

## Rev. Keller To Conduct Revival Services Here

Rev. L. O. Webber, pastor, has announced that the local Church of the Nazarene will present Rev. Orval C. Keller in a series of revival meetings, beginning July 17 and continuing through July 28.

Rev. Keller has served as a pastor,

home missionary, district superintendent and evangelist, having ministered in nearly every state in the union and in Canada. His experiences are broad, as he has traveled from coast to coast and from Hudson Bay to the Gulf of Mexico in his ministry. The music will be under the direction of the Gunstream sisters, who will render special music at each service. Services will begin at 8:00 p. m. each evening, Texas time. Rev. Webber extends a cordial invitation to all residents of the community to join in the revival services.

## Ex-Soldiers Allowed To Vote In Primary

In an opinion, Attorney General Sellers has ruled, in substance, that all ex-soldiers who are otherwise qualified will be allowed to vote in the forthcoming primary election.

All the former GI has to do is prove to the election judges that he is otherwise qualified, and he will be entitled to cast his ballot without an exemption certificate or poll tax receipt.

Local officials were inclined to believe that the opinion of the Attorney General was purely a political one, but it would likely be the rule to be followed in Texas this year.

### TOM DEEN HERE

Tom Deen, candidate for the State Legislature, was here last Saturday in the interest of his candidacy.

## Father Of Bovina Man Is Killed By Truck

The following account, taken from the Amarillo Daily News of July 8, tells of the accident that took the life of C. E. Trimble, 72, father of George Trimble, a long-time resident of Bovina:

Charles Edward Trimble, 72 years old, died last night in an ambulance before he reached the hospital, from injuries suffered when he was struck by a truck.

Trimble was injured when struck by a truck on River Road about a mile north of the city limits and near the intersection of Bonita and River Road. The accident occurred at 9:50 o'clock. He lived at 115 Bonita.

Driver of the truck which struck Trimble was James Franklin Eustace, 67 years old. His address is Rt. 3, Box 217. He was on his way home from a plowing job.

Trimble was struck by the left front corner of the grain bed mounted on the truck. Two persons were eyewitnesses, J. L. Holcomb, 118 River Road, and C. L. McLean, 128 River Road.

They were on their front porches when the accident occurred they told Highway Patrolmen who investigated the accident.

Information from the two men said Trimble was standing on the west side of the road. He started to the east side and got about two-thirds of the way across when he apparently noticed a car coming west into River Road from Bonita. He hesitated, then turned back. Trimble took about four steps back toward the west and then again started for the east side.

Probably he never saw the truck, patrolmen said.

Eustace swerved the truck in an effort to miss the pedestrian, eyewitness reports to police said. The front of the truck missed the man but he was caught by the left front side of the grain bed, which protrudes over the edge of the truck about 18 inches.

The body was taken to St. Anthony's Hospital by a Griggs ambulance. He is survived by his wife, Mrs. Lena Trimble; four sons, O. B. Trimble, Dimmitt; George F. Trimble, Bovina; Dock Trimble, Mobeetie; and Stanley Trimble, Sunray; two daughters, Mrs. R. T. Bailey, Amarillo, and Mrs. Lowery Walker, Hierford; and 18 grandchildren.

### VISIT EAGLE NEST

Mr. and Mrs. O. C. Sikes and Mrs. Mrs. Earl Lewis spent last weekend at Eagle Nest, N. M. Sikes says the fishing was very poor while they were there, otherwise they had a pleasant outing.

# Showers Speed Up Farming Activity

## Meat, Butter and Milk Prices Climbing

Increased prices on milk, meat, butter, flour, bread, sugar and cheese were reported by local merchants this week, following the removal of price restrictions and the consequent death of subsidy payments to producers of meat and dairy products.

A checkup showed that milk had taken a three-cent hike per quart, and that butter was also soaring, although most merchants could not give the exact price per pound for the simple reason that they had not been able to obtain any. Cheese, on the other hand, which had been selling from 85c to 90c per two pounds, is now listed from 98c to \$1.05 for the same amount.

Higher prices were also reported on the meat front, but no one could give a definite price, since they had little or no meat. Roast is now selling from 12 to 15 cents higher per pound and hamburger has climbed three cents, with other beef apparently in proportion. Bacon was up 5c a pound last week, but none was to be found today at any price. No information was available on other pork—"we just can't get any".

Flour, which has been listed as on the "growing scarce" list for some time, is now costing merchants about 45c more for 50 pounds than the price they had asked on sales a week ago. Sugar has hiked about 1/2c per pound and bread shows an increase of 1c per loaf.

Local fountains, contrarily, reported no increase in the price of ice cream. The scarcity of meats was explained by local butchers as due to the fact that their handlers are afraid to purchase beef at the price it now commands, lest OPA is re-instated and they would be forced to take a loss when they sold to markets.

Actually, meat is not scarce, as is witnessed from livestock yard reports all over the country. The rise in price is easily accounted for by the fact that price has been kept down with one hand while subsidies have been paid with the other, and both price control and "gravy" payments went out a week ago. In order to pay higher feed costs, allowed under OPA previously, meat animal owners, now deprived of subsidies, must demand higher price. The same factor accounts for the increase of price on all other dairy products.

Need letterheads? Dial 2131.

## C of C Called For Important Meeting

### TAKEN TO LUBBOCK

J. P. Spurlin, long-time Texico resident, who has been receiving treatment in a Clovis hospital the past eight weeks, was removed to Lubbock the first of week, where he was scheduled to undergo a major operation. He has been desperately sick and relatives reported the first of the week that little hope is held for his recovery.

## Thigpen Moving His Blacksmith Shop

Stanley Thigpen, who has been operating a blacksmith and welding shop in the old Sellman location in Texico the past several months, is moving his shop to the former Thomas warehouse just north of the Phillips 66 station in Texico.

Thigpen said this week that his place of business would operate under the name of the Texico Blacksmith Shop. He has added several new pieces of equipment, and said that more additions would be made just as soon as obtainable.

Paul H. Schmidt bought the Thomas building some time ago, and it has recently been overhauled and made ready for use. Schmidt will occupy the rear of the building with his several patents in fence building equipment which he has been putting on the market lately.

## Absentee Voting Is Now Open Here

County Clerk D. K. Roberts announced today that parties desiring to vote absentee ballots for the coming primary election may do so now by making application at his office.

The ballots were printed and turned over to the County Clerk last Saturday. Absentee voting was opened in Texas on Monday, July 8, and will close on Wednesday, July 24.

Out-of-town residents who wish to vote in the primary, and who will be absent from their voting precinct on July 27, must first write the County Clerk, asking for an application for absentee ballot. This application, properly executed, must be returned to the clerk's office before the actual ballot can be mailed to the voter.

Voters who are in their voting precincts now, but who expect to be absent at the time of the election, should appear personally at the office of Clerk Roberts and execute the proper papers to entitle them to ballots.

## Bank Deposits Show Healthy Increase

An increase of slightly more than \$360,000.00 in deposits in the Security State Bank, Farwell, during the past six months is noted in the official statement of the bank, published in this issue of The Tribune.

The official statement, as of June 29, shows deposits amounting to \$2,271,102.75, as compared to \$1,901,462.73 on December 31, 1945.

In addition to the above increase in deposits, G. D. Anderson, active vice president of the bank, said the deposits had risen "about two hundred thousand dollars" since June 29, explaining that movement of wheat was responsible for the healthy increase.

He expressed the opinion that deposits would continue to climb until the 1946 wheat crop was disposed of by the producers of this county.

## To Demonstrate Wire Winder

Paul A. Schmidt, inventor of the Wonder Wire Winder, is seeking at least ten jobs of wire winding on ten separate farms in this or adjoining counties, and will wind up a full mile of wire on each farm in a special free demonstration. Schmidt can be contacted at the Texico Hotel.

The Board of Directors of the Farwell Chamber of Commerce has called a meeting of the local organization to be held on Thursday night, July 11th, in the homemaking room of the Farwell High School, and an urgent request has been issued to all members to be present.

The meeting will get underway at 8:30. Light refreshments of coffee and doughnuts will be served. "We've got too much to do to take up time eating," President C. M. Henderson said today.

Henderson said some vital business matters were to come before the body and he was anxious that every business and professional man of Farwell be present, regardless of whether or not they were active members of the chamber.

Several important committee reports are to be made and discussion of other matters, vital to the interest of the town, are to be discussed, Henderson said.

This will be the first general meeting of the body to be held since it was organized some months ago, and naturally, there is an accumulation of business. The constitution and by-laws of the local organization will be submitted for adoption.

Henderson added that the meeting was not limited to members of the organization, but would be open to anyone, especially farmers, interested in the civic development of the community, and he hopes to have a good representation of members as well as non-members.

## Two New Teachers Are Employed For Texico

Supt. B. A. Rogers announced on Wednesday morning that two vacancies have been filled by the Texico school board of education, with Mrs. Frank Seale being named as a grade teacher and Warren G. Harding, Jr., elected to handle junior high work in the seventh and eighth grades.

Mrs. Kitty Russell, who instructed in commercial work and other high school classes, has tendered her resignation, Supt. Rogers added, and the vacancy has not yet been filled.

## Second Dial System Is Operating In County

Bovina is the second town in Parker County to boast a dial telephone system, which was scheduled to go into operation this week, as installation was practically complete last weekend.

Texico-Farwell residents have enjoyed the use of dial telephones for the past several years, and announcement was also made by the Southwestern Bell Telephone Company that Friona would receive a dial system just as soon as material could be received—likely within the next 30 to 90 days.

Reports were to the effect that, although a number of telephones are yet to be installed in Bovina, the new automatic switchboard is already heavily loaded.

## Henderson Raises Head Houses At Elevator

Workmen have been busy the past few weeks raising the dual head houses at the Henderson elevator an additional 16 feet.

One of the jobs was completed the first of the week and work has already started on the second. In addition to raising the head houses, storage capacity at the elevator is being increased.

### RICHARDS WORKING

Floyd H. Richards, of Dalhart, candidate for District Attorney, was in Farwell last Wednesday campaigning. Richards said it was his plan to make a house-to-house campaign in every town in the district between now and the election date.

Insanity seldom develops in a person under fifteen years of age.

Showers, varying sharply in the amount of precipitation, have been falling over Parker County during the past week, with the result that practically all of the county has received beneficial moisture and farmers are in the fields with renewed activity.

The principal activity has been occasioned in planting operations for a feed crop this coming fall, and indications are favorable for a fair crop. Prior to last week, widely scattered showers had brought sufficient moisture to some parts of the county, allowing farmers to get their crops in, and in some localities, farmers are reported to have their crops worked out the first time.

The most favored section of the county appears to lie to the south of the Santa Fe rail line, running north-east of Farwell to Lubbock. In the Lariat section, many of the farmers have completed their plantings, most of the crops are up, and in some cases the first plowing has been done. Another favored area, reports indicate, is the Lazbuddy section in the extreme southeastern corner of the county, where most of the crops are up and worked out.

The Oklahoma Lane community, generally considered about the best feed crop area in the county, has remained distressingly dry all summer. Some moisture fell there last Sunday, but it was not general throughout the community. However, most of the farmers in that locality are reported to be planting this week.

Along the eastern edge of the county, crops are reported to be up to good stands, thanks to occasional showers that have visited that section. In the Rhea community, most crops are late and there is yet much planting to be done, reports say.

With the coming of the showers, wheat land that has recently been cleared of the crop is being rapidly turned in preparation for planting again this fall. Indications are that considerable land in the county will be summer fallowed and allowed to lay out this winter, so far as wheat is concerned.

Range conditions, that had become distressingly acute in the county during the past several weeks of continued dry weather, are showing improvement, with green grass appearing for the first time this year, and stockmen claim that sufficient moisture during the remaining weeks of summer will insure ample grass before a killing frost this fall. Lack of grass has caused the movement of many hundreds of head of cattle from the county during the past several weeks but most small stockmen are staying with their herds, hoping that range conditions will improve as more rain is yet expected as the summer advances.

## Hinchey & Meeks To Have Public Sale

J. A. Hinchey and Lee Meeks have booked a general farm sale, to be held on Tuesday, July 16, on one of the Lee Sudderth farms, located five miles up the Amarillo highway from Farwell, and 1 1/2 miles east.

Sixteen good dairy cows, all of which have been tested for tuberculosis and Bang's disease, will be the principal feature of the sale. In addition, a good collection of household goods, including some highly critical items, will be offered. Farm machinery and hogs make up the balance of the list.

The sale, which will be handled by Col. Dick Doshier, will get underway at 12 noon, and the terms of the sale will be cash. Col. Doshier also invited consignments to the sale.

A complete list of the offerings will be found in this issue of The Tribune.

### DISCHARGES FILED

Charlie Mayo Phipps, Seaman First Class, received his discharge at Norman, Okla., on February 20. He entered service in July, 1944, has the victory and American area colors, the A-P ribbon with one campaign star and the Philippine liberation ribbon.

Charles Dean Bates, Yeoman Third Class, was released from the Navy at New Orleans on June 4th, after serving since August, 1943. He has the victory and American area colors.

# Occupation Army Captain Reveals Interesting Sights From Travels In Conquered Countries

(Note: The following are excerpts from letters written by Capt. L. W. Graham, brother of W. H. Graham, who is now overseas with the Army of Occupation.)

Sat., May 25  
Started from camp 4 p. m., rode by truck to Penn RR station, where we loaded a truck load of baggage into our waiting train. We got seated comfortably, when someone announced we were in the wrong car. So our trusty guide announced his mistake; while we unloaded the truck load of baggage, the skilled guide started out to locate the proper car—came back to inform us that not only were we on the wrong car, but we were also on the wrong train. So we grabbed up baggage, duffle bags, Val Paks, suit cases, ditty bags, radios, kodaks, lunch boxes, bird cages, etc., and the caravan again started for a new location. Right car, right train this time. 35 MAC (medic) offices, 1900 enlisted men (negroes).

On deck to see sights of waterfront. Boats, ferries, tugs, battle wagons, anything you might mention. Soon the waterfront was ablaze with lights. . . . stayed on deck until the tugs pulled us out to sea about midnight and the million lights of Jersey, Brooklyn, Coney Island faded to be uphill. . . . went on deck to watch the sunset. Very beautiful. in the rear . . . Had a big argument

about the time. Part of our officers came in from the west, CST, railroads use EST, camp and N. Y. use daylight saving time, but aboard ship we use Greenwich time. The gang went crazy trying to get watches set. But I didn't have a watch so had nothing to worry about. I just eat when they blow the whistle.

Sunday  
Went on deck to look at the briny deep, but fog was so thick could only see about 100 ft. . . . put on my raincoat and sat on the rear end of the caboose. . . . learned how simple is the ship's garbage disposal. Just dump it overboard. They have been putting out boxes, bundles, bags all day. . . . One MAC laid up with sea sickness.

Monday 27  
Good breakfast, beautiful spring morning, fog all gone, plenty of sunshine. . . . saw a whale in the distance. . . . Got too much sun on my nose, now look like W. C. Fields. Saw three flocks of small birds flying close to the water, then it dawned on me they were flying fish. Didn't know any were in the North Atlantic, but learned there are a few in the Gulf stream. . . . One jig (negro) wanted to go up front and watch the man turn the corner. Another wanted a pass, said he had heard there were some MAREMAIDS in the Gulf stream.

Tuesday, 28th  
Another beautiful spring day. Rumor has it we will meet a mail plane tomorrow that will take our letters back home. In the distance the water comes up to meet the sky any distance or direction we look. Seems

Wednesday, 29th  
Passed large battlewagon of some kind on port side, going our way, also a sailing vessel on the starboard. Some called it a Norwegian fishing

craft, others said it was a millionaires' pleasure boat, others called it a Spanish or Portuguese trader; to me it was just a boat with sails. All water except drinking and cooking is salt water. Hot or cold, it's sea water. Always liked to swim in salt water, but for a shower or face wash it isn't much good. Our boat is due to dock in Le Harve June 3.

Thursday, 30th  
After a night of rough sea, ship rocking and rolling. At bedtime it got worse and all the pots and pans and garbage cans in the kitchen (next to me) tumbled down, over and around and back again, again and again. At first report there was no doubt in my mind that we had hit a mine. I tumbled out of my bunk into the mess hall, went back to bed after the KP corraled the kitchen ware. Our dining table has a rim around it to keep dishes from sliding off and we needed it. Hard boiled eggs and rolls riced up and down the table like billiard balls. In the sunshine the Atlantic is inky blue, in cloudy weather it is slate gray and murky and always waves ahead have a different hue from those in the rear. Water in the wake of the ship is many colors: milky, changing to milky green, turning to jade, then a brilliant emerald. They tell us the reason the ship is tossing is that we have consumed so much food and water, and the ship has used so much fuel that it is floating higher in the water where wind and waves get a better slap at it. . . . also that the ship carries enough food and fuel for a round-trip, as there is none to be had at the other end of the run.

Friday, 31st  
Chilly, cloudy, blustery. Spent the day in bed, only place that is comfy.

(Continued on Page 2)

**Credit Extended To  
Vets On Surplus**

FORT WORTH—Uncle Sam will extend a 30-day credit to Texas veterans who are owners of established businesses, and to other businessmen who want to buy surplus property at forthcoming "on site" sales to be held in the Fort Worth region, according to an announcement by Hamilton Morton, WAA regional director.

Credit arrangements must be completed before the sales begin and buyers will have to pay cash unless they bring a "letter of credit" issued by the Fort Worth regional office.

Applications for credit may be made now, by formal application either by letter or in person, to B. E. Winder, chief of the WAA's regional credit division, T&P Bldg., Fort Worth.

A total of 35 million dollars worth of surplus property is expected to be offered at seven "on site" sales in the Fort Worth region during July, August and September.

**LEGAL NOTICES**

**CITATION BY PUBLICATION  
THE STATE OF TEXAS**

TO: Ella S. Gorton, and her unknown heirs, assigns and legal representatives. Defendants, Greeting: You are hereby commanded to appear before the Honorable District Court of Parmer County at the Court House thereof, in Farwell, Texas, at or before 10 o'clock A. M. of the first Monday next after the expiration of forty-two days from the date of this issuance of this citation, same being the 12th day of August, A. D. 1946, then and there to answer Plaintiff's petition filed in said Court, on the 29th day of June, A. D. 1946, in this cause, numbered 1363 on the docket of said court and styled Friona Methodist Church Plaintiff, vs. Ella S. Gorton, et al Defendant.

A brief statement of the nature of this suit is as follows, to-wit: Plaintiff alleges that it is the owner in fee simple of: Lots seven (7) and eight (8), in Block thirty three (33), of the original town of Friona, Parmer County, Texas, and was on the 1st day of June, A. D. 1946, when the defendants unlawfully entered upon said premises and dispossessed it and in the alternative plaintiff pleads the ten year statute of limitations. Plaintiff prays for judgment, for title and possession of said lands.

as is more fully shown by Plaintiff's Petition on file in this suit. The officer executing this process shall promptly execute the same according to law, and make due return as the law directs.

