

FROM THE
HOPPER

BY HOP JR.

Dolph Moten, my contemporary at Bovina, is getting his feet wet in politics this year. He's running for chairman of the county Democratic committee.

This pits him against Nelson Welch of Friona, the present chairman, and sets up, some would say, a choice between the liberal and conservative elements in the province.

A label doesn't especially fit Dolph, but it's at least fair to say he's an Old Line Democrat which means that he's usually at odds with the area element that is called conservative.

Dolph, who lives in a town usually thought of as the No. 3 town in a three-town county, gets No. 1 attention when the ballot boxes are opened, though. With few exceptions, the town votes with Dolph, or Dolph votes with the town -- if you would have it that way -- but the result is usually predictable by just reading the Bovina Blade.

Demo loyalist Dolph considers the issues in this race to be the matter of leadership. He doesn't think the party has any vigor or is going anywhere on the local level.

Moten is quite right when he says our interest in politics at the precinct and county level is low. It's pretty hard to get a local delegation together to represent us at the state convention. And usually we don't know anything about what's going on when we get there.

I asked Dolph to size up his prospects and he says "I hope not to get beat any worse than two to one."

The Bovina editor is being modest. Because of the big

Announcement By Postmaster General Reveals Construction Plan

The Post Office Department is seeking bids to build and rent a new post office at Texico, New Mex, announced Postmaster General Gronouski early this week.

The post office department holds an option on a site which is located on the west side of State St, north of Hereford Ave, which will be assigned to the successful bidder at a cost of \$2,000; or bidders may offer other sites they now own or control. Under the Department Lease Construction Program, the successful bidder will construct the building according to the departmental specifications and rent it to the Post Office

Department for a basic period of five years with three five-year renewal options.

The Department's capital investment will be limited substantially to postal equipment.

The building will remain under the private ownership with owner paying local real estate taxes.

Advertisements for bids will be posted from March 20, 1964

through April 18, 1964, and bidding documents may be obtained either from the Postmaster at Texico or Regional Real Estate Officer Richard A. King, P. O. Box 496, Albuquerque, New Mexico - 87103.

Ben Smart Back At S&S Furniture

Ben O. Smart, a "native son" of the community, is back in business here as manager of S&S Furniture, Inc., in Texico. He returns after an absence of several years while

he was engaged in furniture store ventures in Lubbock and recently of Clovis.

Smart established the Furniture Mart in Texico in 1947 and for several years operated a wide-ranging business, selling furniture in a 100-mile radius from the community.

He is buying out his brother, Jim Bob, who has operated S&S Furniture for several years. Jim Bob was appointed last year as the Farwell postmaster, and will devote his full time to that post.

Ben O. says he will operate a "family-type" business, with

himself and his wife, Inez, as managers, and with Mr. and Mrs. Gene Lock and son, Steve, as employees.

"We own our own buildings, taxes are low here, and we will have a very low overhead. Therefore, we will operate on a low margin similar to discount stores, except that we will trade and swap," he says.

Smart closed out Clovis Furniture this week and moved his stock to Texico, where it was augmented with merchandise on the floor for S&S.

The Smarts intend to move to the Twin Cities "as soon as we can find a house."

First Baseball Game Tuesday

Farwell High School
Baseball Schedule 1964

First baseball game for the Farwell Steers squad is scheduled for Tuesday, March 24 at 4 p.m. with Clovis.

Coach Vernon Scott released the following schedule for the 1964 season this week.

DATE	TEAM	PLACE	TIME
March 24	Clovis	Clovis	4 PM
March 27	Plainview	Plainview	4 PM
March 31	Open		
April 3	Clovis	Farwell	4 PM
April 7	Grady	Farwell	4:15 PM
April 10	Open		
April 14	Clovis	Clovis	4 PM
April 17	Grady	Grady	4:15 PM
April 21	Portales	Farwell	4 PM
April 24	Portales	Portales	4 PM
April 28	* Ralls	Ralls	3:30 PM
May 1	* Lorenzo	Farwell	3:30 PM
May 5	* Petersburg	Petersburg	3:30 PM
May 8	* Ralls	Farwell	3:30 PM
May 12	* Lorenzo	Lorenzo	3:30 PM
May 15	* Petersburg	Farwell	3:30 PM

Farwell will play all home games at Bell Park in Clovis. All times given are Central Standard Time. *Designates district games. Coach - Vernon Scott Manager - David Blair

Management Change At Restaurant

The Spur Restaurant on Highway 60 in Texico has undergone a change in management, announces N. L. Tharp, owner.

Managers are Mr. and Mrs. A. E. Bates who took over operation of the business on Wednesday.

The new operators are moving here from Snyder, Okla., where they were in the restaurant business for several years.

Tying in with the change in management will be a change in the name of the business to New-Tex Motel Restaurant, according to Tharp.

Texico Thinclads Open Season

Texico thinclads opened their 1964 season with a dual meet with Floyd on Wednesday evening. No results were available at press time and coaches in the Texico school say, "Our boys were only trying their legs in this meet and what events they will enter in the regular season will be decided by outcome of the Floyd meet."

Coach C. B. Stockton has 21 boys out for track this year; however, only seven of the boys have lettered in the sport and only two have participated in the state meet. Returning lettermen are: Wayne Hudnall, Tom Rickstrew, Mike Spearman, Allan Hill, Neil Lambert, Mickey Lofton, and Floyd Morris. Hudnall and Spearman participated in the state meet last year.

Other boys out are: Emmitt Autrey, Clarence Ethridge, Wesley Raulle, Jimmy Hill, Terry Lovett, Joe Holland, Leon Smith, Harvie Winkles, Larry Fought, Ronnie Spence, David Duncan, Don Fitz and Garry Meler.

A list of events to be entered by each boy will be carried in next week's paper.

Johnny Green, junior high coach, released the names of the following boys and the events they will be entering through the season.

100-yard dash: David Farmer, Bobby Joe Stewart.

220 dash: David Farmer, Jimmy Webb.

440 dash: Donnie Morris, 120 low hurdles: Donnie Morris, Larry Burns, Jimmy Webb.

Broad jump: David Farmer, Bobby Joe Stewart, Larry Burns.

High jump: James Deaton, Roy McDaniel.

Pole vault: Rodney Laceywell, Alan Brettenbach.

Shot put: Larry Combs, Bobby Joe Stewart.

Discus: Danny Hitson, Robert Spearman.

Other boys on whom Coach Green is counting are: Douglas Autrey, Greg Burns, Coy Ethridge, Lynn Hughes, Marshal Fought, Manuel Martinez, Junior Ortiz, Rod Pearce, Rickey Stanley, Johnny Gabrera, Ardell Autrey, Jackie Billingsley, Keith Crooks, Dean Campbell, Johnny Burford, Ronnie Wall and Johnny Philpott.

Church of Christ Schedules Series Of Special Services

A series of special services has been scheduled at Farwell Church of Christ, March 23 through March 29.

Services will be held twice

Work on the new railroad crossing on highway 70-84 in the downtown Texico-Farwell area was progressing nicely early this week with present plans calling for completion of the project by end of the present week, weather permitting. All old rails will be replaced with the new welded rail (continuous rail) old ties will be taken up and replaced and new timber will be laid. After all of this work has been completed the old paving will be replaced with new paving and motorists can expect to glide across the tracks with hardly a bump.

No Holiday In Farwell School; Texico Will Dismiss As Planned

Due to the recent days missed in the Farwell school due to bad weather, the school will remain in session during the Easter holiday.

Students will attend school several days later in May than was anticipated at the beginning of school due to the bad weather, says Supt. W. M. Roberts.

In the Texico school, although students will be required to attend school until May 27, board members decided to go ahead with the one day Easter

vacation as scheduled, announced Supt. A. D. McDonald. The Easter holiday had been

the only day scheduled for the Texico students to be out of school during the spring.

Jaycees Buy 5,000 Eggs For Giant Easter Hunt

Five thousand Easter eggs have been ordered by the local Jaycee chapter for small fry of the Twin Cities to hunt at a giant Easter egg hunt on

Saturday, March 28, 2:30 p.m. in the Farwell city park.

