**Farwell Eighth Grade Graduates Monday**

Rev. Mayo Carpenter, pastor of The Oklahoma Lane Baptist church, was speaker at the Farwell eighth grade graduation Monday night. The pastor told the students that as they entered high school to "never let it known that they know more than the teacher knows". He then instructed the eighth graders that they should have courage, be willing to sacrifice and have faith, not only in oneself, but in God also, to complete their education.

Rev. Carpenter urged the parents to get behind the students and to give them every opportunity, to complete their education.

Mrs. Grace Anderson played the processional for the exercises as the students slowly marched in; Rev. C. M. Fields gave the invocation. Lovoyda Billington then played a piano solo, "Song At Midnight."

Class history was given by Gloria Sanders, and Pudge Rose presented the class will. A vocal number was given by a boy's quartet composed of Dick Felts, Don Geries, Gene Hardage and Lavon Jones; and Don Geries read the class prophecy.

Following the class song by the entire class, Lavoyda Billington, salutatorian, welcomed attendants; and Betty Billingsley sang "If". Gloria Dial presented the valedictory. Shelby Jobs, grade school principal, introduced the speaker and presented awards for perfect attendance and for scholarship to grade school students. Presentation of diplomas was by Claude Rose, president of the school board.

Rev. A. D. Moore gave the benediction.

The stage, where students were seated, featured a white picket fence

Fashioning the poppies which the public will be asked to wear next Saturday are John E. Hall, of Tulsa, Clair G. Young, of Crawford, Wilmer B. Reed, of Corpus Christi, and Jack Standieffer of Elgin, all patients in the Veterans Administration hospital at Legion. The poppy, a memorial flower to those who gave their lives in America's service during the World Wars, is fashioned by the patients in the Legion Hospital and in numerous wards at the Veterans Administration hospital at Waco. The making of the poppy is recognized by the doctors at these hospitals as worthwhile occupational therapy.

Employment for hundreds of disabled veterans, in the state of Texas, confined to hospitals or unable to do other work has been provided by the Auxiliary's poppy-making program. The work has given these men the encouraging experience of earning money again and has filled empty hospital day with interesting, beneficial activity.

entwined with roses; and flanked on either side by basket arrangements of flowers. All girls in the class wore corsages, and boys wore single carnations.

Students receiving their eighth grade diplomas were Barbara Christian, Gloria Dial, Peggy Hardage, Elaine Martin, Mona McDorman, Agnes Meissner, Gloria Sanders, Loretta Stancell, Doris Threet, Dean Walls, Verna Mae Black, Betty Billingsley, Lavoyda Billington, Ysleta Brown;

Also H. R. Billingsley, Deon Branscum, Phillip Crume, Dick Felts, Robbie Foster, Don Geries, Gene Hardage, Lavon Jones, Kirby Kellogg, Jesse Meeks, Don Pool, Jerry Poteet, James Roberts, Ed Rolland, Claude Rose Jr., Billy Watts, Leroy Williams and Carl Pense.

It's kinda tough going nowadays when we have to do without so many things that our parents never had.

Men and women are just boys and girls who are almost grown up.—Elder Statesman Bernard Baruch.

**Mrs. Jobs Reviews Farwell Band Work**

"I think we have accomplished a lot in band this year", Mrs. Shelby Jobs, Farwell band instructor, said this week, summarizing the work for the term.

Asked about the improvements over the last year, the teacher said that instruments were easier for the children to play; they could read more difficult music, and now instead of worrying over playing the right note, they can pay more attention to tone quality and all the other factors that make up good music, besides note reading.

Seventy students were included in the entire band group, 49 of which were in the concert band. Beginning next year, the beginner students will be termed juniors and a new starting group will be organized, Mrs. Jobs says.

She feels that prospects for next year are good although the concert

band will lose two brass horn players, Robert Armstrong and Katherine Magness. It will hurt the band, according to Mrs. Jobs, but she adds that beginners should be pretty good after more work.

Don Geries, who plays alto saxophone, will be promoted to the concert group; and Kirby Kellogg, playing the trombone will also be promoted. Robbie Foster will play the tenor instead of the alto saxophone. If time permits next year, Mrs. Jobs hopes to do more ensemble

work, both instrumental and vocal, she concludes.

And be ye kind one to another, tender-hearted, forgiving one another, even as God, for Christ's sake hath forgiven you.—Ephesians

**YOUR NEIGHBOR COULD BE A CROOK**

Suppose someone came up to you and whispered that in your ear. Maybe you had thought your neighbor an honest, respectable fellow who paid his bills and minded his own business.

But a statement like that would start you wondering. If you heard it over and over, you would start wondering more and more.

Stop and think about it. The gossip didn't say your neighbor is a crook . . . and didn't give you facts to back it up. He didn't really say anything. Your minister could be a crook, but he isn't.

That's the way it is with a lot of the propaganda against rural electric systems. It doesn't come right out and say there is something wrong with our business. It just hints that there is. Maybe you hear these hints in some radio commercials or read them in magazine advertisements. Maybe eventually you begin wondering about us.