Issued and given under my hand and the Seal of said Court, at office in Farwell, Texas, this the 29th day of June A. D. 1946.

Attest: D. K. ROBERTS Clerk, District Court Parmer County, Texas (SEAL) 34-4tc.

**CITATION BY PUBLICATION  
THE STATE OF TEXAS**

TO: Frank Clements, Greeting: You are commanded to appear and answer the plaintiff's petition at or before 10 o'clock A. M. of the first Monday after the expiration of 42 days from the date of issuance of this Citation, the same being Monday the 12th day of August, A. D. 1946, at or before 10 o'clock A. M. before the Honorable District Court of Parmer County, at the Court House in Farwell, Texas.

Said plaintiff's petition was filed on the 26th day of June, 1946. The file number of said suit being No. 1361.

The names of the parties in said suit are: Norma Lee Clements as Plaintiff, and Frank Clements as Defendant.

The nature of said suit being substantially as follows, to-wit:

This plaintiff sues defendant for divorce alleging that on June 1, 1942, defendant left her with the intention of permanently abandoning her and has not returned to her since that time, and that there is one child issuing from said marriage, namely Frankie Lee Clements, a girl 11 years of age. Plaintiff prays for divorce and for exclusive custody of said child and for general relief.

If this Citation is not served within 90 days after the date of its issuance, it shall be returned unserved.

Issued this the 27th day of June, A. D. 1946.

Given under my hand and seal of said Court, at office in Farwell, Texas, this the 27th day of June, A. D. 1946.

D. K. ROBERTS, Clerk District Court, Parmer County, Texas. (SEAL) 34-4tc.

**CITATION BY PUBLICATION  
THE STATE OF TEXAS**

TO: Ella Porter and Fred Porter, the unknown stock holders of The Texas State Bank of Farwell, a Texas Banking corporation, and the unknown heirs, assigns and legal representatives of the aforesaid defendants, Greeting:

You are hereby commanded to appear before the Honorable District Court of Parmer County at the Court House thereof, in Farwell, Texas, at or before 10 o'clock A. M. of the first Monday next after the expiration of forty-two days from the date of the issuance of this citation, same being the 29th day of July A. D. 1946, then and there to answer Plaintiff's Petition filed in said Court, on the 13th day of June A. D. 1946, in this cause, numbered 1360 on the docket of said court and styled C. M. Henderson Plaintiff, vs. Ella Porter, et al Defendants.

A brief statement of the nature of this suit is as follows, to-wit:

Plaintiff alleges that he is the owner in fee simple of Lots 17, 18, 19 and 20, in Block 20, of the original town of Farwell, Parmer County, Texas, and was the owner in fee simple of said lots on May 1, 1946, and the defendants and all of them unlawfully entered upon said land and dispossessed him and withhold from him said premises to his damage in the sum of \$1.00. Plaintiff prays for title and possession of said lands. As is more fully shown by Plaintiff's Petition on file in this suit.

The officer executing this process shall promptly execute the same according to law, and make due return as the law directs.

Issued and given under my hand and the Seal of said Court, at office in Farwell, Texas, this the 13th day of June A. D. 1946.

Attest: D. K. ROBERTS, Clerk, District Court Parmer County, Texas. (SEAL) 32-4tc.

**CITATION BY PUBLICATION  
THE STATE OF TEXAS**

TO: J. R. Morris, and his unknown heirs, assigns and legal representatives, defendants, Greeting:

You are commanded to appear and answer the plaintiff's petition at or before 10 o'clock A. M. of the first Monday after the expiration of 42 days from the date of issuance of this Citation, the same being Monday the 12th day of August, A. D., 1946, at or

before 10 o'clock A. M., before the Honorable District Court of Parmer County, at the Court House in Farwell, Texas.

Said plaintiff's petition was filed on the 28th day of June, 1946. The file number of said suit being No. 1362. The names of the parties in said suit are: B. T. Galloway as plaintiff, and J. R. Morris as Defendant.

The nature of said suit being substantially as follows, to-wit:

Plaintiff brings this suit in trespass to try title and in the alternative pleads alleging that he is the owner in fee simple of:

Lot three (3) in Block sixty three (63), of the original town of Friona, Parmer County, Texas,

and was the owner on June 1, 1946 and that the defendants and all of them unlawfully entered upon said land and dispossessed him, to his damage in the sum of \$25.00. Plaintiff pleads that he has had possession of said land under a claim of title continuously for more than ten years next proceeding the filing of this petition.

If this Citation is not served within 90 days after the date of its issuance, it shall be returned unserved.

Issued this the 28th day of June A. D., 1946.

Given under my hand and seal of said Court, at office in Farwell, Texas, this the 28th day of June A. D., 1946.

D. K. ROBERTS, Clerk District Court, Parmer County, Texas. (SEAL) By: Dorothy Lovelace, Deputy. 34-4tc

**CITATION BY PUBLICATION  
THE STATE OF TEXAS**

TO: Henry Biwer, Chas. M. Stevens, C. M. Stevens, Tennie Mans and Maudine Mans, and the unknown heirs, assigns and legal representatives of the aforesaid parties, and the unknown husband or husbands of Tennie Mans and Maudine Mans, if married, Defendants, Greeting:

You are hereby commanded to appear before the Honorable District Court of Parmer County at the Court House thereof, in Farwell, Texas at or before 10 o'clock A. M., of the first Monday next after the expiration of forty-two days from the date of the issuance of this citation, same being the 19th day of August, A. D. 1946, then and there to answer Plaintiff's Petition filed in said Court, on the 3rd day of July A. D., 1946, in this cause, numbered 1365 on the docket of said court and styled Henry Lloyd, Plaintiff, vs. Henry Biwer, et al, Defendants.

A brief statement of the nature of this suit is as follows, to-wit:

Plaintiff alleges that he is the owner in fee simple of

Lots 10, 11 and 12, in Block 46, of the original town of Friona, Parmer County, Texas,

and was so the owner on July 1, 1946, and the defendants unlawfully entered upon said premises and dispossessed him and withholds possession thereof from him to his damages in the sum of \$1.00. Plaintiff further pleads in detail the ten year statute of limitations, alleging that he has had peaceful, adverse, continuous and uninterrupted possession of said lands, together with his predecessors in title for more than ten years next proceeding the filing of his petition as is more fully shown by Plaintiff's Petition on file in this suit.

The officer executing this process shall promptly execute the same according to law, and make due return as the law directs.

Issued and given under my hand and the Seal of said Court, at office in Farwell, Texas, this the 2nd day of July A. D. 1946.

Attest: D. K. ROBERTS, Clerk, District Court, Parmer County, Texas. (SEAL) By: Dorothy Lovelace, Deputy. 34-4tc

# To the People of the 69th Judicial District

## Should the District Judge be selected by the Governor or elected by the people

So far in the history of the 69th Judicial District, the Judges have been only those who were originally appointed by the Governor to fill a temporary vacancy. These vacancies resulted from the original creation of the district, and the death or resignation of a former judge.

It seems sound reasoning that prompted the framers of our State Constitution to provide by Section 12 of Article 4 that " \* \* \* Appointment to vacancies in offices elected by the people shall continue until the first general election."

Equal wisdom seems to have prompted the inclusion in Section 27 of Article 5 of our State Constitution the provision that the first general election " \* \* \* shall be to fill the unexpired term only."

The good fortune of securing the appointment has always given the incumbent a great advantage over any other aspirants to this office. This has resulted in only those whom the Governor appointed to fill out the term of a vacancy having an opportunity of serving in that office.

It is a well-known fact that in Texas the public officers are usually selected in the July primaries, and it is at that time that most of the people vote, rather than in the November general election. The former District Judge did not resign until after the primary election in July 1944. In the general election in November 1944 only a small percent of the voters of the District voted for either of the candidates for District Judge.

When the last appointment of District Judge was made I was serving with the 2nd Infantry Division on the Normandy beachhead. Consequently, I did not have a chance at the appointment, nor to run for office in November 1944.

If you believe me to be qualified, or worthy of a chance to show whether I am qualified for that office, I will be grateful for your support and vote to give me a chance to serve you as District Judge. If elected, I will have no commercial or other interests that will conflict with my duties, and I promise to devote my entire time to the prompt dispatch of the business of the office.

*Harry Schultz*

**UNION BIDS RECEIVED**

DENTON—Low bidders for the \$200,000 North Texas State College student memorial union building have been received by President W. J. McConnell and R. L. Thomas of Dallas, member of the Board of Re-

gents. Low bidder for general construction was Norgaard & Shaw of Dallas, \$147,985; acceptable low bidder for plumbing and heating, Philip Coury of Denton, \$26,000; low bidder for electricity, D. W. Shiner of Fort Worth, \$4,900.

FARWELL, TEXAS

We have faith in the future, too—faith in the future of the territory we serve.

This profound faith of ours is shown in the huge expansion program now under way by your Public Service Company.

New transmission lines, begun even before V-J Day, are now bringing electric services to hundreds of homes. More lines will help to serve the new homes now going up with the joy and convenience of electric cooking, electric refrigeration, good lighting and the many other efficiencies of low-cost electricity. The future looks good for everybody—electrically!

COMPANY

21 YEARS OF GOOD CITIZENSHIP AND PUBLIC SERVICE

Miss Virginia Eagles, who was honored Tuesday evening with a farewell party in the home of Earl Roberts, near Farwell. Miss Eagles has been connected with the USO in Clovis for some time. Before entering USO work, she was a teacher in the Birlingham Private School of music and art, and was director of the Little Theatre group in Macon, Ga. She had previously done considerable work as an actress.

While in Clovis with the USO, Miss Eagles was staff assistant of leather craft work, shell work, and all patio games have been under her instruction. She has also been a teacher in the Clovis Presbyterian Sunday School. Her release from USO work comes today, July 10th. Those attending the farewell party included Miss Cara Lehman, USO director, Mrs. S. L. Sutter, Alta Roberson, Cpl. and Mrs. Richard Hurst, Pvt. Joseph F. Saluno, Miss Ruth Craven, and Miss Helen Anderson.

### Next Few Weeks Critical For U. S. Car Owners

WASHINGTON — Between now and next October will in all likelihood prove to be the most critical period for motorists since the war, in the opinion of Lee Moran, executive vice-president of the National Automobile Dealers Association. This is true, he pointed out, because of mounting difficulties in the parts situation.

"While the labor shortages in the plants of leading producers have come to an end," he said, "difficulties facing the suppliers of parts have become increasingly grave. The result is that for the first half of this year, total production of automobiles and trucks will probably run considerably less than one-half of the output during the same period of 1941. During a recent week, production dropped down to 35,000, while, for the same week in 1941, it was more than 125,000. It is not surprising then that the word now is going around that prospective car buyers have only a very slightly better chance to get a car today than they had on V-J Day.

"Meanwhile, the crucial parts situation is going to make it much more difficult to keep cars in service. When we consider that most of the cars today are around 10 years of age it stands to reason that in many of these old cars are parts that are pretty well worn. And it is to be remembered that when any part wears out there is no certainty when a substitute part can be obtained.

"To help meet this emergency, the National Automobile Dealers Association is urging all owners of cars to have their vehicles given a thorough inspection as often as once a month. Skilled mechanics can discover hidden defects in cars which, if taken in hand at once, will keep the vehicle in service and perhaps even prevent some frightful accident. This is the only way that owners of cars and trucks can make their situation less precarious, during the next four or five months."

### ON-THE-JOB TRAINING

DENTON — On-the-job training will be given senior lifesaving students at NTSC when the American Red Cross "learn-to-swim" campaign gets underway during the second summer session, according to Fred Slack, instructor and pool manager. Free instruction will be given all students who wish to learn to swim, as well as for Denton adults and children, Slack said in explaining the program, which is conducted in cooperation with the nation-wide ARC swimming campaign. The only charge will be admission to the pool for townspeople.

## Miss Lillys Treider Is Bride of Joel Landrum

Before an altar decorated with mixed flowers and white gladioli, Miss Lillys Treider, daughter of Mr. and Mrs. Raymond G. Treider of near Friona, became the bride of Joel L. Landrum, son of Mr. and Mrs. J. L. Landrum, of Tucumcari, last week, in a ceremony performed at the Central Church of Christ in Clovis with Minister Claude A. Lorts in charge.

Preceding and during the ceremony, the organist played "Always", "O Promise Me" and other traditional wedding selections.

Miss Lydia Spring, one of the bride's most intimate friends, was bridesmaid. She wore a blue dress with white accessories, and a lovely corsage. Murl Sylvester, close friend of the groom, served as best man.

The bride was beautifully attired in a silk white street dress and used matching accessories. For "something blue" she carried a blue lace handkerchief; for "something new" a white Bible; "something borrowed", a pearl necklace; and for "something old", a gold bracelet. Gardenias formed her corsage.

Mrs. Treider, mother of the bride, wore a navy blue sheer with white accessories and contrasting corsage.

Mrs. Landrum is a 1946 graduate of the Friona high school. Mr. and Mrs. Landrum will make their home at Morenci, Arizona, where he is employed by the Dodge Phelps Mining Company as an engineer.

## Rainbow Girls Have Celebration, 8th

Celebrating the birthday of founder Rev. Mark W. Saxon, the Farmer County Rainbow girls held a picnic-party at the roadside park near Bovina, Monday evening.

Special guests were invited by the girls of the organization, and sponsors were Mr. and Mrs. W. O. Cherry, Mrs. J. C. Denney and Mrs. John Porter.

The chapter will conduct a practice tonight (Wednesday) at the Masonic Hall in Bovina, for coming initiation rites.

## Visit In Portales

Mr. and Mrs. Chester Watkins and Bill, Mrs. Ben Smart and Jim Bob, and Misses Peggy Williams, Minnie Smotherman and Hazel Dishman spent Saturday evening visiting in the home of Mr. and Mrs. Lloyd Sanderson of Portales.

## Home From Outing

Mr. and Mrs. Lawrence Ham and Mr. and Mrs. Henry Minter returned home Monday night, from an outing trip to Eagle Nest Lake and Red River, N. M. They left here on the Fourth.

## Former Local Girl is Married on June 24

Nuptial rites for Miss Mary Frances Williams and Ensign Wallace A. Greene were performed in Albuquerque on June 24th, in the Monte Vista Christian Church.

Mrs. Greene is the daughter of Mr. and Mrs. Burton T. Williams, of Fort Sumner, and formerly lived in Texico, where her father was associated with the school. The groom is the son of Mrs. R. C. Crosby of Seattle, Washington.

The bride was given in marriage by her father, and wore a gown of white bridal satin. From a coronet of orange blossoms, a short net veil fell to her shoulders. She carried a white Bible, topped with a spray of Talisman roses.

Both Ensign and Mrs. Greene completed their work at the University of New Mexico in Albuquerque just recently. They will live in San Francisco, where he has been assigned.

## Bible School Off To Good Start, Monday

Good attendance was registered at the opening of the Vacation Bible school, sponsored by the local Methodist Church, when first class sessions were held Monday. Workers at the school reported 45 youngsters present on Tuesday.

The school will continue Monday through Friday this week and next, and all children of the community are invited to participate.

## Former Residents Here

Mr. and Mrs. Frank Thompson and children, Buddy and Allene, arrived here last week from South Gate, California, to spend several days visiting with relatives here and in Muleshoe. The Thompsons made their home in Texico for many years and are well-known here.

## To Family Reunion

Mr. and Mrs. B. N. Graham left Sunday for Florida, where they will attend a reunion of the Austin family. They were accompanied by Mr. and Mrs. Rupert Austin, of Lamesa, a brother of Mrs. Graham. Others making the trip include Mrs. Lucile Crook and son, of California, and Mrs. Cox, of Lamesa.

## Arrive From California

Mr. and Mrs. Wesley Osborne and family and Mrs. Leona Osborne, all former residents who now make their homes in California, arrived here Saturday night for a visit. They stopped enroute at Belen, N. M., to visit relatives.

Mrs. Lloyd Sanderson and daughter, of Portales, visited Miss Hazel Dishman in Farwell, Thursday.

## Visitors in Texico

Mr. and Mrs. James Walker, of Texico, have as house guests his sister, Mrs. R. B. Creech, with her husband and family, and his mother, Mrs. B. F. Walker, all of Buckeye, Arizona. Mrs. Jack McCullough, another sister, was accompanied here by her daughters from Seminole,

## Granddaughter Born

Mr. and Mrs. L. L. Parker, of Roswell, announce the birth of Janet Kay on July 5th. Mrs. Parker is the former Marjorie White, daughter of Mr. and Mrs. Claude White of Farwell. Mrs. White plans to leave for Roswell on Saturday to spend two weeks with her daughter and family.

## Marriages Recorded

The clerk's office reports the recent recording of the following marriages:

Miss Esther Coleman to Elmer Marvin Frazier, on July 3rd. The ceremony was performed by Rev. Harvey E. Carrell, Methodist minister.

Miss Emma Sanchez to Silvano Lucero, on July 4th, performed by County Judge A. D. Smith.

Ralph Barker, of California, is visiting his father, Claude Barker, of Bovina, this week. He plans to go to Ohio before returning home.

Mr. and Mrs. Clay Beavers, of Muleshoe, visited Sunday afternoon with friends in Farwell. The Beavers formerly made their home in this city.

Mrs. John Aldridge and daughters, Mary Belle and Nancy, left last weekend for Moberly, Mo., to visit with Mrs. Aldridge's mother and other relatives. They will be away for several weeks.

Miss Peggy Williams returned last week from Perryton, Tex., where she has spent the past three weeks with her brother and sister-in-law, Mr. and Mrs. Billy Caffer.

A. C. Henneman and Sonny Graham were visitors in Friona, over the weekend.

## Here From Belen

Mrs. Hugh Edwards and son, Dennis Dean, of Belen, visited last week with Mr. and Mrs. J. B. Edwards in Clovis and Mr. and Mrs. Carl Davis in Farwell. Mrs. Edwards returned to her home, Friday, accompanied by Mrs. Davis and daughter, Glenna Ruth, who will spend a few days.

Mr. and Mrs. Clyde Pumroy announce the birth of a daughter born Sunday, July 7th. The infant has been named Cheryn Ann.

Mr. and Mrs. LeRoy Faville and Mikala left Monday for Ruidoso, where they will spend a week enjoying a vacation.

Mrs. Jim Curry arrived last Friday from Alhambra, California, to spend several days with her parents, Mr. and Mrs. B. E. Nobles, in Farwell.

Mr. and Mrs. D. K. Roberts spent the weekend visiting with Mr. and Mrs. Kendrick Green and family, in Lubbock.

Miss Helen McDaniel spent the Fourth with Misses Evelyn and Lois Crim, in the Midway community. Others present were Mr. and Mrs. T. A. McQuary, of Plainview.