Pre-school children will participate in one hunt and children through the sixth grade will participate in a similar hunt at the same time.

Present plans call for prizes to be given, possibly to the child finding the most eggs and the child finding the least number of eggs. Each child should bring his own basket.

Further details on the egg hunt will be announced in next week's paper.

Mayor, Two Councilmen To Be Elected In Texico

Texico town residents will go to the polls on April 7 to vote for a mayor, two councilmen and a police magistrate. Deadline for filing for these positions is March 20, 5 p.m. All persons desiring the positions should file with the town clerk.

Retiring mayor is W. D. Howard. Jess Richardson and Olen Schluete are the councilmen whose terms in office are expiring and Sam Lewis is police magistrate. No names had been

filed for the positions on Wednesday.

At a called meeting of Texico council Wednesday main topic for discussion was the salary for the police magistrate. Further discussion and a decision on the matter was to be reached by March 20.

A motion was approved that 10 minute parking facilities be set up in front of the city hall between the hours of 9 a.m. and 5 p.m.

Mayor Howard advised council members of the plans of Curry County business and civic leaders to build a home for boys in the county. He asked council members to advise him of any land which might be available in this vicinity for such a purpose. He also added that cash donations are being taken for the project.

Bills for the month of February were approved and ordered paid.

Services For Longtime Resident, Mrs. J. Armstrong

Funeral services were conducted from Hamlin Memorial Methodist Church, Friday morning at 10:30 a.m. for Mrs. John R. (Vera) Armstrong 57, longtime resident of this area. Rev. Robert O. Tomlinson, Methodist pastor, assisted by Rev. Joel Treadwell, Episcopal Rector, from Hereford officiated. Interment was in Sunset Terrace Memorial Park, Farwell under direction of Steed Funeral Home.

Mrs. Armstrong, who passed away in a Clovis Hospital Tuesday evening was a cancer victim. She had been hospitalized several weeks at time of her death.

Mrs. Armstrong was born February 1, 1907 at Cisco, Texas. She moved at the age of five with her parents to Sweetwater, where she made her home until her marriage to John R. Armstrong in December 1930. She had lived in the Farwell area since that time.

Mrs. Armstrong was a graduate of Sweetwater High School finishing as salutatorian of her class. She graduated from a secretarial administration school in Ft. Worth and was a legal secretary for a law

(Continued on Page 4)

Community Good Friday Services

Plans have been completed for the community wide Good Friday services which will be held at the Farwell First Baptist Church, Friday March 27, 8 p.m.

Rev. Raymond A. Quick, pastor West Camp Baptist Church, will bring the message and singing will be directed by Gary Stelling, choir director at the host church. Choir members from all participating churches, will be directed in singing Easter hymns.

The general public is invited and urged to attend this special service.

Receives Carrier Appointment

Lee Edward Meeks who has been delivering mail on Farwell, Route 1 for the past 16 years as a substitute carrier received an appointment as car-

rier on the route effective February 26, according to a news release from the post office department dated March 6, (Continued on Page 4)

Growing pains in the Twin Cities are especially evident to the car drivers this week. Not only do they have to "dog-leg" around the state line tracks crossing, but the east end of Farwell's main street is in tatters as the state goes ahead with its four-lane widening project. When completed, this will bring the Highway 70-84 modernization project to Farwell's Seventh Street.

JANE ANN BRADSHAW

is winner of the Crisco award and has been an officer of her class each year. She was a candidate for school queen this year and attended Farm Bureau Citizenship seminar as result of being chosen DAR Good Citizen.

She is a member of the student council, Future Homemakers, pep club, national honor society and the annual staff. In University Interscholastic League competition she won in typing and ready writing. She was girls state alternate in her junior year and attended the conventions for student council and FHA.

In addition Miss Bradshaw is a member of the Future Home-Makers, pep club, national honor society and the annual staff. In University Interscholastic League competition she won in typing and ready writing. She was girls state alternate in her junior year and attended the conventions for student council and FHA.

Future plans for Miss Bradshaw include marriage this summer and possible training in the business field in order to become a secretary or bookkeeper.

Miss Bradshaw was honored at a luncheon in Plainview Wednesday, sponsored by the Mary McCoy Baines Chapter of D.A.R. She was accompanied to the luncheon by her mother, Mrs. L. H. Bradshaw.

Texico Baptist Schedule Revival

W.H. (Bill) Helliger of Fort Worth will be evangelist for the revival services scheduled for Texico First Baptist Church March 22-29. Virgil Hunton Jr., Clovis will direct the song service.

Services will be held each week day at 7 a.m. and 8 p.m. Sunday services will be held at the regular time of 10 a.m. and 6 p.m.

Rev. Leroy Looper issues an invitation to the general public to attend this series of special services.

WESLIE MICKEY

dally at 10 a.m. and 8 p.m. each week day. Sunday services will begin with Bible classes for all ages at 10 a.m. Preaching will follow at 10:50 a.m. and services will begin in the evening at 6 p.m.

Speaker for the services will be Weslie Mickey, Weatherford,

Mr. and Mrs. Howard (Mutt) Crook who returned to their home from Clovis Memorial hospital last week are recuperating nicely. Crook was hospitalized following a heart attack several weeks ago and Mrs. Crook was hospitalized for a rest.

ANNOUNCE DAUGHTERS ENGAGEMENT: Mr. and Mrs. Ira L. Taylor, 3001 Ross, Clovis, announce the engagement of their daughter, Georgia Ann, to Frederick R. Meier, Texico, son of Mr. and Mrs. Frank R. Meier of Texico, Route 1. A summer wedding is being planned by the couple. Miss Taylor is a senior in Clovis High School and her fiancé, a graduate of Texico High School, is engaged in farming with his father in the Pleasant Hill Community. Photo by Myrtle's Studio.

MISS PATRICIA PATTON

Plan April Wedding

Mr. and Mrs. Owen Patton of Oklahoma Lane, announce the engagement and approaching marriage of their daughter, Patricia to Darrel Read, son of Mrs. Nola Read of Bovina. The couple will exchange nuptial vows Saturday, April 18 in a candlelight ceremony at 7 p.m. in Oklahoma Lane Methodist Church.

Friends of the couple are cordially invited.

APPROACHING MARRIAGE: Mr. and Mrs. J. C. Sanford, Texico, announce the approaching marriage of their daughter, Monnie, to A. J. (Sonny) Longo Jr., Clovis, son of A. J. Longo Sr., and Mrs. Glet Longo, both of Phoenix, Ariz. Vows will be exchanged by the couple at the home of Mr. and Mrs. Charles Gear, 316 Prairieview Drive, Clovis, Saturday, March 21, 4 p.m. (MST). Only family members will attend the ceremony.

Study Club Begins Plans For 42 Tournament

Farwell Study Club met in the home of Mrs. A. C. Clarke Monday night with plans begun for a 42 tournament for the next financial project of the club.

Delegates to the district convention were selected with Mrs. Clytie Dial to be voting delegate. Mrs. E. G. Williams and Mrs. Mabel Reynolds will be other members attending the meeting, to be held in Leveland this weekend.

A nominating committee, with Mrs. Bruce Blair chairman, was selected to present names of candidates for 1964-65 officers at the April club meeting. Others named to the committee were Mrs. Lenton Pool and Mrs. Claude Coffey.

Mrs. Clytie Dial and Mrs. Mabel Reynolds attended a planning session in Friona Monday, with delegates from other county clubs. Parmer County clubs will host the 1964-65 meeting.

Program was "Texas Heritage -- Passport To Better Citizenship." Roll call was answered by giving the name of an individual who contributed to Texas Heritage.

Mrs. T. J. Glenn presented a book review "Goodbye to a River." The book was written by John Graves, a TCU professor, about the Brazos River. Mrs. Ralph Franse closed the meeting with prayer.

Assisting with hostess duties were Mrs. M. T. Glasscock and Mrs. John Aldridge.