As a locally-owned, locally-controlled business, we want everyone in this community to know us . . . understand what we do and how we do it, what we believe in and how we operate.

"Come in and see us and get the facts."

**DEAF SMITH COUNTY ELECTRIC COOP., INC.**

**PLANT COTTON FOR DEFENSE!**

The Parmer County Cotton Improvement Association, made up of Cotton Growers desirous of increasing future Parmer County Cotton Allotments, respectfully urges each Parmer County Farmer to consider planting a reasonable portion of his land to Cotton this season.

**Here Is Why:**

- 1. Cotton is second only to steel as a national Defense Commodity.
- 2. Cotton fits a Diversified Farming Program on either Dry or Irrigated land.
- 3. Cotton is essential to our balanced economy.
- 4. Parmer County has not had its share of the nation's Cotton Market.
- 5. Future controls and allotments are almost certain and any future allotments are likely to be based on current acreages.

**LET'S MAKE THIS A BANNER YEAR FOR COTTON!**

**no vent needed**  
with an Electric water heater

... because there's no fumes from an electric water heater. It's a clean, flameless, economical way of assuring you and your family of adequate hot water at the proper temperature. It's automatic too; you install it and dependable electric service does the rest.

- IT'S CLEAN**  
There's no soot, no smoke, no fumes 'cause there's no flame.
- IT'S AUTOMATIC**  
You merely set the thermostatic control for the desired temperature.
- IT'S LONG LASTING**  
Automatic electric water heaters last for years. Many literally "breathe" and when they do they drop scales of water corrosion. These fall to the bottom to be removed at convenient times.
- IT'S ECONOMICAL**  
A few cents a day gives you more hot water for ALL the hot water uses in your home. Never any waiting period . . . hot water NOW . . . when you want it.

## Grade School Prizes Presented Monday

Grade school perfect attendance and scholarship awards were presented Monday night at eighth grade graduation exercises, Shelby Jobs, grade school principal, says.

average in his class. J. F. Mount who is in the second grade maintained the top average of all grades with a 97.1.

Those to receive medals, average maintained and grade in school are: Billy Liles, 94.2, first grade (Cain); Mike Getz, 92.05, first grade (Whitley); J. F. Mount, 97.1, second grade; June Faye Ritchie, 95, third grade. Also Morris Reed, 92.8, fourth grade; Larry Cooper, 93.9, fifth grade; Betty Smart, 94.86, sixth

grade; Elaine Magness, 94.4, seventh grade; and Gloria Dial, 96.76, valedictorian of the eighth grade; and Lavoyda Billington, 93.28, salutatorian of the eighth grade.

Eighteen students received perfect attendance certificates, because they were neither absent nor tardy during the entire year.

The group included: Joan Potts, Carolyn Watts, first grade; Loyd Allen Cain, Larry McDorman, Judy Herrington, Ruby Hillock, Sharon Coffman and Mickey Rundell, third grade; Doyle Goldsmith and Belva Christian, fourth grade;

Also Glenn McDorman of the fifth grade; Jerri Allison and Ima Jean McKillip, seventh grade; and Loretta Stancell, Doris Threet, Don Geries, James Roberts, and Ed Rolland, eighth grade.

### Hoblitzelle Award Winner Is Named

Russell N. Cash, Atlanta, Texas farmer, whose neighbors testify that he has contributed more than any other to a better agriculture in Texas in the last decade, Wednesday received the Hoblitzelle Achievement

Award for the Advancement of Texas Rural Life. The award is a \$5,000 cash prize and a gold medal.

Nominated by the Texas Region 1 committee, covering an area of 52 counties in the Panhandle-Plains sector of West Texas was J. T. Gee, Friona, who is the originator of a highly successful teacher program. Gee, Friona High School vocational

agriculture teacher, promoted a dairy program in his community for the first time, and has set up a supervised farming program which has been put to wide use.

Cash, the award winner, took a depleted 440-acre sandy land farm and brought it back to productive life by carefully conserving and rebuilding the soil, and on his own

time and his own expense he showed his neighbors how they could do the same by proper management.

Women should believe in free speech; they are free enough with theirs.

Irish potatoes keep better when stored in a cool, dry, well ventilated place.

**A million people now own the Bell Telephone Business**

*This has never happened before!*

No other business in the world has half as many owners as the American Telephone & Telegraph Co.

They come from every walk of life. They live in 19,000 communities all over the country. Over half are women... thousands of them are telephone employees.

One out of every 45 families in America is now an owner of AT&T stock. Many of them live in the western states served by this Company, which is part of the Bell System.

The savings of a million Americans have bought the buildings, switchboards, wire, cable and all the other equipment in this nationwide system which gives you the fastest, most dependable telephone service in the world.

That service is important in peace. It's doubly important in time of national emergency.

## Various Varieties of Sorghums Explained

The Texas grain sorghum crop of 1950 totaled 148.8 million bu., and was produced on 6 1/2 million acres of land, County Agent Joe Jones says, which accounted for 52 per cent of total production of all grain crops in Texas and 63 per cent of total grain sorghum in the United States. Sorghum varieties have been developed bred from dwarf stature, combining adaptation, satisfactory yield, and other desirable qualities,

and have solved problems and limitations of harvesting, so satisfactorily that production of grain sorghum has doubled in the past 10 years. Also five new types have been released. Pertinent facts on various varieties are given below.