Mr. and Mrs. Woodrow Lovelace visited last Thursday evening with her parents, Mr. and Mrs. H. D. Mayfield, near Friona.

Mrs. Bess Henneman returned Sunday afternoon from Amarillo, where she had spent the weekend with her mother and other relatives.

Mr. and Mrs. David McNew and children, Alyce and Mancil, spent Sunday afternoon in the home of Mr. and Mrs. Ben Smart.

Mr. and Mrs. Ebb Randol arrived home Wednesday from a two-weeks stay at Hot Springs, N. M., where he took the mineral water baths.

Mr. and Mrs. E. L. Payne and family of Long Beach, Calif., are visiting his parents, Mr. and Mrs. John Payne of the Oklahoma Lane community.

## CARD OF THANKS

We wish to express our appreciation to our many friends who were so thoughtful and considerate of us during the illness and death of our beloved husband and brother. May God's richest blessings rest upon each of you.

Mrs. A. B. Vassey,  
Billy Starr,  
The Beach Families,  
The Vassey Families.

Dinner guests in the Ben Smart home on Sunday were Mr. and Mrs. Chester Watkins and son, Bill; Mrs. Ernest Carpenter and daughter, Minnie Marie.

Mr. and Mrs. Sterlyn Billington drove to Tulsa, Okla., over the week end, where they visited with Mr. and Mrs. Virgil Taylor and family.

Mr. and Mrs. B. N. Graham spent the Fourth visiting with Mr. and Mrs. Raymond Ross and family, in Morton, Tex.

**CAPT. GRAHAM WRITES**

(Continued From Page 1)

PX out of cigs. This is one week I haven't missed my car and radio, but guess I will when I get there. Saturday, June 1

Sea not quite so rough. This journey is getting monotonous when we have to stay in the hole. . . 10 days on the water, that is enough on this old freight boat. Just about dark the ship's propellers all quit and everything was quiet. In the distance we could see a light, like an approaching ship, learned it was a lighthouse. Our ship's pumps had to be repaired. Sunday, June 2

Sunshine and smooth sea, warm breeze from southwest. Millions of sea gulls greeting us, waiting for the garbage. A Capt. sitting near me got sprayed by a sea gull, in a few minutes another came over and made a near miss. The Capt. said, "They've got my range, I'm going downstairs." During supper the great white cliffs of France came into sight. Great excitement; everyone leaves chow to look at terra firma. At first sight I just knew it was the white cliffs of Dover, but France also has high white cliffs. We are now anchored on the ocean with Le Harve in sight several miles away. A large liner with women aboard parked just behind, also a large freighter parked nearby. Just why the parking I don't know, but I hear we won't reach port until tomorrow. Hair cut and bath badly needed.

Bavaria, Germany, June 11  
After 17 days of continuous travel we arrived here 2 days ago, tired, dirty, mangy, ragged and perhaps lousy. After a truck trip through Le Harve and traveling by train 3 days and nights to Banburg, the Hi. command learned what kind of troops we had, so we were re-routed to this place, Rosenheim. Home of Rososo, also home of Goering. Passed thru many of the highlight points of France and Germany, also part of Belgium near Dieppe.

People of France look hungry, starved, ragged, haggard and tired, especially the women, the children seem a little better fed. Crops good thru France. Lots of dairy cows and beef cattle, few sheep, goats. No pigs at all. By winter they should be over the hump for food. Many people are barefoot, all shoes are coarse, makeshift, and sox practically none.

In Germany it's a different picture. All have been well fed thru the war. Women have good clothes, including stocks, and knitted underwear, etc., on clotheslines, good crops everywhere, very little livestock; the French took about everything in the way of animals and chickens, Germans have very little feed.

Got separated from our baggage. All short of clothes. Hear that it may be in the hands of the black market.

Spent Sunday at Prien, where King Ludwig II built a "small" hunting lodge for 30 million dollars. Covers several acres. One hall, 330 ft. long, don't know how many rooms but I saw all of them. Built in a U shape with patio in center. The king's room is really elegant. Hand-carved bed covered with gold leaf. Canopy over and around bed decorated with jewels and ostrich feathers. Ceiling is about 20 ft. high to accommodate the massive chandeliers that are made of bronze, covered with gold leaf. They are about 8 ft. high and swing on a massive gold chain, can be lowered to the floor so that the candles can be put in place (hundreds of them). Hundreds of such chandeliers throuot the building. Some made of ivory, others of porcelain, decorated by famous painters of that day, 1876. The floor is brick-like oak blocks, inlaid with rosewood. King died a bachelor, so he

had no queen's room. The hall spoke of had a row of golden candelabras, 42 in all, 8 ft. high and the same amount of 8 ft. chandeliers on the ceiling. This was one of 5 castles built by this king of Bavaria. He died at the age of 29, no heirs, drowned while swimming nearby. Forgot to mention that all the masters of the canvas were called on to decorate the walls and ceilings with the most wonderful paintings ever produced, also the sculptors did their stuff. Large flower vases of gold in the ballroom large enough to accommodate an orange tree (no bull). The king lived here 23 days and on different occasions spent 8 nights here—of course, he had many other castles. This was just a hunting lodge. After seeing it I can hardly believe it. June 12th

I could write a month about our location. It's ideal. A valley in the Alps, mountains still have plenty of snow. Camp is just a small one, an old German army post with 3 or 4 story concrete barracks. Tile floors, also oak block floors, walls, stairway, partitions, etc. Have many Kraut civilians working, also a few Kraut girls in the PX, officer's mess, etc.

The Auto Baun passes near here—a network of military hiways all over Germany. It's a wide 2-way pavement with 20-foot strip grassy parking down the center, each strip is a one-way road. Haven't seen a horse in all Germany and cows are rare. Wish you could see the housing. Everything is slate, tile, etc. Haven't seen a piece of screen wire in Europe. The farmer seldom lives on his farm, doesn't have room. The "well to do" who lives on his farm has plenty of land, perhaps 10 to 20 acres.

Visited a drug store in Rosenheim that has been in constant operation for 250 years. Apothecary is what they call it here. He sells nothing but medicine and sick room supplies, operates 24 hours a day. At 7 he locks up the joint and has a pigeon hole in the wall where the customer can press the bell and buzz the clerk. Prescriptions are never filed (except narcotics). I asked why and he said they were the property of the customer and had to be returned. It was easy to read his shelf of bottles and drugs as they are all in Latin, the same as ours. In Bavaria the drug-gist never owns his store. It is the property of the state and he operates it by franchise or concession. The clerks all work for him and must have a degree (4 years). At the death of the operator the head clerk takes over, if he has had about 20 years experience; if not, a 20-year clerk from another store is put in charge. Competition doesn't worry them, as the state has 4 such stores here. The Kraut talked a little English but we had a Kraut girl from the USO across the street act as interpreter. She was a medical student at Munich during the war, and expects to finish at Berlin. The Kraut seemed shocked to learn that my store sells ice cream, beer and cosmetics, and can't understand how a man could accumulate enough marks to own a store, or allow his wife to work in it. Each third week one store closes. The crew rests while the other three stores take care of the trade. I'm afraid this wouldn't work out for us!

We are near Berchtesgaden, Hitler's hideout. I was scheduled to go over there this A. M. but it was pouring down rain.

**POLITICAL ANNOUNCEMENTS**

C. B. (CHARLIE) LOVELACE  
LOYDE A. BREWER

If man and wife were as nice in their own home as they try to be in the homes of others, the divorce courts would lose a lot of business.

**Those you can get with an OIL-PLATED engine**

Breathes there an American who isn't checking on cars? Chief question is, "What's different for '46?" An OIL-PLATED engine brings you this swell difference: it will escape lots of carbon and sludge by escaping lots of wear. That special type of wear-defense—internal OIL-PLATING—will likewise favor your oil and gasoline mileage.

You can have an OIL-PLATED engine in any car—in the newest or oldest—just simply by making sure to use Conoco N<sup>th</sup> motor oil; that's all.

The difference in Conoco N<sup>th</sup> oil—patented—is its added ingredient that OIL-PLATES. This is done in a magnet-like manner—by making metals attract and hold lubricant. And that's what puts inner engine surfaces under cover of OIL-PLATING. It stands in wear's way; acts to prolong that new car feeling. . . And it will act to prolong any older car's usefulness. So if that's your particular problem, change now to Conoco N<sup>th</sup> oil—at Your Mileage Merchant's Conoco station. Continental Oil Company!

# Bovina Happenings

Mr. and Mrs. Byron Turner and children spent the weekend in Odessa, visiting his grandmother, Mrs. Wells, and aunt, Grace.

Mrs. Aua Ketchum and Mrs. Loreta Chandler and daughter, of Iowa Park, Tex., and Mrs. Mamie Walker and daughter, Doris, of Graham, Tex., spent the weekend in the L. C. Moore home here.

Mr. and Mrs. J. C. Ingram of Garrison, Tex., are visiting her sister, Mrs. W. J. Parker.

Sula and Mozelle Moore, of Clovis, spent the weekend with their parents.

A letter has been received from Joe Moore to the effect that he is now Pfc.

Clyde Lamar, of Pampa, was a visitor in Bovina, Sunday.

Mr. and Mrs. C. H. Jefferson were guests of Mr. and Mrs. Ross Terry, of Friona, on Sunday.

Inell Elliot, Geraldine Niece, Kathryn Robards and Clyde LaMar were in Clovis, Sunday.

Mr. and Mrs. Tom Hudson and Mrs. T. G. Hudson, Jr., made a business trip to Wichita Falls, the past week.

A family reunion was held in the Davis King home on the Fourth. Enjoying the gala occasion were Mr. and Mrs. Jerry King, Mrs. Roy Hewer, Miss Dessa King and W. B. King from Panhandle; Mr. and Mrs. G. C. King and children from Hobbs, N. M. and the Davis King family.

Maudine Doerr from Odessa and Arlesia Collier and Cecil Rule from Friona, visited Jerry Niece, Monday.

Mrs. Heurer, of St. Paul, is visiting her parents, Mr. and Mrs. Davis King this week.

Mr. and Mrs. Tom Henley of Vernon, Tex., were guests in the A. G. White home, Sunday.

Dinner guests in the J. L. Wilson home on the Fourth were Mr. and Mrs. A. G. White, Mr. and Mrs. Frank Wilson and daughters, Judge and Mrs. C. R. Duncan of Ceiling, Okla.; Nancy McDonald of Woodward, Okla.

Word has been received here that Roland Farmer, formerly of Bovina, was seriously injured in a car wreck the past week.

Mr. and Mrs. O. V. Venable and Sarah Marie have gone to Corpus Christi, to visit the daughter and family, Mr. and Mrs. J. F. Wilkerson, for the rest of the summer.

Mr. and Mrs. J. N. Shaw from Muenster, Texas, visited in the home of Mr. and Mrs. E. H. Moody last week.

Alfred and Yvonne Moody returned home Sunday from Muenster, Tex., where they had spent the past two months with their grandparents.

Mr. and Mrs. Nathan Atwell and family, from San Diego, are visiting in the home of Mr. and Mrs. A. T. Ray this week.

Mr. and Mrs. George Trimble were called to Amarillo, Saturday, by the tragic death of his father, who was run over and killed by a loaded truck.

Mr. and Mrs. Melvin Stagner and children were Sunday guests of Mr. and Mrs. Gene Ezell.

Mr. and Mrs. A. G. White had as guests his brother, Judge and Mrs. C. R. Duncan, and little granddaughter, Nancy McDonald, of Ceiling, Okla.

Mrs. Caldwell and Rita had as their dinner guests Sunday Lt. and Mrs. George Robert Caldwell and little son, William Robert, and Mr. and Mrs. E. T. Caldwell, all of Amarillo. This was the first trip out for young William Robert, who had to come help celebrate his grandmother's birthday.

Mr. and Mrs. Odis White and Mr. and Mrs. R. A. Kelley attended the funeral of an old friend at Earth, on Sunday.

Nettie Lee Wilson and Mrs. Jess Walling were shopping in Lubbock, Friday.

Dean Bates is visiting friends in Bovina, this week.

Rev. and Mrs. Trostle and daughter visited her sister in Dumas, this week.

Mildred Hopingardner began work in Clovis this week. Eula Hopingardner has returned to Clovis after spending a week at home.

Mr. and Mrs. Ray Spoth have as their guests this week his sister, from Cleveland, Ohio.

Mr. and Mrs. Odis Floyd and children, of Friona, visited in the J. T. Hopingardner home last weekend.

Wayne Smith, Inell Elliott and Ted Brock and Miss Jean Danner of Clovis, enjoyed an outing to Carlsbad Cavern on the 4th of July.

Mr. and Mrs. Bob Williford were called to Fort Worth, Sunday, by the death of his brother.

Word has been received from Mrs.

L. C. Moore, Jr., of Amarillo, that her mother, Mrs. Allen Johnston, is very ill and in an Amarillo hospital.

Mr. and Mrs. Dewey Adkinson of Center, Tex., spent a few days last week in the W. J. Parker home.

Mrs. Clyde Cardwell of Garrison, Tex., is visiting in the home of her brother, Mr. Parker.

Mr. and Mrs. Harry J. Charles made a business trip to Chillicothe, Tex., to get materials for their home.

Mrs. Louis Pesch spent the weekend in Amarillo with her daughter, Mrs. Whetstone.

Miss Lucille Akers was in Hereford, Wednesday.

Mr. and Mrs. Lloyd Battey and Mr. and Mrs. Sam Sides enjoyed the ball game in Clovis, Tuesday evening.

## Here For Funeral

Out-of-town guests in the home of Mrs. Alma Vassey, here to attend the funeral of Buren Vassey, were a brother of Mrs. Vassey, Mr. and Mrs. J. C. Beach of Huntington Park, Calif., a sister, Mrs. A. E. Wolf of Ventura, Calif.; her brothers, W. B. Beach, Jr., of Fort Worth, Dawson Beach of Vernon and J. H. Beach of Tecumseh, Okla.; a sister, Lt. and Mrs. Morot and Betty, of Chicago; Bobby Vassey from Wisconsin; J. B. Vassey from San Antonio; E. B. Vassey of Odell, Tex.; her mother, Mrs. W. B. Beach, and Mrs. Ida Bennett, both of Hereford.

## Mrs. Maurice Means Entertains Friday

An elaborate dinner was given in the home of Mrs. Maurice Means, last Friday evening, honoring Mr. and Mrs. Claude Dale Nowell, who were recently married.

The table was laid with a lace cloth, and centered with a beautiful three-tiered wedding cake. Candles were used for illumination.

Those enjoying the affair were Mr. and Mrs. Kelly, the bride's parents, from Morton, Tex., and children; Mr. and Mrs. Nowell, parents of

the groom, Mrs. Ruby Phelps, Mr. and Mrs. Joe Wilson, Mr. and Mrs. Jess Walling and sons, Mr. and Mrs. Odis White, Charlene King, Billie Joe Eberting, Mrs. Dessa Fern Heurer and the hostess and honorees.

## Dinner Party Enjoyed In Parker Home

Mr. and Mrs. W. J. Parker entertained with a dinner party in their home on Sunday. Guests included Mr. and Mrs. O. S. Parker and family of Amarillo, Mr. and Mrs. J. C. Ingram of Garrison, Tex.; Mr. and Mrs. L. D. Parker and family, of Amarillo; Mrs. Clyde Caldwell of Garrison, Mr. and Mrs. L. E. Parker of Roswell, Mr. and Mrs. Marvin Hamrick of Farwell, and Mr. and Mrs. J. W. Parker of Memphis, Tenn.

## H. D. Ellison Home Is Scene Of Social

A reunion and dinner was enjoyed in the lovely home of Mr. and Mrs. H. D. Ellison, Sunday, honoring Mr. and Mrs. George Chatman of Georgia, who are visiting here.

Those attending were Mr. and Mrs. George Chatman Mr. and Mrs. Jim Ellison, Mr. and Mrs. Buck Ellison and children, Mr. and Mrs. Aubrey Ellison and children, Mr. and Mrs. J. C. Denney and children, Mr. and Mrs. Tom Rhodes and children, Mrs. Johnnie Glover and son.

## Picnic-Party Given By Methodist YF

The Methodist Youth Fellowship entertained a group from Oklahoma Lane with a picnic and party at the park, Wednesday evening.

Those present were Mr. and Mrs. W. E. Williams, Doris Wilson, Delores Wilson, Bettye Jane Kimbrow and cousin, George Harold and Loyce Trimble, Durward Bell, Harry Johnston, Jerry Jones, Bob Berggren, Charles Ross, Mr. and Mrs. Odis White, J. R. Ellison, Fred Hofer,

Rosa Lee Denney, C. W. Grissom, Scottie Gober, Donald Christian, W. M. Donaldson, Lee Sudderth, Madeline Pollard.

## WCS Meets With Mrs. J. L. Wilson

The Woman's Society for Christian Service met in the home of Mrs. J. L. Wilson, the past Wednesday, with a covered dish luncheon being served at the noon hour.

Those attending were Mmes. Wilbur Charles, Louis Pesch, A. G. White, Lloyd Battey, Ruby Wilson, Mable Newberry, J. T. Hopingardner, Rev. and Mrs. Trostle and daughter, Mrs. W. E. Williams.

## Enjoy Trip To Caverns

Those enjoying a trip to Carlsbad Caverns last Thursday were Mr. and Mrs. J. W. Parker, Mr. and Mrs. Billie Parker, Mr. and Mrs. Roxie Parker, and Mr. and Mrs. Jerry Ingram.

## SANTA FE CARLOADINGS

Santa Fe System carloadings for week ending July 6 were 26,925 compared with 27,472 for same week in 1945. Cars received from connections totaled 10,265 compared with 14,535 for same week in 1945. Total cars moved were 37,190 compared with 42,007 for same week in 1945. Santa Fe handled a total of 40,746 cars in preceding week of this year.

**NEW**

**Evangelist And World Traveler Will Speak**

Dr. Joseph Herschel Cohen, of Los Angeles, will conduct a series of special evangelistic services with the Bovina Baptist Church, beginning on July 28. Services will be conducted twice daily through August 11.

Rev. Cohen is author of several books, the most popular being "The Jew and Christianity" and "Looking at Russia". He was in Paris the night France fell, in Russia when Europe was aflame with war, and in Palestine only recently. Dr. Cohen was an eye witness of much that transpired in Europe during the past 15 years, having made five trips to Europe during that time. Recently he has been a guest speaker in the First Baptist Church, Borger; First Baptist Church, Brownfield; Line Avenue Baptist Church, Amarillo; First Baptist Church, Perryton; and First Baptist Church, Plainview, and recently closed a meeting in Hobbs, N. M., with 81 additions to the church. Rev. Fred Stumpp, pastor of the

Bovina Church, stated that the entire community and surrounding territory is invited to hear this noted Hebrew Christian who has spoken in more than 2500 churches

**MAKING WHEAT GO 'ROUND**

COLLEGE STATION-- Eight recipes designed to give the housewife a choice of bread and desert dishes with a minimum of wheat flour have been tested by Edith Lawrence, specialist in food preparation with the Extension Service. Oatmeal cookies, potato muffins, potato pancakes, cornmeal and rice waffles, potato puff, crumb gingerbread, chocolate cakes and baked lemon pudding are the dishes for which recipes are given.