One guest, Mrs. Guy Austin and members, Mmes. Partin

Austin, Bruce Blair, J. B. Benderman, Albert Smith, Claude Coffey, L. R. Vincent, Mabel Reynolds, Lenton Pool, Joe Crume, A. C. Clarke, Cricket Taylor, Mose Glasscock, C. C. Christian, E. G. Williams, T. J. Glenn, John Boling, Amos Tatum, Clytie Dial and Miss Maude Hicks were in attendance.

Uncle Ray's "Hot Air"

Procrastination is the art of keeping up with yesterday.

An ambitious young man ventured to approach a great merchant and inquired, "May I ask you the secret of success?"

"There is no secret," replied the merchant. "You just jump at your opportunity."

"But how can I tell when my opportunity comes?"

"You can't -- you have to keep jumping."

Jump to Uncle Ray's for Big Values.

Bert Williams Welcome Daughter

Mr. and Mrs. Bert Williams welcomed the birth of a daughter, Wednesday morning, March 18, in a Clovis hospital. The little girl who weighed 6 lb. 12 oz. on arrival was born on her grandmother Beulah Williams, birthday. She has been named Tracy Diane. Other children of Mr. and Mrs. Williams are two sons, Mark and Barry, and a daughter, LeAnn.

Maternal grandfather is Austin Jones, Clovis, and paternal grandparents are Mr. and Mrs. Johnnie Williams, Farwell. Great-grandmother is Mrs. Maggie Stone, Farwell.

A Son For Doyle Fords

Mr. and Mrs. Doyle Ford announce the arrival of a son Friday, March 13 in Clovis Memorial hospital. The little boy, weighing 6 lbs. 11 1/2 oz. on arrival, has been named Rocky Kyle.

The Fords other child is 16 month old Cyndey.

Grandparents are Mr. and Mrs. J. T. Ford and Mr. and Mrs. O. C. Harriman all of Farwell.

Progress HD Club To Host Dinner

Mrs. J. W. Herington of the Progress HD Club, reports that the club will be hosts for a fried chicken dinner on Friday, (today) March 20, 7:30 p.m. in the fellowship hall at the Progress Methodist Church.

There will be no charge for the dinner; however donations will be accepted and will go into the club treasury.

Invited to make talks at the non-partisan political speaking are all Democratic and Republican candidates in Bailey county as well as candidates for the state representatives post, the senate positions, and district attorney.

The general public is invited to attend the rally and hear platforms of the candidates.

Mrs. T. J. Glenn reviews the book, "Goodbye to a River," for Farwell Study Club members at their Monday meeting.

First Child Arrives

Mr. and Mrs. Jim Breconer of Austin, announce the arrival of their first child, a daughter, in an Austin hospital Monday, March 16.

The little girl weighing 8 lb. 9 oz. on arrival has been named Cynthia Jeanie.

Local grandparents are Mr. and Mrs. W. H. Spurlin. Paternal grandmother of the child lives in Iowa.

Mrs. Breconer will be remembered locally as Joan Spurlin.

Grace Circle Studies Asia

Grace Circle of Methodist WSCS met at the church Tuesday evening with Mrs. Joe Helton bringing a program on "The Christian Issues in Asia."

After a short business meeting Mrs. Helton and Mrs. Ann Smith served refreshments to: Mrs. Jack Williams, Mrs. Joel White and Mrs. Joe Jones.

Just completed new duplex -- part of it is now renting. Located at 609 Turner Ave., Texico, this modern unit has central heat throughout -- each unit has 2 bedrooms, sliding closet doors -- tile floors throughout, covered storage in the rear -- cement driveways.

At Home In Farmer County

By CRICKET B. TAYLOR
County HD Agent

Cricket

Meat is the main dish of a meal and the meal is usually planned around this. Let's take a look at meat prices and use a little mental arithmetic, because shopping for meat is no simple job-dollar wise and nu-

trition wise, that is. You have to remember that some meats have more bone, gristle and fat than others. Some yield less cooked meat and some have less protein value.

Take round steak and pork roast as an example. At the meat counter, one is marked \$1.11 a pound; the other 67 cents. Which is the better buy?

According to food economist you get about the same amount of cooked lean meat and protein for each dollar spent. That's because round steak, which sells for \$1.11 has the bone cut out; it has little excess fat. The pork roast, on the other hand has bone in it and considerable fat.

So don't let the price of a pound of meat mislead you. Check the amount of bone, gristle and fat you're buying-give thought to the protein value of the piece you're selecting.

Here is something else food wise. It takes 13 slices ofologna to give you the same protein as you get in one chicken breast.

"Food for Fat"
Don't envy the teen-age girl who runs with the drug store crowd. Unless she exercises a lot, she is going to end up overweight.

A person can eat only so much and when snacks are given priority, there's little room for the more nutritious foods needed by a growing teenager.

A boy can eat 3100 to 3600 calories daily -- in fact his body requires it. But a girl, alas needs only 2400 to 2600. After that anything else she eats may be "food for fat."

Two bulletins available at no cost to you are: "Food and Your Weight" and "Nutritive Value of Food." Write or come by for a copy at the Home Demonstration Agent's office in Farwell, at the Courthouse.

A yearly sterility check of your bulls may be worth consideration even though you had few open cows last year. A veterinarian can help you determine if infertility troubles are caused by the bulls or the cow herd.

Farmer County farmers will be able to plant an extra 4849.4 acres of cotton in 1964 as this much acreage has been allocated to this county via the release and reapportionment route, announces Prentice Mills of the ASCS office in Farwell.

"Assuming that cotton production per acre is as good in 1964 as it has been in the past two years (700# per acre) and the price is 28¢ per pound, the planting and harvesting of this many additional acres would add over \$950,000 to the gross income for the county in 1964," he calculates.

This acreage is assigned to each old cotton farm, for which an application was timely filed, by the Farmer County ASCS committee. The formula used in allocating this extra acreage to individual farms was as follows:

Each eligible farm was allocated two acres. Each farm having an original allotment in excess of ten acres and less than one hundred acres was assigned two acres, plus an acreage equal to six per cent of the original allotment on the farm.

Each farm having an original allotment in excess of one hundred acres was assigned two acres, plus an acreage equal to seven per cent of the original 1964 allotment for the farm. This method causes each eligible farm to have a final 1964 cotton allotment which is approximately equal (just a little smaller) to the 1962 allotment for the farm.

"In other words," says Mills, "the initial 1964 allotment for the county was a little over eight per cent smaller than the 1962 county allotment. Receipt of this released acre-

age for reapportionment to farms in this county causes us to be back in about the same position we were for the 1962 crop. This is of course, less acreage than the county had allotted in 1963.

The final total cotton allotment for Farmer County for 1964 is 48,311 acres. This (with normal production) acreage could produce in excess of \$6,763,000 gross agricultural income for the county.

THE HIGH PLAINS FARM AND HOME

Gold Star Award Winners Run In Billingsley Family

I pledge my hand to more service,
My head to clearer thinking,
My heart to greater loyalty and
My health to better living for my club, my community and country.

With these words ringing in their ears, Mrs. Leon Billingsley (Lois McGuire) and each of her children began their work as a member of a 4-H club. During the years each of the group has been recipient of the Gold Star award for their efforts and each says, "The effort put forth was well worth while." Through club work one not only learns to work for a common cause without the thought of personal gain, but learns cooperation through working with people from all walks of life.

Club work helps the individual in meeting the public as he is required to give many demonstrations before an audience (thus causing him to overcome to a great extent much of his natural shyness). "Through the program one learns through doing," said Mrs. Billingsley in recounting some of the activities of herself and her three children, Judy, Bruce and Janis.

It was in 1938 that Lois McGuire, a member of the Oklahoma Lane 4-H club was selected for the Gold Star award. The award was presented to Lois at a dinner held in the Congregational Church in Friona, HD Agent at the time was Miss Margaret St. Clair.

Mrs. Billingsley recalls that her nearest opponent in the contest was Mary Lou Barker (Mrs. Lester Harrelson) of the Lakeview club. The two girls had each chosen a bedroom improvement project for that year.