**Kafir Types**  
Included in this group are combine kafir—60 with juicy stalks which stand up well in the field, with the head erect on a long stem. The head dries as the plant matures, making it possible to combine before frost. From June plantings in Lubbock, combine kafir blooms in 60 days or a week earlier than Plainsman, Jones says.

Redbine—60 and Redbine—66 are new red-seeded varieties; blooming in 60 days and 66 days, respectively. Redbine—60 is a little surer of production because of its earliness, while Redbine—66 will yield better under favorable conditions because of its longer growing season.

Plainsman is a double dwarf variety, blooms in 72 days, matures in 110 days, and has potentialities of high production. It is resistant to milo disease.

Caprock blooms in 77 days and matures in 115 days; and will produce larger yields of grain under favorable soil and seasonal conditions; it is also resistant to milo disease. Martin, double dwarf variety, is resistant to milo disease and should be planted thick. Chief merit is that grain can be harvested shortly after seeds mature. Though it does not yield consistently under less favorable conditions.

Midland blooms in 65 days and matures in 100 days. Juicy stalks and green heads may cause delay in harvesting, but very little lodging occurs in this variety.

Westland and Combine 7078, are both double dwarf combine varieties. Westland blooms in 70 days and matures in 100 to 105 days, and is similar to Martin and Midland in performance. Combine 7078 blooms in 65 days, principal asset is certainty of producing some grain under rather adverse conditions.

## Magerus Is Director Of Swine Breeders

Annual meeting of Southwestern Swine Breeders association was held in Clovis the first of the month and Albert Magerus of Texico was chosen as a director. The directors are made up of individuals to represent the major breeds of swine; Magerus is Hampshire representative.

The group members discussed sponsoring a barrow show each spring. The August sale is planned the second Tuesday in August with entries turned into the breed representative by June 15.

"Two fortunes for the immigrant boy"—with nothing but courage and the will to work and study, engineer Frank A. D. Andrea built a fortune and proved that America is still a land of opportunity. Read his heartwarming story in the American weekly, that great magazine distributed with next Sunday's Los Angeles Examiner.

After all, when you make more than \$15,000 a year, you're practically working for the government.—Baseball Manager Branch Rickey.

"What Shattered the Taylor-Stanwyck perfect movie marriage?" Don't miss Adelia Rogers St. Johns' Two-part, behind-the-scenes, story of the Robert Taylor-Barbara Stanwyck romance and heart-break, in the American Weekly that great magazine distributed with next Sunday's Los Angeles Examiner.

Men are like steel. When they lose their temper they are worthless.

A dollar may not go very far, but usually it travels far enough so that it never finds its way back.

A man wrapped up in himself makes a small package.

**ELECTRIC SHOE SHOP**

Texico, N. M.

Double dwarfs and white sooner milos will not stand long after frost for combining and should be harvested before or shortly after frost. These varieties bloom in 60 days or earlier and mature in 90 days, making them well adapted to late planting. Sooner milo will produce under severe conditions. All of the milos are highly susceptible to charcoal rot, a fungus disease.

**Milo Types**  
Double dwarfs and white sooner milos will not stand long after frost for combining and should be harvested before or shortly after frost. These varieties bloom in 60 days or earlier and mature in 90 days, making them well adapted to late planting. Sooner milo will produce under severe conditions. All of the milos are highly susceptible to charcoal rot, a fungus disease.

**Hegari Types**  
Early hegari when planted either quite early or quite late and exposed to short days during early growth, is likely to be dwarfed to lower average rainfall and higher altitudes.

**Bonita** is a dwarf that blooms in 65 days and matures in 100 days; having wide adaptations and is recommended for its high yields and certainty of grain production. Hegari has the same maturity, adaptation and grain yield as ordinary Hegari, but it yields approximately 20 per cent forage per acre.

**General Recommendations**  
Giving general recommendations for planting, Jones says farmers should plant seed of good purity and germination and treat them according to directions for control of smut and seedling disease.

Planting should be done after the ground is warm for planting in cold, wet soil seldom gives good stands, particularly with soft-seeded varieties such as hegari.

The agent recommends that grain be planted in 36 or 40-inch rows and given good clean cultivation. Small-trowing varieties such as Double Dwarf Sooner milos will give larger yields and also stand up better if planted in narrower rows and seeded thick in the row.

Early-maturing varieties will usually produce better yields of grain when planted late (in June) than when planted early, Jones concludes.

## HOSPITAL NOTES

### Admitted

June Plezewski, medical, Friona; Mr. E. W. Sheets, medical, Texico; Mr. Ralph Wilson, medical, Friona; Harold Lowrie, medical, Friona; Mrs. O. J. Beene, OB, Friona; Rose Ann Harris, medical, Friona; Jimmie White, medical, Friona; Mrs. Glenn Williams, medical, Friona.

