

Parmer Likes Smith, Nixes Referendums

Voting Lighter Than Expected

Voters totaling 1726 marked their ballots in the Democratic Primary election in Parmer County Saturday, giving the nod to Preston Smith for governor and showing one-sided opinions against all three referendums.

The turnout was much lighter than had been expected since well over 3,000 persons had registered to vote in the county this year.

In the county's only contested race, Guy Cox, the incumbent, was named the Democratic nominee over Neil Stewart in Precinct No. 3 (Farwell and Oklahoma Lane.)

Cox received a total of 356 votes to 179 for Stewart. Cox will now meet the Republican nominee, R. L. (Bob) Jones in the general election in November.

In the Farwell box, the vote totals were 256 for Cox and 132 for Stewart. Cox also led at Oklahoma Lane, 71-42, and in the absentee ballots, 29-5.

Smith led the candidates for the Democratic nomination for governor with 701 votes in the county. He also led all individual boxes in the county.

Next in line in this county was Waggoner Carr's 389. In third spot was John Hill's 149, followed by Don Yarborough with 138, Dolph Briscoe with 129, Eugene Locke 102, Ed Whittenburg 71, Pat O'Daniel 65, Mrs. Jackeworth three and Veloz none.

Parmer County's trend was not set throughout the state, however, since Don Yarborough emerged with the most votes over Preston Smith. They will meet in a run-off election June 1, the winner of which will campaign against Paul Eggers, the Republican choice.

Parmer County turned thumbs down on liquor by the drink, 394 for, 1,209 against. Again the state trend did not match this county's, since the

referendum, or opinion of the people, was favorable after all votes were counted. Large city votes were reported to have turned the tide.

The voters in this county did, however, go along with the state in opposing pari-mutuel wagering along with horse racing, and control of wholesale and retail milk prices.

Horse racing was vetoed in Parmer County 397 for, 1202 against. In the milk referendum 298 voted for controls, 1149 against in the county.

Like the state, there was no doubt whom the Demos wanted for their lieutenant governor nominee, Ben Barnes walked off with 1282 Parmer votes, compared to 223 for Smith and 85 for Gladden.

Parmer County favored Robert S. Calvert for Comptroller over Dallas Blankenship 1151 to 152; Matt Davis over Sears McGee for Supreme Court, Place 1, 867 to 398; James G. Denton over Tom Reavley for Supreme Court, Place 2, 712 to 538.

A complete tabulation form showing voting by precincts in Parmer County appears in this week's issue.

Demos Meet Saturday

Parmer County's Democratic convention is scheduled for Saturday afternoon at 2. It will be in the courthouse in Farwell.

Nelson Welch of Friona, county chairman of the party, will preside at the session.

The convention will name four delegates to the state conven-

School Board Trustee --

Jones Defeats Norton

Melborn Jones was named to the Farwell School Board in the run-off election held last Thursday. He defeated his opponent Darrell Norton by 11 votes. Jones polled a total of 67 votes and Norton had 56 votes. 125 votes were cast.

The run-off election was necessitated when both Jones and Norton polled 73 votes each at the first trustee election on April 6. At that time, J. W.

Herington was elected to the school board.

Jones took his place on the Farwell School Board at the Monday night meeting of the Board. Herington had already met with the Board in the last regular meeting.

Heading the School Board this year as president is Donald Christian. Smokey Gast is vice-president and Harry Sheets will serve as secretary.

Lions Plan Give-Away

Texico-Farwell Lions Club is taking donations on a play day golf cart, bag, four woods, and nine irons. The items will be given away at the Little League Ball Park on May 25, at which time the Lions and Rotarians are scheduled to meet in a game.

Proceeds from the give-away will be used in fencing the Little League Ball Park.

A Merchandise Shoot is planned by the Lions Club for Sunday, May 19, beginning at 1 p.m. The shoot will be held at the "trap" north of Texico on the Stateline Road.

Winners of all gift certificates will be able to pick up their gifts at local business firms, according to James Craig.

Annual Varieties Set

Annual Wolverine Variety Show at Texico school has been set for tonight (Friday, May 10) at the high school auditorium, at 8 p.m., according to Mrs. Lillian Allman, journalism instructor in the school and sponsor of the annual production.

Highlighting the show as in past years will be the coronation of "most beautiful girl and most handsome boy" in the school. Candidates have been selected from popular vote of the students and judged by an

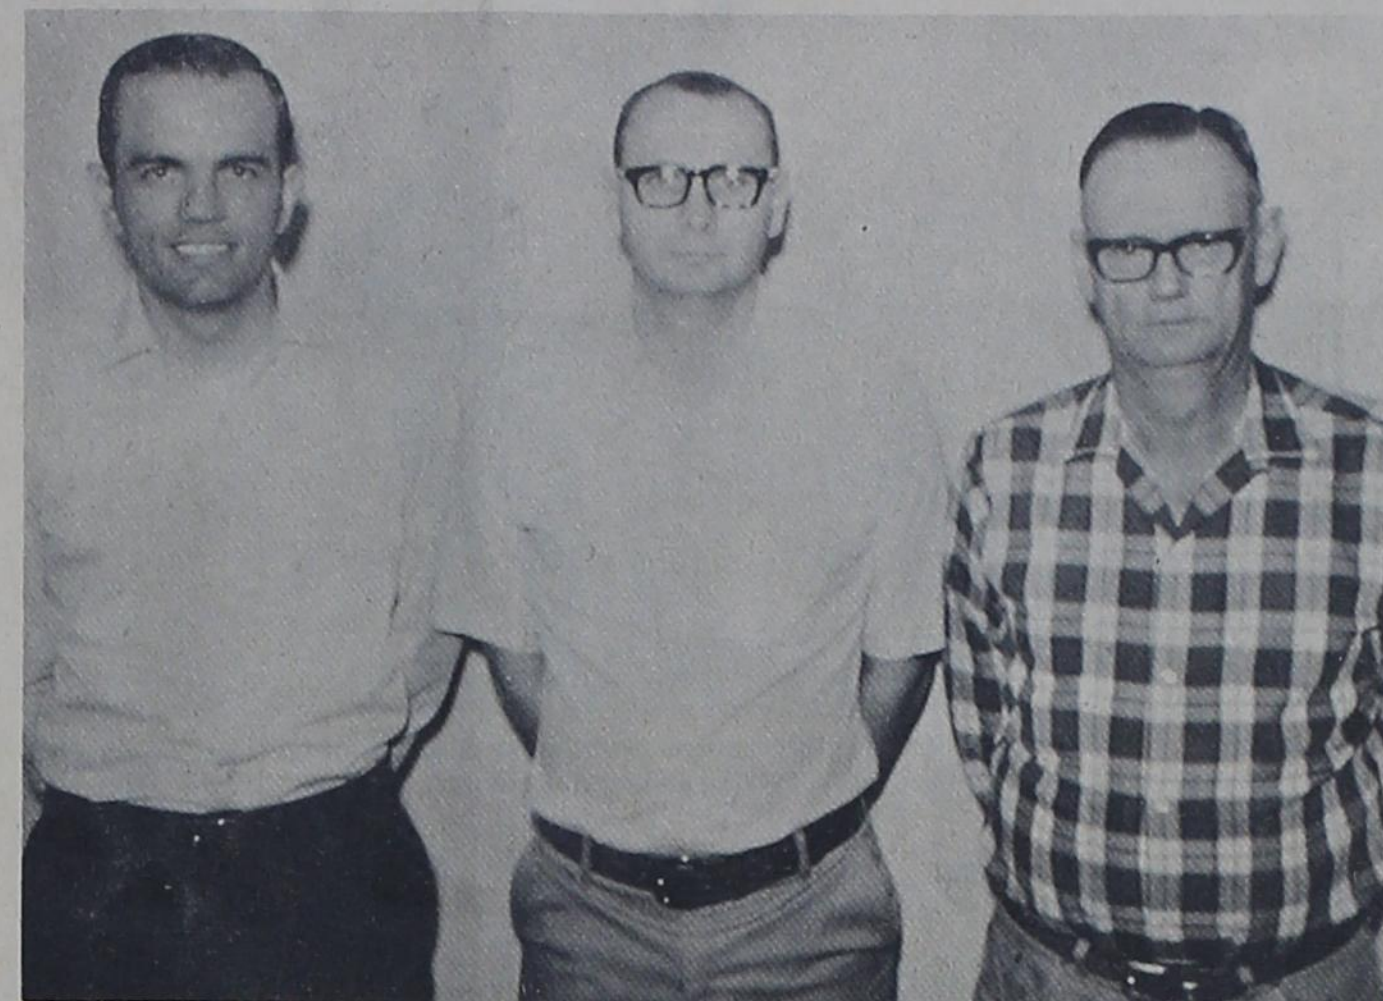

and Kristy Taylor, will be featured on the program. Skits include Betty's Boyfriends, The Losing Battle, Number Please, and Hitch Hiking to Hollywood. A dramatic reading will also be featured.

Price of admission is 75¢ for adults, 50¢ for high school students, and 25¢ for grade school students.

impartial judge from pictures submitted by candidates. Candidates from the various clubs and organizations include Science Club-Janet Wilson and

Roddy Pearce; FHA-Glenda Kelley and Butch Chumley; OEA-Carla Sears and Rickey Stanley; Chorus-Loyce Brown and Mark Nation; FFA-Brenda Sims and Danny Williamson; Pep Club-Jan Chumley and Lynn Hughes; and Student Council-Hilda Rojas and Rex Richardson.

