with acids, alkalis and salts. In fact, almost all eggs that are easily accessible to the scientist by being laid in water can be made to develop artificially.

The large hotels of New York City, in cashing millions of dollars' worth of checks annually for guests and patrons, average a loss of \$1 out of every \$2,600.—Collier's.

MAKE your school-girl daughter an every-day frock and housecoat both, with this one simple pattern—8633. Buttoned down the front, made with a princess skirt and gathered bodice sections that suggest a bolero line, it's extremely becoming to immature figures. And you can just imagine how happy a teen-age girl will feel with the long housecoat swirl-

On Guard

As a man always should be upon his guard against the vice to which he is most exposed, so should we take a more than ordinary care not to lie at the mercy of the weather in our moral conduct.—Addison.

QUICK QUOTES

THE SOLUTION

"LET the people go to work and we need have no fear as to the solution of all our other ills. Keep people out of work for another decade or less and we shall have no democracy; but we shall have a demoralized and chaotic people; and we shall indeed have lost our priceless heritage of life, liberty, and the pursuit of happiness."—U. S. Representative James C. Oliver.

INDIGESTION

Sensational Relief from Indigestion and One Dose Proves It

If the first dose of this pleasant-tasting little black tablet doesn't bring you the fastest and most complete relief you have experienced send bottle back to us and get DOUBLE MONEY BACK. This Bell-ans tablet helps the stomach digest food, makes the excess stomach fluids harmless and lets you eat the nourishing foods you need. For heartburn, sick headache and upset so often caused by excess stomach fluids, making you feel sour and sick all over—JUST ONE TABLET OF Bell-ans proves speedy relief. See everywhere.

LANDSCAPES BEAUTIFIED

COLLEGE STATION—More than 181,000 shrubs and trees were planted by Texas home demonstration club women and 4-H club girls during 1939 in an effort to beautify rural landscapes.

A report of Sadie Hatfeld, specialist in landscape gardening for the A. & M. College Extension Service, reveals that 107,991 shrubs planted by these two groups are still living.

Plantings during 1939 show a decided increase over 1938 when 72,472 native and nursery shrubs were planted, the specialist points out.

The out-door living room is becoming a familiar term and a familiar sight in Texas rural communities, and nearly a thousand of these living rooms or recreation areas made life more enjoyable for rural families in 1939.

To obtain these improvements nearly \$20,000 was spent in 1939, Miss Hatfeld says.

CHAMPION COW

BRATTLEBORO, Vt.—The first cow on the North American Continent to produce 100 pounds of milk in one day was bred, developed and tested in the state of Texas.

That cow, a registered Holstein-Friesian owned by the Texas Agricultural and Mechanical College, in 1897 produced 707.5 pounds of milk in seven days, the American record for the time over all breeds.

Recognizing the dairy possibilities in Texas, the Holstein-Friesian Association of American, Brattleboro, Vt. has just appointed R. L. Pou, Dallas, Texas, as fieldman to represent the association in assisting Texas dairymen to increase the efficiency of their milking herds.

SANTA FE CARLOADINGS

The Santa Fe System carloadings for the week ending March 9, 1940, were 17,256 as compared with 18,411 for the same week in 1939.

HURT WHILE PLOWING

Earl Magness, son of Chester Magness of the Oklahoma Lane community, sustained several broken toes on his right foot, the past Wednesday, when he slipped and caught his foot in a belt of a machine while he was plowing.

POLITICAL ANNOUNCEMENTS

OPENS SERVICE STATION

Cayson Jones, who for the past three years has been operating a small business at Hub in Parmer county, has leased the R. H. Young property in Texico and opened a service station this week.

Beginning the first of next week, he plans to offer Sinclair products in wholesale quantities to consumers in Parmer county and will make deliveries to the rural sections in this territory.

ENCEPHALOMYELITIS AGAIN

COLLEGE STATION—About a year ago it looked like encephalomyelitis, or equine sleeping sickness, was going to kill off a goodly part of the horses and mules in the United States, but apparently the disease is somewhat under control now.