Up until that time the McGuire girls, Nova and Lois, had shared a single long room, which had no closets for their bedroom. In completing her project, Lois had the room divided into two good sized rooms and had carpenters come in and build closets (with her father's financial assistance). When the room had been completed to her satisfaction she remodeled the old furniture by converting a washstand into a dressing table and sawing off the headboard of an iron bedstead to make it into a Hollywood bed. With new curtains, an attractive bedspread and a throw rug here and there her room was complete and was indeed a prize

winner. "Other projects?" Oh! yes, she had her share of them too but they consisted mostly of assisting with the family canning and sewing.

For her reward Mrs. Billingsley was awarded a trip to the state 4-H club roundup at College Station in June of that year; however due to an outbreak of polio, the Roundup was cancelled and in 1939 she went instead to Dallas to attend the Texas State Fair as a guest of the state 4-H group.

One of her most prized possessions is a blue vase presented to her at time of the presentation of the Gold Star award. When the Billingsley's oldest child, Judy, was old enough to become a 4-H club member Mr. and Mrs. Leon Billingsley decided to become leaders and work with club members. The younger children, Bruce and Janis, although not old enough to participate in the work of the club were allowed to go along to meetings and later were made honorary members.

Judy was named winner of the Gold Star award in 1957 with the presentation made at a county meeting at the community center at Hub, Main projects for Judy included sewing and cooking. She began her sewing project by making simple garments and later graduated to making wool clothing. On two occasions she was alternate to the state contest and in 1961 she was delegate to the state contest on her sewing project.

She was second place winner of the district bake show on two occasions and participated in many method demonstrations. She continued her club work until 1962 serving as a leader for the smaller girls in the club. She assisted with the sewing project.

Last year Judy was married to Donald Jones of Bovina and they are currently enrolled in school at WTSU where Judy is majoring in elementary education and he is studying agribusiness.

Bruce Billingsley, following in the footsteps of his mother and sister was recipient of the coveted award in 1962.

Main projects for Bruce have been yard beautification and swine. In 1962 he also had the best cotton yield in Farmer county on his cotton acreage

"It couldn't happen but it did" -- 1963-4-H Club Gold Star Award winner, Janis Billingsley is shown with brother-Bruce, 1962 winner of the award, sister-Judy, 1957 award winner and Mamma-Lois 1938 winner of the coveted award.

with a total of 1330 pounds per acre lint. He also set out trees to form a windbreak as a part of his clubwork.

Mrs. Billingsley smiled as she told of the time he was recipient of a prize for keeping his swine pens clean. "He was only able to win second place on his swine," she added. Tractor maintenance learned through 4-H club work has been a great boon to the

Billingsleys as Bruce is able to assist with much repair work on the farm implements.

He has realized a profit of \$1,929 from his 4-H projects through the years. In addition to completing projects he has also given many method demonstrations at the state Roundups at College Station and has attended district and county camp on various occasions.

Imagine the surprise of the Billingsley family, when in 1963

Janis, youngest of the clan, was named district Gold Star winner. "It just couldn't happen four times in one family - but it did", leaving family members speechless.

Janis has taken as projects most of those offered to girls, including baking, sewing, home beautification, poultry, electric, and safety.

She has given method demonstrations on safety and electric at state Roundup as well as on several others. In addition she was named district "bake queen" in 1962 and has entered many baked products in the Tri-state Fair on several occasions.

Although she can never again have the honor of being named Gold Star award winner, Janis plans to continue her club work, (once a person is named for the coveted award he is no longer eligible to compete for the honor).

Gold Star winners are chosen by the HD Agent and county agent from club members in the district on the basis of work completed and records kept of the work. The awards have been made for the past several years at a special banquet held in Amarillo.

"The crying need in Farmer County and over the nation at this time is for more 4-H club leaders," stated Mrs. Billingsley, adding that she would take nothing for the time she has spent as a club member and later as a leader. "To me nothing is more inspiring than a group of (usually 2,000) boys and girls at state Roundup working together for the good of all," said Mrs. Billingsley.

Texas Woman Is Named To President's Committee

A Texas home economics leader, Mrs. Florence W. Low of Texas A&M University, has been appointed to serve on the President's Committee on Consumer Interests.

Chairman for the committee is Mrs. Esther Peterson, an assistant Secretary of Labor and a recently appointed Presidential Assistant. Committee members are representatives of the federal departments and agencies most concerned with consumer affairs.

President Johnson, in his special message on consumer interests recently, focused attention on four major areas: Increasing consumer protections, increasing information for consumers, assuring the consumer's free choice, and giving the consumer an adequate hearing.

"The American housewife -- the major buyer of consumer items -- cannot help but feel confused, and too often unheard, as she seeks the best value for the dollar she spends," the President said. "This government is pledged to come to her aid," he said.

FOOTSAVING EDUCATION

Does The Big Toe Determine Length In Shoes?

Many fitters of children's shoes use the tip of the big toe as the key point to determine the proper length of the shoe. But studies show that about 50 per cent of all persons have the second toe longer than the big toe. The difference in length may vary anywhere from one-eighth to one-half inch. An expert fitter will note carefully whether the big toe or the second toe is longer in each case, and then use the longer toe as the guide to determine shoe length.

More than half the bones in the foot are toe bones -- and in the early years toes are fragile and easy victims to pressures from ill fitting shoes or too short socks or sleeper feet.

Tail-Water Carries Astounding Load of Fertile Plains Soil

Muddy water. Worst of all is muddy tail-water. The term "tail-water", as we use it, applies to that water which pours from the furrows at the lower ends of irrigated fields. And mud?

Well, mud in this case, is good fertile top soil. When tests were run by the Water District on a series of tail-water samples to determine how much top soil was actually being washed away, the results were astounding. They even rechecked to make certain that there had been no mistakes.

As much as 14 tons of fine West Texas top soil was found to be moving with each acre-foot of tail water. The smallest amount the scientists found was five tons per acre foot of tail-water.

Using a nice round 10 tons as an average and multiply that figure by 160 feet, which would be an acre foot of water over 160 acres of land, how much top soil is being removed annually from the irrigated farms of West Texas? It is disturbing, isn't it? But all of the water doesn't run out the ends of the rows. Most of it soaks into the ground.

How fortunate for us that most of it is soaked by the soil, for if it were not, our lakes would be filled with top soil and much of the High Plains would be caliche desert.

But another startling figure came into existence at the same time the studies on soil movements were being made. By actual measurement it was found that as much as 25 per cent of the water that was pumped from the wells on a certain farm, escaped into the barrow ditch or was picked up and recirculated through a tail-water return system.

In the cases where the water left the field, one out of every four acre-feet of water pumped rushed merrily down the barrow-ditch, carrying with it an average of ten tons of fine top soil.

"It's a sin against God as well as our children. Anybody with any common sense ought to be able to understand what we're doing to ourselves . . .", a Parmer County farmer exclaimed.

Of course, in tail-water return pits there is a problem too, when the top soil settles out and begins filling the pits. But fortunately, the soil, as well as the water, is collected in such a way that it can be saved and redistributed. When the soil settles in the pits it is usually referred to as "silt."

It is rich in fertilizers and the organic matter so necessary

to the productivity of High Plains land. The Water District is experimenting with ways of keeping the silt in suspension until the pit pumps can pump it back into the distribution systems and back onto the land again.

A few farmers who are using recirculating pits began noticing that small deltas of soil were building up a few feet down the rows from the sox attached to the outlets of their gated aluminum pipe. One farmer using tubes in a section of open ditch, watched his furrows become almost level when the silt-laden water began dropping its load within a few feet from the ends of the tubes.

"Spreading it back out does not worry me nearly as much as having it run off the low side," he remarked.

Conscientious farmers, who have convinced themselves that continuous irrigation is not only lowering their water table, but it is gradually removing the layer of rich top soil that has made West Texas agriculture great, have begun reviewing the situation as an interrelated problem: Water, as well as soil management.

Dogs and other pets can be protected from rabies for one year or more by vaccination with chick embryo vaccine.

