

FARWELL NURSING HOME -- Voters of the Farwell Independent School District will go to the polls Tuesday, June 24, to cast ballots in an election for the creation of a hospital district and the issuance of bonds for the construction of a nursing home facility for the district. An oral lease agreement has been approved with Health Care Management, Inc. in Austin. Should voters okay the district and bonds, the organization will lease the facility on a 20-year

basis which will serve to pay off any indebtedness incurred with the sale of bonds for the home. Members of the Farwell Development Corporation, which instituted the program for the acquisition for the nursing home, plan for one wing of the nursing home to be built to hospital specifications. It is the hope of the organization that the wing can later be used as a hospital. All eligible voters are urged to cast their ballots at the election Tuesday, June 24.

Farwell City --

Councilmen Unfavorable Toward City Park Plan

Main topic of discussion during the regular meeting of the Farwell City Council Monday, June 16, was the approved plan for the Farwell City Park.

Mayor Gil Patschke announced that the application for park funds made to the Texas Parks and Wildlife Department had been approved, and a contract had been received to be signed by the city.

City Commissioner Ralph Franse then explained to the Council that he does not favor signing the contract. He explained, "If the civic groups of Farwell wish to work toward matching the approved grant

this is fine with me. But I do not feel like our taxpayers' money (city funds) should be used to match a grant for something of this nature at the present time when there are other things that our city needs."

Notification was received last week that the application was approved for a total of \$33,450 with the city required to furnish matching funds.

Action on the matter was delayed until further discussion can be conducted.

Also discussed by the Council were traffic control signs within the city. City Marshal Ronnie Mitchell displayed a city map which had been marked with sites at which the marshal recommended the installation of new control signs.

Marshal Mitchell reported on a program through the Texas Governor's Office on Traffic Safety. Should the program be adopted and approved, the Traffic Safety Office will furnish control signs with the city responsible for installing the signs according to specifications.

It was reported that Lester Humphreys of Lubbock submitted the low bid for spraying the Farwell City Hall to alleviate the termite problem.

Councilmen heard a report on the Manpower Summer Youth Program to be initiated by the city again this year. City Clerk Janie Bowery is now taking applications for employment from youth 16 to 21 years of age. Applicants must meet certain requirements before they are eligible for employment under the program. Mrs. Bowery urges youth seeking employment to contact her for further information.

A report was received from the State Board of Insurance that the city of Farwell has been placed under First Key Status, a lower premium rate bracket for insurance coverage.

In other business it was reported that the radio system for the city patrol car was to be installed Tuesday and the city is currently working on a regular schedule for street sweeping.

Mrs. Bowery also reported that the city is seeking adequate available housing in Farwell for Marshal Mitchell and his family. She requests that anyone with housing facilities available for occupation contact her at City Hall, 481-3620.

A nursing home or not a nursing home? This isn't all of the question.

The vote to be taken next Tuesday encompasses far more than the simple proposition of having a nursing home or not having one. The real question might well be put, "Do we want to control our own local civic destinies?"

In the long analysis this is the real question to be answered in the forthcoming election. Will the residents of the Farwell Independent School District decide to become captains of their ship and chart a course for municipal and community growth, or will they abandon their opportunity and let some other community decide for them?

We believe that if we do not take this opportunity to build a local nursing home/hospital complex our community will suffer a long term setback from which it may well never recover. We need the growth stimulation that a project of this magnitude will supply. We need the facilities of this project to encourage better local community understanding. Our community needs the additional jobs and subsidiary business growth opportunities.

The cost to the citizens will also be amazingly low. We believe that under no other set of circumstances will so much local growth be accomplished with so little expenditure by the local taxpayers.

Make no mistake about this -- we as a community will never have another opportunity of this nature. It is very doubtful if another bill creating a hospital district for our local benefit could be gotten through the Texas Legislature.

We may well soon find ourselves an unwilling partner of some other community's district if we do not create our own district. We also think that we have been very fortunate in finding a management concern of the stature of the one with whom we are able to sign a 20-year lease agreement.

We do not have the exact figures on the cost to the local taxpayers but under the terms of the contract with the lessor, indebtedness for bonds and interest will be covered by the annual lease payment. For local tax administration and collection the cost will be in the vicinity of \$4.50 per year for each \$10,000 of market value of property. This means that for a \$20,000 home, the additional expense to the property owner would be less than a \$10 bill a year.

In sum, we believe that this program will benefit the local community more than anything else that has come our way within our memory. We urge your support at the polls next Tuesday.

We came across the notice the other day that all farmers are warned to be careful of those catalytic converters on their pickups when in wheat fields. It takes only about 30 seconds for the heat from the thing to set a wheat field on fire. Pickups equipped with them are just as bad as your car, so be careful.

The following, written by James Ball Naylor (whoever he is), was clipped and left on my desk by someone:

King David and King Solomon led merry, merry lives; They had many, many lady friends and many, many wives; But when old age crept upon them with many, many qualms, King Solomon wrote the proverbs and King David wrote the Psalms.

Farwell Board Calls Special Meet To Fill Vacancies

Members of the Farwell School Board will meet in a special session Monday, June 23, at 8 p.m. in the office of superintendent W. M. Roberts.

Purpose of the special meeting will be to employ personnel to fill several vacancies on the teaching staff.

Among the positions to be filled are head boys basketball coach, girls basketball coach, elementary principal and kindergarten instructor.

In Farwell - -

Election To Create District For Hospital Slated Tuesday

Voters in the Farwell Independent School District will go to the polls Tuesday, June 24,

to cast ballots in an election for the creation of a hospital district and the issuance of

bonds in the amount of \$750,000 for the construction of a nursing home.

Persons eligible to vote in the election will be qualified registered voters in the Far-

well Independent School District, less that portion of the district located in Bailey County.

Polling place for the election will be the County Courtroom of the Parmer County Courthouse. The poll will be open from 8 a.m. to 7 p.m. CDT.

Officers of the election will be Albert Smith, presiding judge, and Alvenia Cox, alternate presiding judge.

Absentee voting on the issue began Tuesday, June 3, and will conclude today (Friday), June 20. Voters wishing to cast an absentee ballot should do so before 5 p.m. today. Absentee voting is being conducted at city hall in Farwell.

Should voters approve the creation of a hospital district and authorize the issuance of the bonds, a two-fold purpose can be attained. First purpose of the district is to provide adequate, local medical assistance for residents of Farwell and the surrounding area by providing a nursing home and medical care.

Second purpose of the creation of the district will be to avoid the possibility of Farwell being voted into another hospital district whereby local residents will be taxed for a facility not in the area. The creation of the district will be for the protection of the local district's residents.

An oral lease agreement has been approved with Don Brewer, president of Health Care Management, Inc. in Austin, previously reported as Convalescent Enterprises, Inc. The organization has agreed to leasing the local facility, should it be approved for construction by voters, on a 20-year basis during which the corporation will be operating the nursing home. The 20-year lease to the organization will serve to pay off any indebtedness incurred with the sale of bonds for the home.

Voters in the election will have the following propositions submitted to them for consideration:

Proposition No. 1 - "Shall the Farwell Hospital District (with boundaries encompassing all territory in Parmer County which is situated in the Farwell Independent School District - as such boundaries existed on January 1, 1975) be created and established with the authority to levy taxes at a rate not to exceed 75 cents on each \$100 valuation of all taxable property within such District subject to hospital district taxation for the purpose of meeting the requirements of the District's indebtedness and its maintenance and operating expenses?"

Proposition No. 2 - "Shall the Board of Directors of the Farwell Hospital District (in the event the District is created) be authorized and empowered to issue the bonds of said District to the amount of seven hundred fifty thousand dollars (\$750,000) for the purchase, construction, acquisition, repair, or renovation of buildings and improvements and equipping and same for hospital purposes, and for any or all of such purposes, and shall there be levied, assessed and collected annually ad valorem taxes on all taxable property in the District, subject to Hospital District taxation, sufficient to pay the principal of and interest on

any and all persons who wish to meet with the Board and discuss their tax matters are invited to do so.

Farwell Chamber To Meet Tuesday

The regular monthly meeting of the Farwell Chamber of Commerce will be conducted Tuesday, June 24, at Clara's restaurant.

The meeting is to begin at 12 noon CDT.

Co. Commissioners Set Monday Meeting

The Parmer County Commissioners Court will convene in regular session Monday, June 23, at 11 a.m.

The meeting is to be conducted in the County Courthouse.

Construction Of Building Creates New Principalship

During the latter portion of 1974, qualified registered voters in Texico went to the polls to give approval for the construction of additional facilities for Texico schools and with this construction the creation of a new educational department and a new principal's position were realized.

In years past, Texico's school system had been divided into elementary and high school. Sixth grade students were encompassed in elementary buildings while the seventh and eighth grade classes were conducted in the high school building. Construction passed by voters included the building of a new junior high school.

This new facility will house classes for sixth, seventh and eighth grade students and is to be known as Texico Junior High School.

According to Jim Pierce, superintendent-elect of the school, the new junior high building will alleviate several classroom problems experienced by both students and faculty.

When the sixth grade classes

are transferred from the elementary building classroom space will then become available to house the kindergarten. These classes have previously been conducted in a portion of the gymnasium.

The \$150,000 approved by voters in the school bond election was earmarked for the construction of the new school, including six classrooms, restrooms and a music room. The district was also allotted \$125,000 from the Capital Outlay Fund that does not have to be refunded.

With the creation of the new educational department came the need for an administrator to direct activities within the junior high school. The administrative position of junior high school principal is to be filled by Kenneth Shaw.

Shaw has served for the past three years as junior high coach, physical education instructor and teacher in the areas of American history, geography and New Mexico history.

Prior to his association with the Texico Municipal School, Shaw served two years as an

instructor and coach at a Navajo Indian Reservation at Tohatchi, N.M.

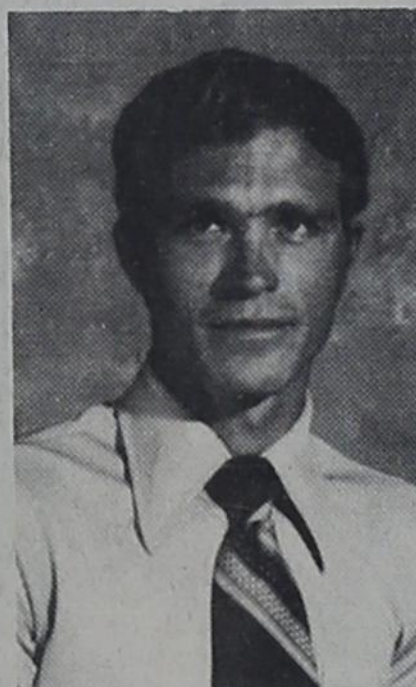

The new principal graduated from high school at Roy, N.M. In 1970 he received his B.S. degree in physical education from Eastern New Mexico University in Portales. His minor was social studies.

Shaw and his wife, Mary Maxine, have one son, Kenneth Michael, 14 months old. Mrs. Shaw is also affiliated with the Texico school system in that she serves as an elementary school teachers' aide.

Under Shaw's supervision in the new junior high school department will be eight instructors. Three teachers will be assigned to the junior high with five teachers instructing in both high school and junior high.