At least, there were 184,662 cases of the disease in 1938 and only 7,869 in 1939. That is the report made by Dr. H. W. Shoening, chief of the USDA's Bureau of Animal Industry's pathological division, during a recent meeting of the American Horse and Mule Association.

Chick embryo vaccine produced remarkable results, and more than 3,000,000 horses and mules were vaccinated in 1939. Immunity after vaccination usually lasts for around a year.

In spite of the marked decrease in number of cases in 1939 as compared with 1938, precautions against the disease should not be relaxed in 1940. A. L. Smith, animal husbandman of the Texas A. & M. Extension Service, has pointed out.

Such precautions include vaccination and consultation with a qualified veterinarian, he said.

Since most cases of the disease occur in the spring or early summer, valuable animals should be vaccinated in April or May.

SCARLET FEVER REPORTED

A case of scarlet fever is reported in the Chas. Summers home in the Oklahoma Lane community. County officials stated Tuesday afternoon that the matter had been referred to Dr. Stover, county health officer at Frona.

FORMER TEACHER DIES

Miss Louise Jacobson, formerly a teacher in the Farwell schools, died in a Hereford hospital on Saturday of last week, March 9th, it has been learned here. The funeral was held at that city on Tuesday. No details of her death were available here.

TO THE PUBLIC

I have leased the R. H. Young service station location in Texico, and will carry a complete line of Sinclair products.

After this week, we will be prepared to make wholesale deliveries of Sinclair products in Parmer County.

I WILL APPRECIATE A SHARE OF YOUR BUSINESS

Sinclair Service Station

CAYSON JONES, Prop.

WHAT ONE KILOWATT HOUR MEANS

TO THE FARM HOME

Texas A. & M. Extension Service through courtesy Rural Electrification Administration.

28,831 TRENCH SILOS

COLLEGE STATION—Texas farmers and ranchmen stored 3,446,591 tons of feed in 13,831 trench silos in 1939.

This represents an increase of 1,629,963 tons and 11,783 trenches over 1938 totals, according to E. R. Eudaly, dairyman of the Texas A. & M. Extension Service.

"The trench silo figures are getting so big that we need some sort of comparison to grasp them," Eudaly pointed out. "For instance, if all the silage put in trench silos in 1939 were put into one trench 12 feet wide and 6 feet deep, it would reach from Corpus Christi to Ardmore, Oklahoma."

More significant was his statement that enough feed had been placed underground to feed Texas' 1,400,000 dairy cows for 125 days.

The increase in the number of trench silos and in the volume of silage stored is surprising in view of the wide-spread drought of the past year. The dairy specialist, however, said that many farmers and ranchmen had put otherwise worthless drought stunted crops into trenches. Such feed makes fair silage.

The outstanding development of the 1939 trench silo year was the large amount of threshed grain stored in trenches. Many county agricultural agents took occasion to remark that the trench silo afforded the only way to prevent weevil losses.

TO HAVE DEMONSTRATION

The Consumers Fuel association will demonstrate the new Hoame plow, Thursday afternoon, March 14, at the Fred Carson farm, six miles north of Bovina. The demonstration will begin at one o'clock and all interested parties are invited to attend.

HOME FROM SPRINGS

J. O. Ford, prominent Farwell stock farmer, returned home last Friday from Hot Springs, N. M., where he had been taking the mineral water baths for more than three weeks. He said he felt somewhat improved on his return home.

HOME FROM HOSPITAL

Miss Vivian Eason, daughter of Mr. and Mrs. Frank Eason of the Lariat community, has been returned to her home, following an appendectomy at a Clovis hospital early last week.

COMMISSIONERS MEET

The Parmer county commissioners court met in regular session on Monday at the courthouse in Farwell. However, due to the absence of County Judge Lee Thompson, occasioned by the illness of his son, most of the business scheduled to come up was postponed till next Monday, when a special meeting will be held. The minutes show that the payment of current bills was the only business taken up.

