### "Odd-Lot" Shoes Off Rationing In July

Consumers will be given an opportunity to buy men's and women's "odd lot" shoes ration-free and at markdown prices when a small percentage of shoes in these categories is released to the public during the three-week period July 9 through July 28, OPA rationing executive William G. Williams has announced.

"Odd lot" shoes must be sold to consumers at prices at least 25 per cent below the prices at which they were offered for sale on June 1.

The office of civilian requirements and OPA are requesting dealers to limit sales of "odd lot" shoes to no more than a pair to each customer, to allow more people to share in the limited stocks.

### TANKS SHOOT ON THE RUN

Much of the success of our tanks against the enemy is attributed to the Westinghouse gyrostabilizer. The 50-pound device permits accurate aiming of highpowered tank rifles despite pitching and jouncing over rough ground.

### Cattle Stomach Worms Cause Serious Losses

AUSTIN—"Sunshine can be greatly beneficial to the average individuals health or it can cause serious illness through overexposure, especially in the beginning of the summer season," Dr. Geo. W. Cox, State Health officer declared in a statement today.

COLLEGE STATION—In view of the losses from common stomach worms in cattle which are being reported all over the country, the A. and M. College Extension Service has published a new circular, "Control of Stomach Worms in Cattle", by George W. Barns and A. L. Smith and R. D. Turk, Head of the department of Veterinary Parasitology.

Dr. Cox pointed out that vacation enthusiasm often leads to acts of thoughtlessness which may be detrimental to health. One of the most common manifestations of this attitude is a disregard for the burning power of the sun. Despite frequent warnings on this danger, annually overexpose their tender skins to the sun's rays, and consequently suffer casualties ranging from mild discomforts to serious conditions. Death has been known to occur from severe sunburn when accompanied with other complications.

"An understanding of the life cycle and treatment of stomach worms is of dollars and cents value to cattle producers", A. L. Smith co-author of the circular remarked, "and since the trouble is wide-spread at this time, a few pointers on symptoms and treatment of the trouble might now be of interest."

"When first exposing the winter-softened skin to the sun, it should be realized that no defense to the sun's burning rays exist. This defense only can be developed gradually by pigmentation, that is, by a slow tanning. Attempts to force this process end in painful sunburn."

The common stomach worm lays an enormous number of eggs, microscopic in size, which hatch and develop into infective larvae within a few days. These are picked up by grazing cattle, and develop to maturity within 15 to 21 days. Animals most seriously affected are calves and yearlings, and symptoms include loss of weight, general weakness, and anemia. The skin and mucous membrane are pale, and the hair coat often becomes rough. In later stages swelling often may appear under the jaw.

The State Health Officer said that the first day's exposures to the summer sun's rays should be limited to no more than fifteen minutes, with gradual increases of time as the skin becomes increasingly pigmented. Those persons who are very fair skinned, and who are unable to sunbathe normally, should not indulge in sunbathing. Instead of the coveted suntan, they will only acquire a case of sunburn.

While it is reasonable to suspect poor, unthrifty calves and yearlings of parasitism, poor feed and other conditions may also be responsible and, for that reason, it is advisable to obtain veterinary diagnosis before resorting to treatment. Caution should be used in the various treatments, as all drugs which will kill internal parasites are dangerous and must be given in doses based on the age and condition of the animal. Directions are included in the circular for administering the three control of parasites, phenothiazine, copper sulphate and tetrachlorethylene.

### ROASTER HEATS BOND RALLY

An unused, pre-war Westinghouse electric roaster brought \$4800 in war bonds at a recent auction in Nogales, Arizona.

For Victory—Buy Bonds

### Merchants Will Not Take Loose Coupons

All shoe dealers in the Lubbock OPA district have received instructions that they are to accept no loose shoe coupons, the Office of Price Administration announced today.

more non-rationed shoes of desirable types are being produced to offset decreasing inventories of rationed type shoes.

### SANTA FE CARLOADINGS

The Santa Fe System carloadings for week ending June 30, 1945, were 30,684 compared with 33,147 for same week in 1944. Cars received from connections totaled 15,391 compared with 13,005 for same week in 1944. Total cars moved were 46,075 compared with 46,152 for same week in 1944. Santa Fe handled a total of 45,666 cars in the preceding week of this year.

