NUMBER 45

ADVENTUROUS? GO CLIMB AN ALP! . . . But you won't have to go to Switzerland to do a spot of Alpineering. Mountaineers from all parts of the United States and Canada do it in the Canadian Rockies, and they say the thrills are worth all the efforts. The Bugaboo glacier in the Purcell range of British Columbia is tougher than many Swiss Alps and unmatched in grandeur. Here is Maj. Rex Gibson, one of Canada's ace Alpinists, chopping footholds.

Price Tumbles Steers In Last 30 Seconds

Paying before a definitely partisan Barber Prices Up crowd, the red-clad Price College Cardinals, of Amarillo, had the thrill of carrying off the opening . Although treal barbers were six-man football game of the sea- among the last to post increased son here, last Friday, when they toppled the Steers of Farwell in the final thirty seconds of play.

Farwell had battled grimly in the third quarter to come from behind and push on up to a 18-14 lead, only to see what looked like a sure victory slip away, 18-20, as the result of a Price pass.

With the seconds fleeting, Price en as the reason for the increases. put all they had into a long pass from Buchanan to K. Doye-and it Some Wheat Hurt worked. As the ball drifted downfield, Max Ford, Steer fullback, By Sunday Winds stepped out before Doyle and ap-

SPUD IN OIL TEST THIS WEEK

Wheat Prospects Heightened By Rain Englant Pig Tops List In Sears Showing

The Chester White gilt belonging to Bob Englant, of Bovina, was rated tops here, Tuesday, when eight Parmer County 4-H club boys exhibited their animals for judging before Fred Hale, of the A. & M. Ex-

periment Farm at College Station. The gilts, all registered stock were issued to selected clubbers last spring by Sears Foundation, which sponsors an annual feeding contest. A large number of interested spectators gathered around the pen in Farwell as the judge made his selections and explained the choices.

Placing second in county rating was Ross Jefferson, also of Bovina, third was Oren Glenn Hromas, of Okahoma Lane, fourth, Kenneth Bridges, Texico, and fifth, Jerry Jones, of Bovina.

On Saturday of this week, Englant will show his gilt at the district show in Amarillo, in competition with other county winners. At that time, the boys owning the aniheifer, with the remainder having Gainesville, Texas. a \$50 merchandise prize from Sears

Also participating in the Amarillo Bovina Pastor Resigns, show will be Loyd Kriegel, who has had charge of the registered Chester Leaves September 30 White boar issued this county, and rated first in the county in 1945.

Health Notes By Texas Department of Realth

AUSTIN,-Contrary to the popular belief that pyorrhea is incurable, this is only true in the most advanced cases. Dr. Geo. W. Cox,, State Health Officer, advises those persons who even suspect the presence of pyorrhea to take time by the forelook and seek an early diagnosis from their dentist so that proper treatment can be instituted while the disease is still curable.

"Early detection and proper treatment of pyorrhea represent the formula for a successful cure. This means that the dentist must have an opportunity to discover the presence of the disease at the earliest possible moment since the symptons are often so vague that the patient is unaware of its existence." Dr. Cox said. "Regular visits to the family dentist are therefore extremely important."

The treatment of pyorrhea is not an involved procedure. In the average early case one of the main therapeutic features is the proper hygienic care of teeth and gums as outlined by any reputable dentist. Carelessness regarding mouth hygiene is usually the basic cause for the condi-

l'ireworks Display At South Plains Fair

LUBBOCK,-A spectacular free fireworks display has been added to the many attractions billed for "Welcome Home" day for veterans of World War II at the 29th Annual Panhandle South Plains Fair, Fair officials disclosed this morning.

The big pyrotechnics show will be held Monday night, October 7, immediately following address by governor-elect Beauford H. Jester and Col. Thomas G. Lanhier, deputy administrator of Veterans Administration Branch Office 10 in Dallas.

Veterans wearing discharge buttons or in uniform will be admitted to the Fair grounds upon payment of 10c federal tax throughout opening day. The Veterans will not be charged the regular 50c admission

Everyone will also be admitted to the grandstand free of charge for the talks by Jester and Lanphier.

USDA goal for sugar beets is 1,-057,000 acres, 22% above the estimated 1946 acreage.

Thank Goodness! NOW 1 HAVE ELECTRICITY IN MY HOME

It's a great day when the last wire is in place and you can flick a switch and have electricity at your command.

It has taken time to bring the wonders and advantages of electricity to folks in this great area.

But today, in a major part of our 12 million dollar expansion program, we're stretching our rural power lines to reach more and more farms and ranches.

Folks in those homes have been waiting a long time for low cost electricity, and many of them can look forward to better living electrically.

A pioneer in building ahead for the future, we're proud that in our 22nd year we can bring low cost electric power to so many more of you.

Texas' largest cavern is the Longnet and Marble Falls.

THEY WANT LIGHT . . . When Pittsburgh prepared for a "blackout" due to power strike, the young citizens joined in the protests of their elders. Left to right: Larry O'Connor, 2; Judy Tolusciak, 3, and Marilyn Jordan, 2. The strike lasted only 45 minutes, when it was brought to an end by an injunction. These youngsters don't seem to be worried about it, despite the wording of their signs. They had enough of "blackouts" during the earlier days of the war.

Don't Be Deprived Of Full Enjoyment

Of Your Old Car While Waiting

For A New Car Delivery

There's a lot of pride and pleasure in driving a new car, and we truly welcome the time when production catches up and we have new cars for all. The delays and disappointments of the past have not been pleasant for any of us.

But there's hardly a thing a new car possesses that can't be put into pre-war models. That's why many of our customers are "bridging the gap" to a new car by restoring Pep, Power, Beauty and Safety to present cars. It is a good investment, too, for much of the cost will be paid back in the appraisal when ready to trade.

What you really want is Safe, Dependable transportation. You want troutble-free trips and the assurance that you will get back safely. All this we can give you and welcome the opportunity to furnish an estimate of just what it will take. Drive in.

Taloga Residents Recall Gold Rush

TALOGA, OKLA. (WNS). Citizens of this region, especially the early pioneers, still recall when the area almost had a gold rush similar to the '49ers.

Shortly after Pete and Lizzie Hamm filed on their claim in 1899, Mrs. Hamm had a dream so vivid of gold on their land that she prayed constantly it would be found and developed.

More than 40 years ago Dr. Yoakum visited the territory from California. He also believed gold might be below the Hamm property and dug a shaft 50 feet into the ground, taking assays each 10

Gold was located! One assay showed gold to the amount of \$8 per ton, not enough for commercial mining but still traces of gold.

Pete Hamm died soon thereafter and Mrs. Hamm married Arthur Quintal and in the following years, up until about 25 years ago, scores of gold seekers prospected in the Oklahoma hills.

Mrs. Quintal died only a few years ago still believing gold to be on her land.

George Berry now owns the original property but the aban-doned site of the first gold hunt still remains affording memories to settlers of the region of what might have been a gold rush.

New Section Is Added to Artesia

ARTESIA, N. M. (WNS). - A former cotton patch has almost overnight been changed into Artesia's newest addition, Alta Vista.

The Carper Drilling Co. of this city bought the land ,drew up plans, made surveys. Sidewalks and gutters were constructed, rock and asplialt brought in, and planning. streets paved. Scotch Baked From Irishmen

Condensed from a story by JUDGE R. C. CRANE

SWEETWATER, TEX. (WNS).-Chained to a mesquite tree, early day lawbreakers of Nolan County paid the price for recalcitrance in the West Texas sun. D. S. Arnold, an early resident here, recalled that on his arrival in Sweetwater, late in 1882, he saw two Irishmen locked with chains to mesquite trees near the west end of the T & P depot.

