LEGAL NOTICE

CITATION BY PUBLICATION THE STATE OF TEXAS

TO: S. P. Vaden and wife, Pierce Vaden, J. P. Stewart and wife, Esther Stewart, M. B. Walker, Clyde C. Seamonds, E. N. McCaffrey, J. O. Jones, J. T. McDonald, Enoch Hickman, Mrs. O. M. Childers, a feme sole, M. C. Roberts, N. H. Read, and Mrs. C. A. Wickard, a feme sole, The Unknown Heirs and Legal Representatives of Each or Either of Said Persons If Deceased.

You are commanded to appear and answer the plaintiff's petition at or before 10 o'clock A. M. of the first Monday after the expiration of 42 days from the date of issuance of this Citation, the same being Monday the 12th day of November, A. D. 1945, at or before 10 o'clock A. M. before the Honorable District Court of Parmer County, at the Court House in Farwell, Texas.

Said plaintiff's petition was filed on the 26th day of September, 1945. The file numbers of said suit being 1331. The names of the parties in said suit are:

C. W. Dixon as Plaintiff, And S. P. Vaden and wife, Pierce Vaden, J. P. Stewart and wife, Esther Stewart, M. B. Walker, Clyde C. Seamonds, E. N. McCaffrey, J. O. Jones, J. T. McDonald, Enoch Hickman, Mrs. O. M. Childers, a feme sole, M. C. Roberts, N. H. Read, and Mrs. C. A. Wickard, a feme sole, The Unknown heirs and legal representatives of Each or Either of Said Persons If Deceased as Defendants.

The nature of said suit being substantially as follows to wit: To divest the defendants and each of them all rights, title and interest in and to all of the North 320 acres of Section No. 11, Township No. 3 South of Range No 3 East in Parmer County, Texas, and in Capitol League No. 484, located in Parmer County, Texas and to fully invest the plaintiff with the complete fee simple title; and for judgment for title and possession under the 5 and 10 year Statutes of adverse possession of the State of Texas; and to remove clouds on plaintiff's title consisting of claims of the defendants to interest to minerals in said land and to establish the complete ownership in plaintiff in all mineral interest in said land.

Issued this the 26th day of Sep-

tember, 1945. Given under my hand and seal of said Court, at office in Farwell, Texas, this the 26th day of September A. D. 1945.

D. K. ROBERTS, District Clerk, Parmer County, Texas.

Denton Students Have High Pre-Med Rating

DENTON—North Texas State College pre-med students during the past 13 years have made the highest possible record in medical schools throughout Texas and the Southwest as first year medical students, according to a letter received from Dean B. B. Harris from Dr. Donald Slaughter, dean of students of the Southwest Medical College of Southwest Medical Foundation, Dallas.

Based on a survey made by Dr. Fred C. Zapffe, executive secretary of the Association of American Medical Colleges, the letter revealed that out of all the North Texas-trained pre-med students attending medical schools in the Southwest in their freshman year, during the past 13-year period, 100 per cent had "clear" records, indicating that there were no failures, no conditions, and no withdrawals.

The average for the entire nation during the same period for freshman students is as follows: clear, 68.2 per cent; failed, 11.6 per cent; conditioned, 15.6 per cent; withdrawals, 4.5 per cent.

Dr. Harris contributes this high average of North Texas State students to the efficiency of the physics, chemistry, and biology departments of the college, although he believes that all of the departments of the college helped establish the record.

In the letter to Dr. Harris, Dr. Slaughter wrote, "This data, I believe, speaks for itself. I would greatly appreciate your reaction to this information and would welcome suggestions from you and advice as to how schools and colleges in this area may best insure increasingly better scholastic achievements of students during their medical school studies."

REGISTRATION HIKED

DENTON—Fall enrollment figures at North Texas State College have reached 1,920, showing an increase of 337 over the total for the first week of registration last fall, and passing the registration mark of the past three years, according to Miss Gladys Bates, assistant registrar. A total of 1,665 were registered at the end of fall registration last year.