### CONSERVATION BEGINS AT HOME

### YOUR FURNITURE NEEDS ITS "FACE LIFT"

Join the brigade of patriotic American home owners and conserve your furniture at a very little cost. Making old pieces of furniture look like new can be fun for the whole family. Even Junior will enjoy weilding a paint brush and slicking up the house for summer comfort.

Furniture can be quickly and easily renewed. If the surface is in good condition, merely wash, sandpaper, and dust off the piece. Then paint with your favorite color or combination of colors. Added utility can be derived by bracing and gluing unsteady articles.

PAINTS, GLUE, SANDPAER, BRUSHES and whatever other items you might need!

### Flying Garage of the Future

When that "postwar automobile" is ready for the public, a flying garage will be ready to carry it from New York to San Francisco, or to Europe. It will be a quick, though somewhat expensive, means of taking your car on a long-distance vacation trip. Photo shows a sedan being loaded into a Fairchild Packet for test purposes. Two can be carried. It also provides room for entire family.

### Conference Held On Wheat Poisoning

COLLEGE STATION—Seeking a solution to the problem of "wheat poisoning" in cattle, a group of cattlemen, wheat farmers, research men, veterinarians and others interested in the situation met recently in Amarillo to discuss the situation. Dr. Ide P. Trotter, Director of Texas A. and M. College Extension Service acted as chairman for the conference. In the opening meeting, he urged that all present feel free to express their views and to offer suggestions for assisting in the development of a uniform set of recommendations, or a program of further research on the subject.

Newton Harrell, cattleman from Claude, Texas, was named chairman of a committee of farmers and cattlemen to work out a plan of action based upon the facts presented at the meeting. Preliminary work on the organization of this committee has been reported, and the group expects to have some definite plan of procedure to announce soon. The livestockmen and farmers will take the initiative in the development of a plan of research, working with representatives of the government agencies, who will act as technical advisors.

Losses from "wheat poisoning" have become so serious that the trouble is no longer a problem for wheat farmers and cattlemen alone. It is affecting the economic structure of agriculture in the areas where it occurs, since a sound agricultural program for such areas calls for winter grazing of wheat pastures.

Discussion among the members of the group indicated that although there were many differences of opinion in regard to the trouble, all were agreed that the principal characteristic of "wheat poisoning" is that the most serious losses occur when cattle are grazing on wheat pasturage during the season when

the wheat is lush and green. No definite conclusions were reached, but most of the men present expressed the belief that "wheat poisoning" bears some relationship to mineral balance and metabolism.

### Stretching Sugar In Conserving Food

COLLEGE STATION—Corn syrup may be substituted for part or all of the sugar used in home canning or freezing of fruits, according to Mrs. Winifred J. Levenenz, specialist in food preservation for the A. and M. College Extension Service. Corn sugar may be used for the same purposes, but brown sugar or syrups with a strong flavor are not desired.

Honey may be used as a substitute for a small part of the sugar, but it affects the flavor of the fruit more than corn syrup. However, it is satisfactory for canning figs and for making fruit pickles, the specialist says. It is not recommended for use with frozen foods.

"Never use saccharin for canning," Mrs. Levenenz warns, "for heat makes it bitter." Saccharin can only be used when fruit is served, but a doctor should be consulted regarding its use for too much saccharin may be harmful.

In substituting corn syrup for part of the sugar in canning use one cup of sugar and two cups of corn syrup which is desirable from a nutritional standpoint. If the syrup is used to replace all of the sugar, the proportion should be one-half to three-fourths cups of syrup to one cup of water.

One syrup which is said to be excellent for use in canning is "invert sugar" which can be made at home and is sweeter than natural sugar or syrup. To make it, mix two cups of sugar and one cup of water. Add one-fourth teaspoon of tartaric acid, obtainable at any drug store. Cover this sugar, water, and tartaric acid mixture and simmer

### Fighting Marine at 'Death Valley'

One of the Leathernecks, driving through Japanese machine gun fire while crossing a draw, later called "Death Valley" by the men, rises from cover for a quick dash forward to another position. The Marines sustained more than 125 casualties in eight hours of fighting.