In 1881 the Commissioners Court passed this order, at a time when no jail existed in the county: "That the county convicts be made to work on county improvements, cleaning out the streets of Sweetwater, grubbing up stumps, and the convict be allowed \$1 a day when he werks 10 hours, and if he refuses to work or is refractory, to be fed on bread and water and not be allowed anything else until he is willing to perform good work, and to be chained to a mesquite tree away from any person so as to be solitary until he works a sufficient number of days to pay his fine and all costs for each day he may work 10 hours good work, and not allowed any whiskey or intoxicating liquors of any kind whatsoever."

Advice for Good Milk Production

The rise and fall of Texas milk production during the year is too

Since June pasture conditions do not last all the year, the next best thing is to have supplemental hay, pasture and silage.

For more nearly continuous production, farmers should supply one acre of sudan grass per cow for hot weather grazing, one acre small grain per cow in cold weather, and three to six tons of silage

Feed, however, isn't the only item to consider. Cool shade in summer and warm shelter in winter help a lot.

Peter Cooper, 1791-1883, con-1000 votes for president.

Yes ... People

Do Get Well

Not Just Temporary Relief

THE ONLY CLINIC OF ITS KIND IN THE WORLD

PERSONAL MESSAGE TO YOU

DID IT

ever occur to you that you are still suffering, because you think that your case is incurable, and that nothing can be done about it? IF YOU

could be entirely well, but refuse something that has helped so many people over the United States to health. Do you not think that possibly you are making the greatest mistake of your life?

CONSIDER

1st. Sixteen years of successful practice during which time-we are not bragging-but can actually show you by the people that we have treated more cases successfully than any one in the world. 2nd. There is only one cause for Asthma and only one cause for Hayfever. And when this one cause for each disorder is properly treated and corrected, it is impossible for you to suffer any longer. 3rd. The fact there is only one cause for each disorder—together—with the fact these treatments have proven successful to hundreds of people over the United States, ranging in ages from 7 months to 82 years. People that had suffered for years and years. People that say had suffered all their lives. People, you might say, had one foot in the grave, that are well and enjoying life today. Do you not think that you have the same opportunity as they?

4th. Asthma and Hayfever are never inheritable. They are acquired disorders. Yes, you have acquired your suffering. Do you not think that you can acquire your health? 5th. Where a person has given their 100 per cent cooperation, I can truthfully say, these treatments have never failed. However, we do not take all cases. For instance, people that have other complications that would hinder their advancement. 6th. These treatments are so effective

YOUR RELIEF SHOULD COME WITHIN FIVE DAYS TIME THE FACTS

concerning your case are very simple. Yes, as simple and as sure as 2 plus 2 equals 4. So simple, a small child can understand the reason for your suffering.

BE SKEPTICAL-AND SUFFER THE CONSEQUENCES, You never had a better opportunity to get well-THAN NOW.

Dickens County One of Finest **Hunting Areas**

SPUR, TEX. (WNS). - Located in the land below the Caprock, this town and Dickens, the county seat, share in the trade and benefits of Dickens County, which is enriched by \$5,000,000, the annual value of farm crops, and \$374,,406, the value of livestock.

Cotton has long been the major cash crop in the county, but the recent trend toward grain sorghums indicates it as the coming money crop. Wheat, oats, hay and alfalfa are also grown, and home canning has preserved up to 500,000 quarts of fruit, vegetables and meat a year for home use. Parts of three large ranches are located in Dickens County: Matador, Spur and Pitchfork.

Dickens County is one of the state's finest quall-hunting areas, and its spring stock show attracts buyers from all over the state. The State Agricultural Experiment Station here is visited by state, national and international figures almost weekly.

There are 1,031 farms in the county, with 107,053 acres under cultivation. Two 4-H Clubs have a membership of 185 girls and 111 boys, while 85 youngsters participate in FFA work, and the 11 HD Clubs have 181 members. The Dickens County Electric Cooperative hopes to serve 364 members when present lines are completed. It already has 139 miles of line completed.

come a center for production and distribution of planting seed of many kinds, notably cotton and grain sorghums, although gardens and other field seeds are processed and distributed over much of the territory of the South and

Cotton and wheat are the major sources of cash income for farmers, although production of hay (principally alfalfa) and other feed crops is gradually assuming a place of larger importance in the agricultural economy of the section. Facilities for processing and preparing for shipment agricultural products include modern grain elevators, feed mills, gins, cotton compress and cotton seed

WAYNOKA, OKLA. (WNS). Belle, a mare mule, has no children of her own, so she steals the offspring of other animals. It gets very confusing.

Belle is owned by Orval Mc-Nally, and is on his Cream Line Jersey Farm near Springdale, Okla. She is 25 years old, and was bought by McNally when only a little over two years old.

Belle's strange hobby was noticed by the owner one day when he saw a colt following her across the pasture. She had lured the colt away from its mother. Ever since that time she has adopted all the jersey calves. They go back to their mothers at meal time, but when they've eaten, they always return to Belle, They seem quite fond of her.

EAST FOURTH STREET TULSA 3, OKLAHOMA

This statement is a common answer to hundreds of questions of why accidents occur at nights. In a recent survey, based on a ratio of 300 night accidents, more than 285 gave such reason. There must be something behind such universal complaints.

Members of the Texas Highway Safety Department are pleading, lecturing and demanding cooperation from citizens of the state in promoting safety. Without such cooperation all laws are flexible; they are also uninforcible unless jurors are determined to prosecute.

But why, may we ask, don't we clean up our own roost before offering others advice? Why is it that Texas, the largest state in the Union, has failed to pass a law compelling motorists to dim lights when meeting other motorists after

Have you ever driven along Texas highways, dimmed your lights and received no response? Remember the profanity uttered, or thoughts you had when this "scum of the earth" failed to reciprocate? Doesn't common courtesy demand a driver of an automobile adhere to road etiquette by dimming his lights if you dim yours? Then why, may we ask, doesn't Texas demand such a law be passed, as our neighboring states have demanded, and promote another safety MUST?

Soft shoulders along our ribbons of pavement; a culvert around the next curve; a dangerous underpass, then a curve as only Texas knows how to plot a dangerous highway. invite another accident. If the fellow approaching won't dim his lights, your chances of not having an accident have diminished almost twofold, according to safety engineers.

Whether Texas ever passes such a law of dimming lights at night or not, common decency requires this courtesy. Any filling station attendant will tell you how your fights rate with legal requirements.

No one should have to tell you to DIM LIGHTS for the approaching driver. By doing so, all of us may live to tell of our trip tomorrow.

But, whether the approaching driver dims or not, dim your lights. He may be the type of driving fool-your lights might blind and send him crashing head-on into your automobile.

For Safety First — Dim First!

pink bassinet of dawn. The paint- New Mexico. ed, green wheel atop the high tower, turned slightly but the counterweight pulled it back. White face cattle bedded in the purple needlegrass, rose slowly, kneeling for an instant on their fore legs, and walked to the empty trough, one after another. A thin-hipped old cow dug a sharp-pointed horn into the flank of a heifer; a clatter of hoofs and a bellow of pain. The bawling was started, fanned by the flame of thirst. The sun pushed long blades of light into the tops of cottonwood and hackberry trees. There was a heated and breathless moment in which every leaf became still, then the wind struck. The big wheel turned rapidly and a stream of water soon poured from the galvanized pipe. The clear, cool liquid splashed in the black mud at the bottom long necks to reach the water, now flowing in little valleys, against the rusty iron sides. The wind, hot and strong, bowed the mesquites and swept dust from beneath the moving cattle's feet. When the wind mill shadow was short and north of the tower, the last sow had returned to the prairie and four inches of water covered the trough, a blue dove alighted on the pipe and dipped its beak cautiously and often into the water. Life is fed from fountains of the wind that flood Texas prairies.