**EARLY WAGE CONTROL**

King Hammurabi of Babylon, established the first wage controls of recorded history in 285 B. C., covering virtually all industrial, agricultural and commercial pursuits.

**Former Chaplain Will Direct Music School**

Royce Curtis, a former Navy chaplain's assistant, will conduct a music school at the Bovina Baptist Church the week of July 21st, it was announced today by Rev. Fred Stumpp pastor of the church.

Curtis served in the Navy several years, during which time he directed a choir that became nationally famous over the South Pacific broadcast. He is very proficient in this type of work, having spent many months serving in large churches in Texas and elsewhere as music director, and in addition to being a singer and teacher, is an accomplished pianist.

Class sessions will be held in the afternoon for juniors and intermediates, Rev. Stumpp stated, and session are slated each evening for young people and adults. Such subjects as music appreciation, practical church music, music in scriptures, and gospel hymn playing will be taught, and congregational singing and choir singing will be emphasized.

Rev. Stumpp added that all interested singers are cordially invited to attend any and all sessions of the music school.

**TO MEXICO CITY**

AUSTIN -- Eight University of Texas staff members left June 29 for Mexico City, where they will instruct in the fourth annual field school of the National University of Mexico, which opened July 1 and will close August 19.

Dr. Charles W. Hackett, director of the University's Latin-American Institute, will be in charge for the University of Texas, and will be student adviser. On the staff are Dr. F. M. Bullard, professor of geology and mineralogy; Dr. Carlos E. Castaneda, associate professor of history; Dr. C. M. Engerrand, professor of anthropology; Dr. Rex D. Hopper, assistant professor of sociology; Dr. J. R. Spell, professor of romance languages; Dr. E. W. Zimmerman, professor of resources, and Miss Florence Escoff, librarian of the field school and secretary to the staff.

**Local Softballers Swamp Clovisites**

In a game that was called in the fifth inning because of the lop-sided score, the Henderson Grain & Seed softballers of Texico-Farwell swamped the Clovis News-Journal aggregation, Monday night, to the tune of 14-4.

Coach Seth Rollins sent a new tosser against the newspaper lads, Monday evening, in the person of W. T. Meeks, brother of his star twirler, Clarence Meeks, and the new pitcher did a good job on the mound as the brothers shared pitching honors. In addition to nice tossing, W. T. slammed out a sizzling triple with the bases loaded, to help the local cause.

Jess Herbert Pipkin was robbed of a homer when his long fly went out of the park, hit the bleachers and rebounded to the field. Bob Drace was on the receiving end of the battery.

The locals journey back to Clovis on Thursday night of this week, to meet the highly-touted Lion's Club team. The game is scheduled for 10 o'clock, Texas time.

**Wrestling Bout Will Come in August**

Lee Thompson, Potentate's Aid in Parmer County, has announced one of the most generous offers ever received by Khiva Temple. Noble Dory Detton, a member of Khiva Temple, is sponsoring a junior heavyweight world championship wrestling match on August 15 in Amarillo. The elimination bouts have already started and the winner of the eight tournaments will wrestle Noble LeRoy McGuirk, the title holder, wrestler of India Temple.

Thompson said that Noble Dory Detton will make an outright gift of the greater part of the net derived from this championship match to Khiva Temple. Such gifts as this will help materially in securing a hospital within the jurisdiction of Khiva Temple.

Everyone interested should support and patronize the championship match, Thompson added.

**REFRESHING FOUNTAIN DRINKS**

For that taste-tempting "break" on these long, hot days, drop in and have a cool drink at our fountain—served quickly and courteously. You'll further enjoy our air-conditioned store as you sip a cool drink.

**FOX DRUG STORE**

**OKLAHOMA LANE**

A very enjoyable time was had by the following young people who attended a party in the home of W. M. Donaldson, Monday evening: Virginia Massongill of California; Joan Sides of San Antonio; Ernest Foster, Jr., of Clovis; Alta Pauline Norton of Farwell, Hazel Hinchey, Francis Sudderth, Barbara Foster, Glen Hromas, Lee Sudderth Jr., C. W. Grissom, Merrell Glen Rundell, Scottie Gober, Mr. and Mrs. Harold Carpenter and Mrs. Joe Donaldson.

Pfc. James Roach arrived Monday with a discharge, after spending 18 months in service, 13 of which were spent on Leyte and at Manila.

Pfc. Loyd Gober also came in Monday for a furlough after spending some time overseas. He will report to Williams Field, Ariz.

Mr. and Mrs. Bill Hubbell and children transacted business in Olton, Wednesday.

Grandma Bery, who has been with her daughter in Friona since October is now visiting in the Emmitt Berry

home.

Mrs. Roach, of Oklahoma City, is visiting her son, Jack, and family.

Mrs. Kenneth Grissom has returned home after visiting in Dallas for several days. Two of her sisters came with her for an extended visit.

**TO PREACH SUNDAY**

Rev. Mark Payne, of Albuquerque, will preach at the Oklahoma Lane Baptist Church Sunday morning, it was announced today. Mark is an Oklahoma Lane lad and many of his old friends will be glad to hear him.

**CONVERTED TO SOAP**

Napalm, the incendiary ingredient which roared out of wartime flame throwers as a jet of searing fire, is being converted by the Army into a harmless all-purpose liquid soap.

Miss Alyce McNew, Mrs. Ben Smart and Jim Bob spent the Fourth visiting relatives and friends in Amarillo.

**What About OPA . . . ?**

Although OPA has been discontinued, so far as price control is concerned, we are not disposed to take advantage of this occasion to boost our prices.

OPA may be permanently dead.

Maybe so, maybe not. Only time can tell. But whether it is continued or not, it will not affect our prices or our policy. We will continue to sell our high quality merchandise at the same fair price levels we have maintained in the past—OPA or no OPA.

On this basis, we solicit a continuation of your patronage.

## NOTABLE NEWS EVENTS IN PICTURES

**GIRL SCOUTS GET THANKS FROM HOLLAND**—More than 300 Girl Scouts in Washington, D. C., receive the official thanks from Holland for their contributions to the war-stricken country as they were entertained by Mme. A. Loudon, center, wife of the Netherlands ambassador to the U. S. Madame Loudon is holding a bag made by the Scouts.

**BLACK BEAUTY**—Gorgeous black satin is used to fashion this bare-shoulder evening gown worn by Hollywood's Barbara Stanwyck. The long, satin gloves feature the same chiffon trim used in very tight bodice.

**A SWISS MISS REMEMBERS**—White crosses in every country where American soldiers fought bear testimony to the sacrifice of U. S. lives, and because those small memorials cannot be tended by relatives, thankful residents of the liberated countries take care of them. This little Swiss girl lays some flowers at the foot of a cross in an overseas American cemetery.

**"THE WHEEL" TO SAVE 104 LIVES**—The first trial to determine whether the largest rubber rescue raft ever designed could bear the 104-man load for which it has been designed is shown above. The test, held in Dayton O., is made with 104 Wright Field enlisted and civilian personnel. Carbon dioxide inflates the raft in 16 seconds.

**TAKE A GOOD LOOK AND DREAM**—Dimpled Dorothy Shelton in Washington, D. C., examines some of the jewelry that comprised the \$1,500,000 Hesse-Darmstadt crown jewels stolen from Kronberg castle near Frankfurt, Germany. The gems were recovered following arrest of Col. J. W. Durant and his WAC captain bride, Kathleen Nash.

**THE BAZOOKA** enabled infantrymen to stand up against tanks in World War II. Above, a high explosive rocket shell fired from a bazooka sprays a shower of molten metal as it tears a 3-inch hole through the armor plating of a tank.

**FLYING RANCHERS** are a familiar sight in Oklahoma also. Above, Billy Wilson, of the Lazy B Bar Ranch, totes a 50-pound block of salt, to be dropped to cattle from plane piloted by his wife, Maxine.

Silhouetted against the clouds, two workmen are dwarfed by the 65-foot Westinghouse atom-smasher in Pittsburgh, Pa., as they resurface the giant tank to prepare it for a research program aimed at harnessing atomic power for peacetime use.

**TO JOIN GI IN JAPAN**—Mrs. Donald Heck and her daughter, Constance, check up on a map of Tokyo for the site of their new home. The pair, now at Fort Lawton, Wash., are preparing to leave for Japan to join their GI husband and father who is attached to the occupation forces.

# NEW CONCEPT of the ATOM

## Is for Peace, Plenty, Leisure

By J. D. RATCLIFF  
(Condensed from Coronet Magazine)

PROPHECY is always difficult and generally wrong. When James Watt demonstrated his steam engine in Edinburgh in 1765, he could not visualize a 20th Century Limited train flashing through the night. The future of the steam engine, he felt, lay in pumping water out of mines. Similarly, Thomas Edison and his phonograph is another example. It is doubtful that Edison visualized the talking picture or the loudspeaker.

From today's vantage point, it is difficult to prophesy the era of the atom. Yet when one does peer into that future, dim outlines are already visible. Lightning terrified primitive man. Modern man stands in awe of the atom. But fear is as unreasonable in one case as in the other.

Think of the atom in terms of flame. A flame may be used to cook a steak, warm a house—or provide the searing breath of a flame-thrower. Or think of it in terms of dynamite. The same dynamite which prepares a field for cultivation by blasting stumps may bring screaming death in an air raid.

### Potentialities of the Atom

And so it is with the atom. We may use it to blast enemy cities in war. Or we may use it to give the human race a new concept of peace, plenty, leisure. Fortunately for mankind, the atom offers an enormous range of choice.

Power has always been the measure of human progress. Invention of the wheel took loads off the backs of men and animals. Steam provided power to spin those wheels more easily, electricity and gasoline made power available in a more convenient form. The amount of power consumed by any country is a measure of the level of civilization in that country. And now, the atom hurtles man into an age of superpower. From this point onward, anything is possible.

The great fireball that mushroomed over Hiroshima had a center temperature of 100 million degrees Fahrenheit. Yet such an enormous release of heat would melt ice from only a third of a square mile of Greenland—assuming the ice cap to be a thousand feet thick. So the task seems impossibly expensive in time and money until we remember that the bomb over Japan released less

than one-thousandth of the potential energy in uranium.

### The Atom's Immediate Job

Utilizing all its energy, it would melt the ice from 216 thousand acres—an area 47 times as large as Bermuda. On this basis the scheme to transform Greenland begins to appear feasible. But not necessarily desirable.

The most immediate job for atomic power is the production of electricity. There is enough knowledge on hand at this moment to start construction of an atomic power plant. It could be operating within 12 months.

Such a plant would be costly—just as the first model of any new machine is costly. The new model automobile that comes off the assembly line represents an expenditure of millions—in design, testing, retooling. This cost, of course, is eventually eaten up by the hundreds of thousands of cars that follow. The same might be true of an atomic power plant.

Such a plant would also be dangerous. Exploding uranium atoms shower off radiation of the same type produced by radium. Unless humans are protected by shields they will be fatally burned. This, however, presents no great obstacle. There are no deaths today in radium extraction

plants or among X-ray workers. There should be none in an atomic plant.

Many people question the advantages of electricity derived from atomic energy. They point out that fuel

HIROSHIMA—ATOMIC BOMB HEARD ROUND THE WORLD  
Column of smoke billowing 20,000 feet above Hiroshima after the atomic bombing in history August 6, 1945.

resents only 17 per cent of the cost of electric power today. Suppose, they say, that fuel were free. This would

reduce the household electric bill of \$3.50 a month to \$2.90—hardly the "revolution" expected from atomic power. This is poor logic. Suppose, as everything indicates, that atomic power will be cheap beyond belief. It might well pay utilities to furnish all the power a home could use for about \$3.50 a month. Then homes could be heated by electricity, air-conditioned by electricity.

With atomic power, planes, trains and ships will usher in a new era of cheap transportation. Everyone will be able to satisfy the urge to travel. A week of winter vacation on Africa's sunny shores will be within reach of an Iowa man; a week of skiing in Greenland a possibility for the Texan.

If such things seem fantastic, note one point. With the facts now on hand it would be easier to accomplish these things than it would have been for Michael Faraday, pioneer of electricity, to construct an electric razor.

Until today, any nation's ability to industrialize has depended on coal. Britain became a great manufacturing nation not so much because the British are good traders as because Wales had great coal deposits. Germany developed because of Ruhr coal, the U. S. because of Appalachian coal deposits.

Such a situation, however, no longer

holds. One pound of uranium yields as much power as three million pounds of coal. Three railroad hopper cars of uranium would equal the entire coal output of the United States. These facts disclose that, from now on, the industrialization of any nation will depend upon an almost insignificant amount of atomic fuel.

Africa, for instance, has virtually no coal but possesses a vast supply of uranium in the Belgian Congo. Therefore, it is quite conceivable that Africa will become as highly industrialized as North America. From being the most backward continent, it can move forward to become the most progressive.

Have-not nations will disappear from the earth—for the simple reason that there will be plenty for all. The Nazis rose to power on the cry that bullets are more vital than butter—which any sensible man knows is not true. In the future such political catch-phrases will fall on deaf ears.

War in essence is the effort of one tribe or nation to take desirable goods or properties from another tribe or nation. But if unlimited wealth is available at home, why go through the social and economic catastrophe of war?

A nation needs iron? Let it use atomic power to extract it from sea water. A nation needs sugar, fats? Such essential commodities can be made from wood if enough cheap power is available. A nation hungers for

# The PAN-AMERICAN Road Nearing Completion

By Special Associated Press Correspondent

THE Pan-American Highway is nearing completion after 20 years of dreaming, planning and working. Within the next two and one-half years, a tourist in Washington, Buenos Aires or San Francisco may be able to crank up his auto and drive 11,200 miles over all-weather roads linking the two Americas.

And those autos will drive through an important area of the Southwest. Tourists from all parts of the North American Continent will be converging on the portion of the highway located in Texas and Oklahoma.

This road is figuratively paved with tourist gold, much of which will remain in the Southwest. The Mexican Tourist Department estimates that na-

tion of Mexico, had hoped to meet President Juan Jose Arevalo, of Guatemala, at the border to inaugurate the last leg of the highway in Mexico before he goes out of office December 1, but construction will be slowed down during the rainy season.

Guatemala has a good road from border to border, but Mexico has 187 miles yet to finish; Honduras, 60; El Salvador, 20, and Panama 100. Completion of these stretches will give an all-weather highway from the United States border to Panama City, a distance of 3,250 miles.

Engineers believe it will be several years before Panama City is linked with Colombia—a distance of 200 miles through wild jungles, much of which has not even been surveyed.

business at upwards of 250,000,000 pesos (\$50,000,000) annually.

### 3,000 Autos a Month

This tourist business is already picking up. During the war years the Pan-American Highway south from the United States border to Mexico City was practically deserted. But tourist automobiles now are crossing the international boundary into South America at the rate of 3,000 a month.

Most of the traffic from the North stops at Mexico City. From Buenos Aires, the southern terminus, few tourists venture beyond Chile after crossing the Uspallata Pass high in the Andes.

In six months, from November through April, 1946, tourists' automobiles to the number of 18,040 entered Mexico at Nuevo Laredo, with peak travel in December, January and February.

Construction of the Pan-American Highway has helped many governments to realize that tourists business is good business, and some of them have sent officials to Mexico City to learn how to get a portion of the gold that rides on synthetic tires.

Of even greater importance is the economic effect the highway will have on each nation and neighbor nations. The Pan-American Highway linking the nations together eventually will lead to construction of farm-to-market roads and greater economic interdependence among the Americas.

Looking at the highway southbound, there are about 1,156 miles completed from the Mexican border at Nuevo Laredo through Mexico City to Oaxaca and some 50 miles beyond. From there to Guatemala it is hardly more than a trail.

187 Miles Unfinished in Mexico  
President Manuel Avila Comacho,

# OIL Brings WEALTH And Romance to Texas

By BOOTH MOONEY  
1339 Liberty Bank Bldg., Dallas, Texas.

DURING the 45 years since the Spindletop gusher came in with a roar at Beaumont, in 1901, oil has been a principal industry in Texas. It represents annually the expenditure of millions of dollars in pay-rolls, leases royalties, drilling, refining etc.

There's romance, as well as wealth, in oil. Today the industry is on a vastly different basis from the hit-and-miss, rough-and-tumble methods that prevailed in early days. Oil is now on a sound basis. Nevertheless, the romance remains. Oil men are a breed set apart and their occupation of buying and selling oil, promoting and drilling, is still colorful.

### Orderly Development

No one could have foreseen back in 1901, when the Spindletop field came in, that the greatest industry in the greatest State in the Union had come into being. Yet such was the case. The oil and gas industry of Texas is the largest for any of the 48 States. During the war years Texas produced around 45 per cent of all America's oil and nearly 90 per cent of the increased output needed to power the nation's war machine.

Today the industry's orderly development of Texas' 950 oil fields, with a total of nearly 104,000 producing wells, is a great economic asset to the State.

Last year Texas produced the stupendous total of 755,533,000 barrels of oil, a production peak of all time. In 1944 the State produced 748,122,000 barrels, also a record up to that time. Since that first Texas oil boom in 1901, there have been many other such

booms. Probably the most colorful and sensational were those at Ranger, Eastland county, Burkburnett, Wichita county, and the bringing in of the huge East Texas field in 1929.

### Recent Oil Strikes

But the days of the oil boom are not

derson county; Hawkins, Wood county; Slaughter, Hockley county; Wasson, Gaines county; Anahauc, Chambers county; Hastings and Old Ocean, Brazoria county; Thompson, Fort Bend county; Seeligson, Jim Wells county, and Tom O'Connor, Refugio county.

Oil has had a dramatic history in Texas, and it has been an important factor in keeping times good in Texas.

The most sensational and thrilling chapter in Texas history of oil development is the story of its part in World War II. That story has been told before and is widely known. Not so familiar to most Texans, however, is the story of how the oil industry has reconverted to peacetime production.

A recent announcement was of the purchase of a big toluene plant on the Texas Gulf Coast by an oil refiner who will convert it to the production of high-grade gasoline components. That plant, which produced much of the toluene for special explosives needed by our armed forces, is typical of what is happening to the war-born facilities of the Texas oil and gas industry.

Many of our State's natural gasoline plants, which produced aviation gasoline to fly block-busters to Berlin, now are supplying high octane gasoline to Texas car owners in spite of the shortage of lead for treating purposes. A large Texas chemical plant using natural gas as its raw material has turned from war production to several dozen civilian products ranging from hosiery to syrup. With chemical research speeded up by the war-time necessity for finding synthetic substitutes for a host of things, natural gas has become another major Texas industry. Today gas seems likely to be a vast new chemical business and Texas, with 58 per cent of the nation's known gas reserves, looms as its logical beneficiary.