Of the 1,920 enrolled, 90 students are returned servicemen listed under the GI bill of rights, and approximately 1,000 are beginning freshmen students.

Due to a shortage of dormitory and housing facilities on the campus, a total of 1,204, according to records in the offices of the dean, were refused registration as there were no rooms available.

Claimed World's Fastest Growing City

Mayor Eugene Bernard, left, enlisted local business men to erect sign at entrance to Val D'Or, rapidly growing mining community in the newly discovered ore zone of western Quebec, to prove that in 12 years the city had an increase of 1500 per cent in population. Postwar plans are for the handling of gold, zinc and copper from nearby mines.

ABUNDANT FOODS FOR OCT.

COLLEGE STATION—Cabbage and Irish potatoes will be abundant during October, the U. S. Department of Agriculture has reported and sweet potatoes are expected to be plentiful during the fall. Since large amounts cannot be stored successfully over long periods, homemakers are being urged to use these foods generously in their meal planning. Instructions on making kraut at home can be obtained from county

home demonstration agents or from the A. and M. College Extension Service headquarters at College Station.

EFFICIENCY

A government official suggested the destruction of a big pile of old, unimportant and ragged records to make room for current filing. The written proposal was submitted, and referred from one office to another, in the usual routine, until quit a

new file had been built upon it.

Finally a dozen or more officials had approved destroying the old papers and at last the order came through to dispose of them as salvage. But the final authority had added this note: "Provided that copies are made of all papers destroyed."

Then there's the fellow who turned down a commission when he joined up. He said he was such a poor shot he preferred straight salary.

There are no true ceders native to this country. However, seven evergreen are popularly so called.

Don't
GO TO SLEEP

BEFORE TAKING THESE PRECAUTIONS

It's mighty easy to doze off into deep slumber in a warmly heated room. In fact, that warm, lazy drowsiness is one of the grandest feelings in the world. But *before* you go to sleep be sure . . . BE POSITIVE . . . that your appliances are properly vented or a window is open.

Never sleep in a tightly closed room if unvented appliances are burning in any part of your home.

When appliances are not properly vented or when they burn in a closed room two things might happen . . . 1. Life-giving oxygen is consumed, taking the air out of the room. 2. Incomplete combustion (whether natural gas, coal, wood or oil is used as fuel) results in carbon monoxide filling the room . . . just like an automobile exhaust in a closed garage.

So be sure you take the simple precaution necessary to protect yourself and family and to give you the full advantages that natural gas provides. Properly vent appliances and always raise a window enough to allow plenty of fresh air, whether awake or asleep.

A Chicken Flock From A Small Beginning

COLLEGE STATION—The experience of Mr. and Mrs. J. C. Patterson of Benjamin, Knox County, in building a poultry flock is a miniature variation of the acorns and the oaks. They founded their flock in 1943 with four Dark Cornish Chickens raised from a setting of 10 eggs which cost \$5.46, says County Home Demonstration Agent Kathleen Lucile King.

By purchase they increased their layers to six in 1944 and from these

raised 16 pullets and one cockrel. Another cockrel was bought at a show for \$7.50. From this group they raised 90 chickens in 1945 and, Miss King says, have been offered \$4.00 each for the cockrels and \$3 each for the pullets. They also have been offered \$4 for one and two-year-old hens and \$5 each for year-old cock birds, she adds. They will have 45 hens for next year's production.

Miss King says that Mr. and Mrs. Patterson have sold \$25 worth of eggs this year besides having enough home use of two families of two persons each. They also have

built range shelters costing \$35, and have plenty of green range, such as oats and alfalfa, for their flock.

Folic acid, new member of the Vitamin B group discovered in the University of Texas chemical laboratories in 1941, has been synthesized by the American Cyanamid Co. Dr. Roger J. Williams, director of the University's Clayton Biochemical Institute, isolated the new vitamin, and supplied concentrates of it to more than 200 scientific investigators for further research.

A turkey has 3860 feathers.