Shaw stated that in addition to his duties as principal he will be serving as instructor for a driver's education course.

The new principal is to officially begin his duties July 28.

KENNETH SHAW

Texico Trustees To Meet Tuesday

The regular meeting of the Texico City Council will convene at 6:30 p.m. MDT Tuesday, June 24, at city hall.

Included on the agenda will be a discussion of the water problem faced by the city and a discussion of raising sewer rates for the city.

Equalization Board To Meet Monday

The Board of Equalization of Parmer County will convene at 2 p.m. Monday, June 23, in the County Courtroom.

Serving as the Board will be County Commissioners Jimmy Briggs, Charlie Jefferson, Tom Wellen and Cecil Atchley along with County Judge Paul Fortenberry.

Any and all persons who wish to meet with the Board and discuss their tax matters are invited to do so.

Farwell Chamber To Meet Tuesday

The regular monthly meeting of the Farwell Chamber of Commerce will be conducted Tuesday, June 24, at Clara's restaurant.

The meeting is to begin at 12 noon CDT.

Co. Commissioners Set Monday Meeting

The Parmer County Commissioners Court will convene in regular session Monday, June 23, at 11 a.m.

The meeting is to be conducted in the County Courthouse.

Hires New Marshal - -

Sanitation Rates Raised By Council

Members of the Texico City Council met in a special session Tuesday evening, June 17, at city hall during which garbage rates for the city were raised and a new city marshal was employed.

In a breakdown of the rate increase it is revealed that rates for each one family residence are to be raised from \$1.50 per month to \$3 per month. For each two family residence served by one water meter, the rate increase is from \$3 to \$6 per month.

For each two family residence served by separate water meters for each residential unit rates will be increased from \$1.50 per unit per month to \$3 per unit per month.

All other multi-family residential structures will be raised from \$1 per unit per month to \$2 per unit per month.

Rates for businesses within the city were also increased. For cafes and restaurants requiring twice weekly pickups, rates have been increased from \$4.50 per month to \$15 per month. For service stations requiring one weekly pickup, the rate will be

increased from \$4.50 per month to \$6 per month.

All other businesses requiring one weekly pickup will have rates increased from \$3 per month to \$6 per month.

Also during the session, City Council members employed a new city marshal for Texico to fill the vacancy created by the resignation of Mickey Fenn. Fenn submitted his resignation, effective June 27, to take a position as a member of the New Mexico Highway Patrol.

Employed to fill the vacancy was Willie Ronquillo. Ronquillo was previously employed as Texico City Marshal but resigned his position when he was employed by the Clovis City Police.

Ronquillo's application for the position was accepted. Effective date of employment was not set by the Council. This date will be established when final arrangements are made with Ronquillo.

Present for the Tuesday session were Mayor Manford Turnbough and Council members Bill Christian, Vane Dosher and Ruby Goforth. Also present were City Marshal Mickey Fenn and City Clerk Clara Wiehl.

County Law Officials Investigate Burglaries

Members of the Parmer County Sheriff's Department were involved last week in the investigation of several burglaries in the county.

Douglas Stephenson, who farms near Friona, reported that his barn had been burglarized while he and his family were out of town.

According to Sheriff Charlie Lovelace, two saddles, two bridles, two pairs of chaps, a lariet rope, saddle blankets, belts and other paraphernalia were taken during the burglary.

Approximately \$500 worth of welding equipment and tools were taken from an irrigation well located on the Joe Buchanan farm, eight miles south of Friona. The equipment belonged to Green Machinery Company.

Also reported to the Sheriff's Department was the theft of a battery from an irrigation well at the Donald Watkins farm, seven miles east of Farwell.

Mrs. Lou Wilson, owner of the Spudnut Shop in Bovina, reported last week that the firm had been burglarized. According to Sheriff Lovelace, five juveniles have been apprehended in connection with the theft. Taken from the shop was a small amount of change.

Officials are still investigating the theft of a 35 millimeter camera, a bolt action rifle, a camera and approximately

\$150 in cash from the residence of Ranza Boggess in Friona.

A break-in at the Border Theatre in Farwell was also reported to the department. Upon investigation, it was discovered that the door to the theatre had been kicked in but that the lock at the top of the door was still intact.

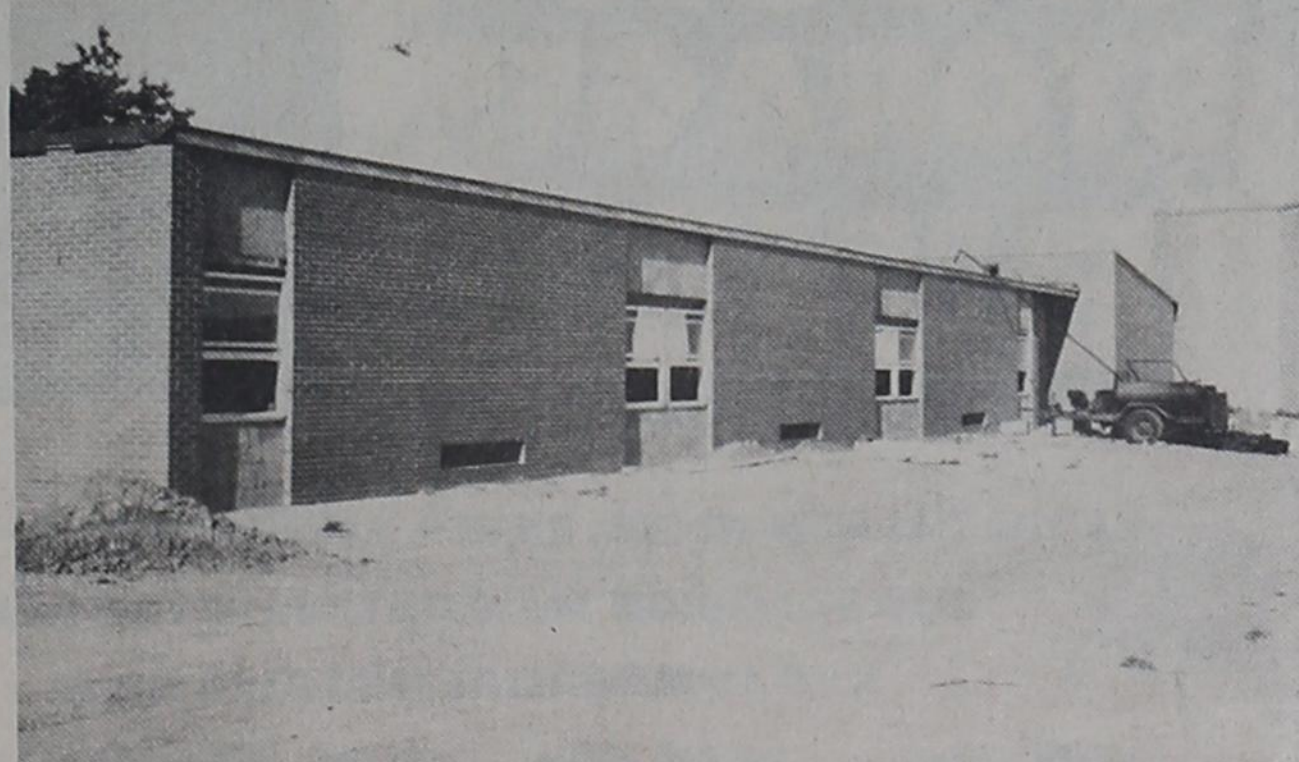

According to Sheriff Lovelace, no damage was done to the inside of the theatre and no theft occurred.

The sheriff also reported that Monday, June 16, he was present at a hearing for David Carlisle during which Carlisle requested a new trial. Carlisle was recently found guilty of the murder of his wife, and had been sentenced to 25 years in the state penitentiary.

According to Sheriff Lovelace, Carlisle's motion for a new trial was denied by District Judge Pat Boone, Jr.

Carlisle will be transported to the state penitentiary in the near future where he will either serve his term or be released on bond should his appeal to the Texas State Supreme Court for a new trial be granted.

JUNIOR HIGH DEPARTMENT - With the construction of this building, the Texico Municipal School System initiated a new department of educational studies for students. The new facility is known as the Texico Junior High School. Grade six will now be removed from the elementary building and grades seven and eight will be taken from the high school classrooms to compose the junior high. The creation of the new department necessitated the new position of principal for the school. Serving in this capacity will be Kenneth Shaw, a Texico staff member for the past three years. The new school is located just south and east of the new gymnasium on the campus.

Second-class postage paid at Farwell, Texas 79325. Published every Friday.

SUBSCRIPTION RATES -- Parmer and adjoining counties, \$5.98 per year; elsewhere, \$7.80 per year. Payable in advance.

At Country Club - -

Scotch Foursome Begins Tomorrow

The golf course at Farwell Country Club will be the scene of competition in a Scotch Foursome Tournament to begin Saturday, June 21, with tee-off time set for 6 p.m. CDT.

All golfers and non-golfers are invited to participate in the event, according to R. L. Montgomery, local golf professional.

Entry fee for the competition has been set at \$5 per person and late entries will be

accepted.

"The fellowship and fun shared during the Scotch Foursome makes the event very enjoyable," commented Montgomery, who concluded, "We urge everyone out to the course to have a good time either watching or participating."

Persons wishing to enter the Scotch Foursome do not have to be members of the Country Club.

RESERVE CHAMPION -- Lee Ann Williams, daughter of Mr. and Mrs. Bert Williams of Farwell, vied for honors during the 1975 Tri-State High School Rodeo Association Finals Rodeo conducted June 12-14 at Dumas and garnered honors as Reserve Champion in pole bending competition. The local rodeoer also entered barrel racing. She is pictured on "Angel," the horse she uses in both pole bending and barrel racing.

At Finals - -

Lee Ann Williams Takes Reserve Champ

Lee Ann Williams, daughter of Mr. and Mrs. Bert Williams of Farwell, was tagged Reserve Champion in pole bending competition at the close of the 1975 Tri-State High School Rodeo Association Finals Rodeo conducted June 12-14 at Dumas.

Lee Ann took the honors behind Candy Thorenson of Gruver during the competition in pole bending. Lee Ann also entered barrel racing during the rodeo.

The local rodeoer was also a contender for the title of TSHSRA Queen for 1975. She took honors as second runner-up for the crown and was awarded a silver tray. Eleven entries vied for the title.

To qualify for participation in the finals, rodeoers must

hold a position within the top 15 competitors in TSHSRA rodeos.

The local finals contestant has been a member of the Farwell Branch of the Tri-State High School Rodeo Association since its organization two years ago.

"There are too many politicians who suffer from bone trouble: too much of it in the head and not enough of it in the back."

Insulating Your Home

HELPFUL TIPS FOR ALL SEASONS
ATTICS AND CEILINGS

In an attic, just lay 6 inches of Fiberglas Insulation in place between the joists. If you already have some insulation, bring it up to 6 inches. When adding to existing insulation, use unfaced insulation or slash the vapor barrier on faced insulation before laying it in place between the joists.

In an unfinished ceiling, staple the flanges provided on faced insulation material to the exposed ceiling joists, or use unfaced friction-fit (its own resilience will hold it in place until the finished ceiling is installed) and a polyethylene vapor barrier applied to the bottom face of the joists.

