Sidedressing Time For Sorghum Crops

Parmer County area row crops are coming along fast with the warm weather and time for sidedressing is fast approaching. More and more farmers are following the practice of sidedressing sorghum-type crops each year, says County Agent Joe Jones.

"In many instances this practice is being followed even though a pre-planting fertilizer application has been made. Whether or not it is the first fertilizer application or a second to insure plenty of plant food, there are a few things to keep in mind," suggests the agent.

One of these things he mentioned is that he is referring to sidedressing with a nitrogen fertilizer. Phosphate should be put on prior to or at planting and not applied to sorghums as a sidedressing he notes.

"Keep in mind that it takes 30 pounds of nitrogen, 12 pounds of phosphoric acid, and nine

shuffleboard court. The garage or car port provides good space for table tennis or other outdoor games. A simple fireplace for outdoor cookery is easy to build and provides lots of enjoyment. If you are really ambitious, the family might develop an outdoor living room for all forms of recreation.

Money is usually an item in planning recreation. Family and community recreation can help keep costs down. Check on the recreation provided in your own community and county for this summer.

MANAGE ENERGY
 Fatigue comes easier during hot weather.

A tired feeling often brings an irritable disposition and cuts down efficiency on the job. It can also increase susceptibility to disease or accidents, according to extension home management specialists.

If you are feeling more tired than usual, stop and analyze yourself and your working methods—specialists say that boredom and frustration, as well as such physical factors as overwork and strain, will cause that tired feeling.

Short rest periods from 10 to 20 minutes will work wonders if you are tired from heavy work. A change of environment or activities will often relieve fatigue caused by boredom or monotony.

Efficient, happy homemakers have found that these simple rules will help to fight fatigue and make work more interesting.

First check your kitchen and household storage—is everything within easy reach? Keep cleaning tools in good repair and located close to the job.

Wear comfortable work clothes and sit as much as possible while you work.

Study your jobs and organize the work in assembly line fashion—Use both hands whenever possible.

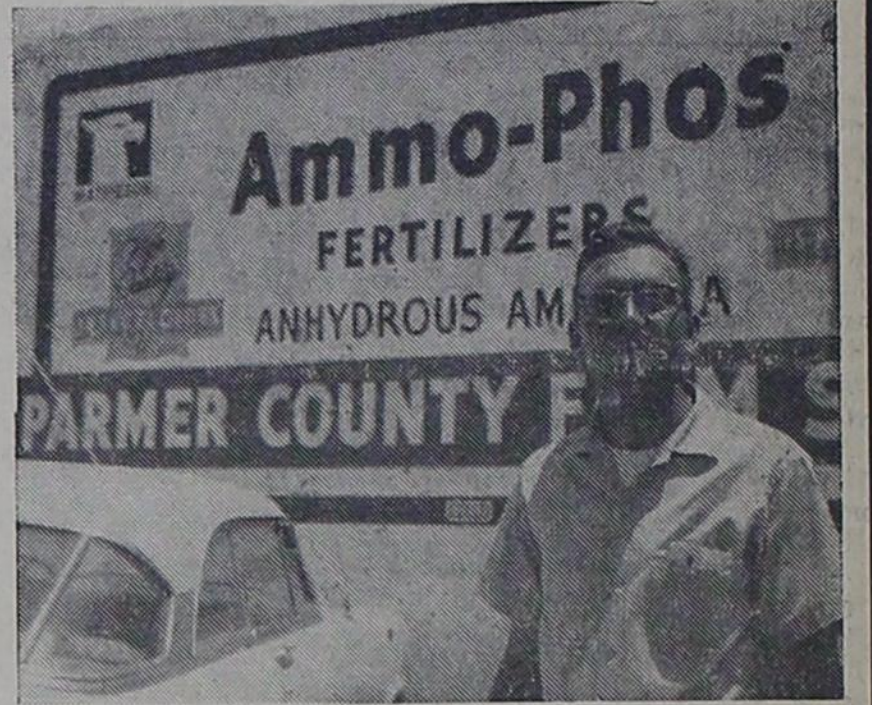

Don't try to stay with a heavy or difficult job too long. Interperse big jobs with easier ones and rest at intervals.

"The sun," wrote the youngster in his school essay, "is good to have around, but the moon gives us light at night, when we need it. The sun's only with us in the daytime, and we don't need it."

THE PARMER FARMER

by W. H. Graham Jr.

Dorothy Thompson devoted a recent column to the heavy dependence of the American economy on war spending. This spending she wrote: "...takes million of employables off the labor market onto the government payroll, and furnishes an inexhaustible market for the basic industries, since its purchases are perpetually obsolete, sometimes even before they have moved on left the drawing board. An arms race is continual turnover, as each new weapon invented by an enemy must be matched and if possible surpassed."

PLAN SUMMER FUN

Recreation and summertime just naturally seem to go together. Wholesome recreation is a year-round need for old and young alike. More of us are realizing that fact all of the time, according to Lucille Moore, extension recreation specialist. It's part of the training program in much of our work with 4-H Clubs, home demonstration clubs and organized communities.

With summertime at hand, youngsters out of school, and lots of parties, picnics and family gatherings planned, this is a good time to take a look ahead. Call a family conference

sometime soon to plan for the best use of leisure time, energy and recreational dollars for summer months.

First, study the recreational interests and needs of each family member. Help each one develop a greater variety of outside interests.

Next, plan time for recreation in the family schedule. Talking this over often helps family members to see how adjustments can be made so that everyone has some individual time for recreation, and that all members plan some time for family recreation—at least once weekly.

Next, plan and provide a place that's a comfortable and adequate place for each family member. For indoor recreation, an unused room or basement would make an ideal room for the TV, piano, record player, radio or indoor games. For outdoor recreation, the family might arrange a court for horse-shoes, volley ball, badminton or croquet. A cement porch or driveway makes a good