## Local Scouts Have Busy Summer Ahead

The Boy Scouts of Farwell and Texico have a very busy summer before them according to Scoutmasters John Adams and Kenneth Livingston.

The scouts are now in a campaign selling tickets to the Pioneer Baseball game with the Pampa Oilers which will be played at the Bell Park in Clovis Saturday May 26 at 7:45. The scouts are vying for a number of interesting prizes including an all expense paid road trip with the Pioneers and a week's stay at Camp Wehinahpay, which is located high up in the Sacramento Mountains of New Mexico.

The scouts will be guests of the Pioneers on Saturday night where they will present a short program before the game starts. Scouts are asked to be at the east gate of the ball park at 7 o'clock for the grand entry.

There are five periods at Camp Wehinahpay this summer, each one starting on Saturday, beginning June 2nd.

There will be three week periods of an aquatic camp at Lake Almagordo where the scouts will be taught swimming, given pointers on improving their swimming style; life saving; canoeing and boating.

Thirty three scouts for this area will attend a camp at Philmont the big scout ranch near Cimmaron, New Mexico during July.

A canoe trip through the wilds of Canada is also planned for July for Explorer Scouts.

Any scout who is interested in either of the above activities should contact Adams or Livingston at once.

## Million Stockholders In Phone Company

A milestone in the history of American business has been reached with the addition of the millionth stockholder in the American Tel. & Tel. Co., according to an announcement made today.

The A. T. & T. Company has become the first company in the United States history to achieve such a democracy of ownership. Owners of the nation-wide Bell Telephone System live in 19,000 cities, towns and rural areas throughout the country and represent a cross section of America. They include farmers, businessmen, clerks, mechanics, teachers, housewives, merchants, clergymen, doctors, lawyers, widows, people who have retired - hometown folks and neighbors. Approximately 200,000 telephone employees own stock purchased through pay roll allotments.

Mr. and Mrs. Brady Denton of Saginaw, Michigan, who became joint owners of seven shares of stock, represent the millionth stockholder of the American Telephone and Telegraph company. Denton, 33, and a veteran of World War II, is an automobile salesman. The Dentons, parents of three small youngsters, purchased the stock through their local bank—their first investment in stock.

Over 22,000 A. T. & T. Company stockholders live in the western states served by the Mountain States

Telephone and Telegraph Company. The money they have invested in telephone stock along with that provided by all the other such stockholders has made possible the growth of the telephone business.

The Mountain States Telephone and Telegraph Company has had its greatest growth since the end of World War II. Attaining that growth involved the construction of many new telephone buildings, installation of switchboards, dial equipment, cable, poles, thousands of miles of wire and all of the other items that are required for telephone service. The telephones and equip-

ment are ready to aid in national defense because one million Americans have invested their savings in an American enterprise.

In New Mexico during the past few years; the Mountain States Company has had the greatest construction program in its history. Over \$18 million has been spent in the state since World War II. During the last ten years the number of telephones has more than tripled, and twice as much has been invested in telephone plant as in all the previous years of the Company's operation in the state.

The American Telephone and Telegraph Company's requirements for new capital have also been greater in the last few years than in all of the previous history of the telephone business. Over 35,000,000 Bell telephones are now in service throughout the nation and 13½ million have been added since the end of World War II.

Demands for service continue to be very heavy for defense communications as well as for civilian use. The telephone is vital to production and to the armed services.

Adding the one millionth stockholder occurred in the 75th anniversary year of the telephone. It was on March 10, 1876, that Alexander Graham Bell's spoken words were carried over a telephone line which stretched from one room to another in a Boston attic where he was experimenting with this new form of communication. Today well over 140 million conversations travel daily over Bell System lines and, when the telephone calls handled by connecting companies which serve over 7½ million telephones are included, the daily telephone conversations exceed 170 million.

## School Is Dismissed At Farwell Tuesday

Farwell seniors completed their final examinations of Wednesday afternoon of last week, despite the severe rains. Underclassmen took

tests on Thursday and Friday, and instructors completed their grade records on Monday.

Students picked up their report cards, checked in all equipment, and paid all bills on Tuesday and school was officially dismissed. Buses ran at noon.

**Why Hudson is the**

**most DURABLE car your money can buy!**

Rugged, all-steel, all-welded Monobilt body-and-frame—most durable and rattle-free construction on the market.  
\*Trade-mark and patents pending

Nylon or worsted upholstery combined with crackproof, scuffproof, easily cleaned Dura-fab trim—long-wearing and luxurious.

High-compression engine electronically balanced as a completed unit to reduce vibration, keep engine like new longer.

Lighter, exceptionally strong pistons and two-piece, heat-resistant Austenitic metal exhaust valves multiply engine life, maintain peak performance longer.

Heavy box-section steel girders completely surrounding the passenger compartment even outside the rear wheels—Hudson is America's "safest car!"

The only hydraulic braking system with reserve mechanical brakes on the same foot pedal—best protection anywhere!

"Step-down" design with recessed floor for the lowest center of gravity in any car—smoother, steadier riding with less jounce, less wear and tear.

