## **Molotov Urges Nothing Secret About Atobomb**

#### First Time Soviet Official Mentions Sharing Plans

LONDON, Nov. 6 (AP) -Foreign Commissar V. M. Molotov called for an Allied control of Japan in a Moscow address today and declared "there ought to be no secreey about the subject of atomic

In a broadcast address opening Russia's observance of the 28th anniversary of the Soviet revolution, Molotov asserted:

"In the treatment of the defeated we should not let ourselves be guided by our feelings, but only by the necessity to prevent a new aggression. This applies to all countries which bear the responsibility for securing peace.

"We must then mention here the force of atomic energy which was experienced in the war with Japan. Nowadays there ought to be no secrecy about this subject."

This was the first time a high Soviet official had suggested that the United States and Great Britain share their practical knowledge of atomic energy as a means of

versary address in place of Generalissimo Stalin, who has just returned from vacation.

The Soviet monitor's version of Molotov's remarks concerning Japan was that the liberation of China was of the greatest importance to the world.

"It is thus clear that the Soviet Union considers most important the negotiation of control of all sults have yet emerged, but the importance of satisfactory results is clear to all."

Molotov told a cheering crowd that with victory in war "now we can return to peacetime labor."

## Jap Industrial **Combinations To Be Eliminated**

TOKYO, Nov. 6-(A)-General MacArthur today smashed Japan's four greatest financial and induscombines to "aid Japanese economic development along peaceful, democratic lines."

The Japanese government was ordered immediately to prepare to dissolve Mitsui, Mitsubishi, Sumi- He was stabbed later, and left tomo and Yasuda Zaibatsu and for dead in a pit with 500 other their holding companies and to bodies. eliminate their controls of Japanese finances and industries.

MacArthur further told government to set up a holding company liquidation association to direct the dissolution under indirect Allied control and warned that all policies and personnel must have his approval.

Along with the directive aimed at the great Zaibatsu interests with their ramifications, which spread throughout the world before the war, the Supreme Allied commander said he intended to permit "wider distribution of in- To Spend Furlough come and ownership of the means of production and trade in Japan and to aid the Japanese economic development along peaceful, democratic lines"

Lamp Bulb Chart

in most table lamps, pin-

in enclosed coiling factores in kitchens and buth

 You buy shoes that fit your feet; clothes that fit your figure. Why not be sure that lamp bulbs fit the lighting needs in your home?

Look at the end of the next lamp you buy. Note the "60 watt", "100 watt" or other wattage figures which indicate the size of the bulb. Then buy bulbs of large enough wattage to provide the amount of light you need for easier seeing, to safeguard the eyesight of those who read or study.

See the Lamp Bulb Chart at the left. It will help you select the proper size bulb to provide Better Light.

Nearly all stores sell bulbs - buy 'em when you shop.

if France persists in her opposition to central rule, an official inormant said today.

The Potsdam declaration provided that a central government eventually would be established. The French, who were not signathe Ruhr and Rhineland. They also want to see Germany dismembered into economic bits and not rebuilt into an economic entity.

Under the Allied setup, unnimous agreement is necessary among the four occupying powers on any action taken by the control council. However, zone commanders may make bilateral greements among themselves. It is understood that is what the three powers intend to do if

France refuses to go along. In effect, this would freeze France out of the central administrative setup and leave a barrier between the French occupation zone and the rest of Germany. In one sense, such three-power action would be what the French

want, since they have expressed a desire to integrate their zone economically-if not politically-

#### **New Fords Feature Easy Starting**"

"When you come out on a cool morning and your car starts right up on the first try, you can thank the research men of the Ford Engineering Laboratory, who found a way to prevent moisture from forming in the distributor, Mr. Merrick of Big Spring Motor Co. pointed out today.

When moisture forms in the distributor, it causes hard starting. Ford engineers designed a deadair chamber between the terminal housing and cap, that stops moisture formation. In principle, it works in the same way as the vacuum-bottle you take on a picnic. The cold air outisde can't cool down the air inside and thus it can't cause moisture to form. The ignition system in the new 1946 Fords has been improved in other ways, too Mr. Merrick added. Synthetic rubber has been used on ignition wires for insulation, because it won't crack in extreme cold weather and is oil resistant. This idea came out of the use by high-altitude airplanes of synthetic rubber insulation.