Broken and decayed cross-tles, lay on the side of fills that traced the abandoned railroad's course. Fingers of erosion were buried in

the empty roadbeds; vandals of weeds and grass profaned the labors and sweat of many men. A splendid dream lay broken beside the crumbling altar of some mortal's ambition. The rails had been tipped from the spikes like the destruction of

Cattle strained their and usually through a cooling rain. Trout fishing is excellent, accom- tions. modations good. The route is over state highway three.

Taos, while appealing mostly to lovers of art, Pueblo Indians, and lazy Mexicans, should be seen by everyone if only for an hour. The leading hotels offer a variety of museum pieces and the short side trip to the Pueblo is worthwhile even if filthy dirty as only Indians could stand. The art colony does not appeal to the casual traveler but those appreciating portraits scenic murals, or think do, will enjoy the

Leaving Taos enroute to Santa Fe, one enters the gorge cut thousands of years ago by the head waters of the Rio Grande River. Molly and Beauty. Molly was a day he just diluted it with two docile animal used to doing all of gallons of water. It is a known cavating but the scenic beauty offsets all thought of fact.

Santa Fe is still the tourist resort for travelers and is always Beauty's. She was a real pet, loved full to the brim, and simple arithcrowded. Reservations should be made well in advance.

The route to Albuquerque is nothing to be excited about until reaching Bernalillo where the motorist should turn off the high-way and travel the Sandia Mountain scenic pass, or "Skyline Drive." This is a magnificent drive equal to anything in America, climbing to an unsurpassable view at 11,000 foot crest of the Sandia Range over fine, safe roads. The entire distance is only 78 miles. One may expect to see great numbers of deer and other wildlife. The finest picnic spots in the State are along this drive. One may see in all directions for 100 miles or more at the summit, look down on Albuquerque, the Rio Grande, view the major peaks of New Mexico and, often, fact I had to work. Beauty stepped witness a lightning and thunder storm below.

Bandelier National Monument is only a short distance away. This is the scenic location of a notable group of prehistoric Pueblo ruins. A disastrous drouth of the 1200's caused Indians to migrate to this upper Rio Grande canyon in search of water. Ruins prove it to have been one of the cultural spots of that era. Geologically as well as archeologically, the ruins are interesting and historic. The site is open May through September and excellent lodging is available as is a conducted

Also turning from Bernalillo and some 60 miles from Albuquerque is the famed Jemez Country, a rugged and beautiful mountain out, spend the weekend with me, area abounding in wonderful camping and picnic spots with hun- and act the life of a farmer. Hitchdreds of miles of good trout streams.

There are countless Indian Pueblos near Albuquerque such as turns than that which comes from the Aztec Ruins, Acoma, Cochiti, Isleta Jemez, Laguna, San Felipe, Santo Domingo and Zia. Isleta is only some 15 miles away. Here is where Coronado once founded a headquarters and is considered one of the most authentic Pueblos in the state.

Our trip through Isleta, where pictures of the age-old mission and a softball game between young Indians were outstanding, took us to Belen, a historic old city, to Elephant Butte, where fishing is unexcelled, Hot Springs, the state's health spa, to Las Cruces ever winding along the Rio Grande.

Our trip then led us along the Army Proving Grounds to the Great White Sands, to Alamogordo, Ruidoso, Roswell, to Billy the Kid's Museum and Grave near Fort Sumner and back home. Carlsbad was passed up as the party had visited the Caverns many times before.

Ruidoso appeals to the young set. This is merely a carnival town located in the mountains, reminds older people of a honky-tonk setting yet is filled to capacity with Texans, Oklahomans and Michigan tourists.

The White Sands still remains the amazing attraction of New given to beauty. More often it is Mexico. Approximately 70,000 visitors have registered there this year. the ugly, gnarled tree that, grow- Many have made their third and fourth trek through the dunes, ever

Johnvill Faris, custodian of White Sands has made many visitors were told by the men. Each yarn storms, seasoned in the blistering change their mind regarding federal employes. His every wish is ovens of despair and forced to for the comfort and enlightenment of the visitor. His staff is the most obtain its sustenance from thin, courteous this writer has ever encountered at any national park. Entrance fee for car and occupants is only 50 cents. It is worth a fortune just to see the attraction. Do not visit the Sands without hav-One objection to winning an ar- ing Faris or P. W. Steel, the gate ranger, or some member of the into oblivion. It was a great event gument is the lack of certainty staff show you through the museum and explain the National Park

The White Sands (137,885.91 acres, approximately onethird of the sea dunes) is the largest of the rare gypsum deserts, some 224 square miles of huge snowdrift-like dunes, some more than 50 feet high. It is one of nature's masterpieces. It resembles snow and local ski addicts often use the sand dune for thrills. Even the mice and lizards here are white although a short distance away where beds of black lava are found they are black and in nearby red hills they are red. The region is rich in Indian, Spanish and early American lore. Many dunes, shifting with winds, have uncoveerd valuable museum relics of the past ages.

These dunes are ever growing, ever moving, ever changing. Yet the officials have excellent roads through them offering the visitor an unforgettable memory of something the layman cannot ex-

A visit to the Alamogordo Chamber of Commerce will bring directions to a score of other unusual attractions in the vicinity. All are

Billy the Kid's grave and museum continues to draw thousands of tourists. Owners at this military cemetery have installed air conditioning in the museum proper, now offer regional trinkets for sale

Four to five people may make this loop for less than \$200, including all expenses, and see all of the highlights while enjoying the best accommodations. Furthermore it can all be made in seven days.

PITY the lad who never chopped cotton, picked boles or rode a godevil on a farm. He has missed a well-proportioned part of life. To me, these things represent the first been done away with, for in my lessons in patience. It also represented the first earned dollar.

Uncle Herman is as loyal an American as anyone, but when you pay income tax some smart alec in Washington wants of pickers to clean his field and to know how you make the money. Capone made his mistake.

All the kids in town like my Uncle. He is always taking us to the drug store for ice cream sodas in the northwest with another in and going on fishing trips with us. All the boys think he is a regular

Last summer we organized a Boy Scout troop in our town. We fellows elected him Scout Master. Uncle Herman was tickled pink. through the ventilation vents, the He bought uniforms for every one most thrilling yarns I ever heard of us. He even went on hikes with us and wore a uniform, too. He did look funny in short pants, but he some storm he had survived. If said it was good child psychology to wear what we did.

As Scout Master Uncle Herman was a howling success, but the old hens of the town raised so much for any boy to remember. On two cain that the troop finally broke memorable occasions I was al- up. All the fuss they raised after our September first picnic! Uncle to open the cellar door and see if Herman barely flavored the lemonade with his white lightning. It didn't even make any of us sick, but everyone in town got mad. They even threatened to ride Uncle Herman on a rail, but that didn't scare. Uncle Herman. He said he had put more time on a rail than any of the so-called good citizens had put on their knees praying.

The Scout Troop broke up, but the earliest sheep ranches here was started in 1881 by Robert Boyle, on Beaver Creek. The Boyle family came from the partition of the partitio day night down by the river. Being a pledged member I can't reveal any secrets. I have already said too much. But this much I can say. When we grow up and are old enough to vote, we are going to elect Uncle Herman mayor of our town. Then we are going to Spend your vacation in your ride all these undesirable citizens but of town on a rail.

Oklahoma, Texas and New Mexico

AMARILLO, TEX. (WNS).—Newcomers are unaware and old-timers sometimes forget that millions of acres of the West could not have been selected nor successfully cultivated without the nearly half-century effort of the Bureau of Reclamation. The Bureau has again and again developed dams, reservoirs and irrigation systems that called for capital investment too large for private enterprise. Each of these projects takes years of planning and investigation before recommendation for construction can be made.

Gauging stations must be operated for several years on streams to determine the true water supstudied to pre-determine the yield augmented income are considerunder irrigation. It also gives him the opportunity to become acquainted with the various fields of work in his chosen profession.