The Michelles, a musical group from Farwell Junior High School, whose members are Vicki Smart, Alice Coffman, Linda Tuttle, Leandra Chadwick, Jana Bass, Lynne White

SOIL CONSERVATION SERVICE STAFF for Parmer County, Left to right, Jerry Isbell, Work Unit Conservationist; Glenn Phillips, Soil Conservationist; Woodrow Fielder, Conservation Technician. They invite area farmers to visit the SCS office or call for assistance with conservation problems.

Dog Clinic Set May 22

An animal clinic for dogs will be held at Farwell City Hall Wednesday, May 22, from 3-6 p.m. All area residents are reminded that they must have their animals inoculated against rabies and buy a city dog license to keep the animals in town. In addition, all animals must be confined on their owner's premises.

A man has been employed by the city for the purpose of picking up animals which are found running loose in the town. The animals will be picked up, the owner notified if the animal is wearing a tag, and kept for 24 hours, after which time the impounded animal will be disposed of.

In recent weeks, dogs have been creating a nuisance by running in packs in the area. Yards and gardens have been damaged and one resident reports the destruction of several rabbits, at his home when a hutch was torn open by a pack of dogs. "These things must be stopped," say city officials in both Texico and Farwell, "and for this reason the anti-ordinance in both towns will be strictly enforced from this date."

NOTICE

James Craig, who is heading the summer recreation program for Texico-Farwell Little League, states that the program is in need of two women coaches. Any woman who is interested in coaching a baseball team or working with young girls is invited to contact Craig at his home or at Farwell Junior High School.

Open House Set At Texico

Open house at the new building at Texico School has been set for May 14, 8 p.m. At that time, patrons of the school district will be able to view the new cafeteria, the agriculture workshop and the classrooms, which have been added this year.

In the cafeteria, patrons will see one of the most modern and well-equipped school cafeterias in the area. The cafeteria has capacity for some 250 persons; however, at this time tables and chairs are available for only 192 persons. The cafeteria facility boasts

walk-in freezers and refrigerators, dishwashers, electric stoves, and many other electrical appliances to make the work of preparing meals for 300 students daily much easier.

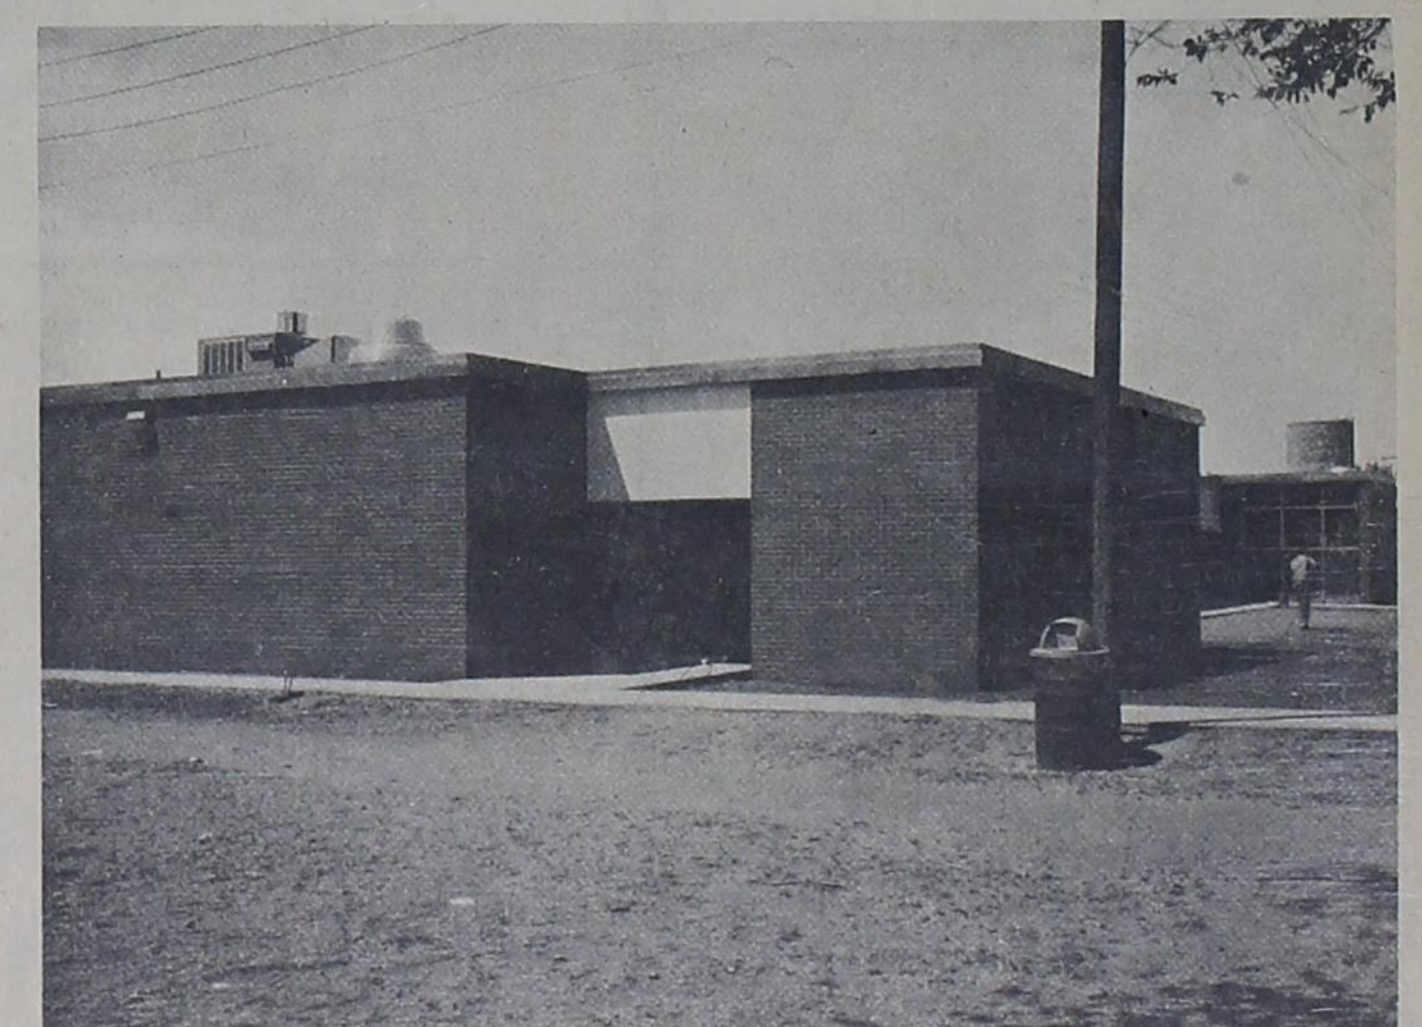

Interior of the kitchen and dishwashing rooms are of glazed brick while interior of the dining area is red brick with pastel paneling. West side of the dining area is of blue paneling.

Entire exterior of the building is red brick, and interior of the classrooms is of paneling while the workshop is of tile and paneling. Adding much to the workshop is the most modern in general shop equipment, much of which has been available at the school, and much of which has recently been purchased for the new workshop.

All of the building is lighted by fluorescent lights.

Completion of the new cafeteria, workshop and classrooms marks the third addition to the school in recent years, with a new high school building added in 1963 and several new classrooms and a library added at the school last year.

The old high school building which was condemned several years ago will be torn away in the near future, adding much to the beauty of the school facilities in Texico.

Residents of the Texico School District will be able to view the interior of this building when they attend open house of the new classrooms, workshop and cafeteria facilities which have recently been completed. Completion of the building was delayed by the steel strike last fall.

126 Ballots Cast By GOPs

Republicans held primary elections in Parmer County Saturday, and for the first time in history in Bovina, with 126 votes cast in four boxes.

Friona counted 34 votes, Lazbuddie 46, Bovina 26 and Farwell 20.

Paul Eggers walked away with the Republican nomination for governor in Parmer County, as he did over the state. He received 85 votes here, while John R. Tice got 18 and Wallace Sisk 16.

Bob Price, uncontested for Congress, 18th District, received 115.

No other contests appeared on the ballot, but candidates were approved to run for state offices.

In the liquor by the drink

referendum 31 voted for, 91 against in Parmer County.

For pari-mutuel wagering, 25 voted for, 97 against. Opinion was also voiced against milk price control, with 10 voting for, 111 against.

Meeting Democrats in the general election in November will be Douglas DeCluitt for lieutenant governor; Sproesser Wynn for attorney general; John M. Bennett, Jr. for comptroller; Manuel Sanchez for state treasurer; Millard K. Neptune for commissioner of the general land office; E. G. Schuhart, II, commissioner of agriculture; Jim Segrest, railroad commissioner; Frank Ford, state representative, 72nd District; Hugh Burdette, member, state board of education, District 18; R. L. (Bob) Jones, county commissioner, Precinct 3.

Tax Board Of Equalization Sets Meeting

Archie Tarter, Parmer County Judge, announces that the Parmer County Commissioner's Court will convene as a Board of Equalization in the County Courtroom at the courthouse in Farwell Monday, May 27, at 2 p.m.

All persons who wish to meet with the board at that time to discuss tax matters are invited to do so.

Bowling Tourney Set

Mrs. Sharon Norton, president of the local Ladies Bowling League announces that the annual City Bowling Tournament has been set for May 9-10-11 at AA Bowl. Deadline for entering the tournament is Thursday, May 9.

URELY PERSONAL

By John

I am not ashamed to admit it. I am frightened about the future of our country and about the future of education in our country. The reason I am frightened about the future of education in the United States is exemplified by the demonstrations that have taken place at Columbia University in New York City, and the attitude of supposedly knowledgeable people in regard to this lawlessness.