(Continued on Page 5, column 2)

LUCAS GUSHER MONUMENT AT SPINDLETOP  
This monument commemorates the first Texas oil gusher well brought in by Capt. A. F. Lucas, in 1901, at Spindletop, near Beaumont, Texas.

over. Many important oil strikes have been made in the last few years. Some of the most important include fields at Goldsmith, Ector county; Cayuga, An-

Tourists' automobiles are now crossing the international boundary into South America at the rate of 3,000 a month.

Venezuela, although not the main north-south highway artery, has a leg reaching from Colombia to the ports of El Palito and La Guaira. Long sections of the highway are uncompleted, but buses and trucks are making the 700-mile run between Caracas and Bogota.

### In Ecuador and Peru

Colombia has 2,293 miles of the Pan-American Highway and 1,069 between Venezuela and Ecuador are all-weather construction.

Ecuador has 739 miles of Pan-American Highway, with 125 miles under construction and 49 yet to be started. Economic reasons have speeded construction of the highway in Peru, which has no north-south railroad. The nation has 2,128 miles of highway passable in all seasons, with feeder roads reaching into the high valleys of the Andes.

About half of Chile's highway is good and the remainder is passable. The north part is through a desert and, although not paved, is usable. From Valparaiso and Santiago the road turns sharply to cross the snow-covered Andes. When snows block the Uspallata Pass, motor vehicles use the Trans-Andean railroad tunnel, nearly two miles long, at an altitude of 10,500 feet.

# CURRENT COMMENT

By STAFF EDITOR.

## Most GIs Haven't Found Homes

THE Veterans Administration reported recently that 60 per cent of a sample of 3,000 married ex-soldiers were still looking for homes or apartments three to four months after they were discharged.

Meanwhile, they either were living doubled up with relatives or friends, in rooming or boarding houses, or in other over-crowded and poorly repaired quarters, the survey showed.

The Veterans Administration, which went after the information at the request of the National Housing Agency, reported that many of those who were lucky enough to find suitable, separate living quarters had to pay more than they could afford. When questioned at the separation centers, only 8 per cent were prepared to pay more than \$50 a month, but the survey disclosed 15 per cent were forced to go above that figure.

\*\*\*

## New Autos Still Come Slowly

In the first five months of the year the country's automobile plants assembled approximately 800,000 passenger cars and trucks. In the like period of 1941, the last full pre-war year of civilian production, the factories turned out 2,102,500 units.

These figures tell the story of the industry's vain effort to get back into high output to meet the largest accumulation of unfilled orders in its history. They tell also why few of the thousands of persons seeking new automobiles will be able to get them this year. The industry is still plagued by shortages of parts and materials due to labor difficulties at its supply sources.

\*\*\*

## Army to Test Arctic Route

The Army has underscored its interest in the Arctic short route between Europe and America with the announcement that special task forces will make new tests next winter in Alaska and the Aleutians of tactics, weapons and equipment for subzero weather.

Some 4,500 ground troops, who began assembling in June, will test tanks, self-propelled guns, radar, clothing and other items of military gear under all possible winter combat conditions. The Air Forces have assigned a squadron of converted B-29 long-range bombers to make frequent weather flights over the Arctic.

\*\*\*

## Oil Producers United in Policy

Oil men of the United States are united in their contention that a sound na-

tional policy should be established in order to allow the industry to meet future requirements for petroleum and its products, according to a recent statement by B. A. Hardey, president of the Independent Petroleum Association of America.

Hardey said the first essential step in securing such a policy is complete release from wartime controls which still are hampering development and expansion.

\*\*\*

## Flour and Meat to Remain Scarce

Flour, meats and fats will be scarce for at least another year, according to a prediction by Secretary of Agriculture Clinton P. Anderson.

Anderson said the current drive to cut domestic wheat consumption 25 per cent would mean about 50,000,000 bushels less wheat for the United States next year. That will cut the supply of bread, flour, cereals, spaghetti and baked goods.

\*\*\*

## Kiwanians Fight Juvenile Delinquency

Delegates to the 31st annual convention of Kiwanis International in June approved a plan to combat juvenile delinquency throughout the country. The plan was contained in a resolution urging the establishment of a Kiwanis "citizens juvenile council" of jurists, educators, law enforcement officers and social workers whose efforts would be joined in a move to fight juvenile delinquency.

\*\*\*

## Many Automobiles Scrapped

Automobiles scrapped during the 20 years from 1925 to 1944 have averaged 2,161,851 passenger cars and trucks per year, according to a report by statisticians for the automobile industry. This constitutes the normal replacement market, the current demand for new cars and trucks not being involved.

Figures completed for the 20-year period show 37,955,290 passenger cars and 5,281,736 trucks were scrapped or removed from the road during that time. A total of 71,818,513 motor vehicles has been sold since the automotive industry began production 50 years ago, 62,954,936 of which were passenger cars and the rest commercial vehicles.

## Atomic Use for Good of Man

Radio-active substances produced in the uranium ovens where the atomic bomb was made will be distributed for the first time to schools, hospitals and laboratories of science and industry.

The new program opens the way for widespread beneficial use of substances which can be detected even though invisible and which therefore may shed new light on the processes of human

equipping two 300-bed sanatoria in Minsk and Smolensk, and six 250-bed clinics.

Establishing three penicillin drying plants and one blood-plasma drying plant already shipped from the United States.

Clothing for orphans in White Russia, part of a \$240,000 project.

Five million surgical dressings for use in Russian hospitals.

## Secret War Device Saved Lives

The War Department has let another of World War II's life-saving devices out of the Army's bag of secrets.

The department credited an Army Air Forces locator buoy powered by a Signal Corps seawater battery with saving the lives of many fliers downed at sea.

The announcement said: "A number of instances are recorded in which downed airmen tossed the buoy from their life rafts into the ocean and watched a rodlike antenna emerge from the buoy which began to transmit radio signals in all directions."

Other planes within a radius of 50 miles could pick up the signals and by radio-direction finding equipment locate the source of the signal. The raft's position then could be flashed to the nearest ship.

\*\*\*

## Caves as War Havens

The Army and Navy are planning to study the nation's huge caverns as possible sites for underground factories and other military installations in event of a future atomic war.

Caverns to be explored include the famous Carlsbad Caverns, N. M., Mammoth Cave, Ky., and others. Military and civilian experts will obtain complete information on available floor and ceiling space for airplane hangars, industrial machinery, communications equipment, etc.; natural concealment from enemy planes; humidity and other atmospheric conditions; strength and depth; number of outlets for emergency evacuations; cost of transforming them into military and industrial installations.

\*\*\*

## Hot Weather Precautions for Vacationers

Here are nine-hot-weather precautions for summer vacationers endorsed by government safety officials:

1. Drink only water that you know has been certified as safe by health authorities.
2. Be extra careful about perishable foods.
3. Acquire your summer tan gradually.
4. Never exceed your swimming limitations, and stay out of the water until at least two hours after a meal.
5. Relax a few minutes after meals every day.
6. Try to get eight hours sleep every night.
7. Learn how to use a first-aid kit, and treat all injuries, even the slightest, promptly.
8. Take, frequent baths and wear light, loose clothing.
9. Avoid alcohol in hot weather, especially in excessive amounts.

\*\*\*

## Wants to Teach Farming to City Boys

Teaching of vocational agriculture in city schools has been recommended by Joseph W. Fichter, master of the Ohio Farm Grange. It's the way to increase the farm population, he says.

Fichter asserted that rural schools "have been sending farm boys and girls to the already overcrowded cities. The trend should be in the other direction." Teaching of vocational agriculture in city schools, he explained, would give city children an opportunity to choose farming as an occupation.

\*\*\*

## Larger Sugar Crop Expected

Cuba is expected to have about 5,200,000 tons of sugar for export from this year's crop, as compared with 3,470,000 tons from last year's drought-damaged crop, the Agriculture Department reported.

The United States is negotiating for the purchase of the Cuban export sugar supply. But the prospective increase is not expected to affect American civilian supplies materially, because the sugar is being shared with other countries.

\*\*\*

## New Cloth Will Stop Bullet

The Army has developed a protective cloth for soldiers that "will stop a bullet," says an announcement by Gen. Jacob L. Devers, Commanding General of the Army Ground Forces.

He predicted the cloth would save a lot of casualties, especially those caused by glancing shell fragments. Other Army officials said it is a step beyond the metallic body armor used by airmen and that the details might be disclosed later.

## Curious, Isn't It?

life, provide new information on animal and plant growth, the way the body uses food and medicine, and help mankind further in making certain products and in tapping the resources of nature.

It also is possible, scientists said, that the substances may be used directly to treat disease.

\*\*\*

## American Red Cross Aids Russia

By the end of this year, the American Red Cross will have contributed \$27,000,000 worth of wartime and post-war equipment, drugs and supplies to the Soviet Union. The main program for the year will include:

Finishing the installation of 10,000 visiting nurse centers in rural areas;

# Grass Root Reveries

By JOE GANDY

(Copyright, 1946, by the Southwest Magazine Co.)

JULY the Fourth was celebrated the usual way—with a lot of noise and accidental deaths. We talk and write about a sane Fourth but never have one. The great day is meaningless to thousands of Americans who celebrate it thoughtlessly and riotously. The anniversary of July the Fourth should be joyfully though reverently celebrated, for it brought liberty and freedom to America. This liberty was dearly bought just as was the liberty in War World I and World War II dearly bought. The greatest document ever written was the Declaration of Independence and the greatest speech ever made was by Patrick Henry in the Continental Congress in 1775. Pat concluded his stirring address with the memorable words: "Give me liberty or give me death."

I attended the Texas Press Association's first post-war convention in Corpus Christi, June 20-22. It was well attended by editors from all over the State. Hospitality of Corpus Christi citizens was lavish and cordial. No editor went hungry—there were free lunches, free dinners, free picture shows, free boat rides, free other things. Corpus Christi is a resort city fronting the Gulf of Mexico in a setting of semi-tropical beauty. It is the world's largest naval air training center and will be kept as a permanent naval training base, according to Admiral Nimitz. This base, during the period of World War II, turned out 12,000 Navy pilots.

I am writing this column while riding on a streamlined train through Texas. The train is powered by an oil-burning Diesel engine. Its average speed is 60 miles an hour, top speed 90 miles an hour. That's about as fast as any train can travel these days. But in the near distant future we shall refer to streamlined train days as we now refer to horse and buggy days. A department of the war recently reported

the top speed of a rocket propelled plane at over 1,000 miles an hour. This sounds fantastic, but is true nevertheless. Some of my readers will live to see the day when passenger rocket planes will leave an airport in Fort Worth or Oklahoma City at 8 a. m. and arrive in London at 11 a. m. the same day. We call this a fast age, but it will be a slow poke age compared with 20 years from now.

A soldier back from the wars says that in some parts of Africa a man doesn't know his wife until he marries her. Here in the U. S. a man doesn't always know his wife after he marries her. I thought I knew my wife after I married her, but she still keeps me guessing. When I think I have her figured out she changes her mind, then I gotta figure her out all over again. I have come to the conclusion it's best not to take a wife too seriously. Just kid her along and make her believe she is wonderful and the most important thing in all your young life.

Evidently there was too much appeasement of Russia from the beginning. Russia had her way during the war and has had her way since the war. The Russians are a friendly people and want peace, not war, but they are ruled by a communistic minority who hate capitalistic governments. The spearhead of this communistic minority are Stalin and Molotov. They have a program to dominate the world and balk when any other nation or nations oppose this program. Mr. Bernard M. Baruch recently appeared before the United Nations Council and offered a fair enough plan for banning the atomic bomb as a war weapon. But the Baruch plan didn't please Mr. Molotov who came to the Paris conference with a plan of his own for banning the atomic bomb. It is crystal clear that Russia has not shown a spirit of co-operation in her post-war dealings with other nations. Molotov at all peace conferences objects to this,

that or the other and what he doesn't like he wants to veto and what he does like is repugnant to liberty-loving people. Better to have an understanding with Russia now, stop appealing her and say to Stalin and Molotov in plain words that if Russia wants peace she can have peace but if Russia wants war she can have war. This palavering and pussy-footing gets us nowhere. My guess is Russia is bluffing and is not going to war with the United States or any other first-class power because it is militarily known that Russia is not prepared for war now or at any time in the near future.

A prominent physician of a prominent hospital clinic says that many human ills are caused by fear. People are afraid to eat for fear they will get too fat; afraid not to eat for fear they will have malnutrition; they are afraid to exercise for fear they will strain the heart; afraid not to exercise for fear they will become soft and lack resistance; they are afraid to live for fear they will die and afraid to die for fear they will go to the devil. Fear is our enemy number one. Lick fear and we are fairly on the way to health, happiness and success.

Archaeologists who have studied the governments of once powerful Indians tribes in America say that most of these tribes had a form of government better than ours. They had few laws but these were strictly enforced. No evidence has been found of graft or power politics among the Indians, the archeologists said. Chiefs and subchiefs ruled and were picked for leadership because of ability to govern wisely and fairly. Turning the country back to the Indians instead of being a joke may be the answer to most of our economic problems.

The Grit Magazine says: The father of Success is named Work. The mother of Success is named Devotion. The oldest son is Common Sense, and some of the boys are called Stability, Perseverance, Honesty, Thoroughness, Foresight, Enthusiasm, and Co-operation. The oldest daughter is Character. Some of the sisters are Cheerfulness, Loyalty, Care, Courtesy, Economy, Sincerity, and Harmony. The baby is Opportunity.

"Afraid to die for fear they will go to the devil."

# TEXAS BRIEF NEWS --- from Over the State

## FREE FAIR EXHIBITS PLANNED

Approximately 20 community exhibits are being planned for the community educational exhibit department of the Houston county free fair and livestock exhibit to be held at Crockett September 23-28.

## WEeping POST

G. A. Garland, McAllen automobile dealer, lacking new cars to display, erected in the center of his store room a cedar post on the top of which was attached a white handkerchief under large sign that reads: "Weeping Post."

## RESOURCE TAX REVENUES UP

Taxes on utilities, natural gas, crude oil, sulphur, carbon black and cement production have brought \$37,691,000 into the State's coffers since the first of the year, according to the May report of State Comptroller George H. Sheppard. Total revenue receipts at the end of May were \$228,381,288, compared with \$198,120,771 for a year ago.

## TEXAS LIBRARY ONE OF BIGGEST

The University of Texas library, with 775,000 volumes, is the 13th largest university library in the United States, and ranks sixth among State university libraries, according to a survey made by Princeton University. The Texas library added more than 24,000 books during the 1944-45 school year at a cost of \$79,000.

## MORE FROZEN FOOD PLANTS

Texas now has 403 frozen food locker plants in operation as compared with 268 eleven months ago, an increase of 33 per cent in less than a year. For the last few years frozen food plants have been in their heyday, and rationing has increased the popularity of the family locker. A large number of locker plants have installed their own killing systems.

## CAP CHIEF PROMOTED

D. Harold Byrd, Civil Air Patrol lieutenant colonel and commanding officer of the CAP Texas Wing, recently was notified from CAP Washington headquarters that he had been promoted to colonel. CAP Col. Byrd, instrumental in formation of the Civil Air Patrol at the beginning of the war, has been active in the organization ever since. The Civil Air Patrol is an Army Air Forces civilian auxiliary unit.

## FIRST 1946 BALE OF COTTON

Pryor Dillard, 39-year-old Harlingen cotton farmer, is credited with producing the first bale of cotton ginned in the United States this year. He delivered the cotton to the Houston Cotton Exchange on June 13 and received \$1,530.20 in an auction sale held in the exchange. Dillard, owner of a 735-acre farm, planted 300 acres to cotton on February 10.

## WEST TEXAS POLIO CENTER

Representatives from county poliomyelitis chapters met recently in Plainview with officials of the National Foundation of Infantile Paralysis and approved a West Texas polio center to be developed in Plainview, Hale county. Forty-four West Texas counties pledged \$12,800 with which to purchase equipment for the center. It will care for polio patients through rehabilitation of several years duration.

## 12,000 MANUFACTURERS LISTED

More than 12,000 Texas manufacturers are listed in the new Directory of Texas Manufacturers, issued July 1. This is the fifth edition of the directory. The listing is much more comprehensive than that of the Bureau of the Census, since the census includes only factories with an annual output of \$5,000 or more. The compilers of the Texas directory, issued by the Bureau of Business Research of the University of Texas, consider that many manufacturers with less than \$5,000 output are important locally, and also important to the State as their distribution expands.

## REGIONAL CHAMBERS FORM ASSOCIATION

The East Texas, West Texas and South Texas Chambers of Commerce have formed a clearinghouse for regional and local chamber of commerce activities under the name of the Texas Association of Commerce. At its organization meeting in Austin the association adopted a declaration of principles, including: pledge to promote agricultural, industrial and educational development; return to free enterprise; equal taxation of government-financed and private enterprise; conservation and development of natural resources; opposition to expansion of Federal social services and favoring change in eligibility for old-age assistance to restrict aid to needy only; expansion of a Texas advertising service to promote industrial development; correction of maladjustments and inequalities in OPA administration and abolition of OPA as production justifies. Paul Carington, of Dallas, is president of the association.

## WOMAN MAY BE 115 YEARS OLD

Mrs. Martina Yvarra, of Eden, Concho county, is assumed to be the oldest person in the entire State. Her relatives say she is "between 115 and 120 years old." The estimate of her age was made on the basis of the age of her relatives. Mrs. Yvarra was born at San Antonio. Asked how she felt, she shrugged her shoulders, sighed and replied, "I am very tired."

## DEATHS FROM TB DROP

Texas deaths from tuberculosis have dropped below 3,000 for the first time since 1914, according to Dr. Howard E. Smith, tuberculosis division director of the State Health Department. Dr. Smith said 2,923 deaths and 6,708 new cases were reported during the past year. The Texas death rate of 43.1 per 100,000 population is still above the national average of 39.7.

## TEXAS BUSINESS ON UPGRADE

Texas business activity reached the bottom of its reconversion decline last October, statistics from the University of Texas Bureau of Business Research reveal. Since that time, however, except for minor setbacks, the trend has been upward. In April the level was 13 per cent above October's low point. The peak of Texas business during the wartime boom was attained in January and February of last year. At that time the level of activity stood at 242 per cent of the pre-war average, based on the years 1935-39.

## BOYS' TOWN FOR TEXAS

Construction of a million-dollar project near Houston, to be patterned after the famed Boys' Town, Nebraska, which will cover between 500 and 1,000 acres and accommodate up to 500 dependent or homeless boys, was announced at a recent joint meeting of Houston's three Optimist Clubs. The Optimists, who are sponsoring the project, have been working on the plan for 20 years. Ground-breaking ceremonies for the first unit is planned for December 21st.