FCIC Program Growing In Parmer County

Parmer County farmers probably will set a new high in 1964 in Federal Crop Insurance according to Joe Matthews District director for FCIC, an agency of the United States Department of Agriculture.

He said FCIC representatives are accepting applications now in this county for a limited time on cotton and grain sorghum and that information on the program is available at the FCIC district office in Lubbock, Texas.

As 1963 ended, he reported that approximately 325 farmers of this county were carrying more than \$1 1/2-million total protection.

1963 was a busy crop insurance year in Texas according to State FCIC director, Ben A. Jordan, Jr., with nearly 12,000 farmers protected for over \$31-million on their cotton, wheat and grain sorghum.

Nationally, according to FCIC manager John N. Luft, a 25 year record of nearly \$500-million in crop insurance was set in 1963—up 30% and 25-thousand additional farmers from the previous year. Luft said 13-million United States acres and twenty different crops are now insured against production cost loss from natural hazards and that in 1963 some 50,000 farmers received close to \$25-million in crop payments, all of it previously paid in by farmer policyholders.

High Plains Counties Receive 140,150 Reapportioned Acres

As a result of the 1960 law which permits unwanted cotton acres to be reallocated within a state, the 23-county High Plains area represented by Plains Cotton Growers, Inc. will have an additional 140,150 acres of cotton to plant in 1964.

This total represents an increase of over six and one-half percent above the 2,132,499 acre original allotment for 1964, and brings the total acreage available for planting to 2,272,649 acres. This figure is slightly more than three percent greater than the 2,202,553 acres available for planting in 1963.

On a normal year this extra acreage should bring the area some \$21,000,000 in gross income from about 140,000 bales of added production.

The total figure of 140,150 acres gained by the High Plains was compiled from information released to Plains Cotton Growers by the Agricultural Stabilization and Conservation Service Office at College Station. The amount compares with only 91,684 such acres in 1963, which is an increase of 34 percent over that year. The law, referred to as Release and Reapportionment, provides for unwanted cotton acres to be released to the ASC committee and then reallocated to those who request increased acreage.

The ASC office first uses released acres to fill requests for additional acres within the county and zone where they were released and the excess acreage is then available for filling applications for increased acreage in other areas of the state. The State ASC Commit-

tee slightly rearranged the two zones in Texas for 1964, and this fact accounts for the increase in acres coming to the High Plains area.

Final date for requesting ad-

ditional acreage through Release and Reapportionment in Zone Two, which covers all of the High Plains, was March 4 and the date for making distribution of the acres to farmers filing requests before that date is March 25.

Limitations placed on the number of acres a county or individual farm was eligible to receive under the 1964 program are as follows:

1. No county or individual farm could be given reapportioned acreage that would bring a total acre in cotton to more than 50 percent of the total land in cultivation, nor could a county's base allotment be increased by more than 50 percent.

2. No farm could receive reapportioned acres unless at least 75 percent of that farm's effective 1963 allotment was

planted or unless failure to plant the allotment could be explained by weather conditions, illness or other good cause beyond the farmer's control.

3. Farms with less than 15 acres base cotton allotment were limited to a 100 percent increase or an increase to a total of 15 acres, whichever was greater.

4. Farms with from 15 to 24 acres base allotment were limited to an increase of 100 percent or an increase to a total of 37 1/2 acres, whichever was greater.

5. Farms with 25 or more acres of base allotment were limited to an increase of 50 percent of that base allotment.

The reapportioned acres, by counties, together with other pertinent figures for comparison are tabulated below.

County	1964 Reapportionment	Original Allotment 1964	Total Acreage 1964	Total Acreage 1963	Total Acreage Loss or Gain Comparison

Farm Bureau is opposed to any civil rights bill proposed, including the one presently being considered. The reasons are that, even though we know there are some very fine people supporting such proposals, the originators of the proposals are neither fine people nor Americans. This is not a racial equality problem, but even if it were, racial equality has no equal in any country of significance, to that of America offers. William Z. Foster, communist leader, published a book in 1932, in which he said, "The Negroes constitute a great potential revolutionary force. The Negro masses will make the very best fighters for the revolution." And J. Edgar Hoover, FBI Director, has said, "The Negro situation is being exploited fully and continuously by Communists on a national scale."

Farm Bureau does not want the Negro, along with every other American, to be stripped of his God given rights which are presently adequately and effectively guaranteed by the Constitution of the United States of America.

CONSIDER THIS: Eat not thou the bread of him that hath an evil eye, neither desire thou his dainty meats; For as he thinketh in his heart, so is he; Eat and drink, saith he to thee; but his heart is not with thee. Prov. 23:6-7.

New Methods Developing In Cotton Insect Control

Some years ago when the chlorinated hydrocarbons were first introduced, it became possible for cotton entomologists to develop an excellent cotton insect control program. This program consisted mainly of early season control of thrips, aphids, mites, overwintering boll weevils and fleahoppers. This was followed by a period of at least 30 days during which no insecticide applications were made, unless, of course, fleahoppers became an economic problem.

If they did, they were controlled with low rates of certain chlorinated hydrocarbons. When such a program was carried out properly, overwintered boll weevil populations, usually, did not develop to damaging numbers, or they were delayed until late in the season. Quite frequently, however, cotton fleahoppers migrated into the fields after early season applications. These insects would damage the cotton if control measures were not employed.

For fleahopper control, during the early days of hydrocarbons, low dosages could be used without seriously reducing beneficial insect populations. For several years, this type of program -- combining chemical and natural controls -- worked well for many cotton growers. It was both effective and economical.

As time passed however, the insects began to develop resistance to the hydrocarbons. As a result, higher insecticide dosages were necessary to obtain effective control. But the higher rates destroyed the beneficial insects and their assistance was lost.

Faced with the problem of resistance, increased rates, and loss of beneficial insects, cotton entomologists looked around for another type of program. One in particular became popular, and was used for a few years.

It consisted of the following: a grower would apply an insecticide soon after emergence and continue on a seven day schedule for the entire season. Basically, this program was designed to kill insects in all stages of their life cycle. However, it had its drawbacks. Only those farmers with highly productive land could afford such a program. Even with a high yield per acre, the net return was low due to excessive insecticide costs.

Another complicating factor was the bollworm complex and the development of resistance in these strains. Cotton growers today know full well how they are caught between fixed returns and rising costs. Most costs, such as land, mechanical operations, fertilization and seed, are fixed. However, the cost of insect control is one variable where economies are possible. Many entomologists are now saying that growers can reduce insecticide costs and still obtain good yields by going back to the combination of chemical and natural controls.

This, they say, is possible because of the new developments in the insecticide field, primarily with the systemic and selective groups. In fact, entomologists in California cotton areas have been recommending this type of program for a number of years. This practical program makes as much sense to the manufacturer as it does the farmer because it tends to eliminate waste and use products more efficiently. One chemical company, Chemagro Corporation of Kansas City, Mo., is recommending just such a control program in 1964.

The basic idea behind this program, Chemagro entomologists say, is to spray only when needed and save the cost of chemicals, their application and the time involved. Saved too, for the most part, are the beneficial insects, which then become active partners in the program. Careful inspections of cotton fields is another part of the program, a part incidentally, recommended by most agricultural experiment stations and extension services.

This type of program must begin at planting time, with the application of the granular systemic insecticide, DI-Syston, to the furrow with good seed. The protection is inside the cotton plant, unaffected by weather, and it lasts usually from the time cotton emerges up to at least eight weeks. By controlling aphids, thrips and mites, when the plants are young, the DI-Syston helps them grow

strong, sturdy and uniform. An added advantage of this type of protection is that uniform stands make mechanical operations, like directed post emergence herbicide sprays, more efficient throughout the balance of the season. Moreover, harvesting with pickers or strippers is easier. Fleahoppers and lygus bugs must be controlled, if they appear, to insure a good fruit set. Look for these pests about 30 to 35 days after the cotton emerges.