This attitude of "let anarchy reign" was graphically illustrated by the CBS-TV program "Face the Nation" last Sunday. The panel of Martin Agronsky and Robert Schanke of CBS News and Peter Jensen of Newsweek magazine interviewed Dr. Greyson Kirk, the president of Columbia. We realize that questions asked on this type of program do not necessarily reflect the attitudes of the persons asking the questions, but somehow, to me, the message came through that many of these adroitly phrased, leading questions did reflect to a large degree the minds of those who asked the questions.

Dr. Kirk reminded me of an aging grizzly bear being worried by a pack of nit-picking hounds. He was trying to make simple statements of fundamental truths, but the questioners would misunderstand and twist his answers and force him to repeat and repeat, lest his answers be twisted to mean something different from the obvious intent. We can say in Dr. Kirk's behalf that he did not rise to the bait of incessant worrying and say something in the heat of anger that would have compromised his position. If the questions and the method of questioning by these three men is an example of fair questioning and intelligent thought, then socialism and anarchy cannot be far behind.

We out here MUST be concerned with the thoughts and actions of "radicals" wherever the word is spoken or the action takes place. If we do not, then orderly, higher education is doomed, and as goes the course of intelligent thought, so will go the future of the nation.

The news this week has been full of the tragic airplane disaster in central Texas that took the lives of all 79 passengers and all the crew members. We noted one canard wherein a description of the plane wreckage was likened to the ruins of a train wreck. To our limited knowledge, it has been years, if ever, when a train wreck killed over 80 people at one time in this country. I have never seen such complete destruction of a passenger-carrying conveyance. To liken this to a train wreck was a gross exaggeration.

This is why many people want to ride trains; for the safety they feel in rail travel. We think it is not in the public interest for our elected officials (members of the Texas Railroad Commission) to reduce the options of public travel to where, in many cases, exposure to such risks is mandatory if a person wants to travel.

Your Farwell Chamber of Commerce is planning a Clean Up Week soon. As a prelude, all businesses will receive a letter asking them to look at their property and make plans to put it in good shape, something of which the community can be proud.

Afterthoughts to the annual FFA Father-Son outing:

Henry and Adolph Haseloff are the best barbecue cooks in the area. We have some of the best local potato salad and bean preparers in the world.

Aren't you glad you live in the Twin Cities?

Included in the program will be numbers from Guys and Dolls, Sound of Music, Gone with the Wind, and several concert and contest numbers.

The public is invited to attend the concert. There will be no admission charge.

Soil Stewardship Week May 19th - 25th

Gilbert Kaltwasser, Left, And Glenn Marsh Discuss The Program Of Fertilization Used On The Kaltwasser Farm In Oklahoma Lane.

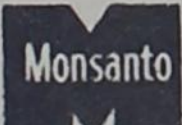

God has provided us with a vast treasury of natural resources, including the lands and forests, the rivers and oceans, and all that dwell therein. It is a universal gift to all of us for all our generations and He set no boundaries other than those imposed by sun and rain. The Lord established no "private" land nor did He ordain a "public" class. These divisions, for good and sufficient reasons, we have made ourselves. There is evidence that they have helped, rather than hindered, in meeting our obligations as stewards under God.

JOB 34:4
"Let us choose what is right; let us determine among ourselves what is good."

Now we arrive at a time in our country when it can be fairly stated as a proposition, if not as fact, that the three-quarters of our land in private ownership merits new and more careful attention. Equally, the owners — as stewards for a while of the Lord's good earth — warrant greater encouragement, wider recognition, and more positive help in their vital role.

SOIL STEWARDSHIP WEEK

MAY 19-25th

THE COUNSEL OF GOD

Truth and wisdom are elusive. We seek both, and from time to time we gain bits and pieces, but no one of us is wholly successful; no one of us is infallible. Our necessary recourse lies in a search for greater understanding, and in reliance on God's Word.

The landowner, faced with pressing responsibilities and obligations in these days of increasing concern about the care and use of resources, has special reason to seek help from sources outside himself.

In the myriad of decisions he must make each month and year — decisions that he must make either alone or in concert with his neighbors — the choices and the consequences of each are not always clear. The steward of the soil, aware of his responsibilities to his Maker, seeks the counsel of God and relies on it.

Tail Water Pit --

Conservation Of Water For Irrigation Proves Economical

V. L. Lambert, who farms the G. D. Anderson, Jr. land 20 miles north of Texico, is a firm believer in conserving water by returning waste water from irrigation wells to a pit where it is in turn used for irrigation purposes.

Lambert has found that the tail water return system is one of the most economical ways to irrigate since he is able to pump the water from a tail water pit for irrigation purposes at the rate of 1600-1800 gallons per minute for a cost of 11¢ per hour. The tail water

pit on the Lambert farm is 75'x200' and holds approximately 750,000 gallons of water.

Lambert is not only able to catch the waste water from his two irrigation wells in the pit, but has also been able to save water which came down the bar ditch from other wells by cutting a ditch to the tail water pit. In this manner he has been able to save the water from approximately six wells for irrigation purposes. When the wells are in operation, Lambert says he can produce continuously at the rate

of 1600 gallons per minute from the pit.

The eight-inch wells on the Lambert farm can produce approximately 800 gallons per minute for a cost of 34¢ per hour. Lambert has found that the tail water pit is much more economical since it eliminates the necessity of two additional wells on the farm.

Whats Cooking At Farwell School

MONDAY: chili beans with catsup, sauerkraut, crackers, cornbread, butter, onions, pickles, peaches, milk.

TUESDAY: hot wieners with mustard, macaroni and cheese, blackeyed peas, lime gelatin, bread, milk.

WEDNESDAY: Roman holiday, catsup, green beans, hominy, carrot sticks, apple cobbler, bread, milk.

THURSDAY: hamburgers, relishes, potato chips, cheese slices, cinnamon rolls, milk.

FRIDAY: chicken salad on lettuce, scalloped potatoes, buttered corn, bread, chocolate cake, milk.

HOSPITAL NOTES

Mrs. Joe Magness underwent major surgery in Clovis Memorial Hospital on Tuesday. She is described as in good condition at press time.

Mrs. Cassie Morgan who underwent major surgery at M.D. Anderson Hospital in Houston several weeks ago is still confined to the hospital where her condition is listed as satisfactory. For those who might wish to send cards or letters, her room number is 508. She is scheduled to undergo skin grafts in the near future.

Stubble Mulching Keeps Soil In Place

Stubble mulching can help keep soil in place and reduce sand and dust storm frequency and intensity. It is also one of the most adapted conservation practices for widespread application in our area.

Stubble mulching leaves as much stubble of residue producing crops such as sorghums and wheat on the surface of the ground as possible while cultivating to kill weeds. The practice accomplishes the intended purpose of protecting the soil from erosion by wind and water. Insects have not proven to be a problem in connection with the practice.

The ideal implement for stubble mulch tillage is a sweep-type blade at least 30" wide. A 6" overlap between sweeps gives a spacing between shanks of at least 24" and vertical clearance to permit stubble to pass. It is wise to use a rolling coulter ahead of the shanks.

The machine supporting the sweeps should be durable and heavy enough to stay in hard ground when the sweep settings are at level position. A power lift is of great benefit. Either toolbar mounted sweeps or field cultivators may be used. The larger the sweeps, the more effective the results in leaving residues on the surface.

When fallowing land, a good practice is to use delayed fallow which is cultivation delayed until the first crop of weeds develop in the spring following harvest. This eliminates up to 35 per cent of the expense of cultivation in comparison with the usual ways of fallowing and it produces equally high yields.

The undisturbed stubble, plus any fall weed growth, provides the best possible protection against erosion during the blow season and gives the soil a re-

markably receptive condition to moisture.

When tilling the land after harvest, the first tillage should be made the deepest, and successive cultivations should be shallower to avoid a plowsole formation. Tillage of soil at a constant depth when wet smears soil particles together, destroys air space and inhibits oxygen replenishment in the soil. Points of the sweeps should be pointed slightly downward to hold the plow in the ground only as a last resort. Extremely hard ground may warrant a setting to keep sweeps plowing instead of riding out. Rains do not generally resist weeds unless they occur within a 24-hour period after working.

In preparing row crop land, the stubble mulch sweep machine can be used for pre-planting operations up to the time the crop is listed.

Adaptations of stubble mulching have been used in other ways. Crops aftermath including weeds and sorghums or wheat stubble has been managed

Chiseling Sorghum Stubble -- The crop is rotated each year with cotton on this farm. The stubble being chiseled is two inches tall. This is being done on the Jimmie Cockerham farm located north of Bovina.

by use of stalk cutters, particularly the power driven type. This leaves a layer of vegetative material on the surface. This is also a very good procedure when growing redtop cane for soil improving purposes.

(Continued To Page 7)

To The Voters In Commissioners Precinct Number 3

I wish to thank you for your influence and votes in the Primary Election Saturday, and I will continue to do the best possible in the interest of Precinct 3 and Parmer County.

I will appreciate your continued support for the General Election in November.

Thanks

Guy Cox

THIS PIPELINE WAS BUILT BY THE ROMANS AND SERVED FOR 2,000 YEARS

This photo, from the Smithsonian Institute in Washington D. C., shows a section of the original aqueduct that served the water needs of the conquered city of Cologne, Germany. It was constructed in 80 A.D. by the engineers of Fabius Sabinus Titus, Emperor of Rome. The aqueduct extended 56 miles underground between Cologne, and Eiffel and served as the main artery for the Cologne water supply until the late 1920's.