Water-splash from wet roads can't stall the engine because new plastic sleeves tightly seal the ignition wires.

And the problem of ignition wire insulation breaking down under the attack of ozone gas, which is formed by the high-voltage current of the ignition system, has been solved by the use of the new coating on the wires, which won't deteriorate under high-tension current.-adv.

#### Ambassador, General On Way To Capital

#### **Congress To Take Action On Threat** Of British Wool

WASHINGTON, Nov. 6 (AP) Congressmen from wool producing states put on their thinking caps today to see what could be done to remove what they regard as the threat of the British-own-

ed stockpile. Rep Barrett R-Wyo) asserted in a statement that Britain has made informal proposals to the Defense Supplies Corporation looking toward sale of the 530,000,000 pounds stored in the U.S. during the war as insurance against transportation difficulties.

"I don't believe they can sell off that wool to the detriment of this country," said Senator Gurney (R-D), member of the Special Senate Wool Committee. "The Wool Committee, however, will look into the situation if there is any danger that the British stockpile is going to be a threat to the domestic market."

The United States government ent motor . . . we'll tell you: if has been purchasing the entire you don't we'll make any minor domestic supply during the past few years, just as Britain is buying all wool grown in the United ure.

Barrett says the Commodity Credit Corporation has about 530,-000,000 pounds on hand and its holdings will reach about 1.000,-000,000 pounds under its agreement to purchase the 1946 crop. During the war, about the only

replaced if needed.

Wednesday's football game involving West Ward's Cowboys and the Central Ward Trojans, which will decide the Grade School championship, will be played under the lights in Steer Stadium at 7:30 o'clock.

Originally, the bout was booked as an afternoon feature but school officials elected to move back the playing time to give those grid fans who cannot leave jobs during the day a look-see at what Steer teams of the future look like.

A tie would give the Trojans the championship, since Central leads West Ward by half a game. In four starts, the Central club has won three times and been tied once while the Waddies have copped two decisions and been dead locked as many times.

If the Trojans win, they must accomplish what no other Junior -score on the Waddies. Offensively, the Cowpokes' record is nounced. not so impressive, but no team has been able to score on the West Warders this season.

Too, the Trojans must stop versatile Danny Scott, who can

Telephone factories are getting into the swing of peacetime production.

Thousands of men and women in these factories have turned from making radar and gun directors to the complex job of making telephone equipment once again.

It's a change that pleases everyone. As more and more telephone equipment comes from the factories, it means that telephone people here can make faster and faster progress in caring for the 246,000 waiting for telephone service.

Such a big job takes time. Equipment is complicated. Making switchboards and dial equipment requires thousands of precision parts, thousands of intricate connections. And thousands more are needed to connect them as working parts of the telephone system.

But the good news is that we're on our way. We are working as hard as we can toward the day when anyone who wants a telephone can get it when he wants it.

## The Howard County Junior College Offers These Advantages—

#### Opportunity for More Students

Scores of Howard county high school graduates will have opportunity for college training because it will be available at home. They can live at home and go to college.

#### Vocational Training

Since Howard county will support the junior college, its people also will guide the type of training. Naturally vocations suited particularly to this area will be a part of the curriculum.

#### Guidance & Professional Training

Many young persons out of high school have their eyes on one of the professions. Faculty members will advise with them and suggest comprehensive courses which will permit them to continue their studies with credit transfers, in universities.

#### **Adult Education Possibilities**

Adults can have the benefit of higher education - regardless of whether they hold high school diplomas-if they desire it, thus making the junior college facilities do double work for the community.

#### Greater Personal Interest In Student

The average high school graduate is yet immature and in need of sympathetic understanding and guidance. In a smaller college such as ours, instructors will have a close personal interest in students and in their ambitions.

#### Economical Higher Education

Ultra conservative estimates of savings by junior college students range from \$500 to \$800 per year. Many estimate it is much more. At any rate, many are able to attend because of lower cost, and out of savings are able to continue their higher education in universities.

Vote for the Junior College on Nov. 17

## Cut Expenditures Too

Congress has its knife whetted for tax reductions, and business and individuals alike are drooling over the prospetcs.

There ought to be a collorary to the reduction of taxes in the form of reduced expenditures. We have just been through a period when time and materiel-not money-were the prime considerations. We are past that emergency now and it should be recognized.