The selective insecticide, Dylox, when used at low rates, controls these insects without appreciable harm to beneficial insect populations. Fewer insecticide applications are needed because a Dylox program allows predators and parasites to build up and help keep the cotton clean. A non-selective insecticide would sterilize the field, and commit the grower to an expensive five or seven day schedule too early in the season. Beneficial insects delay the need to apply an insecticide for bollworm control, and in some areas, no bollworm applications are necessary at all. Later in the growing season, when natural controls cannot keep up with bollworm infestations, the company entomologists make the following recommendations: for boll weevil control, Guthion at recommended dosage; for bollworm, Guthion in combination with other effective insecticides such as parathion; and for aphids, thrips and mites, the foliage applied systemic, demeton (Systox). They also caution that no chemical should be used until field checks show that it is necessary, and then, it should be applied according to local and state recommendations.

Ammo Notes

FERTILIZER SOLUTIONS

Fertilizer solutions or liquid fertilizers are a relatively new type of fertilizer for West Texas. They have been used for several years in some areas, but their availability over a wide area has increased.

Fertilizer solutions are available in different forms. Straight nitrogen fertilizers are available in solutions. They range from aqua ammonia which is 20% nitrogen, to a straight urea solution containing 41% nitrogen. Various combinations of ammonium nitrate, ammonium sulphate and urea can be dissolved into a solution. The proportions of each will determine the per cent nitrogen. One common nitrogen solution is a urea-ammonium nitrate combination containing 32% nitrogen. Aqua ammonia, which is ammonia dissolved in water, is gaining in popularity.

Fertilizer solutions containing both nitrogen and phosphorus are becoming more common. These are made by combining aqua ammonia and phosphoric acid, resulting in an ammonium phosphate in solution. A common grade is 7-21-0. Potassium can also be added where needed. A common grade is 6-18-6.

Straight phosphorus solutions can also be obtained. This is primarily phosphoric acid and can be obtained as 0-52-0 or 0-54-0.

The question often arises as to whether fertilizer solutions will do the same job as a comparable dry fertilizer. The answer is that they will if applied properly and in the same manner as the dry fertilizer. This was substantiated as early as 1956 when USDA Agricultural Research Service Report 22-35 stated, "When properly applied, liquid nutrients are as effective as solids for promoting plant growth."

The main advantage of fertilizer solutions is that they are labor-saving. Materials are transferred from tank to applicator by pump and no lifting or handling of solids is required.

Since liquid mixed goods can be applied with a dual applicator, one trip across the field gets the job done. The phosphorus is banded, which usually results in more efficient use of applied phosphorus.

From the standpoint of affecting plant growth, both dry fertilizer and fertilizer solutions will give the same benefit. The main point to consider in deciding which to use is whether phosphorus is needed, and the rate. Then choose, and use the one of your choice.

Screwworm Program Has Hopeful Turn

The longest period in the record history of the Southwest with no screwworm infestations has prompted screwworm eradication officials to issue a statement that a basic objective -- elimination of screwworms from Texas and other states in the eradication area -- has been attained.

The feasibility of maintaining an artificial barrier of live, sterile flies along the Mexico-United States border to guard against reinfestation of areas freed of the pest is also believed to have been established, but determination of the most effective dimensions of the barrier zone requires further study.

The statement was released by the U. S. Department of Agriculture, Southwest Animal Health Research Foundation and Texas Animal Health Commission. These three organizations have jointly supervised production, sexual sterilization and aerial release of screwworm flies since the program began in February 1962. Sterile males mate with fertile female flies, preventing production of offspring.

Continuous release of sterile flies in screwworm-infested areas of the Southwest has resulted in no screwworm cases having been reported in more than two months.

The joint statement implied that farmers and ranchers cannot afford to relax their efforts, as some screwworm infestations are expected to occur within the eradication area in the months ahead. Eradication officials said in a sense the most difficult stage of the program is just ahead. Absence of infestations could lead livestockmen to the false belief that threat from the insect has been destroyed. They reminded producers that this program is attempting to alter a centuries-old biological pattern of an insect that has a remarkable ability to bounce back if given the opportunity. Don't give it that opportunity, they said.

There are at least 30 different programs available to 4-H members in large cities, small towns and on farms. These include safety, health, electric, conservation, crops, sewing, cooking, dog care, automotive and dairy farming.

The wide selection of projects makes it possible for young people to learn many new skills and improve their way of life, Anderson points out. Then after a few years of progress in selected projects and club activities, they can compete for awards based on over-all achievement. Recognition for excellence is given at the county, state and national level.

Getting Things Done Is Main Concern Of Nation's 4-H Youth

Achievement spelled with a capital A is the aim of 4-H Club work, says Kenneth H. Anderson, associate director of the National 4-H Service Committee. This year some 2,225,000 boys and girls throughout the nation are concentrating on just that.

Sponsor of the achievement awards is the Ford Motor Company Fund. This marks the 17th straight year of Ford's support of 4-H. Next December company officials will welcome to Chicago 50 state award winners, among whom will be the 12 national \$500 scholarship recipients. They will be delegates to the National 4-H Club Congress.

For one of the 1963 scholarship winners, achievement meant acquiring enough know-how to organize and lead a 4-H Club for retarded children.

The 18-year-old city girl involved her entire family in her favorite project -- learning about bugs, butterflies and insects. She also got them interested in raising vegetables at their summer place.

"They all became more appreciative of nature," said the young entomologist. Another outstanding achiever is a teen-age farmer who estimated that the net worth of his 4-H projects undertaken over an eight-year period is \$20,000. Although now a college freshman, the industrious lad finds time to raise beef animals, keep up a forestry project and help younger 4-H members with demonstrations and exhibits.

These two 4-H'ers, says Anderson, are not the exceptions. They have thousands of counterparts among the vast 4-H membership. The nation-wide 4-H Achievement program is supervised by the Cooperative Extension Service and 423,000

volunteer local leaders. Awards are administered through the National 4-H Service Committee, Anderson explained.

Lady Bugs Not Helpful In Cotton

Lubbock. (Special) Several bollworm infestation in some areas of West Texas last year resulted in high insect control costs plus lower cotton production. Many farmers are asking about the practicality of buying and releasing beneficial insects such as lady beetles as a bollworm control measure.

According to reports from experts in the entomology field at a recent Memphis, Tenn. meeting, the raising and release of native predators and parasites is not of any economic value to cotton growers. It was pointed out, however, native predators and parasites already in the fields are often highly effective against aphids, bollworms, tobacco budworms, cotton leafworms, cutworms, lygus bugs, spider mites, whiteflies and certain other pests.

Don Rummell, Area Extension Entomologist, emphasizes that full advantage should be taken of these natural enemies of cotton insect pests. The overall pest control program should include combining natural, chemical and cultural control.

Station Field Day Sept. 10

Thursday, September 10 was selected for the observance of the eighth annual field day of the High Plains Research Foundation at the semi-annual meeting of the board of trustees of the Foundation at Halfway, recently, Ewald Quebe of Lockney, who is a vice-president, presented preliminary plans for the field day.

The board unanimously approved expansion of the Foundation by the purchase of 504 1/2 acres from Mr. and Mrs. J. Frank Triplett of Amarillo. Slides and maps showing the proposed use of the new facilities were presented by Steve Taylor of Dimmitt, who is also a vice-president.

The farm is located north of Cotton Center and directly west of Hale Center at the northwest corner of the intersection of farm to market highways 168 and 1315. Mr. and Mrs. Triplett made a sizable contribution in the reduction of acre cost below appraised value of the farm.

Harold Hinn, chairman of the board, heads the committee to secure capital funds for the

down payment. The Foundation will take possession of the farm in January, 1965.

Asa Willis, Texline farmer and rancher, was elected to membership on the board of trustees. All trustees and officers were re-elected for 1964.

C. I. Wall, Amarillo, was made chairman of the committee to plan the expansion of the research program of the Foundation in recharge irrigation and bench-leveling.

The research progress report showing the practical farm adaptation and research achievements of the Foundation was presented through the use of color slides by Frank Moore, who is president of the Foundation.