## ALL-TEXAS MOVIE PLANNED

A United Artists producer has announced plans for a moving picture, "Texas the Great," which will include an all-Texas cast and crew. The picture will be a \$4,000,000 production based on the history, adventure and romance of Texas. The producer said actual filming will not start for a year. Meanwhile, research workers and writers will assemble data and write the story.

## RANCHER BUILDS AN AIRPORT

Jacqueline Worthington, daughter of Rancher L. A. Worthington, of Jacksboro, Jack county, recently prevailed upon her father to buy her an airplane and build her a landing field. Worthington finally decided he might as well build a couple of 3,000-foot landing strips on his 10,000-acre West Fork Ranch. Now the airstrips are completed and Worthington has decided he will build a couple of hangars, put in gasoline pumps and open up an airport. Jacksboro needed one anyhow, the rancher said.

## LARGEST BASED BOMBER COMPLETED

Construction of the world's largest land-based bomber, the B-36, has been completed at the Fort Worth plant of Consolidated-Vultee Aircraft Corporation, and an extensive ground test program has been initiated, the Army Air Forces announced recently. Initial flights of the bomber are not scheduled until later in the summer. The B-36 is powered by six 3,000-horsepower engines and has a wing spread of 230 feet and a fuselage length of 163 feet. It requires a crew of 15.

## WHITTLES 17-FOOT WOODEN CHAIN

George Batt, of Fort Worth, 79-year-old retired railroad man, began whittling on an 11-foot piece of pine four months ago and now has produced a 17-foot wooden chain, a product of his spare-time hobby. Batt thinks he has "one for Ripley" in his unbroken wooden chain which, he believes, is the longest ever made. The chain has 138 links, and Batt whittled it with his old pocket knife.

## TEXAN GETS CONGRESSIONAL MEDAL OF HONOR

The heroism of Sgt. Alejandro R. Ruiz, of Barstow, Ward county, on Okinawa a year ago gained him the Congressional Medal of Honor from the President in June. "I had rather have this than be President of the United States," President Truman told the 22-year-old farm hand as he fastened the blue ribbon, on which the medal was suspended, around the sergeant's neck.

## A. & M. PLANS BUILDING PROGRAM

More than \$250,000 worth of construction and building rehabilitation is to be done at Texas A. & M. College during the summer. Expenditures will total \$281,182 in preparing and furnishing 312 additional apartments for married veteran students, installation of sewer and electric lines, three new warehouses, laboratory expansion, and additional tennis courts.

## CERAMICS INDUSTRY FOR CISCO

Cisco, in Eastland county, seems destined to become the center of a big ceramics industry and already is on the way with a new pottery plant in production and two new brick and tile plants under construction. Tests made under the direction of experts show that the city is situated adjacent to a fine plastic clay belt that is suitable for manufacture of art pottery, kitchen china, electric porcelains, brick and tile.

## U. OF T. TOWER ATTRACTS TOURISTS

More than 2,000 Texans and out-of-Staters each month ascend 307 feet via elevator to the top of the University of Texas 23-story main building tower to enjoy one of the most impressive scenic views in the State. In 1945 more than 25,707 men, women and children visited the tower, and that total is expected to be surpassed this year.

## TEXANS ON OIL COUNCIL

Fourteen Texans are on a new 85-member National Petroleum Council named to advise the Secretary of the Interior and the department's oil and gas division on petroleum matters. The council will be purely advisory and members will serve without compensation. Purpose of the council, Secretary of the Interior J. A. Krug said, is "to continue the government-industry teamwork established during the war."

## NIMITZ GETS HONORARY DEGREE

Fleet Admiral Chester W. Nimitz recently was presented an honorary doctor of law degree at the 106th commencement exercises of Southwestern University, in Georgetown, Williamson county. In accepting the degree, Admiral Nimitz said he did not do so for himself, but in behalf of more than 100,000 Texans who served "so gallantly in the Navy, Marine Corps and the Coast Guard during the past great conflict."

## EX-SLAVE RODE IN WAGON FROM ALABAMA TO TEXAS

Embro Norwood, 92-year-old ex-slave who lives on his 40-acre farm near Marlin, Falls county, still has an old iron axle used on a covered wagon in which he rode to Texas from Greensboro, Ala., in 1855. He was brought to Texas by Anson Norwood and family, pioneer settlers, who moved into Falls county. After the slaves were freed, Embro stayed for a time with the Norwood family and then engaged in farming for himself. He has lived in Falls county most of the time.

## BEEES FOIL POLICE

State and county police rushed to the scene of a truck accident on a highway a mile south of Pharr. Then they rushed right back to town. The wreck involved a truck loaded with 100 beehives. Swarming bees prevented investigation of the overturned vehicle by officers.

## MEN STEAL DEAD STEER

The meat shortage is getting no better. Recently a herd of Mexican cattle was driven from the Rio Grande river to an El Paso stockyard. One of the steers dropped dead during the drive, and the police department ordered the carcass removed and sent to a slaughter house to be rendered into waste fat. But before the police order could be carried out, several men in a truck arrived on the scene, loaded the carcass in the truck and drove away toward El Paso.

## YOUTH FINDS \$1,300, REFUSES REWARD

When George M. Blackwell, of Lubbock, discovered he had lost his wallet containing \$1,300, he figured his chances of recovering it were very slim. He failed, however, to reckon with the honesty of 13-year-old David Clark. David found the wallet in the street and, ascertaining the owner, immediately returned it to Mr. Blackwell. He refused to accept a reward.

**FIRE'S AFTERMATH**—This is the lobby of Chicago's Hotel LaSalle which was the scene of the Windy City's worst hotel fire in history, that took a toll of 57 lives with 200 of the 1,200 residents suffering injury in disaster. Shown is part of \$100,000 damage.

## \$500,000 "POSSUM" CROP

Teen-age boys of Texas are looking forward to converting their annual 'possum crop next fall into a cool half million dollars. That's what the 'possum crop will bring this year, according to a forecast by Capt. E. T. Dawson, of the Texas Game, Fish and Oyster Commission. In 1941, just before Pearl Harbor, Dawson said, 17,000 hunters, mostly teen-age farm boys, picked up cash hunting 'possums to the tune of \$38 apiece on an average. Moreover, the boys had a lot of fun doing it, Dawson added.

## BAPTISTS PLAN FIGHT ON DELINQUENCY

In a Statewide program to curb juvenile delinquency, an estimated 50,000 Baptist young people will hold meetings in 56 Texas cities September 28, it has been announced by Dr. T. C. Gardner, State director of the Baptist Training Union. Dr. Gardner said the Union is planning a program to provide religious and recreational activities for week-end nights in order to occupy constructively the time of youths who might otherwise seek amusement in destructive escapades.

## THE FLOP FAMILY

By SWAN

## DAUGHTER BORN TO MIDGETS

A daughter weighing six pounds and 13 ounces has been born to midget parents, Mr. and Mrs. A. C. Swenson, of Austin. The baby daughter may also be a midget. The baby's maternal grandparents are midgets, but the paternal grandparents are normal sized.

## NEW FILM SHOWS TEXAS RESOURCES

"A Story of Texas and Its Natural Resources," latest Bureau of Mines educational motion picture, has been released for free showing in schools, industrial training classes, the armed forces and civic organizations. The State's mineral wealth, as well as its scenic beauty, agriculture, cattle raising, transportation, and industries, are portrayed in the film.

## LUMBER RESOURCES DECREASED

The volume of East Texas forest saw timber size trees suitable for lumber and other commodities has decreased 3 per cent in the past 10 years, W. E. White, director of the Texas Forest Service, has announced. White said the Southern Forest Experiment Station had furnished estimates showing a shortage amounting to 733,000,000 board feet, or an average decrease of 69 board feet per acre for the 10,522,000 acres covering the commercial timber belt of the State.

## SPANISH WAR RECORDS GIVEN STATE

Personal letters describing camp conditions and activities of a group of Texas volunteer infantrymen in the Spanish-American War, photographic records, letters and documents belonging to George Willrich, captain of Company H, Texas volunteer Infantry, have been presented to the Texas State Historical Association by Miss Adina de Zavala of San Antonio. The letters and records have been placed in the archives of the University of Texas.

## TRAFFIC TAKES HEAVY TOLL

Traffic fatalities and accidents in Texas are on the increase. A total of 708 traffic deaths and 5,550 injuries were reported for the first five months of 1946, as compared to 507 deaths and 2,523 injuries for the same period in 1945, according to the State Department of Public Safety. Economic losses for the first five months this year were estimated at \$20,380,650.

## TEXAS ART PRIZES

Eleven hundred dollars have been pledged as prizes at the eighth annual Texas general art exhibition sponsored by the Dallas and Houston museums of fine arts and the Witte Memorial museum of San Antonio. Works in all mediums are eligible. Entries, which must be in Dallas before September 14, will be exhibited at the State Fair, October 5-20, and will be shown later at Houston and San Antonio. Entry blanks and additional information may be secured from the Dallas Museum of Fine Arts.

## WORM FARMER

Farmers frequently feel lower "than a worm," but it took Joe A. Noake, of San Antonio, to do something about the feeling. Mr. Noake, former army captain, has been a professional worm breeder and raiser for almost a year. The worms are bred for agricultural experiments, gardeners, farmers and fishermen. Mr. Noake plans to develop his unique business on a national scale.

## PREDATORY ANIMAL DRIVE

Predatory animals to the number of 25,752 were killed in Texas during the eleven months ending May 31 in a drive sponsored by the U. S. Fish and Wildlife Service and its co-ordinating agencies. The total includes 23,142 coyotes, 1,969 bobcats, 629 wolves, 11 mountain lions, and one bear.

## OLDEST LAWYER HAS BIRTHDAY

R. C. Fuller, of Fort Worth, is probably the oldest practicing lawyer in the world. The veteran of the Texas bar celebrated his 92nd birthday recently at a party in the home of his daughter, Mrs. R. H. McLemore. Fuller still maintains offices and consults with his clients, though he virtually retired last year. He was born in Arkansas in 1854 and served as prosecuting attorney in that State prior to moving to Fort Worth 45 years ago.

**NEW HEARING EASE!**  
with the Amazing, New  
**Beltone MONO-PAC**  
One-Unit

About 1/2 Size and Weight of Old Style Hearing Aids

**12 Big, New Advantages**  
(Here are just 3. Rush coupon for complete facts.)

- New One-Unit Tiny Size and Weight.

**POTATOES NOT FATTENING, SAYS DIETICIAN**

According to Miss Myrtle Ericson, of Ithaca, N. Y., instructor in food and nutrition at Cornell University's College of home economics, "the average potato furnishes about 100 calories."

"Now, of course," she explained, "if you are going to put lots of gravy or butter on your potato, you can step up that caloric value considerably. But don't blame the result on the potato. Potatoes in moderate amounts are even included in reducing diets."

Comparing the 100 caloric value of potatoes with other foods, she said:

"A chocolate bar would give you 240 calories. An ordinary doughnut gives you 175. A piece of apple pie represents 400 calories, and a half cup of ice cream 250."—General Electric News Bureau.

**LEADING CAUSES OF DEATH**

The 10 leading causes of death among persons under 20 years of age, according to U. S. Census Bureau figures for 1943, are: premature birth, pneumonia, accidents, congenital malformations, injury at birth, diarrhea and enteritis, tuberculosis, influenza, whooping cough and diseases of the heart. These 10 cause almost three-fourths, 71.8%, of all the deaths of babies, children and youths under 20 years.

**Pan-American Road Nears Completion**  
(Continued from Page 2)

It is 996 miles from Sanitago to Buenos Aires, all good road.

Argentina's other legs of the highway reach 1,285 miles to Bolivia, 936 miles to Paraguay and 705 miles to Brazil. From Buenos Aires the main route swings north to Rio de Janeiro, a distance of 1,687 miles, by the way of Montevideo, Uruguay. Brazil hopes to have her 1,705 miles of Pan-American Highway completed next year.

Although Punta Arenas, Chile, on the Straits of Magellan, the southern-most city in the world, is not on the Pan-American Highway, it is connected with Buenos Aires by an all-weather road.

Engineers estimate that it will take two and one-half years to complete the highway. When construction is finished, the intrepid tourist will be able to drive from Fairbanks, Alaska, over the trans-Canadian and Pan-American highways to Buenos Aires, a distance of 14,479 miles.

Dost thou believe on the Son of God? John 9:35.

**Who Said Justice Is Blind?**

The judge was deaf and the first case in the morning was that of two deaf men. The first man leaned forward and said: "Sir, this man owes me a grocery bill and he refuses to pay it."

The second man sprang up. "That's a lie!" he shouted indignantly. "My dog didn't bite him!"

There was a brief pause while the judge considered the evidence. Finally he announced his decision.

"Gentlemen," he said, "I fully appreciate your feelings but I can see no reason why you should not combine to support your old mother."

**Oil Brings Wealth**  
(Continued from Page Two)

Texas' butadiene and styrene plants, which the petroleum industry built or operated to supply synthetic rubber for an army on wheels, are now turning out rubber for tires and tubes. Texas gas, which has long supplied the carbon black used to toughen natural rubber, today furnishes about two-thirds of the nation's needs of this vital resource. Synthetic rubber requires carbon black both to toughen and to vulcanize it. Already Texas synthetic rubber plants, representing a wartime investment of around \$400,000,000, are fostering a tire-manufacturing industry in a State which has long supplied much of the cotton used for tire cords and fabric.

**Synthetic Rubber**

One of the permanent benefits of Texas oil to Texans is the payment of lease rentals, bonuses and royalties to landowners. Texas farmers and ranchers have found they don't have to be oil producers to reap an important "extra cash crop" each year from the oil industry.

The "extra cash crop" is in the form

**THE BIBLE---Most Fascinating Reading**

By MARY ELLEN CHASE  
(Condensed from National Parent-Teacher)

MANY parents ask how they can interest their children in the Bible? My own concern in the matter has arisen from my experience over a period of years in teaching the literature of the Bible to girls at Smith College. Of the several hundred whom I have had in my classes, only a very few, better trained than the average both at home and in church, knew anything at all when they entered my classroom beyond some hazy and unreliable memories of outstanding biblical characters and a few scattered verses, mostly from the Psalms.

And yet I have never discovered a

# A LITTLE FUN Jokes to Make You Laugh

**Looked Suspicious**

The late Clarence Darrow was cross-examining a witness in court: "But, if a man is on his hands and knees in the middle of the street, does that prove he is drunk?"

"No, sir, it does not," said the officer, "but this fellow was trying to roll up the white traffic line."

**Dark Future**

Janie, like so many of her elders, was giving a thought to her future in this post-war world. "If I get married some day will I have a husband like Papa?" she asked her mother. "Yes, dear."

"And if I don't get married, will I be an old maid like Aunt Susie?" "Yes, dear," Janie paused for a moment in perplexity: "Gee, I am in an awful fix."

**Much Ado About a Lot**

In Minneapolis Harry Goff complained to a clerk that he had not received the driver's license which was supposed to have been mailed to him. The clerk said the license had been sent, but returned by the postoffice because the address given for him was a parking lot. "That's right," said Goff. "There was no mistake . . . that's where I live in a trailer."

**Fired and Hired**

Back in the mid-19th century, Horace Greeley wrote great editorials for his New York Tribune—but his notoriously illegible handwriting constantly posed problems for Tribune printers who had to decipher it. Once, in an angry note to the composing-room foreman, Greeley demanded the dismissal of an inefficient printer. The man was fired, but, swiping Greeley's note before he left, he brazenly used it as a recommendation in applying for another job. The prospective employer puzzled over the handwriting for a moment, and unable to read it, finally identified the signature. "Ah, Greeley!" he exclaimed, and hired the man on the spot.

**Who Said Justice Is Blind?**

The judge was deaf and the first case in the morning was that of two deaf men. The first man leaned forward and said: "Sir, this man owes me a grocery bill and he refuses to pay it."

**Luce Talk**

Richard Nacy, executive vice-chairman of the Democratic National Committee, was telling about the congressman who was in awe of Congresswoman Clare Booth Luce. Finally, his wife demanded: "What's Mrs. Luce got that I haven't?" And her husband replied: "Darling, she has Fortune, Life and Time."

**Dear Doctor**

Letter received by health editor of Chicago Times:

Dear Doctor: Since before the war started my husband hasn't been sick a day in his whole life, but right after the war he became mixed up with a bunch of men where he works, and tells me he is now suffering from unionitis.

What worries me mostly is, he tells me he is on the verge of suffering labor pains, and I don't know what to make of all of this.

Would you please let me know whether or not unionitis is contagious, and what does he mean by having labor pains? Is it possible for men to get labor pains?

**You Can't Get to Heaven on a Trolley**

One morning a Chicago high school teacher, when transferring from one streetcar to another, was handed a tract. Without looking at it she hurried to board her second car. As she passed the conductor, she absent-mindedly handed him the tract instead of her transfer. He glanced at the title and remarked dryly, "Oh, did he?" She retrieved the tract, surrendered her transfer and hurried to a seat. Then she looked at the tract. Its title read, "Jesus Paid It All."

**Jitterbugging**

A worried father hurried to his teenage son's hospital bedside. The lad had a broken leg and myriad cuts and bruises.

"What happened, son?" queried the father solicitously. "Have a wreck coming home from your girl's house?"

"No," the boy groaned.

"Well," persisted the father, "how did it happen?"

"We were jitterbugging," the boy explained, "when her old man came in. He's deaf, couldn't hear the music and threw me out the window."

**Crazy But Foxy**

A visitor at an asylum was watching one of the inmates pushing a wheelbarrow upside down.

"That's not the way to push that thing," the visitor exclaimed. "You've got it upside down."

"Oh, have I? I used to push it the other way, and they put bricks in it!"

"Jeepers... how do you make those wonderful crackers?"

**Sunshine KRISPY CRACKERS**

...all through the meal!

"We take the finest ingredients . . . test 'em in our laboratory . . . and bake 'em into Krispys by a special Sunshine process in whopping-big streamlined ovens. That's how we make Krispy Crackers...that's why they taste so good!"

**WORK LONGER, LIVE LONGER**

Jobs suited to individual abilities rather than public financial help is the answer to the problems of older people, believes Dr. George Lawton, director of the Old Age Counselling Center of New York City.

Even with greater old age assistance and social security benefits, the New York psychologist reported, "the normal older person given the choice between a congenial job and an income, whether as a Federal grant or on a retirement pension, would prefer to keep on working as long as he is physically able."

"While there is no systematic research to prove that people who work longer live longer," Dr. Lawton said, "psychological and medical men on the basis of their clinical observation believe that of two men equal in all other respects, the one who keeps on working at a job he likes and can handle, will live longer than the one that retires."

"We do know," he continued, "that the physical and especially the mental well-being of the man or woman over 60 is impaired unless his or her day is occupied with activities either of a social or personal value, preferably an occupation with a wage."