Projects Considered

A number of projects are being considered at present by the Bureau. The Palo Duro Project, about 10 miles north of Spearman, Texas, would furnish about 20,000 acre-feet of capacity storage. The Kenton Project, around 15 miles from Kenton, Oklahoma, would irrigate about 11,500 acres of new land and furnish supplemental irrigation for 600 acres. This reservoir, located on the Cimarron River, would be called either Spurgeon or Kenton. The Fort Cobb Reservoir, about 6 miles north of Fort Cobb, would irrigate about 6,000 acres of new land. In New Mexico by means of a diversion dam and the Capulin Project, with the canal. Bureau Considering Projects in Arid Areas Made Productive

by Widespread Irrigation Half-Century Dream Realized

As Altus Dam Nears Finish

ALTUS, OKLA. (WNS).-A 44-year-old dream nears fulfillment as the final touches of construction are added to the Altus irrigation project. The Lugert-Altus Irrigation District covers 60,000 to 70,000 acres in the Red River watershed, most of the irrigable lands being within a 15-mile radius of Altus.

Governor Robert S. Kerr, on an inspection trip, said the people who 'made the run' thought their was the last act of pioneering, but today we have before us more entrancing, more alluring horizons

that ever confronted them." Governor Kerr stated that with the irrigation development an in- the largest, is 6000 feet long and

crease in crop production of more than a million dollars annually could be expected. He said that this added income could provide new employment and income opportunities for at least 2,500 additional people in this area in the more intensive development of agricultural, industrial and service occupations. Kerr further stated the project would not only stabilize the agricultural economy of Jackson, Greer, and Kiowa County areas, but would also stabilize the population and business economy. The Altus project is different from some Bureau of Reclamation projects, he continued, in that it seeks to stabilize production of crops, rather than reclaim arid

'Extra Rain'

The completion of the project will mean that a farmer in this region may put four inches of water on his crops at will. It will be the equivalent of one extra rain in a growing reason. The cost to flood land to a depth of four inches will be around 33 cents an acre. In addition to the bill the farmer pays for the water, he must pay approximately \$1.72 an acre for the operation and maintenance of the elaborate system of con-struction and ditches which carry water to his farm. The farmer himself does the work of leveling his land and building the neces-sary embankments to evenly distribute the water.

Under rules of the Bureau of Reclamation, only 160 acres of land can be irrigated by one land owner. Any land above that figure must be sold if it is to be irrigated, at appraisal for land without benefit of the project.

Farmers of the community attend a series of meetings conducted by the Soil Conservation Service and Bureau of Reclamation. In a May series of meetings, Willard Smith, of the Bureau of Reclama-tion, explained the methods by which water would be made avail-. able to the farmers the first year, the methods of charging, and the amount of water that would be available.

Equipment Available

ment are available to county farmers and can be procured at small maintenance cost. The equipment includes land leveling implements. ditching machines, small road maintainers, and border makers suitable to be used with the average farm tractor.

Oklahoma A & M has opened a new irrigation experimental farm which will receive water from the

lake.

Ernest L. Williams, Superintendent of the irrigation research station, states that studies of field and horticulatural crops under irrigation conditions—crop varieties, tillage practices, insect and disease control, harvesting, marketing and other problems—will be studied. This farm includes two studied. This farm includes two Ernest L. Williams, Superintracts, one of 72 acres and the other of 18 acres.

Soil Experiments Two types of soil are found of on the experimental farm. "Hard" type soils, used commonly for production of alfalfa, wheat, cotton, sorghum, and similar major farm crops make up the 72-acre plot. The 18 acres include loose, more

dam on the North Fork of Red River, 18 miles from Altus, to show district people the mechanics People enthusiastic of getting the water on the crops. The special station takes up the study of utilization of water where the reclamation service leaves off. City Gets Water

The project water supply will be of canyons and va obtained from the reservoir formed Mitchell County line. by the Altus Dam. The run-off ipal water supply.

The dam rises approximately 100 feet above the stream bed and has

a crest of 1,160 feet. Lugert Dike. has a maximum height of 45 feet above natural ground surface. The main canal, with a capacity of 1000 cubic feet per second, will transport water 4.2 miles from Altus Dam to the north boundary of the irrigable land of the project. Approximately 340 miles of canals and laterals are required to serve the land.

The city of Altus contracted to repay \$1,808,000 on the construction cost for use of a water supply. Far-sighted People

Back about 1902 W. L. Fullerton, Jackson County farmer, had irrigated with great success from Turkey Creek, and the idea was firmly entrenched in the minds of the people that irrigation would make Jackson County a highly profitable farming area. J. A. Walker, a young merchant of Altus, along with M. L. Cowan, real estate man, was sure that irrigation should come to this area.

In 1915, the Bureau of Reclamation was a very minor thing. Eastern congressmen insisted it was a socialistic dream in which the government should have no part. They consented to small appropriations because they thought the project

would fizzle.

Fullerton attended the Seattle irrigation congress, and did enough button-holing of officials of the Bureau of Reclamation to exact a promise that a survey would be made in southwest Oklahoma. A little while later J. G. Camp, an engineer with the Bureau of Reclamation, showed up in Altus with instruments to test the flow of water in North Fork of Red River. Camp was getting along fine until spring when the rains set in. He had so much trouble that he gave up in disgust. Every time that he would get his instruments located to test the flow of the river a flood would strike and wash them down stream. He made a report to Washington but told local enthusiasts that "What this damn country needs is a little flood control, not irrigation." Surveys Made

But irrigation was not a dead issue in Jackson County, and every Several types of leveling equipwas revived in earnest.

During the spring and summer of 1924, C. T. Peace, Bureau of Reclamation engineer, spent considerable time in southwest Oklahoma making surveys of several proposed irrigation projects. He centered his attention on the dam site at Lugert and checked the

DAMS PAY FOR EQUIPMENT

Commissioner Hawkins at the control of his idea which is storming Oklahoma as improving county roads without cost to taxpayers or county.

(COURTESY OF ELK CITY JOURNAL)

ELK CITY, OKLA. (WNS).—Beckham County Commissioner J. A. Hawkins had some ideas about improvements in his district each week. which he carried through and which might well be considered by other commissioners of the Southwest. He purchased heavy equipment with which to improve his roads without the use of county funds and at no expense to the taxpayers.

To date he has purchased an 85 horsepower tractor, dozer and carryall, a total investment of \$12,971, to use in his improvement

program ever his district, which.* includes the Elk City and Carter area, or all land in the county Robert Lee

To pay for his equipment, Hawkins is constructing acreage ponds and dams over his district. May Move The charge for building each dam is from \$250 to \$275. Of this amount the Federal Government pays \$200 and the cost to the farmer is from \$50 to \$75. Actual expense in building the dams is approximately \$40 and the profit is used by Hawkins to pay for his per acre per year, and members of implements. Commissioner Hawk- the upper Colorado River Authorins estimates it will take from six ity, sponsoring the project, say to nine months to pay for the that the value of the land will be machinery at no cost to his tax- quadrupled.

It requires only three days to construct a farm pond and dam with the Hawkins equipment and the commissioner has requests for such construction from farmers throughout his district. The equipment is being used only in the ondary canals about 12 miles long second commissioner's district and roads are graded as the machinery is moved from one farm to an-

Not only are Hawkins' constituents delighted over the idea, but other districts in Oklahoma are asking for similar thoughtfulness on the part of their commissioners.

Cattlemen, Bankers Join for Profits

BEAVER, OKLA, (WNS.)-A banker and a cattleman may ordinarily have little in common, but one man in this city has brought the two together.

