Health Notes

By Texas Department of Health

AUSTIN.—With the present incidence of chickenpox almost twice as high as records indicate for a seven year median, Dr. Geo. W. Cox, State Health Officer, issued a statement today declaring, "It is a great mistake to treat even light cases of childhood diseases such as chickenpox, measles, mumps, scarlet fever or whooping cough as if they did not amount to much. That sort of treatment makes it possible for these diseases to spread and cause serious outbreaks among children and the resulting lowered resistance makes them easy victims to other forms of infection."

"Some of the most serious epidemics of chickenpox which we have had, have been traced to mild cases—that is, to cases so light that a doctor was not called. In some instances the children have continued to go to school and to associate and play with other children. In others, after they have been kept at home for a few days, they have returned to school

and have scattered these germs around among their schoolmates. Eventually a group of cases—some times very serious ones—have developed from the carelessly-handled mild case. The result was another epidemic that could have been prevented."

The State Health Officer said that the family doctor is the best judge of the seriousness of such childhood diseases, and suffering and anxiety will be avoided if the child showing symptoms of illness is put to bed and a doctor's advice sought and followed.

Words Of Hope To West Texas Ranchmen

COLLEGE STATION.—The drought is broken.

These words have brought new hope and cheer to the ranchmen of West Texas. Even in far West Texas, rains have been favorable. Moisture penetration, in the San Angelo county, on the good condition ranges is 16-18 inches. A. H. Walker, extension range specialist of Texas A. and M. College, says ranchmen are pleased with range prospects, and many are thinking now of restocking their ranges. With livestock prices good and the number low, ranchmen figure they can't lose.

But Walker says they can lose if they are not careful. The drought and overgrazing have severely reduced the stand of the better grasses and heavy grazing this spring will keep grass from coming back.

Perennial grasses must build their top growth each year from plant food stored in the roots, and the better grasses, already weak, can't stand too much heavy grazing. The poorest condition pastures

should be rested this spring and summer. This will give the desirable grasses a chance to make a seed crop and re-establish themselves.

It will, concludes Walker, pay off in the long run with more pounds of meat produced per acre.

VETERAN'S QUESTION BOX

Q.—I want to give the beneficiary of my NSLI the right of choosing, in the event of my death, either a lump sum settlement or any of the available monthly payment plans. If I designate no option, will she have the right?

A.—No payment in a lump sum may be designated only by the insured. However, if you provide for lump sum payment, she may have her choice of available plans.

Q.—The automobile furnished me by VA was totally wrecked in an unavoidable accident. Will VA give me another one?

A.—There is no provision under the law to provide more than one automobile to an eligible veteran.

Q. Do I have to meet any standard if I am taking an on-farm training course?

A.—Yes. Once you start training, it is your responsibility to meet the standards of progress set by the institution in which you are enrolled.

Q.—Must a disabled veteran go to a vocational school or may he go to a

liberal arts college, a high school, or similar institution under the Vocational Rehabilitation Act?

A.—He may enroll in any VA-approved educational institution or training establishment offering the course of training which Veterans Administration has found that he needs to insure his proper rehabilitation in line with his own desires.

Q.—I served more than 3 years in the U. S. Army during World War II. I now wish to take institutional on-farm training and would like to know how much training I will be permitted to take?

A.—An institutional on-farm training course may be as long as, but no longer than, is necessary to meet your individual training needs or until you have exhausted your four-year period of eligibility.

Q.—What farming tools and farm-

ing implements do I get while I am taking an on-farm training course under the GI Bill?

A.—VA will furnish you with no tools or farm equipment since these are articles with which the farm must be equipped to meet the provisions of the law. However, books and incidental supplies required for classroom work will be furnished

you.

Q.—I am a veteran of World War II. What is the latest date on which I can start on-farm training under the GI Bill?

A.—You may commence training within four years from July 25, 1947, or within four years from your discharge or separation from service, whichever is later.

Thank You . .

This week we are celebrating our first birthday in our own building at its present location.

As we take an inventory of the past year's accomplishments, we want to admit that we are more than well pleased with the business we have enjoyed during the past year.

What we have accomplished in the past year, we are quick to admit, has been made possible by the consideration given us by our friends of this community.

We have made an honest endeavor to serve you satisfactorily in the past and we pledge you our untiring efforts to serve you likewise in the future.

**BUCHANAN SUCCEEDS
JEFFERIS AS GENERAL
MANAGER**

G. R. Buchanan, assistant to the vice president, operating department, of the Santa Fe Railway at Chicago has been appointed general

manager of the road's Western Lines, at Amarillo, effective March 1, succeeding G. C. Jefferis who died suddenly February 21, according to G. H. Minchin, operating vice president Chicago.

W. L. More, assistant general manager at La Junta, Colo., will suc-

ceed Buchanan at Chicago, and L. M. Olson, assistant general manager at Los Angeles will move into More's position at La Junta.