CURE FOR ECZEMA

HALE CENTER—Dr. Roger S. Knapp, local physician, is preparing a report of his findings in treating infantile eczema, to the American Medical Association, following a certain number of completely cured cases in children ranging from a few months to three years old. This disease, which has been stubbornly refusing to respond to treatment, is cured in record time with a prescription Dr. Knapp has.

Vouching for the accuracy of thirty odd cases already cured in Hale county is a local druggist, Roger Pinson, who has operated a pharmacy here for 20 years.

Dr. Knapp, son of the late Bradford Knapp, president of Texas Technological College, Lubbock, said he plans to open a clinic here for treating this disease in order to study cases for his report.

The above picture shows one method of utilizing water for tree sites, which has been developed on the Curtis farm located near Forrest, New Mexico, in the Southwest Quay Soil Conservation District. By means of properly constructed terraces, sufficient water has been stored to produce trees which will greatly beautify the farmstead, reduce wind action, and prevent erosion. Conservation of water for tree sites on farms similar to the above

can be carried out on hundreds of farms in eastern New Mexico, particularly where Soil Conservation districts have been organized.

MAY ENLARGE CURRY CO. CONSERVATION DISTRICT TO INCLUDE MORE FARMS

CLOVIS—Numerous applications have been received by the Central Curry Soil Conservation District for machinery and technical assistance

on farms which lie outside of the boundaries of the District. The present district includes 430,000 acres in the strip east and west through the center of the county. The supervisors of the district have been unable to give any assistance outside of the boundaries of the district, and feel that these services should be made available to the whole county. In order that all farmers in the county may have equal access to the assistance, a hearing to determine whether the remainder of the county

wishes to be in the district will be held at various places in the county in the latter part of March. These hearings will be conducted by the State Soil Conservation Committee, and if sentiment proves favorable, an election will be held to determine whether the District should be enlarged.

Services which have been in most demand in the district throughout the past year of operation have been use of heavy equipment for the construction of terraces, tree sites, stock ponds, pasture ridging, and water-spreading dams for gully control. Many mile of contour lines have also been run by the District at no charge to the cooperator, and if the District is enlarged, this service with machines will be accessible to all farmers within the county. Approximately 175 miles of terraces have been constructed to date, and the District has worked out plans for the construction of approximately 50 miles more at the present time, with applications for more terracing coming in regularly.

Pasture treatment through building of ridges has been carried on, and is being carried on in several farms in the district, and more of this work will be done as the machinery is released from the construction of tree sites this spring.

Parity or price adjustment rate on wheat in 1940 will be 10 cents per bushel; on cotton 1.55 cents per pound.

Co-Eds Like Men Who Have Good Manners

PORTALES—Whether or not it is true, as some one has written, that “women are making gigolos, lounge lizards and dress-maker models of men,” it is one hundred per cent true that both men and women at the Eastern New Mexico College prefer men who are mannerly.

This is the conclusion shown by a personality survey of likes and dislikes of students enrolled in general psychology courses, conducted by Mrs. Lou Berkness, psychology instructor.

Each student checked thirty personality traits of a person liked and disliked, both of their own and the opposite sex. Women voted one hundred per cent for men who were friendly, honest, and intelligent. Cheerfulness is a necessary trait for men and women, too, if the vote of the men students is an indicator of preference; and certainly the “beautiful but dumb” maid is not the popular one for the men of Eastern New Mexico College.

Eighty-five per cent of the men like an intelligent girl and fifty per cent admit that THE best girl is not beautiful.

Men are almost unanimous in their choice of the girl who is entertaining, generous and loyal. While men prefer women who are cheerful, they also demand the same quality among friends of their own sex. Women demand one hundred per cent loyalty from their sex.

Neither men nor women like one who is rude, the survey showed.

YOUNG DAIRYMEN

COLLEGE STATION—The ranks of Texas dairymen were increased by 600 4-H club boys during 1939, as these took up dairy demonstrations. This brings the total of club boys engaged in dairy calf work up to 1,817.

Of the 1,698 heifers club boys bought during the year, 1,142 will be used to furnish milk for home use. The remaining 221 will be used as the foundation for commercial herds.