LEGAL NOTICE

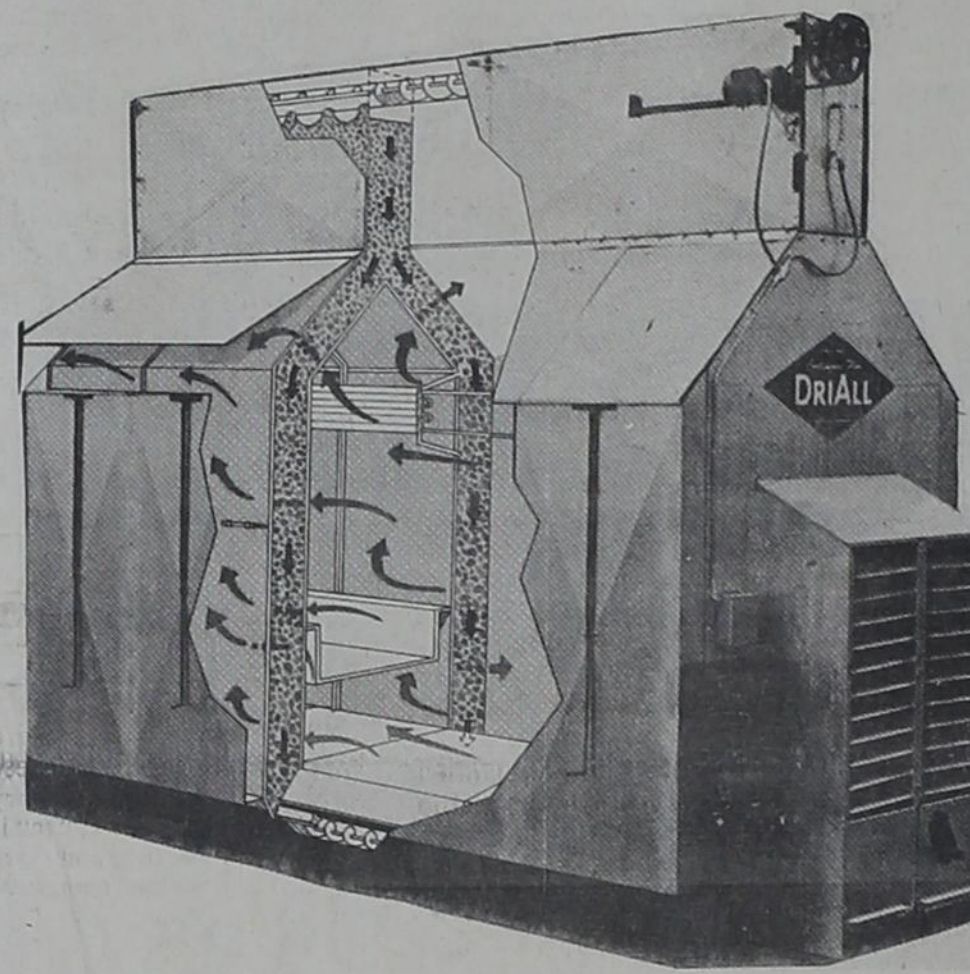

Parmer County Commissioners Court will convene as a County Board of Equalization on Monday, June 23, 1975, at 2 p.m. in the County Courtroom, Farwell, Texas.

Any and all persons who wish to meet with the Board at that time and discuss their tax matters will be welcome.

Signed this 12th day of June, 1975.

**JAMES P. FORTENBERRY
COUNTY JUDGE**

WE ARE DEALERS FOR DriAll DRYERS!

SUMMER SERVICE SUPER SPECIAL!

All service work performed in our shop before July 10 will carry a discount of 15% on labor, 5% off list on prices on parts and a 25% discount on hauling.

THE LARGE PLENUM CHAMBER combined with high airflow per bushel and correct fuel combustion insures even heat distribution and evenly dried grain throughout the drier. Even distribution plus even heat plus even unloading equals uniform drying at highest capacity and at lowest cost.

SIMPLE CONTROLS
Easy-to-read temperature limit, flame-out, loss of airflow and thermostatic temperature controls provide quick, effortless control.

MOISTURE CONTROL AID
Because of reduced recirculation, proper airflow and even heat distribution, a DriAll unit needs only one moisture control sensor. This control helps keep grain dried to a set moisture level and takes the worry out of drying, and are designed to prevent jamming. The oversize augers turn slowly to gently move the grain to a central unloading point at the rear for ease of handling.

INSULATED DECK
The deck that separates the chambers is insulated for more efficient heating and cooling.

SAFE VAPORIZER
In DriAll models using LP Gas, low temperature vaporizers are safely located in the plenum chamber away from flames, as contrasted to short tube systems that are located directly in the flame that can be potential fire hazards.

TOTALLY ENCLOSED
Weatherstrips and front enclosure reduce recirculation, increase drying capacity, and abate air pollution. The roof saves you valuable down time in case of rain or snow.

POWER OPTION
Either power-take-off (PTO) or Electric Drive may be selected for any DriAll model.

AUTOMATIC FEED
All units are equipped for automatic loading. The bin switches let the drier fill automatically from truck, wagon or wet storage.

FRONT ENCLOSURE
Reduces the noise level and provides operator safety, as well as reduces recirculation of the air to increase drier efficiency.

AIRFOIL FAN
Specially designed fan delivers correct airflow for uniform, high speed drying. Blades can be factory set for various power sources.

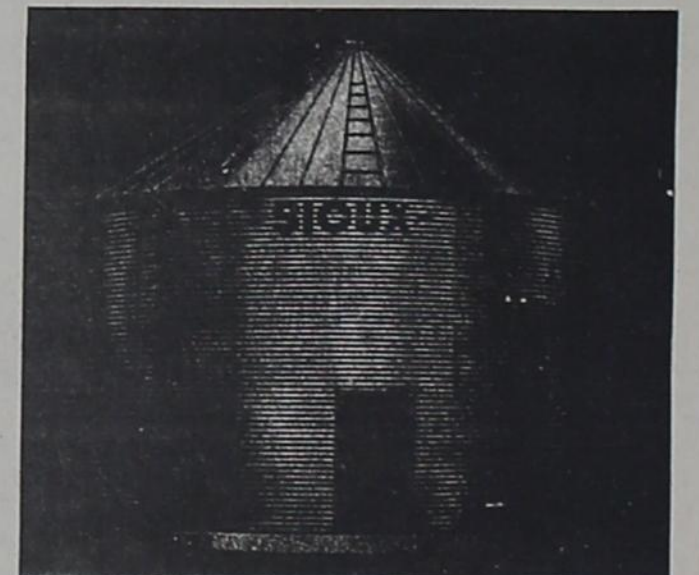

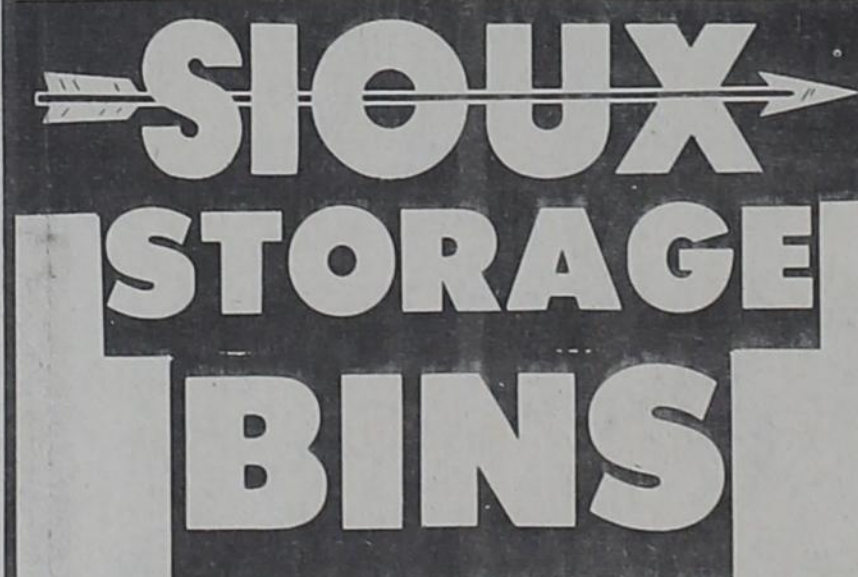

DISTRIBUTING SYSTEM
Uniform drying is assured by this adjustable system which distributes the grain evenly over the full length of the drier and keeps "fines" from piling up at the inlet end that cause uneven drying.

INDUSTRIAL BURNER
Heavy-duty burner especially designed for each model provides proper combustion and heat distribution. Optional drieration unit can be added at any time.

GRAIN FLOW
Straight 12-inch grain columns expose an equal amount of grain on each side to proper heat and airflow to give high quality, uniform drying. Grain moves slowly down the columns and passes into the cooling section where it completes drying the grain and equalizes. Grain leaving the cooling section is cooled to near outside air temperatures.

Move Those Muscles

NEW YORK (ED) - Food, clothing and shelter are three recognized necessities for survival. The fourth? Exercise. Modern man is no different from his caveman ancestors in the need to flex his muscles... and neither is modern woman. Which exercise is for you? Match the motion to your personality:

• **Competitive.** You play for fun, to keep in shape... and to win. You'd never be content with modern dance; your skills have to be tested on the field of combat. You should work out on the tennis court—especially if you look terrific in short white dresses.

• **Sociable.** Group activities are your way of life. Instead of hosting a bridge party, why not turn your group on to calisthenics? Huffing and puffing is more fun when you do it together. No matter what kind of exercise you choose, build up your fitness program gradually. If you overdo, sore muscles will result. When seldom-used muscles do start aching, rub on Deep Strength from Musterole for quick-warm relief.

Note: Aches and pains can also result from such mundane activities as raking leaves, shoveling snow and painting the living room ceiling. These endeavors should be done a little at a time if your muscles (or your husband's) have been on vacation for too long.

• **Introspective.** A solitary walk in the woods is your idea of a good time. Exercise? Definitely not the jumping jack type, you should try yoga. There's no better way to improve posture, health and strength. (Besides, who ever heard of a fat yogi!)

Partnership Tourney Will Be Played June 28-29

Entries for the 1975 Farwell Country Club Men's Partnership Golf Tournament have opened with tournament action to be held Saturday and Sunday, June 28 and 29.

According to R. L. Montgomery, golf professional, en-

try fee for the tournament has been set at \$40 per team. Teams are to be flighted by the handicap of the partner with the lowest handicap. Anyone may declare for the championship flight.

Entry deadline for the tournament will be 6 p.m. Friday, June 27, with late entries being accepted. Shotgun starts have been set each day for 10 a.m. and 3 p.m. CDT.

Texico Girls Compete At Rodeos

Susan and Vicki Snodgrass, daughters of Mr. and Mrs. Roy Snodgrass of Texico, recently competed in American Junior Rodeo Association competition and won places in the goat tying event.

She took first place honors in goat tying in the 13-15 division at Abilene Friday, June 6. Vicki garnered third place honors in the 16-19 division of the event.

Wednesday, June 11, the girls competed at the AJRA

Montgomery urges everyone participating to reserve carts early and to enter as early as possible. Entries may be made by contacting Montgomery at the Country Club, 481-9910.

Saturday evening refreshments will be served to players and their wives or guests.