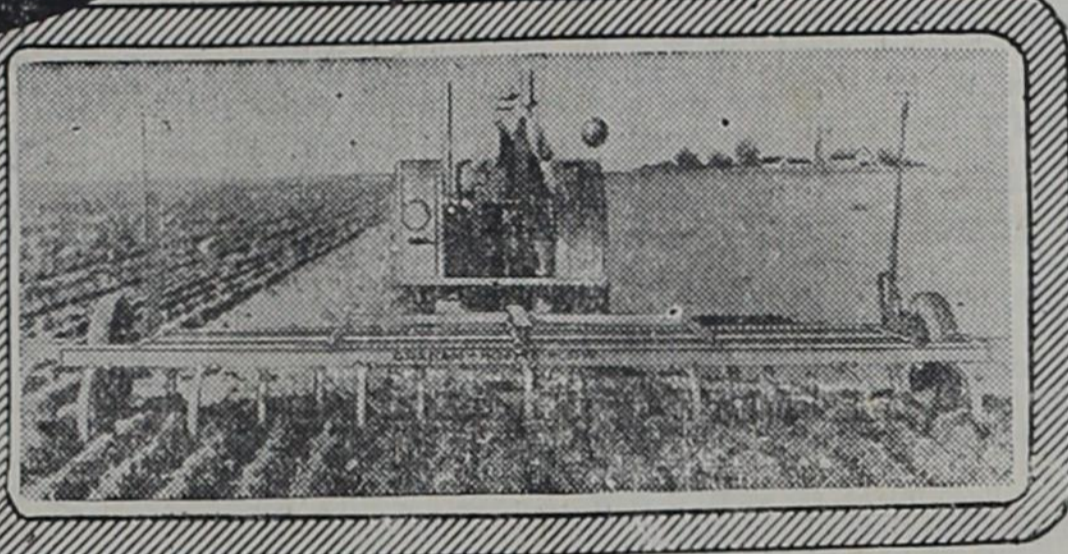

Buchanan was born in Thayer, Kansas, and started to work for the Santa Fe as a timekeeper at Chanute, Kansas, when he was 17 years

The GRAHAM-HOEME PLOW

- Self Sharpening Points • No Side Draft
 - Extra Light Draft • Nothing to Grease
 - Plows All Types of Land Without Adjustments
 - Prevents Erosion by Wind and Water
 - Cuts Plowing Cost in Half
 - Doubles Sub-Soil Moisture
- BUILT TO LAST A LIFETIME**
KEEP VEGETATION ON TOP

Nature's own method is to keep vegetation on top. That cuts down evaporation, keeps the soil in place in spite of heavy winds. The Graham-Hoeme Plowing Method with the two-inch chisel, as shown in illustration, permits water to by-pass the top soil into the sub-soil. It's a moisture storage center.

**WE
HAVE
'EM
ON
HAND**

Manufactured by GRAHAM-HOEME PLOW CO, Inc. AMARILLO, TEXAS

PROVEN FACTS

On the average, enough rain falls on your farm every year to make fine crops. But, after the first few minutes of rain a smooth surface seals itself, causing run-off. It has been scientifically proven that the same field will NOT seal itself when plowed with the Graham-Hoeme All Purpose Plow with a 2-inch chisel furrow every 12 inches. This method by-passes the rainfall through the top soil and keeps a straw mulch on TOP. Upwards of three times the moisture enters the ground.

If the next day is fair and hot, the bare soil would soon be steaming and losing its moisture rapidly. BUT NOT IF THAT GROUND IS COVERED. The Graham-

Hoeme Plow leaves vegetation on top to shade and protect, and moisture stays in the soil longer to bridge between rains.

These are not just opinions, but proven facts. A covered corrugated field in a good, brisk rain, will absorb 200 per cent more moisture than a bare field and 60 per cent more than a field with vegetable matter plowed into the surface. To supply this covering for the soil without the expense of artificial cover, and to place the soil in a condition to by-pass the moisture through the top soil is the purpose and achievement of the Graham-Hoeme Plow.

FARWELL, TEXAS

**HIGHER PRODUCTION
AND BETTER LIVING
come with ELECTRICITY**

WHEN ELECTRICITY comes to the farm, it comes to aid both production and living.

Some wires lead to the work areas, where refrigeration, lighting, and power for tools and work saving devices are needed.

Another line comes to the home, bringing good lighting, entertainment, and electricity for cooking, washing, refrigerating, ironing, and a score of other tasks.

On other farms and ranches, where electricity is already available, more and more is being used constantly as folks discover that electricity can bring so many benefits at a surprisingly low cost.