### Commercial Use Of Canned Milk Cut

To make sure that supplies of canned milk continue to be available for infants and other consumers to whom it is an essential food, institutional and industrial users are no longer permitted to use their red points for canned milk, district OPA food rationing officer Joe Brown has announced.

This restriction was necessary because increased use of canned milk by industrial and institutional users has resulted in short supplies in many areas.

A diamond dropped into carbon disulphide, a fluid used as an insecticide, will become invisible. The reason: the diamond and the fluid have virtually the same optical index of refraction.

gently for 30 minutes. Allow it to cool. The invert sugar made this way is nearly twice as sweet as plain syrup of the same weight. For a thin syrup, use one-fourth cup of invert sugar to one cup of water. This is also good for sweetening fruits, cereals, ice cream and beverages.

### RATIONS FOR ELECTRONS

Fluorescent lamps last longer if you let them burn continuously. The reason, explains the Westinghouse amp Division, is that each time one of these tubes is turned on, electrons "nibble" at the tips of the electrodes until the light-producing arc is struck. Frequency of starts, on the other hand, does not affect an incandescent lamp's longevity since it fails because the tungsten filament evaporates at incandescence until it finally melts.

**LEGAL NOTICE**

**CITATION BY PUBLICATION  
THE STATE OF TEXAS**

To: Floy L. Hoagland, the unknown husband or husbands of Floy L. Hoagland, the unknown wife or wives of William L. Barnum, Sr., deceased; and the unknown wife or wives of A. W. Lynn, deceased; Frank M. Porter and his wife, Marietta Porter; Maggie A. Jenkins, Martha Elizabeth Florang and her husband, John Florang; Sidney Lansford; the unknown creditors and stockholders of Texas State Bank of Farwell, a defunct corporation; Robert C. Jacobs, C. C. Marshall, W. J. Hickman and his wife, S. E. Hickman, Thurman Culver, Eugene L. Swenson, the unknown heirs of Belle Melugin, deceased, and the unknown heirs of J. A. Melugin, deceased, if living and if any of said persons be deceased, then the heirs, their heirs and legal representatives of such deceased persons; and to Mrs. Nettie S. Bell, Jewell A. Jacobs, Walter H. Stovall, Lee R. Stovall, and Maribel S. Moss, defendants, GREETING:

You are hereby commanded to appear before the Honorable District Court of Parmer County at the Court House thereof in Farwell, Texas, at or before 10 o'clock A. M. of the first Monday next after the expiration of forty-two days from the date of the issuance of this citation, same being the 30th day of July, A. D. 1945, then and there to answer Plaintiff's Petition filed in said Court on the 16th day of June, A. D., 1945, in this cause, numbered 1324 on the docket of said court, and styled N. L. Sharp, plaintiff, vs. Floy L. Hoagland et al, defendants, a brief statement of the nature of this suit is as follows:

Suit in trespass to try title for title to and possession of lands in Parmer County, Texas, being W 1/2 Sec. 35, all Sec. 36, NW 160 acres Sec. 37, All Sec. 38, All Sec. 39, W 1/2 Sec. 40, SW 1/4 & S 1/2 of SE 1/4 of Sec. 45, all in Block "A", Capitol Syndicate Subdivision, said County; containing 2967 acres of land, more or less, plaintiff invoking the ten and five year statutes of limitation same apply to land titles in fur-

ther support of his claim, and alleging that he was dispossessed on June 1st, 1945 by defendants, to his damage in the sum of \$500.00, and that the annual rental value of said premises is \$8000.00, as is more fully shown by Plaintiff's Petition on file in this suit.

The officer executing this process shall promptly execute the same according to law, and make due return as the law directs.

ISSUED and given under my hand and the Seal of said Court, at office in Farwell, Texas, this 16th day of June, A. D. 1945.

Attest: D. K. ROBERTS, Clerk, District Court, Parmer County, Texas.

By: Dorothy Lovelace, Deputy. (SEAL)

32-4tc

**Large Enrollment Is Expected At Texas**

AUSTIN — An enrollment of 5,000 is anticipated for the summer term at the University of Texas July 5—August 30, University officials estimate, with teachers, high school students, Navy personnel, and civilian students making up this enrollment.

Only one day will be allowed for registration—July 5—and classes will begin July 6. July 11 will be the final day for adding courses.