G. W. Cafky, owner of the Beaver Sales Pavillion and cashier of the Bank of Beaver City, wanted to see cattlemen of the region get a fair deal. So he began holding cattle sales when stock prices were too low, aimed at a reason-able profit for both buyer and

Sales had been started by John Saunders at the local fair grounds, and when Cafky took over, he moved the location to a tract of land near the railroad. Stock pens cover 10 acres and are currently being rebuilt. Sale yards are well lighted with three 1500-watt floodlights and innumerable English Quakers smaller lights, and cattle and hog pens are clean, being disinfected Founded Estacado smaller lights, and cattle and hog

In 1943, 63,000 head of cattle were sold for \$2,265,000, to make the biggest year to date. Average annual sales are 55,000 to 60,000 cattle and 10,000 hogs.

One cattleman at Nogales, Ariz., has been shipping approximately 100 carloads of cattle a year to the sales pavilion over a period of several years. During this time all business between Cafky and the shipper has been conducted by telephone and letter. The two have never met.

Cafky declared, "Inasmuch as many of the cattlemen of this region do business with our bank, it is to our advantage that we see a fair deal is accorded both buyer and seller."

Altus Dam Nears Completion

(Continued from Page 9)

territory that could be irrigated by gravity flow from that point.

The city of Altus built a dam near Lugert, and there was much agitation for irrigation. In 1930, E. E. Blake, national authority on irrigation and flood control, came to Altus, Blake estimated that 150,000 acres could be irrigated from the run off of water. He advised, however, that ample water Present over-grazing of approx- supply be insured by not attempt-

The survey included rainfall, river flow, flood runoffs, soil analysis, topography, marketing, crop diversification, economics and other factors that would determine the feasibility of

The reports were released Febates the Alamogordo Dam and from irrigation, flood control, rec- ruary 18, 1938, and were based on Reservoir. This agreement provides reation and wildlife would be a reservoir with a storage capacity \$2,152,800. Repayments over the of 163,000 acre-feet and a district charge at Puerto de Luna, and the 40-year period to meet irrigation of 70,000 acres. The total over-all amount to which the district is construction costs would be cost, including dam, reservoir, main canals, lateral systems, draining and miscellaneous costs was estimated at \$5,365,469.00.

Reclamation laws required an irrigation district empowered to do business with the Bureau of Reclamation. The Lugert-Altus district was empowered to do business with the bureau. The Lugert-Altus district was approved, 333 to 42, in an election held March 29, 1940.

West Advances

Wesley R. Nelson, Regional Director of the Bureau of Reclamation, said in a recent address: Americans, until recently, thought of irrigation, flood control, and development of hydro-electric power, fish and wild life and recreational facilities as the peculiar problems of a remote and rather unpromising section of the United States.

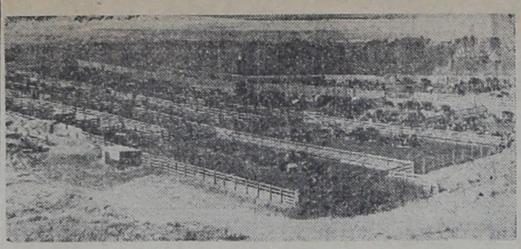

"The west will continue to move rapidly toward increased security against destruction and waste of its water and land resources. States in sub-humid zones will demand that experienced agencies of government help them stabilize the economy of their rural and urban communities. Even on land which was successfully farmed without irrigation, better crops may be produced when water is under

"Rain often comes at inopportune times and again fails just when it is most needed by the ma-

turing crop," he declared.

Altus is the first reclamation project in Oklahoma ,and its success will in all probability open the way for similar projects in the

BANKER STARTS STOCKYARD

Beaver Sales Pavilion constructed by G. W. Cafky in order that cattlemen of his region would have a place to sell their stock and receive a fair price.

CROSBYTON, TEX. (WNS.) Founded by a colony of English Quakers, the town of Estacado now shows only a marker commemorating the experiment begun in 1897 under leadership of Isaac Paris Cox. But another pioneer, Henry Clay Smith, has not only a statue in his honor, here in town, but a thriving agricultural county as a memorial to his efforts.

With an excellent system of contouring and terracing, and more than 85 per cent farm mechanization, Crosby County produces large quantities of cotton, wheat, grain sorghums and other feedstuffs. Income from these crops is supplemented by sale of beef cattle, hogs, sheep, turkey, eggs, cream and spring lambs. Frozen food lockers are in general use.

This city, the county seat, has a trade territory of about 25 miles, a population of around 1,800, 30 retail merchants, and showed bank deposits of well over \$2,000,000 early this year. Annual celebrations include the Old Settlers' Reunion in the fall and the County Fair in the spring. At Ralls, in the same county, Bills' Day is held each year.

WHEN YOU COME TO BIG SPRING (And Everybody Does)" come by to see me at the oldest drug store in Big Spring and we will shoot a little bull about this vicinity - if you are interested and we might mention the fact that my book "BIG SPRING" is in its tenth printing, thanks to the efforts of my friends.

Old Timers Recall Rainmaking Efforts

Post Used Dynamite to evident, l'ost was ready for a great load of dynamite was to be used—load of dynamite was to be used—loa **Burst Man-made Clouds**

Western News Service Feature)

POST, TEX. (WNS).—Farmers, ranchers and citizens of this South Texas Plains region are hopeful some "rainmaker," like the founder of this city, will return and bring down moisture from the heavens, if drouth continues. Old-timers recall how Charles William Post spent a sizeable fortune at the turn of the century endeavoring to water his vast land holdings in Garza County and vicinity, through

Post, for whom this city was named, and one of the major colonizers

of West Texas, was one of the first to experiment in bringing on rain to a semi-arid country. Not content in perfecting such products as Postum, Grape Nuts, Elimite. At a signal each man lighted ucts as Postum, Grape Nuts, Elijah's Manna, Post Toasties, inyenting stoyes and machines of venting stoves and machines of teen salvos were fired that after- plosion to follow another as rap- der Company charging them with through his brain on May 14, 1914. diverse types, this restless genius entered, with bouyant optimism, into the most famous rainmaking thes, later at live, and linally at lost did, I believe that you had no conadventure of all time. And who hour. Post lost the battle. No rain peated his request to "shoot up a fidence in the work, and simply hour. Go ahead." erably the first one in the afternoon and the next the following shots were fired from each of the taste. Livers should be canned morning."

Stages Another Battle

Battles were staged on the afternoon of July 2, 1912, and on the following morning. The afternoon bombardment began at 1:30 o'clock and raged for two and a half hours. Fifteen hundred shots of three pounds each poured from the walls of the Cap Rock. At 7 o'clock that evening a heavy cloud appeared in the northwest. But it by-passed and left Post City high and dry. Next morning another battle rattled cups and dishes in farmhouses ten miles distant but lands. The final result was that exploded with no appreciable results.

But the "Rainmaker" did not weaken. Crops were suffering, agers ordered a "double-header three-pounder" battle for July 10

In February, 1912, he published battles, or 24,000 pounds in all. hysterical settlers. Greatly encourant article in "Harper's Weekly" Not a cloud was in sight when aged, Post wrote: on "Making Rain While the Sun firing began. Winds shifted from tional comment. Inquiries poured east, as terrific detonations shook turbances are frequently necessary into Post City and Battle Creek the earth. Smoke covered the to precipitate the moisture, and planning similar experiments and ered half the sky; but no rain you should begin at least by 5 was coming to Texas to watch a fell. In the afternoon firing lasted o'clock." two and one-half hours. Clouds But early spring rains in 1912 grew thick then drifted away. Still no rain fell. Practically the same results were recorded on July 12. The "Rainmaker" chalked

Cowpoke Laughs at Age; Wants Action

Uncle Bob Ready For All Contests

By OLETA PARKER

ROTAN, TEX. (WNS). - Uncle Bob Weatherby, veteran cowboy and cattleman, and guardian of the finest traditions of the Texas range since the rough and ready days of the late 1800's, 'set the saddle' for 52 of his 74 years and never-"smoked a cigarette, took a drink of liquor or a chew of tobacco in my life."