**SOUTHWESTERN
PUBLIC SERVICE
COMPANY**

24 YEARS OF GOOD CITIZENSHIP AND PUBLIC SERVICE

GOP CHAIRMAN RETAINS POST . . . Hugh D. Scott, Jr., shown above at left, retained his position as chairman of the national Republican committee by a narrow margin after the committee voted on the issue in a meeting in Omaha. Scott discusses strategy with A. V. Shotwell, GOP national committeeman from Nebraska. Many thought Scott would lose out because of the spirited battle waged against him by Dewey foes.

old. He served successively as telegraph operator, dispatcher, chief dispatcher, trainmaster and superintendent at Chanute, and in 1940 transferred to Emporia as superintendent.

In 1943 Buchanan moved to La Junta, Colo., as assistant general manager of the northern district of Santa Fe's Western Lines, and three years later was named assistant general manager of the Coast Lines at Los Angeles. He has been in Chicago as assistant to the vice president since August 1, 1946.

More, a veteran of 31 years Santa Fe service, has risen from clerk-stenographer at Riverside, Calif., to his present high post. His operating experience has been gained as secretary to a division superintendent, transportation inspector, and chief clerk, leading to his appointment as

trainmaster at Winslow, Ariz., in March of 1935. He advanced to the superintendency at both Fresno and San Bernardino, Calif., and was named assistant general manager at Los Angeles in 1945. He has been at La Junta since March, 1946.

Olson began his rail career as a stenographer in the Santa Fe shops at La Junta in 1925. In 1940 he became trainmaster at San Angelo, Texas, and moved on to the superintendency at Slaton, Texas, in 1945. During part of 1946 he worked on special assignments in the vice president's office at Chicago and was appointed superintendent at Emporia, Kansas, in the same year. He has been assistant general manager at Los Angeles since last June.

Support your local Chamber of Commerce.

**Do Your Seed Pecans
Have Scales?**

COLLEGE STATION.—There's a small, ashy gray insect with a black spot that may keep you from harvesting pecans next fall.

But you'll have plenty of pecans for pies, candies and for roasting and salting if something is done about the obscure scale. This is a small insect covered with a circular waxy scale. They are found on the bark, says Allen C. Gunter, associate extension entomologist of Texas A. and M. College, but you won't see them moving around over the tree.

These small scale insects feed on the juices by injecting a small, needle-like beak through the bark. Many times large limbs—and once in a while the whole tree—will be killed. But the scale does not bother the leaves or the pecans.

Control of the scale is pretty difficult, says Gunter, because it is so well protected. The best control can be had by thoroughly spraying the trees during the winter or dormant season with a 3 percent dormant oil. However, Gunter cautions pecan growers not to use the 3 percent dormant oil spray if there are leaves on the trees.