**SALT USED IN SUMMER**

When hot weather or hard physical work causes you to perspire heavily, you may need extra amounts of salt to make up for what's lost through your skin. But taking salt directly, in tablet form, is not recommended, according to Hospital Diets, a War Department manual.

Instead, it advises that drinking water should be salted very lightly—about a quarter of a teaspoon to a quart of water—since this dilute solution is easier to handle.

As the manual points out, most people get enough salt from daily meals (roughly one-seventh ounce) unless thirst brought on by high heat or hard work causes them to drink more than sixteen glasses of water or other fluids per day. Then the salty water is advised to bring the total salt intake up to the half-ounce which may be needed.

**Produce Quality Eggs**  
(Condensed from American Poultry Journal)

From now on throughout the summer, special care must be used in the production of eggs if high quality is to be the aim. Heat is one of the chief factors of importance in the production of quality eggs, and must be guarded against at all times. Remember that the cooler eggs can be kept after they are produced and until they are sent to market, the better the quality will be. Everything possible should be done to keep eggs below the temperature of 60 to 65 degrees.

This means gathering them at least 3 times a day so they will not remain in the hot laying house for one hen after another to cover with her hot body; it means gathering eggs in a wire basket and keeping them either in a cool cellar or on a tray in a cool cellar so the body heat can leave the eggs as quickly as possible; it means not packing them in egg fillers and cases until the body heat has completely left them; it means getting them to market at least three times a week in summer-time; and it means protecting them from the sun while taking them to market.

Eggs should be cooled at least from 12 to 24 hours before packing. One point in the production of quality eggs that many people do not appreciate is that when eggs are taken out of a cool room in order to market them, they frequently sweat. This helps to lower the quality of the eggs. This sweating can be avoided by removing them from the cool egg room in the early morning when the air is cool.

Naturally only infertile eggs

**Practice Summer Sanitation**

The disease problem has to be dealt with now during the warm days with greater vigor than ever because conditions are just right for fostering the growth of disease germs. Inside the laying and colony houses, the floor should be kept as dry as possible with clean, absorbent litter. Outside, low wet spots can be drained or filled in. Disease organisms thrive in warm damp places; eliminate these places and you've eliminated a source of infection.

**Keep the Flock on Feed**

While conservation of feed is extremely necessary this year, it does not mean that either pullets or layers should be "short-changed" on the feed they need. A considerable saving, it is true, can be made on feed by furnishing a range with a good green crop growing on it, but it will still be necessary to supply a growing mash and some grain for the growing birds, and a laying mash, supplemented with grain, for the laying birds. Forcing birds to seek out their entire feed supply is not good management, and will result in unsatisfactory growth in the young stock and unsatisfactory production in the layers. Give them the feed they need to get best results.

# Texas Farm News Reports

Leon Smith, a farmer of the Hall community, San Saba county, has introduced a mechanical cotton picker into the county. The picking machine, which costs around \$1,000, is reported to be able to pick about three bales of cotton in two hours.

Frozen corn on the cob that tastes like roasting ears fresh from the stalk is the objective of an experiment of blanching fresh corn by radio frequency heating at the University of Texas. Experiments are being made with preparation of corn for quick freezing by dielectric heating rather than by boiling water or live steam.

A donation of \$50,000 to Texas A. & M. College for the purpose of providing "agricultural scholarships" has been made by Mr. and Mrs. Jesse Jones, of Houston. The scholarships, to be given over a period of 10 years, will be designed primarily to interest and reward young men at A. & M. who expect to graduate and return to the land in Texas and become better farmers.

More home food preservation than ever before is being urged as food insurance for the coming winter and spring. Gwendolyne Jones, specialist in food preservation for the Texas A. & M. College Extension Service, reports that this year's goal is to exceed the record of four billion jars of food canned by 25 million housewives in one year. To safeguard American diets during the months when wheat products will continue to be less than full supply, more vegetables especially will be needed to replace some of the food values and the "filling" quality of the wheat that goes abroad.

The former dean of Texas A. & M. College, Dr. E. J. Kyle, recently headed a group of leading citizens of Guatemala who made an inspection tour of agricultural sections in Texas and the Midwest. Dr. Kyle is now Ambassador to Guatemala.

A prospective new use for Texas cotton by which stalks, bolls and leaves may be harvested and converted directly into Kraft paper and newsprint has been developed to the point where the finished products are planned to be placed on the market next fall. The development was announced in Dallas recently by John W. Ticknor, of New York, assistant to the president and treasurer of the National Farm Chemurgic Conference.

More than 100 turkey producers from throughout Texas attended a barbecue near Austin in June to launch the Statewide membership drive of the Texas Turkey Federation. Goal of the drive is 500 members, according to R. E. Jones, president of the organization. The Federation was organized in Fort Worth last December to distribute information, assist in marketing and improve quality of turkeys.

A comparatively new industry for San Saba county is the raising of onions on a large scale, which was accomplished this year by William Gage. In June he harvested 60,000 pounds of Crystal Wax onions on a three-acre plot at the city limits of San Saba. This small acreage, irrigated from the San Saba river, had corn and beans growing between the rows, and as the onions were harvested Gage and members of his family planted a new crop of corn. The 276,000 onion plants were planted by hand and watered twice by irrigation.

Texas Belle John, of Abilene, Taylor county, is a successful cattle-raiser at the age of 13. She was still a baby when her father took \$5 from her piggy bank and bought her a Jersey heifer calf. Cattle then were cheap. With that beginning, Texas Belle's investment in 10 years has grown to livestock valued at more than \$600—and she has a cash reserve of more than \$300. Last August the 'teen-age cattle queen bought a Hereford cow and calf for \$75. In February she sold the calf for \$77 and the cow for \$85. Every transaction she has made has been profitable.

Ed Lipscomb, of Memphis, Tenn., sales promotion director of the National Cotton Council, warned the recent convention of the Texas Cottonseed Crushers Association: "Our job," Mr. Lipscomb said, "is to see to it that consumption stays at a level which makes high production possible."

A McAllen freezing plant is turning out 40,000 pounds daily of frozen crushed pineapple, thereby giving added impetus to the new quick freezing industry in Texas. The pineapple is shipped to the Valley by boat from Mexico and to McAllen by rail from Brownsville. The industry will continue through August 1.

The Texas College of Arts and Industries, of Kingsville, plans to establish a ranching, farming and citrus raising school in the Rio Grande Valley, it has been announced by Dr. E. N. Jones, president of the college. The school will teach both theory and practice, Dr. Jones said.

Texas was the first State in the nation to submit its program of farm-to-market roads to Washington, first to get approval, first to award a contract and first to complete a project. And now, according to John Redditt, chairman of the State Highway Commission, Texas has become the first State to submit a bill to the Federal government for its half of the cost. Bills have been submitted for projects in Randall and Armstrong counties.

Texas county agricultural agents have been advised that for the present the only treatment recommended by the Texas A. & M. College Extension Service for the control of horn flies, lice and mosquitoes on livestock is wettable DDT powder. DDT for this purpose is now on the market in two very different forms—(1) dry, in wettable powder and (2) liquid, in oil or xylene solutions or emulsions. Both forms may be diluted with water for use as a spray or dip.

Farmers and others who depend upon State fish hatcheries for fingerling fish to restock their home waters should place their applications direct with the Game, Fish and Oyster Commission, Austin. As a rule, applications forms are not available at the offices of county agricultural agents, although it is permissible for the agents to submit the names of farmers desiring fingerling fish.

Cottonseed crushed in the United States in the 10 months from August 1, 1945, to May 31, 1946, totaled 3,165,037 tons, compared with 4,001,972 tons in the corresponding period a year ago, according to a report by the U. S. Census Bureau. Cottonseed on hand at mills May 31 totaled 147,738 tons, compared with 396,969 tons on May 31, 1945.

Cattlemen of the Gulf Coast can thank a group of ranchmen of Jackson, Calhoun and Matagorda counties for "Stock 1037," a new product which has given very good results in control of the Gulf Coast tick. The tick has been responsible for 60 per cent of screw worm cases in some seasons. The ranchmen made their cattle and ranch facilities available to the Department of Agriculture's Bureau of Entomology and Plant Quarantine for tests on control of the tick from 1942 to 1945. "Stock 1037" is a salve that is rubbed into the ears, base of the horns, or where ever the tick may be found. It will kill the ticks and prevent reinfestation for from three to six weeks. To date the treatment is recommended only for cattle and sheep.

## It's Plain Horse Sense . . .

When you get animal vaccines made as carefully as human vaccines—it stands to reason they do a better job of protecting your livestock. That's why Cutter Vaccines & Serums are effective, dependable, for stock diseases. They're made with all the scientific care that Cutter gives its human products. And when it comes to protecting animals worth hundreds of dollars on the hoof, this extra safety means extra savings! Use Cutter Products regularly—your animals are worth it!

If not available locally, order direct from Cutter Laboratories: Berkeley, Denver, Helena, Ft. Worth, Los Angeles, San Antonio, Seattle.

## Use CUTTER VACCINES & SERUMS

The first commercial cargo of fresh green corn was flown from Weslaco to Kansas City in a test flight which is expected to blaze the trail for quick movement of perishable commodities from the Valley to midwestern markets. The load consisted of 250 crates of corn, weighing about 6,000 pounds.

A co-operative egg grading program for the South Plains area has been inaugurated at Crosbyton, Crosby county. Under this program, which will allow egg producers maximum prices, eggs will be graded as A, B and C. As a good percentage of eggs in the territory will be in the "A" class with a little care, Crosby county farmers stand to benefit materially from the program.

In the garden of N. J. Laughlin, of Hankamer, Chambers county, potatoes were planted. The vines came up all right, but small tomatoes were yielded only. J. R. Carroll, Chambers county agent, said that in all probability the pollen from tomatoes had been carried on the wind to the potato plants, as they were separated by only a few rows of other vegetables.

Any hen laying less than a dozen eggs a month is losing money for her owner, considering prevailing prices of feed and eggs, and should be culled from laying flocks says the Extension Service of A. & M. College. According to Sam Moore, Extension poultry specialist, most Texas flocks could lose one of every seven hens by proper culling, and yet increase profits. Until recently Texas egg production this year has exceeded last year's for the same period, although the State has reduced its poultry population to or below pre-war numbers, Moore declared.

**She's A Good Neighbor**—Biddie, a bantam hen belonging to Dave Cambarare, Lorain, Ohio, is not only a patient lady—but also a liberal one. Noting that Biddie insisted on "cutting in" on other fowls' territory and sitting on eggs not belonging to her, Dave placed five duck eggs in the bantam's nest. Result—Biddie hatched four of the five eggs and has been taking care of the ducklings. They will soon outgrow her.

Increased yields of around 300 pounds per acre have followed control of leaf hoppers on peanuts. The control measures tried out were dusting with sulphur or copper-sulphur dust and spraying with

Bordeaux mixture. The Bordeaux was mixed at the rate of four pounds of copper sulphate and four of hydrated lime to 50 gallons of water. Good results may be obtained by dusting or spraying peanuts three or four times at two-week intervals.

Mineral wealth, scenic beauty, agriculture, cattle, transportation and industry of the Lone Star State are portrayed in "A Story of Texas and Its Natural Resources," latest educational motion picture of the Bureau of Mines. The picture, released last month, is being shown in schools, in industrial training classes, to the armed forces, and to civic organizations.

An international cotton dusting program aimed at the elimination of the pink bollworm has been opened in the Rio Grande Valley and northern Mexico. Spraying of fields in Tamaulipas and Valley areas is part of a joint battle the departments of agriculture of Mexico and the United States have been waging for the last three years against insects. Fifteen thousand pounds of DDT mixture are being used in the current dusting operations.

Texas peach growers may have a much wider market for their product in the future if a series of tests on long-distance hauling of tree-ripened fruit this summer are successful. In the tests, being carried on by out-of-State experiment stations, tree-ripened fruit is delivered to consumers in good condition which greatly increases consumption of peaches.

A motor-driven machine that turns out deadly grasshopper poison has been constructed by Joe Holy and Frank Grones, of West, McLennan county. The machine is a box-like affair with wooden crossbars connecting two revolving chains. Into the box go one tub, or 25 pounds of bran, three tubs of peanut hulls, 14 gallons of water, and four pounds of sodium flurosilicate. As the chains revolve, the crossbars toss the ingredients together into a wet mash which is said to be death to grasshoppers and other insects. The mixture is not harmful to farm animals unless they get into a sack and eat a large amount, according to County Agent J. C. Patterson. The mixture is sown like grain with 10 to 15 pounds used for each acre.

SNUFFIE, THE BOTTLE BABY—Chow time for Snuffie, an orphan cat left on Mrs. Darlene Dyer's doorstep in Los Angeles, is definitely a cuddly ordeal, as he demonstrates above.

## MODEL PLANE BUILDING IS FUN

Are you "up in the air" about your summertime activities? Do you have trouble finding an enjoyable hobby, one that keeps you so interested that each new step in its pursuit makes you want more and more of it?

Model aviation can be like that. Once you've found out how simple it is to get started, how inexpensive, how few tools you need, you are sure to become air-minded. And when you have tried a few models and made one that really rises off the ground and flies, a plane that YOU have built—don't worry, you will have been bitten by the model-plane bug. You will no longer wonder what to do with your spare time. Instead you will be "up in the air" with and about your planes.

Most boys 8 years of age and older will find model-plane building real fun.

And if you acquire skill and interest to the point where you can build a gasoline model plane, with a real midsize engine that whizzes and whirls through the air in great circles while you work the guides that control it, then you really will have something to point to with pride.

In time you will be having contests with other model builders, for there are a lot of these contests in the Southwest. You will compete with the other builders for perfection of detail in copying the great

"Model plane building is real fun."

planes that have made history in war and in peace. Maybe you will even dream up designs of your own. It's entirely possible. Other youngsters have done it.

Look, for example, at Stanley Hiller of Berkeley, California. He started his plane-hobby work when he was just 8 years of age. He kept working, and when he was in his early teens Stanley built successful models and started tinkering with an original model idea of his own. He turned up at the age of 16 with a plane complete and test-flown—the now famous "Hillercopter." This whirling windmill rises straight up, hovers in the air, moves to one side or the other, or backward, or forward, with a cruising speed of 115 miles an hour.

Stanley interested Henry Kaiser, the famous ship and automobile manufacturer, in his Hillercopter. Now Kaiser and Stanley are business partners. Stanley is producing his own planes in a big factory and selling them to thousands of buyers.

Many contests are held for model plane builders. Last fall one was held in Philadelphia, with more than 200 boys competing before a crowd of over 50,000 people. The contest was for speed, perfection of construction, workmanship and design, in every class of plane from midsize to giants. That was a meet in which over \$3,000 in prizes were awarded.

Perhaps model building will some day help you to become a pilot, plane mechanic or designer. Who can tell what abilities and talents you will discover in yourself as you learn to read plans, develop finger dexterity and skill with tools, become familiar with the names of airplane parts and construction, and learn the fundamentals of flight?

Flight Sgt. Richard S. Robbins, for three years an instructor in aircraft recognition schools, started on models and uses them

in his work. He states that Air Corps cadets are often asked for their hobby experience and are placed in advanced classes if they have first gone in for model building. In fact, some of the war's top aces were model builders when they were boys.

We are living in an Air Age. More and more air fields are springing up over the country, and more and more boys and young men are learning how to fly. So why not get into the trend of the times and get a jump on the future by starting today on a model air plane hobby? And you'll have fun doing it!

## MAGIC IN A GOAL

By COLENA M. ANDERSON  
(Condensed from Your Life Magazine)

One of the stories I used to ask my father to tell over and over again was how he won a prize, when he was a young boy, for plowing the straightest furrow. It happened at a county fair long years ago. He was watching contestants trying to plow a straight, deep furrow across a field. Not one succeeded.

Edging close to the man who was running the contest, my father asked, "Could I try, mister?"

The man looked down at him and said, "Why, you're only a boy."

"I know," my father answered, "but I plow for my father."

"All right. Take that horse." He pointed to a horse tied nearby.

"I'd rather use my own, sir," my father said. "She's right over there, hitched to the spring wagon."

In a few minutes he was back with the horse.

"Now where do you want the furrow plowed?" he asked the man.

"From this spot to that tree over there." The man indicated a tree at the other end of the field, and almost before he had finished speaking, my father was running across the field toward the tree. Once there, he broke off a branch, stuck it in the ground and put his hat on top of it.

When he returned to the man, he took the reins and turned the horse's head toward the branch. Immediately the horse started off, straight for the hat. The furrow made by the plow was not only straight throughout its length, but even in its depth.

"I won the prize," my father used to say, "because I had trained that horse to make a beeline for my hat."

He had provided the horse with a goal. A goal is always a good thing. It steadies anybody.

## NATURE'S WEATHERWISE CHILDREN

Animals know a lot about the weather. Cats are known to wash behind their ears only when rain is on the way. Cats also become restless and wander aimlessly about when a thunderstorm is coming up.

Donkeys, too, are said to be weather prophets, and their braying tells of the approach of rain. Field mice cover their holes just before a fall of snow, and sheep in mountainous districts change their feeding grounds to the south side of hills when gales and rain are expected. Bees also are sensitive to atmospheric changes, and when they refuse to leave the hive you can be pretty sure that wet weather is on the way.

## THE USEFUL WHIPPOORWILL

Very few are the birds who can identify themselves as distinctly as the whippoorwill, whose cry sounds out at night when other birds are still. The great student of birds, Alexander Wilson, describes him as belonging to a "singular and very celebrated species, universally noted over the greater part of the United States for the loud reiterated of his favorite call."

The whippoorwill should not be confused with the nighthawk, which he greatly resembles in appearance. The whippoorwill consumes great quantities of night-flying insects and is among our most useful birds.

MYRTLE

Right Around Home

By Dudley Fisher

## New Concept Of the Atom

(Continued from Page 2)

gold? With atomic power, other elements can be transmuted into gold.

Thus with unlimited atomic power, the basic reason for war disappears. There will be plenty for everyone without the necessity of seizing it from a neighbor. Nations will no longer have to bankrupt themselves in order to maintain large armies and navies. The energy formerly expended on creating weapons of war will be expended on providing more human comforts, greater leisure and increased security.

All of this is here for us—if we accept the wise counsel of scientists instead of the unwise words of soldiers and politicians who speak of the "atomic secret." There is no atomic secret—any more than there is a secret of common table salt, a secret of a glass of water, a secret of a stick of chewing gum.

A great part of the wealth for the new future world will come from the oceans, which are this planet's great mineral depository. Each cubic mile of sea water contains five billion dollars' worth of minerals. The United States has pioneered in extracting bromine (for anti-knock gasoline) from sea water and in extracting magnesium metal.

Other nations can follow suit, securing all the iron, copper, silver they want. They can get raw materials from which to make textile, fertilizer and a thousand other products. Even Africa might supply its deficiency of metals by using waters from which minerals had been extracted to irrigate the Sahara. Then this vast wasteland would bloom again.