PLAYERS MAY GROW

LUBBOCK—Texas Tech grid officials must have hopes that a couple of candidates will grow. Anyway, they're keeping two 140-pounders on the squad.

Bennie Tidwell, five foot, seven inches tall, is from Sunset, Texas. Coach Dell Morgan promises he'll play him in competition before the season is over.

Harold Butler of Lubbock is a half-inch shorter. He's a speedster in the open.

Health Notes

By Texas Department of Health

AUSTIN—For many years the ultimate in safety has been conveyed in the old expression, "He is as safe as if he were in his own home". Statistics have disproved the truth of this assumption and tend to show that home, far from being the safest place, is often quite the opposite.

Dr. Geo. W. Cox, State Health Officer, commenting on the annual casualty tolls from accidents in the home throughout the nation, said today that such accidents are the cause of more deaths than diphtheria, scarlet fever, whooping cough, and measles combined; of over two-thirds as many as automobile accidents; and of over a third as many deaths as tuberculosis.

"Slippery floor surfaces, lack of handrails on cellar steps, absence of protective gates at the top of stairs in homes where there are small children, toys left on stairs, unanchored small rugs on polished floors, poisons in medicine cabinets accessible to children, and the careless storage of sharp tools and firearms are some of the more prominent hazards resulting in home accidents," Dr. Cox said.

"However," he added, "in the last analysis, the problem boils down to one of reasonable individual caution. We cannot view complacently the more than 30,000 deaths in the United States annually due to home accidents. These deaths, chargeable to remediable carelessness, can and should be reduced."

GOOD? IT OUGHT TO BE GOOD!

Sure, the New Phillips 66 is a swell gasoline

Why Not?

We'd be ashamed of ourselves if it *wasn't!* Since Pearl Harbor we've put every ounce of sweat and energy we possessed into perfecting the finest combat fuels the world has ever seen.

Millions of dollars worth of new equipment

...hundreds of thousands of man-hours and brain-hours . . . weren't spent in vain!

Good gasoline? Man, it *ought* to be good!

And if you're one of those who aren't surprised that Phillips research and Phillips know-how have produced a world-beater of a gasoline, here's a little thought you can tuck in your hatband:

The most important thing about a Phillips 66 Service Station is still the man who runs it. Yes, he can give you fine gasoline. But he'll also give the consistently high standard of thoughtful, courteous service that has always characterized the sign of 66.

We didn't forget how to deliver *that* during the war, either!

Prepare Now for Winter Dairy Herd Problems

COLLEGE STATION—Although Texas still is in the shank of summer, G. G. Gibson of the A. and M. College Extension Service believes it isn't too early for dairymen to commence thinking about the problems which come in with the frost, chill winds and cold rains. It's a hard fact, he observes, that with a little over-delay it will be too late in the season to do anything about some of them.

The major problems, says Gibson who is the extension dairy husbandman are adequate fall pastures, supplemental feed, proper winter shelter for milking cows, and selection of the over-winter herd. An early start and progressive follow-up on getting these things in hand, Gibson says, will enable dairymen to ride into the spring with fewer worries.

Adequate small grain pastures for fall and winter grazing must be the first thought. Early planting is urged in order to get maximum growth before cold weather. With a limited supply of protein feed possible, there is more reason than ever for attempting to assure small grain pasturage. Here is one sure way to get more feed for less money.

The silo should be ready for the late feed crop. Each farmer and dairyman should use the kind of silo which best suits his condition. It is important to have the storage available when the feed is harvested.

Winter normally being the expensive feeding period, now is the time to examine the herd and cull out low producers, Gibson says. By keeping only high producers feed is sold to the cows which pay the highest prices. With fewer cows to be milked and cared for the owner can give more personal attention.

Shelter sheds should be inspected carefully with an eye to providing dry floors for the cattle. The Texas Agricultural Experiment Station has been using sand floors in shelter sheds for several years and found them satisfactory. About eight inches of riverbed sand makes a cheaper and more satisfactory bedding than straw or other material. The point is that good milk cows production cannot be maintained where cows are exposed to wet and cold, or knee-deep mud. Neither can young calves be raised satisfactorily under similar conditions.