With the help of county agricultural agents and club sponsors, the club boys are learning the rudiments of dairying from the ground up. Such experience, according to E. R. Eudaly, dairyman of the Texas A. & M. Extension Service, includes scientific feeding, housing, breeding and herd improvement, production of clean milk, and record keeping.

Already 254 boys whose heifers came into production during the past year are keeping records on feed

costs and production, the dairyman said. This work is comparable with that of the various dairy herd improvement associations now operating in the state, and forms the basis for culling and selection of breeding stock.

WHAT TO PLANT

COLLEGE STATION—This is the season of the year when the farmer starts figuring on what feed crop to plant for silage.

Some crops are high in per ton value; others in yield per acre.

The problem is further complicated by the fact that the value on a per ton basis differs for various kinds of livestock. R. E. Dickson of the Spur Experiment Station found that red top sorghum cane has the same value per ton as hegarri for fattening two-year-old steers. Most authorities agree that hegarri has a greater feed value than red top for dairy cattle and horses.

What the farmer wants is the crop that will return the most dollars per acre.

The following figures, compiled by E. R. Eudaly, dairyman of the Texas A. & M. Extension Service, may help farmers pick the most profitable crop for silage intended for dairy cows:

The crops are rated on a per ton basis as follows: corn, grain sorghums, sweet sorghums, sudan grass, johnson grass. The difference in per ton value is about 10 percent for each class. Thus, if corn silage is worth \$5 per ton, grain sorghum silage would be valued at \$4.50, sweet sorghum silage at \$4, sudan grass at \$3.50, and johnson grass at \$3.

The average per-acre yield for Texas runs about like this: corn, four tons of silage; grain sorghums, six tons; sweet sorghums, seven tons; sudan grass, six tons; and johnson grass, five tons.

Using the assigned per ton value and the average yield, corn would return \$20 an acre, grain sorghum \$27, sweet sorghums \$28, and so on. Since farmers have a pretty good idea of the yields of the different feed crops in their communities, the problem is one of multiplication.

Sixty-one percent—about 253,000,000 acres—of the cropland in the United States is either subject to erosion or is of such poor quality as not to return a satisfactory income to farmers.

Of the 31.8 million people living on farms in the United States, 10 million live on cotton farms, deriving either the major portion or all of their cash income from the production of cotton.

NEW LIFE

Change Winter-killed oil—and here's why to change to OIL-PLATING

Slush in the gutter is scarcely thinner and dirtier than Winter oil over-staying in your engine. Drain now, warns your judgment—and Car Manual. But get more than a re-filled crankcase. Get cylinders, rings, bearings, and other precious parts OIL-PLATED by making sure that you change to Conoco Germ Processed oil—patented.

Your Mileage Merchant puts it in at an ordinary price, in the ordinary way. But how extraordinary is the man-made extra substance in the Conoco formula, that sets Germ Processed

oil apart. For here is oil whose strong “power of attraction” makes engine parts draw glossy OIL-PLATING all over themselves and keep holding it close—as drain-proof as plating on hub caps.

Not for one instant can OIL-PLATING go draining “down home” to the crankcase. Though you're speeding the limit or parking long hours, OIL-PLATING is always faithfully maintained. All in addition to the strong oil-film of Germ Processed oil, this drain-proof OIL-PLATING helps to keep down wear. And that's how to keep your engine nearest to the oil economy of its youth. Your correct Germ Processed oil for Spring, at Your Mileage Merchant's Conoco station today, will give you the change to an OIL-PLATED engine. Continental Oil Company

NEWSPAPER'S BACKBONE

PONCA CITY, Okla.—"Newspaper advertising to assist the local bulk plant and service station operator constitutes by far the greatest single item in Continental Oil Company's 1940 advertising budget," A. J. Rabe, Continental advertising manager, said here today.

"Continental's entire campaign is designed this year to help the local distributor of Conoco products to increase his business.

"Although the campaign will include almost every kind of successful advertising medium, our unusually successful marketing record last year, when newspapers formed the backbone of our campaign was largely responsible for the bulk of our very large budget being spent for newspaper advertising.