"Living alone on the remaining acres of his homestead in the North Roby community, half way between Roby and Rotan, in Fisher County, Uncle Bob "rides into the sunset"-not astride his trusty sorrel on which he rode to victory in many a calf roping contestbut at the wheel of his wiry little Model T roadster, now thoroughly halter broke to the glorified cow trails of a disgustingly civilized cattle country. Model T notwithstanding, attired in conventional white Stetson and cowboy boots, Uncle Bob is still geared for action, only in recent years foregoing the added adornment of jingling spurs. Handsome still and regal in bearing, Uncle Bob stands as straight as an arrow, and walks with the energetic step of a man of 45. With perceptions as keen as a whip, Uncle Bob's memories of earlier day happenings in the cattle country leaves little for the imagination. On dates and places he is a catalogue of information.

Few Texas Brags

In true Texan manner, Uncle Bob has a brag or two-"I raised a big family (nine children) made a fortune-went broke," he says with characteristic humor. Which is, after all, only traditional history of half a century of ranching in a cattle country! Another brag-"Not one of my children or in-laws have ever been before a court of law on a misdemanor charge."

The death of his wife, the former Miss Lillie Gertrude Barron, in 1940, was the first in his immediate family. He was married to Miss Barron, the daughter of prominent West Texas ranchers,

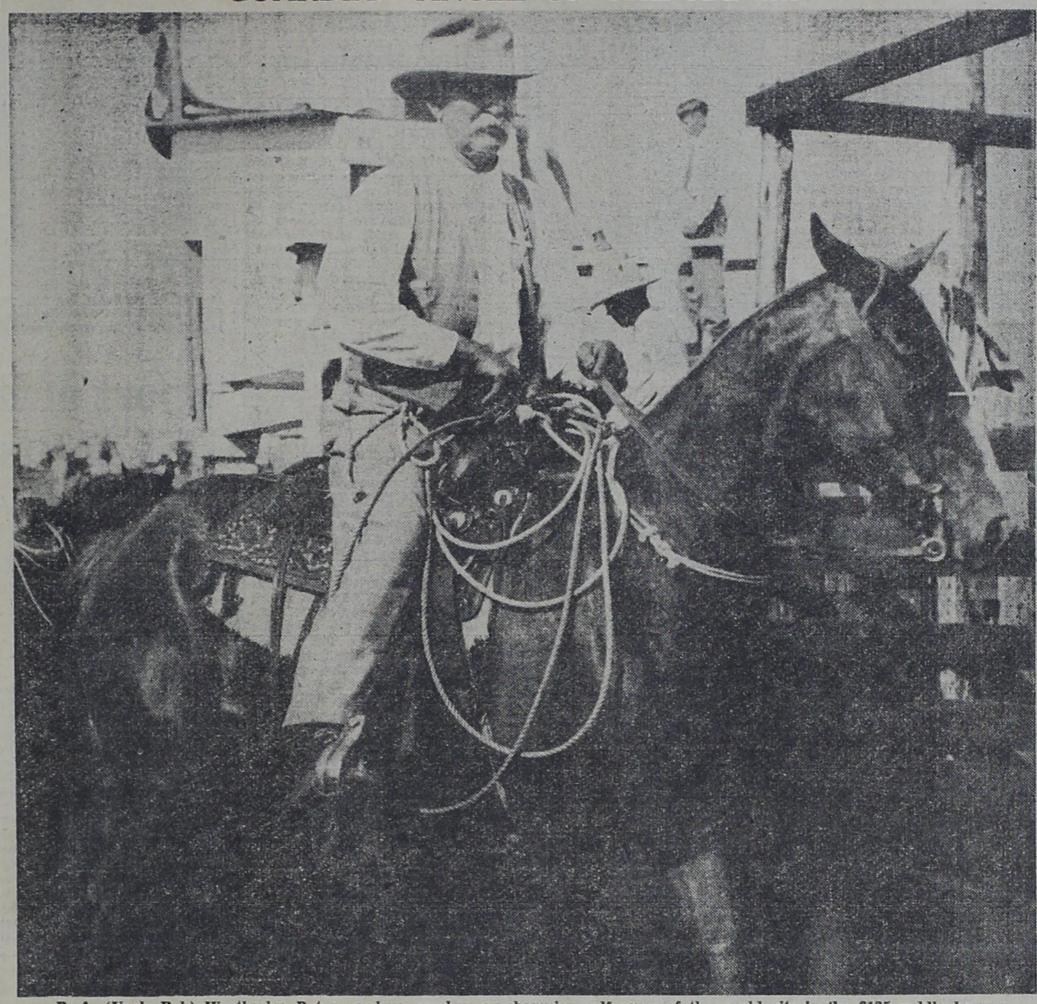

Breaker of records, Uncle Bob Horse Wrangler silver screen!

Born at Calvart

Uncle Bob was born R. A. Weatherby, the son of Mr. and Mrs. M. N. Weatherby, on April 4, 1872, at Calvart, Texas, in Robinson County. In 1878 the family six year old Bob riding an old sorrel mare, bareback all the way, helping out with the family herd of 77 cattle. Twenty days on the road and 125 miles of bareback riding made a full fledged cowhand out of young Bob.

McCAMEY, TEX. (WNS) .-When talking to James Carll, publisher of the McCamey News, it's hard to believe he's a writer of western fiction.

He talks more like an Englishman than the two-fisted, guntotin' characters he puts down on baper. He calls France "Frawnce."
He says "righto" instead of "yep."
But despite his refined speech,

Carll has been very successful in hitting the "pulps." He's sold stories to practically every mag printed by Popular Publications, and Fiction House, Inc. These publishing houses put out such pulps as Western Stories, Action Stories, Lariat Stories, 10 Western Stories and Northwest Romances.
A Million A Year

Carll said from 1935 to 1941, he had approximately a million words a year published. He's had as many as four stories in a single issue. He wrote under the pen name of "Jay Karth."

He also writes athlette yarns

for the sport pulps.

Carll was born at Pendleton,
Tex., on May 21, 1904. He attend-Tex., on May 21, 1904. He attended school at Temple, Dallas and Prairie Dog Is Fort Worth, and graduated from high school at Fort Worth in Doomed Because

He enlisted in the Navy in 1921 and served aboard the Arizona, sunk 20 years later at Pearl Harbor, and the USS Hull, the first Pete Ross, county agent, took his ship sunk off the coast of France life in his hands recently when he on D-Day. He was a radioman.

Was At Dutch Harbor While in the Navy, he was attached for awhile to the Navy radio station at Dutch Harbor. He said Dutch Harbor's only armament then consisted of five Army rifles with no ammunition.

writing fiction. "We were stationed for quite sometime on the little was "most satisfactory." island of St. Paul," he said. I? I started composing stories, tion. mostly about the north, writing them with a pencil in longhand. I saved the copy I wrote on St. Paul and later made money out of it, using it as reference material for my stories about the North."

Discharged from the Navy in 1925, Carll went to work for Western Union as a Morse operat the University of California in Oklahoma and Texas in the fight Berkeley while doing this work. He continued working as a Western Union operator at San Francisco until 1935. Then he began writing fiction in earnest, graduating from a telegraph operator to an author.

Became Editor

He dropped his pulp-writing career in 1941, and went to New York City as editor of a Western Union publication. He was also assistant advertising manager for Western Union.

When Western Union created its Industrial Public Relations Deassistant to the vice-president of postmaster would collect stamps as this department.