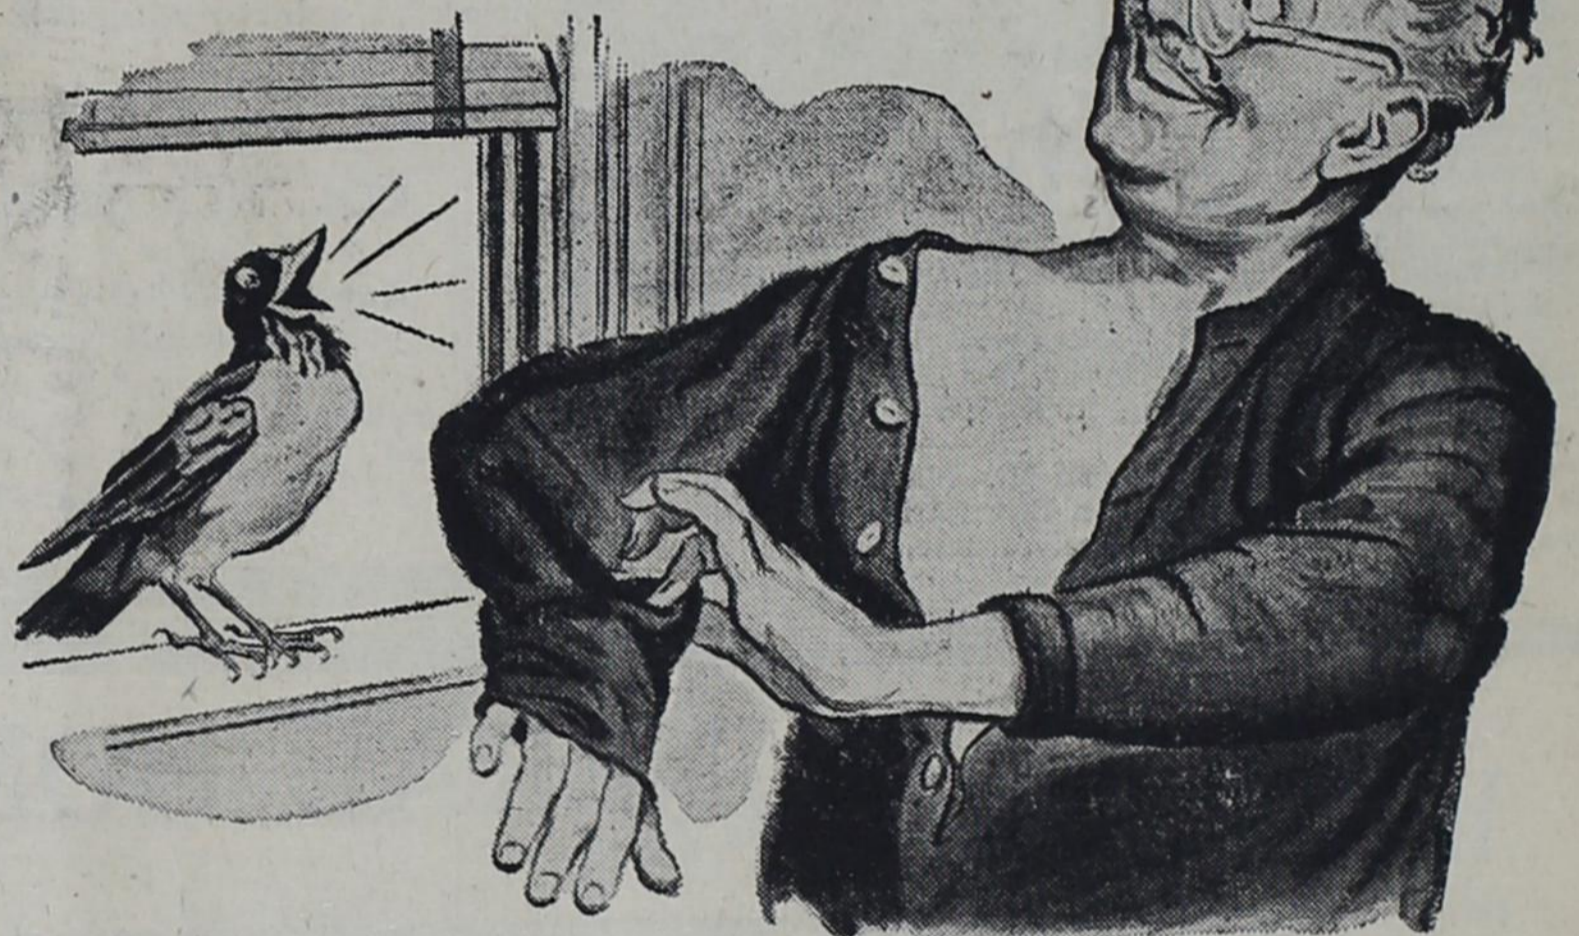

The care and management of a pecan grove isn't complete without insect control. When the right variety of pecans is growing on good soil, it's possible to harvest more pecans practically every year when a crop is set if the insects are controlled.

And it's possible to control the insects if pecan growers have good equipment for spraying, and follow the recommendations as given for each insect, says Gunter.

Either the insects or the pecan grower get the pecans. Which one, depends on the extent of the insect control by the pecan grower.

Clifton A. Woodrum, former Member of Congress from Virginia: "Business men must not be afraid to go to politicians."

A Change is in Order...

Change to OIL-PLATING!

FRESH!

... Get your car out of its "heavy-underwear" winter oil and into fresh summer-grade Conoco Nth Motor Oil ... and OIL-PLATE your engine.

BRISK PERFORMANCE!

... because husky Conoco Nth stubbornly fights power-robbing sludge and carbon.

SLICKER STARTS!

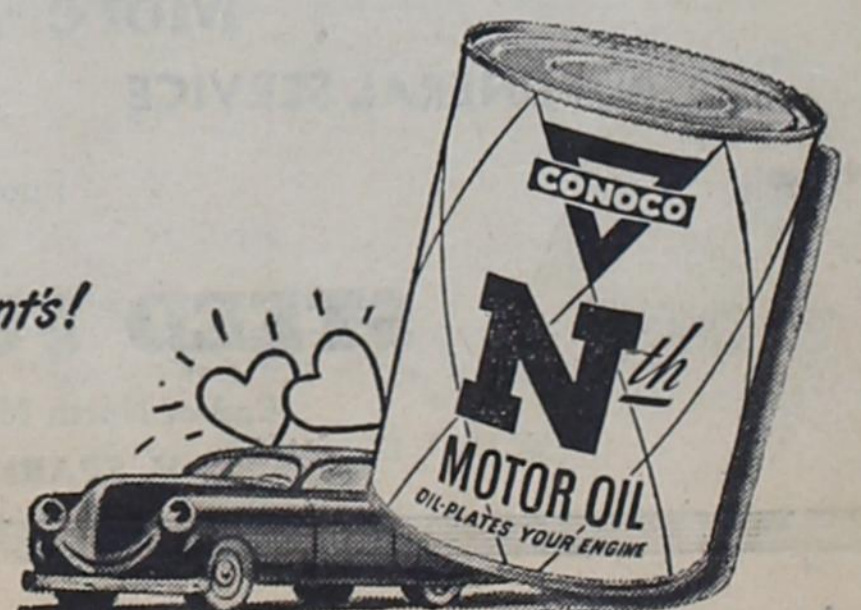

... because an exclusive additive in Conoco Nth fastens a shield of lubricant to cylinder walls. No "dry-friction" starts with an OIL-PLATED engine!