Three conference laboratories, especially arranged for public school teachers and junior college faculty and administrative officers, will also begin July 5.

These are the Teacher Training in Safety education, July 5—August 30, conducted jointly by the University and the state Department of Education; the Junior Curriculum Conference which opens with a three-day institute July 4; a Conference in Elementary Education and a three-weeks course in teaching English to non-English speaking beginners.

Again this summer for the fifth year, a High School Music Clinic will be held, with Dr. Archie N. Jones Professor of music education, as director. One hundred ten students are already enrolled in the Clinic, which will be held July 17—

**Defeats Mud to Win Okinawa**

Upper left shows Cpl. Charles Lissa of St. Louis, Mo., as he scrapes the mud off his boots to continue after fleeing Japs. Even the tanks and tractors had mud trouble as shown in upper right. Lower left and right, shows how the war machines had to be dug out in order to catch up with the fleeing Japs. Mud slowed up operations even more than Jap bullets.

August 23. In addition, a special Music Educators conference will be held August 16,17.

Seven hundred Naval Students will be enrolled in the summer term. Capt. R. J. Valentine, commanding officer has announced. Approximately half the number will be ROTC trainees.

Housing will be adequate, both in boarding houses and dormitories, according to reports from the deans of men and women. Although nearly all dormitory spaces are now filled, a few vacancies still exist in Newman Hall for temporary students, and in Grace Hall for Teachers. Civilian boys will be housed once again in Roberts Hall and Brackenridge Hall, dormitories formerly occupied by the Navy.

An all-University entertainment program, intramural program for men, and recreation facilities of the Texas Union will provide extra-curricular activities for all students.

Two rays of light can cross without affecting each other, according to the Better Vision Institute. The beam of a red spotlight, for instance, will pass through a green beam without changing color or deviating from its path.

**Protect Ornamentals In Summer Heat**

COLLEGE STATION—Mulches of straw, leaves, litter, cotton seed hulls or similar materials are beneficial to shrubs, trees and other ornamental plantings, and should be provided now that hot weather has arrived.

Mrs. Florence Low, specialist in landscape gardening for the A. and M. College Extension Service, says mulches are extremely helpful to roses and young foundation and screen plantings. Mulch spread between the rows or around plants keeps needed moisture from drying out quickly and also discourages weeds. In addition, decaying plant material supplies needed fertility.

The leaves, straw, dried lawn clippings or other mulch should be no more than two inches thick, Mrs. Low said. Otherwise it may absorb water from light rains and withhold this from the plants.

Leaving grass clippings on the lawn also serves as a mulch. Allowing these clippings to decay is as good for a lawn as a heavy application of compost every year. This can best be done by having the bottom knife

of the lawn mower two inches from the ground, the specialist explained. This way the clippings will dry and disappear about the roots about 24 to 46 hours after the grass has been cut. Grass two inches long makes a better turf than shorter grass, since it holds the clippings much better and retains moisture longer.

**SAVING IDEAS REWARDED**

Westinghouse employees submitted nearly 15,000 winning suggestions for saving time and material in war production last year. Their victory-speeding ideas netted them \$187,000 in awards.

About one out of every 500 children of school age in the United States is either blind or suffering from very serious impairment of sight, according to a statement issued by the U. S. Office of Education.

The planet Mars appears red to the eye because it is composed of material that reflects red light rays, says the Better Vision Institute. On the other hand, the planet Venus has a greenish tinge because of different light-reflecting substances on its surface.

### Ask for Okinawa's Independence

Emaciated and despondent, these ancient natives symbolize the age-old submission of the conquered. Upper, incredulous that the Americans had no intention of killing them or torturing them, their first request was for cigarettes. Lower, right, young mother and child symbolical of new day. Circle, 70-year-old Takara Sensei, who expects to lead a free Okinawa.

### Fitting Problems Are Style Influences

COLLEGE STATION—Whether you're buying a new dress or making around slowly. Be sure to note the fit, as practically everyone has fitting problems of some sort, says Mrs. Dora R. Barnes, specialist in clothing for the Extension Service. Nearly always a pattern or a ready-made dress will need altering, for if the shoulders are tight the waist is likely to be too large, or if the waist fits the dress is often too small in the hips.