"We urge everyone out to watch or play," concluded the pro.

INSUR-MATION

P.C. Farm Bureau Insurance
Billy Watts Ph. 481-3395

What is IRA? Can it be used by everyone?

IRA is the Individual Retirement Account which became effective September 2, 1974. It allows a person to tax shelter a percentage of his income into an IRA qualified plan up to a maximum of 15% or \$1,500 whichever is less. No individual who is covered by another IRS approved retirement pension or profit-sharing plan may participate in IRA. These funds may be placed in almost any investment the individual would desire. For example, insurance companies use retirement income life insurance plans and deferred annual premium annuity plans. These are self-trusted and after retirement have a built-in annuity factor that will be advantageous to the individual.

ATTENDS NATIONAL CONFAB - Gary Blair, left, of the Farwell Chapter of Future Farmers of America was in Washington, D.C., last week where he attended the week-long National FFA Washington Conference. In Washington, D. C. - -

Gary Blair Attends FFA Confab

Gary Blair of the Farwell Chapter of Future Farmers of America attended a National FFA Conference in Washington, D.C., last week. The week-long Washington Conference was held at the National FFA center near the Nation's Capital.

Blair, 17, is the son of Mr. and Mrs. Joe Blair of Farwell. His vocational agriculture instructors are James Mast and Jerry Mathis.

The FFA Conference program was designed to improve leadership skills, develop an understanding of the national heritage, and prepare FFA members for more effective leadership roles in their chapter and community. The Conference was also a forum for the exchange of FFA Chapter

activity ideas among members from across the nation.

Besides the training sessions, the week's activities included visits to Mt. Vernon Plantation, the National Archives, Smithsonian Institution, Arlington National Cemetery, and several other historic monuments and memorials in and around the

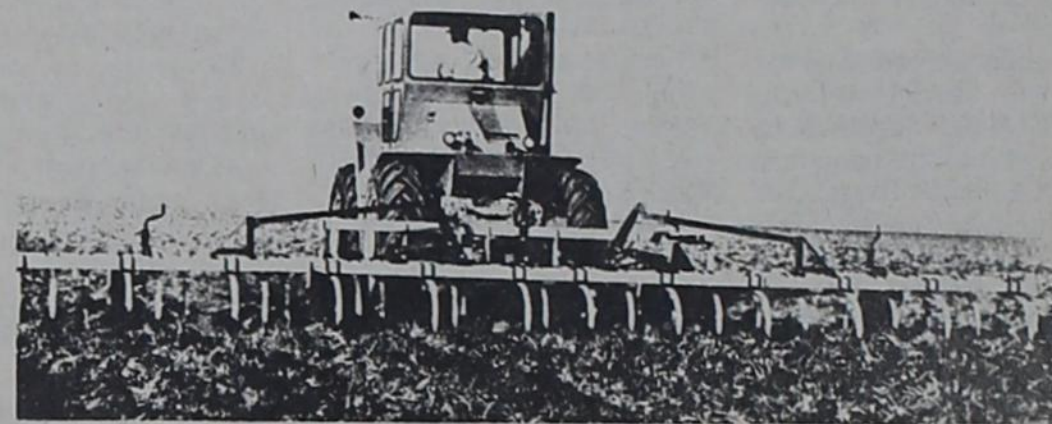

Capital.

A highlight of the Conference was a Thursday morning visit to the office of Senator John Tower of Texas. Later, participants attended a Capitol Hill luncheon featuring a question and answer period with Congressmen, and Washington leaders in business and industry.

Adamant was originally coined by the ancients from the Greek words a meaning "not" and *damao* meaning "I tame" to describe a mineral of incomparable hardness. Diamond, which qualifies as a mineral of incomparable hardness, being the hardest of gems, comes from the same root!

Mix a little cotton with your orange juice and it nearly equals milk. At least in protein percentage. This is just one of the many possibilities now being considered for the new gossypol-free cottonseed flour produced by what is called the Liquid Cyclone Process. LCP for cotton flour will soon be utilized on a commercial scale by the plains Cooperative Oil Mill at Lubbock. The new food-grade cottonseed flour will have as much as 65 percent protein compared to about 13 percent for wheat flour. Unusually high protein content of the flour was the primary reason for the concentrated research. Scientists say that as much as six percent of the total world supply of protein is in cottonseed, but until LCP was discovered the protein could not be utilized directly by humans because of the toxic gossypol pigment in the cottonseed. LCP's success in making possible the production of the food-grade flour is being hailed as a major achievement by world nutritionists.

Portraying Area Homemakers

by Patti Hall

"I hated farming when I was a child and I said I wouldn't marry a farmer," commented our Area Homemaker, Mrs. W. O. "Markum" (Joy) Chadwick. "When Markum and I married he was a rancher, but now that he's a farmer I wouldn't trade it for anything."

Joy, a 20-year resident of the area, was born in Quanah, Tex. She attended school at Quanah and graduated from high school at Springlake.

In 1949, Joy Woodson and Markum Chadwick were married in Quanah. They then came to the Farwell area with her parents, Mrs. Ava Woodson and the late Mr. Virgil Woodson. Mrs. Woodson is currently a resident of Farwell.

Three children, one daughter and two sons, were born to the Chadwicks. Their daughter, Le Andra, and her husband and family, Ronald Byrd and Chad; and their sons, James and his family, Tanya and Eric, and Bobby and his family, Sydney, Andria and Amy, live in the Farwell area. Sons Bobby and James and son-in-law Ronald are all involved in the farming industry with Chadwick.

"We are a very close knit family," explained Joy as she commented on the family's get-togethers. "Our get-togethers are very enjoyable. When we are all gathered, Le Andra plays the piano for us and we all enjoy singing. Both our daughters-in-law also play the piano."

Our Homemaker, as well as members of her family, is involved with the First Baptist Church of Farwell. At the church Joy teaches a class for fifth and sixth grade girls and she also sings in the choir. Our Homemaker is currently serving as director of the Baptist Young Women (BYW). She attends lay witness missions and participated in a crusade to Guatemala with a group from the church just after Christmas of last year.

"Le Andra, Ronald, Bobby and Sydney are part of a singing group at the church. The group performs at various functions," she stated. Joy recently served as superintendent of the junior department for the week-long Vacation Bible School conducted at the church.

"I like spending my time in church work and visiting and helping people. I don't seem to have time for other organizations," she said, continuing,

"My life really consists of church work and our children and what extra time I have is spent on my hobbies."

About two years ago Joy took a course in oil painting and pursues the art as much as possible. "I feel like the painting helps me and I also like to decorate."

Joy did the planning and decorating when the Chadwicks remodeled their home. They had considered buying or building a house in town but their final decision was to redecorate the house which was on their farming land when they purchased the land. To date, the family has bricked the home, added enough space to make it a three bedroom house and has refurbished the interior. They recently began a landscaping project at the home.

Besides painting and decorating, Joy enjoys the art of sewing. Favorite hobby of her husband is collecting antiques, rocks and driftwood.

The woman who said she would never marry a farmer has become quite a "hand" around the place. "I try to help the family as much as possible. During harvest I drive a grain truck. One summer I even managed to read the entire New Testament while waiting for the trailer of my truck to be filled with grain," she declared.

In addition to aiding with the "means of living" portion of the farm, Joy aids with the "way of living" by canning and freezing foods from the family garden.

In conjunction with preserving food, our Homemaker also has a few favorite ways of preparing the food for her family.

She has consented to share two of her recipes with our readers.

BENNIE'S BUCKAROO BEANS

- 2 c. pinto beans
- 6 c. water
- 1 large onion, sliced thin
- 2 cloves garlic, sliced thin
- 2 bay leaves
- 1/2 lb. ham, slab bacon or salt pork
- 2 c. canned tomatoes
- 1/2 c. green pepper, chopped
- 2 t. chili powder
- 1/2 t. powdered mustard
- 1/4 t. oregano
- Salt to taste
- 2 T. brown sugar

Soak beans in water overnight. To cook, place in large pan over high heat along with first four ingredients. Bring to

boil, reduce to simmer, cover and cook 1 1/2 hours.

Add remaining ingredients except for salt. Again bring to boil, reduce to simmer and salt to taste. Cover and simmer for 2 hours. Juice should resemble medium thick gravy.

OLD-FASHIONED SOUR CREAM COOKIES

- 1/2 c. shortening
- 1 1/2 c. sugar
- 2 eggs, well beaten
- 1 c. sour cream
- 2 1/2 c. flour
- 1 t. soda
- 1 t. vanilla
- 1/2 t. salt

Cream shortening and sugar. Add eggs, sour cream and vanilla. Mix well. Add dry ingredients and mix well.

Drop by spoonfuls onto cookie sheet and bake 11 minutes in a 375 degree oven.

This is a moist, soft cookie if kept in air tight container.

Games were played June 9, 12 and 16 in both Minor and Major Leagues of the Texico-Farwell Baseball program.

In Minor League action June 9, Interstate Fertilizer was downed by Gifford Hill 18-9. Sherley-Anderson-Pitman and Citizens Bank also battled during game action but scores were unavailable.

June 12 action saw Interstate Fertilizer was zapped by Sherley-Anderson-Pitman 23-3 and Gifford Hill dropped Citizens Bank 21-6.

In Major League action June 9, Worley Grain pounded Kelly Green 21-11 and Tide lost a squeaker to Aldridge Insurance 14-13.

Tide slid past Kelly Green 9-3 during action June 12 and Worley Grain slammed Aldridge Insurance 17-2.

During game action June 16, Aldridge battled Kelly Green to a slim 15-14 victory. Tide took top honors from Worley Grain when they dropped their opponents 22-11. John Scott was credited with slamming a home run for Tide during the clash.

DECORATOR'S TOUCH - Our Area Homemaker, Mrs. W. O. "Markum" (Joy) Chadwick, added a personal touch when the family redecorated its home recently with the use of shelves to display special collections. In addition to decorating, Joy enjoys painting, sewing and considers her most enjoyable hobbies to be her church work and her family.

Gail Meeks, Kirt Martin On College Honor Roll

Gail Meeks and Kirt Martin have been placed on the Dean's Honor Roll at Lubbock Christian College for the spring semester of 1975. They are among 91 students to receive this honor.

Miss Meeks, daughter of Mr. and Mrs. Bill Meeks of Farwell, is a junior student who has maintained a 3.75 grade point average. Martin, son of Mr. and Mrs. Preston Martin, also of Farwell, is a senior student who has a 3.64

grade point average. A grade point average of 3.5 or better on the 4.0 scale is necessary to be placed on the Dean's Honor Roll.

Lubbock Christian College offers 17 degree programs. It has a student body of more than 1,000.

Thirteen modern, permanent buildings and two temporary structures now form the heart of the school's 120-acre main campus in west Lubbock.

Skin Cancer Related To Exposure To Sun

The famous cancer specialist, Dr. James Ewing, once said that he had rarely seen skin cancer in a beautiful woman. "Good-looking women," he was quoted as saying, "are especially conscious of their appearance and take pains to keep themselves attractive." This included care to have all blemishes removed and, in Dr. Ewing's day, caution to stay out of the sun.