SAVES MONEY!

... because rugged Conoco Nth is made from carefully selected paraffin-base crude oil. It stands up ... takes less oil between drains.

Oil-Plate today at your Conoco Mileage Merchants!

Commissioners Discuss Farm Road Routing

The Parmer County Commissioners Court, in session here Monday, gave considerable time to discussion of the routing of the county's newest farm-to-market road, which is to extend 10 miles east from the Oklahoma Lane school house to the "twin houses" some five miles west of Lazbuddy.

Highway Engineer W. H. Garrett, of Lubbock, was here to meet with the Commissioners and make suggestions as to the routing. Garrett is trying to avoid a lake bed between the old Midway school location and the twin houses, and at the same time work out a suitable curve at the end of the Oklahoma Lane, where the present route makes a half-mile jog.

No action was taken on Garrett's suggestions, and County Judge A. D. Smith said "we are trying to work out an acceptable routing" for the night-of-way.

Garrett said it would likely be some time before the route can be surveyed after the route has been agreed upon, because of insufficient surveying crews to keep pace with the work of the Highway Department.

The State Highway Commission authorized the 10-mile extension of the farm-to-market road some months ago.

HOME ON FURLOUGH

Pfc. Raymond Lewis, son of Mr. and Mrs. Sam Lewis, is here spending a ten-day furlough with his family in Texico. Pfc. Lewis recently completed his recruit training at Fort Warren, Wyo., and is being transferred to Moses' Lake Air Base in Washington.

WANTED—Sewing to do in home Mrs. Ray Ford, Farwell. Dial 2437. 20-3tc

FOR SALE—Six 50-foot lots located in Texico, very desirable for residence locations, accessible to water, lights and gas. Priced to sell. See Scotty Levins at Border Theatre, or phone 3691. 20-tfc

Fred Barker, of Friona, visited in the home of his daughter, Mrs. Jim Moss, and family, Sunday. Young Jimmy Moss accompanied his grandfather to Portales during the afternoon.

Mr. and Mrs. Billy Bob Drace and daughter, Mona Lyane, from Abernathy, Texas, visited with friends and relatives in Texico, Sunday.

Carl Parks, of Amarillo, spent Sunday visiting in the home of his brother and family, Mr. and Mrs. F. J. Park, and his daughter and family, Mr. and Mrs. David Hough-teling, in Texico.

Mr. and Mrs. Marrell Pendergrass of Anton visited briefly with friends and relatives here, Saturday afternoon.

Reno Is Chairman Of Cage District

Weldon Reno, superintendent of the Adrian schools, was re-elected as chairman of District 11-B basketball activities, Monday night, when school men from over the district assembled at Friona. Calvin Murray, principal and coach at Adrian, was named as vice-chairman.

Looking ahead to the 1949-50 cage season, school men decided that a single round-robin series of conference play would be used, rather than the double round-robin prevalent during the past few years.

In addition, a district tournament will be held, on February 9, 10, 11 of 1950.

A different method will also be used in determining the district champion this year. Standing in conference play (games won and lost) will count as one-half toward the title, while the tournament championship will carry the other 50 percent. If the team which is at the top of the list in conference play wins the tournament, it will be declared the winner. On the other hand, if one team has the conference standing and another takes the tournament lead, a play-off between the two will be held to determine the squad which will go to the regional meet representing 11-B.

Supt. Jack Williams stated that Farwell extended an invitation for the district meet to be held here, but no action was taken. The district champions will receive a cut of the tournament proceeds, to help pay expenses for the trip to the regional meet.

On County Basis

Activity in the girls' division is still on a county basis since such teams are not under the Interscholastic League. The county winner will be determined in the same manner as the district boys' champion, i. e., via single round-robin play plus tournament play to be held in conjunction with the boys' district meet.

Only four girls' teams will be in competition—Lazbuddy, Farwell, Bovina and Friona.

The boys' district includes Farwell, Friona, Bovina, Lazbuddy, Adrian, Vega, and Wildorado.

HOME FROM DENVER

Vance Crume, of Friona, and Dudley Green, of Hereford, returned Sunday from Denver, where they had attended a district meeting of Ford tractor dealers.

Friona Physician Is Layman's Day Speaker

Dr. H. Hamilton Cooke, head of the Parmer County Community Hospital at Friona, was the principal speaker at the annual Layman's Day observance of the local Methodist Church, last Sunday morning.