In these busy days when one is likely to have to shop alone, Mrs. Barnes offers several suggestions by which to check when you are trying on a dress. Of course you will stand in front of a full-length mirror. Check the lines as you turn around slowly. Be sure to note the direction of the grain of the goods, and the direction of the seam lines. If your dress fits well, the crosswise yarns in the goods are parallel with the floor. They go straight across the body. Check these crosswise yarns at the bust line and hip line. Check the length-wise yarn in the sleeves with your arm hanging straight to the side.

Next look at the seam lines. Be sure the seams set smoothly to the shoulders, and that the waistline is straight and follows the natural waist curve. If the grain of the goods is straight and the seams are smooth and straight, if there are no bunches, bulges or folds, and if the dress feels comfortable, then you know you have a good fit. Style depends on fit. So it pays to look twice before you buy.

Only about two or three percent of the electrical energy used by incandescent lamps is converted into light rays. In sodium and mercury lamps the amount of visible light generated is somewhat larger.

### ODT Asks Vacation Travel Be Limited

An appeal to Rocky Mountain residents in large cities and in rural communities to "Vacation Close to Home and not travel except in cases of absolute necessity" was made by the Office of Defense Transportation in a reminder that the end of the war in Europe now means "full redeployment of armies and war materials to the Pacific."

ODT said that organizations, the military, public and private groups from Canada to the Mexican Border are being asked to acquaint "every man, woman and child" with facts about Rocky Mountain transportation requirements "which clearly show the need to preserve space for military and essential travel."

For example, ODT cited that while there has been "a slight easing of coach space, which at any time may be pushed suddenly against the ceiling, sleeping Pullman accommodations are tighter than ever in railroad history."

"Out of a total of 6,830 Pullman sleepers, the armed services are using regularly over 4,030 of these cars. As military needs become greater, even regular line Pullmans are taken. Of the 2,800 Pullman sleepers remaining in regular line use, 1,120 are held for government military reservations up until train time. On some Western roads, the proportion is even greater. This means that up to train time only 1,680 Pullman sleepers are actually available for civilian travel in the entire United States as compared with a total of about 7,000 before the war."

"It is no wonder," ODT declared, "that sleeping reservations are hard to get. Everyone knows that after three years hard work and privations, folks now are getting itchy feet to go places. But, we frankly ask them to apply the vacation salve by using local transportation to

nearby resorts and recreation areas. Success of the war effort to beat the Japs needs the help of everyone in continuing to avoid inter-city vacation travel."

### HATCHERIES STEP UP OUTPUT

COLLEGE STATION—Texas commercial hatcheries went into high gear during May and more than doubled their output of the corresponding month of 1944.

According to a report from the Bureau of Agricultural Economics, Austin, received by the A. and M. College Extension Service, the hatcheries produced an estimated 10,500,000 chicks during the month, compared with 5,400,000 in May, 1944. The average for the five years 1939 to 1943, was 6,823,000.

The outlook for less beef pork and

other meats for the remainder of the year has created a sustained strong demand for meat breed chicks, the report said. Light breed hatching eggs were ample but quality was lower due to hot weather. Eggs for meat breeds were somewhat scarce. The BAE report forecast that most hatcheries would continue moderate operation through the first half of June. Some will produce chicks for broilers and other meat purposes throughout the season in accordance with demand.

Comparative totals by the BAE show that from January through May, Texas hatcheries produced 45,292,000 chicks, against 42,700,000 in the corresponding five months in 1944.

The Average size of Texas Counties is 1,037.97 Miles.

### Show Social Security Card To Employer

With many returning servicemen entering the labor market for the first time, and with students getting jobs, James L. Farmer, manager of the Amarillo office of the Social Security Board advised all workers to "show their social security account card to every employer for whom they work".

This is essential to protect the worker's wage record, which is maintained under his name and number for his future monthly insurance benefits, Farmer pointed out. For example, there are approximately 575,000 Smiths on the Social Security Board's records and, therefore, there are approximately 575,000 accounts under the name of Smith. It is important that no two Smiths have the same number.

In stressing this point of a number for a worker's lifetime, Farmer pointed out that employers are required to report each worker's wages, under both his name and number to the government every three months. Then these wages are credited by the Social Security Board on each workers' individual ledger sheet, under both his name and number.