What this county needs is a good cigar that sells for less than 5c a puff.

Time to Mail Christmas Packages; Be Sure They're Good Travelers

Sept. 15 to Oct. 15 is the only time you can mail a parcel overseas to an Army person without a request from him or her, so act now if you want someone to receive a Christmas package from home! Packages to the Navy and Marines should go now, also.

Be sure to wrap and tie your box as the postoffice says. Use the kind of box it recommends. Remember these points, too:

Send handy, compact, welcome things, as razor blades, pocket games, small books, kodak pictures,

playing cards, a box of his—or her—favorite brand of candy, carefully packed, a tiny Christmas tree. Wrap each article well and gaily. Christmas wrap candy bars. Use them and hard candies to help pack everything snugly as can be. In other words, cram jam the box with the things you know will be welcome.

And here's a special finishing touch. Clip interesting items from your home-town paper, put them all through the package to make it drum-tight.

Treated Cotton Will Not Mildew, Rot

COLLEGE STATION—A new cotton fabric that will not mildew or rot has been developed by scientists of the USDA. The new fabric was buried in the ground for six months with no significant loss of strength.

This new material has the strength and appearance of ordinary cotton, in addition to its ability to resist rot. And the process by which it is made causes no discoloration of the fabric. The treatment is somewhat similar to the acetate process for rayon, but the new fabric has no odor and does not become sticky. And fortunately, the treatment will not cause any harmful effects on foods, so it will make excellent sacks for shipping fruits, vegetables, and other food and feed products.

Specialists of the Extension Service hail the new development as a boon in two general fields which consume large amounts of cotton. First, this modified cotton cloth, yarn and sewing thread will make clothing which will not mildew. It can be used for awnings, lawn furniture and tents which will not rot in damp climates. Fish and tennis nets will profit, too. The new fabric also is expected to be used in making rot-resistant bags.

In order to breed, flies must have some form of meat or animal food.

DON'T CUSS... SEE US!

Chemists Study Puzzle Of Rusty Gas Pipes

AUSTIN—Why do gasoline pipes in one field corrode, and remain perfectly clear of any rust in an adjoining field?

Two University of Texas chemists are trying to find the answer to this puzzling—and expensive—problem, through two different channels of research.

Dr. Norman Hackerman, assistant professor of chemistry, is studying the "films" which form in the pipes, and Dr. H. T. Lochte, research chemist with the University's Biochemical Institute, is studying the organic acids found in the pipes. Both are working on research grants from the Natural Gasoline Association of America.

Dr. Hackerman's study involves this procedure: He hangs thin strips of metal (of the same material as the gas pipelines) inside the pipes in wells where corroding is known to occur, so that he can analyze the films.

He then tests the films by their reaction to different chemicals, and will use the University's electron microscope to photograph specimens of films.

Dr. Lochte's approach is to analyze the waters from high pressure gas wells to discover the acids causing the corrosion.

Results from the research are expected by the scientists within the next ten months.

STUDENTS ARE TEACHERS

DENTON—Although the number of student teachers at North Texas State College is at lowest ebb since before the war, according to Dr. J. C. Matthews, director of student teaching, 54 upperclassmen are now teaching in the Denton and area schools.

From kindergarten through the twelfth grade, students are teaching

courses such as vocal music, business administration, band and orchestra, library, business education, physical education and art in the North Texas State Demonstration School, Denton High School, West Ward School and Junior High, and in the Sanger public schools.