Cost, of course, is the immediate guiding factor in accomplishing many of these earth-shaking achievements. Up to the present point uranium power has been wrapped up in the extravagances of war. It is highly unlikely that anyone could accurately estimate the cost of a pound of U-235. So let's approach the problem from the other direction. What would uranium have to sell for to compete with other fuels?

Fortunately, the world has an enormous supply of uranium. In this country, we have rich ore deposits in Colorado and Utah. Canada has a vast stockpile on the shores of Great Bear Lake. Other deposits are scattered around the world. Almost any of the rocks in your own back yard contain some uranium.

Moreover, it seems likely that scientists will learn how to derive power from elements other

than uranium. The thorium used in old-fashioned gas mantels will surely yield large amounts of power. So will other elements. The goal, of course, is to start controllable chain reactions in such common things as carbon and nitrogen.

When and if these random sources are eventually tapped, man can do as he likes with the world if he chooses to air-condition the tropics he can do so; or he can turn Antarctica into a giant hothouse.

Even with fuels that existed before the era of atomic power, it was theoretically feasible to build a rocket which would travel to the moon. Atomic power immeasurably simplifies the task. Scientific exploration of Mars is now within man's grasp.

If such things sound wildly preposterous, remember one of pre-proposed adage. In the field of modern science, today's optimistic dreaming invariably turns out to be tomorrow's accomplished fact.

## IMPORTANCE OF WOOD

How much wood in the United States in an average year?

The answer is 30 billion board feet, which does not mean much to the average inquirer, because the number is too big for comprehension.

To emphasize that the figure is truly of an astronomical vastness, a Forest Service statistician has put the lumber into an imaginary herd walk. The walk is thirty feet wide and one inch thick and reaches all the way to the moon.

One half that amount, the Forest Service says, ordinarily goes into building construction. The other half is for all sorts of manufactured articles, boxes, furniture, matches, millwork, and toys.

A second, and highly important, use of wood lies in its contribution to intellectual life, in providing cheap material for printing books, magazines and newspapers. Newsprint accounts for about a fourth of the wood-pulp consumption.

Wood remains of great importance as a fuel.

## MONEYS OF THE WORLD

Some 60,000 exhibits in the Chase National Bank, of New York, Collection of Moneys of the World, represents every period of coinage and every known political division that issued money.

They include the 5,000-year-old ring money of Egypt and the Roosevelt dime struck in January this year. The displays trace the history of paper currency from the 14th Century Ming Dynasty in China to the modern \$10,000 Federal Reserve note.

Highlight of the check exhibit is the largest check ever drawn on the Chase Bank, one for \$225 million. It was made out during the war by the Metropolitan Life Insurance Company to pay for 2½ Treasury Bonds. At the other extreme is a check for 1 cent made out in braille by Helen Keller.—The Wall Street Journal.

## MINERALS IN SEA WATER

One cubic yard of seawater contains more than 47 pounds of salt, 2 pounds of magnesium, almost 1½ pounds of sulphur, more than ½ pound of calcium, about ½ pound of potassium and small amounts of iron, copper, lead, molybdenum, silver, vanadium, mercury, gold, radium and uranium.

Meats will come out whole from nuts which have been soaked overnight before cracking in a strong brine made from salt.

For I came down from heaven, not to do mine own will, but the will of Him that sent me. John 6:38.

## MACHINERY

ATTENTION—Farmers and Ranchers—Do your own Clearing, Terracing and Tanking.

- 1—Allis Chalmers HD-14 Tractor with Garwood Angledozer, cable operated.
- 2—New International TD-14 Tractors with Angledozer and Winches.
- 4—New LaPlante Choate, 2 cu. yd. Hydraulic Controlled 4 wheeled Scrapers, for use with large size Farm Tractor.
- 1—New 4 yd. LeFouneau Scraper.

Dallas, Texas

MECHANICAL Precision Tools. Full line. Ace Tools Co., 820 Prospect, MA 0976. Union Tool Co., 2271 Ontario, CH 4792. Cleveland, Ohio.

FOR SALE—72x16 boiler, 12x18 engine, pump etc.; 66x16 boiler, 12x18 engine etc. Both carry state inspection. Prompt delivery. FRANK J. FOYT, Box 83, Snook, Texas, Dept. 3910.

LATEST type concrete block machines and mixers. Sub dealers wanted in counties. Goodwin Construction Co., 111 W. Commerce, G-8415, San Antonio, Texas, Dept. 3920.

FOR SALE—Saw mill, portable, 110 Continental Motor, Mueckler Motor Co., Nacogdoches, Texas, Dept. 3916.

MACHINERY for sale; punch presses, 10-ton, 15-ton, 20-ton, 30-ton, 40-ton, 50-ton, 100 Perry St., Buffalo, N. Y., Phone Cleveland 1524.

2 ONLY, 2 prefabricated barracks type 20-gauge corrugated aluminum buildings, 28x54 ft., \$1,050 each. Available in San Marcos, Texas, at the Service Station, Phone 115X, Lucius Parish, San Marcos, Texas.

FOR SALE—½ hp Hobart air compressor; 3 hp Auto compressor; new DeWitts Paint gun and hose; 2 bucket type seat or 1936 Ford; Steering wheel valve for vacuum brakes. M. E. Selby, Minden, La.

## FARMS AND RANCHES

FOR SALE—Ranches and farm lands in Sharp County, Arkansas. Plenty water and grass. Realty by W. M. Graham, Hardy, Arkansas, Dept. 3928.

LOOK—Here's your chance to buy a real hunting preserve; plenty deer, turkey; approximately 1400 acres, new fences, new mill, springs, 40 miles north of Uvalde, 2 miles off paved highway. Buy from owner; \$15. Write or phone for appointment. J. Lynn Jones, Montell, Texas, Dept. 3598.

LIST your farms, ranches, homes or income property with us for quick sale. Write F. C. Cox Realty Exchange, 1314 E. Grayson, San Antonio, Texas, Dept. 3922.

800 ACRES Bandera County, 32 miles from San Antonio, Box 148, Pipe Creek, Texas.

FOR SALE—95-acre farm, 5-room house, good, large barn, plenty of good water; 7½ miles south of Paris, cheap for cash, \$2,000. If sold in 30 days. See or write J. H. HINES, Magazine, Ark., Route 2.

136-ACRE FARM—On highway; good improvements; electric, water pressure system; good 5-room stucco house; large living room; pasture for 35 head of milk cows; cash or terms. Contact WILLIAM E. McDaniel, Grovespring, Mo.

320 ACRES good timber and pasture land for sale. No bids, but logs to build hundreds, Springs and beaver ponds. Pasture is fenced, 34 wires. Beautiful spot, 2 miles from Blackhawk, 5 by road. Price, \$4,500. M. N. Nelson, Central City, Colo. Phone 2882 evenings.

FOR SALE—267 a. ranch, 4 rm. house, electricity, elec. pump, lg. barn, lg. chicken house, 314 acres. Beautiful spot, tenant house, artesian well, running stream to irrigate 40 a., 300 peaches, 350 budded pecans, 15 alfalfa, 30 a. sudan, 70 a. in cult., bal. pasture, \$75 per acre. Cash, bal. easy terms. Owner, J. L. CORBIN, Rt. 1, Box 206, Azle, Texas.

## REAL ESTATE FOR SALE

FOR SALE—Well finished 4-room house, service station and 3 acres of land on Fort Worth-Lubbock Highway. J. E. TEDROW, Jermyn, Texas.

FOR RENT—Business building in Elk City, Okla.; 25x140 ft.; excellent location; available now. Grocery, dry goods, or ready-to-wear preferred. F. L. KELLEY, Weatherford, Okla.

TWO-STORY ROCK HOUSE, completely furnished; all conveniences of city; 4 lots, including 1 acre budded pecans. Will make an ideal home. Priced cheap. W. J. Bludworth, Flatonia, Texas.

FOR SALE—Well established summer resort, 2 cabins, lodge, boats, motors, Water Art Lanchance, Lake Penage, Espanola, Ontario.

## FOR SALE—Miscellaneous

BELLS, Navy type, 15 lb. size, complete; OPA approved \$12.50 each; buy direct from mfg. Write Box 1193, Reading, Pa.

AUTO SEAT COVERS—Extra well made, plaid fiber, leatherette trim, 1,000 models. Coupes \$8.75, Sedans \$12.75. Front seats, 2-drs., \$8.75. Shipped C. O. D. Lubbock Seat Cover Co., 1911-N, Lubbock, Texas.

# HOUSEHOLD HELPS

By MARGARET MOORE

## SUMMER BEAUTY!

By MRS. ANNE CABOT

An absolute charmer of a blouse with airy "butterfly" sleeves can be made up in all sorts of summery fabrics. It will be charming in a pastel rayon crepe with delicate white lace trim—in icy-white pique with eyelet embroidery or in dashing and vivid floral prints on a dark background and trimmed with black lace. Make it up in pink and white or blue and white checked cottons trimmed with bands of self fabric to wear with play shorts.

To obtain complete pattern finishing instructions for the Midsummer Butterfly Blouse (Pattern No. 5156 sizes 14, 16, 18 included), send 15 cents in COIN plus 1c postage, YOUR NAME, ADDRESS and the PATTERN NUMBER to Anne Cabot, Southwest Magazine, 1150 Ave. Americas, New York 19, N. Y.

You'll find dozens of vacation crocheting, knitting and embroidering designs in the Anne Cabot ALBUM as well as eight pages of free instructions for gifts. Send for your copy. Price 15 cents.

Please do not send order to Mrs. Margaret Moore, Fort Worth, Texas. Send order to Anne Cabot, Southwest Magazine, 1150 Ave. Americas, New York 19, N. Y.

## MAKING HOME MORE ATTRACTIVE

There is no alibi for an unattractive home when inexpensive fabric wall hangings, or clever dime store containers for bits of ivy and flowering plants are all that it takes to convert a drab room into the beginnings of a colorful, interesting room.

For ugly walls, place a textile used as a large wall hanging over the radio or table where it will do the most good—that is, where interest would be centered on it, rather than on rain-circled or faded paper. If pictures are used on patterned wall paper, use wide matings around the pictures to exaggerate their size and separate them from the patterned paper.

Color may be brought into rooms through commercial paints made to cover ugly wall paper. If new wall paper can be had, care should be taken in selecting it. Stripes will give a dignified effect, small patterns a conservative effect and clear direct patterns, an active effect.

## SUMMERTIME BEAUTY HINTS

Should it happen that your complexion looks all tired out, and you have a spare half hour in the evening, you may like to spread on a lemon and oil pack. This treatment is of value as a cleansing agent. It digs out black points, softening the little masses of wax that clog the orifices, writes Helen Follett, beauty expert.

It has mild bleaching properties and it will smooth a rough surface. And it is certainly most inexpensive.

Wash your face with a bland soap and warm water. Rinse and dry, apply a light cream, go over the skin surface with tapping movements to make the bloodstreams dance.

You will tone the tiny fibers under the skin, which is a good idea if you fear that birthdays are revealing age, that tissues have softened. Just as well to have a weather eye on the future. Remove all cream.

## HOME CANNING PROSPECTS

Home canning will be as important this year, when famine stalks overseas, as it was any summer during the war, says the Bureau of Human Nutrition and Home Economics. Every jar of good home-canned food that a family puts up for itself will do its bit toward making the world's food supply go around.

"What about canning equipment and supplies?" many homemakers ask when they begin planning for canning. Luckily, this year no serious shortages in canning equipment are expected. Here is a round-up of the supply picture:

**Canners:** Outlook is good for production of both pressure and water-bath canners. Aluminum is fairly plentiful. The enamelware industry is running well above its pre-war production of various items, and should be able to make water-bath canners to meet demands.

## NO TIME TO WASTE FATS

Little drops of oil, little scraps of fat, if saved in every kitchen, can make a mighty total. The housewife can make an important contribution to food conservation by preventing small everyday wastes—the oil that runs over the side of the can or is left in the salad bowl; the cooking fat not scraped out carefully when the container is discarded, left in the frying pan, or spoiled by careless cooking or improper storage.

More attention should be given to careful scraping of dishes, pans and containers of fat. Home economists of the U. S. Department of Agriculture suggest. A rubber-tipped dish scraper of the type now selling again at kitchen supply counters is one of the best utensils for removing that last bit of fat—or any other food. Fat that gets into the dish water and goes down the drain does no one any good—in fact, may do harm by stopping up drain pipes. Remnants of cooking fat in cans should be melted down and poured out for use before the can

## TESTED RECIPES

### Meat Balls

1 lb. ground beef or lamb  
1 1/4 lbs. ground pork  
1 1/2 cups rolled oats  
1 medium onion, chopped  
1/2 teaspoon salt  
1/2 teaspoon pepper  
1 cup canned tomato drippings to brown.

Combine all the ingredients except the drippings. Shape into 12 balls. Roll in seasoned flour and brown in the hot drippings. Add half a cup of water or tomato juice, cover, and simmer about 30 minutes. Serves 6.

### Top-of-Stove Cake

1 cup sifted flour  
1 1/2 teaspoons baking powder  
3 tablespoons shortening  
1/2 cup sugar  
1 egg  
1/4 cup milk  
1/2 teaspoon vanilla.  
Mix and sift flour and baking powder. Cream shortening, add sugar, and cream

Inexpensive cotton string rugs may cover worn spots in rugs or divert attention from bad flooring. Slipcovers are lifesavers for shabby furniture, and even though expensive at first, they will be worth it in the beauty, life and attractiveness they give to an otherwise dull room.

Curtains of unbleached domestic, very full, with a draw cord which brings them completely together in the evening, gives any room a certain amount of glamour.

Up-to-date magazines, today's newspapers and books conveniently arranged on tables and not stuffed into stands give a room a "lived-in" look.

## When it rains it pours

PLAIN OR IODIZED

Season with salt and pepper. Bake in a slow oven (325 F.) for 20 minutes, or until egg is as firm as desired.

### Bran Biscuits

1 1/4 cups flour  
2 teaspoons baking powder  
1/2 teaspoon salt  
3/4 cup bran flour  
2 tablespoons fat  
1 egg  
1/2 cup water  
2 tablespoons molasses.  
Sift the flour, measure, add the other dry ingredients and sift again. Add the part of the bran that does not go through the sifter and mix well. Cut in the fat. Beat the egg, add the water and molasses. Add to the dry ingredients and mix. Put onto a slightly floured board and roll to one-third inches in thickness. Bake in a hot oven 450 degrees, for about 15 minutes. Makes 12 or 14 biscuits.

### Swiss Steak

1 pound steak  
1 cup flour  
Salt and pepper  
4 peeled tomatoes  
1 sliced onion  
Water.

Have steak cut 2 inches thick and pound flour into it. Put steak in skillet with 3 tablespoons shortening and brown on both sides, then cover with water, adding sliced onion, tomatoes sliced, and cover closely.

Let simmer for 3 hours. Just before meat is done, add salt and pepper to taste. When done, the gravy is ready made. Serve four.

### Rhubarb Pudding

1 pound rhubarb  
Sugar  
1/3 cup sugar  
2 tablespoons shortening  
1/2 teaspoon salt  
1 tablespoon baking powder  
1 egg  
1 cup flour  
1/2 cup milk  
1 teaspoon vanilla.

Clean and cut up rhubarb, put in dish and sprinkle with sugar. Cream shortening, add sugar and cream, then well-beaten egg. Sift flour with baking powder and salt, add alternately with milk, blend, and add vanilla. Pour batter over rhubarb and bake in 325 degrees F. oven for 30 minutes.

## FRIENDS OF JESUS

The International Sunday School Lesson

Who were the friends of Jesus?

First of all, the children, whom He took up in His arms and blessed. The Disciples, with those false notions that many religious people have had about the young, were going to send away the women who brought their children, rebuking them for troubling the Master. But the Master was "much displeased." It was the Disciples who were rebuked.

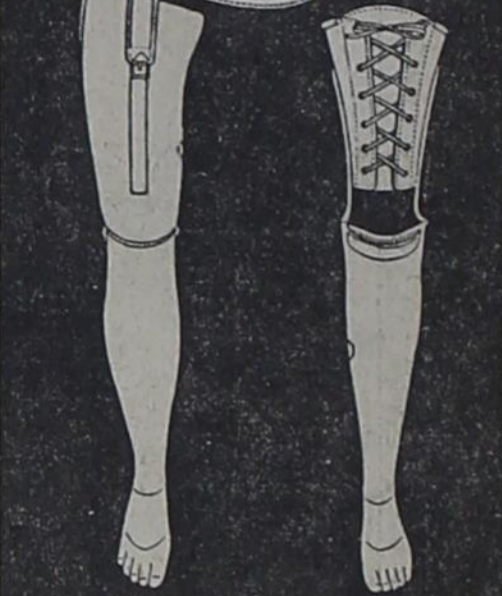

Then, the Disciples themselves, already with Him and in His company—the men from fishing boats, from customs houses, and from other lowly places and walks of life, to whom Jesus said, "I have not called you servants, for the servant knoweth not what his lord doeth, but I have called you friends."

The great, also—men in authority, like the Roman centurion whose faith He commended; Nicodemus, the ruler of the Jews, who came to Him by night; Joseph of Arimathea, who claimed His body and gave it burial; the wealthy who invited Him to their homes and made for Him a feast, like Simon, the Pharisee.

He befriended, too, the sick and the needy, the common people who "heard Him gladly."

And he accepted the sinners, those publicly recognized as sinners, men and women of ill repute who earnestly longed to become more worthy, and who were already worthier than the hy-

OUT WHERE YOU CAN PARK

pocrites who despised and condemned them. How friendly Jesus was toward them! His kindness brought upon Him the reproach of the Pharisee, "this man receiveth sinners and eateth with them."

Nor should we forget the women, Mary and Martha, at Bethany; the "woman who was a sinner" who washed His feet with her tears, and dried them with the hair of her head; the "woman of Samaria" whom He met at the well.

These were the friends of Jesus. And what a Friend He was to them all!

## U. S. POPULATION INCREASES

The total population of the United States, including armed forces overseas, increased by almost 8,000,000 between April 1, 1940, and July 1, 1945, according to estimates released by J. C. Capt, Director of the Bureau of the Census.

The estimated total number of persons as of July 1, 1945, is 139,621,431, compared with 131,669,275 at the last census. Since July, the population has continued to increase; and a provisional estimate of the total population, as of October 1, 1945, is slightly over 140,000,000.

The population increase in the five years after 1940 was almost nine-tenths as large as the increase during the preceding 10-year period, 1930-40. The chief cause of the accelerated rate of increase is the wartime rise in the birth rate, while the death rate has remained relatively low.

Even military mortality was insufficient to raise the general death rate very much. In combination with the low death rate and high birth rate, an excess of immigration over emigration has helped to swell the population.—Domestic Commerce.