THIS PIPELINE IS EVEN MORE DEPENDABLE !!

Because of modern materials and manufacturing techniques, Gifford-Hill-Western's LOCK-SEAL provides an even more dependable underground pipeline. The close tolerance design makes the pipe more suitable, and joint flexibility eliminates the effect of expansion and contraction due to soil conditions and temperatures. By combining a superior product with modern day design and installation know-how, you have an underground irrigation system that serves dependable year after year ... generation after generation. LOCK-SEAL is the product, Gifford-Hill-Western is the Company ... depend on them!

Soil Conservationist Says --

Know Your Land

A study of your land and its capability classes will help determine proper land use and treatment needs, stated Glenn Phillips, Soil Conservationist in the Parmer County Soil Conservation office in Friona. The points which determine soil classes are its different characteristics.

Texture, which we all generally know, refers to the size of the soil particles and is rated as course, medium, fine or sands, loams or clays.

Soil Depth is the amount of soil which plant roots will penetrate. Depth of soil is classed as deep (more than 36 inches), moderate (20-36 inches), shallow (less than ten inches).

Slope is important because of its effect on runoff, erosion hazard and farm machinery.

Slope is measured in number of feet of fall per 100 linear feet, or may be expressed as nearly level (less than one per cent fall), gently sloping (one to three per cent fall), strongly sloping (three to five per cent fall), and very steep (more than 12 per cent fall).

Wetness Hazard is the presence of water within the root zone which interferes with the growth of crops. Proper drainage can eliminate this hazard. In Parmer County the only problem of this nature is the playa lakes.

Erosion is the detachment and movement of soil materials by water or wind, and is classified as none, slight, moderate, severe, and very severe. Erosion can be controlled by preventing raindrops and wind

MOTHER, QUEEN OF MY HEART -- From the time of ancient Greece, to Medieval England, to the present generation, mothers of the United States and many other lands are honored with gifts and flowers, and a special day is set aside each year for this purpose. Most times a smile of love, a word of appreciation and contentment is enough, as evidenced by Mrs. Chester Collinsworth, who accepts these tokens from her sons, Craig, 15 months, and Kyle, four years of age.

4-H Youths Aid Nation's Conservation Effort

What is conservation? If 10 people were asked the question, in all probability there would be 10 different answers.

But if they were asked Who is responsible for conservation of the nation's natural resources, they would undoubtedly answer, "Everyone!" And they would be right.

Conservation is everyone's business, even youngsters. Proof of this is in the national 4-H Conservation of Natural Resources program which involves parents, children, educators, and conservation specialists. The 4-H members carry out projects in soil and water conservation, wildlife preservation, reforestation, and anti-pollution.

The farm boy works to prevent soil erosion, water contamination, forest fires, drought and damage to crops and livestock. This boy wants to learn about soil testing, irrigation, land management, weed and insect control to insure profitable farming operations.

Urban 4-H'ers are concerned with protecting towns and cities from air and water pollution, blight and deterioration. They want to enjoy fishing and swimming in recreational areas where they can catch a prize fish instead of an old boot, or dive into a clean lake instead of one contaminated with rubbish or harmful bacteria.

All 4-H boys and girls want to enjoy the beauty of their own home grounds, parks, forests and countryside. The youths highlight conservation through club activities, community action programs and individual projects. They give talks, appear on television and radio, make exhibits and give out conservation information.

Among the nation's leading 4-H conservationists last year was a teenage boy whose project included raising pheasants for the New Jersey State Division of Fish and Game in

Visitors in the home of Mrs. and Mrs. Clarence Johnson Saturday were their son, Errol Johnson, West Texas State University; and Mmes. Deborah Smith, Portales; Larry Stutts, Clovis; Lawrence Schoendrock and daughter, Carol, of Leveland. All of the ladies attended the shower for Joyce Bass, bride-elect of Errol Johnson.

connection with wildlife preservation. Another lad perfected a conservation demonstration for television viewers in the West Central part of Colorado. Both boys were involved in county-wide conservation activities.

The 4-H Conservation club members now exceed a quarter million. They are guided and assisted in their individual projects by adult leaders, county extension agents and other qualified persons. Parents often team up with their offspring in tackling the large, long-range projects.

Another participator is John Deere, the 4-H Conservation program sponsor. For the fifth straight year, John Deere has provided funds for county, state and national awards given annually to 4-H'ers who have completed the best conservation projects in the three categories of competition.

The highest award is the \$600 national scholarship presented to six national champions. State winners are delegates to the National 4-H Congress, in Chicago, and county winners receive the conservation medal.

Switchgrass pasture that has had good pasture management. Pasture is on Tom Caldwell farm south of Bovina.

Land in this picture, somewhere in Parmer County, needs to be changed to another use.

This cotton land is put into high productivity by a good irrigation program.

Tail Water Pit Saves On Pumping Cost

Jarrell Wright has recently constructed an irrigation tail water recovery system; saving on pumping cost.

When irrigation water flows through a field, it picks up fertilizer and top soil. When tail water is returned to the field,

Jarrell Wright inspects his tail water return installation on the A. M. English farm west of Friona. This pit catches water from his farm and returns it through a plastic pipeline to the field for irrigation.

from striking the unprotected bare ground with adequate plant material on the soil surface.

Soil Structure refers to the physical characteristics of the soil as to the tendency of individual soil particles to cling together in aggregates or crumbs. Good structure is friable or crumbly while poor structure is tight soil that puddles and crusts.

Permeability affects the supply of air, moisture and soil nutrients available to plants. Permanent characteristics, such as texture and structure, determine the permeability rates which are from very slow (in heavy clay or hardpans), to rapid in coarse sands or gravel sand layers.

It recirculated most of the fertilizer and top soil back on the field.

Several farmers think that water from a tail water system is better for their crops because of the warmer temperatures. The tail water from 40 acres of irrigated crops on Wright's farm will irrigate 13 acres of crop. The cost of the pit, pump and pipe line to put tail water back in his system was practical and economical.

The Soil Conservation Service in Friona can make recommendations on pit size for individual farms. Where the recovered tail water is not put back in the same system, the pit size should be large enough to complete one irrigation set.

Uncle Ray's "Hot Air"

You may be on the right track, but if you just sit there you'll be run over.

"Was Washington as honest as they say?" the lad asked his father.

"Why of course, Sonny," was the reply.

"Then why do they close the banks on his birthday?"

Save enough on Uncle Ray's Big Values and Low Prices to Bank Regularly.

SOIL STEWARDSHIP WEEK

MAY 19th - 25th

THE CHALLENGE OF

INCREASING DEMANDS GENESIS 9:1

"And God blessed Noah and his sons, and said to them be fruitful and multiply, and fill the earth."

The wealth of natural resources entrusted to us by our Maker has, from our beginnings as a nation, undergirded our growth. Always vital, it now becomes more so.

Extraordinary population growth at home and abroad provides substance for mounting demands on the land — and on the resources associated with land. The forecasts of human increase project figures of such magnitude that they are hard to comprehend.

During the next 35 years, the population of North America is expected to increase by 64 percent, to 350 million; Latin America by 157 percent, to 630 million; Europe by 15 percent, to 780 million; Africa by 151 percent, to 775 million; and Asia by 89 percent, to 3,400,000,000. The total number of people on our planet is expected to rise to six billion by the year 2000 — an increase of 2,900,000,000 in just 35 years.

At home, more Americans will want more products of the land more often. Food, which has been in "surplus," may never again be in that category. Nevertheless, all prospects indicate that we can increase food production to meet our domestic needs for the foreseeable future. With good stewardship, we can produce more per-acre and we can farm more land more intensively.

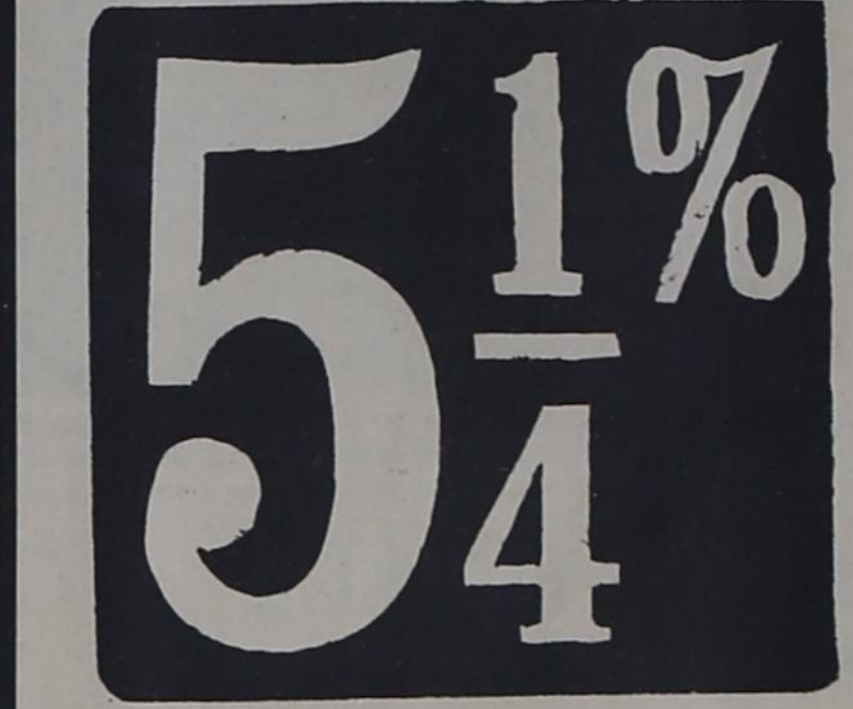

WE MUST ALL WORK TOGETHER TO KEEP OUR NATION THE RICHEST ON EARTH

Diana Camp, Jackie Porter Exchange Wedding Vows

MR. AND MRS. JACKIE PORTER

Diana Gail Camp, daughter of Mr. and Mrs. D. B. Camp of Levelland, became the bride of Jackie Lee Porter, Levelland, son of Mr. and Mrs. H. M. Porter of Brownfield, at the home of Mr. and Mrs. Burl Ford Friday, May 3, Rev. J. L. Bass read the double ring service. The bride is a sister of Mrs. Burl Ford.