Chrome-alloy cylinder block—toughest in any car—and oversize engine bearings for thousands of extra like-new engine miles.

THE notes above only high-spot the features that make Hudson so durable.

There are many more. For example, Hudson's exclusive recessed floor (famous "step-down" design) results in true streamlining—handsome styling that will stay fresh for years.

"Step-down" design also gives you the most room—and the best and safest ride ever known!

See and drive Hudson for '51!

## Rev. Fields Gives Address at Farwell

"We have already failed if we do not depend on God", Rev. C. M. Fields, pastor of the local Baptist church, told members of the Farwell senior class at baccalaureate services Sunday morning.

Speaking on "Conditions of Success", Rev. Fields outlined seven factors to be considered by the seniors as they undertake the responsibilities of adults.

The pastor listed the first condition of success as an understanding of the purpose of God; then gave as the second factor, faith in the promise of God.

He then told the senior group that they must see the assurance in the presence of God; and forever maintain courage in the name of God. He emphasized faithfulness in the leading of God; and told graduates that they must see the light in the word of God. The seventh point brought out by Rev. Fields was obedience to the will of God.

Scripture for the talk was Joshua 1:1-9. Continuing his talk, the pastor told the group members that there is no such thing as luck, so many things that people attribute to luck isn't that at all. It is the blessing of God, the speaker emphasized.

Rev. Fields didn't feel that seniors should feel that they "had it made," for such an attitude would only lead to disillusionment. He told the listeners that he wished the Farwell seniors could always be as happy as they were at that time, but they would not be; they were going into a world of responsibility.

Defining success, the pastor emphasized that students wouldn't have to be president of the United States to be a success; nor would they have to maintain a like position. "If you accomplish God's purpose in life, you will be a success," he pointed out, adding that fame isn't the only thing important in life.

Rev. Fields told of the current concept of the unimportance of some individuals. "How many times over the radio have we heard the statement from women that 'I am just a housewife', he stated "when they represent one of the highest callings on earth."

In conclusion, the speaker told seniors that they would need the presence of God to be with them; stating "the only way to get to the top of the ladder of success is a round at time."

The school ensemble, accompanied by Mrs. Shelby Jobes on the piano, played the processional as the senior students slowly marched into the auditorium, ushered by Delores Goldsmith, Rex Pool, Katherine Magness, and Wilma Nell Smith, juniors.

Invocation was then given by Rev. A. D. Moore, pastor of the Oklahoma Lane Methodist church; the senior girls presented a vocal selection. Supt. Jack Williams introduced Rev. Fields. Following the speech, Minister Sol Morgan, pastor of the Church of Christ, gave the benediction; and the ensemble played the recessional as the seniors marched from the auditorium.

### ATTEND CONVENTION

In attendance at a bar convention of the 64th Judicial District at Plainview Friday were A. D. Smith, county judge, Sam Aldridge, county attorney, Judge E. F. Lokey, all of Farwell; and Bill Sheeman of Friona.

Mrs. Bill Chenault was in Tatum, N. M. Saturday afternoon to visit her daughter, who was ill.

## Phone Program Waits On Washington Funds

The rural telephone program for Parmer and a number of other High Plains counties is standing still waiting on money from Washington, according to Harold Carpenter of Oklahoma Lane, director.

Carpenter attended a meeting of RTA directors at Hereford last Monday night, and learned that funds for the project have been allocated by the federal government, although the money has not yet been released. However, officials of the association believe that prospects are bright for a green light for the funds, and they are expecting word "any day."

"Everything in Parmer County went over the top" said Carpenter. "We have enough applications to start right to work."

Materials for construction of the rural lines pose the big question at present, due of course to the heavy national defense program underway. "Materials are just a guess," said the Parmer director and he could not predict what the future held in store in this matter.

## Baptists Begin Bible School This Monday

Enrollment day for Vacation Bible school at the Texico-Farwell Baptist church is scheduled tomorrow (Friday) at 3 o'clock in the afternoon, Rev. C. M. Fields, pastor of the church says. After registration, a softball game is planned.

The school begins Monday morning and continues through June 8. Students 4 through 16 years of age will be instructed.

The school, which will be held from 8:30 until 11:30 each day, and will include Bible study, handwork, mission study, character study. Refreshments will be served each day.

Commencement day, on June 8, all work will be displayed. The school will feature lecture courses with no home study for the children, Fields says. Teachers will give character building stories from works straight from the Mission field.

"The school will be designed to acquaint the children with the Bible more than they get in Sunday school", the pastor says. The handwork will be instructed to develop individual talents.

Four departments will be headed by Mrs. Will Hardage, beginners; Mrs. Ansel Doolittle, primaries; Mrs. Hugh Tucker, and Mrs. Luther Moss, juniors; and Mrs. C. M. Fields, intermediates.

## Planting Seed May Become Short Here

Predictions that certified grain sorghum planting seed may become scarce in this region were voiced early this week by local seed dealers. This may be especially true, if farmers should be required to replant a second time.

"I don't believe there is enough certified seed in the country to reseed the cropland a second time," C. M. Henderson, local grain dealer said today. He went on to predict that much land would be planted with common seed should the first planting be lost by unfavorable conditions.