PRESIDENTIAL PLANE

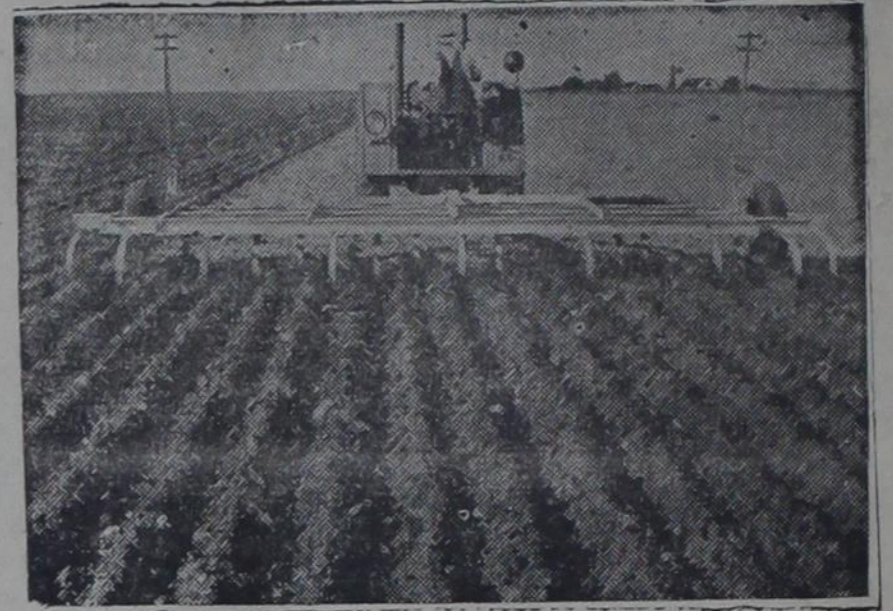

Washington—The Presidential C-54, known to men in the service as the "Sacred Cow", which was used by General Eisenhower on his return to the United States recently, since it went into service in June 1944 as President Roosevelt's personal plane, has flown across 44 countries. It was used to bring Madame Chiang Kai-Shek from Rio de Janeiro to New York. It is a stock model plane with an elevator and delux interior. It is now being used by President Truman.

Petaín's Final Exit

Henri Philippe Petaín, who was chief of state of France during the Vichy regime, is shown as he was escorted from the courtroom by guards after his recent conviction.

Home Decorating Is Fun for Farm Families

TIPS for other homemakers may be found in the interior decorating hobby shared by Mrs. Louis Heidbrink, Sr., and Mrs. Louis Heidbrink, Jr., a mother and daughter-in-law team, writes Joan Miller in the Rural Home department of nationally circulated Capper's Farmer. They live next door to each other in LaFayette county, Missouri.

Just across the driveway from the parental big house is a smaller one built by the Heidbrink's only son for his bride before they were married. A shingled bungalow, it is modern throughout.

"The women started their decorating hobby by working out modern rooms for the small house," writes the Capper's Farmer expert. "Then convenience and charm of the big house came in for a boost.

"An attractive back porch was made for the big house with chairs and a double set, bright with yellow enamel. This enjoyable place is just off the kitchen where Mrs. Heidbrink, Sr., can carry small kitchen jobs or rest and cool off. Furniture was built of lumber from sliding doors taken out of an arch between living-room and dining-room.

Modern Design Bed-room

"Modern design is carried out in the Louis Heidbrink, Jr., master bed-room. In the corner with adjoining windows he built a graceful dressing table, shelves underneath. Painted with pink enamel, it has a billowing white organdy skirt, matching curtains and lamp shade. A Hollywood bed resulted from back-sawing head and foot from an old iron bed."

Comfortable Back Porch Nook

Mail G.I. Christmas Gifts Overseas Early

CHRISTMAS packages going to servicemen still overseas must be mailed early again this year, advises Marjorie Griffin, Rural Home editor of Capper's Farmer.

"Lists to Santa Claus from overseas servicemen are already on their way home," she writes in the nationally circulated magazine.

"Family photographs head many requests as always. Next come canned snack foods, such as nuts and olives. Books, writing portfolios, service watches, good pipes, pens, engraved identification tags and waterproof wallets rate high also.

"Mailing regulations are similar to last year. Packages must be mailed between September 15 and October 15. Boxes must be metal, wood, solid fiberboard or strong double-faced corrugated fiberboard. Newly available will be boxes 10 by 6 by 4 inches; these will be stronger than many previously used.