Taking as his topic "Why I Am A Methodist", Dr. Cooke related his early training in his childhood home in northern Michigan, where "mother always made it a point to see that all of us attended church services regularly."

Briefly he reviewed the evangelistic work of John and Charles Wesley, founders of Methodism, and stressed the point that every Methodist should be proud to be a member of the church which has a membership of more than eight million in the United States alone. Emphasizing the need of a stronger devotion to the church and to God, Dr. Cooke said that these influences are needed in the world today possibly more than ever before.

Special music was furnished by a male quartet, composed of B. A. Rogers, W. W. Vinyard, Earl Roberts and Aubrey Sprawls. Roberts also sang a solo, with Mrs. W. W. Vinyard as accompanist for both numbers.

SPURLIN HOME

W. H. (Pop) Spurlin, operator of the Phillips 66 station in Farwell, was returned to his home here Sunday, after undergoing treatment in a Clovis hospital for an attack of pneumonia.

Baseball District 11-B Is Formed Monday

Plans for District 11-B baseball were laid, Monday night, when representatives from the seven schools of the district met at Friona, Supt. Jack Williams, of Farwell, said today.

Only boys' games will be played in the spring season, Williams added, with a single round-robin to be used. At the end of play, the top-rating squad will be declared the district champion, and a trophy will be presented.

Although Wildorado is a member of the district, officials from that school indicated Monday night that they would not participate in baseball, and a schedule was drawn up for the six remaining teams in the district, as follows:

April 9: Lazbuddy at Vega, Friona at Adrian, Farwell at Bovina.

April 15: Lazbuddy at Bovina, Adrian at Farwell; Vega at Friona.

April 22: Lazbuddy at Adrian; Bovina at Vega; Friona at Farwell.

April 24: Farwell at Lazbuddy; Bovina at Friona; Vega at Adrian.

May 6: Friona at Lazbuddy; Farwell at Vega; Adrian at Bovina.

In addition to drawing up plans for the season, the group voted to set April 4th as the opening date for organized baseball practice, although pitchers will likely be limbering up their firing arms before that time.

TRACK DATE SET

With Friona as host, the District 11-B track and field activities, along with literary events in the interscholastic league, will be held on April 1, 2, and 3, it is announced following a meeting of officials on Monday night. Supt. Jack Williams said that a definite schedule of activities for the Farwell school would be announced shortly.

Today's Cattlemen Use More Modern Method Of Feeding

COLLEGE STATION.—These days it's different from what it used to be on the Texas ranges. Today's cattlemen are doing the same job their grand-dads did, but they're doing it a little differently.

For instance, says A. L. Smith, extension animal husbandman of Texas A. and M. College, the jeep and the pick-up truck are fast replacing the cow ponies in many ranch operations. And, too, the old dipping vat is giving way to the portable power sprayers in insect control.

Other mechanical equipment that's coming into the picture are the mineral dispensing machines, pushing the mineral boxes for supplying phosphorus supplements into the background. Calf tables for dehorning, castrating, and branding have replaced many a "heeler".

The maximum use of grazing crops such as small grains, sudan grass and re-seeded pastures have taken the place of dry-lot finishing of cattle for slaughter purposes.

There's a noticeable trend toward more crossbred cattle in Texas, particularly in the southern and eastern part of the state. This crossbreeding is to increase the market weight of cattle. As a result of the crossbreeding work, the King Ranch has developed the Santa Gertrudis breed, the only breed developed in the western hemisphere.

On Texas ranches cattlemen are practicing a more rigid culling of herds, and stocking their ranges with less cattle. They realize the pound of beef rather than the number of cattle is the secret of profitable production.

In the continuous fight against animal parasites, many new insecticides are being used today that were unknown just a few years ago. Rotenone, DDT and BHC have replaced the old standbys of arsenical dips in

controlling lice, ticks, cattle grubs and horn flies. Chloroform has been replaced by Smear 62 in the control of screw worms. Phenothiazine has proven more effective in controlling stomach worms than the bluestone used by cattlemen of a generation or two ago.

Texas 4-H Club work has been responsible for a generous share of these "new-fangled" ideas in beef cattle production. Club boys seeking information on raising beef calves have learned better and faster methods of feeding and management through the county agents and animal husbandmen.

In doing so, they have pushed boys' club work in beef calf production ahead in the lines of calf selection rations, care and management, control of animal parasites and fitting calves for show and marketing, says Smith.

"SUCKERS DE LUXE". She was incredibly beautiful! She was incredibly vicious! She was Ruda Godman, who wined and dined victims of a \$1,000,000 blackmail ring. Go behind the scenes in this dramatic expose of confidence men which begins in The American Weekly, that great magazine distributed with next Sunday's Los Angeles Examiner.

Gluten Meal Feed Available For Feeding Livestock Soon

COLLEGE STATION.—Gluten meal and gluten feed obtained from grain sorghums as by-products from the extraction of starch may soon be available in significant quantities for feeding livestock.