Cotton, Cattle Main Income for Childress Group

CHILDRESS, TEX. (WNS). — Named for George C. Childress, author of Texas Declaration of Independence, this town and county truly represents a two-C center: Cotton and Cattle. Over 25,000 bales of cotton are produced in good years, and an estimated 15,000 beef and dairy cattle raised. Acres in cultivation are about 200,000 on 1,300 farms in the county, where, in addition to cotton, grain sorghums, wheat and vegetables are raised, at an annual value of around \$3,500,000. The Gates City Coop, an REA project, serves 650 members over 200 cattle, hogs and poultry, was \$1,500,000.

The city of Childress, "Gate City" to the Panhandle-Plains, boasts 1,200 home-owners, with bank deposits early this year set at \$7,669,674. Three city schools have an attendance of 2,034, while an additional 1,045 pupils attend the seven county schools. The town is served by eight daily trains, 32 daily busses of five bus lines, one airline, and six motor freight lines. Railroad shops, gins, an oil mill and cotton compress. two packing houses and a feed mill, and 90 retail merchants make it a trade center for the territory. Three hotels and four tourist courts are in operation, while new homes and business buildings are

CLAYTON, N. M. (W.N.S.) .- Bound for the Kentucky Derby in 1947, Dr. J. M. Winchester is breeding and running racehorses as a hobby. His two-year-old, Lee Wick, sired by Wickiup, is going to make the races in July, and if he shows enough speed will be entered in the Derby next year.

Dr. Winchester, who also owns registered Herefords and milking shorthorns, has been around race horses, pacers, and trotters most of his life, and combines this interest in the Sport of Kings with a

medical practice.

In 1919 he owned a pacer named Togo Prince which won enough money to build a hospital, which he donated to the Catholic Sisters, who have since enlarged it. The hospital is now one of the best in the region.

Prize horse of his stable is Granville, who was top money winner of the year in 1936. Granville was raised by Col. Woodward, the only man to raise 12 horses who have won \$100,000 or over during a season. Granville's sire was Gallant Fox and his dam was Gravita.

Mares in the Winchester stables include Wee Drop, sired by Stimulus; Legora, sire, Legume, dam, San Dora; and Trebla, sire, Supremus and dam, Malpolene. In addition to medicine and

horses, Dr. Winchester is even more proud of his children. He has two boys in service, one in the Army and the other in the Folks in West Texas who are Navy, and his daughter is a nurse.

To Washita Basin

ELK CITY, OKLA. (WNS) .-Oklahoma farmers in the Elk City area are eagerly looking forward to the consideration of the Foss Reservoir and Irrigation system, now under investigation by the Bureau of Reclamation.

Farmers of the Washita Pesin area are victims of bad natural distribution of water and periods of extreme drouth that cause low crop yields in many years. Small amounts of irrigation water, where available, and generally not exceeding one acre-foot per acre annually, have almost doubled crop yields.

Heavy rains over large parts of the Washita drainage basin cause damaging floods, with overflows in some sections as many as five times per year. As a result, these fertile lands in the flood plain cannot be farmed effectively. Need of flood control and irrigation water is becoming of major importance in this area if agriculture is to be stabilized.

The proposed Foss Reservoir, together with three tributory reservoirs, would provide adequate flood control and a full irrigation water supply for 35,000 acres. Of the 256,000 acre-feet capacity of the Foss Reservoir, 55,000 acre-feet would be allocated for siltation, 10,000 acre-feet for fish and wildlife propagation, 98,000 acre-feet for irrigation, and 93,000 acre-feet for flood control. The reservoir site is about 12 miles west of Clinton and controls a drainage area of 1,450

The dam would be an earth fill structure about 104 feet at the highest point. Right-of-way would be approximately 11,000

It is estimated that the improved land would be valued at \$50.00 per acre.

Hockley County Plans Irrigation

LEVELLAND, TEX. (WNS) .-Hockley County's agricultural prospects are looking up this year, with organization of a Soil Conservation District, new develop-"everything looks favorable for a good year."

Climaxing a series of farmer meetings, the soil conservation district was organized to "save the soil now instead of waiting until it is wasted." J. W. Evans of the local PMA supervised the gatherings, which were attended by an by means of a smaller telescope average of 30 men each time.

The drouth caused many farmers to cull their poorer cattle and earth, away, in which direction and start breeding and raising a better the speed of travel." grade of stock. Another bulwark against drouth is the fact that some 75 new irrigation wells have been drilled in the county.

Because of the present shortage of feed, most of the 250 4-H Club boys in the couty plan to concentrate on breeding livestock and raising crops in 1946.

Dam To Be Boon Double Stars Over Texas Seen From McDonald Observatory

FORT DAVIS, TEX. (WNS) .- One of the most unique and fruit- finitesimal fraction of the enerful scientific cooperative endeavors in existence has grown from the gy output of the sun, which itself seven years of joint effort of the Yerkes and McDonald Observatories, is only a microscopic source of

People of this area are proud of the fact that the McDonald Observatory houses the world's second largest telescope, but they take of our galaxy and other galaxies. more pride in an educational policy that allows the pooling of resources of the University of Texas and the University of Chicago Many of the discoveries never to form a completely equipped and well trained research group. When

the University of Texas received* the bequest from W. J. McDonald, knowledge of the revolution and special publications and journals of Paris, Texas, for the purpose of constructing and equipping the observatory, it joined hands with the Yerkes Observatory of the University of Chicago, which had a large, highly trained research staff. Years of preliminary work were thus eliminated.

Land Donated

Low, rounded Mount Locke was donated by Mrs. Violet Locke Mc-Ivor, and it was formerly a part of the U-UP-and-Down Ranch. It was chosen because of a number of very favorable conditions. The elevation of 6,828 feet offers an unusually transparent atmosphere above the telescope. There are no high surrounding mountains, and the large, flat plateau around the Davis Mountains tends to produce uniform air conditions. There are no nearby large cities to give off artificial light which would interfere with the observation of faint nebulosities, and the southern location enables astronomers to observe stars which are completely hidden from observatories farther

Have Double Stars

"Some stars are double stars, or ber, going around in an orbit. We are enabled to observe the revolution of the star, and deduce the weight, mass, and density. Some stars have been found to be a thousand times more dense than steel, while others are less dense than the earth."

Some of the stars photographed are 400,000,000 "light years" from the earth. And one light year is the distance light travels in the 32,000,000 seconds of a year at a rate of 186,000 miles a second.

Research at the observatory has been very productive. Over 120 reprint pamphlets of studies have been issued. A great number of studies are recorded in the Astrophysical Journal. The telescope is in use every clear night from sunset to sunrise, and little time can be allowed for casual observation of interesting objects such as planets, clusters, nebulae, double stars, etc. Most of the work is highly specialized research.

Five per cent ceresan should not be used, as it has injured seeds in experiments.

In recent experiments a 4-12-4 mixture produced the highest average yield of nuts and hay and gave the highest profit. The next best results were obtained from 180 pounds of 20 per cent superphosphate.

Prairies Dusty In Early Days Too

(Condensed from Vernon Times) Vernon, Tex .- (WNS) .- Sandstorms gave early day housewives here even more trouble than they Work by Dr. Otto Struve and do now, oldtimers recall. Many Dr. C. T. Elvey has shown that times a sand storm would come up the vast spaces between the stars during the night, and the next morning the women would have to shovel the dirt out and sweep before they could fix breakfast.

The first news dispatch via

Investigate Site For Canal, Dam

WILLARD, OKLA. (WNS) .-Investigations are under way by the Bureau of Reclamation on the proposed Englewood Reservoir, to be built on the Cimarron River, just west of the Harper County line. The water supply available from the reservoir would be adequate for the project area of 19,000 acres. Two canals, one on each side of the river, would supply the project lands by gravity from the reservoir. Laterals and minor drainage facilities would be provided for all project lands.

A ditch system, covering 6,120 acres, is in operation in Harper County, but the stream flow available to this area is subject to extreme seasonal and annual variations, and occasionally almost complete crop failures result.