Even now, 100 years after Dr. Ewing's birth, the exact causes of skin cancer are not known. But it has been well established that such cancer occurs most frequently in regions with the most sunlight. In addition, persons with occupations requiring long hours in the sun most often develop skin cancer, thus giving the traditional names to "farmer's cancer" and "sailor's cancer."

Persons with fair or sandy complexions are the most vulnerable to the "actinic" type of skin cancer - the kind related to the sun; but all persons should be aware of the dangers of over-exposure and should use all protection possible when out in the sun: hats, long-sleeved shirts and a good lotion on exposed skin.

Diane Actkinson, chairman of public information for Parmer County Unit of the American Cancer Society, has explained that skin cancer is the most easily recognizable and diagnosed of all cancers. It is also the most common of cancers: in Parmer County alone this year, nine new cases of skin cancer will be diagnosed; and, in spite of its accessibility and potentially high cure rate, skin cancer will kill an estimated 5,000 persons in the United States this year.

"There really isn't any reason why so many of those 5,000 should die of skin cancer," Mrs. Actkinson continued. "That so many do, is only evidence that too many of us are passing by a very obvious chance to save our own lives."

"Just a look in the mirror, or that good old custom of the yearly physical 'exam' at the doctor's office, could make all the difference," Mrs. Actkinson said, concluding, "Skin cancer is an easy cancer to cure, but it takes looking for; and all of us, public and physicians both, have to look for it."

Now, in the increasingly sunlit days of Texas summer,

the American Cancer Society urges recognition of the warning signals that could mean cancer: "any sore that does not heal in two weeks" and "any changes in size, color or texture of a wart or mole." Both call for an immediate visit to the doctor. They may mean cancer until proved otherwise.

Hospital Notes

Willie Williams of Farwell underwent eye surgery Tuesday, June 10, in a Roswell hospital. He entered the hospital on Monday and was dismissed Friday. He is "just doing fine" report family members.

Jesse Coburn, Jr. of the Oklahoma Lane community is in Methodist Hospital in Lubbock where he underwent open heart surgery Thursday, June 12. According to his father, Jesse Coburn of Farwell, he is doing "extra well" and can now have visitors. Coburn is confined to room 801.

Scott Watkins, son of Mr. and Mrs. Donald Watkins of Farwell, was admitted to the Clovis hospital Thursday, June 12, as a result of injuries he received in a motorcycle accident. Scott is reported to be doing "a little better" but at this time is not allowed visitors. According to his sister, he will be confined to the hospital for some time.

Mrs. Alvenia Cox of Farwell was admitted to the Clovis hospital Monday, June 16, to undergo tests and medical treatment. According to reports, Mrs. Cox's condition remains satisfactory.

ENGAGEMENT ANNOUNCED -- Mr. and Mrs. Howard Duncan of Texico announce the engagement and approaching marriage of their daughter, Beverly Karen, to Terry Oliver Reid, son of Mr. and Mrs. W. O. Reid, also of Texico. The couple plans to be married Friday, July 11, at 7 p.m. MDT at the Rosedale Baptist Church. The bride-elect and prospective bridegroom are both 1975 graduates of Texico High School. All relatives and friends of the couple are invited to attend the ceremony and reception to follow. No local invitations will be sent.

The Latest

Recent weekend guests in the home of Mr. and Mrs. Martin Kube in Farwell were Mr. and Mrs. Robert Shedd, Staci, Mike and Andy of Austin. The Shedd's visited with friends and former neighbors during their stay in Farwell.

Eunice Short of Shawnee, Okla., and Mrs. Blanche Gildart and her children, Leslie and Charles, spent last weekend in Farwell visiting in the homes of Grace Snider, M. A. Snider, Jr., Willie Williams, Johnnie Williams and Jack Williams. Miss Short is a cousin of Mrs. Snider and the Williamses.

Visiting Sunday, June 15, in the home of Mr. and Mrs. M. A. Snider, Jr. and family were Mrs. Snider's father, H. D. Mayfield of Friona, their daughter, Kim of Amarillo, and Grady Newton of Lubbock. Kim and Grady arrived in Farwell Saturday to spend the entire weekend.

Mr. and Mrs. Rex Pool, Diana, Terry and Kelly of Vincent, Iowa, arrived in Farwell Tuesday, June 10, to visit in the home of his parents, Mr. and Mrs. L. S. Pool. The Rex Pools will remain in the area until June 25 visiting in Farwell and Portales.

Gary Crenshaw of Roswell, N.M., arrived last weekend to join his sister, Connie, for a visit in Farwell with his grandparents, Rev. and Mrs. W. T. Perry, Connie and Gary, children of Mr. and Mrs. Cal Crenshaw, will remain in Farwell until the end of June.

Mr. and Mrs. Carl Matthews of Farwell left Tuesday, June 10, for the Pecos Wilderness near Cowles, N.M., where they enjoyed a four-day vacation, returning to Farwell Saturday. According to Matthews, the couple experienced some snow on their first day at their vacation site.

Weekend guests in the home

of Jana Pronger of Farwell were her parents, Mr. and Mrs. Alfred Pronger; brother, Fred; sister, Jill, all of Stratford; and her cousin, Ann, of Dalhart.

Joining the group for dinner Sunday were Mr. and Mrs. Cecil Davis of Muleshoe.

While in the area the group attended a wedding in Portales, celebrated Mr. Pronger's birthday, Father's Day and the Davises' anniversary.

Visiting in Texico in the home of Mrs. Gladys Fitz, Valerie, Carletta and Rayford have been Mrs. Fitz's daughter, and husband, Mr. and Mrs. Woody Overstreet of California. They arrived in Texico Tuesday, June 10, and departed Saturday for El Paso before traveling to California.

Mr. and Mrs. R. L. May, Wesley and Richard of Farwell left Saturday, June 8, for Lubbock where they visited in the home of Mrs. May's sister and family, Mr. and Mrs. B. M. Woods. Sunday the group traveled to Brownwood Lake where they boated, fished and "rested" until they returned to their homes Thursday evening, June 12.

Mr. and Mrs. I. W. Quickel of Farwell returned Monday, June 23, from Baumholder, Germany, where they attended the wedding of their daughter, Teresa. The Quickels left Farwell May 31.

Visiting last week in the home of Mr. and Mrs. David Hall, Bobbi and Kerri was Hall's brother, Delbert, of Colorado Springs, Colo.

Bobbie Parker Honored On 7th Birthday

Bobbi Parker, daughter of Mr. and Mrs. David Hall, was honored Sunday, June 15, in celebration of her seventh birthday with a party in the home of her parents.

Guests attending were served birthday cake which had been iced with pink frosting and featured pink butterflies surrounding yellow daisies. Pink,

WEDDING DATE SET -- Mr. and Mrs. Vernon Symcox of Rt. 1, Farwell, announce the engagement and approaching marriage of their daughter, Susan Elizabeth, to James Mitchell Franse, son of Mr. and Mrs. Ralph Franse of Farwell. The couple will be married at 4:30 p.m. CDT Saturday, July 26, at the Oklahoma Lane Baptist Church. The bride-elect is a 1974 graduate of Farwell High School. The prospective bridegroom is a 1973 Farwell High School graduate. All friends and relatives of the couple are invited to attend the wedding and reception to follow in the home of the bride's parents. No local invitations are being sent.

Parmer County ASC Chairman Attends Annual District Meeting

Saturday, June 14, Mrs. Johnny Atkinson attended the Annual District Meeting of the American Cancer Society in Lubbock at the Hilton Inn.

Mrs. Atkinson is chairman of the Public Information Committee for the Parmer County Unit of the American Cancer Society.

After registration and a meeting of the general session, there were individual committee meetings. The committees consisted of presidents, public education, public information, crusade and service/rehabilitation committees. Mrs. Atkinson attended the public information session and reported that it was very

educational. The session touched on duties and responsibilities, media relations, publicity materials and organization.

"At the end of this session we broke for lunch, and with the conclusion of lunch, we elected district officers for the next year," Mrs. Atkinson concluded.

"Contrary to anything you may have heard, we are still some distance from becoming a leisure-oriented society with a lot of unfilled and unfulfilling time on our hands. True leisure time is actually shrinking among the American people, even as they become more affluent, says Prof. Roger Blackwell of Ohio State University. More and more time in the 24-hour day is taken up in getting to work, attending PTA meetings, working on income tax returns, and whatnot. Furthermore, he points out, the work week is not getting shorter. Overtime and second jobs have kept the average work week constant or lengthened it slightly."

Sunshine Magazine

THE FAMILY LAWYER

Work-Connected Recreation

Harrison, an appliance salesman, waltzed so strenuously at a company party that he suffered a fatal heart attack. Was his widow entitled to collect workmen's compensation for his death?

The company said no. "Obviously, he was not at work when he was dancing," the company reasoned in a court hearing.

But Mrs. Harrison pointed out that the party had taken place on company premises, under company sponsorship, as part of a company contest--and that all the company's salesmen were expected to show up.

The court decided that the dancing had indeed arisen out of the job, and granted the widow's claim. The court said the party was simply the company's way of inspiring its employees to greater effort.

Workmen's compensation laws generally cover accidents that occur in the course of employment. As a rule, courts have included any recreational activities that are closely connected with the job.

This is especially true when the company plays an active role in the event.

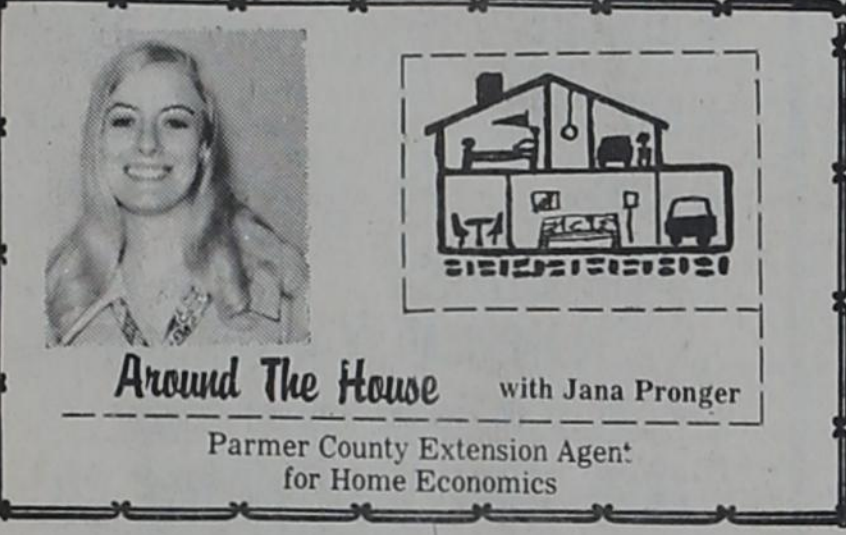

Thus, in a case arising out of a company picnic, the court granted compensation for an accident largely because of the participation of the company president. It seems he would use these occasions to present special prizes to employees and to give them pep talks about "our one big family."

Still, not every recreational occasion is covered. In another picnic case, a woman employee was hurt during a foot race. But when she sought compensation, the company pointed out

1) that it paid only part of the cost of the picnic;

2) that the picnic was held on a non-working day, away from the company premises, with no pressure on anyone to attend; and

3) that the company had nothing to do with the arrangements. The court decided it would be stretching language to call the woman's injury "an incident of her employment." Result: no compensation.

