# New Trails

The Scouts of our nation have been blazing trails into newer fields since the beginning of history. The first Scouts explored and aid ed in the settlement of this country with a people of a pioneering spirit.

Scouts of commerce blaze trails into new markets for manufactured products. The Scientist . . truly a Scout in his way . . . blazes new trails into research fields that will yield better methods of living.

The Boy Scout movement, however, trains boys for their work in life. It teaches thrift, resourcefulness, clean living and other principles of red-blooded boyhood that is genuine training for manhood.