This means simply that government expenditures ought to be scrutinized closely and those which do not serve essential needs should be eliminated or pared sharply. This ought not to be confined for administration of civilian affairs, but to the military

It is a well known fact that few agencies ever devised are as oblivious to source and cost of supplies as is the military. Application of commonsense and simple business administration would result in a tremendous saving without impairing the scope of the sizeable armed force we will be obliged to maintain.

Everyone has a stake in trying to bring about these reductions. High taxes are economic restraints: yet tax reductions without corresponding cuts in expenditures lead to deficit financing. which invariably points toward inflation. Inflation hurts everyone, and most of those who draw income

#### Return Of Courtesy

One of the surer signs of the trend, however, slight, toward normalcy is in a booklet furnished by the Railway Express to its employes. "How Can We \ Do It Better?" The little tract asks.

It is filled with idea on how those working for the company can better serve the public. Most folks will be interested in the telephone technique tips: 1) Answer promptly; 2) have necessary records with-In easy reach; 3) make immediate note of the customer's name and use it in the remainder of conversation: 4) speak directly into the phone, enunciating distinctly in a clear and moderate voice: 5) when desired information is not immediately available, obtain the information and call back the inquirer; 6) listen attentively and do not ask the customer to repeat unless absolutely neces-

There is much sound advice in that passage and the scores of other ideas on courtesy. It will be wonderful as more businesses awaken to the fact that practically none of us escape the need for more human decency and courtesy in our everyday business dealings. A new day is ahead, and the ones who will be shead with it are those who recognize that cheerful, efficient service is still an indispensible asset.

## With The News

by Dewitt Mackenzie AP Foreign Affairs Analyst

Fate certainly is making poor old China run the

Thus far the efforts at reconciliation between the Chinese communists and the national government have failed to disclose any avenue of escape from the horror of a civil war which in fact is already under way although there has been no formal declaration of hostilities. Hard fighting has developed along the vital rail communications of North

This column a week ago said that it looked as though the Chinese communists were figuring on the conquest of Northern China-where they are in greatest strength-and Manchuria. Developments strengthen that belief.

Indications are that the Red strategy contemplates the seizure of Manchuria, with its well developed war industries and resources, for a powerful base from which to strike at the national forces. The communists already hold large industrial and agricultural areas in the Northern Chinese provinces of Shansi, Shensi, Shantung, Anhwei, Kiangsu and

Were the Red armies able to consolidate this great and rich territory, the natural development would be the establishment of a Chinese Soviet state, thus splitting China in two. And one wonders whether the war would halt with this partition program to supply them Japanese of the once huge China, or whether it might con- Gee-Gaws at a cost. tinue to the bloody finality which would see one side completely crushed. the AP wire. My mind wouldn't settle down to anything. Well, all that was yesterday. The boss explained that Bob Thomas, who has filled this space so entertainingly, will write a spot-news column about Holly-

And what will I write about? Mainly, I think, what movie stars are like off the screen. Are they some special type of divine handiwork or are they just people who have headaches, bite their nails and get nicotine stains on

their fingers? Is the handsome hero an insulting heel, an empty-headed clothes rack or a swell guy you'd like to ask home for dinner?

Is the feminine star a baggyeyed witch without her camouflage of plaster cosmetics? Or a sincere, charming soul you'd be glad to have for a cousin?

And what about those false-

## COLOMBIA TEST CASE LIGHTS NAZI PROBLEM

trian-born Peter Paul von Bauer, airline in South America, are be-Nazi Germany.

Bauer, who came to Colombia a quarter-century ago and established the Scadta airlines, extended his air operations to virtually all parts of the country. German pilots and mechanics manned and maintained the cartographers laid out airfields. Some of Scadta's prospective air-

fields seemed economically sense-

who were preoccupied with the defense of the Panama Canal and Scadta's air-routes to this vital Scadta's establishment.

Patterson Member Colombia, in the interests of hemispheric defense, solved the mili-

tary problem of the Scadta setup by nationalizing the airline. North Americans and Colombians replaced the German personnel. Although Bauer lost control of his airline he managed to retain an interest in its successor, Aerovias Nacionales de Colombia, better known as Avianca. Today he

still ranks as one of the largest minority stockholders.