Given in marriage by her father, the bride chose a street length dress of white lace fashioned with bell sleeves, rolled collar and an A-line skirt over white peau de soie. She wore a yellow orchid corsage.

Mrs. Ruth Adaire of Levelland was matron of honor and David Brown, also of Levelland, served as bestman.

Following the exchange of vows, cake and punch, in the bride's chosen colors, yellow and white, were served to those attending. Out of town guests were Mr. and Mrs. D. B. Camp, Sr., D. B. Camp, Jr., Mr. and Mrs. David Brown, and Mrs. Ruth Adaire and son, Larry, all of Levelland.

For a wedding trip to points in south Texas, Mrs. Porter

wore a yellow whipped cream shift dress, featuring a self ruffle.

The bride and groom are both employed by Pan American Oil Company of Levelland and will make their home in Levelland.

Pink And White Highlights Bridal Shower For Joyce Bass

A pink and white color scheme highlighted the bridal shower for Joyce Bass, bride-elect of Errol Johnson, at Farwell First Baptist Church Saturday afternoon. Hostesses for the bridal courtesies were Mmes. Alvin Mace, James Patrick, W. M. Roberts, Walter Kaltwasser, Dick Gerles, Don Gerles, Bill Craft, Joel Tankersley, Asa Smith, Claude Coffer, Charlie Hromas, and True Bell.

Serving table was laid with a white lace tablecloth and centered by an arrangement of pink flowers flanked by pink tapers in milk glass candleholders. White cake squares iced in white and decorated with

Mrs. Liethen Is Chapter Outstanding Girl

Theta Rho Chapter of ESA Sorority held its annual Founders Day program and Mother's Day tea at Fellowship Hall of Hamlin Memorial Methodist Church Sunday afternoon. Entertainment was provided by "The Michelles," Linda Suttle, Jana Bass, Lynne White, Alice Coffman, Kristy Taylor, Leandra Chadwick and Vickie Smart. Welcome was extended to the guests by Mrs. Georgia Lee Rundell, president, who also recognized the outgoing officers and the newly elected officers of the chapter.

Mrs. Rosa Roberts, Educational Director of the Chapter, was presented with the Golden Chain award recently received at the state convention and was also presented with a Mother's Day gift from the chapter. Mrs. JoAnn Liethen was presented with a trophy denoting that she had been named "outstanding girl" of the local chapter for the year and was also presented with a golden ESA Charm by Mrs. Rosa Roberts who made the award.

The tea table was centered by a floral arrangement featuring snapdragons, and daisies in the ESA colors. Napkins carried out the ESA colors and crystal and silver table appointments were used. Lemon and chocolate squares and sandtarts were served with punch.

Guests attending the social were Mmes. Fern Castor, Capitola Crume, Jenoyce Ford, Carrie Christian, T. L. Kent, Mana Whately, Pauline Williams, Pearl Gerles, Ray Mears, Lillie Partlow, Dickie Magness, Vada Smith, Dorothy Quickel, Jean Prince, Irene Jones, Irene Tarter, Beulah

OUTSTANDING GIRL -- Mrs. JoAnn Liethen, right, accepts a trophy and gold ESA charm from Mrs. Rosa Roberts, Educational Director of Theta Rho Chapter of the ESA Sorority, after being named outstanding girl of the local chapter for the past year.

Williams, Rochelle Christian, Jeanne Graham, Dozier and Green. Members in attendance were Mmes. Rosa Roberts, Dickie Chandler, Nell Walling, Donna Jordan, Ginger Crume,

Maxine Williams, Lillie Christian, Sue Kirkland, Dardenella Helton, Joann Getz, JoAnn Liethen, LaMoin Williams, Linda Gerles, Georgia Lee Rundell, and Phyllis Herington.

Seniors Feted With Chicken Fry

Members of Farwell senior class were honorees for an outdoor chicken fry at the home of Mr. and Mrs. James Ensor Tuesday night. Chicken was fried in a large pot at the pond on the Ensor farm. Girls from the class brought salads and desserts to complete the meal.

Following the meal, outdoor games were played including baseball, and horseshoe pitching, and class members ended the evening with a hayride.

Class members attending the social were Deb Hargrove, Nelda Winegeart, Roberta and Rosetta Chisman, Patsy Wilhite,

Rose Agullera, Kandy Meeks, Carolyn Atkins, Carolyn Langford, Jeanne Williams, Jackie McGill, Connie Phillips, Leslie Cooper, Lawrence Bryant, LeWay Bradshaw, Warlick Dollar, Mike Doshier, Bruce McCuan, Vickie Kaltwasser, Sharon Ensor, Darrell Hanna and Greg Martin.

Others attending were Messrs. and Mmes. Elmer Langford, Elmer Hargrove, James Ensor, Jace, Josh, Sandra, and Dennis, and Mrs. Lena Kelso, Lawrence Cooper, and Gano Wilson.

Bride-Elect Feted At Lingerie Shower

Sydney Bell, bride-elect of Bobby Chadwick, was honoree for a lingerie shower in the home of Marsha Lovelace last Thursday afternoon. Assisting with hostess duties were Mmes. Ann Lovelace and Jeanne Garner, and Sheila Garner, Debra Garner, Melody Roberts, and Jana St. Clair.

Each guest was given a pencil and paper and instructed to make as many words from the word "marriage" as possible. Following the game, gifts were opened by the honoree, assisted by her mother, Mrs. True Bell, and mother of the groom-elect, Mrs. Markum Chadwick.

Chips, dips and soft drinks were served to Meredith Anderson, Ruth Anne Blankenship, June Routon, Beverly Jones, Cheryl Kaltwasser, Cheryl Atkins, Tina Rundell, Cathy Atkins, Vickie Blain, the host-

esses, and Mrs. Chadwick and Mrs. Bell. Several girls who were unable to attend sent gifts.

Basketball Players Feted At Backyard Cookout

Coach Gano Wilson feted the senior girls basketball players with a cookout in the backyard of his home last Thursday night. Steaks were grilled over an outdoor fire and served by the coach and Miss Paula Winegeart.

Attending the social were Deb Hargrove, Patsy Wilhite, Nelda Winegeart, Sharon Ensor, Roberta and Rosetta Chisman, Coach Wilson and Miss Paula Winegeart. Kandy Meeks was the only senior basketball player unable to attend.

Shower Reminder

Friends are reminded of the shower for Miss Alicia Bournon, bride-elect of Gerald Bailey of Clovis, on Monday evening, May 13, 8 p.m., at the Farwell Country Club. Hostesses for the social are Mmes. Bill Meeks, C. L. Mahaney, C. M. Meeks, W. E. Martin, D. Smith Day, Dwain Nance, Bobbie Sewell, and Preston Martin.

Shower Set

Miss Mary Jo Malaise, bride-elect of Scottie Rundell, will be honored with a bridal shower from 3 to 5 p.m. Saturday in the Community Room of First State Bank of Bovina.

The couple will exchange wedding vows at the First Baptist Church in Bovina on May 25.

Hostesses for the shower will be Mmes. Richard Vaughn, Earl Dean Boyd, Jack Patterson, D. T. King, M. H. Carson, H. R. Denney, Allen Cumpston, Arnold Hromas, Alfred Mills, B. L. Marshall, James Roach, Vernon Ward, Lloyd Killough and J. D. Stevens.

Visit In Farmington

Mrs. Harvey Hudnall, accompanied by Mr. and Mrs. Claud Heath of Lazbuddie and Mrs. Robert Harmon and children, Brenda and Bobby, from Portales spent last week visiting in Farmington with Janell Hudnall, daughter of the local woman and granddaughter of the Heaths.

Steven Lane

Usrey Born Friday

Mr. and Mrs. Gene Usrey of Portales announce the birth of a second son, Steven Lane, at Roosevelt General Hospital in Portales Friday, May 3. The infant weighed 8 lb. 3 1/2 oz. at birth.

Other child in the Usrey family is Mark, two years of age.