Virgil Patterson, Amarillo, vice-chairman of the board, presented the need for and requested the creation of a new staff position for the Foundation. The expansion of the staff was approved by the board.

County HD Council Discusses Style Show

Parmer County HD Council discussed plans for the April 17 style show to be held in the Hub community building at a recent meeting.

Clothes modeled will be those constructed in the basic and advance clothing workshops, which have been recently held in the county.

Ten original designs will be presented as the outstanding hits of the style parade. Mrs. Gilbert Kaltwasser, THDA Chairman, discussed plans for attending the district convention in Perryton, April 9.

Mrs. Ralph Price, chairman, presided at the short business meeting attended by 20 members, representing eight clubs.

How Will Livestock Be Affected By Fallout?

By Tommy Hollmig and Bobby Riney

Livestock are affected by fallout in almost the same manner as humans, except generally, they can receive more radiation and still survive. External radiation caused by radioactive sources outside the body and internal radiation caused largely by consumption of contaminated food and water are the hazards from which livestock must be protected.

Livestock, as well as people, must have protection from gamma radiation by shielding or shelter. The shielding materials must be of sufficient density to absorb the radiation until its intensity decays. The best animal shelter is a one-story basement type barn, with a hay filled loft. A good tight barn of any kind would reduce radiation by half. Milking cows should be given the most protected place in the middle of the barn and calves should be with milk cows so they can suckle and reduce the discomfort of the cows' udders.

Other livestock should be placed in the best shelter available, even a shed without sides gives some protection. If building or shed space is not available for all livestock, those outside should be put in a yard near farm buildings, or grouped together since they could offer each other some protection.

It is essential that stock have non-contaminated food and water if we are to guard against internal radiation. Protection against this hazard consists of providing adequate cover for food and water to prevent fallout dust from becoming incorporated into these materials. Feed from covered barns would be safe, haystacks could be used if covered by a tarpaulin, or made safe by removing the out-

side layer of hay. If only a limited reserve of clean feed is available, it should be used for milk cows and other breeding animals.

It would be better to keep animals alive on contaminated

feed and water than to let them die of starvation, since they might recover from effects of the contamination.

Dairy animals and the milk supply will be discussed in the next article.

Safety Urged In Use Of Pesticides

A little common sense and a lot of caution should keynote the use of house and garden insect sprays this spring and summer, according to Agriculture Commissioner John C. White.

Sales of pesticides will in-

crease about 200 per cent in the next few weeks as the annual insect invasions get underway, White noted. "And accidental poisoning are an annual occurrence," he added.

Commissioner White pointed out that modern chemicals are a boon in the fight against household and garden pests when they are properly used. But, careless spraying can result in serious consequences of pets and even humans.

"We tend to forget that those aerosol cans or powders which are so effective against bugs are actually poisons -- and they should be treated as such," said White. The Texas Department of Agriculture and U.S.D.A. are responsible for seeing that all pesticides are labeled properly, and that all information needed to protect the user is contained on the label. But, once these products enter your home, safe use becomes your responsibility.

HOW FAST? HOW SLOW?
What's the best speed for trolling?

The apparent simplicity of trolling generally dupes a lot of good anglers into thinking that this effective fishing technique is a matter of dunking a lure overboard and reeling up the motor.

Like other methods, trolling demands a certain measure of know-how if results are to add up to expectations, say the fishing folks at Mercury outboards.

Of all the factors that influence the fish-appeal of a trolled lure, probably speed is the most significant.

Since most artificial lures are designed with built-in action, they function properly only when wriggling along at a certain clip. When the pace is too fast or too slow, lures exhibit about as much excitement as a clump of water-logged willows. They work at the right speed--nothing more, nothing less. Among different lures, the speed varies considerably.

To pinpoint just how fast a certain model should be trolled, drop it overboard alongside the boat. Then watch and feel its action at various throttle settings. At one very precise point the plug responds like it should, say the Mercury experts, darting and tumbling as the maker intended. This, obviously, is the right speed.

This simple--yet revealing trick--makes picking the correct speed an easy matter. And it's a good one for all of us to file away for warmer days.

Plainview Production Credit Association Holds 30th Annual Stockholders Meeting

The growth and progress the Production Credit system of agricultural financing in its 30-year history was cited as testimony to the success of the farmers and ranchers providing their own source of agricultural credit in Plainview Saturday.

Speaking before the 30th annual meeting of the Plainview Production Credit Association, Vice President W. H. Calkins of the Federal Intermediate Credit Bank of Houston, discount and supervisory agency for all 36 PCA groups in Texas said that in 1963 the bank closed loans for more than \$516 million, highest in its history, and the PCAs of Texas now have capital and surplus in excess of \$42 million.

More than 1,500 stockholders and guests of the Plainview Production Credit Association attended the luncheon and business meeting, held at Plainview High School.

Other speakers on the program included Paul Fankhauser of Washington D.C., deputy director of short term credit services of the Farm Credit Administration; Plainview PCA General Manager Noel Woodley and Association Vice President Henry Hayes.

Fankhauser pointed out that in the past year the loan volume of the Plainview association totalled more than the entire

Production Credit System in the United States loaned in its first 15 months of existence.

In his financial report, Woodley said the association had an alltime high volume of nearly \$46,000,000 in 1963, and that indications point to a new record during 1964, with present loans running approximately \$2,000,000 ahead of the same period last year.

Three members of the board of directors were elected, two to three-year terms and one to fill one-year of an expired term. Re-elected to three-year terms were Don Garrison of Silverton and Henry Hayes of Plainview. Loyd Widener of Lockney was elected to a one-year term, to complete the term of L. R. Durham of Plainview, who resigned last year. His successor, Watson Jones, declined to seek election for the remainder of the term.

President Grady Shepard served as chairman of the meeting.

Holdover directors are Grady Shepard of Hale Center and Billy W. Carthel of Dimmitt. Shepard and Hayes were reelected president and vice president of the board, respectively. Woodley was reelected general manager and secretary-treasurer.

Elected to the 1965 nominating committee were Jim Bob Curry of Plainview, Harlin Barber of Dimmitt, W. H. Simpson Jr. of Floydada, Carl Schlenker of Friona, Floyd Prentice of Littlefield, Walter Little of Muleshoe, Fred Smith of Olton, Carver Monroe of Silverton and Wayne Pearson of Tulla.

J. T. Eubanks gave a report for the 1964 nominating committee.

President Johnson Is Honorary Chairman Of 4-H Service Group

President Lyndon B. Johnson has accepted the honorary chairmanship of the National 4-H Service Committee, and has consented to the presentation of silver trays in his name to six top ranking 4-H Club members next December at the 43rd National 4-H Club Con-

gress. The announcement comes from Norman C. Mindrum, director of the Committee. Mr. Mindrum explains that since 1924, the President of the United States has served as honorary chairman. The late John F. Kennedy had been chairman.

In accepting the post, President Johnson said, "I deem it a pleasure to accept your kind invitation... (and) will also be happy to permit the traditional awards to be presented in my name to those 4-H Club members holding superior records in citizenship, leadership and achievement. My cordial good wishes for the continued success of this youth program."

The National 4-H Service Committee this year is celebrating its 40th anniversary as a non-profit educational corporation, stated Mindrum, although it began to function in 1921. Its stated purpose is to support and promote 4-H Club work conducted by the Cooperative Extension Service.

"From a humble beginning and donations of a few thousand dollars used to bring 4-H members to the International Livestock Show, the Committee has increased its support to one-and-a-quarter million dollars annually," Mindrum said.

President Johnson, in his special message on consumer interests, focused attention on four major areas: Increasing consumer protections, increasing information for consumers, assuring the consumer's free choice, and giving the consumer an adequate hearing.

"The American housewife -- the major buyer of consumer items -- cannot help but feel confused, and too often unheard, as she seeks the best value for the dollar she spends," the President said. "This government is pledged to come to her aid," he said.

Search Begins For South Plains Maid Of Cotton

Officials of the South Plains Maid of Cotton selection have begun a search for the young woman who can best represent the South Plains cotton industry in the National Maid of Cotton contest in December.