"Small towns newspapers, incidentally, will share in this plan as extensively as the larger metropolitan dailies. The campaign will include more than 1,300 papers throughout the United States and is expected to reach more than 33,000,000 readers.

"As in the past, this year's campaign will be devoted to Conoco Eronz-z Gasoline and Conoco Germ Processed Oil and all advertising will be done in the name of the company's local 'mileage merchants.'"

AMERICAN BOY MAGAZINE COMPANION TO THOUSANDS

Hundreds of thousands of boys and young men read THE AMERICAN BOY Magazine every month and consider it more as a living companion than as a magazine.

"It's as much a buddy to me as my neighborhood chum," writes one high school senior. "THE AMERICAN BOY seems to understand a boy's problems and considers them in such a sympathetic and helpful way. It gives advice and entertaining reading on every subject in which a young fellow is interested. It is particularly helpful in sports. I made our school basketball team because of playing tips I read in THE AMERICAN BOY."

Many famous athletes in all sports credit much of their success to helpful suggestions received from sports articles carried in THE AMERICAN BOY Magazine. Virtually every issue offers advice from a famous coach or player. Football, basketball, track, tennis, in fact every major sport is covered in fiction and fact articles.

Teachers, librarians, parents and leaders of boys clubs also recommend THE AMERICAN BOY enthusiastically. They have found that as a general rule regular readers of THE

AMERICAN BOY advance more rapidly and develop more worthwhile characteristics than do boys who do not read it.

Trained writers and artists, famous coaches and athletes, explorers, scientists and men successful in business and industry join with an experienced staff to produce in THE AMERICAN BOY, the sort of reading matter boys like best.

THE AMERICAN BOY sells on most newsstands at 20c a copy. Subscription prices are \$2.00 for one year or \$3.50 for three years. Foreign rates 50c a year extra. To subscribe simply send your name, address and remittance direct to THE AMERICAN BOY, 7430 Second Blvd., Detroit, Michigan.

LEGAL NOTICES

NOTICE OF SALE

The State of Texas
County of Parmer
NOTICE IS HEREBY GIVEN THAT,

WHEREAS, by virtue of an order of sale issued out of the 17th Judicial District Court of Tarrant County, Texas, by the clerk thereof, on the 5th day of February, 1940, pursuant to a certain judgement rendered in said court in cause No. 27073-A, on January 16, 1940, styled Federal Life Insurance Company, a corporation, vs. F. W. Cooksey, et al, wherein Federal Life Insurance Company, a corporation, is plaintiff, and J. O. Fitzjarrald, F. W. Cooksey and wife Lou Cooksey, and Humble Oil & Refining Company, a corporation, were defendants (the said Humble Oil & Refining Company, a corporation, having been dismissed by the court prior to the rendition of judgement) which said judgement was rendered in favor of the said Federal Life Insurance Company, a corporation, and against J. O. Fitzjarrald, F. W. Cooksey and wife, Lou Cooksey, establishing a debt of Federal Life Insurance Company in the sum of NINE THOUSAND NINE HUNDRED DOLLARS (\$9,900.00) with interest thereon at the rate of ten (10) per cent per annum, from and after September 1, 1939, and the further sum of TWENTY & 25/100 DOLLARS (\$20.25), as cost of suit, and a decree rendered foreclosing a first, prior and superior deed of trust lien as it existed on September 1, 1939, as against F. W. Cooksey, Lou Cooksey, and J. O. Fitzjarrald;

I did on the 21 day of February, A. D., 1940, at 10 o'clock A. M., levy upon the following described lots and parcels of land situated in the County of Parmer, State of Texas, to-wit:

All that certain tract or parcel of land situated in the County of Parmer, State of Texas, being 640 acres out of Capitol League Numbered 501, 502, 503, and 504, and being all of Section or Survey Number Twenty-two (22) in Block "B", Capitol Syndicate Subdivision, as shown by plat of said Subdivision recorded in Volume 2, Pages 459 to 498 of the Deed Records of Parmer County, Texas;

and on the 2nd day of April A. D., 1940, being the first Tuesday in said month, between the hours of ten o'clock a. m., and four o'clock p. m., on said day, at the courthouse door of said county in the town of Farwell, I will offer for sale and sell at public auction for cash, all the right title and interest of the said J. O. Fitzjarrald, F. W. Cooksey and wife Lou Cooksey, in and to said property DATED at Farwell, Texas, this the 21st day of February A. D., 1940.
EARL BOOTH,
Sheriff, Parmer County, Texas

THE STATE OF TEXAS.