Around The House with Jana Pronger Parmer County Extension Agent for Home Economics

I thought that you seamstresses out there might like to have some tips for summer sewing.

Trims and braids are an important part of the '75 spring and summer look.

There are several ways to help the homemaker achieve a professional look.

-- Preshrink trim before applying. Handle trims loosely, and without tension when stitching.

-- Use thread that matches the trim.

-- Mark the exact location for a professional look.

-- Use trims compatible with fabric. Permanent press and synthetic trims are available, as well as cotton and rayon.

-- Use a light thread tension if applying trim by machine.

-- Polyester thread often gives better results since it doesn't shrink when laundered.

-- Pin or baste trim in place, working with a full length of trim. This avoids cutting the piece too short.

If the pattern doesn't call for trim, homeseamers can determine yardage necessary by measuring the pattern pieces at the exact location of the trim.

Add 1/2 yard or more to allow for joinings, curves or corners. It's better to have a few inches left over than to be a few inches short.

Fusible interfacings are a big time saver for homeseamers. Professional-looking tailored garments can be achieved without time consuming hand or machine stitching to apply interfacing, according to Beverly Rhodes, clothing specialist.

"To make interfacings fusible, tiny dots of a fusible product are placed on the underside of woven or nonwoven interfacing fabrics.

"Then the interfacing is simply bonded to the fabric with heat and steam -- no stitching necessary," the specialist with the Texas Agricultural Extension Service, The Texas A&M University System, explained.

She suggested that the newest nonwoven fusible interfac-

ings are suitable for knits or wovens to give body without stiffness.

"But it's absolutely necessary to carefully follow directions on the instruction page which comes with the yardage. When correctly fused, the bonding will withstand machine washing and drying. Failure to follow directions exactly will result in unsatisfactory fusing," Miss Rhodes said.

If the interfacing can be pulled apart from the fabric after it has cooled, not enough heat or steam was applied for the specified time, she explained.

"Refer to the instructions for pattern placement to determine direction of stretch. For best results, check the manufacturer's instructions to see where to apply the interfacing -- such as on the under collar or upper collar."

She advised that although fusible interfacings can be used on most fabric, it's best to test for feasibility on a small swatch of fabric. Sheer fabrics, for example, may allow the fusible product to show through, she said.

Thoughts

From The Living Bible

Don't rob the poor and sick! For the Lord is their defender. If you injure them he will punish you. Keep away from angry, short-tempered men, lest you learn to be like them and endanger your soul. Unless you have the extra cash on hand, don't countersign a note. Why risk everything you own? They'll even take your bed! Do not move the ancient boundary marks. That is stealing. Do you know a hard-working man? He shall be successful and stand before kings!

Proverbs 22:22-29

Mrs. Cora McGuire Takes Vacation In Missouri, Texas

Mrs. Cora McGuire of the Oklahoma Lane Community departed the area by bus May 4 for Rolla, Mo., where she began a month's vacation in Missouri and Texas.

She was met at Rolla by her son, Clifford, who then drove Mrs. McGuire to his home in Elk Creek, Mo. There she visited in the home of Clifford and his wife, Roberta, for three weeks. She also visited with Mrs. McGuire's mother, Mrs. Rilda Henson.

Following her stay in Elk Creek, Mrs. McGuire boarded a plane in Fort Leonardwood, Mo., and traveled to Lubbock, Tex., where she was met by Mr. and Mrs. Aubrey Neill, a niece and her husband. The McNeills took Mrs. McGuire to a Lubbock hospital where she saw her 19th great-grandchild, the daughter of Mr. and Mrs. James McGuire.

Following her visit in Lubbock, Mrs. McGuire traveled by bus to Seymour to visit her sister-in-law, Thelma McGuire, and a brother- and sister-in-law, Mr. and Mrs.

Bowden McGuire.

Frances Cook of Gilliland, Tex., Mrs. McGuire's niece, then took the Oklahoma Lane resident to her home. While in Gilliland, Mrs. McGuire also visited with a nephew, Mr. and Mrs. Glenn McGuire.

Next on the trip was a visit to Vera, Tex., Mrs. McGuire's home town. There she visited in the home of a niece Mr. and Mrs. Tom Harden. While there she also attended a family reunion.

Mrs. McGuire then traveled back to Seymour and the home of Thelma McGuire, visiting friends along the way.

From Seymour Mrs. McGuire traveled by bus to Crosbyton where she was met by her son, Mr. and Mrs. Jimmy McGuire. The group visited with Mrs. McGuire's niece, Mrs. Carl Gunn, before going to the Jimmy McGuire home in Floydada.

Mr. and Mrs. Jimmy McGuire then drove Mrs. McGuire to her home in Oklahoma Lane Saturday, June 7.

Family Hamburger Fry Hosted By Mrs. Christian

Mr. and Mrs. Van Crume, Chad and Keralee of Albuquerque, N.M., arrived in Farwell Friday evening, June 13, to visit in the home of Mrs. Crume's mother, Mrs. Carrie Christian.

Saturday evening other relations of the Crumes and Mrs. Christian gathered at the home for a family hamburger fry.

Attending were Mr. and Mrs. Benny Darnell, Ray, Randy and David and a

foreign exchange student from Finland staying in the Darnell home in Amarillo, Mr. and Mrs. Eddie Corn and Clay of Friona, and local residents, Mr. and Mrs. Wendol Christian, Loy and Tammy, Mr. and Mrs. Donald Christian and Charles and Mr. and Mrs. Troy Christian, Vic, Sharmy and Todd.

The Crumes departed Sunday evening to return to their home in Albuquerque.

On The Farm In Farmer County

By R. MACK HEALD
County Agent

The Texas Agricultural Experiment Station (TAES) at Lubbock has released a large number of sorghum breeding stocks for research and development by private industry.

This announcement was made by Dr. George McBee, resident director of the Lubbock station.

The material consists of 120 converted lines from the sorghum conversion program headed by Dr. Darrell Rose and cooperators, and 140 breeding stocks from the Frank Gaines - R. E. Karper sorghum breeding nursery located at Lubbock.

All the converted sorghum varieties come from the World Sorghum Collection which is made up of more than 16,000 entries collected from throughout the world.

The imported lines were placed in a special research effort referred to by scientists as the sorghum conversion program. It is conducted cooperatively by the TAES and the U.S. Department of Agriculture's Agricultural Research Service at the Mayaguez Institute of Tropical Agriculture, Mayaguez, Puerto Rico.

Puerto Rico was selected for the crossing and backcrossing procedure, because of the favorable short day-length periods during the winter.

The converted lines were developed through a backcross procedure in which tall, late-maturing tropical varieties were converted to early-maturing, combine height sorghums. They represent new sources of germplasm and are of height and maturity for easy use in the U.S. and other temperate zone areas of the world.

These converted lines should be useful to sorghum breeders as germplasm sources containing desirable characteristics, and should contribute greatly to the development of superior sorghum lines and hybrids.

The materials possess superior sources of most desirable characteristics in sorghum, especially disease and insect resistance and grain quality. In these lines there are outstanding sources of resistance to downy mildew, head smut, maize dwarf mosaic, anthracnose, Fusarium headblight and several foliage diseases.

Good sources of resistance to lodging and charcoal rot also exist in these lines.

Several lines with high levels of midge resistance are included in the 120 released converted lines.

The conversion program is carried out cooperatively among several TAES sorghum scientists located at Lubbock, Chillicothe, College Station and Corpus Christi.

The 140 breeding stocks from the Gaines-Karper nursery were selected for release by Frank Gaines (former TAES - now retired) as the best and most representative material from the large breeding nursery started by the late R. E. Karper.

As a former sorghum breeder and TAES vice-director, Karper was one of the pioneers in sorghum improvement throughout the world. The Gaines-Karper nursery contributed the parents of the first sorghum hybrids.

A yellow - endosperm selection from this nursery is now being used extensively as a pollinator parent of hybrids in Texas and throughout the world.

The 140 released lines represent material not previously released from this nursery. Most lines have yellow endosperm and are of kafir, fertera or hegari type.

Other characteristics in these lines include waxy endosperm, stiff stalk and big seed. These characteristics plus their yield potential and wide adaption should make these lines useful to breeders in developing improved hybrids.

A new Texas Agricultural Extension Service publication, simply called "Home Lawns," might be of interest to homeowners.

The publication features a complete digest of information on home lawns, ranging from types of lawn grasses to care and maintenance.

A complete discussion is offered on both warm season and cool season turf-grasses for Texas. The warm season types include bermudagrass, St. Augustine grass, buffalograss, zoysiagrass and centipede grass. Among cool season grasses described are ryegrass, tall fescue and Kentucky bluegrass.

A section of the new publication is devoted to information on establishing a new turf. Three major steps are discussed as being essential in this endeavor: preparing the soil properly, establishing the grass, and caring for the young grass.

A major portion of the publication is keyed to management of established lawns. Specific information is presented on fertilization, watering and mowing.

A review of lawn problems is featured in the final pages of the publication. Information is presented on thatch accumulation, shade problems, weeds, insects and diseases.

With hot summer weather approaching, homeowners generally experience a variety of lawn problems. The new "Home Lawns" publication can be a valuable guide in identifying these problems and in taking corrective measures. A copy may be obtained at the county Extension office.

Contact with overhead electric lines cause the deaths of more than 1,000 Americans each year, with more than 100 of these accidents occurring on farms and ranches.

Overhead electric lines are so common throughout the country that they are usually taken for granted. However, one idle moment when handling such metal items as irrigation pipes and ladders or when riding on trucks or using front-end loaders or similar equipment can be deadly.

The movement of such tall items as grain augers is especially hazardous around the farmstead, as they can easily come in contact with overhead electric lines. Such equipment should be lowered to the transport position before attempting to move it, even for only a short distance to the next building.

Augers and double-chain elevators account for about 30 per cent of all electrical fatalities.

The key to avoiding accidents with overhead electrical wires is to be constantly aware of such wires when working around the farm or ranch. Prior to moving any tall equipment, always lower it to the transport position and then check the entire area to make sure there are no electrical hazards in close proximity.

A major step in avoiding accidents with overhead wires is to run the wires underground. Some new power lines are being placed underground but this is often impractical in rural areas. However, power lines serving grain bin and feed storage areas could be routed underground to avoid the likelihood of contact with materials-handling equipment.

WORKSHOP WINNER - Don Cherry of Texico, right, was named an outstanding student at the FFA Farm Electrification Workshop held June 9-11 at West Texas State University in Canyon. The workshop was sponsored by Southwestern Public Service Company. Cliff Mlinar, SPS vice-president of marketing, is shown presenting Cherry with his first place award, which includes an expense paid trip to Kansas City to the National FFA Conference. Also attending from Texico was Ken Richardson.

Cherry Takes First - -

FFA'ers Participate In SWPS Electrical Workshop

Two members each from the Farwell Chapter of Future Farmers of America and the Texico FFA Chapter were in Canyon June 9-11 where they attended the Southwestern Public Service Company FFA Farm Electrification Workshop at West Texas State University.