The local contest to be held in Lubbock April 10-11 will be to choose a potentially good model who is photogenic and exemplifies the young American woman at her best. Officials emphasize the importance of being photogenic stating that for every person who sees her in person, tens of thousands will see her in print and on television. The national maid will appear on magazine covers, newspapers and in newspapers around the world.

Another important attribute is the Maid's ability as a model. Candidates in the South Plains contest will be given instruction in the proper use of makeup, walking, posture and speech.

To prepare her for the national contest, the South Plains Maid will be featured in style shows and will make other public appearances on the South Plains and across Texas from the time of her selection until the December contest.

"The maid must exemplify the young American woman at her best," says officials of the contest. The contest is not just a beauty contest. The candidate never makes a public appearance in a swim suit.

Qualifications state that a candidate must have never been married, not less than 19 years of age, and not over 25 as of

January 1, 1965, and be at least 5 feet 5 1/2 inches tall without shoes.

Candidates must have been born in a cotton producing state, have her home residence in one of the following South Plains counties: Bailey, Borden, Briscoe, Castro, Cochran, Crosby, Dawson, Deaf Smith, Dickens, Floyd, Gaines, Garza, Hale, Hockley, Howard, Lamb, Lubbock, Lynn, Motley, Parmer, Swisher, Terry or Yukon, or be a student in a school or college in one of the above mentioned counties. She must be a resident of Texas.

Winner of the South Plains contest will receive a \$1,000 all-cotton wardrobe, an expense paid trip for her and a chaperon to the national contest in Memphis in December. First alternate will receive a \$200 gift certificate and second alternate will receive a \$100 gift certificate.

Some 20 young women will be selected as finalists on the basis of their qualifications as stated in applications and on photographs. They will then be presented for final judging on April 10-11 at the Lubbock Country Club.

Application forms are available at the local newspaper office in Farwell, Friona and Bovina and at the office of the Parmer county agent or from chambers of commerce on the South Plains.

Deadline for filing an application is Wednesday, March 25, 5 p.m., at the Lubbock Chamber of Commerce.

New Chevelle Malibu Sport Coupe (115-in. wheelbase)

'64 Chevy II Nova Sport Coupe (110-in. wheelbase)

'64 Corvair Monza Club Coupe (108-in. wheelbase)

'64 Corvette Sting Ray Sport Coupe (98-in. wheelbase)

Chevrolet will go to any length to make you happy

Things have changed a lot since a Chevy was only a Chevy. Especially your ideas of what you want a Chevy to be.

So now you have the Jet-smooth Chevrolet--17 1/2 feet of pure luxury, bumper to bumper. The size makes it a luxury car. But not the price.

Or you can choose the thrifty Chevy II, a 15 1/4-foot family car with all kinds of passenger and luggage space.

This year, your choice might be the new 16-foot-plus Chevelle, sized to fit nicely between Chev-

rolet and Chevy II (and between parking meters, with five whole feet left over).

Then, too, there's the sporty 15-foot Corvair, so right for so many people (you girls, in particular) that we've never touched an inch of it. And finally, Corvette--still 14 1/2 feet and still too much for any true sports-car lover to say no to.

The long and short of it is, you don't have to go to any length to find exactly the kind of car you want. Just see the five different lines of cars at your Chevrolet dealer's.

THE GREAT HIGHWAY PERFORMERS Chevrolet • Chevelle • Chevy II • Corvair • Corvette

April 3 Selected For Texico Junior Play

Date selected for the Texico junior play "They Gave Him a Co-ed" written by John Nash has been set for 8 p.m., April 3, Charles Stockton and John Adams are sponsors of the play. The play, a three act comedy, gets off to a hilarious beginning when Charles Bradley Brown, a young farm boy arrives at college not realizing

his lack of education and finesse, he is mistaken for the new Dean of the college, also named Brown.

The students are electrified by his presence and the registrar insists on giving the new dean an advance on his salary. The hilarity is heightened by the arrival of the real Dean whom the students take to be a lunatic.

Cast in the role of Dean Brown is Mike Spearman; Gary Blaine - Mickey Lofton; Dal Thomas - Tom Rickstrew; Chuck Rhodes - Clarence Ethridge; Herb Grant - Emmitt Autrey; Gloria Manson - Cynthia Spence; Una Scanlon - Kathy White; Margie Thornhill - Sandy Tipton.

Other roles are played by: Emily Wayne - Linda Hadley; Ione Babson - Gwinette Lovett; Miss Howard - Marquitta Wall; Beth Hanson - Sarah Walker; Roland Graves - Wayne Watts; Charles Bradley Brown - Roy

Wall and The Stranger - David Chappell.

For an evening of fun and laughter don't fail to see "They Gave Him A Co-ed." Price of admission will be announced next week.

Carrier --

(Continued from Page 1)

Meeks took the test for rural carrier in the fall. He had been a substitute carrier for Nelson Smith, last regular carrier on the route, and since Smith's retirement had delivered the mail regularly.

THRIFTY
"I got this hat free," she told her husband proudly.

"How?" he asked.
"Well, the hat was reduced from \$30 to \$15. That meant

I saved \$15. So I paid for it with the money I saved."
... Santa Fe Magazine

Duty is what one expects from others—it is not what one does oneself.
—Oscar Wilde

Hoppers--

(Continued from Page 1)

Friona vote he likely won't win, but he'll sweep Bovina and run strong in Lazbuddie and Oklahoma Lane, and the outcome will probably be pretty close.

The Department of Public Safety says there are 8,320 registered vehicles in Parmer County which includes, as Hugh Moseley points out, even licensed cotton trawlers, but the total of cars, pickups, trucks, motorcycles and what-have-you is creeping up on the population figure.

In 1960 the county had 9,583 people, according to the Bureau of the Census. At this rate by the time the next census rolls around we may very well have one car for every person in the county.

Services--

(Continued from Page 1)

firm in Sweetwater at time of her marriage.

She was a member of Hamlin Memorial Methodist Church, active in the WSCS, was a former member of the Texico-Farwell Woman's Club, active in school activities and Band Parent's Association. She and her husband were members of the South Plains Archeological Society and were ardent collectors of Indian artifacts.

Survivors include her husband, John R., three sons, Robert, John, and James, her parents, Mr. and Mrs. C. F. Elliott, Farwell, a sister, Mrs. Jason O. Gordon, Plainview, a niece, Mrs. James B. Hansard, Columbus, Ga., a nephew, Kenneth Richard Gordon, Plainview, and a grand-nephew, James Gordon Hansard, Columbus, Ga, also her mother-in-law, Mrs. Florence Golladay.

Serving as active pallbearers were: John Aldridge, Claud Coffey, Leroy Faville, Sam Aldridge, Champ Porter and Paul Wurster. Honorary pallbearers included: John Porter, C. A. Cassidy, Joe Magness, E. C. Prather, Earl Booth, Earl Roberts, G. D. Anderson, Melvin Snider and Lloyd Cain.

Out of town relatives and friends attending the services were: Mr. and Mrs. P. R. Nichols, Mrs. Ida George, and Miss Ara George, all of Amarillo, Mrs. Rae Johnson, Eastland, Mr. and Mrs. George Armstrong, Mrs. Sam Warden, Mrs. Walleen Roach and Mrs. Linda Murray, Dalhart, Rev. and Mrs. Frank Travis, Mr. and Mrs. Virgil Rowland, Mr. and Mrs. Melvin Ritter, John C. Interested
in
a new
discovery?

We call this one . . . Prilled Sulphur. It's 99.5% elemental sulphur made into round little balls. And to a farmer, this is important.

Why? . . . because the round, clean shape makes it simple to spread, with no dust. And its unique size makes it easy to mix. Prilled Sulphur gives even coverage with uniform distribution of plant nutrients in your soil.

Farmers everywhere are learning the importance of sulphur application to their soil. They have found that elemental sulphur neutralizes alkaline soils and makes needed soil nutrients available for profit yields.

Ask your local supplier about this new discovery.