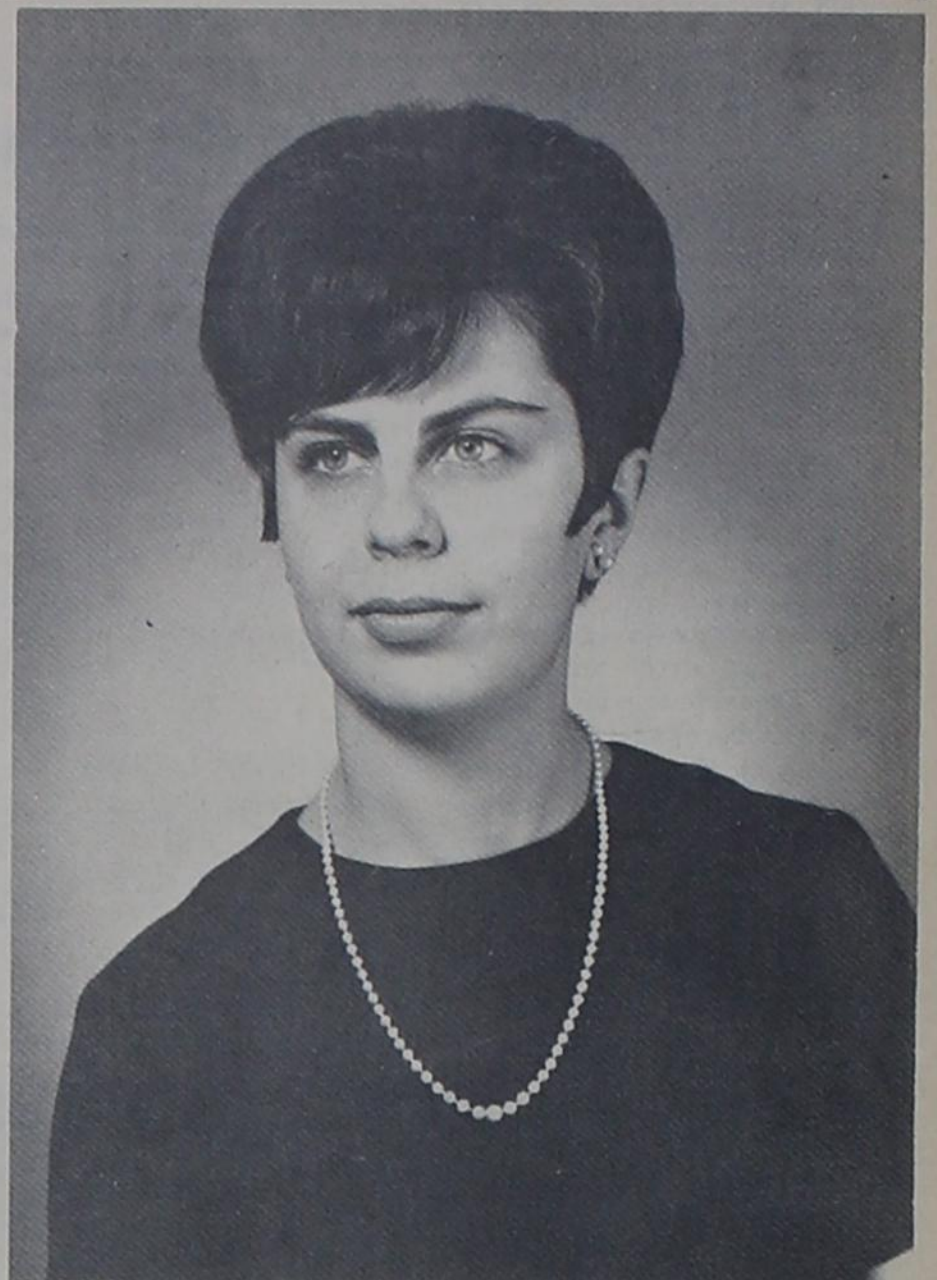

Grandparents of the new arrival are Mr. and Mrs. Elmer Teel, Texico, and Mr. and Mrs. Doyle Usrey of Portales.

A Son For Joe VanZandt

Word was received in Farwell this week of the birth of a son on April 28 to Mr. and Mrs. Joe VanZandt of Dumas. The little boy, third child for the couple, has been named Damon Mark. He weighed 8 lb. 7 oz. on arrival.

Other children in the family are Diana, eight years of age, and Jana, five years of age.

VanZandt was formerly Parmer County Agricultural Agent and is now serving as Moore County Agricultural Agent.

NUPTIALS TO BE SPOKEN -- Mr. and Mrs. Andrew L. Bareham of Baltimore, Maryland announce the approaching marriage of their daughter, Janet Louise, to Joe W. Teel, Richmond, Va. son of Mr. and Mrs. Eimer Teel of Texico. Vows will be exchanged in Baltimore on June 15.

Mrs. Guess Gives Devotional

The home of Mrs. Ollie Carpenter was scene for the Monday night meeting of Ruth Sunday School Class, Mrs. M. A. Snider, Sr. was co-hostess.

Opening prayer was led by Mrs. Dorothy Eason and devotional "Do not judge too hard" was given by Mrs. Lillian Guess. During the business meeting conducted by Mrs. Pansy Ross, plans were made for a new project to begin in the near future. Strawberry shortcake was served with tea or coffee to Mmes. Alvenia Cox, Ethel Harding, Pansy Ross, Grace Snider, True Bell, Lillie Hendrix, Viola Birchfield, Alma Boss, Lillian Guess, Mary Brannon, Ollie Utsman, Fairy Stovall, Lela Douglas and one guest, Lillie Partlow.

45 Participate, 8 Clubs Represented --

Ladies Golf Tournament Successful

The May 1 Ladies Golf Tournament at Farwell Country Club has been declared a huge success by Betsy Stone, tournament chairman. Some 45 ladies participated in the tournament and 16 others played bridge during the day. Coffee and doughnuts were served prior to tee-off time and a luncheon was served following conclusion of the tourney.

Mrs. Stone expressed thanks to each lady from the Country Club Association who assisted in preparing food for the meal and who assisted in various other ways to make the tournament so successful. She also expressed thanks to Security State Bank and Wade's Sporting Goods store for door prizes; and to Citizen's Bank of Texico for the favors presented to guests; and to Elmer Hargrove,

Leon Langford and Walter Hughes, for their assistance in preparations for the tournament. "It was through the efforts of these three men that the tournament went so smoothly," stated Mrs. Stone.

Medalist for the tournament was Claudia Nunley from Amarillo Tascosa Club with a score of 89. Placing second in the Championship flight was Gail Kenyon from Colonial Park Club in Clovis. Mildred Neill from Canyon City Club was third in the Championship flight.

First flight winners were first, Jody Johnson, Colonial Park; second, V. A. Allen, Canyon City Club; third, Helen Earney, Colonial Park.

Anna Marie Crook, Colonial Park, was first place winner in

second flight; Ernestine Harp, Canyon, was second; and Polly Green, Clovis Country Club, was third.

Third flight winners included Sharron Norton, Farwell, first; Nadine Bell, Colonial Park, second; and Mary Grindy, Colonial Park, third.

Receiving door prizes were Zola Harp and Lynn Kimbrough.

Eight clubs were represented at the tournament, including Canyon, Tascosa - Amarillo; Clovis Country Club, Colonial Park-Clovis, Cannon AFB, Tucumcari, Portales and Farwell.

First place winner of the bridge tournament was Sandy Ware of Bovina. Geneva Farmer of Texico was second place winner, and Beulah Williams of Farwell received low score prize.

BIRTHDAY GIRL -- Shannon Field, daughter of Mr. and Mrs. Max Field, celebrated her second birthday on May 8. The birthday girl is the granddaughter of Mr. and Mrs. Billy Field, formerly of Farwell now living in Edwards, Mo., and Mrs. Billie Bayless of Muleshoe.

Visit In Whiteside Home

Mr. and Mrs. Francis Whitesides and daughter, Gaynell, of Borger spent the weekend visiting in the home of Mr. and Mrs. Bill Whitesides and children, Guy and Ruth Anne. The Francis Whitesides were on the first leg of a trip which will take them to Austin, San Antonio to visit the HemisFair, and to the coastal region of Texas.

Brings Program To Faith Class

Faith Sunday School Class of Farwell First Baptist Church met in the home of Mrs. Vernon Scott Monday night with Mrs. Caroline Anderson as special guest. Mrs. Anderson brought a program on the church library and showed several of the books which are available for use of those who wish to avail themselves of the opportunity.

Gleaners Buy Party Dishes For Church

Gleaners Sunday School Class met at the home of Mrs. Valeta Roberts Monday evening. Devotional was given by Mrs. James O. Patrick who used Matthew 6:34 as basis for her discussion. Opening prayer was given by Mrs. Pauline Castleberry.

Plans were made to buy ad-

NURSERY NEWS

By Alvin Woodburn
Garden Center Nursery
Clovis, N.M.

This week I would like to point out some of the helps, aids, and benefits of the modern methods and practices of gardening. The person that figured putting trees and other plants into containers in order that they might be set out any time of the year did more to help us than any other. The plants will not actually flourish and do as well as they would if planted in fertile soil, but they will do all right until we can plant them when we want. Conditions, before container stock was available, made us plant only during a short time of year. The pace now dictates that it could be to our advantage to move into another house at other times of the year, and see no reason why we can not have a yard now instead of waiting until some time in the future.

Another boon to the gardener is the great progress made in the small bedders or bedding plants. In effect, it adds just about a season to some of the plants that we like to enjoy. The old method of waiting until

the correct time to plant the seed outside, and then wait until the time for the plants to bloom, would take most of the season and not leave us any to enjoy. The advance in chemicals that has been made is also a definite help in that there is a chemical that will help us in just about any undertaking that we choose to pursue.

All of this adds up to the fact that we can have a very pleasant surrounding if we will be prudent, and careful with our selection, and follow a definite plan. There is one thing that nature will not tolerate, and that is haphazard or misfits. Maybe we sometimes think nature is almost too ruthless in its methods but at the same time we must realize that our short span here is nothing compared to the time to be spent. By that reason, nature must produce only the best, and where we can adapt or help a plant to fit our need or want, is where we will receive the enjoyment.

One man said that he hasn't had time to do anything else as he was still trying to set the timing device on "Four O'Clocks" to match our daylight time.

Three Attend GA Queen's Court

Three members of Texico First Baptist Church GA organization were in Albuquerque over the weekend to attend the New Mexico GA Queen's Court. Highlighting the meeting was a banquet Saturday night.

Attending the meeting from the Texico church, the only

church in the Plains Association represented at the state meeting, were Kathy Lockhart, Cheryl Boling and Connie Autrey. They were accompanied by Mrs. Frances Boling.