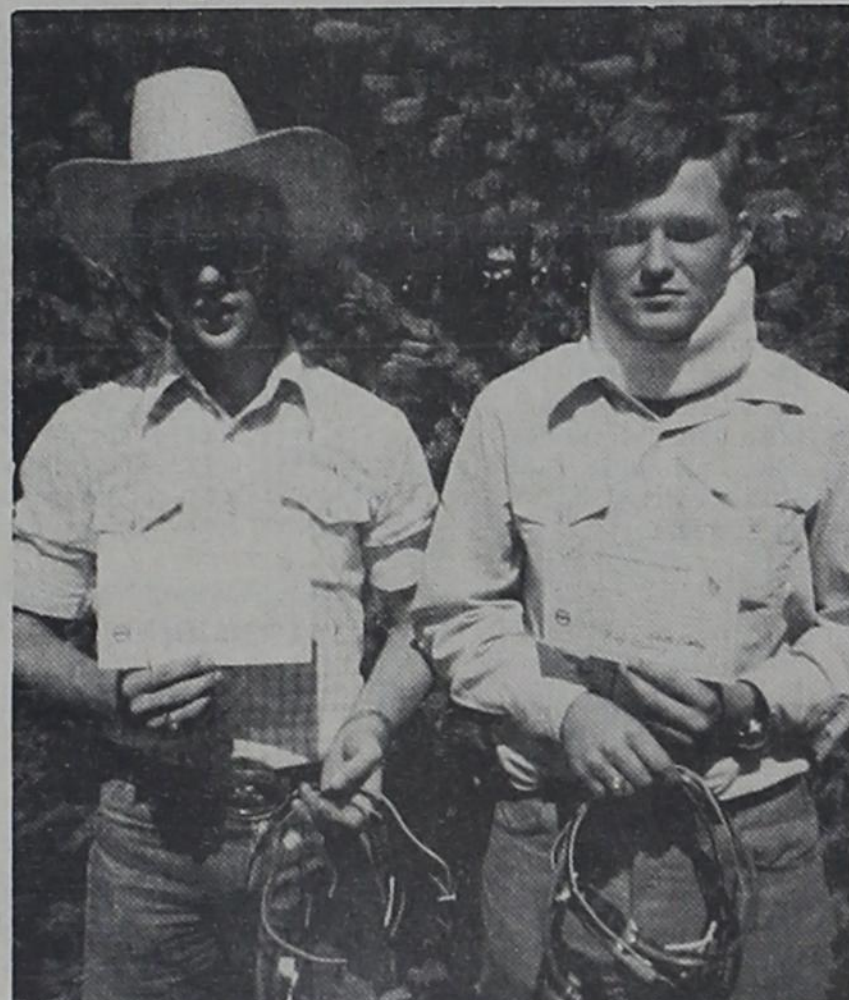

Attending from Farwell were Jack Foster and Robert Johnson, both junior students. Texico's representatives included Don Cherry and Ken Richardson.

There were five classes of instruction during the workshop with Cherry and Richardson participating in the motors class while Foster and Johnson were instructed in wiring. In each class a "top" student was named with Cherry garnering first place honors in his class.

For the accomplishment he was awarded a first place plaque, a certificate and an expense paid trip to the National FFA Conference to be conducted in Kansas City.

According to FFA advisors, James Mast and Eddie West, participation in the workshop was on a volunteer basis. All expenses for the workshop were paid by Southwestern Public Service Company.

There is no high school or college credit given for participating in the courses. "After completing the workshop, FFA'ers are able to make practical application of their knowledge both on the farm and in the home," commented the advisors.

WORKSHOP PARTICIPANTS - Jack Foster, left, and Robert Johnson, members of the Farwell Chapter of Future Farmers of America, were in Canyon June 9-11 where they participated in the Southwestern Public Service Electric Workshop. The FFA'ers received instruction in wiring and are now able to make practical application of their knowledge by installing wiring set-ups on the farm and in the home. They are pictured with their certificates of completion and articles they constructed during the sessions. These articles include circuit testers, continuity testers and short extension cords.

High Ceilings Make 'Extra' Room Possible

High ceilings make an extra room possible for the family who cannot afford more costly remodeling, a housing and home furnishings specialist suggests.

"Addition of overhead galleries, lofts and balconies are some of the ways a family can

use exceptionally high ceilings in both old and new houses for more space," Mrs. Jane Berry with the Texas Agricultural Extension Service explained.

"Adding a gallery, loft or balcony, instead of another full story, uses only a small portion of overhead space.

"That way, the family can retain the home's spacious feeling and achieve a really unique architectural feature, while, perhaps, easing the space 'crunch.'"

"Few new homes today are built with galleries or lofts, because architects tend to think it more thrifty and sensible to build a full second story," the specialist observed.

"However, when homes with two-story rooms are remodeled, sometimes a gallery or loft can solve an architectural problem or create new space.

"When the rooms of town houses are made into apartments, for example, very tall rooms often are given a sleeping gallery or a dining-

kitchen gallery. "And roomy Victorian houses with high ceilings can be remodeled easily to include such features."

The specialist also pointed to a feeling of "spaciousness, flow and elegant detachment" achieved with a gallery or loft, because it provides space set off from the rest of a room.

Concerning functions of a gallery, loft or balcony, Mrs. Berry said each structure is suitable for use as a study, playroom, dining or sleeping room, library or storage area. "This new space also adds to the overall square footage of a house, while it gives the family more room," the specialist said.

Income Verification Mandatory In Welfare Food Stamp Program

All income received by food stamp recipients must be verified if it is expected to be received during the certification period or is meant for use during the certification period. This includes total salary and wages, gifts or awards for maintenance and bonuses paid as income (such as the crop bonus commonly given by farmers).

Charges are occasionally made that employers do not report total wages paid to the employees, particularly the crop bonus. However, local welfare officials are somewhat skeptical of these reports. Both the employee and employer commit criminal offenses when income is intentionally reported incorrectly to obtain benefits or increase benefits from the food stamp program.

Local officials feel it is not likely an employer would conspire with his employees to defraud the government. Employers simply have nothing to gain when their criminal responsibility is taken into consideration. The employer commits a criminal offense when he intentionally signs a false income verification statement. The provisions are contained in The Penal Code of Texas, Section 32.32, subsection b.

It is recognized that some abuse is possible in any program. Consequently, an investigation unit has been created by the State Department of Public Welfare. This unit is composed primarily of former police officers who are familiar with investigative responsibilities and the proper legal procedures.

If you have knowledge of any attempts to defraud the

government, you should report it immediately to the welfare office at Box 716, Friona, Texas 79035, or telephone AC 806/247-2860.

MATCH MESSAGE

Nothing does more to dampen spirits on a hunting trip than wet matches. Here are some practical wilderness waterproofing ideas.

First, the best matches for outdoor use are the wooden kind that will light when struck on any rough surface. The hunters at Remington Arms suggest you keep 'em dry by coating the heads with nail polish or melted paraffin. A cylindrical plastic pill container makes a good protective case. . . . as do two empty shotgun shells, one 12 gauge and one 20, that fit together to form a waterproof holder. **Z**

Fire Calls

The Texico Volunteer Fire Department received one call during the past week. Monday, June 16, firemen were summoned to 600 Turner St. to extinguish a fire in an alley.

No calls were received by the Farwell Volunteer Fire Department.

SWDC NEWS

by Herb Evans

It is becoming more and more important to consider characteristics of soil in selecting construction sites in Parmer County. Soil characteristics, such as permeability, depth to water table, and shrink-swell properties. The price of materials these days is overwhelming. One mistake in construction could cost more in rebuilding or repairing than the original cost.

farmers have seen. The sprinkler has been presented as a machine that will cure all ills, from weak irrigation wells to arthritis. No matter how unrealistic some of the claims sound, sprinkler irrigation systems have real value on a lot of farms.

However, some farms have a potential of much greater irrigation efficiency than sprinkler irrigation can afford with not near the expense. This new breakthrough is the old fashioned row irrigation system. If soil types, land slopes, and row lengths are correlated together, many farms could be getting up to 90 per cent irrigation efficiency with furrow irrigation.

With furrow irrigation, air temperature and wind speed is not a major factor. The slope of the land must be less than one foot fall per one hundred linear feet to achieve this kind of efficiency. Some farms are ideal for this and some are not.

Sprinkler systems are suited for permeable soils or sloping soils, but flat, tight soils may be better suited for furrow irrigation. Sprinklers are not the answer for weak water. Corn and milo use over two inches of water per week during part of the summer. The decision is not can I stretch my water twice as far, but which system is the best suited for my needs. Crops need the same amount of water no matter how they get it.

We at the Soil Conservation Service are in no way trying to say that sprinklers are not good, but in some cases row irrigation may be better. We invite anyone who is undecided which way to go to stop in at our office in Friona. We have good information and can impartially help anyone study his potentials and alternatives.

SAFARI SWEATERING

The safari look inspires this dashing sweaterjacket by Duet. Knit in a block-patterned design, it buttons long and lean with shoulder epaulets and a self-sash looping through cuffed pockets. It's made in shape-retaining yarns of "Wintuk" acrylic to machine-wash beautifully and live the sportin' life for months to come.

Cystic Fibrosis, Number One Genetic Killer Of Children

"A wanton crippler of children is striking randomly all over the country," says Ann Ledbetter, Texico chairman for the Breath of Life Campaign. "It is not a new virus or bacterial strain, or even a strange fungus. It is illusive and in many cases unsolvable. It is lung-damaging disease."

How many people realize the real crippling capacity of lung-damaging disease and the serious threat it represents to children? U.S. Health Department statistics confirm that millions of children in this country suffer lung-damaging diseases like cystic fibrosis, chronic bronchitis, bronchiectasis, asthma, faulty lung development recurrent or persistent pneumonia, and others. Of diseases that kill children, lung disease is second only to cancer. Cystic fibrosis, the most serious lung disease is the number one genetic killer of children.

What does a lung-damaging disease actually mean to a child? A constant fight to continue breathing. In the case of cystic fibrosis, it means hours of therapy, consuming antibiotics and digestive enzymes, often sleeping in a mist tent and inhaling medicated vapors. Every lung disease can mean frequent checkups and tests, hospitalizations and bouts with infection.

For an entire family, lung-damaging disease can mean financial strain and emotional problems stemming from exhaustive demands and, in the inherited cystic fibrosis, guilt. And even with the best emotional and financial conditions, lung damaging disease can mean special problems for the family in just doing ordinary things together. Over-night trips and vacations can be extremely difficult, with all the equipment that must be lugged along. And the lung-damaged child can't be too far away from a hospital since he may require emergency service. Coping effectively with the realities of an incurable disease like C/F is difficult for the entire family.

Lung-damaging disease "is" a problem of major proportions and that's why the New Mexico Chapter of Cystic Fibrosis Foundation is seeking funds through the Breath of Life Campaign.

Nearly half of the funds raised here in Texico will stay in the community to assist lung-damaged children and their families, as well as sponsor other programs of education and training. Other monies raised will go for research and care on a national level. The CFF provides support for more than 110 C/F centers all over the country for

diagnosis and treatment of lung-damaged children. The centers also provide for research, training, and educational programs. The CFF also funds scientists and researchers seeking a cure for C/F, a test to detect carriers of the gene for C/F and improved treatment for all lung-damaging diseases.