According to information from Dr. J. C. Miller and Fred Hale, of the department of animal husbandry, and Dr. Carl M. Lyman, of the department of biochemistry and nutrition, all of Texas A. and M. College, some work has been done in the

past on the use of corn gluten feed and corn gluten meal as feeds for swine. However, there are no reports on the use of sorghum gluten feed and meal.

In the fall of 1947 and the summer of 1948, feeding trials were conducted by the Texas Agricultural Experiment Station to study the value of sorghum by-products as pig fattening rations. The first experiment was made up of 40 Duroc pigs, averaging 79 pounds each, and divided into four lots of 10 pigs each.

The ration in each lot was composed of whole grain milo and a protein supplement which was fed free choice in self feeders. Each group of 10 pigs also had free access to a mineral mixture containing 80 pounds of ground limestone and 20 pounds of salt. The sorghum by-products were used as part of the protein mixture. The protein mixture in the check lot consisted of 50 pounds of meat scraps, 30 pounds of soybean oil meal and 20 pounds of dehydrated alfalfa leaf meal.

In place of the 30 pounds of soybean meal in the check lot, one lot contained 30 pounds of sorghum gluten meal, and another had 30 pounds of sorghum gluten feed. The

third had 40 pounds of gluten meal replacing the 30 pounds of soybean meal and 10 pounds of meat scraps in the protein supplement.

The same ration was used in the summer of 1948. Only in this test the pigs were fed separately rather than in groups.

The results of these tests indicate that the protein supplement for fattening hogs may contain up to 30 percent of sorghum gluten meal. Also they found that gluteth feed is not as good as the gluten meal in hog fattening rations.

The group of pigs getting the soybean meal as 30 percent of the protein mixture made 10 percent greater

er daily gains than did the pigs fed the sorghum by-products.

Since grain sorghum by-products are low in lysine, it may be a better practice to replace a part of the grain with these by-products rather than use them in the protein supplement when feeding the grain and protein supplement free choice in self feeders, these men report.

"I WAS RESCUED FROM THE SLEEPING PILL HABIT." . . . Robert T. Ford, the patient, tells you how he became a sleeping pill addict. Then his physician, Dr. F. J. Bailey, describes the amazing experiment he used to cure Mr. Ford. Read this dramatic true story in The American Weekly, that great magazine distributed with next Sunday's Los Angeles Examiner.

Now WE CAN MAKE Your Own Grain INTO HIGH QUALITY RATIONS

Approved PURINA CUSTOM MIXING SERVICE

JUST bring your grain. We will grind and mix it with Purina Concentrates to make balanced rations for hogs, cows, chickens, turkeys or steers. Here's what this does for you:

1. Helps you get the maximum amount of meat, milk and eggs from your grain.
2. Lowers your cost of producing meat, milk and eggs.

We now are a Purina Approved Custom Mixing Station. We use Purina Concentrates to balance your grain according to Purina's farm-tested formulas. This is your assurance of top quality rations.

We also have a syrup mill for mixing sweet feeds. See us for your complete feed needs.

Texico, Farwell Teams Win Junior Trophies

The Texico grade school boys and girls, and the Farwell junior high boys and girls carried off trophies Saturday night, at the windup of a tournament held for the squads at the Farwell school during the week-end.

Teams from Farwell, Lazbuddy, Bovina, Texico, Friona took part in the tournament, which was staged to provide experience for coming senior-squad players.

The finals, played Saturday night, saw some fast and furious activity. The first game of the evening pitted the Texico and Farwell grade girls, with Texico edging their hostesses, 21-12. McDaniel was high individual, scoring 10 for Texico, while Allen followed close on her heels with 9. Christian topped Farwell with 6.

The Lazbuddy and Texico grade boys' strings fought it out in a mad contest which finally gave Texico a one-point advantage, 14-13, at the end of play. Score was knotted at the half, with each team having 9. Goldsmith, of Texico, paced the scoring with 7, while Engleking, of Lazbuddy, racked up 6.

First up in the junior high finals were the girls' teams from Farwell and Bovina, in a game that saw the locals out-pointing Bovina, 13-9. Bovina held a 5-4 lead at half, but Farwell guards held the Bovina forwards to only four free shots during the remainder of the game, while they bagged four fielders and a charity try. Foster took eight for Farwell, Ray had four for the losers.

The last game of the meet cast the Farwell and Bovina junior high boys on the court, the victory going

to Farwell, 11-9. Coburn showed the best basket eye, tossing in nine points for the winners. Venable of Bovina and Spurlin of Farwell tied for runner-up with five each.

Other Games Reviewed

Opening the tourney Thursday night, the Farwell grade girls ran rough-shod over the Lazbuddians scoring 35 points while Lazbuddy tallied only six. All Farwell players had a chance on the court, with the scoring honors going to Gulley who racked up 12. She was followed by Sprawls, who scored 8, as James had 4 to lead the losers.