Flood control is needed in this area, both to afford protection to the valley lands and to make such water available for properly distributed irrigation use.

It is proposed that an earth dam be built to hold about 232,000 acre-feet of water, of which 80,000 acre-feet would be for irrigation, and the remainder for silt and fleed control.

The project lands are in two compact bodies, one south of the river in the northwestern portion of Harper County, Oklahoma, and the other area is north of the river in the vicinity of Englewood in Clark County, Kansas.

Grubby Cattle Costs Farmers

BROWNFIELD, TEX. (WNS) .-R. W. McClain, county agent of Terry County, proffers a program for farmer's consisting of testing and treating cattle for Bangs Disease which, he says, should be one of the permanent aims of livestock owners in Texas.

The elimination of reactors is an consumption due to lack of pasteurization. These alone, he said should be sufficient causes to free the county herds of such disease.

Grubby cattle cost the livestock industry many millions of dollars annually, the agent added. "The devaluation on grubby cattle is from 25 cents to \$1 per hundredweight, dependent upon the degree of infestation." An average of two pounds of beef per carcass usually has to be trimmed from loins and ribs thus devaluating the carcass around two cents per pound, he added.

Cattle grub is caused by the heel fly laving eggs on the heel of cattle on warm winter and spring days. The heel fly can be successfully controlled by the use of rotin ore and sulphur, applied at 30-day intervals either as a spray wash or dust, the agent said.

GI'S DESERT CLASSES FOR PILOT'S SEAT

10 Little Dogies Prove Care Will Pay Any Owner

SPUR, TEX. (WNS).—Ten plain little dogies, after being fed out for 16 months on good pasture and supplemental feed, sold at prices equal to or better than higher priced calves, according to R. E. Dickson, superintendent of the Experiment Station here.

The calves, predominantly Jerseys, were acquired Nov. 30, 1944, from some old shelly cows that were being shipped from near here. The station took the calves and gave them the best available pasture for 16 months, and supplemental feed for 10 months. At various seasons they were run on al-falfa, wheat or oat pasture, and they were fed a meal and hull mixture which started at the 2.53 pound level and later was increased to 22 pounds per animal

The calves weighed 202 pounds at the start and cost \$20. Their feed cost was \$38.63, bringing the total to \$58.63. The daily gain was 1.64 pounds. They were marketed at the Fort Worth Stockyards at a substantial profit. Most previous tests at the station have been made with high quality stocker animals, but Dickson feels that dogies, if properly fed, can bring better profits than the higher priced

Crockett County Plans Expansion, **Building Program**

OZONA, TEX. (WNS) .- One of the largest counties in the state, covering 2,794 square miles, Crock-ett County derives the bulk of its income from sheep, goats and cattle, situated as it is on the Ed-wards Plateau, center of Texas' grazing area.

Due west of here are the ruins of Fort Lancaster, built before the Civil War on Live Oak Creek for protection of travellers from San Diego to San Antonio. Here in town is a monument to David Crockett, for whom the county was named, and many tourists are also attracted to the annual rodeo and fat stock show sheld each fall.

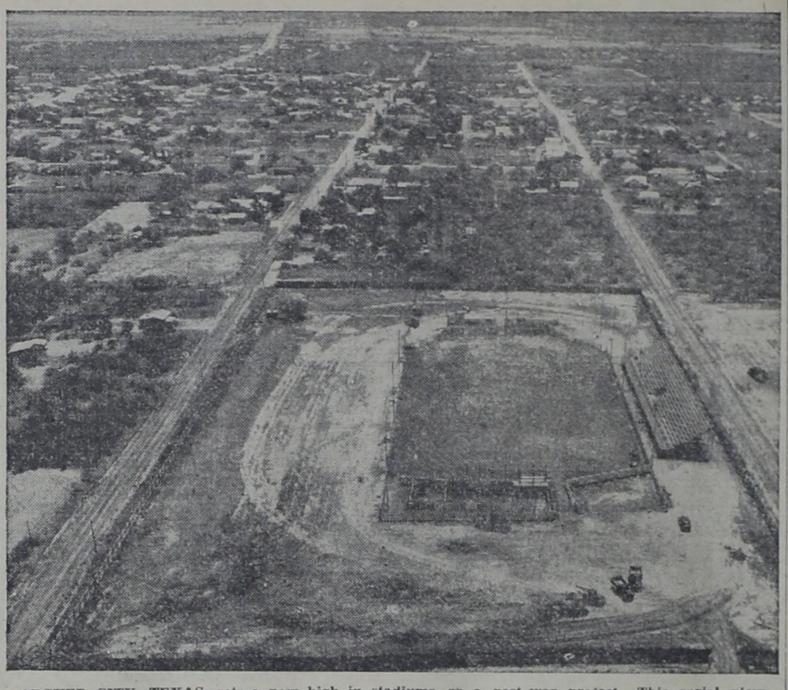

Oil and natural gas also contribute to the county's prosperity, phone during the morning. with several small fields in operation, and over a million barrels of oil produced yearly. This city, headquarters of the oil and livestock interests in the county, has an estimated population of 3,000 out of the county's total 3,500.

Expansion programs include enlargement of water and sewer facilities, constructions of an airport and farm-to-market roads.

DALLAS, TEX. (WNS).—A recent amendment of the GI Bill of Rights has made it possible for every discharged veteran to use his educational benefits for pilot training. With 12,000,000 World War II veterons eligible to the contraction of the GI Bill of Rights and the contraction of the GI Bill of Rights and the contraction of the GI Bill of Rights has made it possible for every discharge and the contraction of the GI Bill of Rights has made it possible for every discharge and the contraction of the GI Bill of Rights has made it possible for every discharge and the contraction of the GI Bill of Rights has made it possible for every discharged veteran to use his educational benefits for pilot training. War II veterans eligible to become pilots at government expense, flight training in the next few years is expected to dwarf the combined pilot-training program of the Army and Navy which graduated 200,000 pilots during the war. Such is the prediction of Raymond Weatherly, former West Texan and now co-owner of the Weatherly-Campbell Aircraft Co.,

The Weatherly-Campbell Company is located at the Highland Park Airport and is an accredited, CAA-approved training school for

A conservative estimate is that 10 per cent of eligible veterans will decide to take some flight training. This will mean 1,300,000 new pilots within the next five years. It also means between one and two billion dollars earmarked for avia-tion training, thousands of new training planes each year and countless thousands of airplane mechanics. It also means construction of hundreds of private air-ports in every state of the country.

The veterans are just beginning to realize they can have up to \$3,000 worth of flying time in place of classroom education. That is enough money for a commercial license, instrument rating or instructor's rating. In many instances it is enough for all three.

Veterans can roughly figure their entitlement (benefit) for flight training by multiplying their day of service by \$2.10 and adding to this sum \$760.00 for the extra year of entitlement given by the government. Thus a maximum of \$3,000 can be granted under the

In addition to a paid tuition, vet-erans attending school a minimum of 25 hours per week can colelct subsistence allowances of \$65 a month if single and \$95 a month if married. If a veteran attends school 18 or more hours each week, stock.

> CAA-approved schools, meeting riculum, and equipment, are permitted to qualify a student for prinon-approved school. A minimum of 160 hours is required in CAAapproved schools for a commercial license against 210 hours in schools lacking such approval.

To get educational training of any kind, the veteran first fills out Veterans Administration Form No. 1950, available at most Veteran's posts and guidance agencies. He sends this, together with a copy of his discharge, to the Veterans Administration Regional office in his state.

In a few days he will receive he can take this notification to the chosen flight school, sign Form 1950A, and be in the air with an instructor the same day.

Eventually, the veteran receives his "Certificate of Eligibility" he is entitled, depending upon length of service.

All approved schools offer complete details for interested veterans seeking flight training. The schools usually provide necessary forms of application.