M. C. Roberts of the Roberts

Seed Company, said that he was replenishing his already low supply of certified seed with seed brought in here from South Texas. "Farmers in South Texas are through planting", he exclaimed, "and our trucks are picking up from two to ten sacks here and there, wherever we can find them," he added.

Already, some of the favorite grain sorghum seed are unavailable locally, seedmen said.

Some irrigation farmers have already begun making preparations to replant crops lost in washing rains of last week. But little or no dry land farms had been planted when the heavy rains of last week.

## Loren Stark Killed In Friona Wreck

Loren Stark, 57 years of age, died instantly Sunday afternoon around 6:30, when his 1939 Hudson was struck by an east-bound Santa Fe train at a rural crossing, some three miles east of Friona.

Stark, relatives report, was enroute to his home, on the south side of the tracks, when the accident occurred. Apparently not expecting a train at that particular time of day, and blinded by a heavy rain which was falling at that time, he drove directly into the path of the oncoming train, with the engine striking the front end of the vehicle.

The body was removed to Gilliland Funeral Home in Hereford, and later taken in charge by Chenoweth Funeral Home of Woodward, Oklahoma. Burial will be in Curtis, Oklahoma.

Stark had been a resident of Friona and community for the past fifteen years. Survivors include one brother, W. B. of Friona; and four sisters, Mrs. Ros Kenniman of Curtis, Okla.; Ruth Stark, of Tulsa, Okla.; Mrs. Pauline Friend, of Tulsa, Okla.; and Mrs. R. D. Williams, of Northridge, California.

## Finds That Mechanical Farming Doesn't Work Inside of City Limits

Bert Williams, son of Mr. and Mrs. Johnnie Williams of Farwell, found out this week that mechanical farming isn't always the best way of getting things done—especially within the city limits.

Bert's parents are building their new home in south of Farwell, and Bert thought he'd pitch in and help get the job done. The yard of the new home was being levelled Monday afternoon, so he guessed that he could do some good with the tractor instead of a rake.

Things were working out fine too. The landscaping was being taken care of in much less time than it takes to do a job by hand. That is, until Bert had the misfortune of getting a little too ambitious with his equipment.

He tried moving a little too much dirt at once and plowed up the sewer and gas lines that ran by the house. That was enough for mechanization.

## Rev. Hurst Returned Here as ME. Pastor

Rev. Lance Hurst, who has been serving the Hamlin Memorial Church as pastor since early fall, when he was moved here from Santa Rosa, N. M., was returned for another year when the appointments were read at the conclusion of the annual conference of the Methodist Church, held at Silver City last week.

Rev. and Mrs. Hurst returned to this city Sunday night. Rev. Carl Clements was assigned as district superintendent of the Clovis District for another year.

Rev. J. J. Spurlin, son of Mr. and Mrs. J. J. Spurlin of this city, who has been stationed at Rosedale, was moved to Estancia.

## City Problems To Be Aired Monday

Sponsored by the Chamber of Commerce, and the city officials, a meeting has been called for Monday night at the Legion Hall to discuss civic matters pertaining to the city.

High on the list for consideration will be to organize a movement for keeping pace with the weed growth and control of flies and mosquitoes that may be expected following the heavy rains.

"We must organize and start now to keep ahead of the insects as a health measure," Mayor C. M. Henderson said in announcing the meeting.

Citizens of the city—both men and women—are asked to meet at 8 o'clock p. m. No lunch will be served at this meeting, it was announced.

## Junior Robertson Completes Basic

Camp Chaffee.—After completing fourteen weeks basic training with the 5th Armored Division, Pvt. Joseph C. (Junior) Robertson, Jr., Farwell, Texas, has been transferred to the Artillery Survey School, Fort Sill, Oklahoma.

At his new station, Private Robertson will receive additional training qualifying him for specific army duties.

Private Robertson, son of Mrs. J. C. Robertson of Farwell, was employed in the construction business before entering the service. He was home for a short time to visit his mother.

## Spring Training Closed Out at Farwell Schools

Spring training for the varsity football team officially closed out last week with the playing of the annual intramural game, according to Coaches Tom Hestand and Ken Livingston.

They announce that plans have already been laid for next year's work, including the announcement of the first game of the season—non-conference one.

Practices will begin Sept. 1, and only one week will elapse before the first game will be played with the Melrose Buffaloes on Farwell field.

## Skating Rink Opens On Tuesday Night

Members of the 1952 senior class of Farwell schools announce that the Oklahoma Lane skating rink, sponsored by the group, will be open on Tuesday night for the first session.

Admission is 40c each for an evening; and the doors will be open at 8 o'clock. Skating is scheduled every Tuesday until further notice.

## Beware of Early Morning Prowlers, Says Notice

"Some morning in the near future, you may have some early callers," reads an ominous note received at the Tribune office this week.

"Don't bar the door, because you may be taken to breakfast," the mysterious epistle continues. "Just put on as few clothes as possible."