For these reasons, Farmer said all workers in industry and commerce should follow this advice:

1. Show your card to every employer for whom you work.
2. Make sure that he copies both your name and number correctly so that your wages may be credited to your account.
3. Hang on to your card. If you do lose it, get a duplicate. Never get a different number. Two numbers may cause some loss of wage credits and consequently of benefits. If you have more than one number, go to the nearest Social Security Board and see which one you should keep. You need only one number throughout life.

### GIVE YOUR RUG NEW LIFE

COLLEGE STATION — Putting new life into rugs is a process which can now be done successfully at home and though this particular task is not often necessary, there come times when rugs wrinkle easily, become limp and without body, and are hard to keep straight on the floor. The re-sizing process requires the right glue, which may be purchased in a hardware or department store.

Plan to do the re-sizing in a room where you can leave the rug to dry thoroughly, at least 24 hours. Lay the clean rug—nap-side down—on the smooth floor. Tack it at intervals so it will stay straight.

Make a half-gallon of the re-sizing mixture by adding two quarts of boiling water to a quarter pound of flake glue. Dissolve the glue well and apply to the back of the rug, either by sprinkling it over the back surface, or brushing it on with a brush. A whitewash brush, a paint brush or a whisk broom will serve this purpose. Use the glue sparingly, for if it penetrates through the back of the rug it will stiffen the pile.

With this home process, the rug will take on new life and look like new.

### HEALTH SAFEGUARDED

By virtue of a new Westinghouse X-ray machine, camera-equipped, as many as 2000 school children can now be examined in a single day to guard against tuberculosis.

### NEW WIRING PREREQUISITE

If she dreams of enjoying the many electrical conveniences available after the war, the American housewife first must be prepared to have her home re-wired, warns a Westinghouse expert. With present wiring, only one home out of twenty could handle such appliances.

Farwell, Texas.

### M-Sgt. Lindop Arrives Home From England

Master Sergeant D. K. Lindop, who has spent two years stationed in England with the 8th Air Force, arrived home last weekend for a visit with his wife, formerly of Amarillo, and his parents, Mr. and Mrs. George Lindop, of near Farwell.

Interviewed on Tuesday morning, Sgt. Lindop stated that he was never actually in combat, being a communications chief in a particular group at his base. In such work, he went on, he was responsible for overseeing that plane radios were checked and back in shape after each bombing run made over Germany and occupied Europe.

Lindop came into the States on the Queen Mary, which docked in New York a few days ago, and received his furlough from Fort Bliss, Texas, where he will report for return to duty on July 31st. From there he will go to South Carolina, where his group will reassemble for definite orders.

"I don't know whether we'll be assigned here in the States, or draw 29s and head for the Pacific," Lindop told friends, adding with a grin, "Guess I'll just wait and find out." Concerning a discharge he laughed and said, "Well, I've got the points, but whether or not they will turn me loose remains to be seen." He added that before his group came in the majority of boys holding sufficient points for a discharge were asked if they would sign up for the duration. "Of course, we told them 'No' . . . figured they could keep us if they wanted to, and there was no use sticking our necks out."

Speaking of the high degree of precision attained by the Air Force in the bombing of Germany, Lindop said that shortly before he came in home, he made a flight over the Continent to witness the devastation sown by Allied bombers. "You take a little town, the size of Farwell, where they had a small factory—or we thought it was probably a factory—that place would be literally ripped open," he said. "Such towns as Cologne, Mannheim and others just had hulls of buildings all over. Our men dropped incendiaries and most of the buildings were gutted, then the top stories would fall through and pile up six or eight feet deep on the bottom floor. All the buildings are stone and most of the walls were left standing, with the insides completely gone."

During his stay in England, Lindop reported that he contacted only one local boy, despite the fact that others were in his area. "I found out where Herbert McDaniel was, and when a Texas-Oklahoma reunion was slated we managed to get together."

Drinking his fourth cup of coffee, the local boy stretched and opined that nothing was quite like being home ". . . with Mom's cooking."

Mr. and Mrs. Woody McDermitt of the City Cleaners, plan to leave the latter part of the week for Houston, where they will spend a few days looking after new equipment for their establishment. During their absence the place of business will be closed.