Equating the progress of the total CFF programs is no simple process, but one fact is certain. Today 50 percent of the patients with cystic fibrosis can expect to live beyond the age of 18. When the Foundation was founded in 1955, most children with C/F could not expect to live beyond infancy. And, many children with the

other lung-damaging diseases are benefitting from the care developed for cystic fibrosis patients. In numerous instances other children can be cured.

In less than 20 years, the Foundation has changed from a small group of dedicated parents to a nationwide network of chapters and branches devoted to the cause of those original founders. Today millions of people are involved and dedicated to the expanded goals of conquering all lung-damaging disease. The cause is great enough to engage this kind of support and attention, and it is with the continued support of these people that the goals of CFF will be met.

Reduce Water Usage, Conserve Energy

Hot water is a major energy user in any family's daily activities.

But consumers can learn ways to cut down this energy drain, according to Lynn Bourland, family resource management specialist with the Texas Agricultural Extension Service, The Texas A&M University System.

"A simple way to save three to six gallons of water-heating oil a year is for men to put the stopper in the washbasin instead of letting the hot water run while shaving with lather and blades.

"Switching to an electric

shaver saves even more energy. In a year it uses only as much energy as two or three days' hot water supply for a lather and blade shave," she explained.

The daily bath is another big drain on energy used for hot water. A normal tub bath requires 23 gallons of water at 110 degrees F. But a normal shower takes only 12 gallons at 100 degrees F.

Based on one bath or shower a day, a person can save about 39 gallons of crude oil a year by taking showers instead of baths, the specialist pointed out.

In one recent year, some 1,600,000 persons were under care in public and private mental institutions, according to the National Association for Mental Health. Why not utilize your spare time by volunteering to help hospital personnel in their care?

If you have the trees but the neighbor gets the leaves — help him to clean them up.

Share pick-up chores — pick up your friends' kids as well as your own at school.

"The greatest friend to man in all creation is a great cook."

Word was received Friday, June 13, of the death of Kent Petty, 10, of Lawton, Okla. Kent, son of Mr. and Mrs. Kent Petty, was the great-grandson of Mr. and Mrs. S. G. Jones of Farwell, and a great-nephew of Mr. and Mrs. Bill Boling of Farwell and Mr. and Mrs. N. R. Jones of Hereford.

Kent died as the result of injuries suffered when he was struck by an automobile. Funeral services were conducted Tuesday, June 17, in Lawton.

Mrs. Jones, Mrs. Boling and Mr. and Mrs. N. R. Jones were in Lawton for the funeral.

FOR DIETS: VITAMIN E

If you have always eaten foods rich in vegetable oils or polyunsaturated fats, you may need a vitamin E supplement.

Laboratory experiments with animals and an experimental study involving man, have shown that the dietary need for vitamin E increases as one increases his or her intake of polyunsaturated fats.

Increasingly, doctors are recommending diets high in polyunsaturated fats, rather than animal fats. This could necessitate an increase in the need for vitamin E.

TWO MINUTES WITH THE BIBLE

BY CORNELIUS R. STAM, PRES. BEREAN BIBLE SOCIETY CHICAGO, ILLINOIS 60633

TAKING GOD AT HIS WORD

Because of a failure to understand God's purposes as outlined in the Scriptures, some have felt it necessary to alter many of the plainest statements of Holy Writ. Supposing that God could not have meant exactly what He said, they have concluded that these things must be interpreted in a "spiritual" sense.

Actually there is nothing "spiritual" about failing to take God at His Word, or seeking to explain away difficulties by arbitrarily altering what He has plainly said.

First, this would leave us at the mercy of theologians. If the Scriptures do not mean what they say, who has the authority to decide what they do mean? And how can we turn to the Word of God for light if it does not mean what it says and only trained

theologians can tell us what it does mean?

Second, this altering of the Scriptures affects the veracity of God. It is a thrust at His very honor. If the obvious, natural meaning of the Old Testament promises are not to be depended upon, how can we depend upon any promise of God? Then, when He says: "Whosoever shall call upon the name of the Lord shall be saved" (Romans 10:13), He may also mean something else instead of what He actually says.

Third, this "spiritualizing" of Scripture endorses apostasy, for it allows men to alter the meaning of God's Word according to their will.

The path to a true understanding and enjoyment of the Bible is not in altering but in "rightly dividing" it. (1 Tim. 2:15).

The Consumer Alert

by John L. Hill
Attorney General

AUSTIN—Many consumers are looking for bargains these days in places they may never have shopped before. But in the search for "good buys" some people end up paying more and getting less than they would have if they had bought from a traditional source.

Our Attorney General's Consumer Protection Division lawyers say that people who are shopping at unclaimed, repossessed, or damaged merchandise stores, private party sales, or garage sales could become dissatisfied if they don't know what to expect. Such consumers, in their haste to find a bargain, might also fall for deceptive trade practices used by a few unscrupulous sellers.

One important thing to remember is that purchasing from such sources likely means that conveniences such as charge accounts, layaways, delivery, service or parts, and warranties may be curtailed or eliminated in order to sell at a lower price. If these things are important to the consumer, the lower price may not be attractive enough to offset their absence.

Our Consumer Protection attorneys also remind consumers that the mere fact that an item is found at such places does not automatically mean the price is lower than elsewhere. The only way to determine if the price is a good one is to comparison shop at several places. Sometimes a consumer is amazed to learn that as low or lower a price can be obtained from a department store or specialty shop.

Occasionally unclaimed, repossessed, or damaged merchandise sellers who attract shoppers with especially low prices say they "just sold the last one" when the consumer arrives. If they then try to sell a more expensive item, they could be practicing the familiar "bait and switch" selling tactic, which is illegal. Never deal with merchants who do not sell as advertised.

Checking the classified advertising section of the newspaper is often a way to locate a needed item at a good price. Sometimes, however, a professional con artist will rent a house or apartment, fill it with furniture, appliances, and clothing and have a "moving sale." Unsuspecting persons might end up purchasing items at far higher prices than the merchandise justifies. This is another time when comparison shopping could alert you to such high prices.

Occasionally, according

to police, these "stuffed flats" are filled with stolen merchandise. Use caution when purchasing from individuals you do not know, for you will have little recourse if an unscrupulous person disappears just after selling you his merchandise.

Garage sales have become tremendously popular and continue to attract consumers hunting for a bargain. Most garage sales are just what they seem to be—families or individuals selling household or personal items they no longer need. As in the case of "stuffed flat" operators, however, there are some persons who operate continuous garage sales to sell at a profit merchandise they have bought elsewhere for that purpose. Many cities have local ordinances about number and frequency of garage sales allowed an individual per year, and consumers should be familiar with these laws.

If you have a consumer complaint, contact the Attorney General's Consumer Protection Division, your county or district attorney, or your local Better Business Bureau.

Easy Living

TIMESAVERS FOR WORKING MOMS

Almost half the women in the United States have jobs outside the home and each year more and more mothers go out to work. If you're a two-job woman, here's how to speed up kitchen chores and have more time for family fun:

1) Enlist your family's help. Keep a list of duties for them on a bulletin board in the kitchen where it's an easy reminder.

2) Decide on menus for an entire week and then buy all your groceries at once. Shop on a weekday night when the stores are less crowded and take your older children along to help. Plan and shop early for special-occasion foods like turkeys or birthday cakes.

3) To save labor and time, use attractive and disposable Dixie plates, bowls and cups for pretty table settings without dishwashing and break-fast clean-ups before work.

4) Don't procrastinate and turn little jobs into big ones. Food spills are cleaned more easily if you wipe them right away. Also, try to get up a half-hour earlier on weekdays and get little chores done to eliminate major clean-ups on the weekends.

Backyard Privacy Can Be Planned

Do you feel a lack of privacy in your backyard, especially in the summer when outdoor activities increase? If so, a number of solutions are available.

Dr. William Welch, a landscape horticulturist with the Texas Agricultural Extension Service, says there are several types of privacy screens suitable for backyards.

"It's important that the screen you choose blends in with the overall design of your landscape," emphasizes the Texas A&M University System specialist.

"A fence of pine, redwood or cedar makes a good screen and provides privacy as soon as it is completed. Brick, stone or concrete blocks may also be used. A fence should be sturdy and attractive and blend into the scenery."

The main disadvantage of building a fence is the high cost of construction.

"Plant screens," says Welch, "not only provide privacy but also help reduce noise and air

pollution." Although a plant screen takes longer to provide privacy, it is generally much cheaper than a fence and does not require much maintenance, points out the horticulturist.

He offers a few pointers for putting in a plant screen.

"Provide plenty of room for plants to grow and be sure they are suited to the area. Consider the soil type, drainage and the amount of sun available to the plants.

"Plant a lot of one type of plant rather than many different kinds of plants in one area.

"A combination frame and vine screen makes a good privacy block.

"Vines growing on a wooden frame covered with non-climbable welded wire make a colorful screen and require little space."

Welch suggests vines such as English Ivy or Carolina jasmine for attractive plant screens the year round.

Homesewing Is A Saver

Homesewing of clothing is definitely a savings, it saves an average of two-thirds the cost of comparable ready-to-wear items, according to Mrs. Becky Culp, area clothing specialist with the Texas Agricultural Extension Service, The Texas A&M University System.

She suggested some money saving ideas to help homesewers reap additional benefits.

—Take time to study fashion trends for fabrics, designs and trims.

"If in doubt concerning whether a certain design or fabric will be becoming, try on similar ready-to-wear items before investing."

—Use as much accumulated fabric and notions as possible before buying more.

"Hoarding or stockpiling costs extra since fashion and fabric trends change often, rapidly dating past years' purchases. Add currently fashionable trims and companion fabrics in current design lines to update what is on hand," the specialist advised.

—Buy multi-design patterns. Patterns that contain several garment pieces and variations are often the same price as those with only one.

—Modify well-fitting and fashionable patterns already on hand by varying with unique fabric and trim selections. Pattern pieces may be switched in the same size, brand and basic shape.

"For example, switch sleeve pattern pieces that are stitched into the same basic arms-eye seam. If in doubt, compare pattern pieces for similarities by lining up one on the other."

—Make maximum use of the sewing machine by regularly following manufacturer's instructions for cleaning and oiling. Machine life will be prolonged and repair bills reduced.

—Know your sewing abilities. Abandoned projects due to selecting too difficult to sew patterns or fabrics cost money.

—Plan ahead. Be flexible. Think before acting.

ENTERTAINING IS EASY DURING THE SUMMER, even though so many more folks seem to drop by. Serving out-of-doors is one way to simplify your workload. Another is to serve your guests on Dixie paperware. The attractive red and white Floral Accents design complements any meal, from a barbecue to a cold salad buffet. Top it off with some fresh fruit and cheese, and some easy-to-serve sweets. What's more, instead of washing dishes, you can just toss your "dinnerware" away and join in the after-dinner fun.

School Board Holds Business Meet

Members of the Texico Municipal School Board of Education met for a short business meeting Friday, June 13.

During the abbreviated session, the summer building project at the school was discussed and routine business was handled.

Attending the session were Board members D. Smith Day, Arlye Crooks, Roy Richardson, David Turner and Ronnie Curry. Also present were A. D. McDonald, retiring superintendent; Jim Pierce, superintendent - elect; and James Harding, high school principal.

It was once believed that carrots would relieve asthma if eaten in large enough quantities.