"Letters from your own overseas service folks will be the final guide to gift selection."

Take Care of Pans

With a little attention, kitchen utensils will serve you well for years. But if they're carelessly banged around and neglected, you'll soon be ashamed to use them declares the Rural Home editor of Capper's Farmer, whose advice on household matters is read by 1,250,000 farm families. In general, put

first and only completely community-sponsored book fair in the nation. All Dallas public and private schools, civic and cultural groups, local newspapers, book sellers as well as colleges throughout the state are cooperating in presenting the fair.

Programs will be held at McFarlin Auditorium on Southern Methodist University with exhibits extending to Fondren Library on the SMU campus. Three night programs and a Saturday matinee will present the authors in short talks and informal get-togethers with the audiences. In addition, three special children's matinees will be held. Aside from the programs at the auditorium, events throughout the city will include special exhibits at the Hall of State and Museum of Fine Arts, Fair Park. The motion picture industry is recognizing the Texas event by sending to Dallas the best films made from recent popular books.

FAT SAVING STILL NECESSARY

COLLEGE STATION — Homemakers are getting more fat now than during the war months, but it is still necessary to continue to save every drop of used fat salvage.

Maurine Hearn of the A. and M. College Extension Service urges farm women and home demonstration club groups not to let down in this patriotic program. Right now

fats and oils are in shorter supply than they have been at any time since the war began, she explained, following a conference with C. B. Hodges, Austin, state marketing officer or the Production and Marketing Administration, and other state and national salvage program leaders.

The shortage of fats and oils is expected to continue into the spring of 1946, since some time will elapse before importations from the South Pacific can be resumed. Butchers will continue to pay points and cash for salvaged fat.

Leaders in collection have praised Extension workers for their cooperation in the program, Miss Hearn says. She reminds that as cold weather arrives and home butchering begins, farm families will have large amounts of non-edible fat which can be contributed.

Building Fund Grows At West Texas State

CANYON—Contributions to the building fund for the West Texas State chapel are being received every day by President J. A. Hill.

County organizations are being formed to hasten the attainment of the \$50,000 goal. Slightly more than \$15,000 in cash and pledges is in hand.

When completed, the campus chapel will be the scene of religious services, recitals, weddings, pastor-student conferences, religious lectures and other activities, which will be scheduled so that they will not conflict with the programs of local churches.

Many a man has never married because he doesn't believe in divorce.

Farmer Jones has a pig he calls Waterman. At least that's his pen name.

Doctors are so busy nowadays that a lot of people get well before the date of the appointment arrives.

Moyers Makes Rounds On Texas Tech Team

LUBBOCK—Finding a place for R. W. Moyers, big Lubbock freshman, is no problem in the Texas Tech Red Raider football camp. Moyers is really an experienced man.

Now a six-foot, 197-pounder, he started out as a tackle on the Lubbock Western team, but soon found himself shifted to end. Being a big, aggressive lad, he was drafted as fullback one day and starred in that spot a couple of games.

Then the Western first-string center got hurt and he took over that post. Later he moved to guard. He finished his high school career as an end and was a standout on defense for the North team in the annual All-Star game in Abilene last August, sponsored by the Texas High School Coaches Association.

This fall Moyers reported to Coach Dell Morgan of the Red Raiders as an end and has shown up well in that spot. He's a powerful punter and may get a stint in the backfield if other end candidates continue to improve.

"I'll keep him at end until we need him worse somewhere else," Morgan declares. "We may use him most any place."

In high school Moyers won two football letters, two basketball letters, and a track letter.

Uncle Sam thinks well of him, too. He's 1-A in the draft.

Southwest Book Fair Slated For Dallas

DALLAS—Texas, traditional land of action but few words, will become the book center of the United States November 8, 9, and 10, when the Southwest Book Fair is held at Dallas.

Authors whose books are internationally known, and publishers representing the country's largest publishing houses will be in attendance during the three-day fair, lecturing, autographing books and presenting elaborate exhibits of current and classic volumes.

The Southwest Book Fair is the