The group returned to Texico on Sunday.

Attend Retirement Dinner In Levelland

Mr. and Mrs. Gil Patschke were guests at a dinner in Levelland last Thursday honoring L. F. Rawson, who is retiring as school principal in Levelland. Mrs. Patschke had formerly taught with Rawson and many of the other guests,

many of whom were former teachers in the school and some who are still teaching in the school.

While their parents attended the dinner, Susan and Nancy Patschke visited with friends in Levelland.

You can make air 20 degrees cooler with a wet gunny sack and a fan.

- You won't be able to control the temperature. Then why spend the extra money it costs to install a gas central air conditioning system?
- You won't be able to control humidity. Because you just might want the things an evaporative system doesn't offer:
- You won't clean the air of grit and pollens. A unit that's designed to last as long as your house.
- You won't have adequate ventilation. A command of temperature and humidity.
- You won't have a permanent system by any means. A climate that's good for your health and disposition.
- You won't necessarily feel more comfortable. But you will have the pleasure of seeing the temperature drop. A system that's engineered, installed and serviced by Southern Union specialists.
- That, essentially, is the reward an evaporative cooling system offers. Find out how little extra it costs to do the job right.
- And for some people, that's enough. Southern Union Gas Company

If you want the job done right do it with gas.

Baseball --

Wins District, Regional

Farwell Steer baseball team won the district title and also the regional title this year. Leading batter for the season was Greg Hargrove with a .400 average. Danny Prince led in runs batted in with 15 to his credit, while Dean Stovall was leading pitcher with a 5-0 record for the season.

Last week, Farwell took a win from Bovina 9-3 on Tuesday, and a second win from Silverton 1-0 on Friday. Winning pitcher for the Bovina game was Dean Stovall, and Danny Prince had 4 for 4. Stovall did a repeat performance in the pitching department on Friday. However, highlight of the game came on a squeeze play by Danny Prince when Greg Hargrove came home for the winning run.

Danny Prince led in stolen bases for the year with six to his credit, followed by Everardo Arce who had five and Kyle Sheets with four. Batting above .300 were Danny Prince, .393; J. R. Sewell, .333; Dean

Stovall, .312; Lawrence Bryant, .364; and Everardo Arce, .305. Players with better than a .200 batting average include Kyle Sheets, Robin Mahaney, Dennis Ensor, Greg Meeks, and Cecil Bowery.

Visit In Edd Autrey Home

Mrs. Sharon Hampton and son, Wayne, of Gulfport, Miss., are visiting in the home of her parents, Mr. and Mrs. Edd Autrey and Ronnie. Her husband is presently serving in Vietnam with the Navy Seabees.

Accompanying Mrs. Hampton to Texico was Mrs. Gerald Brookshire who went from Lubbock via plane to Hawaii for a visit with her husband who is also serving in Vietnam.

LOCAL

Sheri Davis of Lubbock spent the past weekend visiting in the home of Mr. and Mrs. Peyton Ramey.

Irrigation pipeline being installed on Reagan Looney farm at Bovina. This line is being installed to conserve irrigation water and transport water from the well to the field.

Mrs. Billie Blain and children, Vickie, Kent, Karyn, and Shana, accompanied by Jerry Don Utsman, were in Amarillo

over the weekend to visit in the home of Mr. and Mrs. Gary Earl Blain. Karyn Blain remained to spend a week with Mr. and Mrs. Gary Blain.

School Lunch Schedule AT TEXICO

MONDAY: hot dogs with chili, onions, pickles, baked beans, fruit gelatin, chocolate cake, milk.

TUESDAY: roast pork and gravy, creamed potatoes, pineapple and cheese salad, hot rolls, butter, cookies, milk.

WEDNESDAY: cheese sandwiches, French fries, catsup, peanut butter, stuffed celery, fruit cup, chocolate milk.

THURSDAY: sloppy joes, cole slaw, fruit gelatin, cinnamon rolls, milk.

FRIDAY: fried chicken, creamed gravy, whipped potatoes, tossed salad, hot rolls, butter, spiced applesauce, milk.

Visit Liethens

Dr. and Mrs. Alois Bachhuber of Kuana, Wis., uncle and aunt of Mark Liethen, were visitors in the home of Mr. and Mrs. Mark Liethen and Nicky on Thursday and Friday of last week.

Stubble Mulching --

(Continued From Page 3)

es. All material has been cut to size which is easily manageable for future farming operations.

Several factors which favor stubble mulching in the area are as follows:

1. Stubble mulch breaks up water films that greatly restrict the intake of water by soil.
2. Stubble on surface intercepts raindrops and reduces their tearing down effect on soil surface structure.
3. Soil surface is less pulverized by sub-surface tillage, and therefore less subject to erosion than by some other methods.
4. Decay of plant residues and formation of decomposition products that stabilize the soil surface takes place mainly at the surface where it is most needed.

5. Decrease run-off of water.
 6. Surface vegetative mulches reduce surface wind velocities and allow less soil movement.
 7. Reduces evaporation.
 8. Reduces surface crusting and aids in seedling emergence.
 9. Forms a very good base condition for seeding grasses and legumes and giving them protection during critical periods.
 10. May be used in control of soil temperatures.
 11. Helps maintain organic matter in soils.
- Crazing should be limited to excess forage and waste grain. Burning of residue should not be practiced as it robs the soil of valuable organic matter and leaves it unprotected from the ravages by wind and water erosion.
- The economic aspect of stubble mulching which is pleasing is in its increased average

yields. In an area such as ours where the average rainfall is less than 20 inches and there are more dry years than wet ones, moisture is the limiting factor in crop production. By the management of these surface residues, the farmer is usually favored by the conditions set up.

Years with above normal precipitation may produce more on lands tilled in other ways when fertility rather than moisture is the limiting factor, but these years are unusual and the average is the criteria that must be used as the yardstick over the years.

IMPORTANT NEWS!

V.L. Lambert who farms 20 mi. north of Texico says that for every two wells there should be a tail water return system. V. L. is pumping at the rate of 1600 to 1800 GPM out of the pit and is doing it at a cost of approx. 11¢ per hour. His 8 in. wells pump at approx. 800 GPM and average around 34¢ per hr. to operate. Mr. Lambert says when he is catching tail water from 6 wells his pit pump can produce continuously at the 1600 GPM rate. Mr. Lambert is a firm believer in using Minneapolis Moline power units on all his wells. He has 4-HD 800 power units plus the 336.

John Dempster And V. L. Lambert Stand Beside The Minneapolis Moline Model 336 Engine That Pumps 1600 GPM From The Pit For Approx. Cost Of Only 11¢ Per Hour. Mr. Lambert Say That Dependability And Economy Are M-M Trade Marks.

The 75 ft. x 200 ft. Pit Holds 750,000 Gals. And Catches The Run Off Water Of From 2 To 6 Wells.

MOTHER It is so important that a child feel secure and loved the first weeks and months of its life. Our foremost authorities say that if a child's spiritual and emotional welfare is neglected in the early weeks of life, there is a great chance of permanent damage to its personality growth. Therefore, on this day, we honor not only the beloved mothers of our adults and youth, but the very young mother who has both the tremendous responsibility and the precious opportunity to mold the life and character of the very young child. May she seek early God's help, who in the person of the Son, said, "Suffer the little children to come unto me." The Church is God's appointed agency in this world for spreading the knowledge of His love for man and of His demand for man to respond to that love by loving his neighbor. Without this grounding in the love of God, no government or society or way of life will long persevere and the freedoms which we hold so dear will inevitably perish. Therefore, even from a selfish point of view, one should support the Church for the sake of the welfare of himself and his family. Beyond that, however, every person should uphold and participate in the Church because it tells the truth about man's life, death and destiny, the truth which alone will set him free to live as a child of God. Coleman Adv. Ser.

Conservation Of Water Easy For Max And Weldon Crim

Getting water from the irrigation well to the row down which one wants it to go without losing even a single drop

they have continued their installation of the concrete pipe to take in two other wells which have been in operation on the

til the entire farm is served. To bring the water from the underground line to each row, the Crims use gated aluminum pipe. The aluminum pipe fastens to the underground line by means of a hydrant which can be used to control the flow of water down any given set of rows. The wells may either be run together or the flow may be separated by the use of the gates.

One feature of the Lock-Seal pipe which the Crims appreciate is that the joints are connected by a rubber gasket, which permits the pipe to expand and contract as the soil shifts or the temperature changes, and still not result in a crack or break in the line.

Another feature which especially appeals to the Crims, since they are young men, is the permanence of the concrete and its built-in strength. They know that they can cross the line as many times as they choose with any type equipment or any weight tractor without fear of damaging the line in any way.

Fine crops have been grown by the Crims in recent years; and although their dad, J. W.

"Indian" Crim, is a weather prognosticator and can predict the rains or lack of rains each

year, he is unable to make the rains. Therefore, they like most farmers in this area depend on their trusty irrigation system for the proper amounts of water at the right time to make the best crops possible.

Troop 200 Camps In New Mexico Mountains

Twenty members of Texico-Farwell Boy Scout Troop 200 camped Saturday and Sunday in Lincoln National Forest near Capitan, N. M.

Fox, Panther, Eagle, and Headquarters Patrols established camp on Bonito River. Boys explored the area with Scoutmaster Gene Bitner, Assistant Scoutmaster Bill Yohner, and Troop Committeeman

Donald Watkins, Committeeman Leon London furnished a pickup for the trip.

Sunday morning, the troop

attended church services in Capitan and dined at a local restaurant.