### Worley Finds—

(Continued from Page 1)  
ple, the future jet plane can travel 800 miles an hour. As pointed out above, the V-2 travelled at 3600 miles an hour and please bear in mind that the Nazi scientists and engineers were just beginning to develop this type of bomb.

I was in the following countries: Germany, France England, with a low level flight over Belgium on our way to the coast. Then Italy and Greece, Egypt and Palestine, the Holy Land, and back into North Africa. It sounds very strange to hear an Army flyer in Egypt, for example, say he was in India yesterday and that everything was fine; or that he was back in Washington day before yesterday and the weather was hot.

It is indeed a small world—and as I heard one of our GIs in Europe say, "Maybe that's what's wrong with it."

### Local Triple A Office Without Supervisor

Mrs. Herbert McDaniel, who is acting temporary administrator of the local Triple A office, said today that she had no idea when a successor would be named to take the position left vacant by the recent resignation of Ellis M. Mills.

Mills left last week for an assignment with Commodity Credit Corporation in Washington, D. C., after having served as administrator of the Parmer agency for two years. "We don't know when we'll have a new supervisor," Mrs. McDaniel told a Tribune reporter adding that a representative from the State headquarters was due in this week to discuss the situation.

Another resignation, that of Eugene Kistler, was announced. Kistler had been training with the AAA for supervisory work.

West Texas State College at Canyon has an average enrollment larger than the average attendance at Lehigh, Bucknell, Cornell, Colgate or Washington and Lee.

You won't have a thing to worry about when you bring us your country produce. We'll take complete charge, give you honest weights and accurate tests on every transaction.

### Frozen Feet Take Vigil Off The Firing Line

More interested in his new bride than in recalling his overseas combat duty, Ernest Vigil, Texico soldier, casually discussed life as a machinegunner in the 71st infantry of the 44th division with a Tribune reporter, Monday afternoon.

Vigil was overseas for a year and a half, most of which time he spent as a member of a detached unit doing MP work in London. "That country! Rain or fog . . . fog so thick sometimes you couldn't hear yourself talking," he exclaimed. "But it was beautiful—when the sun was shining."

When the 44th went into combat in Alsace Lorraine last September, Vigil was on a machine gun, and shortly after the division cracked the Seigfried line, in May, he was hospitalized with frozen feet. "Hadn't had dry feet since I went into combat," he recalled. "We were always soaked . . . dig a foxhole just about a foot deep and the water would start coming through . . . you'd sit there in water up to your neck but be glad you had a hole to get in!"

The fighting was erratic, Vigil revealed, telling of a particular drive when his outfit was after a railroad point. "We fought over that railroad all day," he said. "First we'd push them back and take it, and then they'd come in strong and push us back . . . One time we spent about four or five days doing that kind of fighting, gaining and then losing ground . . . Other times they would manage to pin us down for maybe three or four days."

"It wasn't so bad in the early days down there, around Colmar," he said, explaining "we weren't up against the true Nazis then. You could fire a few rounds and they'd quit, but when we hit the Germans it was pretty rough. We'd hit those pillboxes in the Seigfried with everything we had, and they were hard to crack. Some reporter wrote a story about the 'German pillboxes that could be taken with a bayonet' . . . well, I've seen a 500-pound bomb bounce off them," Vigil said.

The Germans were dirty fighters, he added, telling of occasions when a group would wave a surrender flag and the order would go down the line for the Americans to cease firing. "As soon as we did, they'd open up on us with everything they had," he said.

The Texico boy was returned to the States about a month ago, and is slated to report for another checkup at Santa Fe the 10th of this month, "unless I get an extension on my leave." Questioned as to whether or not he would return to the 44th, Vigil replied in the negative, adding that he would not be reassigned to infantry duty.

Vigil and Miss Ceverina Ortega, of Amarillo, were married June 27th in Amarillo, by Justice of the Peace Carder. They are making their home in Texico until he reports for reassignment.

### MARINES NEED RECRUITS

U. S. Marine Corps will enlist 100 17-year-old men during the month of July. Those enlisting now will serve for the duration and six months. Men who would like to go to duty at once may do so, or can be placed on inactive duty for a period of 30 days. All men will take boot training at Parris Island, S. C. Applicants should write or call at the U. S. Marine recruiting office, 217 PO Bldg., Lubbock, enclosing their birth certificate.