Avenging the girls, the Lazbuddy grade boys took Farwell to a cleaning, the final count standing at 25-14. Clark bagged 10 for the winners and his running-mate Beavers, and Dial, of Farwell, were tied in second position with seven points each.

The Bovina junior high girls faced Lazbuddy in their opener, winning a fairly close match, 25-13. Half-time count gave Lazbuddy an 11-9 advantage, but Bovina came from behind on the basketting of Newton, who ran up eight points in the last rounds, and took scoring honors with 10. Clark had 9 for the Lazbuddy squad.

Closing play Thursday night, the Bovina junior high boys trampled the Lazbuddy squad, 9-22, in a game which was close during the first half when Bovina led, 8-6. Lowrie had 8 for Bovina, McDonald led Lazbuddy with 4.

Semi-final games were staged Friday night, the first match casting Friona opposite the Texico grade girls. The Texico-ites took their second win, squeezing past Friona 16-16, as Allen banged in 14 points for the locals. Robbins scored 8 for Friona.

Next up were the boys' grade squads from Texico and Friona, with a one-point decision, 14-13, going to the local players. Texico had a 10-6 lead at the first half, but saw their majority diminish as the seconds ticked away. Robbins took 9 for Friona, as Goldsmith led Texico with 8.

Swinging to the junior high division, the semi-final girls' match gave Farwell a 20-14 win over Friona. The half-time score was 3-5, Farwell, but the lead grew as the game progressed. Hines got eight to lead Farwell, Dukes of Friona and Spurlin of Farwell each made seven.

Farwell and Texico faced each other in the last semi-final game, as the blue-and-white boys came out ahead, 13-25, after holding a lead the entire match. Spurlin led the scoring for Farwell, making four fielders but was edged for high-point individual honors by Crooks of Texico, who took the same number of two-pointers and added a charity toss.

STEERS END SEASON IN VICTORY, MONDAY NITE

The Farwell Steers wound up a hot-and-cold cage season, Monday night, with a victory over the visiting Roaring Springs squad, whom they had previously dumped some time ago on that court.

Final count in the game stood at 40-27, after Farwell had held a consistent majority during the entire match.

As the teams came to half-time the Steers led only by 10-15, but the shooting of Booth and Thomas drove in more points as the game unraveled.

Booth led the evening's scoring with a total of 14, as Thomas was right behind with 13. Campbell paced Roaring Springs with a count of nine.

Texico Drops First Game At District

The Texico Wolverines were dropped from competition in their opening game of the District 6 cage meet, held in Portales last weekend, as they bowed before Grady 25-30, Friday afternoon.

Grady held the edge throughout, with the locals apparently unable to find the basket range despite plenty of tries. Harper paced the winners with 14 and Griggs got 11. Blain led Texico with 9, Stewart and Pearce each had 6 for the losers.

In the finals, played Saturday night, Portales defeated the Clovis Wildcats for the title. Both teams will represent the district at the state meet, to be held in Albuquerque.

Last Tournament Is Stated For Weekend

The last of the 1948-49 Curry county cage tournaments will be

staged in Clovis this weekend, with grade boys and girls and second-string boys teams entered in play.

Texico coaches have reported that they will have representatives in each of the three divisions of the affair, with action beginning Thursday night and concluding Saturday night.

The grade boys' schedule shows Melrose vs. Clovis at 10 p. m. Friday, Ranchvale opposite Center at 10 p. m. Thursday, in the upper bracket; Texico meets Grady at 2 Friday afternoon and Field follows against Posedale at 3, in the lower bracket. Semi-finals come at 12 Saturday (upper bracket), and 11 Saturday (lower), with the final on deck at 9 that night.

In the grade girls' division, the locals got a break, drawing a first-round bye. They will play the winner of the Ranchvale-Center game (coming off at 7 Thursday evening) at 4 p. m. Friday. Field meets Grady at 8 Thursday night and Rose-dale got a first-round pass, taking the winner at 5 Friday afternoon. The final starts at 7:45 Saturday.

Junior Teams Slate Tourney At Bovina

The second-string boys' drawings put Texico vs. Field at 7 Friday night, Pleasant Hill opposite Rose-dale at 8 Friday night; Melrose faces Grady at 9 that night; and Ranchvale and Clovis are on at 9 Thursday night. The upper bracket semi-final is slated at 3 Saturday, the lower bracket winners tangle at 4:15 that afternoon, and the final is to begin at 10:15 Saturday night.

Putting the lid on the 1948-49 season, the Bovina school is inviting junior teams from the area to participate in a tournament in that gym on March 10, 11 and 12. Coach Louis Purvis, of the Farwell school, said today that both boys' and girls' teams would take part at the meet, with the bracket to be released next week.