Notice of Trustee's Sale
WHEREAS, by Deed of Trust dated October 14th, 1925, and recorded in Volume 23, at Page 115, Deed of Trust Records of Parmer County, Texas, OSCAR POPE, for the purpose of securing the payment of eight (8) certain notes executed by the said Oscar Pope, and particularly described in said Deed of Trust, conveyed to Farwell Winston, Trustee and his successors in trust, the following described property situated in Parmer County, Texas; to-wit:

Three hundred and twenty (320) acres of land out of Capitol League Number 516; out of Capitol League Number 517; out of Capitol League Number 511 and out of Capitol League Number 510; and particularly described as the West one-half (W¹/₂) or Survey or Section Number Fifteen (15) of Township Number Five (5) South, of Range Number Four (4) East, of a "Capitol Syndicate Subdivision" as shown by Plat of said Subdivision of record in the Deed Records of said County of Parmer in the State of Texas, Volume 3 at Page 558; Subject to easement for such public roads as may have been legally established along the lines of, or across the tracts conveyed. Patented to Abney Taylor; Located about 9 miles North and 22 2/3 miles East of Farwell, Texas; and

WHEREAS, of the principal notes above referred to, those maturing on November 1st, 1927 and 1928 were extended to November 1st, 1936 and 1937 respectively, with interest thereon from November 1st, 1929, to their extended due dates at the rate of seven per cent per annum, by note

extension agreement dated August 20th, 1930, recorded in the Deed of Trust Records of Parmer County, Texas, in Volume 45 at Page 229; and those maturing on November 1st, 1929, 1930, 1931 and 1932 were extended to November 1st, 1939, 1940, 1941 and 1942 respectively, with interest thereon from November 1st, 1933, to their extended due dates at the rate of seven per cent per annum, by note extension agreement dated August 25th, 1933, recorded in the Deed of Trust Records of Parmer County, Texas, in Volume 49, at Page 425; and

WHEREAS, default was made in the payment of interest and principal which became due on said note, on November 1st, 1936, 1937, 1939, and 1939, and the holders thereof exercised their right of declaring all the notes due; and

WHEREAS, Farwell Winston,

Trustee, and Arthur F. Tuttle, alternate Trustee, named in said deed of trust after default had been made in the payment of said notes and after having been requested to execute said deed of trust, refused to execute the same; and

WHEREAS, Frank F. Ferry, Kent Chandler and Farwell Winston, as Trustees, under a Declaration of Trust dated December 23, 1933, the present holders of the notes described in said Deed of Trust, have by written instrument duly signed and acknowledged by them and dated February 28, 1940, constituted and appointed me the substitute Trustee in said Deed of Trust under the authority conferred on them by said Deed of Trust.

NOW, THEREFORE, at the request of the said Frank F. Ferry, Kent Chandler and Farwell Winston,

as Trustees, present holders of the notes above mentioned, and by virtue of the authority conferred in said Deed of Trust, I, William Q. Boyce, substitute Trustee, on the 2nd day of April, 1940, between the hours of ten o'clock A. M. and four o'clock P. M. shall proceed to sell at public outcry in front of the court house door of Parmer County in Farwell, Texas, to the highest bidder for cash the property above described and the proceeds of said sale will be applied to the payment of the balance due upon the indebtedness the expense of making said sale and the remainder, if any, paid to the said Oscar Pope or his order, all in accordance with the terms of said Deed of Trust.

WITNESS MY HAND this 4th day of March, A. D. 1940.
WILLIAM Q. BOYCE,
Substitute Trustee.