### Lend-Lease Shipments Decline During May

Food and other agricultural commodities delivered by the WFA for war claimant groups during May were on the downgrade, with lend-lease commitments accounting for 70 percent of all shipments, according to E. C. Munro, acting district representative, WFA's office of supply.

Total purchases for the month approximated 983,367,162 pounds, he said.

The United Kingdom and British services will receive 50 percent of the 698,875,965 pounds of lend-lease commodities, followed by Russia with 28 percent. The balance will go to metropolitan France, French West Africa, French North Africa, Foreign Economic Administration, Belgium, Greece, the Netherlands, and several other countries.

Other groups sharing in monthly shipments include UNRRA, the Red Cross, foreign relief, Caribbean stockpile programs and several domestic agencies. Some cash sales also were made to the armed forces, constituting only a small percent of total food required for this purpose, Munro explained.

Grain products headed the list of specific commodities earmarked for lend-lease, accounting for 48 percent of all deliveries. Other shipments included meat, dairy and poultry products, cotton and fiber products, special commodities, fruits, vegetables, and fats and oils.

### More Gas Obtainable For Servicemen

Additional gasoline may now be obtained by servicemen having furloughs of more than 30 days, the OPA Rationing division announced.

Furlough gasoline will still be issued at the rate of a gallon a day, but the 30 gallon limit is being removed for the benefit of released American prisoners of war who get leave or temporary duty assignments for 60 days in this country, and for those members of the armed forces who return from overseas and get more than 30 days leave.

The service man applying for furlough gasoline rations should apply at any local War Price and Rationing Board, take along the mileage rationing record for the car to be used, and be ready to show his furlough papers.

Service men on terminal leave before discharge are eligible for furlough gasoline rations at the rate of a gallon a day until the date of discharge, but the maximum of 30 gallons still applies in these cases.

### Benger Is Discharged From Navy, June 22

Johnnie William Benger, Ship's Cook Second Class, arrived in Farwell the latter part of last week, after having received a discharge from the Navy on June 22nd.

Benger, whose home is in Friona, entered service in June 1942, and spent some time overseas. He received his discharge from the naval base at Portland, Maine. His wife, the former Florine McMillian, has been making her home in Farwell for the past few months.

Twenty-one engineering students at the University of Texas were initiated recently into Tau Beta Pi, highest honorary fraternity in the College of engineering.

### ANOTHER COMBINE ACCIDENT

Cecil Berry of the Wilsey Switch community, is in a Clovis hospital, suffering from injuries sustained in a combine accident last Sunday afternoon. It is understood he suffered the loss of at least one finger and a badly crushed hand and forearm when he became caught in the cylinder of a combine.

### FOUR NEW REGISTRANTS

Four new registrants were announced for the month of June by Mrs. Bessie Lee Henneman, clerk of the local board. They were, Raymond Godfrey Treider, Jr., Elbert Wendell Rury, Theron Belmar Vaughn and Freddie Ray Hall, the latter two being discharges.

### GOOD FISHING TRIP

District Judge and Mrs. John Albridge and children and Mr. and Mrs. Lee McElroy returned Sunday evening from a fishing trip and outing which took them to Red River and Eagle Nest Lake, New Mexico. A large number of Dalhart people were also in the party, and an excellent catch was reported, with the local men bringing home sufficient evidence to uphold their claims.

### SPARKS IMPROVING

Clyde Sparks, of the Fairfield community, southwest of Texico, is reported to be showing satisfactory improvement in a Clovis hospital, where he is receiving treatment. Sparks suffered the loss of both feet at the instep about ten days ago when he got caught in a combine cylinder while harvesting wheat.

# Notice

Next Saturday, July 7th, we will close our doors promptly at 6:00 P. M. and remain closed during the following week, while our establishment is being redecorated and remodeled throughout.

We will be open again for business on Monday, July 16th.

Please call and get your clothes before we close next Saturday. No cleaning work will be accepted after Thursday noon, July 5th.

Your co-operation is solicited in order that our customers might not be disappointed.