The staff couldn't track down the source of information, but it seems to be another of those hilarious kidnap-breakfast things, and they figured that the public should be warned to prepare itself.

### TO CAMP CHAFFEE

Pvt. Max Ford who has been visiting in Farwell on a 10 day leave, reported back to his camp in Camp Chaffee, Ark. over the weekend.

## TREAT YOUR PLANTING SEED

Treatment of Planting Seed is essential, and Ceresan and Copper-Carb have been proven to be the most satisfactory preparations for treating planting seed. We have both and are ready to serve you.

**ROSE DRUG & GIFT SHOP**  
Farwell, Texas.

## Farwell Senior Trys Kid Stuff, Gets Leg Broken

Beryle Nix, Farwell senior, graduated a little ungrainy Tuesday night after some horseplay on a senior all-night party last Friday evening.

The 170-pound student, who has had lots of experience taking footballs away from husky fellows, broke his leg playfully trying to take away a broomstick from one of his senior pals.

Nix might have gotten the broomstick too, except for the fact that the two boys were tussling on roller skates which may have meant a slight disadvantage for the big senior.

He was caught off balance by Jerry Pool, his adversary, and spilled on the hardwood floor, breaking his leg in two places.

### RETURNS WITH CARUTHERS

Sheriff Charles Lovelace returned to Farwell this week from Seminole, where he took into custody Jim Caruthers, who will be bound here for District Court next week, is indicted on a charge of forgery.

## Farwell Commencement

(Continued from Page One) strength of our democracy".

In conclusion he admonished the students to "order your lives" to attain the high ideals for which America has always stood in the minds of the world.

Supt. Jack Williams made the presentation of special awards, with the cherished all-round student loving cup presented for the 31st year to graduate John Christian.

Other awards included the Babe Ruth sportsmanship awards, presented to Caryetta Grissom and John Christian; and scholastic awards were given to Mary Joyce Rolland, freshman; sophomore Kayla Felts; junior Rex Pool; and Caryetta Grissom, valedictorian, and John Christian, highest ranking senior boy.

The school ensemble played both the processional and recessional with Rev. Mayo Carpenter offering the invocation and C. W. Grissom giving the benediction. The salutatory was given by Dot Kent, the valedictory by Caryetta Grissom, and a vocal trio, composed of Kayla Felts, Shirley Smith and Darlene Sprawls, offered special music.

## Farmers Invited To Rainmakers Meeting

Is there any truth to the claims made by those who say they can increase rainfall, temper hail and electrical storms, and even withhold precipitation and still keep skies cloudy?

County Agent Joe Jones received word this week that the Amarillo Chamber of Commerce is going to give ranchers and farmers in the Panhandle a chance to answer these questions for themselves.

Arrangements have been made to have Lee Cox, field representative of the Water Resources Development Corporation, present an illustrated talk at Amarillo Municipal Auditorium Saturday, May 26, at 10 a. m.

There will be no admission charge for the event. Movies of actual rain-making activities will be shown and factual printed material will be made available to those interested.

Dr. Irving P. Krick, reputed to be one of the nation's foremost rain-making authorities and founder of the WRDC, has devised a process of increasing rainfall by heating silver iodide crystals to 3000 degrees F over a coke fire.

The minute crystals, as they are heated, ascend into moisture-laden clouds and become nuclei for snowflakes which melt as they fall, producing rain.

It is not a "rain-making" proposition, Dr. Krick emphasizes. There must be a cloud to "seed" before results can be obtained.

Contracts have already been signed with the Texas Panhandle Weather Improvement Association, of which Henry C. Hitch, Jr., Guyton, Okla., is president. The area involved includes Cimarron, Texas, Beaver and Harper counties in Oklahoma.

Terms of a proposed contract with other Oklahoma and Kansas ranchers and farmers call for an increase of precipitation up to 30 inches per year. Total cost of this proposed contract is estimated at \$360,000 and would cover 13 million acres.

Terms specified in the two Panhandle contracts called for immediate payment of half the cost, an additional 25 per cent in 60 days, and the balance in another 60 days.

Documentary and factual information, as well as magazine articles on rain-making, are on file at the Amarillo Chamber of Commerce office. Those interested can look them over at their convenience.

Earl C. Allmand, industrial manager at the chamber, suggests that interested groups organize into units at least county-wide for discussing proposed contracts.

## Keep Bacteria Counts Down, Agent Advises

College Station, May—Bacteria counts are always a problem with the dairymen, but the problem becomes more difficult during warm weather, County Agent Joe Jones says.

Prompt cooling is absolutely necessary in producing milk with a low bacteria count. Bacteria multiply rapidly, and only through proper cooling of milk can their growth be retarded or stopped, Jones adds.

Milk held at 40 degrees F. for 16 hours will show little or no bacterial growth, while the bacteria will increase 3,000 times in milk held at 80 degrees F. for the same length of time.

Other factors, such as health of cows, cleanliness of equipment and milking practices, also affect the bacteria count, points out A. M. Meekma, associate dairy specialist for the Texas Extension Service.

Milk only clean, healthy cows. One cow with a flare-up of mastitis may give a lot of trouble in the bacteria count.