Boys present included David Turnbough, Randy Stovall, Max Winkles, Greg Taylor, Terry Armstrong, Gary Roberts, Kent

Armstrong, Donnie Garner, Mitchell Turnbough, Scott Watkins, Robert Nabours, Roy Johnson, Mike Casey, Randy Gregory, Randy Harrison, Ricky Johnson, Ricky Hendrix, David McMaster, Tommy Nabours, and Ted Glenn.

SOIL STEWARDSHIP WEEK

MAY 19th-25th

CONSIDER OUR LAND.

Spreading acre by acre and mile by mile across the heart of our continent is the largest single expanse of productive land on Earth.

It is an awesome land, magnificent in the variety and richness with which God endowed it.

It is the Lord's land, entrusted to our care during our lifetime to help us serve Him and His purposes for our being.

It is the land of a democracy, where we rely on the voluntary exercise of individual responsibility rather than regulation by government as the favored avenue to accomplishment.

It is the land of owners who have the reason, more than any others, to focus on each acre the skills and devotion that progress requires.

It is the land of still unmeasured values, deserving new and higher regard as a vital and irreplaceable treasure.

Consider our land. Consider it well.

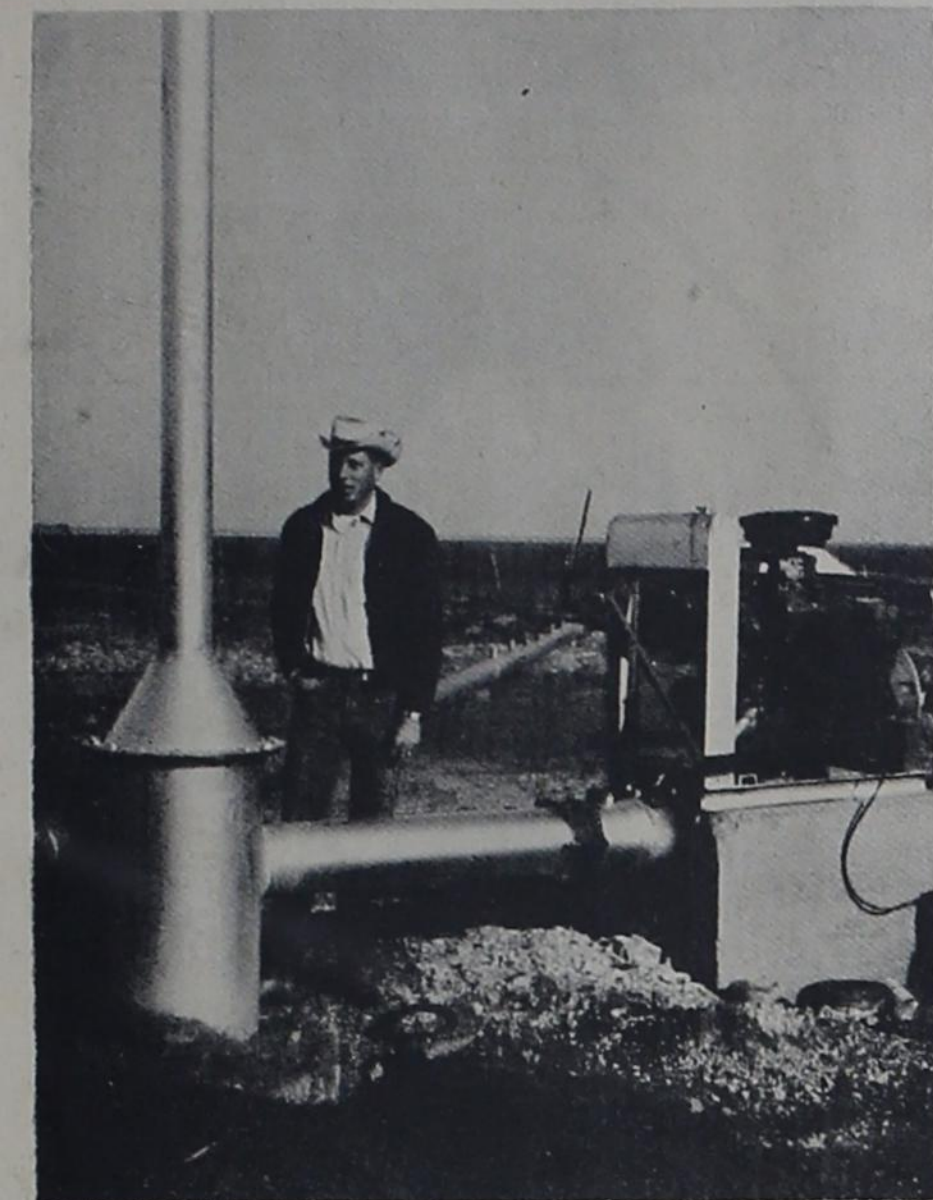

PROVERBS 20:5

"The purpose in a man's mind is like deep water, but a man of understanding will draw it out."

"Pat" Patrick

Farwell, Texas

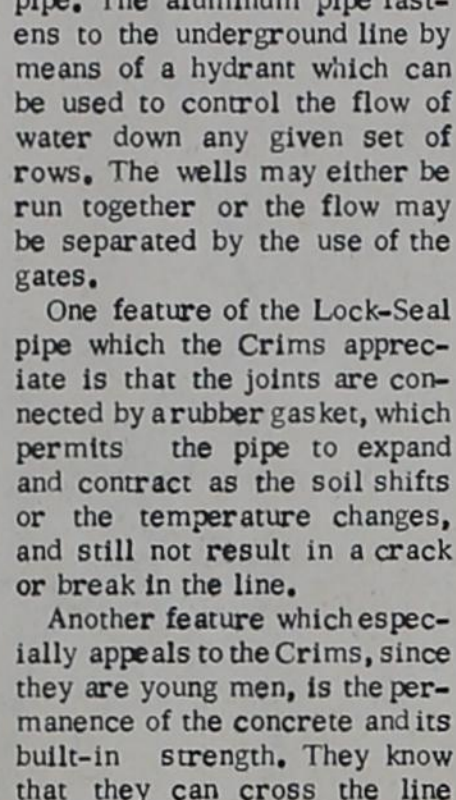

NEW WELL-- This is one of the five wells operated by Max Crim and brother, Weldon, on their farms 17 miles east of Farwell. Water from the well flows into a Lock-Seal concrete pipe.

is the aim of every farmer concerned with conservation. The Crim brothers, Max and Weldon, sons of J. W. Crim, a longtime farmer in Parmer and Bailey Counties, set about getting this done more than two years ago when they started installing Lock-Seal rubber gasket concrete underground irrigation pipe. At the time the irrigation system was begun, only 200 feet of the rubber gasket concrete was installed at each of two wells. Since that time,

farm for some time and an additional well which was drilled this spring, for a total of 8000 feet.

According to Max and Weldon, the job is not complete since future plans call for installation of the concrete pipe to bring each acre of irrigated land under this system. The Crims realize that each additional foot of pipe means additional savings in water and labor cost; therefore, their plan is to continue adding to their system un-

CONTROLLED FLOW OF WATER -- Weldon Crim turns the gate to separate or combine water from two or more wells in the same concrete pipeline.

IRRIGATED BEETS -- Max Crim, J. W. Crim and Weldon Crim look over their crop of irrigated beets which they find much easier to irrigate since the installation of Lock-Seal pipeline.

Report From The Sheriff's Office

Sheriff Charlie Lovelace made a trip to Russellville, Ark., early this week to return one, Jack Rainey of Clovis, to Farwell to face forgery charges. The youth passed the check at a local store on Friday evening and was picked up Saturday in Arkansas. He was arraigned on Wednesday.

Jim Dixon from Santa Fe and Harold Dixon from Albuquerque were visitors in the home of their mother, Mrs. Ruby Dixon, last week.

Tracksters Place Sixth In District

At the District Track and Cinder meet held last Saturday, the Texico team came in for sixth place following behind Ft. Sumner-156 points; Elida, Tatum, Grady and Melrose, Floyd and Dora finished behind Texico.

Rickey Stanley placed fourth in the javelin throw; Lynn Hughes placed fifth in high jump, Johnny Dane, a ninth grade student, placed fourth in the 180 low hurdles. Dane, who was recruited from the junior high school team, had a time of 21.8 in the preliminaries. Mile Medley relay team came in for a third place.

In the two mile run, Vinson Baca placed third (he is a ninth grader); the mile relay team was fifth, the 440 relay team was fourth, and the 880 relay team was second.

None of the Texico group qualified for the state track and cinder meet which is scheduled for this weekend in Albuquerque.

Fourth In Mile Relay At State

The Farwell Steer mile relay team which was in Austin last weekend to participate in the state track and cinder meet came in for fourth place. Time for the fourth place team was 3:27, about the same they have been running the mile relay in all seasons. Team members are Kyle Sheets, Lewey Bradshaw, Lawrence Bryant, Craig Phillips, and Robert Curtis.

Winner of the mile relay with a time of 3:245 was Tidehaven.

"700 acres of PIONEER. sorghum averaged 8,568 pounds for me."

Elvin Wilson, Friona, Texas

Many of last year's bumper yields came from small acreages. But Elvin Wilson had 735 acres—all Pioneer hybrid 820—that averaged 8,568 pounds per acre.

Good weather, good farming and good seed boosted Elvin's yields. He double rowed on a 40" bed, watered four times in addition to pre-watering, controlled weeds with Propazine, and put on 280 pounds of nitrogen.

Hybrid 820 makes the most of his good farming—shades the ground fast, produces big yields, stands right up to harvest. Isn't this the kind of sorghum you want, too? See me soon.