Follow clean milking practices. This includes cleaning the cow's udder to prevent any contamination.

Handle the milk in clean, sterilized equipment and store properly. All utensils should be stored in an inverted position so they will have an opportunity to dry.

And protect milk from any outside contamination, such as dust, feed, manure, contaminated water and flies.

## Survey Launched By Price Stabilization

Surveys of restaurants and other eating establishments in West Texas to determine their compliance with Office of Price Stabilization regulations have been launched by the Lubbock district office on orders from Edward P. Morgan, national OPS Director of Enforcement.

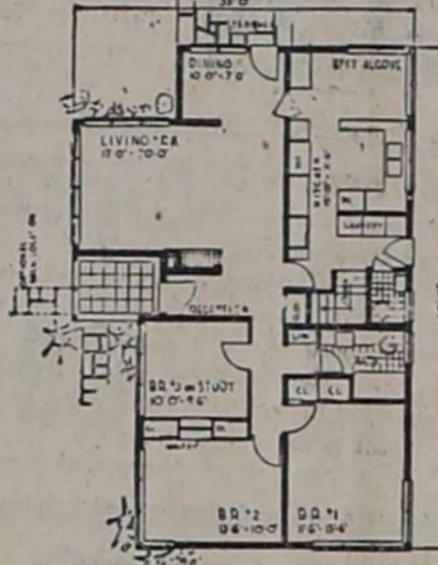

The surveys are being made simultaneously with similar OPS checks in other parts of the country.

The investigators in the Lubbock district include Parmer county and adjoining counties, began their survey in the northern half of the district, which reaches from Oklahoma Panhandle on the north to the Big Bend and El Paso on the south and west, early this week. Upon completion, they will move into the southern half to complete their survey.

All operators of restaurants and other eating and drinking establishments—except those specifically exempt by Ceiling Regulations 11—were required to file basic reports with OPS by April 30. This report includes a base period statement of food costs per dollar of sales.

The enforcement officers were instructed to give warnings to operators known to have failed to file the report required under the ceiling price regulation. In cases of willful violations, action looking toward in-

## 3 Bedrooms, Fits Small Lot

Featuring three well-proportioned bedrooms, this house of contemporary design is narrow enough for a 50-foot lot, even with a side driveway and detached garage. It is Plan No. 755 of Walter T. Anicka, architect, of 617 Forest Avenue, Ann Arbor, Mich.

The "L"-shaped combined living and dining room is designed so that it may be merged with an outdoor living area in the rear yard. Large living room windows, which help to carry out this idea, may be screened with a fence or hedge for privacy.

Bedrooms are arranged so that

the sleeping area can be closed off from the remainder of the house. The architect specifies hardwood plywood with face veneers for built-in vanities in each bedroom, and also for sliding doors of wardrobe-type closets. Hardwood veneers lend a distinctive tone and are easily maintained.

Center of the work area is a streamlined kitchen, with a breakfast alcove and service room at either side. The service room contains a laundry, extra lavatory, clothes closet and stairway to the basement. Full or partial basement is optional.

The plan is 33 feet wide and 48 feet deep and may be placed with either dimension facing the street. It contains 1,337 square feet of floor space, a useful figure in computing local building costs.

Protected by a roof of fire-resistant asphalt shingles in a contrasting color, the house will look equally attractive with either vertical or horizontal siding. Asphalt shingles are manufactured in a wide range of colors and blends, making it easy to select a suitable hue or blend.

(Detailed building plans for this house are available from Walter T. Anicka, 617 Forest Avenue, Ann Arbor, Mich. Refer to Plan No. 755.)

junctions has been requested by the Washington office of Enforcement. The reports continue to come in. The reports continue to come into the district office, Broadway Building, 1202 Texas Avenue, Lubbock, Texas. Operators who have not filed are urged by price officials to do so immediately.

Democracy is not assisted by careless criticism of officials, whether they serve local, state, or federal governments.

"Fellows who drive with one hand are usually headed for the church aisle. Some will walk down it; others will be carried."

## Explorers To Attend Reese Encampment

Approximately 160 Explorers from the Panhandle area are expected to attend an Explorer encampment at Reese Air Force Base, Texas May 25, 26. Counties to be represented include Parmer.

Wilbur J. Hiatt is area scout executive and Harry Delashnut, Jr., is field representative of the Llano Estacado Council. Both are from Amarillo.

Major George V. Wendling of Reese has been named project officer for the encampment. On March 30, 31, Major Wendling was project officer when approximately 200 ex-

plorers from the South Plains held their encampment at Reese.

The Explorers are expected to begin arriving at Reese Friday afternoon. They will be housed on the base in the area near the gymnasium and will take their meals at the Consolidated Dining Hall.

Following the supper hour Friday, the boys will assemble in the base gymnasium where an Air Force official will welcome them to Reese. Following their welcome, they will be shown movies depicting survival training and combat.

Saturday the Explorers will be taken on a familiarization tour about the base. Each Explorer will get "flying time" in a TB-25. Trips will be made to the flight line, field sanitation link trainer section, operations and weather.
